## WICHE's Student Exchange Programs

Through the three student exchange programs administered by the Western Interstate Commission for Higher Education (WICHE), some 23,300 residents of 15 Western states are enrolled at reduced levels of tuition in a broad spectrum of undergraduate, graduate, and professional programs. This report covers Fall 2007 enrollments in the three programs, as well as detailing the funds that flow between "sending" states and "receiving" institutions in the Professional Student Exchange Program.

Early in the 1950s, 13 Western states enacted the Western Regional Education Compact and created WICHE. WICHE's region was later expanded through the affiliation of North Dakota in 1985 and South Dakota in 1988. WICHE's founding principle was to encourage and assist the sharing of facilities and education programs among the Western states, especially through its student exchange programs.

The Professional Student Exchange Program (PSEP) is the oldest of the WICHE exchange programs. In PSEP, students usually pay resident tuition at public institutions (except for the field of pharmacy), or reduced tuition in private institutions. For each PSEP student, sending states pay a "support fee" established by WICHE to the enrolling institution. Over the years since the program began in 1953, PSEP has grown beyond its original three disciplines: medicine, dentistry, and veterinary medicine. With this change, PSEP will provide students with access to 10 professional fields, most of which are in the health care professions.

In May 2007, WICHE's commissioners approved several changes to the PSEP that will become effective as of the 2008-09 academic year. As few students were participating in the fields of architecture, graduate library studies, graduate nursing, and public health, these will be inactivated. Schools that were offering these programs through PSEP have been invited to join WICHE's graduate exchange program, called "WRGP".

The Western Regional Graduate Program (WRGP) came into operation in 1981 and now includes designated graduate programs in all WICHE

states except California. To be included in WRGP, programs must undergo an extensive review intended to assure that they are distinctive and of demonstrated high quality. Enrolling master's and PhD students pay resident tuition. As of Fall 2007, 178 programs at 39 institutions in the WICHE region participate in the exchange.

The Western Undergraduate Exchange (WUE), initiated in 1988, opened opportunities for undergraduate study in a wide range of programs in public two-year and four-year colleges and universities. In WUE, states include programs in which they are prepared to enroll residents of other participating states at a tuition rate equal to 150 percent of resident tuition. This special tuition rate is a significant savings over normal nonresident tuition. The WUE Online database ([www.wiche.edu/sep/wue](http://www.wiche.edu/sep/wue)) now lists more than 143 two-year and four-year public participating institutions in all WICHE states.

Through WICHE Scholars, any WICHE state may assist its residents at any degree level and in any field not covered by the other exchanges. To participate, states pay the difference between resident tuition (paid by the student) and the receiving institution's nonresident tuition. (In private institutions, as in PSEP, the student normally pays reduced tuition and the remainder is covered by the sending state.)

This annual Statistical Report provides enrollment and financial information for the Professional Student Exchange Program, and enrollment information for WRGP and WUE. Please note that there is no additional state payment in either WRGP nor WUE.

Further information on all three of our student exchange programs are available on WICHE's website at [www.wiche.edu/sep](http://www.wiche.edu/sep).

## Part I – Professional Student Exchange Program

### Table 1: Summary of Enrollments and Support Fees by Profession

Professional Field	2006-07		2007-08		2008-09 Approved Support Fee Rate
	Number of Students	Support Fee Rate per Student	Number of Students	Support Fee Rate per Student	
<b>Group A Fields</b>					
Dentistry	144	\$ 19,900	154	\$ 20,600	\$21,300
Medicine	46	25,600	41	26,500	27,400
Occupational Therapy	31	9,400	34	10,700	11,100
Optometry	146	13,600	147	14,100	14,600
Osteopathic Medicine	56	17,000	55	17,600	18,200
Physical Therapy	38	9,400	42	9,700	10,000
Physician Assistant	30	9,200	30	10,500	10,900
Podiatry	5	11,900	5	12,300	12,700
Veterinary Medicine	207	25,400	222	26,300	27,200
<b>Group B Fields</b>					
Architecture*	0	\$ 4,300	1	\$ 4,400	\$ 4,500
Graduate Library Studies*	2	5,600	0	n/a	n/a
Graduate Nursing*	0	4,700	0	n/a	n/a
Pharmacy	37	6,100	41	6,300	6,500
Public Health*	1	6,500	1	6,700	6,900
<b>Total Students</b>	<b>743</b>	<b>773</b>			
<b>Actual Support Fees Paid</b>		<b>\$13,411,728</b>		<b>\$14,583,855</b>	

\*Note: The fields of architecture, graduate library studies, graduate nursing and public health were inactivated, effective for the 2008 academic year. Support fee rates are indicated only for the years where there is current or anticipated student enrollment.

### Institution and Program Totals

Number of Institutions	2007	2006	Number of Programs	2007	2006
Within WICHE region			Within WICHE region		
Public	28	36	Public	59	82
Private	17	18	Private	42	45
Outside WICHE region			Outside WICHE region		
Public	6	6	Public	6	6
Private	7	7	Private	7	7
<b>TOTAL INSTITUTIONS</b>	<b>58</b>	<b>67</b>	<b>TOTAL PROGRAMS</b>	<b>114</b>	<b>140</b>

Note: The decrease in the number of programs and institutions is due to the inactivation of architecture, graduate library studies, graduate nursing and public health.

## Part I – Professional Student Exchange Program

### Return Rates of WICHE PSEP Graduates

In fall 2006, Professional Student Exchange Program (PSEP) supporting states renewed their efforts to collect return rate data on their PSEP graduates. WICHE's PSEP provides affordable access to healthcare education in neighboring Western states that have excess capacity in their programs. PSEP helps states that don't have professional schools in certain fields to leverage their resources so they don't have to invest in costly institutional infrastructure and faculty for educational programs for which there may not be sufficient ongoing demand from state residents. Funding states pay a "support fee" for each student, allowing the student to pay reduced tuition at the enrolling institution.

Healthcare workforce needs are at an all-time high, regionally and nationally. State policymakers are looking for the best investments of limited tax dollars, and sharing educational resources within the West is a fiscally responsible approach. Are states getting a good return on their PSEP investment dollar?

Six states contractually require their PSEP graduates to return and serve state residents: Arizona, Colorado, Hawaii (effective for students enrolling in fall 2008 and thereafter), New Mexico, Nevada, and Washington. These states are labeled "contractual payback states" in the survey results. Alaska, Idaho, Montana, North Dakota, Utah, and Wyoming *encourage* their graduates to return to their home state but do not contractually require them to do so; these are labeled "honor system states." Alaska's participation in PSEP is distinctive in another way: to make the benefits of PSEP available to its residents in the absence of state funding, Alaska treats the support fee as a loan to each PSEP student. Graduates must repay the loan, whether or not they return to Alaska.

"Payback states" found it relatively easy to provide return-rate information for graduates who were still in the process of paying off their service debt because they were already tracking them. The same holds true for Alaska, a "loan" state. Other state offices used one or more of the following resources:

- a. State licensing boards.
- b. State professional associations.
- c. Collections services.
- d. Records from the state department of labor.

The state higher education offices were not able to locate all PSEP graduates; those that could not be located were counted as nonreturning. Some female graduates no longer had the same name due to changes in marital status. States that were able to use Social Security numbers were typically able to find more graduates and consequently demonstrated an improved return rate.

The chart on the next page gives a "snapshot" in time of PSEP alumni who graduated between 2001 and 2005 and who were licensed and/or practicing in their home state (as of December 2006 to November 2007, depending on when the state researched its graduates and returned its data). **Some of our PSEP states may report slightly different return percentages than those you find in this survey, due to different time frames during which return to the home state is measured.** Our calculations look at a specific point in time and are likely to be slightly lower than the actual number of PSEP graduates who return and serve their state. Payback states that measure return rates over a longer time frame will demonstrate higher return rates. This is especially true for fields where graduates may be completing a residency, internship, or clinical experience, or may be on deferment for other reasons, though they will ultimately return to serve their state at a later date.

For allopathic and osteopathic medicine, recent graduates must complete three- to four-year residencies. Some complete their residencies in state, while others go elsewhere, though the latter may plan to return to their home state at a later date. For these professions, WICHE counted PSEP alumni who graduated between 1997 and 2001, in order to allow time for them to complete their residencies and set up practice in their home state.

The average return rate for all reporting WICHE states was 59 percent. Return rates for payback states were the highest, averaging 74 percent and ranging as high as 94 percent, depending on the profession. Return rates for "honor system" states were lower, averaging 39 percent and ranging up to 75 percent, depending on the profession. Return rates were the lowest in primarily rural states that do not require a service payback from their residents, like Idaho, Montana and Wyoming. Some of these "honor states" see PSEP primarily as an access program. Hawaii and North Dakota did not submit return data for

## Part I – Professional Student Exchange Program

this survey but plan to participate in the future. Unfortunately, WICHE and its states lacked the resources to compile regional return data. However, we have anecdotal evidence that graduates who did not return to their home state often choose to practice their profession in another WICHE state.

We hope this survey will prompt our member states to consider:

- **Establishing a service payback requirement if your state does not currently require one.** Although there is an ongoing administrative cost, it may be in the state residents' best interest to stimulate higher return rates.
- **Partnering with state professional associations** and asking them to mentor returning graduates and help them develop a sense of belonging to the local professional community, so that returning graduates will be more likely to remain in the state.
- **Using repayment monies paid by non-returning graduates to fund loan repayment incentives** for graduates who return to their home state to practice in rural and underserved areas (for states with service payback requirements).
- **Creating or increasing rural or underserved incentive programs**, such as loan repayment programs or practice establishment subsidies that will encourage graduates in the healthcare fields to return to their home state and will make it affordable for them to live and work in these areas. WICHE's *Inventory of Rural Health Practice Incentives in the Western WICHE States* (October 2007, accessible at <http://www.wiche.edu/sep/psep/stateInventory.pdf>) shows that the incentive programs offered to healthcare professionals in most of the Western states are financially insignificant when compared to the shortages of healthcare professionals and the high debt loads that new graduates carry.

For further information about these survey results, please call 303.541.0214.

## Part II – Western Regional Graduate Program

The Western Regional Graduate Program (WRGP) was initiated in 1981 in Alaska, Idaho, Montana, Oregon, and Washington. As of Fall 2007, the WRGP includes 179 programs in 39 institutions in all WICHE states except California.

The WRGP consists of high quality masters and doctoral degree programs that are not widely available throughout the West. To be eligible for WRGP, programs must be of demonstrated quality. Programs that are not related to health care must be offered at no more than four institutions in the WICHE region (exclusive of California). WRGP is particularly strong in programs targeted to the emerging social, environmental, and resource development needs of the West, and innovative interdisciplinary programs.

In the past, WICHE accepted only distinctive programs to WRGP. However, given the severe workforce shortages in the health care professions, the WICHE Commission voted in May 2007 to waive the previous four-program maximum limitation on the number of health care-related programs offered through WRGP. WICHE encourages *all* high-quality health care-related programs in WICHE states that have excess capacity or that wish to diversify their enrollments to join the WRGP network of cooperating programs.

Through WRGP, graduate students who are residents of the 14 participating states may enroll in participating programs in public institutions on a resident tuition basis. Along with this obvious benefit to students, WRGP offers states and institutions a means to foster the development and support of innovative

programs by enlarging the potential student pool. Like all WICHE student exchanges, WRGP has enjoyed strong support from policymakers in the states as a way to better utilize regional educational resources.

Eligible master's and PhD students can enroll in participating programs outside their home state pay resident tuition rates. To receive WRGP tuition status, students apply directly through the graduate school or academic department offering the WRGP program, and identify themselves as WICHE WRGP applicants.

WRGP programs are not available to California students at this time, because currently no California programs receive WRGP students through this arrangement. WICHE would be pleased to welcome California programs in the future, and encourages interested ones to apply in the future.

New WRGP programs are nominated for inclusion every two years. Over 30 new programs have submitted their nominations to join the WRGP network beginning in fall 2008. New programs will be announced in spring 2008 and their program descriptions will be available on our website. We invite you to consult our WRGP brochure (available as a PDF) that lists currently participating programs. Our online database lists full descriptions of each program. Both are available at [www.wiche.edu/sep/wrgp](http://www.wiche.edu/sep/wrgp).

## Part II – Western Regional Graduate Program

\* California residents are not eligible to enroll through WRGP at this time because the state does not currently offer programs through WRGP to residents of other WICHE states.

## Part III – Western Undergraduate Exchange

Now celebrating its twentieth year, WUE, the Western Undergraduate Exchange, is WICHE's largest student exchange program. When compared to similar regional exchange programs in the nation, it is the largest of its kind. Through WUE, students from participating states may enroll in designated two-year and four-year public institutions in other participating states at a special reduced tuition level – 150 percent of resident tuition. In all programs, this amount is substantially less than nonresident tuition.

All WICHE states now receive and send students through the Western Undergraduate Exchange. They include: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming. California became a fully reciprocal partner in November 2005, and an increasing number of California institutions are discovering the benefits of joining the WUE network. As of 2008, Hawaii residents are now eligible to enroll at both two- and four-year WUE institutions.

Each state controls their level of participation in WUE. Some states set limits on the total number of students admitted. Each state and institution chooses which programs they wish to make available to WUE students, and under what conditions. In many cases, institutions have opened all of their programs on a space-available basis. In other cases, institutions have excluded some programs or have listed only specific programs that are open to WUE students.

WUE continues to grow because it offers states a way to greatly expand the range of educational opportunities available to their students at a minimal cost to the state. From a total of 643 students in Fall 1988, WUE now enrolls more than 22,000 students in 143 institutions across the West. A complete report on WUE enrollments, including information about the specific programs in which students are enrolled, is available at [www.wiche.edu/sep/wue](http://www.wiche.edu/sep/wue).

## Part III – Western Undergraduate Exchange

## Part IV – WICHE Scholars Program

The WICHE Scholars program offers a way for states to extend tuition assistance to their residents for programs not available in either public institutions in the home state or other WICHE exchange programs. The student pays resident tuition (or the balance of the standard tuition charge in private institutions).

The sending state pays, through WICHE, the remainder of either the nonresident tuition charge or the standard tuition in private institutions. In 2007-08, no students were enrolled as WICHE Scholars.

The fifteen member states of the Western Interstate Commission for Higher Education (WICHE) work collaboratively to expand educational access and excellence for all citizens of the West.

By promoting innovation, cooperation, resource sharing, and sound public policy among states and institutions, WICHE strengthens higher education's contributions to the region's social, economic, and civic life.

Member states are Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming.
