

## *A Center Report . . . .*

# **Resource-Oriented Teams: Key Infrastructure Mechanisms For Enhancing Learning Supports**

*Rev. January, 2005*

The Center is co-directed by Howard Adelman and Linda Taylor and operates under the auspices of the School Mental Health Project, Dept. of Psychology, UCLA. Write: Center for Mental Health in Schools, Box 951563, Los Angeles, CA 90095- 1563  
Phone: Ph: toll free -- (866) 846-4843 / (310) 825-3634 | Fax: (310) 206-8716 |  
E-mail: [smhp@ucla.edu](mailto:smhp@ucla.edu) | Website: <http://smhp.psych.ucla.edu>

Support comes in part from the Office of Adolescent Health, Maternal and Child Health Bureau (Title V, Social Security Act), Health Resources and Services Administration (Project #U93 MC 00175) with co-funding from the Center for Mental Health Services, Substance Abuse and Mental Health Services Administration. Both are agencies of the U.S. Department of Health and Human Services.

## **UCLA CENTER FOR MENTAL HEALTH IN SCHOOLS\***

Under the auspices of the School Mental Health Project in the Department of Psychology at UCLA, our center approaches mental health and psychosocial concerns from the broad perspective of addressing barriers to learning and promoting healthy development. Specific attention is given policies and strategies that can counter fragmentation and enhance collaboration between school and community programs.

**MISSION: *To improve outcomes for young people by enhancing policies, programs, and practices relevant to mental health in schools.***

**Through collaboration, the center will**

- # enhance practitioner roles, functions and competence**
- # interface with systemic reform movements to strengthen mental health in schools**
- # assist localities in building and maintaining their own infrastructure for training, support, and continuing education that fosters integration of mental health in schools**

**\*Technical Assistance      \*Hard Copy & Quick Online Resources**  
**\*Monthly Field Updates Via Internet      \*Policy Analyses**  
**\*Quarterly Topical Newsletter**  
**\*Clearinghouse & Consultation Cadre**  
**\*Guidebooks & Continuing Education Modules**  
**\*National & Regional Networking**

Co-directors: Howard Adelman and Linda Taylor

Address: UCLA, Dept. of Psychology, 405 Hilgard Ave., Los Angeles, CA 90095-1563.

Phone: (310) 825-3634      Toll Free: (866) 846-4843      FAX: (310) 206-8716

E-mail: [smhp@ucla.edu](mailto:smhp@ucla.edu)

Website: <http://smhp.psych.ucla.edu/>

Support comes in part from the Office of Adolescent Health, Maternal and Child Health Bureau (Title V, Social Security Act), Health Resources and Services Administration (Project #U93 MC 00175) with co-funding from the Center for Mental Health Services, Substance Abuse and Mental Health Services Administration. Both are agencies of the U.S. Department of Health and Human Services.

# About the Center's Clearinghouse

The scope of the Center's Clearinghouse reflects the School Mental Health Project's mission -- to enhance the ability of schools and their surrounding communities to address mental health and psychosocial barriers to student learning and promote healthy development. Those of you working so hard to address these concerns need ready access to resource materials. The Center's Clearinghouse is your link to specialized resources, materials, and information. The staff supplements, compiles, and disseminates resources on topics fundamental to our mission. As we identify what is available across the country, we are building systems to connect you with a wide variety of resources. Whether your focus is on an individual, a family, a classroom, a school, or a school system, we intend to be of service to you. Our evolving catalogue is available on request; and available for searching from our website.

## What kinds of resources, materials, and information are available?

We can provide or direct you to a variety of resources, materials, and information that we have categorized under three areas of concern:

- C Specific psychosocial problems
- C Programs and processes
- C System and policy concerns

Among the various ways we package resources are our *Introductory Packets*, *Resource Aid Packets*, *special reports*, *guidebooks*, and *continuing education units*. These encompass overview discussions of major topics, descriptions of model programs, references to publications, access information to other relevant centers, organizations, advocacy groups, and Internet links, and specific tools that can guide and assist with training activity and student/family interventions (such as outlines, checklists, instruments, and other resources that can be copied and used as information handouts and aids for practice).

## Accessing the Clearinghouse

- C E-mail us at [smhp@ucla.edu](mailto:smhp@ucla.edu)
- C FAX us at (310) 206-8716
- C Phone (310) 825-3634
- C Toll Free (866) 846-4843
- C Write School Mental Health Project/Center for Mental Health in Schools,  
Dept. of Psychology, Los Angeles, CA 90095-1563

Check out recent additions to the Clearinghouse on our Web site: <http://smhp.psych.ucla.edu>

All materials from the Center's Clearinghouse are available for order for a minimal fee to cover the cost of copying, handling, and postage. Most materials are available for free downloading from our website.

*If you know of something we should have in the clearinghouse, let us know.*

Need Resource Materials Fast?

## L Check out our Quick Finds !!!!

Use our Website for speedy access  
to Psychosocial resources!!!!

Stop on by for a visit at

<http://smhp.psych.ucla.edu>

7

Just click **SEARCH**  
from our home page  
and you are on your way!!

You can:

L **QUICK FIND:** *To quickly find information on Center topics*

L **SEARCH OUR WEB SITE:** *For information available on our web pages.*

L **SEARCH OUR DATABASES:** *For resource materials developed by our Center, clearinghouse document summaries, listings of cadre members, organizations and internet sites.*

Quick Find Responses include:

- K Center Developed Resources and Tools
- K Relevant Publications on the Internet
- K Selected Materials from Our Clearinghouse
- K A whole lot more, and if we don't have it we can find it !!!! We keep adding to and improving the center — So keep in contact!

# Center for Mental Health in Schools at UCLA

The *Center for Mental Health in Schools* operates under the auspices of the School Mental Health Project at UCLA.\* It is one of two *national centers* concerned with mental health in schools that are funded in part by the U.S. Department of Health and Human Services, Office of Adolescent Health, Maternal and Child Health Bureau, Health Resources and Services Administration -- with co-funding from the Center for Mental Health Services, Substance Abuse and Mental Health Services Administration (Project #U93 MC 00175).

The UCLA Center approaches mental health and psychosocial concerns from the broad perspective of addressing barriers to learning and promoting healthy development. In particular, it focuses on comprehensive, multifaceted models and practices to deal with the many external and internal barriers that interfere with development, learning, and teaching. Specific attention is given policies and strategies that can counter marginalization and fragmentation of essential interventions and enhance collaboration between school and community programs. In this respect, a major emphasis is on enhancing the interface between efforts to address barriers to learning and prevailing approaches to school and community reforms.

\*Co-directors: Howard Adelman and Linda Taylor.

Address: Box 951563, UCLA, Dept. of Psychology, Los Angeles, CA 90095-1563.

## Preface

At schools, obviously the administrative leadership is key to ending the marginalization of efforts to address learning, behavior, and emotional problems. The other key is establishment of a mechanism that focuses specifically on how resources for learning supports are used at the school.

For those concerned with school improvement, resource-oriented mechanisms are a key facet of efforts to transform and restructure daily operations. In some schools as much as 30 percent of the budget may be going to problem prevention and correction. Every school is expending resources to enable learning; few have a mechanism to ensure appropriate use of existing resources and enhance current efforts related to learning supports. Such a mechanism contributes to cost-efficacy of learner supports by ensuring all such activity is planned, implemented, and evaluated in a coordinated and increasingly integrated manner. It also provides another means for reducing marginalization. Creation of such a mechanism is essential for braiding together existing school and community resources and encouraging services and programs to function in an increasingly cohesive way. When this mechanism is created in the form of a "team," it also is a vehicle for building working relationships and can play an expanded role in solving turf and operational problems.

One of the primary and essential tasks a learning supports resource-oriented mechanism undertakes is that of enumerating school and community programs and services that are in place to support students, families, and staff. A comprehensive "gap" assessment is generated as resources are mapped and compared with surveys of the unmet needs of and desired outcomes for students, their families, and school staff. Analyses of what is available, effective, and needed provide a sound basis for formulating priorities and developing strategies to link with additional resources at other schools, district sites, and in the community and enhance resource use. Such analyses also can guide efforts to improve cost-effectiveness.

In a similar fashion, a learning supports resource-oriented mechanism for a complex or family of schools (e.g., a high school and its feeder schools) and one at the district level provide mechanisms for analyses on a larger scale. This can lead to strategies for cross-school, community-wide, and district-wide cooperation and integration to enhance intervention effectiveness and garner economies of scale.

In the late 1980s, we began pilot testing a new infrastructure mechanism designed to ensure that schools paid more systematic attention to how they used resources for addressing barriers to student learning and promoting healthy development. Early in our work, we called the school level resource-oriented mechanism a Resource Coordinating Team because we operationalized the mechanism as a team and focused it first on resource coordination. Although the term doesn't fully capture the aims and functions of the mechanism, the term is being used in many places. However, coordination is too limited a descriptor of the teams role and functions. So, others have adopted the term *Learning Supports Resource Team*. Properly constituted, such a team works with the school's administrators to expand on-site leadership for efforts to address barriers comprehensively and ensures the maintenance and improvement of a multifaceted and integrated approach.

In this report, we stress the fact that what we mean to focus on is resource-oriented mechanisms that are a permanent part of the infrastructure at all levels. For such mechanisms to become part of the infrastructure, school reformers must understand their importance and ensure they are included as schools and districts restructure.

And, from a decentralized perspective, it is a good idea to conceive the process of restructuring from the school outward. That is, first the focus is on school level resource-oriented mechanisms. Then, based on analyses of what is needed to facilitate and enhance school level efforts, mechanisms are conceived that enable groups or “families” of schools to work together where this increases efficiency and effectiveness and achieves economies of scale. Then, system-wide mechanisms can be (re)designed to support what each school and family of schools are trying to develop.

A resource-oriented mechanism at a school, multiple school sites, and system-wide are required for oversight, leadership, resource development, and ongoing support. Such mechanisms provide ways to (a) arrive at decisions about resource allocation, (b) maximize systematic and integrated planning, implementation, maintenance, and evaluation of education support (enabling) activity, (c) outreach to create formal working relationships with community resources to bring some to a school and establish special linkages with others, and (d) upgrade and modernize the component to reflect the best intervention thinking and use of technology. At each system level, these tasks require that staff adopt some new roles and functions and that parents, students, and other representatives from the community enhance their involvement. They also call for redeployment of existing resources, as well as finding new ones.

This report pulls together our work on resource-oriented mechanisms. For more systematic changes related to schools and their interface with communities, search the Center’s resources through the internet – <http://smhp.psych.ucla.edu> or request that a resource list be sent to you.

Howard S. Adelman & Linda Taylor  
Co-directors

## Resource-Oriented Teams: Key Infrastructure Mechanisms for Enhancing Learning Supports

**P**olicy makers are calling for higher standards and greater accountability for instruction, improved curricula, better teaching, increased discipline, reduced school violence, an end to social promotion, and more. At the same time, it is evident that current strategies to accomplish all this are inadequate to the task. This is likely to remain the case as long as so little attention is paid to reforming and restructuring the ways schools address many well-known factors interfering with the performance and learning of so many young people.

The notion of barriers to learning encompasses external and internal factors. It is clear that too many youngsters are growing up and going to school in situations that not only fail to promote healthy development, but are antithetical to the process. Some also bring with them intrinsic conditions that make learning and performing difficult. As a result, youngsters at every grade level come to school unready to meet the setting's demands effectively.

Pioneer initiatives around the country are demonstrating the need to rethink how schools and communities can meet the challenge of addressing persistent barriers to student learning (see Appendix A). As a whole, their work underscores a reality that too few school reformers have acted upon. Namely:

*If our society truly means to provide the opportunity for all students to succeed at school, fundamental changes are needed so that schools and communities can effectively address barriers to development and learning.*

Addressing barriers is not at odds with the "paradigm shift" that emphasizes strengths, resilience, assets, and protective factors. Efforts to enhance positive development and improve instruction clearly can improve readiness to learn. However, it is frequently the case that preventing problems also requires direct action to remove or at least minimize the impact of barriers, such as hostile environments and intrinsic problems. Without effective, direct interventions, such barriers can continue to get in the way of development and learning.

## What are Schools Doing Now?

All schools have some activity focused on specific concerns, such as learning problems, substance abuse, violence, teen pregnancy, school dropouts, and delinquency. Looked at as a whole, one finds in many school districts an extensive range of activity oriented to students' needs and problems. Some programs are provided throughout a school district, others are carried out at or linked to targeted schools. The interventions may be designed to benefit all students in a school, those in specified grades, and/or those identified as having special needs. The activities may be implemented in regular or special education classrooms and may be geared to an entire class, groups, or individuals; or they may be designed as "pull out" programs for designated students. They encompass ecological, curricular, and clinically oriented activities.

While schools can use a wide-range of persons to help students, most school-owned and operated services are offered as part of pupil personnel services. Federal and state mandates tend to determine how many pupil services professionals are employed, and states regulate compliance with mandates. Governance of daily practice usually is centralized at the school district level. In large districts, counselors, psychologists, social workers, and other specialists may be organized into separate units. Such units straddle regular, special, and compensatory education. Analyses of the situation find that the result is programs and services that are planned, implemented, and evaluated in a fragmented and piecemeal manner. Service staff at schools tend to function in relative isolation of each other and other stakeholders, with a great deal of the work oriented to discrete problems and with an overreliance on specialized services for individuals and small groups. In some schools, a student identified as at risk for grade retention, dropout, and substance abuse may be assigned to three counseling programs operating independently of each other. Such fragmentation not only is costly, it works against developing cohesiveness and maximizing results.

Similar concerns about fragmented community health and social services has led to increasing interest in school-community collaborations (e.g., school-linked services). A reasonable inference from available data is that such collaborations can be successful and cost effective over the long-run. By placing staff at schools, community agencies make access easier for students and families – especially those who usually are underserved and hard to reach. Such efforts not only provide services, they seem to encourage schools to open their doors in ways that enhance recreational, enrichment, and remedial opportunities and greater family involvement. At the same time, the emphasis on primarily co-locating community services at school sites is producing another form of fragmentation.

## Toward Ending Fragmentation

Policymakers have come to appreciate the relationship between limited intervention efficacy and the widespread tendency for complementary programs to operate in isolation. Limited efficacy does seem inevitable as long as interventions are carried out in a piecemeal and often competitive fashion and with little follow through. From this perspective, reformers have directed initiatives toward reducing service fragmentation and increasing access.

The call for "integrated services" clearly is motivated by a desire to reduce redundancy, waste, and ineffectiveness resulting from fragmentation (Adler & Gardner, 1994). Special attention is given to the many piecemeal, categorically funded approaches, such as those created to reduce learning and behavior problems, substance abuse, violence, school dropouts, delinquency, and teen pregnancy.

New directions are emerging that reflect fundamental shifts in thinking about current education support programs and services. Three major themes have emerged so far: (1) the move *from* fragmentation *to* cohesive intervention, (2) the move *from* narrowly focused, problem specific, and specialist-oriented services *to* comprehensive general programmatic approaches, and (3) the move toward research-based interventions, with higher standards and ongoing accountability emphasized.

To ensure development of essential programs for addressing barriers to learning and teaching, greater attention must be given to developing policy, leadership, and infrastructure and to building capacity (Adelman & Taylor, 2002; Center for Mental Health in Schools, 1999a; 1999b). The focus in this report is on one facet of the necessary infrastructure – *resource-oriented mechanisms*.

## Resource-Oriented Mechanisms

Resource-oriented organizational mechanisms focus specifically on ensuring the appropriate use of existing resources and enhancing efforts to address barriers to student learning. Such mechanisms can reduce marginalization and fragmentation and enhance cost-efficacy of learner support activity by ensuring all such activity is planned, implemented, and evaluated in a coordinated and increasingly integrated manner.

Creation of resource-oriented mechanisms is essential for starting to weave together existing school and community resources and encouraging services and programs to function in an increasingly cohesive way. When such mechanisms are created in the form of

"teams," they also are vehicles for building working relationships and can play a role in solving turf and operational problems, developing plans to ensure availability of a coordinated set of efforts, and generally improving the attention paid to developing a comprehensive, integrated approach for addressing barriers to student learning.

One of the primary and essential tasks a resource-oriented mechanism undertakes is that of enumerating school and community programs and services that are in place to support students, families, and staff. A comprehensive "gap" assessment is generated as resource mapping is compared with surveys of the unmet needs of and desired outcomes for students, their families, and school staff. Analyses of what is available, effective, and needed, provide a sound basis for formulating strategies to link with additional resources at other schools, district sites, and in the community and enhance use of existing resources. Such analyses also can guide efforts to improve cost-effectiveness. In a similar fashion, a resource-oriented team for a complex or family of schools (e.g., a high school and its feeders) and at the district level provides mechanisms for analyses that can lead to strategies for cross-school, community-wide, and district-wide cooperation and integration to enhance intervention effectiveness and garner economies of scale. For those concerned with school reform, establishment of such mechanisms are a key facet of efforts designed to restructure school support services.

This report first explores such mechanisms at the school level, then in terms of a feeder pattern, and finally at the district level.

**Focusing on  
Resources at the  
School Level**

Creation of a school-site resource-oriented mechanism provides a good starting place in efforts to enhance coordination and integration of services and programs and for reaching out to District and community resources to enhance learner supports. And, over time, such a mechanism can be evolved to do much more – eventually transforming current approaches to addressing barriers to student learning and promoting healthy development.

As discussed here, the school level resource-oriented mechanism first was dubbed a *Resource Coordinating Team* and currently we are using the term *Learning Supports Resource Team*. We initially piloted such teams in the Los Angeles Unified School District and now they are being introduced in many schools across the country (see Appendix B). Properly constituted, such a team provides on-site leadership for efforts to address barriers comprehensively and ensures the maintenance and improvement of a multifaceted and integrated approach.

When we mention a Resource Team, some school staff quickly respond:

*We already have one!*

When we explore this with them, we usually find what they have is a *case-oriented team* -- that is, a team that focuses on individual students who are having problems. (Such a team may be called a student study team, student success team, student assistance team, teacher assistance team, and so forth.)

To help clarify the difference, we have developed the following exhibit:

### Contrasting Team Functions

<i>A Case-Oriented Team</i>	<i>A Resource-Oriented Team</i>
<p>Focuses on specific <i>individuals</i> and discrete <i>services</i> to address barriers to learning</p> <p>Sometimes called:</p> <ul style="list-style-type: none"><li>C Child Study Team</li><li>C Student Study Team</li><li>C Student Success Team</li><li>C Student Assistance Team</li><li>C Teacher Assistance Team</li><li>C IEP Team</li></ul> <p>EXAMPLES OF FUNCTIONS:</p> <ul style="list-style-type: none"><li>&gt;triage</li><li>&gt;referral</li><li>&gt;case monitoring/management</li><li>&gt;case progress review</li><li>&gt;case reassessment</li></ul>	<p>Focuses on <i>all</i> students and the <i>resources, programs, and systems</i> to address barriers to learning &amp; promote healthy development</p> <p>Possibly called:</p> <ul style="list-style-type: none"><li>C Learning Supports Resource Team</li><li>C Resource Coordinating Team</li><li>C Resource Coordinating Council</li><li>C School Support Team</li></ul> <p>EXAMPLES OF FUNCTIONS:</p> <ul style="list-style-type: none"><li>&gt;aggregating data across students and from teachers to analyze school needs</li><li>&gt;mapping resources in school and community</li><li>&gt;analyzing resources</li><li>&gt;identifying the most pressing program development needs at the school</li><li>&gt;coordinating and integrating school resources &amp; connecting with community resources</li><li>&gt;establishing priorities for strengthening programs and developing new ones</li><li>&gt;planning and facilitating ways to strengthen and develop new programs and systems</li><li>&gt;recommending how resources should be deployed and redeployed</li><li>&gt;developing strategies for enhancing resources</li><li>&gt;social "marketing"</li></ul>

In contrasting the two teams, the intent is to highlight the difference in functions and the need for both teams (not to suggest one set of functions should take precedence over the other).

Another way to help differentiate the two types of mechanisms is by use of two familiar metaphors. A *case-orientation* fits the *starfish* metaphor.

The day after a great storm had washed up all sorts of sea life far up onto the beach, a youngster set out to throw back as many of the still-living starfish as he could. After watching him toss one after the other into the ocean, an old man approached him and said:

*It's no use your doing that, there are too many,  
You're not going to make any difference.*

The boy looked at him in surprise, then bent over, picked up another starfish, tossed it back, and then replied:

*It made a difference to that one!*

And, of course, that is the metaphor that reflects all the important clinical efforts undertaken by staff alone and when they meet together to work on specific cases.

The *resource-oriented* focus is captured by what can be called the *bridge* metaphor.

In a small town, one weekend a group of school staff went to the reiver to go fishing. Not long after they got there, a child came floating down the rapids calling for help. One of the group on the shore quickly dived in and pulled the child out. Minutes later another, then another, and then many more children were coming down the river. Soon every one was diving in and dragging children to the shore and then jumping back in to save as many as they could.

In the midst of all this frenzy, one of the group was seen walking away. Her colleagues were irate. How could she leave when there were so many children to save? After long hours, to everyone's relief, the flow of children stopped, and the group could finally catch their breath.

At that moment, their colleague came back. They turned on her and angrily shouted: *How could you walk off when we needed everyone here to save the children?*

She replied: *It occurred to me that someone ought to go upstream and find out why so many kids were falling into the river. What I found is that the old wooden bridge had several planks missing, and when some children tried to jump over the gap, they couldn't make it and fell through into the river. So I got someone to fix the bridge.*

Fixing and building better bridges is a good way to think about prevention work, and it is the way to understand the importance of taking time to focus on improving and enhancing resources, programs, and systems.

As indicated, a resource oriented team's focus is not on specific individuals, but on how resources are used. In doing so, it provides what often is a missing link for managing and enhancing *systems* in ways that integrate and strengthen interventions. For example, such a team can (a) map and analyze *activity and resources* to improve their use in preventing and ameliorating problems, (b) build effective referral, case management, and quality assurance *systems*, (c) enhance *procedures* for management of programs and information and for communication among school staff and with the home, and (d) explore ways to *redeploy and enhance resources* – such as clarifying which activities are nonproductive and suggesting better uses for resources, as well as reaching out to connect with additional resources in the school district and community. Indeed, such a school-site team provides a key mechanism for weaving together existing school and community resources and increasing cohesive functioning of services and programs.

A Resource Team exemplifies the type of mechanism needed for overall cohesion and coordination of school support programs and systems for students and families. Minimally, such a team can reduce fragmentation and enhance cost-efficacy by assisting in ways that encourage programs to function in a coordinated and increasingly integrated way. For example, the team can develop communication among school staff and to the home about available assistance and referral processes, coordinate resources, and monitor programs to be certain they are functioning effectively and efficiently. More generally, this group can provide leadership in guiding school personnel and clientele in evolving the school's vision for its support program (e.g., as not only preventing and correcting learning, behavior, emotional, and health problems but as contributing to classroom efforts to foster academic, social, emotional, and physical functioning). The group also can help to identify ways to improve existing resources and acquire additional ones.

Major examples of the group's activity are

- C preparing and circulating a list profiling available resources (programs, personnel, special projects, services, agencies) at the school, in the district, and in the community
- C clarifying how school staff and families can access them
- C refining and clarifying referral, triage, and case management processes to ensure resources are used appropriately (e.g. where needed most, in keeping with the principle of adopting the least intervention needed, with support for referral follow-through)
- C mediating problems related to resource allocation and scheduling,
- C ensuring sharing, coordination, and maintenance of needed resources
- C assisting in creation of area program teams
- C exploring ways to improve and augment existing resources to ensure a wider range are available (including encouraging preventive approaches, developing linkages with other district and community programs, and facilitating relevant staff development)
- C evolving a site's infrastructure for developing a comprehensive, multifaceted, and integrated approach to addressing barriers to student learning and promoting healthy development (possibly including health and family centers as hubs)

Where creation of "another team" is seen as a burden, existing teams, such as student or teacher assistance teams and school crisis teams, have demonstrated the ability to focus on enhancing resources and programs by augmenting their membership and agendas. Of course, in doing so, they must take great care to structure the agenda so that sufficient time is devoted to the additional tasks. In small schools where there are so few staff that a large team is not feasible, there still is a need for some form of a resource-oriented mechanism. Thus, in some instances, the "team" may be as small as two persons.

*recruit a  
broad range of  
stakeholders*

Although a resource-oriented mechanism might be created solely around psychosocial programs, it is meant to focus on resources related to all major programs and services supporting the instructional component. Thus, it tries to bring together representatives of all these programs and services. This might include, for example, guidance counselors, school psychologists, nurses, social workers, attendance and dropout counselors, health educators, special education staff, after school program staff, bilingual and Title I program coordinators, health educators, safe and drug free school staff, and union reps. It also should include representatives of any community agency that is significantly involved with schools. Beyond these "service" providers, such a team is well-advised to add the energies and expertise of administrators, regular classroom teachers, non-certificated staff, parents, and older students.

The larger the group, of course, the harder it is to find a meeting time and the longer each meeting tends to run. Nevertheless, the value of broad stakeholder representation far outweighs these matters. And, good meeting facilitation that maintains a task-focus and an action orientation can make meetings a invaluable opportunity to enhance systems (see Appendix C).

*ensure  
motivational  
readiness &  
capability*

For the team to function well, there must be a core of members who have or will acquire the ability to carry out identified functions and make the mechanism work (others are auxiliary members). They must be committed to the team's mission. (Building team commitment and competence should be a major focus of school management policies and programs. Because various teams at a school require the expertise of the same personnel, some individuals will necessarily be on more than one team.) The team must have a dedicated leader/facilitator who is able to keep the group task-focused and productive. It also needs someone who records decisions and plans and reminds members of planned activity and products. Where advanced technology is available (management systems, electronic bulletin boards and E-mail, clearinghouses), it can be used to facilitate communication, net-working, program planning and implementation, linking activity, and a variety of budgeting, scheduling, and other management concerns.

The team meets as needed. Frequency of meetings depends on the group's functions, time availability, and ambitions. Initially, this may mean once a week. Later, when meetings are scheduled for every 2-3 weeks, continuity and momentum are maintained through interim tasks performed by individuals or subgroups. Because some participants are at a school on a part-time basis, one of the problems that must be addressed is that of rescheduling personnel so that there is an overlapping time for meeting together. Of course, the reality is that not all team members will be able to attend every meeting, but a good approximation can be made at each meeting, with steps taken to keep others informed as to what was done. Well planned and trained teams can accomplish a great deal through informal communication and short meetings.

*ensure  
representation  
on governance  
& planning  
bodies*

Properly constituted, trained, and supported, a resource oriented team complements the work of the site's governance body through providing on-site overview, leadership, and advocacy for all activity aimed at addressing barriers to learning and enhancing healthy development. Having at least one representative from the resource team on the school's governing and planning bodies ensures the type of infrastructure connections that are essential if programs and services are to be maintained, improved, and increasingly integrated with classroom instruction. And, of course, having an administrator on the team provides the necessary link with the school's administrative "table."

For many support service personnel, their past experiences of working in isolation – and sometimes in competition with others – make this collaborative opportunity unusual and one which requires that they learn new ways of relating and functioning. See Appendix C for some resource aids that can help in establishing a Resource Team and ensuring it is structured to operate effectively.

**Focusing on  
Resources for a  
Complex or  
"Family" of  
Schools**

Schools in the same geographic (catchment) area have a number of shared concerns, and feeder schools often are interacting with students from the same family. Furthermore, some programs and personnel are (or can be) shared by several neighboring schools, thus minimizing redundancy and reducing costs. A multi-site team can provide a mechanism to help ensure cohesive and equitable deployment of resources and also can enhance the pooling of resources to reduce costs. Such a mechanism can be particularly useful for integrating the efforts of high schools and their feeder middle and elementary schools. (This clearly is important in addressing barriers with those families who have youngsters attending more than one level of schooling in the same cluster. It is neither cost-effective nor good intervention for each school to contact a family separately in instances where several children from a family are in need of special attention.)

With respect to linking with community resources, multi school teams are especially attractive to community agencies who often don't have the time or personnel to link with individual schools. In general, then, a group of sites can benefit from having an ongoing, multi-site, resource-oriented mechanism that provides leadership, facilities communication, coordination, integration, and quality improvement of all activity the sites have for addressing barriers to learning and promoting healthy development.

Thus, a multi-site team or Learning Supports Resource *Council* for a complex of schools (e.g., a high school and its feeder middle and elementary schools) brings together one to two representatives of each school's resource *team* (see figure below). Such a mechanism can help (a) coordinate and integrate programs serving multiple schools, (b) identify and meet

common needs with respect to guidelines and staff development, and (c) create linkages and collaborations among schools and with community agencies. In this last regard, the group can play a special role in community outreach both to create formal working relationships and ensure that all participating schools have access to such resources. More generally, the council provides a useful mechanism for leadership, communication, maintenance, quality improvement, and ongoing development of a component for addressing barriers to learning and teaching. Natural starting points for councils are the sharing of needs assessment, resource mapping, analyses, and recommendations for reform and restructuring. Specific areas of initial focus may be on such matters as addressing community-school violence and developing prevention programs and safe school plans.

High Schools

Middle Schools

Elementary Schools

Entire Feeder Pattern

System-wide

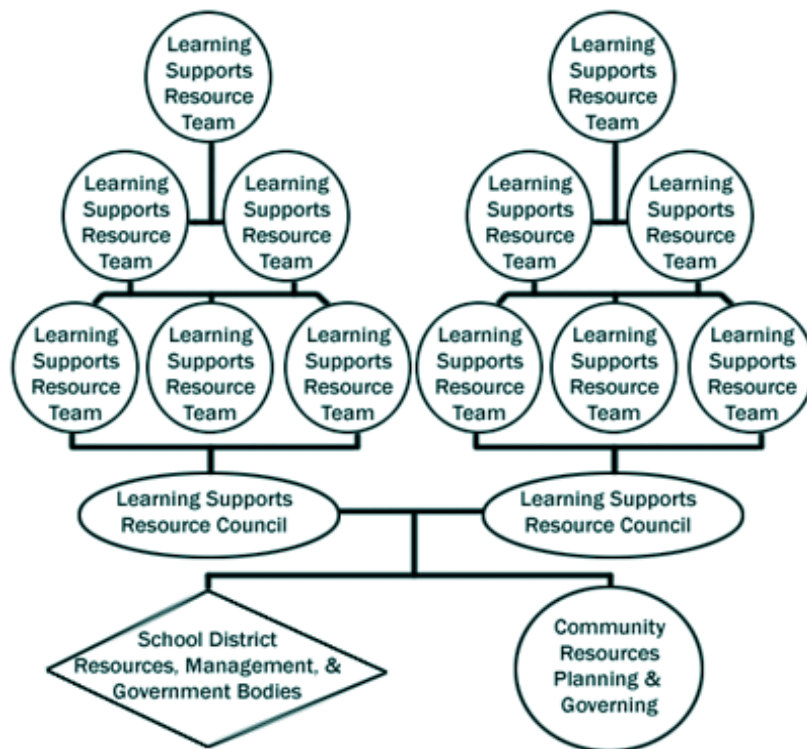

Figure 1. Developing and connecting mechanisms at schools sites, among families of schools, and district and community-wide

*Council functions* Some specific functions for a Council are:

- to share information about resource availability (at participating schools and in the immediate community and in geographically related schools and district-wide) with a view to enhancing coordination and integration.
- to identify specific needs and problems and explore ways to address them (e.g., Can some needs be met by pooling certain resources? Can improved linkages and collaborations be created with community agencies? Can additional resources be acquired? Can some staff and other stakeholder development activity be combined?)
- to discuss and formulate longer-term plans and advocate for appropriate resource allocation related to enabling activities.

*Council membership*

Each school might be represented on the *Council* by two members of its *Resource Team*. To assure a broad perspective, one of the two might be the site administrator responsible for enabling activity; the other would represent line staff. To ensure a broad spectrum of stakeholder input, the council also should include representatives of classroom teachers, non-certificated staff, parents, and students, as well as a range of community resources that should be involved in schools.

Council facilitation involves responsibility for convening regular monthly (and other ad hoc) meetings, building the agenda, assuring that meetings stay task focused and that between meeting assignments will be carried out, and ensuring meeting summaries are circulated. With a view to shared leadership and effective advocacy, an administrative leader and a council member elected by the group can co-facilitate meetings. Meetings can be rotated among schools to enhance understanding of each site in the council.

*System-wide Mechanism*

School and multi-site mechanisms are not sufficient. A system-wide mechanism must be in place to support school and cluster level activity. A *system-wide resource coordinating body* can provide guidance for operational coordination and integration across groups of schools. Functions might encompass (a) ensuring there is a district-wide vision and strategic planning for addressing barriers to student learning and promoting healthy development, (b) ensuring coordination and integration among groups of schools and system-wide, (c) establishing linkages and integrated collaboration among system-wide programs and with those operated by community, city, and county agencies, (d) ensuring complete and comprehensive integration with the district's education reforms, and (e) ensuring evaluation, including determination of equity in program delivery, quality improvement reviews of all mechanisms and procedures, and ascertaining results for accountability purposes.

The system-wide group should include (a) representatives of multi-school councils, (b) key district administrative and line staff with relevant expertise and vision (including unit heads, coordinators, union reps), and (c) various other stakeholders such as nondistrict members whose job and expertise (e.g., public health, mental health, social services, recreation, juvenile justice, post secondary institutions) make them invaluable contributors to the tasks at hand.

As the above discussion stresses, well-redesigned organizational and operational mechanisms that enable schools to (a) arrive at wise decisions about resource allocation, (b) maximize systematic and integrated planning, implementation, maintenance, and evaluation of enabling activity, (c) outreach to create formal working relationships with community resources to bring some to a school and establish special linkages with others, and (d) upgrade and modernize interventions to reflect the best models and use of technology. Implied in all this are new roles and functions for some staff and greater involvement of parents, students, and other representatives from the community. Also implied is redeployment of existing resources as well as finding new ones.

#### Phasing-in Resource Teams and Councils

Building on what is known about organizational change, our Center staff for many years has been working on a change model for use in establishing, sustaining, and scaling-up school and community reforms. In this context, we have developed a position called an *Organization Facilitator* to aid with major restructuring (Adelman, 1993; Adelman & Taylor 1997; Center for Mental Health in Schools, 1999a, 1999b, 2001; Taylor & Adelman 1999). This specially trained change agent embodies the necessary expertise to help school sites and complexes implement and institutionalize substantively new approaches, such as the establishment of Resource Teams and Councils.

The exhibit on the following pages offers an outline of phases for establishing such mechanisms and summarizes some key facets of what has been discussed above.

## Exhibit

### Phasing in Resource Teams and Councils

#### ***Phase 1. Organizing Resource Teams at a School Site***

Creation of a School-site *Resource Team* provides a starting point in efforts to reform and restructure education support programs. Such a team not only can begin the process of transforming what already is available, it can help reach out to District and community resources to enhance education support activity. Such a resource-oriented team differs from case-oriented teams (e.g., Student Assistance/Guidance Teams). The focus of this team is not on individual students. Rather, it is oriented to clarifying resources and how they are best used.

Such a team can help

- C improve coordination and efficacy by ensuring
  - >basic systems (for referral, triage, case management) are in place and effective
  - >programs/services are profiled, written up, and circulated
  - >resources are shared equitably
- C enhance resources through staff development and by facilitating creation of new resources via redeployment and outreach
- C evolve a site's education support activity infrastructure by assisting in the creation of program teams and Family/Parent Centers as hubs for such activities.

Among its first functions, the Resource Team can help clarify

- (a) the resources available to the school (who? what? when?) – For example, the team can map out and then circulate to staff, students, and parents a handout describing "Available Special Services, Programs, and Other Resources" (see Appendix D).
- (b) how someone gains access to available resources – The team can clarify processes for referral, triage, follow-through, and case management, and circulate a description of procedures to the school staff and parents.
- (c) how resources are coordinated – To ensure systems are in place and to enhance effectiveness, the team can help weave together resources, make analyses, coordinate activity, and so forth.
- (d) what other resources the school needs and what steps should be taken to acquire them – The team can identify additional resources that might be acquired from the District or by establishing community linkages.

Toward the end of Phase 1, a *Complex Resource Council* (a multi-locality council) can be organized. This group is designed to ensure sharing and enhancement of resources across schools in a given neighborhood. Of particular interest are ways to address common concerns related to crisis response and prevention, as well as dealing with the reality that community resources that might be linked to schools are extremely limited in many geographic areas and thus must be shared.

More info on the functions of a Resource Team and the complex Council are provided in the body of this report.

## **Phase II. *Organizing a Programmatic Focus and Infrastructure for Education Support Activity***

All sites that indicate readiness for moving toward reconceptualizing education support (enabling) activity into a delimited set of program areas are assisted in organizing program teams and restructuring the site's Resource Team.

This involves facilitating

- C development of program teams
- C analyses of education support activity (programs/services) by program area teams to determine
  - >how well the various activities are coordinated/integrated (with a special emphasis on minimizing redundancy)
  - >whether any activities need to be improved (or eliminated)
  - >what is missing -- especially any activity that seems as important or even more important than those in operation.
- efforts by program area teams related to
  - >profiling, writing up, circulating, and publicizing program/service information
  - >setting priorities to improve activity in a programmatic area
  - >setting steps into motion to accomplish their first priority for improvement
  - >moving on to their next priorities.

## **Phase III. *Facilitating the Maintenance and Evolution of Appropriate Changes***

In general, this involves evaluating how well the infrastructure and related changes are working, including whether the changes are highly visible and understood. If there are problems, the focus is on clarifying what is structurally and systemically wrong and taking remedial steps. (It is important to avoid the trap of dealing with a symptom and ignoring ongoing factors that are producing problems; that is, the focus should be on addressing systemic flaws in ways that can prevent future problems.)

Examples of activity:

Checking on maintenance of Program Teams (keeping membership broad based and with a working core through processes for identifying, recruiting, and training new members when teams need bolstering).

Holding individual meetings with school site leadership responsible for restructuring in this area and with team leaders to identify whether everyone is receiving adequate assistance and staff development.

Determining if teams periodically make a new listing (mapping) of the current activity at the site and whether they update their analyses of the activity.

Checking on efficacy of referral, triage, and case management systems.

Checking on the effectiveness of mechanisms for daily coordination, communication, and problem solving.

Evaluating progress in refining and enhancing program activity.

## **Phase IV. *Facilitating the Institutionalization/Sustainability of Appropriate Changes***

A critical aspect of institutionalization involves ensuring that school staff responsible for restructuring education support activity formulate a proposal for the next fiscal year. Such a proposal encompasses resource requests (budget, personnel, space, staff development time). It must be submitted and approved by the site's governance authority. Institutionalization requires a plan that is appropriately endorsed and empowered through appropriation of adequate resources.

Institutionalization is further supported by evaluating functioning and outcomes related to new infrastructure mechanisms and fundamental activities. With a view to improving quality and efficacy, the findings from such evaluations are used to revise activities and mechanisms as necessary.

## About Mapping, Analyzing, & Deploying Resources

It has been speculated that when the various sources of support are totaled in certain schools, as much as 30% of the resources may be going to addressing barriers to learning. Whatever the actual percentage, the fact is that in too many locales the resources are being expended in rather ad hoc, piecemeal, and fragmented ways. This is why mapping, analyzing, and (re)deploying resources are such important functions for resource-oriented mechanisms to pursue.

*Mapping* can be carried out in various ways. For example, in mapping a school's resources for addressing barriers to learning, some teams begin simply by developing a list of names and brief descriptions of the work performed by staff and those from the community who are at the school at various times (see Appendix D). This probably is a good starting point since so few schools seem to have done even this simple form of mapping, and everyone at or otherwise connected to a school should have easy access to such basic information. Eventually, all resources should be mapped (e.g., all programs, services, personnel, space, material resources and equipment, cooperative ventures, budgetary allocations). Moreover, to facilitate subsequent analyses, efforts should be made to differentiate among (a) regular, long-term programs and short-term projects and activities, (b) those that have potential to produce major results and those likely to produce superficial outcomes, and (c) those designed to benefit many students and those designed to serve a few.

Because of the fragmented way policies and practices have been established, there tends to be inefficiency and redundancy, as well as major gaps in efforts to address barriers to learning. Thus, a logical focus for *analyses* is how to reduce fragmentation and fill gaps in ways that increase effectiveness and efficiency. Another aspect of the analyses involves identifying activities that have little or no effects; these represent resources that can be redeployed to help underwrite the costs of filling major gaps.

Below we describe how all this can be done using the framework developed for operationalizing an enabling component (see Appendix A). Use of a well-conceived framework avoids the tendency to create laundry-lists of the various programs and services offered at a school. Such lists communicate a fragmented picture rather than a comprehensive, multifaceted, cohesive approach and provide insufficient information for analyzing how well resources are being used.

**Step 1: School-Focused Mapping**

The matrix below provides a framework for the school-based resource mechanism (e.g., a Resource Team) to begin mapping.

**AREAS OF CONCERN FOR MAPPING**

	Classroom-Focused Enabling Activity	Crisis Response & Prevention	Support for Transitions	Home Involvement in Schooling	Community Outreach (including volunteers)	Student & Family Assistance	System Change Activity
Systems for Promoting Healthy Develop. & Preventing Problems							
Systems to Respond Early-After-Onset							
Systems of Care to treat Severe Problems							

As aids for mapping, our Center has developed a set of tools that outlines the types of activities schools might have in these various areas. (See Appendix D for a description and for information on accessing these tools by downloading them from our website or requesting a copy from the Center.)

The mapping should include all district-level and community resources that have had some direct connection with the work of the school. As noted above, the mapping should also include efforts to differentiate (a) regular, long-term programs and short-term projects and activities, (b) those that have potential to produce major results and those likely to produce superficial outcomes, and (c) those designed to benefit many students and those designed to serve a few.

After mapping each area, the products can be used immediately to communicate in an organized manner what the school is currently doing to address barriers to learning and promote healthy development. With relatively little effort, the products can be an important step forward in "social marketing" the school's efforts to meet the needs of all students. Appendix D provides examples of summaries related to such mapping. After developing such summaries, they can be copied as a set and circulated to all stakeholders, and can even be condensed into a brochure, newsletter, and other formats that will be useful to stakeholders. They also can be mounted as a set on poster board and displayed prominently in the staff lounge, the main hallway, and anywhere else in the school where the presentation will be widely seen. The point is to make certain that everyone begins to understand what already exists and that work is underway to develop a comprehensive, multifaceted, cohesive approach.

**Step 2:**  
***Mapping the  
"Family" of  
Schools***

Once individual schools have done their initial mapping, the schools in a feeder pattern (or an other-wise designated "family" of schools) can meet together to pool the information. At this juncture, efforts should also be made to identify other district-level and community resources that could be brought to the family of schools.

Here, again, the products of the expanded mapping engender a significant opportunity for social marketing.

In anticipating the analyses of resources, it is important at the family of schools level to designate whether the resources currently are deployed at elementary, middle, high school, or at all levels.

**Step 3:**  
***Analyses***

With the initial mapping done, the focus turns to analyzing how resources are currently used. The aim is to develop specific recommendations for improving the work at each school through enhancing use of the resources currently at a school and enhancing resources through collaboration among the family of schools and with neighborhood resources.

Essentially, the process involves conducting a gap analysis. That is, existing resources are laid out in the context of the vision schools have for a comprehensive, multifaceted, and integrated approach to addressing barriers to learning and promoting healthy development (e.g., see Appendix A). From that perspective, the analysis focuses on (1) what parts are in place, (2) what's still missing, and (3) what needs to be done to improve matters.

(1) *What's in place?* Discussion focuses on how effective and efficient current efforts are. Special attention is given to identifying redundant efforts, inefficient use of resources, and ineffective activities. With respect to what is seen as ineffective, the analyses should differentiate between activities that might be effective if they were better supported and those that are not worth continuing because they have not made a significant impact or because they are not well-conceived. This facilitates generating recommendations about what should be discontinued so that resources can be redeployed to enhance current efforts and fill gaps.

(2) *What's still missing?* Every school has a wish list of programs and services it needs. The analyses put these into perspective of the school's vision for a comprehensive, multifaceted, and integrated approach to addressing barriers to learning and promoting healthy development. By doing this, the analyses provide an appreciation of major gaps. Thus, rather than making ad hoc choices from a laundry-list of wishes, recommendations can be based on a systematic analysis of current efforts that require enhancement and gaps that need to be filled.

(3) *How can resources be used better?* Analyses of how resources might be used better first focus on identifying wasteful uses (i.e., redundancies, ineffective activity, programs where costs far out-weigh benefits, lack of coordination). Then, the emphasis is on promising programs that are under-supported. Finally, discussion turns to exploring which gaps should be filled first (e.g., new activity that is as or even more important than existing efforts).

**Step 3:**  
***Recommendations  
for Deploying &  
Enhancing  
Resources***

No school or family of schools can do everything at once -- especially when there is a great deal to do (see Appendix E). Based on the analyses, recommendations first must stress combining some efforts to reduce redundancy at each school and for the family of schools and discontinuing ineffective activity. A second set of recommendations focus on redeploying freed-up resources to strengthen promising efforts. Finally, recommendations are made about priorities for filling gaps and for strategies to expand the pool of resources.

With respect to expanding the pool of resources, the first strategy can involve braiding together the resources of the family of schools to achieve economies of scale and to accomplish overlapping activity. Then, the focus is on enhancing connections with community resources in order to enhance existing programs and services and fill specific gaps. Recommendations should clarify how the limited community resources can be added in integrated and equitable ways across the family of schools. Finally, recommendations can be made about seeking additional funds. (See Center Brief and Fact Sheet on *Financing Mental Health for Children & Adolescents*.)

## **School Steering Body for a Learning Supports Component**

All initiatives need a team of “champions” who agree to steer the process. Thus, at the school level, initially it helps not only to have a resource-oriented team, but also to establish an advisory/steering group. This leadership body ensures overall development of the component to address barriers to learning and guides and monitors the resource team. These advocates must be competent with respect to the work to be done and highly motivated not just to help get things underway, but to ensure the changes are sustained over time.

The group's first focus is on assuring that capacity is built to accomplish the desired systemic changes. This includes ensuring an adequate policy and leadership base. If such a base is not already in place, the group needs to focus on getting one in place. Capacity building, of course, also includes special training for change agents. Over time, the main functions of a steering group are to ensure that staff assigned to facilitate changes (a) maintain a big picture perspective and appropriate movement toward long-term goals and (b) have sufficient support and guidance.

The steering group should be fully connected with teams guiding the instructional and management components at the school. Each school steering body needs to be linked formally to the district mechanism designed to guide development of learning supports components at schools.

Steering groups should not be too large. For example, at a school level, membership might include key change agents, one or two other key school leaders, perhaps someone from a local institution of higher education, perhaps a key agency person or two, and a few well-connected “champions.” Such a group can meet monthly (more often if major problems arise) to review progress, problem solve, decide on mid-course corrections. To work against the perception that it is a closed, elite group, it can host “focus groups” to elicit input and feedback and provide information.

## **Ad Hoc and Standing Work Groups for a Resource Team**

Work groups are formed as needed by a Learning Supports Resource Team to address specific concerns (e.g., mapping resources, planning for capacity building and social marketing, addressing problems related to case-oriented systems), develop new programs (e.g., welcoming and social support strategies for newcomers to the school), implement special initiatives (e.g., positive behavior support), and so forth. Such groups usually are facilitated by a member of the resource team who recruits a small group of others from the school and community who are willing and able to help. The group facilitator provides regular updates to the resource team on work group progress and brings back feedback from the Team.

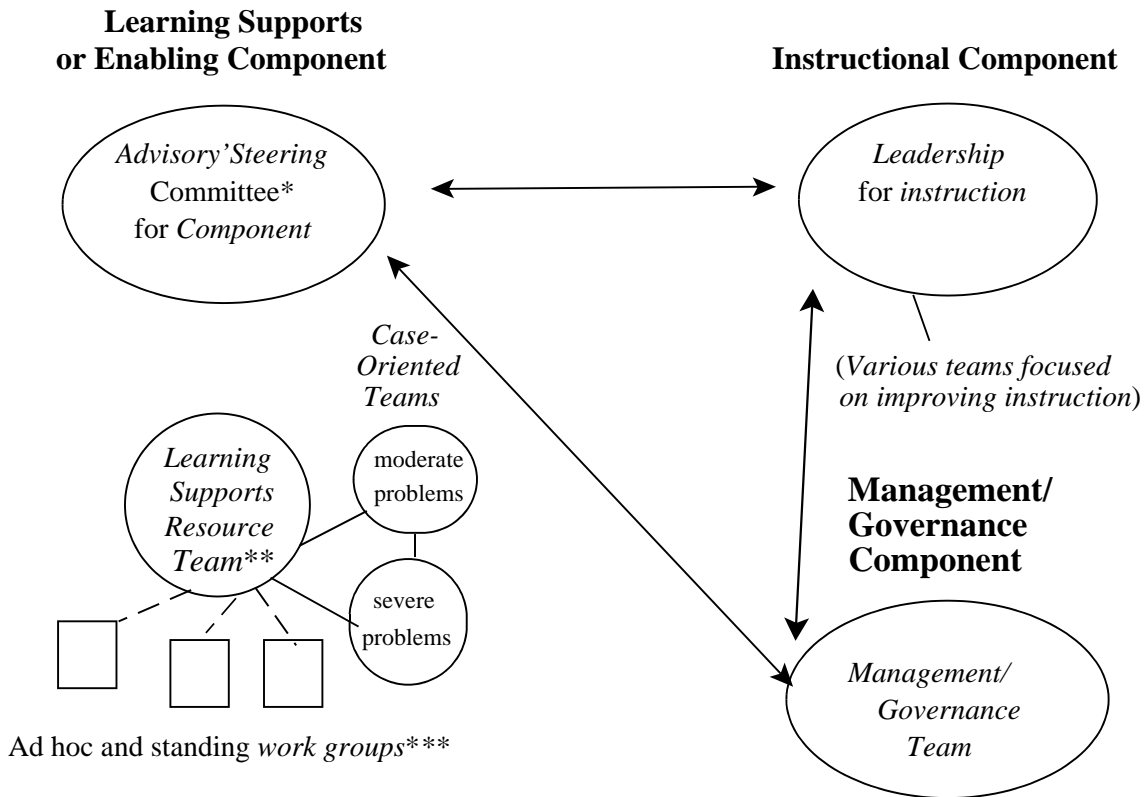

*Ad hoc* work groups take on tasks that can be done over a relatively short time period, and the group disbands once the work is accomplished. *Standing* work groups focus on defined programs areas and pursue current priorities for enhancing intervention in a given arena. For example, a standing work group might be established for any of the six intervention arenas outlined in Chapter 6.

## **Integrating the Component into the School Infrastructure**

The figure on the next page illustrates the type of infrastructure that needs to emerge at the school if it is to effectively develop a comprehensive component to address barriers to learning.

Note especially the links among the three components, and the connection within the various groups involved in planning, implementing, evaluating, and sustaining learning supports.

## Example of an Integrated Infrastructure at a School Site

\*A Learning Supports or Enabling Component Advisory/Steering Committee at a school site consists of a leadership group whose responsibility is to ensure the vision for the component is not lost. It meets as needed to monitor and provide input to the Learning Supports Resource Team.

\*\*A Learning Supports Resource Team is the key to ensuring component cohesion, integrated implementation, and ongoing development. It meets weekly to guide and monitor daily implementation and development of all programs, services, initiatives, and systems at a school that are concerned with providing learning supports and specialized assistance.

\*\*\*Ad hoc and standing work groups are formed as needed by the Learning Supports Resource Team to address specific concerns. These groups are essential for accomplishing the many tasks associated with such a team's functions.

### *A Caveat*

In building a comprehensive, multifaceted continuum of interventions, the team will be confronted by the complementary challenges surrounding the needs for *evidence-based strategies* and *demonstrating results*. These matters must be addressed in ways that enhance rather than hinder system-wide effectiveness. The dilemma arises because of the limited nature and scope of interventions that currently have strong research support. The best (not always to be equated with good) evidence-based strategies for identifying and working with student's problems are for a small number of non-comorbid disorders. And, the data show efficacy – not effectiveness. Clearly, before these strategies are seen as the answer, they must be widely implemented in community and school settings, and they must generate data that demonstrate enhanced cost-effectiveness.

But it should be stressed that there is a bigger problem related to addressing barriers to student learning. This involves investing in the development and evaluation of interventions that go beyond one-to-one and small group approaches and that incorporate public health and primary prevention initiatives. Such approaches must be comprehensive, multifaceted, and integrated and must encompass a full intervention continuum in the form of systems of prevention, systems of early intervention (early after the onset of problems), and systems of care. Development of such a continuum of overlapping systems requires major school-based programs and school-community collaborations

In sampling the literature, it is evident that there is not a strong evidence base for addressing many psychosocial problems. Unfortunately, the field is not moving in the direction of developing such an evidence base because (1) there is not support for the type of research that must be carried out to determine the impact of comprehensive, multifaceted, and integrated approaches, and (2) many in the field are falling into the trap of thinking large-scale problems can be solved by reifying a few evidence-based interventions. It is striking that there never has been a formal study of the impact on a catchment area (e.g., a neighborhood) of a comprehensive, multifaceted, and integrated approach that encompasses a full intervention continuum in the form of systems of prevention, early intervention, and care.

This is not to say, data are not available to support development of comprehensive, multifaceted, and integrated approaches. There are both negative data that indicate the need (e.g., the “plateau effect” increasingly becoming evident around direct efforts to increase achievement test scores and close the achievement gap in many districts. And, there is the positive data related to efforts to aggregate findings related to addressing barriers to learning and teaching into an “big picture” perspective. See the research brief: *Addressing Barriers to Student Learning & Promoting Healthy Development: A Usable Research-Base* online at <http://smhp.psych.ucla.edu/pdfdocs/briefs/BarriersBrief.pdf>

## **Concluding Comments**

Most of us know how hard it is to work effectively with a group. Many staff members at a school site have jobs that allow them to carry out their duties each day in relative isolation of other staff. And despite various frustrations they encounter in doing so, they can see little to be gained through joining up with others. In fact, they often can point to many committees and teams that drained their time and energy to little avail.

Despite all this, the fact remains that no organization can be truly effective if everyone works in isolation. And it is a simple truth that there is no way for schools to play their role in addressing barriers to student learning and enhancing healthy development if a critical mass of stakeholders do not work together towards a shared vision. There are policies to advocate for, decisions to make, problems to solve, and interventions to plan, implement, and evaluate.

Obviously, true collaboration involves more than meeting and talking. The point is to work together in ways that produce the type of actions that result in effective programs.

The danger in creating new mechanisms is that they can become just another task, another meeting -- busy work. Infrastructure must be designed in keeping with the major functions to be carried out, and all functions must be carried out in the service of a vital vision. Resource-oriented mechanisms are valuable only if they are driven by and help advance an important vision. Leaders and facilitators must be able to instill that vision in team members and help them hold on to it even when the initial excitement of "newness" wanes.

In outlining the ongoing functions of mapping, analyzing, and deploying resources, we have also stressed that, in our work, resource-oriented functions are done in the service of building, sustaining, and evolving a comprehensive, multifaceted, and cohesive approach to addressing barriers to learning and promoting healthy development. It is that vision that sustains us and our colleagues.

## WHAT IS A LEARNING SUPPORTS RESOURCE TEAM?

**E**very school that wants to improve its systems for providing student support needs a mechanism that focuses specifically on improving resource use and enhancement. A *Learning Support Resource Team* (previously called a Resource Coordinating Team) is a vital form of such a mechanism.

Most schools have teams that focus on individual student/family problems (e.g., a student support team, an IEP team). These teams focus on such functions as referral, triage, and care monitoring or management. In contrast to this case-by-case focus, a school's *Learning Support Resource Team* can take responsibility for enhancing use of all resources available to the school for addressing barriers to student learning and promoting healthy development. This includes analyzing how existing resources are deployed and clarifying how they can be used to build a comprehensive, multifaceted, and cohesive approach. It also integrally involves the community with a view to integrating human and financial resources from public and private sectors to ensure that all students have an equal opportunity to succeed at school.

### What are its functions?

A Resource Coordinating Team performs essential functions related to the implementation and ongoing development of a comprehensive, multifaceted, and cohesive approach for addressing barriers to student learning and promoting healthy development.

Examples of key functions are:

- , Mapping resources at school and in the community
- , Analyzing resources
- , Identifying the most pressing program development needs at the school
- , Coordinating and integrating school resources & connecting with community resources
- , Establishing priorities for strengthening programs and developing new ones
- , Planning and facilitating ways to strengthen and develop new programs and systems
- , Recommending how resources should be deployed and redeployed
- , Developing strategies for enhancing resources
- , "Social marketing"

Related to the concept of an Enabling (Learning Support) Component, these functions are pursued within frameworks that outline six curriculum content areas and

the comprehensive continuum of interventions needed to develop a comprehensive, multifaceted approach to student support that is integrated fully into the fabric of the school.

### Who's on Such a Team?

A Learning Support Resource Team might begin with only two people. Where feasible, it should expand into an inclusive group of informed stakeholders who are able and willing. This would include the following:

- Principal or assistant principal
- School Psychologist
- Counselor
- School Nurse
- School Social Worker
- Behavioral Specialist
- Special education teacher
- Representatives of community agencies involved regularly with the school
- Student representation (when appropriate and feasible)
- Others who have a particular interest and ability to help with the functions

It is important to integrate this team with the infrastructure mechanisms at the school focused on instruction and management/governance. For example, the school administrator on the team must represent the team at administrative meetings; there also should be a representative at governance meetings; and another should represent the team at a Learning Support Resource *Council* formed for a family of schools (e.g., the feeder pattern).

# Appendix A

On Monday, May 22, 2000, a group of leaders involved in pioneer initiatives to reform and restructure education support programs participated in a day-long “summit” meeting at UCLA. The report from the meeting, entitled: *Pioneer Initiatives to Reform Education Support Programs*, extrapolates basic implications from work being done by such initiatives. The Executive Summary is offered on the next 3 pages.

In order to play an increasingly meaningful role in moving forward with the reform and restructuring of learning support programs, we following this meeting with a national leadership Summit in October, 2002 and several regional Summits in 2003 focused on *New Directions for Student Support*. Based on the recommendations of those participating in these summits, the national *New Directions for Student Support Initiative* was initiated and is moving rapidly to schedule statewide Summits for *New Directions for Student Support* as an organizational step in establishing state initiatives. As of January 2005, State Summits have been held in Minnesota, Wisconsin, Texas, California, Indiana, and Connecticut, and these states currently are exploring ways to take next steps. Summits are scheduled for New York and Iowa, and other states have contacted us to begin the discussion. Following the Executive Summary from the Pioneers’ Summit is a brief description of the *New Directions for Student Support Initiative* and how to learn more about it.

## Executive Summary: *Pioneer Initiatives to Reform Education Support Programs*

*School systems are not responsible for meeting every need of their students.*

*But when the need directly affects learning, the school must meet the challenge.*

Carnegie Council  
Task Force (1989)

**P**olicy makers are calling for higher standards and greater accountability for instruction, improved curricula, better teaching, increased discipline, reduced school violence, an end to social promotion, and more. At the same time, it is evident that current strategies to accomplish all this are inadequate to the task. This is likely to remain the case as long as so little attention is paid to reforming and restructuring the ways schools address many well-known factors interfering with the performance and learning of so many young people.

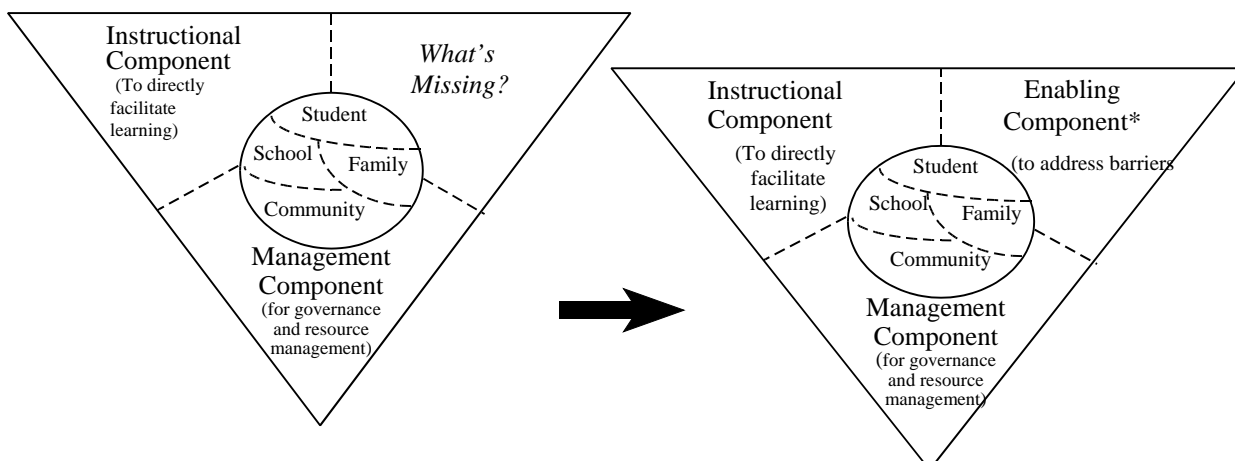

Pioneer initiatives around the country are demonstrating the need to rethink how schools and communities can meet the challenge of addressing persistent barriers to student learning. As a whole, their work underscores a reality that too few school reformers have acted upon. Namely:

*If our society truly means to provide the opportunity for all students to succeed at school, fundamental changes are needed so that schools and communities can effectively address barriers to development and learning.*

Based particularly on the work of several comprehensive initiatives, the full report stresses the need to expand school reform (see figure below). These initiatives are restructuring education support programs under the umbrella of a newly conceived reform component that focuses directly on addressing barriers to learning and development. This component is to be fully integrated with the others and assigned equal priority in policy and practice.

The notion of barriers to learning encompasses external and internal factors. It is clear that too many youngsters are growing up and going to school in situations that not only fail to promote healthy development, but are antithetical to the process. Some also bring with them intrinsic conditions that make learning and performing difficult. As a result, youngsters at every grade level come to school unready to meet the setting's demands effectively.

Figure. Moving from a two to a three component model for reform and restructuring.

\*The third component (an enabling component) is established in policy and practice as primary and essential and is developed into a comprehensive approach by weaving together school and community resources.

Addressing barriers is not at odds with the "paradigm shift" that emphasizes strengths, resilience, assets, and protective factors. Efforts to enhance positive development and improve instruction clearly can improve readiness to learn. However, it is frequently the case that preventing problems also requires direct action to remove or at least minimize the impact of barriers, such as hostile environments and intrinsic problems. Without an effective, direct intervention, such barriers

can continue to get in the way of development and learning.

The concept of an enabling component embraces a focus on healthy development, prevention, and addressing barriers. Thus it is not a case of a negative vs. a positive emphasis (or excusing or blaming anyone). It's not about what's wrong vs. what's right with kids. It is about continuing to face up to the reality of major extrinsic barriers, as well as personal vulnerabilities and real disorders and disabilities.

In addressing barriers to student learning, the pioneering initiatives are improving school and classroom environments to prevent problems and enhance youngsters' strengths. At the same time, for those who need something more, school and community, working separately and together, provide essential supports and assistance.

Society has the responsibility to promote healthy development *and* address barriers.

The pioneer initiatives discussed in the report are showing how to:

***CUse an enabling component.*** In various forms, each has adopted the concept of an enabling component and is moving to develop comprehensive, multifaceted, and integrated approaches. Some use the term learning support component; others use learner support, supportive learning environment, or comprehensive student support system. Whatever the term, the focus is on developing a full array of programs and services by melding school, community, and home, resources. The aim is to develop a continuum ranging from primary prevention through early intervention to treatment of serious problems. At each school, creation of such a component involves programs to (a) enhance the ability of the classroom to enable learning, (b) provide support for the many transitions experienced by students and families, (c) increase home involvement, (d) respond to and prevent crises, (e) offer special assistance to students and their families, and (f) expand community involvement (with a special focus on the use of volunteers).

***CRestructure education support programs from the school outward.***

For too long there has been a terrible disconnect between central office policy and operations and how programs and services evolve in classrooms and schools. The initiatives recognize that planning should begin with a clear image of what the classroom and school must do to teach all students effectively and enable learning by addressing barriers. Then, the focus moves to planning how a family of schools (e.g., a high school and its feeders) and the surrounding community can complement each other's efforts and achieve economies of scale. Central staff and state and national policy then are expected to restructure in ways that best support local efforts *as defined locally*.

The experiences of those who are revamping support programs also are highlighting a variety of other basic concerns

about current practices, policy, and reforms. Extrapolating from the work

done to date, greater attention is especially needed related to:

***C Addressing barriers through a broader view of “basics” and through effective accommodation of learner differences.*** The curriculum in every classroom must emphasize acquisition of basic knowledge and skills. However, such basics must be understood to involve more than the three Rs and cognitive development. There are many essential areas of human development and functioning, and each contains "basics" that individuals need for success at school and in life. And, any individual may require special accommodation in one or more of these areas.

***C Enhancing the focus on motivational considerations.*** Every classroom must incorporate a focus that appreciates the importance of both intrinsic and extrinsic motivation in relation to learner readiness and ongoing involvement and that fosters intrinsic motivation as a basic outcome.

***C Adding remediation as necessary, but only as necessary.*** Remedial procedures must be *added* to instructional programs for certain individuals, but only after appropriate nonremedial procedures for facilitating learning have been tried. Moreover, such procedures must be designed to build on strengths and must not supplant a continuing emphasis on promoting healthy development.

***C Enhancing school-wide approaches.*** Beyond the classroom, schools must have policy, leadership, and mechanisms for school-wide programs to address barriers to learning and teaching. Some of this activity requires partnering with other schools, some requires weaving school and community resources together.

***C Increasing policy cohesion and filling critical gaps.*** Relatedly, policymakers at all levels must revisit existing policy using the lens of addressing barriers to learning with the intent of both realigning enacted policy to foster cohesive practices and enacting new policies to fill critical gaps. However, given the realities of legislative bodies, additional mechanisms should be established quickly to facilitate appropriate blending of funds in pursuit of more comprehensive and multifaceted approaches for addressing barriers to learning and development and promoting healthy development.

***C Expanding the framework for school accountability.*** Besides focusing on high standards for academic performance, accountability must encompass all facets of a comprehensive and holistic approach to ensuring positive development and learning. Such expanded accountability incorporates high standards for learning related to social and personal functioning and for activity directly designed to address barriers to student learning. The former includes measures of social learning and behavior, character/values, civility, healthy and safe behavior, and other facets of youth development. The latter includes benchmark indicators such as increased attendance, reduced tardies, reduced misbehavior, less bullying and sexual harassment, increased family involvement with child and schooling, fewer referrals for specialized assistance, fewer referrals for special education, and fewer pregnancies, suspension, and dropouts.

***C Improving scale-up efforts.*** After developing efficacious demonstrations of ways to reform education support programs, policymakers and administrators at all levels must be ready to pursue new and improved strategies in order to ensure substantive district-wide systemic changes.

\*The full report and the accompanying materials can be downloaded from our website (<http://smhp.psych.ucla.edu>).

## ***New Directions for Student Support***

. . . a national initiative

---

*School systems are not responsible for meeting every need of their students. But, when the need directly affects learning, the school must meet the challenge.*

Despite decades of discussion about ensuring all students have an equal opportunity to succeed at school, reformers have paid little attention to rethinking the way schools provide student supports.

*Until now!* A national initiative for *New Directions for Student Support* is underway. The goal is to bring student support into the 21<sup>st</sup> century by revolutionizing what schools do to address barriers to learning and teaching.

### ***It's an Imperative for***

- >>>any school designated as low performing
- >>>closing the achievement gap
- >>>making schools safe

### **Meeting the Challenges Requires Rethinking ALL Support Programs, Resources, and Personnel**

Most people hear the term *student support* and think mainly about pupil service personnel (e.g., school psychologists, counselors, social workers, nurses) and the special services such staff provide. But, schools need and have many more resources they use to meet the challenge of ensuring all students have an equal opportunity to succeed at school.

Besides traditional support staff, learning support is provided by compensatory education personnel (e.g., Title I staff), resource teachers who focus on prereferral interventions, and personnel who provide a variety of school-wide programs (e.g., after school, safe and drug free school programs). New Directions stem from rethinking how *all* these resources are used.

**\*\*\*\*After holding a national summit and three regional summits, it is clear that the next steps are to organize at the state level. To date, four states have already held statewide summits and are in the process of pursuing *New Directions for Student Support*. And, so far, over 30 organizations have signed on as initiative co-sponsors (see the other side of this announcement).**

### ***Interested in exploring any of this further?***

Go to the homepage of the Center for Mental Health in Schools at UCLA (<http://smhp.psych.ucla.edu>) and click on the green button labeled “New Directions: Student Support Initiative.”

Or contact:

Howard Adelman or Linda Taylor, Co-Directors, Center for Mental Health in Schools,  
Box 951563, UCLA, Los Angeles, CA 90095- 1563  
(866) 846-4843 – toll free; Fax: (310) 206-8716; email: [smhp@ucla.edu](mailto:smhp@ucla.edu)

The Summits Initiative is sponsored by the national *Center for Mental Health in Schools at UCLA*.<sup>\*</sup>  
So far, the growing number of co-sponsors includes:

- American School Counselors Association
- American School Health Association
- Association for Supervision and Curriculum Development
- California Association of School Psychologists
- California Center for Community School Partnerships
- California Department of Education
- Center for Cooperative Research and Extension Services for Schools
- Center for Prevention of Youth Violence, Johns Hopkins University
- Center for School Mental Health Assistance at the University of Maryland at Baltimore
- Center for Social and Emotional Education
- Coalition for Cohesive Policy in Addressing Barriers to Development and Learning
- Coalition for Community Schools
- Collaborative for Academic, Social, and Emotional Learning
- Education Development Center
- Indiana Department of Education
- Johns Hopkins University Graduate Division of Education
- Minnesota Department of Education
- National Alliance of Pupil Service Organizations
- National Association of Pupil Services Administrators
- National Association of School Nurses
- National Association of School Psychologists
- National Association of Secondary School Principals
- National Association of Social Workers
- National Association of State Boards of Education
- National Center for Community Education
- National Middle School Association
- Policy Leadership Coalition of Mental Health in Schools
- Region VII Comprehensive Center
- School Social Work Association of America
- Urban Special Education Leadership Collaborative
- Wisconsin Department of Public Instruction

U.S. Department of Health and Human Services

<sup>\*</sup>The Center is co-directed by Howard Adelman and Linda Taylor and operates under the auspices of the School Mental Health Project, Dept. of Psychology, UCLA. Support comes in part from the Office of Adolescent Health, Maternal and Child Health Bureau (Title V, Social Security Act), Health Resources and Services Administration (Project #U93 MC 00175), with co-funding from the Center for Mental Health Services, Substance Abuse and Mental Health Services Administration. Both are agencies of the U.S. Department of Health and Human Services.

# Appendix B

## An Example from One Major School District

A number of school districts around the country are developing resource-oriented mechanisms at various levels.

Here, we highlight the work of the *Detroit Public Schools* as one pioneering effort.

In the late 1990's, the Detroit Public Schools adopted the enabling component and the concept of a Resource Coordinating Team as their *Framework for Change*. They used versions of organization facilitators to establish the systemic changes. Their stated rationale for their reforms are as follows:

Many of the contributing factors that limit a child's academic achievement are outside of the classroom. Family instability, health and nutritional problems, emotional well-being, and numerous other conditions play a role in determining whether or not a child is equipped to learn. For true reform standards to take place in urban schools, educators must tackle more than curriculum and testing issues. They must take a holistic approach that attempts to remove all barriers to student success. Such an approach requires that educators possess a compassionate concern for their students total welfare.

Leaders in the Detroit Public Schools viewed the concept of a Resource Coordinating Team “as an innovative support system to address the hurdles that can negatively impact a child's development.” This appendix provides their description of the team and its areas of concern as they have adapted it.

### **What is the Resource Coordinating Team (RCT)?**

It is an integrated learner support system that acts as a problem-solving team to promote the healthy development of the whole child.

#### **The Goal of the Resource Coordinating Team is to Strengthen a School’s Effectiveness by:**

- Addressing the quality of life issues that impact a child's emotional, social and intellectual development from both a prevention and intervention perspective.
- Linking with community agencies that can provide needed services for children and their families.
- Structuring individual student and school-based intervention plans that respond to both student and school community needs supporting systems and strategies which enable teachers to teach more effectively and students to reach rigorous academic support standards.

Resource Coordinating Teams take a village approach to educating our children by invoking the participation of various members of the school staff and community to ensure that each child receives the assistance he or she needs to reach their greatest potential.

#### **Resource Coordinating Team Partners**

- >School Social Workers
- >School Nurses and Health Professionals
- >Principals
- >Bilingual Specialists
- >Community Agency Representatives
- >Teachers of the Speech and Language Impaired (TSLI)
- >Psychologists
- >Attendance Agents
- >Special Education Teachers/Teacher Consultants
- >Curriculum Specialists
- >Hearing and Vision Consultants
- >Guidance Counselors
- >Teachers

In Detroit, these professionals work as a team to support student achievement and total school development through the following six support areas:

### **Crisis Prevention and Intervention**

RCTs facilitate immediate emergency care when there is a crisis as well as the appropriate follow-up care to students, families and community members.

### **Home Involvement in Schooling**

RCTs help parents become effective at-home teachers, and assist them in supporting their child's overall educational experience.

### **Student and Family Assistance**

Resource Coordinating Teams (RCTs) provide consultation services to families and students from within the school system or through community agencies.

### **Support for Transitions**

RCTs play a key role in ensuring that stability and security exist during the points of transition for both the student and the family by creating a nonthreatening, welcoming school environment.

### **Community Outreach**

RCTs aggressively seek partnerships with community and service organizations, public and private agencies, business and professional organizations, the faith community, universities and volunteers that support student growth and school development.

### **Classroom Focused Enabling**

Programs to enhance classroom based efforts which address barriers to learning.

## Appendix C

### Resource Aids for Developing Resource Teams/Councils

- < *Checklist for Establishing School-Site Teams*
- < *Examples of Initial and Ongoing Tasks for  
Team/Council*
- < *Planning and Facilitating Effective Meetings*

### *Checklist for Establishing School-Site Teams*

1. \_\_\_ Job descriptions/evaluations reflect a policy for working in a coordinated and increasingly integrated way to maximize resource use and enhance effectiveness (this includes allocation of time and resources so that team members can build capacity and work effectively together to maximize resource coordination and enhancement).
2. \_\_\_ Every interested staff member is encouraged to participate.
3. \_\_\_ Team include key stakeholders (e.g., guidance counselors, school psychologists, nurses, social workers, attendance and dropout counselors, health educators, special education staff, after school program staff, bilingual and Title I program coordinators, health educators, safe and drug free school staff, representatives of any community agency significantly involved with the site, administrator, regular classroom teachers, non-certificated staff, parents, older students).
4. \_\_\_ The size of teams reflects current needs, interests, and factors associated with efficient and effective functioning. (The larger the group, the harder it is to find a meeting time and the longer each meeting tends to run. Frequency of meetings depends on the group's functions, time availability, and ambitions. Properly designed and trained teams can accomplish a great deal through informal communication and short meetings).
5. \_\_\_ There is a core of team members who have or will acquire the ability to carry out identified functions and make the mechanism work (others are auxiliary members). All are committed to the team's mission. (Building team commitment and competence should be a major focus of school management policies and programs. Because various teams at a school require the expertise of the same personnel, some individuals will necessarily be on more than one team.)
6. \_\_\_ Team has a dedicated leader/facilitator who is able to keep the group task-focused and productive
7. \_\_\_ Team has someone who records decisions and plans and reminds members of planned activity and products.
8. \_\_\_ Team uses advanced technology (management systems, electronic bulletin boards and E-mail, resource clearinghouses) to facilitate communication, networking, program planning and implementation, linking activity, and a variety of budgeting, scheduling, and other management concerns.

## **Exhibit**

### **Examples of Initial and Ongoing Tasks for *Team/Council***

- , Orientation for representatives to introduce each to the other and provide further clarity of group's purposes and processes
- , Review membership to determine if any major stakeholder is not represented; take steps to assure proper representation
- , Share and map information regarding what exists (programs, services, systems for triage, referral, case management, etc. – at a site; at each site; in the district and community)
- , Analyze information on resources to identify important needs at specific sites and for the complex/family of schools as a whole
- , Establish priorities for efforts to enhance resources and systems
- , Formulate plans for pursuing priorities
- , Each site discusses need for coordinating crisis response across the complex and for sharing complex resources for site specific crises and then explores conclusions and plans at Council meeting
- , Discussion of staff (and other stakeholder) development activity with a view to combining certain training across sites
- , Discussion of quality improvement and longer-term planning (e.g., efficacy, pooling of resources)

#### **General Meeting format**

- , Updating on and introduction of membership
- , Reports from those who had between meeting assignments
- , Current topic for discussion and planning
- , Decision regarding between meeting assignments
- , Ideas for next agenda

## *Planning and Facilitating Effective Meetings*

### *Forming a Working Group*

- C There should be a clear statement about the group's mission.
- C Be certain that members agree to pursue the stated mission and, for the most part, share a vision.
- C Pick someone who the group will respect and who either already has good facilitation skills or will commit to learning those that are needed.
- C Provide training for members so they understand their role in keeping a meeting on track and turning talk into effective action..
- C Designate processes (a) for sending members information before a meeting regarding what is to be accomplished, specific agenda items, and individual assignments and (b) for maintaining and circulating record of decisions and planned actions (what, who, when).

### *Meeting Format*

- C Be certain there is a written agenda and that it clearly states the purpose of the meeting, specific topics, and desired outcomes for the session.
- C Begin the meeting by reviewing purpose, topics, desired outcomes, etc. Until the group is functioning well, it may be necessary to review meeting ground rules.
- C Facilitate the involvement of all members, and do so in ways that encourage them to focus specifically on the task. The facilitator remains neutral in discussion of issues.
- C Try to maintain a comfortable pace (neither too rushed, nor too slow; try to start on time and end on time but don't be a slave to the clock).
- C Periodically review what has been accomplished and move on the next item.
- C Leave time to sum up and celebrate accomplishment of outcomes and end by enumerating specific follow up activity (what, who, when). End with a plan for the next meeting (date, time, tentative agenda). For a series of meetings, set the dates well in advance so members can plan their calendars.

### *Some Group Dynamics to Anticipate*

- C *Hidden Agendas* – All members should agree to help keep hidden agendas in check and, when such items cannot be avoided, facilitate the rapid presentation of a point and indicate where the concern needs to be redirected.
- C *A Need for Validation* – When members make the same point over and over, it usually indicates they feel an important point is not being validated. To counter such disruptive repetition, account for the item in a visible way so that members feel their contributions have been acknowledged. When the item warrants discussion at a later time, assign it to a future agenda.
- C *Members are at an Impasse* – Two major reasons groups get stuck are: (a) some new ideas are needed to "get out of a box" and (b) differences in perspective need to be aired and resolved. The former problem usually can be dealt with through brainstorming or by bringing in someone with new ideas to offer; to deal with conflicts that arise over process, content, and power relationships employ problem solving and conflict management strategies (e.g., accommodation, negotiation, mediation).
- C *Interpersonal Conflict and Inappropriate Competition* – These problems may be corrected by repeatedly bringing the focus back to the goal – improving outcomes for students/families; when this doesn't work; restructuring group membership may be necessary.
- C *Ain't It Awful!* – Daily frustrations experienced by staff often lead them to turn meetings into gripe sessions. Outside team members (parents, agency staff, business and/or university partners) can influence school staff to exhibit their best behavior.

# Appendix D

## Resource Aids and Other Relevant References for Mapping

- < *Resource Mapping and Management to Address Barriers to Learning: An Intervention for Systemic Change*
- < *Mapping of Resource Staff*
- < *Mapping of Activities Using an Enabling Component Framework*
- < *Mapping Community Resources*
- < *Other Relevant Resources for Mapping*
- < *Beyond Resource Mapping*

# **Resource Mapping and Management to Address Barriers to Learning: An Intervention for Systemic Change**

## **Overview**

In their effort to raise test scores, school leaders usually have pursued intensive instruction as the primary route. While improved instruction is necessary, for too many youngsters it is not sufficient. Students who arrive at school on any given day lacking motivational readiness and/or certain abilities need something more. That something more involves developing comprehensive, multifaceted, and integrated approaches to address barriers to student learning and promote healthy development.

Schools already have a variety of programs and services to address barriers and promote development. These range from Title I programs, through extra help for low performing students, to accommodations for special education students. In some places, the personnel and programs to support learning account for about 30% of the resources at a school. However, because school leaders have been so focused on instruction, essential efforts to support learning are marginalized, and resources are deployed in a fragmented and often wasteful and ineffective manner. The result of the marginalization is that school improvement efforts continue to pay little attention to the need for and potential impact of rethinking how these resources can be used to enable student learning by doing more to address barriers.

*How can a school improve its impact in addressing barriers to student learning?*

It can begin by (a) taking stock of the resources already being expended and

(b) considering how these valuable resources can be used to the greatest effect. These matters involve a variety of functions and tasks we encompass here under the rubric of *mapping and managing resources*.

Carrying out the functions and tasks related to mapping and managing resources is, in effect, an intervention for systemic change. For example:

- C A focus on these matters highlights the reality that the school's current infrastructure probably requires some revamping to ensure the necessary functions are carried out (e.g., a resource-oriented mechanism focusing on resources is needed).
  
- C By identifying and analyzing existing resources (e.g., personnel, programs, services, facilities, budgeted dollars, social capital), awareness is heightened of their value and potential for playing a major role in helping students engage and re-engage in learning at school.
  
- C Analyses also lead to sophisticated recommendations for deploying and redeploying resources to improve programs, enhance cost-effectiveness, and fill programmatic gaps in keeping with well-conceived priorities.
  
- C The products of mapping activities can be invaluable for "social marketing" efforts designed to show teachers, parents, and other community stakeholders all that the school is doing to address barriers to learning and promote healthy development.

Enhanced appreciation of the importance of resource mapping and management may lead to a desire to accomplish the work quickly. Generally speaking, it is not feasible to do so because mapping usually is best done in stages and requires constant updating. Thus, most schools will find it convenient to do the easiest forms of mapping first and, then, build the capacity to do in-depth mapping over a period of months. Similarly, initial analyses and management of resources will focus mostly on enhancing understanding of what exists and coordination of resource use. Over time, the focus is on spread-sheet type analyses, priority recommendations, and braiding resources to enhance cost-effectiveness, and fill programmatic gaps.

# About Resource Mapping and Management

## A. Why mapping resources is so important.

- To function well, every system has to fully understand and manage its resources. Mapping is a first step toward enhancing essential understanding, and done properly, it is a major intervention in the process of moving forward with enhancing systemic effectiveness.

## B. Why mapping both school *and* community resources is so important.

- Schools and communities share
  - < goals and problems with respect to children, youth, and families
  - < the need to develop cost-effective systems, programs, and services to meet the goals and address the problems.
  - < accountability pressures related to improving outcomes
  - < the opportunity to improve effectiveness by coordinating and eventually integrating resources to develop a full continuum of systemic interventions

## C. What are resources?

- Programs, services, real estate, equipment, money, social capital, leadership, infrastructure mechanisms, and more

## D. What do we mean by mapping and who does it?

- A representative group of informed stakeholder is asked to undertake the process of identifying
  - < what currently is available to achieve goals and address problems
  - < what else is needed to achieve goals and address problems

## E. What does this process lead to?

- Analyses to clarify gaps and recommend priorities for filling gaps related to programs and services and deploying, redeploying, and enhancing resources
- Identifying needs for making infrastructure and systemic improvements and changes
- Clarifying opportunities for achieving important functions by forming and enhancing collaborative arrangements
- Social Marketing

## F. How to do resource mapping

- Do it in stages (start simple and build over time)
  - < a first step is to clarify people/agencies who carry out relevant roles/functions
  - < next clarify specific programs, activities, services (including info on how many students/families can be accommodated)
  - < identify the dollars and other related resources (e.g., facilities, equipment) that are being expended from various sources
  - < collate the various policies that are relevant to the endeavor
- At each stage, establish a computer file and in the later stages create spreadsheet formats
- Use available tools (see examples in this packet)

## G. Use benchmarks to guide progress related to resource mapping

## *Mapping of Resource Staff*

The following templates can be used as aids in generating a list of the special resource personnel at a site and throughout a feeder pattern (or “family”) of schools.

Note the following:

In listing “itinerant” resources (e.g., staff who go to different schools on different days), information should be included that indicates the days and hours the individual is at the school.

The individuals listed for a school are a logical group to build a resource-oriented team around. Then, when a multi-site council is formed, 1-2 representatives of each school's team can be the core around which the council is built.

**Resource Coordination (names & schedules provided so staff, students, and families can access)**

**Some of the Special Resources Available at \_\_\_\_\_ School**

In a sense, each staff member is a special resource for each other. A few individuals are highlighted here to underscore some special functions.

*Administrator for Learning Supports*

\_\_\_\_\_

*School Psychologist* \_\_\_\_\_  
times at the school \_\_\_\_\_

- Provides assessment and testing of students for special services. Counseling for students and parents. Support services for teachers. Prevention, crisis, conflict resolution, program modification for special learning and/or behavioral needs.

*School Nurse* \_\_\_\_\_  
times at the school \_\_\_\_\_

- Provides immunizations, follow-up, communicable disease control, vision and hearing screening and follow-up, health assessments and referrals, health counseling and information for students and families.

*Pupil Services & Attendance Counselor*

\_\_\_\_\_ times at the school \_\_\_\_\_

- Provides a liaison between school and home to maximize school attendance, transition counseling for returnees, enhancing attendance improvement activities.

*Social Worker* \_\_\_\_\_  
times at the school \_\_\_\_\_

- Assists in identifying at-risk students and provides follow-up counseling for students and parents. Refers families for additional services if needed.

*Counselors* \_\_\_\_\_ times at the school \_\_\_\_\_

\_\_\_\_\_

- General and special counseling/guidance services. Consultation with parents and school staff.

*Dropout Prevention Program Coordination*

\_\_\_\_\_ times at the school \_\_\_\_\_

- Coordinates activity designed to promote dropout prevention.

*Title I and Bilingual Coordinators*

\_\_\_\_\_

\_\_\_\_\_

Coordinates categorical programs, provides services to identified Title I students, implements Bilingual Master Plan (supervising the curriculum, testing, and so forth)

*Resource and Special Education Teachers*

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_ times at the school \_\_\_\_\_

- Provides information on program modifications for students in regular classrooms as well as providing services for special education.

## *Mapping of Activities Using an Enabling Component Framework*

In mapping the various activities, programs, and services at a school, it is important to use a logical framework rather than just creating a long list. One empirically developed framework is the six areas that have been conceived as the "curriculum" of an enabling component. These six areas are identified in both Appendices A and B and are delineated in more detail below.

Examples of one school's mapping in each of these areas are provided on the following pages.

### **(1) Classroom-Focused Enabling -- enhancing teacher capacity for addressing problems and for fostering social, emotional, intellectual and behavioral development.**

When a classroom teacher encounters difficulty in working with a youngster, the first step is to see whether there are ways to address the problem within the classroom and perhaps with added home involvement. It is essential to equip teachers to respond to garden variety learning, behavior, and emotional problems using more than social control strategies for classroom management. They must learn ways to engage students who are not highly motivated and reengage those who have become turned off to school. Teachers must be helped to learn many ways to enable the learning of such students, and schools must develop school-wide approaches to assist teachers in doing this fundamental work. The literature offers many relevant practices. A few prominent examples are: prereferral intervention efforts, tutoring (e.g., one-to-one or small group instruction), enhancing protective factors, and assets building (including use of curriculum-based approaches to promoting social emotional development).

### **(2) Support for Transitions -- enhancing school capacity to handle the variety of transition concerns confronting students and their families.**

It has taken a long time for schools to face up to the importance of establishing transition programs. In recent years a beginning has been made. Transition programs are an essential facet of reducing levels of alienation and increasing levels of positive attitudes toward and involvement at school and learning activity. Thus, schools must plan, develop, and maintain a focus on transition concerns confronting students and their families. Examples of relevant practices are readiness to learn programs, before, during, and after school programs to enrich learning and provide safe recreation, articulation programs (for each new step in formal education, vocational and college counseling, support in moving to and from special education, support in moving to post school living and work), welcoming and social support programs, to and from special education programs, and school-to-career programs. Enabling successful transitions has made a significant difference in how motivationally ready and able students are to benefit from schooling.

### **(3) Crisis/Emergency Assistance and Prevention -- responding to minimize the impact of, and prevent crises.**

The need for crisis response and prevention is constant in many schools. Such efforts ensure assistance is provided when emergencies arise and follow-up care is provided when necessary and appropriate so that students are able to resume learning without undue delays. Prevention activity stresses creation of a safe and productive environment and the development of student and family attitudes about and capacities for dealing with violence and other threats to safety. Examples of school efforts include (1) systems and programs for emergency/crisis response at a site, throughout a complex/family of schools, and community-wide (including a program to ensure follow-up care) and (2) prevention programs for school and community to address safety and violence reduction, child abuse and suicide prevention, and so forth. Examples of relevant practices are establishment of a crisis team to ensure crisis response and aftermath interventions are planned and implemented, school environment changes and safety strategies, and curriculum approaches to preventing crisis events (violence, suicide, and physical/sexual abuse prevention). Current trends stress school- and community-wide prevention programs.

**(4) Enhancing home involvement.** In recent years, the trend has been to expand the nature and scope of the school's focus on enhancing home involvement. Intervention practices encompass efforts to (1) address specific learning and support needs of adults in the home (e.g., classes to enhance literacy, job skills, ESL, mutual support groups), (2) help those in the home meet their basic obligations to the children, (3) improve systems to communicate about matters essential to student and family, (4) enhance the home-school connection and sense of community, (5) enhance participation in making decisions that are essential to the student, (6) enhance home support related to the student's basic learning and development, (7) mobilize those at home to problem solve related to student needs, and (8) elicit help (support, collaborations, and partnerships) from those at home with respect to meeting classroom, school, and community needs. The context for some of this activity may be a parent center (which may be part of the Family and Community Service Center Facility if one has been established at the site).

**(5) Outreaching to the community to build linkages and collaborations.** The aim of outreach to the community is to develop greater involvement in schooling and enhance support for efforts to enable learning. Outreach may be made to (a) public and private community agencies, colleges, organizations, and facilities, (b) businesses and professional organizations and groups, and (c) volunteer service programs, organizations and clubs. Efforts in this area might include 1) programs to recruit and enhance community involvement and support (e.g., linkages and integration with community health and social services; cadres of volunteers, mentors, and others with special expertise and resources; local businesses to adopt-a-school and provide resources, awards, incentives, and jobs; formal partnership arrangements), 2) systems and programs specifically designed to train, screen, and maintain volunteers (e.g., parents, college students, senior citizens, peer and cross-age tutors/counselors, and professionals-in-training to provide direct help for staff and students--especially targeted students), 3) outreach programs to hard-to-involve students and families (those who don't come to school regularly--including truants and dropouts), and 4) programs to enhance community-school connections and sense of community (e.g., orientations, open houses, performances and cultural and sports events, festivals and celebrations, workshops and fairs). A Family and Community Service Center Facility might be a context for some of this activity. (Note: When there is an emphasis on bringing community services to school sites, care must be taken to avoid creating a new form of fragmentation where community and school professionals engage in a form of parallel play at school sites.)

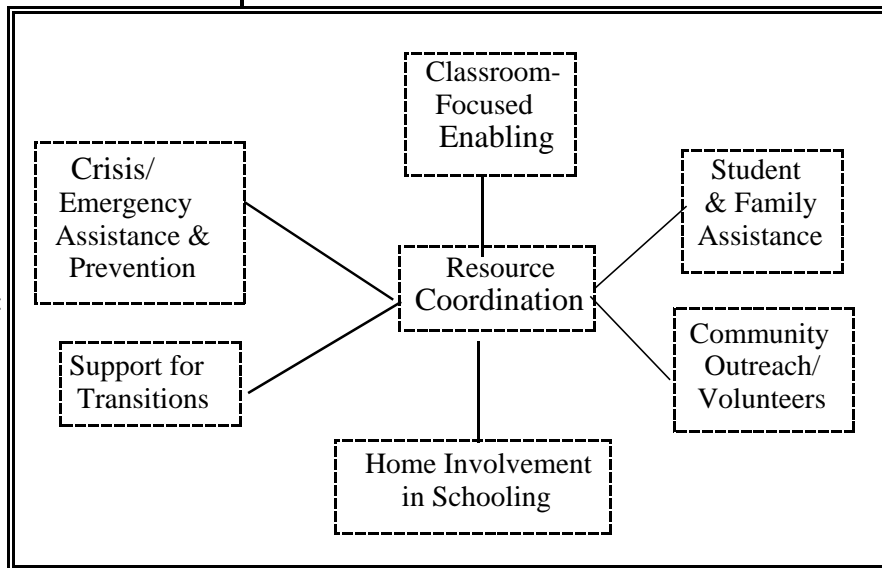

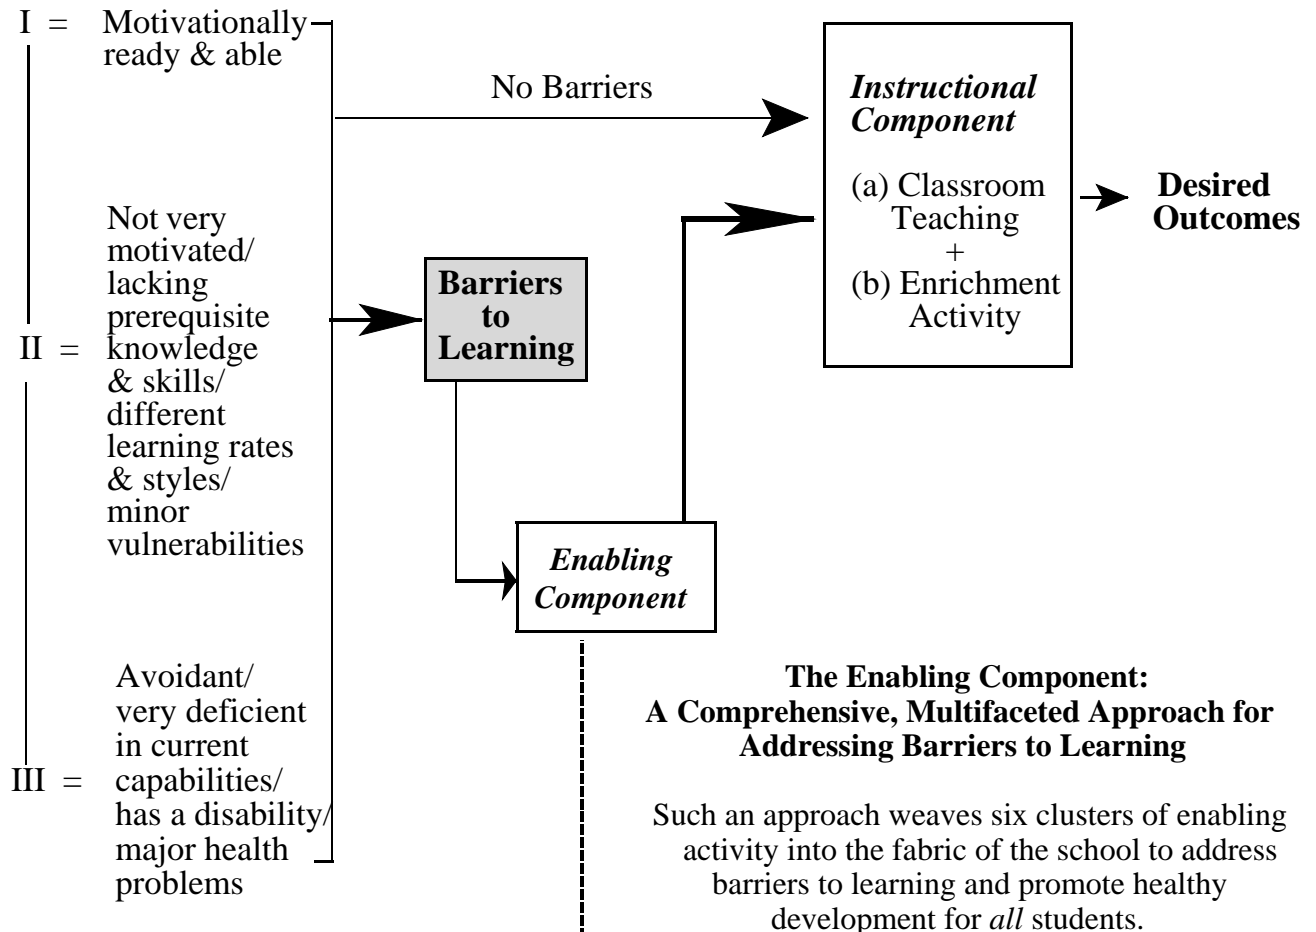

**(6) Providing special assistance for students and families.** Some problems cannot be handled without a few special interventions; thus the need for student and family assistance. The emphasis is on providing special services in a personalized way to assist with a broad range of needs. School-owned, -based, and -linked interventions clearly provide better access for many youngsters and their families. Moreover, as a result of initiatives that enhance school-owned support programs and those fostering school-linked services and school-community partnerships (e.g., full service schools, family resource centers, etc.), more schools have more to offer in the way of student and family assistance. In current practice, available social, physical and mental health programs in the school and community are used. Special attention is paid to enhancing systems for prereferral intervention, triage, case and resource management, direct services to meet immediate needs, and referral for special services and special education resources and placements as appropriate. A growing body of data indicates the current contribution and future promise of work in this area.

Our Center has developed a set of self-study instruments that delineate many activities related to each of the above areas. These provide templates to aid school personnel in identifying the status of current school site activities. Additional instruments are also available for mapping (a) a school's systems for coordinating and monitoring student and family services and school-wide activities and (b) school-community partnerships. These are available for downloading from the Center's website (<http://smhp.psych.ucla.edu>) or in hardcopy from the Center (for the cost of copying and handling).

Figure. An enabling component to address barriers to learning and enhance healthy development at a school site.

**Range of Learners**

(categorized in terms of their response to academic instruction)

Adapted from:  
 H.S. Adelman & L Taylor (1994). *On understanding intervention in psychology and education*. Westport, CT: Praeger.

# Classroom- Focused Enabling

*Enhancing teacher capacity for  
addressing problems and for  
fostering healthy development*

## Current Committee Members

(names of those who work regularly to enhance this area of activity throughout the school)

## Current Programs/Resources

*In all classrooms:*

- C team teaching
- C classroom aide
- C volunteers trained to work in targeted ways
- C cross age tutors
- C computer assisted instruction (e.g., for reading and ESL)
- C social-emotional curriculum
- C family problem-solving conferences
- C conflict mediation
- C after school tutoring
- C special assistance in the classroom by resource specialist and other support staff designed to minimize need for referrals for additional services
- C inservice and mentoring for classroom-focused enabling

*In some classrooms:*

- C special education aide for inclusion
- C full use of advanced technology
- C teachers-in -training
- C mentors for targeted students

## Priorities for Future Development in this Area

- C additional training for support staff related to providing assistance in the classroom to minimize the need for referrals
- C recruitment of more volunteers and mentors and enhancement of their training
- C inservice related to reengaging students who have been turned off to school

# Support for Transitions

*Enhancing school capacity to handle the variety of transition concerns confronting students and their families*

## Current Committee Members

(names of those who work regularly to enhance this area of activity throughout the school)

## Current Programs/Resources

- C Welcoming Club
- C student Peer Buddy social support program
- C family Peer Buddy social support program
- C before school tournaments, enrichment, and recreational activities
- C after school sports, tournaments, enrichment, and recreation activities
- C service learning program
- C student job program
- C end of the year 6 week program conducted by teacher and support staff to prepare students for the next grade
- C articulation programs conducted by support staff to prepare students graduating to secondary schools
- C follow-up monitoring by teachers and support staff to identify and assist any students who are having difficulty with transition into a new grade or school

## Priorities for Future Development in this Area

- C inservice for support staff related to enhancing transition programs
- C recruitment of more volunteers to aid with transition programs
- C preparation of a Welcome to Our School video to be shown all newcomers and visitors -- for regular use in the front office or in a special welcoming space
- C design a transition program to be implemented by a resource teacher and support staff for students (and their families) entering and returning from special education
- C enhance recess and lunch recreation and enrichment opportunities

# Home Involvement in Schooling

*Enhancing school capacity to  
provide those in the home with  
opportunities for learning, special  
assistance, and participation*

## **Current Programs/Resources**

adult education programs at the school  
and neighborhood  
>ESL  
>literacy  
>job skills  
>child care certification program  
>citizenship exam preparation classes  
>parenting and helping their youngster  
with school work  
>aerobics/sewing  
parent participation and parent classes  
some on-campus family assistance  
services and assistance in connecting  
with community services (see Student &  
Family Assistance)  
family volunteers staff school  
Welcoming Club, assist in the front  
office, in classrooms, on the yard  
family-staff picnic  
training for participation in school  
governance  
participation on school advisory and  
governance bodies  
regular parent-teacher communications  
(regular phone and email discussions,  
in-person conferences on request,  
monthly newsletter)  
school "beautification" program  
planning for community involvement

## **Current Committee Members**

(names of those who work regularly to  
enhance this area of activity throughout the  
school)

## **Priorities for Future Development in this Area**

enhance outreach programs to engage  
and reengage family members who are  
seldom are in contact with the school  
and often are hard to reach  
establish self-led mutual support groups  
for families  
expand opportunities for families to use  
school facilities during nonschool hours  
for enrichment and recreation  
enhance inservice for all staff to  
increase motivation and capability for  
enhancing home involvement

# Crisis/Emergency Assistance & Prevention

*Responding to minimize  
the impact of,  
and prevent crises*

## Current Committee Members

(names of those who work regularly to enhance this area of activity throughout the school)

## Current Programs/Resources

- C trained and active crisis team
- C counseling programs designed to address crisis aftermath problems of students, families, and staff
- C conflict mediation program to prevent problems using peer and staff counselors
- C human relations/social emotional development curriculum
- C training of all staff in promoting positive human relations everyday

## Priorities for Future Development in this Area

- C develop a joint school-community crisis response
- C develop a joint school-community strategic plan to enhance prevention activity
- C staff training related to strategies for addressing concerns related to suicide, physical and sexual abuse, substance abuse

# Community Outreach, with special emphasis on Volunteers

*Enhancing greater community  
involvement in schooling and building  
linkages and collaborations for  
addressing barriers to learning &  
promoting healthy development*

## **Current Programs/Resources**

volunteer and mentor program that recruits, trains, and supports a expanding pool of volunteers including family members, college students, individuals from local businesses  
community members hired by the school as community representatives  
Head Start program provided on campus  
local recreation programs come to campus to enhance after school programs  
local health and social service agencies come to campus to enhance services and programs provided by the school  
local library involvement in ensuring that students have access to library resources and support in using them

## **Current Committee Members**

(names of those who work regularly to enhance this area of activity throughout the school)

## **Priorities for Future Development in this Area**

outreach to artists, musicians, and others with specialized abilities to elicit their involvement with the school  
community resources joining in welcoming and social support for new students and families  
local businesses providing job training and job opportunities for students and family members  
community partner involvement in advocacy for school and in school governance  
recruiting professionals to provide pro bono services

# Student & Family Assistance

*Providing special assistance as necessary for students and families (including direct services & referrals)*

## Current Committee Members

(names of those who work regularly to enhance this area of activity throughout the school)

## Current Programs/Resources

Student/Teacher Assistance Team (for review, triage, referral, monitoring)  
support staff (school psychologist, counselor, social worker, nurse)  
assessment to aid in planning special assistance interventions  
counseling (individual and group)  
special education programs  
inclusion programs in some classrooms  
English as a Second Language (ESL)  
transition tutoring  
conflict resolution program – staff/peers  
pregnant minor program with prevention focus  
personalized inservice for teachers who have many students with problems  
absentee immediate follow-up  
school-linked services that fill gaps and enhance the amount of services that the school's support staff can provide

## Priorities for Future Development in this Area

inservice for staff related to providing special assistance in the classroom for students who need it  
emergency food and clothing bank  
enhance systems for monitoring and follow-up  
recruiting professionals to provide pro bono services  
health or family resource center for the family of schools

## *Mapping Community Resources*

The following are examples of resources that may be in a community and may be invaluable to any school concerned with improving its outcomes. Partnerships may be established to connect and enhance programs by increasing availability and access and filling gaps. They may involve use of school or neighborhood facilities and equipment; sharing other resources; collaborative fund raising and grant applications; shared underwriting of some activity; donations; volunteer assistance; pro bono services, mentoring, and training from professionals and others with special expertise; information sharing and dissemination; networking; recognition and public relations; mutual support; shared responsibility for planning, implementation, and evaluation of programs and services; building and maintaining infrastructure; expanding opportunities for assistance, community service, internships, jobs, recreation, enrichment; enhancing safety; shared celebrations; building a sense of community.

One of the set of self-study instruments developed by our Center focuses on school-community partnerships and provides a template to aid school personnel in identifying the status of current efforts. The instrument is available for downloading from the Center's website (<http://smhp.psych.ucla.edu>) or in hardcopy from the Center (for the cost of copying and handling).

### *County Agencies and Bodies*

(e.g., Depts. of Health, Mental Health, Children & Family Services, Public Social Services, Probation, Sheriff, Office of Education, Fire, Service Planning Area Councils, Recreation & Parks, Library, courts, housing)

### *Municipal Agencies and Bodies*

(e.g., parks & recreation, library, police, fire, courts, civic event units)

### *Physical and Mental Health & Psychosocial Concerns Facilities and Groups*

(e.g., hospitals, clinics, guidance centers, Planned Parenthood, Aid to Victims, MADD, "Friends of" groups; family crisis and support centers, helplines, hotlines, shelters, mediation and dispute resolution centers)

### *Mutual Support/Self-Help Groups*

(e.g., for almost every problem and many other activities)

### *Child Care/Preschool Centers*

### *Post Secondary Education Institutions/Students*

(e.g., community colleges, state universities, public and private colleges and universities, vocational colleges; specific schools within these such as Schools of Law, Education, Nursing, Dentistry)

### *Service Agencies*

(e.g., PTA/PTSA, United Way, clothing and food pantry, Visiting Nurses Association, Cancer Society, Catholic Charities, Red Cross, Salvation Army, volunteer agencies, legal aid society)

### *Service Clubs and Philanthropic Organizations*

(e.g., Lions Club, Rotary Club, Optimists, Assistance League, men's and women's clubs, League of Women Voters, veteran's groups, foundations)

### *Youth Agencies and Groups*

(e.g., Boys and Girls Clubs, Y's, scouts, 4-H, KYDS, Woodcraft Rangers)

### *Sports/Health/Fitness/Outdoor Groups*

(e.g., sports teams, athletic leagues, local gyms, conservation associations, Audubon Society)

### *Community Based Organizations*

(e.g., neighborhood and homeowners' associations, Neighborhood Watch, block clubs, housing project associations, economic development groups, civic associations)

### *Faith Community Institutions*

(e.g., congregations and subgroups, clergy associations, Interfaith Hunger Coalition)

### *Legal Assistance Groups*

(e.g., Public Counsel, schools of law)

### *Ethnic Associations*

(e.g., Committee for Armenian Students in Public Schools, Korean Youth Center, United Cambodian Community, African-American, Latino, Asian-Pacific, Native American Organizations)

### *Special Interest Associations and Clubs*

(e.g., Future Scientists and Engineers of America, pet owner and other animal-oriented groups)

### *Artists and Cultural Institutions*

(e.g., museums, art galleries, zoo, theater groups, motion picture studios, TV and radio stations, writers' organizations, instrumental/choral, drawing/painting, technology-based arts, literary clubs, collector's groups)

### *Businesses/Corporations/Unions*

(e.g., neighborhood business associations, chambers of commerce, local shops, restaurants, banks, AAA, Teamsters, school unions)

### *Media*

(e.g., newspapers, TV & radio, local access cable)

### *Family Members, Local Residents, Senior Citizens Groups*

## ***Other Relevant Resources for Mapping***

You will find a good range of references to mapping (information, tools) in our Technical Aid Packet entitled: *Resource Mapping and Management to Address Barriers to Learning: An Intervention for Systemic Change*. Online at

<http://smhp.psych.ucla.edu/pdfdocs/resourcemaping/resourcemapingandmanagement.pdf>

The following is the table of contents for that document:

### **Appendix:**

Examples of Surveys that Aid Mapping

## Beyond Resource Mapping

All school community work can benefit from clear demographic profiles, and from an evaluation perspective, base-level data on factors to be affected by interventions are essential. Thus, in the process of resource mapping, efforts also should be made to map what profiles and data are available.

At the *school level*, this includes information on such matters as:

### staffing demographics

- >administrator(s)
- >teachers
- >student support service staff
- >noncertificated staff
- >teacher-to-student ratios (e.g., at different grade levels, for different subjects)

### demographics related to student enrollment

- >number enrolled
- >gender
- >ethnicity
- >socio-economic indicators
- >family indicators (e.g., one parent home, foster parent)
- >primary language (e.g., of students, parents)

### attendance and mobility concerns

- >attendance rates
- >tardies
- >mobility/transiency
- >dropout

### academic and socio-emotional functioning

- >achievement test statistics
- >school ranking indicators (e.g., district, state)
- >any positive indicators of social and emotional learning (e.g., related to planned instruction in these domains)
- > indicators of behavior problems (e.g., discipline referrals, suspensions, expulsions, vandalism, graffiti, bullying, pregnancy, drug abuse, physical abuse, sexual harrassment or abuse, arrests, number of students on juvenile probation)
- >service referrals and number currently receiving special assistance (including spec. ed)

Also of interest are key school policies and current plans (e.g., in school improvement plan) that affect efforts to address barriers to learning and promote healthy development.

---

Notes:

(1) Much of the above data should be available from existing school, school district, and community data systems. To determine what is and isn't available, a first step is to turn the above items into a checklist and identify (1) which information is available, (2) where it can be accessed, (3) and the plan for gathering the data (who, when, how).

(2) Efforts to profile a school will identify where the gaps are in the data gathering systems so that steps can be taken to fill these gaps. Where important data are not available, steps should be taken to establish ad hoc systems for gathering essential information.

(3) In the process of profiling the school, it will become clear what demographic and general information profiles are available for the District and the community (e.g., district information booklets, community resource directories, census summaries, chamber of commerce booklets, community report cards, juvenile justice reports, etc.). These can be collated to provide a context profile for the school.

## **Appendix E**

### **Thinking About a Five Year Plan**

One school recently began working on a 5 year plan for developing its enabling (Learning Supports) component. The sketch is a bit rough, but it provides a sense of one sites thinking and could readily be adapted.

Learning Supports Component	Year 1	Year 2	Year 3	year 4	year 5
General Component Development					
>policy	>governance authority prepares written policy	>additional policies as needed; initial draft of guidebooks; strategic plan for sustainability, replication, and scale-up	>District reviews policies and explores matters related to sustainability, replication and scale-up; draft of guidebook circulated for revision	>If approved, full replication in feeder schools	>ensuring sustainability of what has been developed and ongoing involvement related to replication and scale-up
>use of systemic change facilitator	>training of facilitator	>additional training as necessary	>additional training & write-up of training process for the guidebook	>additional training & revision of guidebook write-up of training process	>participation in training of other facilitators for replication/scale-up
>infrastructure  *adm. & staff leads *support personnel  *resource coord. team  *feeder pattern Council	>facilitator initiates infrastructure develop.  *job descriptions developed & initial training for new roles & functions  *team functions defined & team members trained; initial implementation of team  *orientation of support staff at feeder schools; discussion of each school developing a coordinating <i>team</i> in preparation of establishing a feeder pattern <i>council</i>	>monitoring of infrastructure to improve functioning (including additional training for leads, staff, community-based/ linked participants, feeder pattern staff; newcomers training)  *council functions defined & members trained	>ongoing monitoring of infrastructure to improve functioning; revise guidebook discussion of infrastructure based on lessons learned; newcomer training	>ongoing monitoring of infrastructure to improve functioning and revise guidebook; newcomer training	>ongoing monitoring of infrastructure to improve functioning; use of demonstration for replication/scale-up
>stakeholder involvement	>training re. learning support concepts and resources for all concerned stakeholders	>in-depth training for subgroups of key stakeholders	>in-depth training for subgroups of key stakeholders; revise guidebook related to stakeholder involvement based on lessons learned	>in-depth training for subgroups of key stakeholders; revise guidebook related to stakeholder involvement based on lessons learned	>in-depth training for subgroups of key stakeholders; involve key stakeholders in promoting replication/scale-up
>capacity building	>allocation of appropriate budget, space, equipment, time, etc.	>expansion of program activity related to all 6 areas based on identified priorities; allocation of appropriate resources for expansion	>ongoing expansion of program activity related to all 6 areas based on identified priorities; allocation of appropriate resources for expansion; guidebook revisions	>ongoing expansion of program activity related to all 6 areas based on identified priorities; allocation of appropriate resources for expansion; guidebook revisions	>ongoing expansion of program activity related to all 6 areas based on identified priorities; allocation of appropriate resources for expansion; guidebook revision; use of demonstrations for replication/scale-up

## Center Report: Resource Oriented Teams

### **From the Center's Clearinghouse...**

Thank you for your interest and support of the Center for Mental Health in Schools. You have just downloaded one of the packets from our clearinghouse. Packets not yet available on-line can be obtained by calling the Center (310)825-3634.

---

We want your feedback! Please rate the material you downloaded:

**How well did the material meet your needs?**      *Not at all*      *Somewhat*      *Very much*

**Should we keep sending out this material?**      *No*      *Not sure*      *Yes*

**Please indicate which if any parts were more helpful than others.**

**In general, how helpful are you finding the Website?**      *Not at all*      *Somewhat*      *Very Much*

**If you are receiving our monthly ENEWS, how helpful are you finding it?**  
*Not at all*      *Somewhat*      *Very Much*

**Given the purposes for which the material was designed, are there parts that you think should be changed? (Please feel free to share any thoughts you have about improving the material or substituting better material.)**

---

*We look forward to interacting with you and contributing to your efforts over the coming years. Should you want to discuss the center further, please feel free to call (310)825-3634 or e-mail us at [smhp@ucla.edu](mailto:smhp@ucla.edu)*

Send your response to:  
**School Mental HealthProject,  
UCLA Dept of Psychology  
405 Hilgard Ave.  
Los Angeles, CA 90095-1563**

The Center is co-directed by Howard Adelman and Linda Taylor and operates under the auspices of the School Mental Health Project, Dept. of Psychology, UCLA, Los Angeles, CA 90095-1563 -- Phone: (310) 825-3634.

Support comes in part from the Office of Adolescent Health, Maternal and Child Health Bureau (Title V, Social Security Act), Health Resources and Services Administration (Project #U93 MC 00175) with co-funding from the Center for Mental Health Services, Substance Abuse and Mental Health Services Administration. Both are agencies of the U.S. Department of Health and Human Services.
