Independent Auditor's Report	
Balance Sheets	
Statements of Activities and Changes in Net Assets	
Statements of Cash Flows	
Notes to Financial Statements	

ACICS is pleased to present you with a summary of the Council's activities during the fiscal year including our most recent audited financial report for the organization. The 2003-2004 Annual Report provides our accredited institutions and the public with an overview of our four statements of value intended to express what is important to ACICS within the context of Reauthorization of the Higher Education Act (HEA). The Council believes that institutions must be accountable to rigorous educational, administrative and fiscal standards. We also believe that the ease of transfer of credits will foster a more equitable higher education community and that we must continue to foster distance education strategies, student learning outcomes, and peer review in the accreditation of institutions of higher education.

As evidence of our work on behalf of our accredited institutions and the U. S. Department of Education, we provide you herewith a summary of the evaluation visits conducted at institutions for the past five years and the final outcomes of those evaluation visits. Council staff continues to schedule approximately 100 evaluation visits and consultations during each of three, two-month travel cycles. Based on positive Council actions, institutions are continuing to experience overall growth and expansion of programs and services. There is even more good news to report. ACICS is proud to announce that we now may award a maximum grant length of eight years. For many years, the Council awarded grants of accreditation from one to six years in length. An eight-year grant of accreditation acknowledges and rewards those institutions that have demonstrated an understanding of and commitment to our accreditation standards.

As you will see from the characteristics of ACICS-accredited institutions, total enrollment has steadily increased over the years to more than 430,000 students. Like the increase in student enrollment, the list of ACICS-accredited institutions also has continued to expand. A current list of accredited institutions, by state, is also provided in this report.

A review of the Financial Report will indicate that we are healthy in the fiscal realm as well. Both our operating outcomes and our financial reserves have shown positive results. The ACICS staff is largely responsible for this good news.

Once again, the full complement of dedicated ACICS staff will continue to provide support to you and to those who assure and enhance the quality of institutions accredited by ACICS. It is a privilege to serve as your chief administrative officer and I look forward to another successful year.

Respectfully submitted,

Steven A. Eggland, Ph.D.
ACICS Executive Director

It has been my honor and privilege to serve as chair of the Board of Directors during a remarkable year for ACICS. I am continually impressed by the commitment and dedication of your Council, the Executive Director Dr. Steven A. Eggland, and each staff member in the Council office. Let me assure you that each individual is committed to the mission of ACICS, which is to advance educational excellence through the accreditation process of quality assurance and enhancement as well as ethical business and educational practices.

After a busy year, we present you with the 2003-2004 Annual Report as evidence of our accomplishments. Operating on a conservative budget, the Council has produced a balanced budget, continues to monitor the long-range strategic plan, and reaffirmed our respected status in higher education.

ACICS has initiated an agreement with The National Court Reporters Association, and we continue to pursue recognition with The American Association of Medical Assistants. We will continue to pursue opportunities that benefit our institution and the students attending them.

Another exciting project underway and spearheaded by ACICS is the Higher Education Transfer Alliance (HETA), formerly, the ACICS Transfer Alliance. The issue of transfer of credit remains an important challenge for students who graduate and wish to continue their education. ACICS's strategy is to develop a Transfer Alliance or institutional partnership that would agree on transfer criteria. Institutions participating in the Transfer Alliance would then accept, in transfer, degrees and credits earned by students from other Transfer Alliance partners. I strongly encourage our accredited institutions to participate in the Transfer Alliance.

ACICS presented The First Annual Distinguished Service Award to Dr. Lloyd Garrison, at the June, 2004 Annual Meeting. This award is given annually to a person who has served ACICS or a public educator who made significant contributions to the career college sector. We have initiated a Public Relations program to present positive public relations information throughout the year ahead.

ACICS continues to grow, accrediting new institutions and new programs. I urge all of our institutions to participate in the Annual Meeting in June 2005. We had a record number of institutions participating in the June, 2004 meeting in Orlando. Please send us suggestions of interest to our institutions so we can continue to improve on the number of colleges attending and participating in worthwhile workshops.

The ACICS staff continues to provide our accredited institutions with outstanding opportunities to participate in ACICS-sponsored workshops. I encourage you to participate in any of the workshops to learn more about accreditation and enhance the quality of your institution. Workshops also provide an excellent venue to meet the entire staff at the Council office and to network with colleagues.

Again, it has been an exciting and productive year. I would like to thank the Commissioners for their effort and support of ACICS and our sector. I also commend the entire staff at ACICS for their hard work and commitment. Most importantly, I thank the Council and ACICS staff for their support of our students.

Sincerely,

Dennis Kerr

ACICS Board of Directors

Accrediting Council for Independent Colleges and Schools

ACICS, a non-profit education corporation, was founded as the National Association of Accredited Commercial Schools (NAACS) in 1912, and has been recognized by the United States Secretary of Education since 1956, just four years after the recognition process was introduced. ACICS is an independent and autonomous national accrediting body that accredits institutions of higher education offering programs of study through the master's degree level. The scope of our recognition by the Secretary is defined as accreditation of private postsecondary institutions offering certificates or diplomas and postsecondary institutions offering associate's, bachelor's, or master's degrees in programs that are designed to train and educate persons for careers or professions where business applications or doctrines, supervisory or management techniques, professional or paraprofessional applications, and other business-related applications support or constitute the career.

The Secretary's re-recognition for the maximum five-year period confirms that ACICS is "a reliable authority as to the quality of education or training offered by the institutions of higher education programs it accredits." ACICS accredits over 600 institutions in this country and abroad, which last year enrolled over 400,000 students. Over sixty-five percent of these ACICS-accredited institutions are degree-granting colleges and schools.

The Council is composed of two commissions and an elected Board of Directors. The two commissions are the Commission on Postsecondary School Accreditation (COPSA) and the Commission on College Accreditation (COCA). COPSA is responsible for postsecondary institutions that offer certificates, diplomas, and occupational associate's degrees, and COCA assesses collegiate institutions that offer academic associate's, bachelor's, and master's degrees.

The Board of Directors is composed of the Council Chair, the Chair-Elect of the Council, the COCA Chair, the COPSA Chair, a Commissioner-at-Large, and the Executive Director. The Council Chair and the Commissioner-at-Large are selected by the Council. The COPSA and COCA chairs are selected by their respective commissions. At least one of the Directors must be a public member.

Commissioners include representatives from ACICS accredited institutions or other sectors of higher education and the general public. Public members may come from business, industry, or the professions. Each commission consists of seven commissioners, at least three of whom are elected by the membership and at least four of whom are appointed. At least one of the four appointed commissioners on each commission must be a public member.

Board of Directors

Commission on Postsecondary School Accreditation (COPSA)

Mr. Dennis Kerr

Chairman
Dennis Kerr Enterprises, Inc.
Baton Rouge, Louisiana
Chair
Term expires 2004 – Elected Member

Louisville, Kentucky

Term expires 2004 – Replaced Elected Member

Statements of Value

The Council has promulgated four statements of value, which are intended to express what is important to ACICS within the context of Reauthorization of the Higher Education Act (HEA).

I. Accreditation and Accountability

The Council believes that institutions must be accountable to rigorous educational, administrative, and fiscal standards.

ACICS emphasizes educational activities, making certain institutions are effectively organizing the educational experience and effectively educating, graduating, and placing students.

Accountability is operationalised through standards on institutional tracking of students' satisfactory academic progress, institutional effectiveness planning girded in criteria, and retention and placement reporting that requires institutions to account for student achievement leading to gainful employment.

In addition, ACICS believes accrediting agencies must monitor fiscal soundness by asking accredited institutions to produce annual audits, periodic fiscal reports, and independent financial statements. Institutions not meeting the standards may be placed on a reporting regime, or asked to show cause why their accreditation should not be suspended, conditioned, or denied.

ACICS also believes that accrediting bodies should provide quality enhancement services to accredited institutions and evaluators to promote continual institutional improvement and insure compliance with accreditation standards through substantive workshops, communications, and training. Quality enhancement must be encouraged for all institutions and mandated for institutions not meeting criteria.

II. Accreditation and Transfer of Credit

The Council believes that ease of transfer of students' academic credits is critical to fostering an open, equitable, and competency-based higher education community.

ACICS believes that factors other than origin of accreditation should be considered in assessing

the appropriateness of students' transfer credit from one institution to another.

ACICS also believes that the issue of transfer of credit needs to be solved proactively within the accreditation community before it is solved through legislation. Leadership in this area would include addressing issues such as needless coursework duplication and how such duplication creates a cumbersome system of waste of taxpayer monies tied to Title IV student aid programs.

ACICS also believes that accrediting agencies recognized by the U.S. Department of Education and CHEA should presume that credits earned at such institutions are of similar quality.

III. Accreditation and Distance Teaching and Learning

The Council believes that the higher education community should continue to foster the development of distance education strategies, while assuring parallel measures of success and expecting similar student learning outcomes in a distance environment compared to residential modes of educational delivery.

Standards in the area of distance education and nontraditional teaching and learning environments must be reflective of the innovative methods for delivering education and opening opportunities for students who may not have been able to pursue postsecondary training or higher education in the past.

ACICS believes that if institutions are offering high quality educational curricula and have proven records of quality in educational activities, administration, and fiscal responsibility, then distance learning should be treated as any other mode of delivery – fully vested in terms of Title IV eligibility. We believe ACICS' standards and evaluation practices in assuring quality in distance delivery and learning are comprehensive and appropriate.

IV. Accreditation, Peer Review, and the Federal Government

The Council believes in the inherent and historically validated utility of peer review in the accreditation of institutions of higher education.

The relationship between the accrediting bodies and the federal government is almost a half-century old. ACICS believes it is important to understand, revisit, and recommit to the partnership in which the relationship developed. A system of quality assurance was needed to insure that veteran, and by extension, taxpayer monies were well spent. Within a private-public paradigm, accreditation has come to symbolize, in a substantive manner, that accredited institutions and/or programs are of an appropriate level of quality. Over time this level of quality has become meaningful to educators, students, and the public.

The relationship is cost-effective, rooted in peer and expert evaluation, and signals to students and the public that institutions and/or programs are meeting relevant and comprehensive quality standards. Standards may necessarily address common denominators, but in the Council's perspective the accreditation process fosters a culture of excellence in assessment and accountability.

ACICS asserts that periodic evaluation, entered into voluntarily by institutions and their peers, enhances the quality of the educational process and demonstrates that the evaluative environment of peer review is superior to direct federal and/or state regulation.

ACICS appreciates the opportunity to communicate these statements of value to the readers of our 2003-2004 Annual Report. Thank you for your time and consideration.

Institutional Characteristics of Accredited Institutions

(Based on 2003 Annual Institutional Reports received)

- ACICS institutions reported a total enrollment of 432,466 students.
- The median institutional enrollment was 534 students.
- The average institutional enrollment was 737 students.
- 70% of the institutions offered at least one degree program.
- The average verified student retention rate was 74.0%.
- The average verified placement rate was 76.5%.
- Over 51,000 graduates and completers were placed in their field of study.
- ACICS institutions employed over 18,700 faculty members.
- The top ten programs of study accounted for more than 56% of the total student enrollment.
- Institutions graduated more than 91,900 students from approved programs.
- Over 221,000 new students enrolled at accredited institutions.

Top Ten ACICS Programs of Study by Enrollment
