

# NEW MEXICO HIGHER EDUCATION DEPARTMENT

## *The Condition of Higher Education in New Mexico 2004-2005*

December 2005

Dear Colleagues:

It is a new day for higher education in New Mexico. Following the recommendation of the Governor's Task Force on Higher Education, the New Mexico Higher Education Department was created in the 2005 Legislative Session. I began as Cabinet Secretary of Higher Education on September 19, and am pleased to announce that we are making great strides to better serve our students and to ensure that all New Mexicans have the opportunity to attend college.

The following document, the Condition of Higher Education in New Mexico 2004-2005, reports on data collected by the New Mexico Higher Education Department as part of its Data Editing and Reporting (DEAR) system. The data presented here provides the status of higher education as of the Fall 2004 semester and makes comparisons to prior year data to calculate change rates. It is the Fall 2004 enrollment data that is the basis for the 2006 appropriations to fund the higher education formula for distribution of state funds to institutions.

The emphasis of the New Mexico Higher Education Department is to create policy that helps us to improve access to educational opportunities for students, as well as to improve success once they have entered the doors of our post-secondary institutions. The data herein presents a snapshot of New Mexico higher education that assists us in determining our benchmarks and assessing our progress.

Our first initiative is to create a statewide strategic plan for higher education that ties to economic and workforce development and to our P-12 partners. Under the leadership of this department, public institutions, and the Higher Education Advisory Board, the plan will be created with the student at the center of our decision-making and will have ramifications on future funding initiatives. It is also our goal to ensure that the "Making Schools Work" initiatives are met and that each year we will be able to demonstrate an increasing number of students we have served.

The New Mexico Higher Education Department is working with the higher education community to move New Mexico forward. Thank you for your interest and support of our initiatives.

Sincerely,

Dr. Beverlee J. McClure  
Cabinet Secretary

# The Condition of Higher Education in New Mexico 2004-2005

The Condition of Higher Education in New Mexico 2004-2005 reports on data collected by the New Mexico Higher Education Department as part of its Data Editing and Reporting (DEAR) system. The data presented here provides the status of higher education as of the Fall 2004 semester and makes comparisons to prior year data to calculate change rates. It is the Fall 2004 enrollment data that is the basis for the 2006 appropriations to fund the higher education formula for distribution of state funds to institutions.

## I. Overview of the Status of Public Higher Education in New Mexico

### Public Colleges and Universities

New Mexico has given high priority over the years to higher education. The state supports:

- Three high quality research universities, each of which has received national recognition in areas of specialization
- Three comprehensive universities which provide the benefits of small residential colleges at relatively low tuition rates
- Eighteen two year colleges, ten of which operate as branch campuses of the universities and eight as independent community colleges; they are located around the state so that every New Mexican has geographic access to higher education.

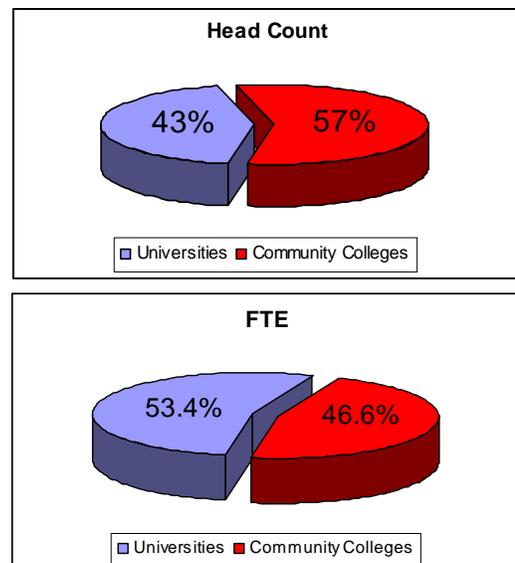

(Northern New Mexico College is, as of report release date, transitioning into the Comprehensive University category. However, the data collected and reported is for 2004-2005 so Northern New Mexico College is categorized under Independent Public Community Colleges in this report.)

### Student Enrollments

Enrollment at New Mexico's public institutions of higher education continues to grow with an overall enrollment increase of 5.58 percent from Fall 2003 to Fall 2004, with an 8.64 percent increase in the two year sector and a 1.55 percent increase at the state's universities. Increasing numbers of older students are enrolling, particularly in the two year sector, further fueling enrollment increases. Recent projections of high school graduates in the state, provided by the Western Interstate Commission for Higher Education (WICHE), suggest enrollment will remain flat.

- ✓ Universities serve 43.2% of total higher education enrollments and 53.4% of full-time equivalent enrollment
- ✓ Community colleges account for 56.8% of total enrollees and 46.6% of the full-time equivalent enrollment due to a significant percentage of part time students
- ✓ Student enrollments have continued to shift slightly in terms of distribution, with two year colleges growing at a somewhat faster rate than universities

Chart 1

- ✓ In the Fall 2004 semester, 87.1% of students enrolled in New Mexico were state residents.
- ✓ 59% of the total student enrollments statewide were women and a similar ratio exists in the number of graduates.
- ✓ Of total enrollees, 49% were members of minority groups - 36% were Hispanic, 8% were Native Americans, 3% were Black, and 2% were Asian.
- ✓ The median age for undergraduate students statewide was 23 and the average age was 28. At two-year colleges the median was 26 and the average was 30, while at the universities the median age for undergraduates was 21 and the average was 23.
- ✓ The median age for graduate students statewide was 32 and the average was 35.

## **Completion of Degree Programs**

- ✓ In the 2004-2005 academic year 5,703 Associate's degrees were completed with the greatest number going to students studying liberal arts and nursing.
- ✓ Of the 5,625 Bachelor's degrees awarded, the majority were in business, social sciences, and math, science and engineering.
- ✓ A total of the 3,080 graduate degrees were awarded, with the largest numbers in the fields of education; math, science, and engineering; business; and health related professions.

## **Cost of Attendance**

- ✓ The FY 2006 average cost for resident undergraduate tuition and fees was \$3,525 at the research universities, \$2,528 at the comprehensive universities, \$1,012 at the branch community colleges, and \$749 at the independent community colleges. Data on other costs of attendance such as living expenses, travel, etc., are not collected by the state.

## **Student Financial Assistance**

- ✓ In the 2003-2004 academic year, New Mexico's post-secondary students received \$383 million in financial assistance. 72% of this was from federal sources, 14% was from state sources, and 12% was from private/institutional sources.
- ✓ In the 2004-2005 academic year, New Mexico's post-secondary students received just over \$415 million in financial assistance, an increase of 8.4% over the previous year. Seventy-two percent, or \$300 million, of these funds are attributed to federal sources. However, state contribution of \$57 million (14%), institutional aid of almost \$35 million (8%), and private or other external source contribution of \$22 million (6%) also provided significant support.

## **Funding of Post-Secondary Education**

- ✓ In the FY 2006 academic year, 15% of the General Fund was appropriated by the legislature for higher education, compared to the FY 2005 academic year in which 15.3% of the General Fund was appropriated by the legislature for higher education.
- ✓ Among the six universities, 61.6% of instruction and general revenue budgeted was projected to come from state sources in FY 2006, with 28% from tuition and fees. In FY 2005, 62.3% of instruction and general revenue budgeted was from state sources and 26.8% from tuition and fees.

- ✓ FY 2006 funding for two-year colleges was anticipated at 59.6% from state sources, 23.3% from local property tax mill levies, and 15.2% from tuition and fees. For community college funding during FY 2005, 59.3% was from state sources, 23.5% from local property tax mill levies, and 15.2% from tuition and fees. Remaining higher education revenues include federal grants, donations, and other miscellaneous sources.
- ✓ The average instruction and general expenditure budgeted per full-time equivalent student was \$9,825 in FY 2006 and \$9,052 in FY 2005.
- ✓ The average instruction and general expenditure budgeted by universities in FY 2006 was \$11,548 and for community college campuses \$7,098. The average instruction and general expenditure budgeted by universities for FY 2005 was \$11,012 and for community college campuses \$6,918.
- ✓ In 2005 Regular Session, the New Mexico Legislature appropriated more than \$34.4 million for capital outlay projects at higher education institutions.

Further detail on each of these points can be found in the data tables that follow. Additional information can be obtained from the New Mexico Higher Education Department.

## **The New Mexico Higher Education Department**

The New Mexico Higher Education Department was created during the 2005 legislative session under House Bill 745 and signed into law by Governor Bill Richardson on April 8, 2005. The new department assumed all responsibilities and statutory requirements of the former Commission on Higher Education.

The New Mexico Higher Education Department brings a statewide perspective in recommending and establishing policy direction and in providing leadership in higher education within New Mexico. Established to foster and guide a system of higher education that best meets the needs of the citizens of the state within the resources available, the department recognizes that the institutions have authority to determine their own respective missions as set forth in the various constitutional and statutory provisions through which they have been established.

The department provides financing to the state's institutions of higher education with an equitable distribution of funds among the institutions. The department has oversight of all public universities and colleges including: three research universities; four comprehensive universities; nine branch community colleges; seven independent community colleges; and three special schools. This year, Northern New Mexico College transitioned from a community college to a comprehensive university. Five Native American public institutions and four regionally accredited independent private colleges participate voluntarily in some department programs. The department also has regulatory authority over private for-profit institutions operating within the state that include 39 licensed schools, 51 schools exempt from licensure, and 21 registered recruiters from out of state institutions.

The department has statutory authority with regard to higher education governance in the following areas (see below for detailed information):

- Budget
- Data collection and verification
- Administration of student financial aid

- System-wide coordination
- Statewide planning and assessment
- Review all new academic programs prior to allocation of state funding
- Regulation of private and proprietary schools and out-of-state institutions operating in the state
- Conduct policy analysis, research, and fiscal impact analysis
- Administration of the process for changes in college districts and new campuses

Several federal grants were administered by the agency, including the Adult Basic Education program, which assists adults in becoming literate and in completing a secondary school education, and GEAR UP, a federally funded, secondary school program targeted low-income students and providing information about planning, preparing, and paying for college. Its primary goal is to increase participation and success rates.

## **Governance of Higher Education in New Mexico**

Governance of the public system of higher education in New Mexico is a joint responsibility of the state, exercised through the New Mexico Higher Education Department, and the individual institutions. Six public universities in the state and one community college are each governed by a board of regents appointed by the Governor. There are nine branch campuses of the universities in the state, which are governed under the auspices of the boards of regents for the parent institutions. In addition, these campuses also have locally elected advisory boards. There are seven independent community colleges, which are governed by locally elected governing boards. The department also oversees three special schools and coordinates financial aid programs at eight institutions which are not part of the state system, including tribal colleges and private, nonprofit colleges.

## **Role of the Higher Education Advisory Board**

The Higher Education Advisory Board was created to advise the department and the Governor on policy matters. Chaired by former Governor Toney Anaya, the Higher Education Advisory Board is charged by the Cabinet Secretary to develop a statewide agenda for higher education. House Bill 745 that created the Higher Education Department outlines the membership of a 14-member advisory board to be appointed by the Cabinet Secretary. The members representing the post-secondary educational institutions are the chief executive officers of the institution or their designees. By statute, three members represent the research universities, one each from New Mexico Institute of Mining and Technology, New Mexico State University, and the University of New Mexico. One representative from a comprehensive university and three members represent the two-year public post-secondary institutions. One member represents each of the following areas: the accredited private post-secondary institutions, business, faculty, non-faculty staff; tribal colleges in New Mexico, and the Indian nations, tribes and pueblos in New Mexico. For a list of current advisory board members, visit [www.hed.state.nm.us](http://www.hed.state.nm.us). To reference House Bill 745 visit [www.legis.state.nm.us](http://www.legis.state.nm.us).

## **Role of the Institutions in Governance**

The governing boards and management of New Mexico public post-secondary institutions have the authority for:

- New program development and approval in conjunction with a review by the New Mexico Higher Education Department
- The quality of instruction
- Maintaining accreditation

- Facilities planning, building and maintenance, subject to the approval of the department prior to expenditures for capital construction or remodeling
- Developing operating budgets for submission to the department
- All personnel decisions
- Setting tuition rates
- Granting scholarships and administering other financial aid programs
- All decisions concerning student acceptance and progress
- Awarding of degrees and certificates
- Other responsibilities necessary to the day-to-day management of the institution.

## **Statutory Authority of the New Mexico Higher Education Department**

### Financing and Financial Accountability of Institutions

- Develop, implement, and periodically adjust a funding formula, taking into account numerous cost factors, through which state funds are allocated annually on an equitable basis to all public institutions of higher education; cost factors taken into account include such variables as institutional incomes; balances; overhead costs; student institutional costs varied by type and level of program; research activities; auxiliary enterprise operations; athletic program funding; the funding of branches and vocational facilities; and tuition equalization grants to students
- Make funding recommendations for institutional funds and for the department's own budget to the Governor and the Legislature
- Provide procedures and requirements for budgeting, accounting, and reporting of institutional finances
- Review, adjust, and approve operating budgets of the institutions and require mechanisms to track expenditures
- Recommend and prioritize institutional capital projects for executive and legislative approval for funding, primarily from state general obligation bonds
- Recommend funding for infrastructure renovation and expansion projects and distribute proceeds to governing bodies of institutions
- Approve institutional revenue bonds and local general obligation bonds proposed by institutions
- Approve capital construction or remodeling projects prior to expenditures, including approval of financing plans and construction plans
- Develop procedures and requirements for accessibility, water conservation in landscaping, and energy efficiency for facilities
- Develop logical, consistent, and equitable organizational and fiscal provisions for the operation of post-secondary education and for the effective utilization of federal, state, and local funding
- Calculate and certify property tax mill rates for community colleges which will yield revenue for the following fiscal year
- In consultation with the state auditor, compile a manual prescribing a uniform classification of accounts and a uniform system for budgeting and reporting that includes the reporting of all the funds available
- Conduct verification of state institutions of higher education, including enrollment, fund balances, compliance with legislation, comparison of expenditures to budgets and other areas, and report on such annually to the executive and legislative branches

### Providing Student Financial Aid

- Provide student financial aid regulations, guidelines, and eligibility criteria to all institutions of higher education in the state
- Administer state student financial aid programs
- Develop criteria and award loan-for-service grants for health professions and teaching
- Administer New Mexico's program under the Western Interstate Commission on Higher Education (WICHE) loan-for-service program
- Administer federal student aid programs which are allocated through the state
- Serve on the Educational Trust Board and the board of the New Mexico Student Loan Foundation

### Assure Coordination of Statewide System

- Make recommendations to the Governor and the New Mexico State Legislature for actions necessary for a coordinated statewide system of higher education
- Make recommendations to adjust operations of a particular institution in order to best serve a coordinated system of post-secondary education to meet statewide needs
- Develop and maintain a statewide plan for articulation, including a general education common core, additional transfer modules, a student complaint system, and make annual reports on articulation to the New Mexico State Legislature and the Governor
- Facilitate dual credit opportunities for high school students
- Review any proposal for the establishment of a new public post-secondary educational institution or campus and submit recommendations to the New Mexico State Legislature
- Receive petitions regarding the service area for a community college district or technical vocational institute district and call and administer any elections concerning the change in boundaries of a district or dissolution of a district
- Carry out responsibilities under the Learning Center Act
- Serve on boards such as the Industrial Training Board

### Statewide Planning and Assessment

- Report annually to the Governor and the New Mexico State Legislature on accountability of all public and post-secondary institutions with regard to student progress and success, student access and diversity, affordability and cost of educational services, public and community service by institutions
- Conduct statewide planning for post-secondary education and make recommendations to institutional governing boards, the Legislature and the Governor. Continued program of planning includes assessment of present and projected needs for all post-secondary institutions, including program and facility needs, analysis of effectiveness, and identification of problems and duplication to assure coordination of statewide system

### Approving and Improving Educational Programs and Operations

- New program development and approval in conjunction with a review by the New Mexico Higher Education Department
- Approve new associate degree programs at selected independent two-year institutions
- Approve courses offered in New Mexico by out-of-state institutions
- Exercise authority to approve, deny or revoke registration of private and proprietary post-secondary schools operating in the state
- Promote cooperative education and work-related educational experience, particularly in fields with shortages
- Annually inspect or investigate by report the facilities and programs of each community college to determine the extent of compliance with the rules promulgated by the department and bring any serious deviations to the attention of the president and board of the college. In the case of repeated failure to meet standards, may take action discontinuing approval and exclude from subsequent funding calculations

### Authorities and Responsibilities Related to Federal Educational Programs

- Administer adult basic education throughout the state, provided by both federal and state funding (32 programs at 25 institutions and seven nonprofit organizations) to provide adult education and literacy programs
- Administer outreach to secondary schools and students under the GEAR UP program to promote college readiness, desire to matriculate, and knowledge of availability of financial aid
- Administer federal Title II, Part A to improve teacher quality
- Administer aspects of student financial aid programs authorized by the federal Higher Education Act

### Other responsibilities of the New Mexico Higher Education Department

- Conduct research and policy analysis related to improvement of post-secondary education and education opportunity
- Receive student data from institutions for all students enrolled in public institutions of higher education and maintain student data tracking system
- Identify and recommend policies to increase enrollment and retention of students in institutions of higher education
- Provide fiscal impact analysis related to policy recommendations
- Respond to numerous request for financial aid data from executive, legislative, and other external entities
- Maintain fiscal watch task force to monitor and review institutions for any inadequacies
- Provide analysis of the most effective educational programs
- Identify marginal programs and unnecessary duplication of programs
- Respond to requests of the Governor and the Legislature related to data collection analysis and research related to higher education, and other requests
- Provide information in response to public inquiries
- Handle, when appropriate, complaints related to institutions

The Higher Education Department is committed to providing the seamless integration of institutions from preschool through college and/or into the workforce. Moving higher education forward in New Mexico, and streamlining the educational experience for students is vital for the creation of a dynamic, high-wage economy.

## **MAJOR ACCOMPLISHMENTS IN NEW MEXICO HIGHER EDUCATION IN 2005**

### **Quantitative Impacts - Making Schools Work**

*Improved Teacher Quality and ensure every New Mexico resident has the opportunity and necessary financial support to attend higher education:*

- P-16 Professional Development Grants – New Mexico Higher Education Department awarded grants to 6 recipients in the amount of \$567,604.
- Minority Doctoral Program to increase minority faculty at New Mexico institutions – For the 2005-2006 academic year New Mexico Higher Education Department awarded 7 recipients in the amount of \$105,000. Twenty-two (22) minority faculty members who have received doctoral program grants from New Mexico Higher Education Department are currently teaching at New Mexico's public higher education institutions.
- In 2005-2006, New Mexico Higher Education Department provided Teacher Loan-for-Service awards to 84 recipients in the amount of \$313,488.

*Keep students ready to learn by providing access to health care, healthy food and physical fitness activities:*

- In 2005-2006 New Mexico Higher Education Department provided:
  - Nursing Loan-for-Service awards to 81 recipients in the amount of \$464,100
  - Medical Loan-for-Service awards to 7 recipients in the amount of \$79,500
  - Allied Health Loan-for-Service awards to 9 recipients in the amount of \$125,000

*Increase level of educational excellence for all students, ensure that all students are taught by competent teachers, and ensure students graduate from high school better prepared to succeed in higher education:*

- New Mexico Higher Education Department/Public Education Department Alignment Task Force on High School Competencies and College Placement aligning high school competencies with college entrance requirements to help reduce the number of students needing remedial courses in college. A joint New Mexico Higher Education Department/Public Education Department agreement on definitions and equivalencies for student learning and placement will be completed December 2005.
- New Mexico Higher Education Department has established an Indian Education Division to increase recruitment and retention among Native communities.

*Ensure New Mexico's education system supports the state's efforts to develop a high-wage economy:*

- New Mexico Higher Education Department has expanded the linkages between secondary and post-secondary education agencies and the workforce development and economic development agencies within the state by making presentations, conducting meetings, attending conferences, co-leading task forces, etc.
- New Mexico Higher Education Department has tracked the implementation of career-technical programs funded through 2004 capital outlay to ensure that draw downs are processed within 30 days of receipt and all funding is distributed in a timely manner.

*Ensure every New Mexico resident has the opportunity and necessary financial support to attend higher education:*

- Adult Basic Education Programs – more than 35% of the adult population in New Mexico has basic skills deficiencies. This year's accomplishments include:
  - 73% of students with the goal of entering post-secondary education or training achieved their goal
  - 60% of students with the goal of obtaining a high school diploma achieved their goal
  - 58% of tested students made significant educational gains – at least one functioning level
- Thanks to Adult Basic Education Programs throughout the state, in 2004-05, New Mexico generated:
  - \$3,984,864 in new income from 372 students gaining jobs
  - \$267,280 in increased income from 514 students receiving job promotions
  - An estimated savings of \$1,911,000 from 147 students being removed from public assistance
  - \$796,973 in new taxes from 372 students gaining jobs
  - \$53,456 in increased taxes from 514 students receiving job promotions
  - \$850,432 increased taxes paid annually
  - \$14,822,200 added income annually for 2,003 GED graduates

## **Educational Achievements**

- Lottery Success Scholarship Awards - In 2005, New Mexico Higher Education Department awarded Lottery Success Scholarships to approximately 15,332 students in the amount of \$28.3 million, compared with 2004, when New Mexico Higher Education Department awarded approximately 14,563 students in the amount of \$23.9 million. Nearly \$5 million more dollars were awarded this year to put an additional 769 New Mexico students in college.

## **Administrative Actions**

- Creation of the Higher Education Department, the appointment of the Cabinet Secretary of Higher Education, and the appointment of the Higher Education Advisory Board
- Establishment of the College Affordability Act to increase need-based aid for students to attend college (act was passed but not funded).
- Began the process of creating a statewide plan for higher education that puts the needs of the students first, instead of individual institutional needs
- Commitment to collaboration and coordination with public institutions and other state agencies on better serving students and preparing them for college and the workforce
- Established higher education task forces:
  - Geographic Service Areas Task Force to look at geographic service areas and develop a policy statement for handling new programs
  - Formula Enhancement Task Force to study the results of revisions to the Higher Education Funding Formula to implement components of performance-based funding
  - Articulation Task Force to develop a system that ensures the transferability of the state-wide general education core, creating a set of competencies for each area under general education, creating a common template for communicating competency components, and developing a common course numbering and naming system
  - Nursing Enhancement Task Force is a partnership with private providers to help develop performance measures for our nursing programs and to continue the dialogue of how higher education can continue to help provide nurses for New Mexico and in preparation to pilot performance-based funding for the 06 session

For information on the New Mexico Higher Education Department visit [www.hed.state.nm.us](http://www.hed.state.nm.us).

## II. Public Universities and Colleges in New Mexico

New Mexico has twenty-six publicly supported, regionally accredited campuses located throughout the state. Most citizens are within a one-hour commute of at least one campus, and many can reach several campuses. Several campuses are expanding their off-campus educational capabilities, providing additional educational opportunity for citizens. The state's universities and independent community colleges are governed by boards whose members are either appointed by the Governor or elected locally. Branches are governed by the boards of their parent institutions through operating agreements with local area college boards.

### III. Enrollment Data

Table 2

#### Total Student Enrollment at New Mexico Public Post-Secondary Institutions Fall 2004

	Headcount Numbers of Students:	Full Time Equivalent Students:
	Total	Total
<b>Research Universities</b>		
New Mexico Institute of Mining and Technology	1,829	1,474
New Mexico State University	16,442	12,950
University of New Mexico	26,237	20,291
UNM Medical School	296	494
<b>Comprehensive Universities</b>		
Eastern New Mexico University	3,964	3,105
New Mexico Highlands University	3,551	2,324
Western New Mexico University	2,858	1,846
<b>University Subtotals:</b>	<b>55,177</b>	<b>42,484</b>
<b>Branch Community Colleges</b>		
ENMU – Roswell	4,196	2,337
ENMU – Ruidoso	754	314
NMSU – Alamogordo	1,884	1,075
NMSU – Carlsbad	1,296	814
NMSU – Dona Ana	6,320	3,422
NMSU – Grants	703	414
UNM – Gallup	3,188	1,715
UNM – Los Alamos	970	439
UNM – Taos	1,125	511
UNM – Valencia	1,798	1,027
<b>Independent Community Colleges</b>		
Albuquerque Technical Vocational Institute	22,927	12,259
Clovis Community College	4,195	1,899
Luna Community College	2,041	916
Mesalands Community College	574	344
New Mexico Junior College	3,546	1,857
New Mexico Military Institute	483	515
Northern New Mexico College	2,121	1,003
San Juan College	9,128	4,259
Santa Fe Community College	5,170	1,958
<b>Community College Subtotals:</b>	<b>72,419</b>	<b>37,031</b>
<b>Statewide Totals:</b>	<b>127,596</b>	<b>79,515</b>

**Source:** Fall 2004 Institution Registrar's Report. These figures are based upon Third Friday census date enrollments. Full-time equivalent enrollment is calculated by dividing the total undergraduate credit hours taken by 15 and dividing the total graduate credit hours taken by 12, the minimum numbers of credit hours required for full-time enrollment at those two levels, respectively. \* Enrollments 2002-2004 are provided in Appendix A.

Table 3

**State Residency of Students Attending New Mexico Public  
Post-Secondary Institutions Fall 2003 and Fall 2004**

	Fall 2003		Fall 2004	
	Headcount	State Residents	Headcount	State Residents
<b>Research Universities</b>

**Source:** Institution Registrar's Report, Fall 2004. Cluster percentages may not total 100 because of rounding error. \*NR categorizes students who chose not to identify their race/ethnicity. In addition, during Spring 2000, New Mexico State University changed the race/ethnicity selections available to students, permitting "White" as an option separate from "Other." Students were asked to select their most appropriate race/ethnicity category. Students may not have yet changed their designation and are reported as "Not Reported" or NR.

**Source:** Institutional Degree Files. Master's degrees include educational specialist awards. Doctoral degrees include awards in the professional fields of law and medicine. "NR" is students who chose not to identify their race/ethnicity. \* During Spring 2000 New Mexico State University changed the race/ethnicity selections available to students, permitting "White" as an option separate from "Other." These students have not yet changed their designation and are thus reported as "Not Reported" or NR.

**Source:** Institutional Degree Files. Master's degrees include educational specialist awards. Doctoral degrees include awards in the professional fields of law and medicine. Figures previously published for 1998-1999 did not include NM Tech. "NR" is students who chose not to identify their race/ethnicity. \*During Spring 2000 New Mexico State University changed the race/ethnicity selections available to students, permitting "White" as an option separate from "Other." At that time, students previously designated as "White/Other" were asked to select their most appropriate race/ethnicity category. Most of these students have not yet changed their designation and are thus now reported as "Not Reported" or NR.

**Source:** New Mexico Higher Education Department Report: Overview of Institutional Operating Budgets, Fiscal Year 2005-2006, plus institutional data. The far-right column shows the share of each institution's total unrestricted Instruction-and-General (I&G) revenue that will come from tuition. Expenditures for Instructional and General include instruction, student services, academic and administrative support, and physical plant costs. I&G does not include research, public service, financial aid, auxiliary operations, or athletics. For community colleges, rates shown are for students in arts and science courses, not occupational courses.

**Note on Community College Tuition Changes:** Relatively small increases in actual dollar amounts may produce a significant percentage change due to existing low tuition rates. (See Table 14 for national tuition comparisons.)

**Source:** NMHED: Overview of Institutional Operating Budgets, Fiscal Year 2005-2006 plus institutional data. For community colleges, rates shown are for students in academic, not vocational, courses.

- (1) "Non-resident" refers to tuition rates charged to students who are not classified as residents of New Mexico.
- (2) "Resident" tuition rates are those charged to New Mexico residents. Where certain community colleges have tuition differentials based on tax district, the in-district rate is used. Where different rates apply to academic or vocational courses, the academic rate is used.

## VII. Revenue Sources and Budgets

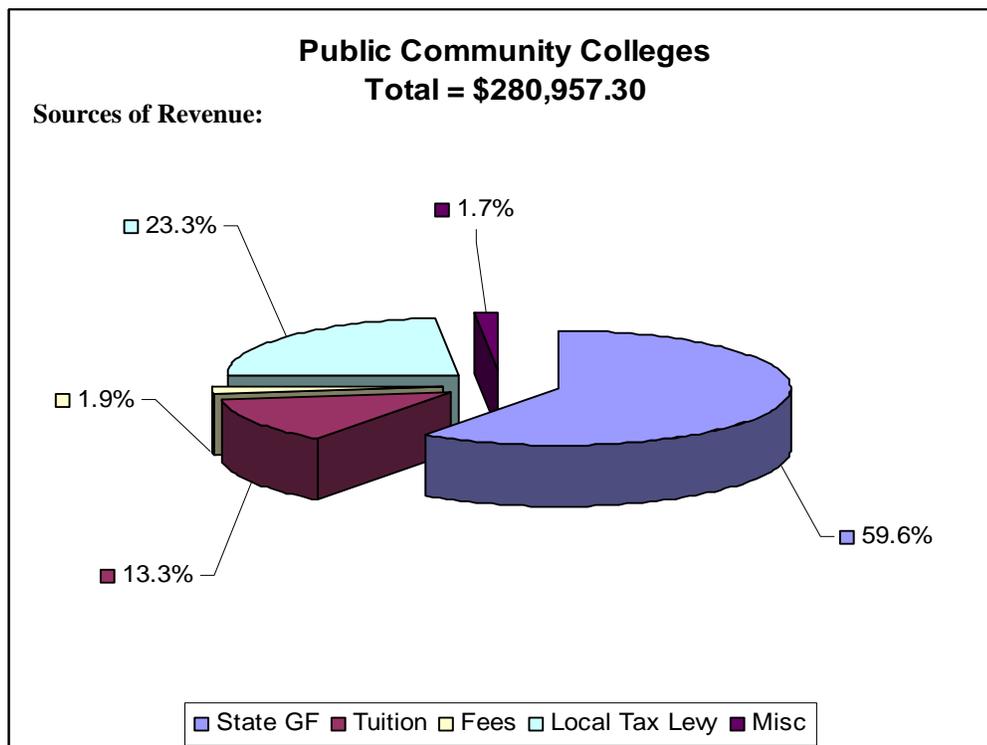

### 2005-2006 Revenues in Instruction and General Budgets

The instructional programs of New Mexico's public universities and colleges are funded from the following sources in the indicated proportions. In 2005-2006 State General Fund Appropriations were projected to account for 61.6% of the instruction-and-general revenues of the universities and 59.6% of those for two-year campuses.

**Chart 4**

**Chart 5**

## Sources of Revenue for Instruction

Public post-secondary institutions rely upon a number of sources of revenue for their operations. As the following tables reveal, New Mexico's colleges and universities continue to rely upon state appropriations for nearly two-thirds of their operations funds for instructional programs. Universities generate most of their remaining revenue from tuition, research contracts, investments, and state-land-and-permanent-fund income. Community colleges generate most of their additional revenue from local property tax levies and tuition. (Four of the community college campuses in New Mexico – Luna Community College, Mesalands Community College, New Mexico Military Institute, and Northern New Mexico College – do not have local property tax levies.)

This table does not include reauthorizations. The data excludes the following: statewide general obligation bond issues for Americans with Disabilities Act projects, information technologies, and equipment renewal and replacement.

## X. ADULT BASIC EDUCATION

### What is Adult Basic Education?

Adult Basic Education is a division serving adults, 16 years of age and older, who function below the high school completion level. Its emphasis is on Reading, Numeracy, and English Literacy. Adult educators help the adult students to design individual learning plans that correspond to their personal needs and goals: e.g., to get a job; to obtain a GED; to enroll in a community college or other training/educational program; to learn the English language, understand the U.S. culture and participate in society; to help their children with their homework and achieve success in school; to get off welfare and earn a family-sustaining income.

The Adult Basic Education Division's mission is to provide the highest quality leadership, services, support, and technical expertise to Adult Basic Education Program personnel, students, partners and communities.

### Adult Basic Education Funding History

Adult Basic Education in New Mexico relies on two major sources of funding for its 29 administrative sites in more than 100 communities. State funding comes from the General Fund and is allocated according to a workload driven formula. Federal funding is allocated through a competitive Request For Proposal process. New Mexico experienced a 23% increase in combined state and federal funding over the past five years.

**Table 24**

# Adult Basic Education Enrollment

Adult Basic Education students are considered enrolled in a program after clocking 12 hours of instructional time. During the three most recent years, Adult Basic Education programs served enrolled students at an average annual cost of \$340 per student (state and federal funding combined).

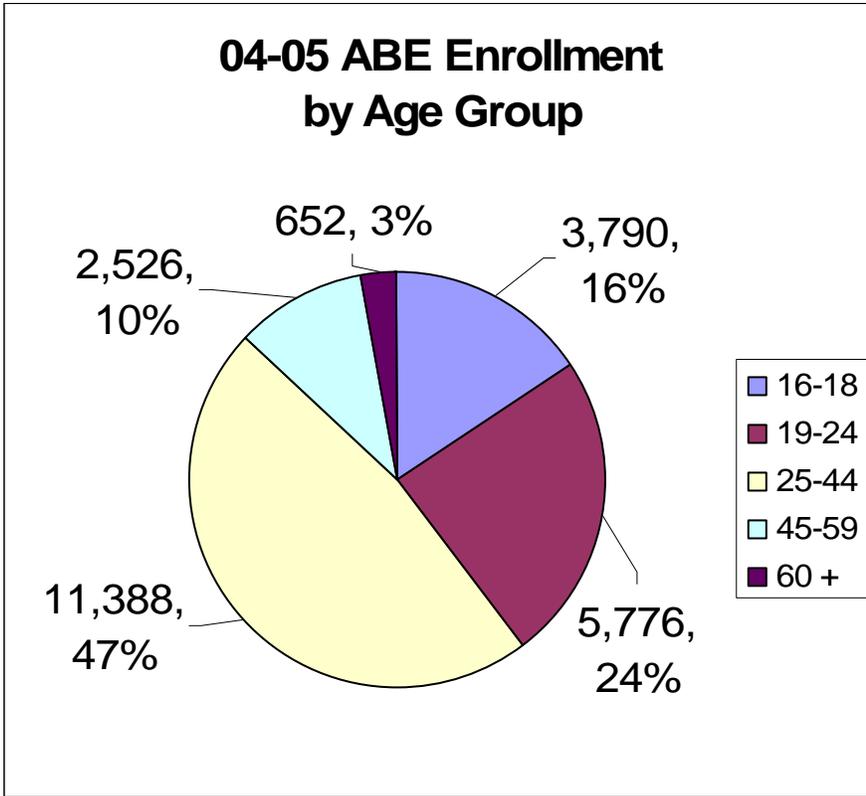

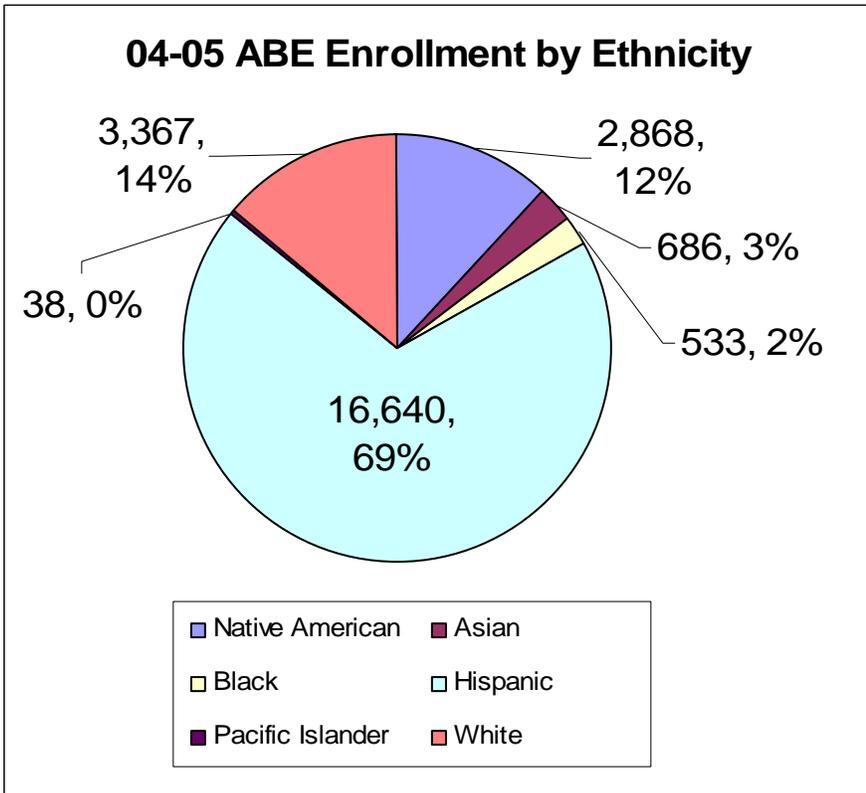

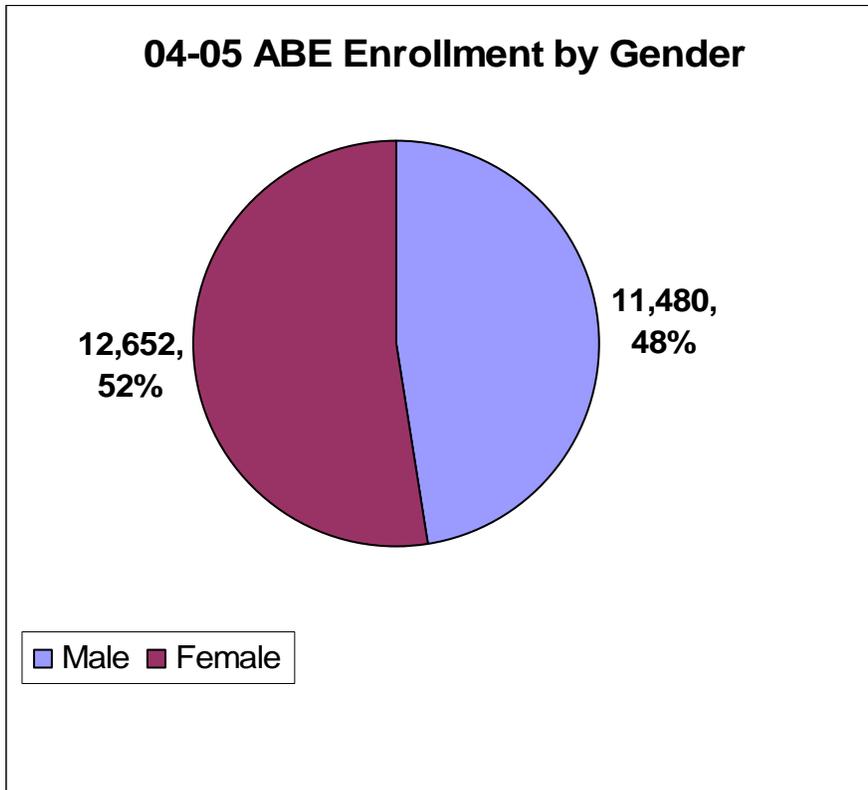

Chart 7

**Chart 8**

## **STUDENT OUTCOMES**

Adult Basic Education students set goals upon entry into a program. All students are tracked throughout the fiscal year to determine progress toward meeting stated goals. Goal achievement is counted after the student exits the program.

The default goal for every student is educational learning gains moving through the following competencies:

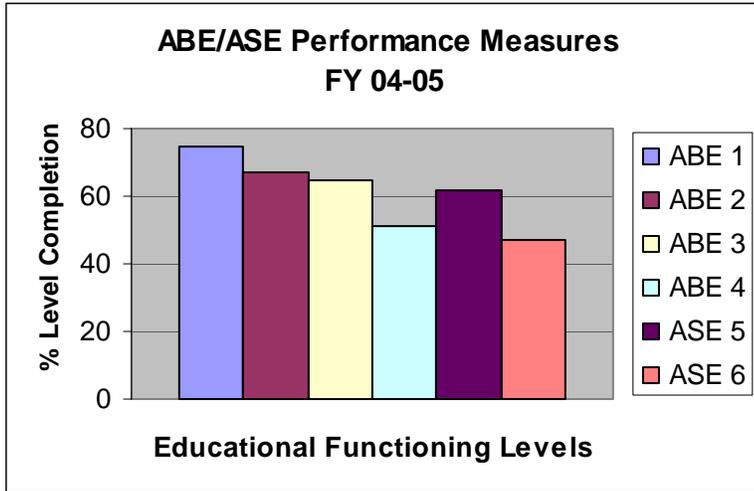

- Adult Basic Education (ABE) Levels 1-4
- Adult Secondary Education (ASE) Levels 5-6
- English as a Second Language (ESL) Levels 1-6

Core outcomes for performance measures also include:

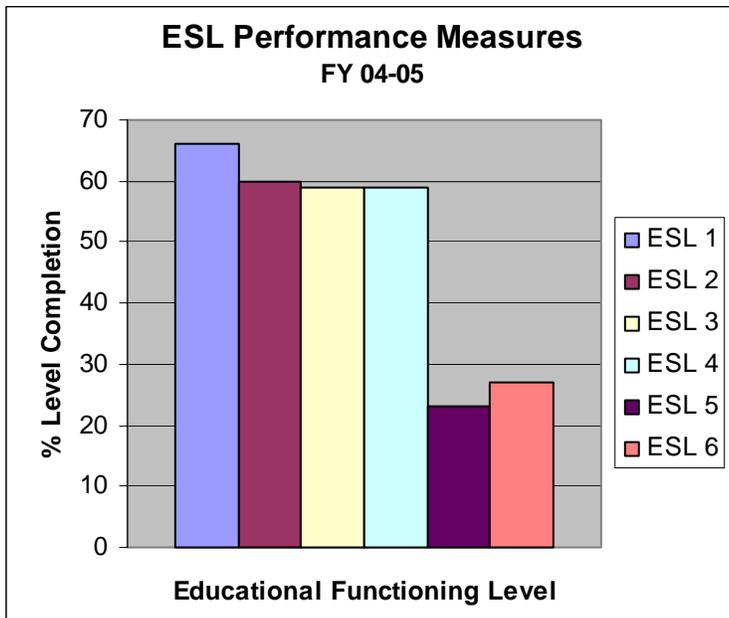

- Entered Employment
- Retained Employment
- Obtained a GED
- Entered Postsecondary Education or Training

The State Adult Basic Education Division negotiates performance measures on learning gains and core outcomes annually with the U.S. Department of Education Division of Vocational and Adult Education. The following charts demonstrate statewide performance of students who pre- and post-tested for learning gains and set goals for core outcomes in FY 2004.

## XI. Private and Tribal Higher Education in New Mexico

### Overview of the Status of Private and Tribal Higher Education in New Mexico

There are forty-three private post-secondary institutions operating in New Mexico and five Tribal colleges. Of these, all five Tribal colleges and eight of New Mexico's private higher education institutions are regionally accredited. Of the other thirty-five licensed private proprietary schools, twelve are nationally accredited. Each plays a unique and important role in the scope of educational opportunities and services provided to New Mexico's citizens. A wide range of educational programs are available, from certificates in floral design and computer training to Bachelor's and graduate degrees in education, business, health, and the social sciences. Some programs are delivered on campus in a traditional manner, while others are delivered non-traditionally – via distance education.

The basis of the information provided here is a survey of the New Mexico Higher Education Department. Thirty-seven institutions, or 77%, responded to the department's request for data. Therefore the data presented in this section is incomplete since information from 23% of the private and Tribal institutions is missing. In addition, some schools who did report enrollment do not track gender or ethnicity and were not able to provide a breakdown of enrollment by those factors.

#### Student Enrollments

- ☑ 27,564 students were reported as enrolled in New Mexico's private post-secondary and Tribal institutions during Fall 2004. Most of these students (93%) are studying on-campus, while the remainder are taking courses at a site off-campus, via distance education.
- ☑ The median age of students enrolled during Fall 2004 at private and Tribal post-secondary institutions is similar to the median age of community college students. Women represent 65 percent of the total enrollment of those institutions reporting gender. (Not all institutions track gender.)
- ☑ Not all institutions report ethnicity. Of the 27,564 students reported enrolled, 11,710 were tracked as to their ethnicity and gender. Of these, students for Fall 2004 at New Mexico's private and Tribal post-secondary institutions that did report ethnicity were: 32.8 percent Anglo/White; 43.7 percent Hispanic; and 11.2 percent Native American, 2.8 percent are Black, 1 percent Asian, and 8.5 percent were reported as 'Other.' (These percentages are based upon **only** those students classifying themselves among these five categories.) It is important to note that the overall high percentage of Native American students is much higher than at New Mexico's public institutions because of the nature of the five Tribal colleges.

#### Program Completions

During the 2004-2005 academic year, responding private institutions and tribal colleges awarded 2,274 certificates of completion, 893 diplomas and associate degrees, 2,556 bachelor's degrees, and 1,383 graduate degrees. The majority of certificates, diplomas, and associate degrees awarded were in the fields of business administration and management and health-related technologies. The predominant area of study among bachelor's degree recipients was business, followed by public administration. The largest numbers of graduate degrees were awarded in business.

## Private and Tribal Post-Secondary Institutions in New Mexico

New Mexico has five Tribal colleges, eight regionally accredited private colleges and universities, and ten nationally accredited licensed schools in addition to the twenty-four licensed private proprietary institutions throughout the state. These institutions provide a myriad of additional educational opportunities for New Mexico citizens.

\*UNM – Taos campus had misreported data for Fall 2002 enrollment information.

**Source:** Fall Institution Registrar's Report. These figures are based upon third Friday census date *total* enrollments that include both on-campus and off-campus enrollments. Additional students enroll for some courses that begin after the census date. In 2004, unduplicated head counts were used due to change in the funding for off campus programs.

\*UNM-Taos campus had misreported data for Fall 2002 enrollment information.

**Source:** Fall Institution Registrar's Report. These figures are based upon Third Friday census date enrollments for both on-campus and off-campus students. Full-time-equivalent enrollment is calculated by dividing the total undergraduate credit hours taken by 15 and dividing the total graduate credit hours taken by 12, the minimum numbers of credit hours required for full-time status at those two levels, respectively.
