The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

## Highlights

This report describes the characteristics of the 100 largest public elementary and secondary school districts in the United States and its jurisdictions. These districts are defined as the 100 largest according to the size of their student population. The information in this report was provided by state education agency officials to the National Center for Education Statistics (NCES) for inclusion in the Common Core of Data (CCD). The report uses data from the 2005–06 school year and includes student membership and staff in public schools and school districts in the 50 states, Puerto Rico, the Bureau of Indian Education, the Department of Defense dependents schools (overseas and domestic), and the four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands).<sup>1</sup> This report also includes graduate counts, high school dropout rates, and graduation rates for the 2004–05 school year and revenues and expenditures for fiscal year (FY) 2005.

Highlights of the report include the following:

- The 100 largest public school districts, representing less than 1 percent (0.6 percent) of all school districts in the United States and jurisdictions, were responsible for the education of 23 percent of all public school students (table 1).
- The 100 largest public school districts employed 22 percent of the United States and jurisdictions' public school full-time-equivalent (FTE) teachers and contained 17 percent of all public schools and 20 percent of public high school completers (table 1).
- The 100 largest public school districts had larger average school enrollments compared to the average for all school districts (695 vs. 518) as well as a higher median pupil/teacher ratio (15.9 vs. 15.4) (table 1).
- The percentage of students in the 100 largest public school districts who were other than White, non-Hispanic was 71 percent, compared to 44 percent of students in all school districts (table 2).
- In FY 2005, current expenditures per pupil in the 100 largest public school districts ranged from lows of \$5,104 in the Puerto Rico Department of Education and \$5,503 in the Alpine District, Utah to a high of \$18,878 in the District of Columbia Public Schools and \$17,988 in Boston, Massachusetts (table A-14).
- Three states—California, Florida, and Texas—accounted for 45 percent of the 100 largest public school districts (table D-3).

---

<sup>1</sup>In this report, the term “United States and jurisdictions” refers to these entities.

## Introduction

The purpose of this publication is to provide basic descriptive information about the 100 largest school districts (ranked by student membership, that is, the number of students enrolled at the beginning of the school year) for the 2005–06 school year in the 50 states, the District of Columbia, Puerto Rico, the Bureau of Indian Education, the Department of Defense dependents schools (overseas and domestic), and the four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands). In this report, the terms “United States and jurisdictions” and “national total data” refer to these entities. This is different from most National Center for Education Statistics (NCES) reports, which include only the 50 states and the District of Columbia in the totals.

Almost one in four public school students in the United States and jurisdictions is served by one of the 100 largest school districts (table 1). These districts are distinct from all school districts by characteristics other than just the size of their membership. They also vary by average school size, median pupil/teacher ratio, and minority enrollment as a proportion of total enrollment (tables 1 and 2).

Table 1. Selected statistics for public elementary and secondary schools and school districts for the United States and jurisdictions and the 100 largest and 500 largest school districts: School year 2005–06

Characteristic	National total <sup>1</sup>	100 largest districts		500 largest districts	
		Total	Percent of national total	Total	Percent of national total
Districts <sup>2</sup>	17,765	100	0.6	500	2.8
Schools <sup>3</sup>	99,436	16,584	16.7	32,162	32.3
Students	49,894,627	11,302,149	22.7	21,526,682	43.1
Teachers (full-time equivalent) <sup>4</sup>	3,191,539	690,773	21.6	1,305,658	40.9
High school completers (2004–05) <sup>5</sup>	2,887,254	564,823	19.6	1,131,114	39.2
Median pupil/teacher ratio <sup>6</sup>	15.4	15.9	†	16.1	†
Average enrollment <sup>7</sup>	518.2	694.7	†	686.5	†

† Not applicable.

<sup>1</sup> Total may differ from other published estimates due to inclusion of Puerto Rico, the outlying areas, the Bureau of Indian Education, and the Department of Defense dependents schools.

<sup>2</sup> Totals for number of districts may differ from published estimates since they exclude closed, inactive, and future school districts.

<sup>3</sup> Totals for number of schools may differ from published estimates since they exclude closed, inactive, and future schools.

<sup>4</sup> Full-time equivalent (FTE) is the amount of time required to perform an assignment stated as a proportion of a full-time position. It is computed by dividing the amount of time employed by the amount of time normally required for a full-time position. FTE is not a head count; for example, 2 half-time employees represent 1 FTE.

<sup>5</sup> Includes high school diploma recipients as well as other high school completers (e.g., certificates of attendance), but not high school equivalencies (e.g., GEDs). Total may differ from other published estimates due to inclusion of Puerto Rico, the outlying areas, the Bureau of Indian Education, and the Department of Defense dependents schools.

<sup>6</sup> Includes only schools where student membership was greater than zero and for which pupil/teacher ratio data were available. The median is given because it is unaffected by very high or very low values.

<sup>7</sup> Includes only schools where membership was greater than zero.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). The 500 largest school districts include 23 school districts that are some other configuration besides prekindergarten (PK) or K–12, although all of the 100 largest school districts are PK or K–12.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2005–06, Version 1a, "Local Education Agency Universe Survey," 2005–06, Version 1a, and "State Nonfiscal Survey of Public Elementary/Secondary Education," 2005–06, Version 1a.

In this report, the terms “public school districts” and “school districts” are used interchangeably. These include regular school districts; local supervisory unions that provide management services for a group of associated school districts; regional education service agencies that typically provide school districts with research, testing, and data processing services; state and federally operated agencies; and other agencies that do not fall into these groupings (e.g., charter schools reported as their own school districts). A “regular school district,” a subset of “public school districts” or “school districts,” is an agency responsible for providing free public education for school-age children residing within its jurisdiction. All of the 100 largest districts are regular school districts.

Information about the characteristics listed above is found in the tables that accompany this report. To establish a meaningful context for the information on the 100 largest districts, four tables in this section (tables 1–4) provide national data and data for the 100 largest school districts; tables 1 and 2 also include data for the 500 largest districts. Appendix A presents basic data tables for the 100 largest school districts. Appendix D (tables D-1 to D-4) provides supplementary information about the 100 and 500 largest school districts. Table D-1 lists the 500 largest school districts with some identifying information. Table D-2 is an alphabetic list of the 500 largest districts that includes their rank by membership size. Table D-3 provides a count of the number of 100 largest districts by state. Table D-4 provides selected data for the 100 largest school districts in the 1995–96 school year for comparison with the 2005–06 school year. In all tables, with the exception of tables D-2 and D-3, districts are presented in decreasing order of membership size.

Table 2. Percentage of public elementary and secondary school students eligible for free or reduced-price lunch and percentage enrollment that is other than White, non-Hispanic in the 100 and 500 largest school districts in the United States and jurisdictions: School year 2005–06

District characteristic	All school districts	100 largest school districts	500 largest school districts
Membership eligible for free or reduced-price lunch, of those schools that reported free and reduced-price lunch <sup>1</sup>	41.0	50.8	47.0
Percent of schools reporting other than White, non-Hispanic membership	97.4	99.9	99.8
Percentage other than White, non-Hispanic enrollment	43.7	70.6	61.7
American Indian/Alaska Native	1.3	0.5	0.7
Asian/Pacific Islander	4.7	7.2	6.6
Hispanic	20.7	35.2	30.3
Black, non-Hispanic	17.0	27.7	24.0
Percentage of White, non-Hispanic enrollment	56.3	29.4	38.3

<sup>1</sup> These percentages should be interpreted with caution. The Department of Defense dependents schools (overseas and domestic), the Bureau of Indian Education, Puerto Rico, and the U.S. Virgin Islands did not report free and reduced-price lunch eligibility and are not included in the totals. Also, states may not have reported students eligible for reduced-price meals, and a number of states reported participation instead of eligibility data, which may not be strictly comparable. See the Methodology section, appendix B, for further description. Percentages are based on those schools that reported.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2005–06, Version 1a, and "Local Education Agency Universe Survey," 2005–06, Version 1a.

## Overview of the 100 Largest School Districts

In the 2005–06 school year, there were 17,765 operational public school districts, 99,436 operational public schools, and 49.9 million students in public schools in the United States and jurisdictions (table 1). Additionally, there were 3.2 million full-time equivalent (FTE)<sup>1</sup> teachers in the 2005–06 school year and 2.9 million high school completers in the 2004–05 school year.<sup>2</sup> The 100 largest school districts comprised less than 1 percent of all public school districts but served 23 percent of all public elementary and secondary students. These school districts contained 17 percent of all public schools and employed 22 percent of all FTE teachers. In comparison, the 500 largest school districts comprised 3 percent of all public school districts, comprised 32 percent of public schools, and served 43 percent (21.5 million) of all public elementary and secondary students in the United States and jurisdictions.

<sup>1</sup> FTE is a proportion of a full-time position. For example, 2 half-time employees represent 1 FTE.

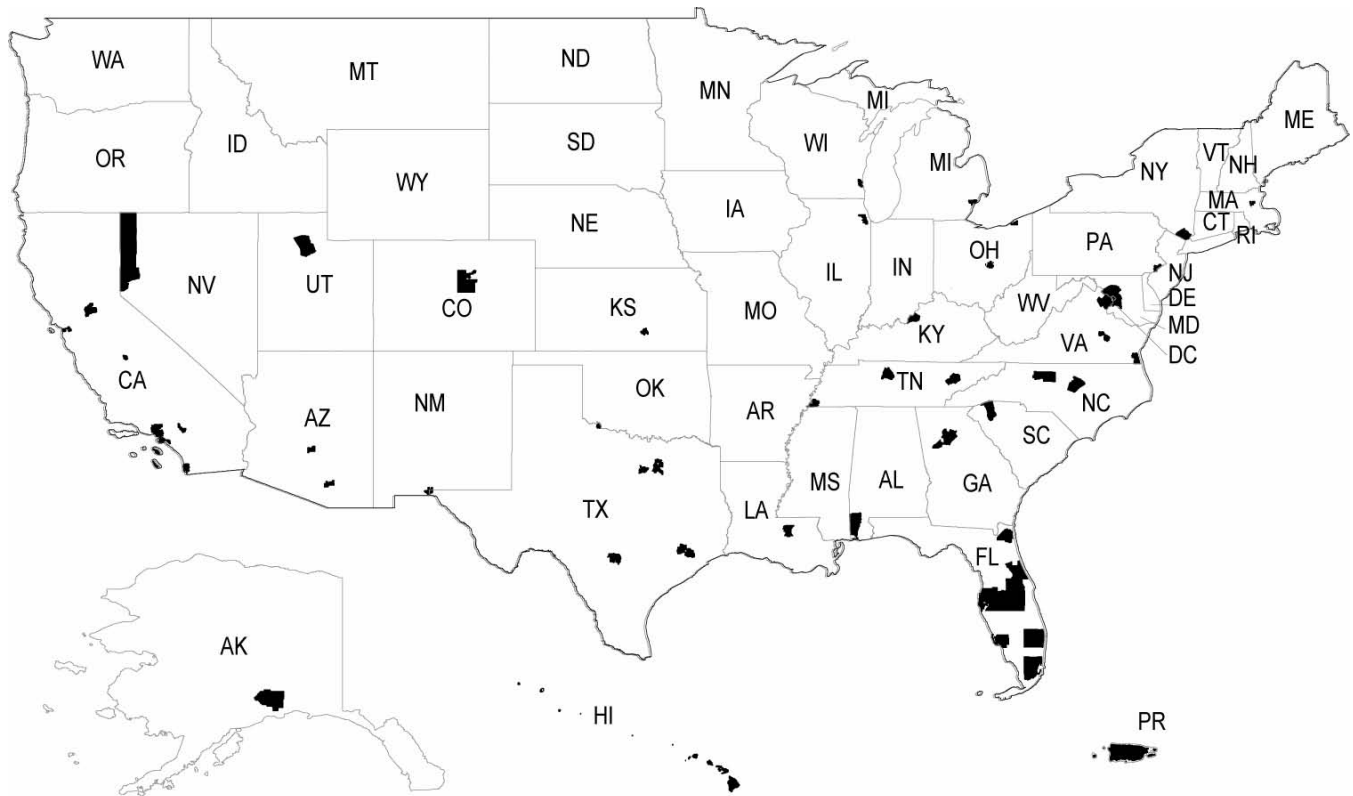

<sup>2</sup> In the CCD, data on high school completers are collected 1 year after the completions occur. For example, data on 2004–05 high school completers are collected in the 2005–06 data collection.

The 100 largest school districts ranged in size from 47,595 to 1,014,058 students in 2005–06 (table A-1). Twenty-eight of these districts served over 100,000 students. The largest public school district was New York City Public Schools, New York, with 1,014,058 students enrolled in 1,408 schools. The next largest was Los Angeles Unified, California, with 727,319 students in 768 schools. The enrollment of each of these two largest districts was greater than the enrollment of each of the 27 smallest states, the District of Columbia, Puerto Rico, each of the four outlying areas, and the Department of Defense dependents schools (overseas and domestic).<sup>3</sup>

## Where Were the 100 Largest School Districts?

There were 29 states and jurisdictions that each had at least one of the 100 largest school districts in the 2005–06 school year (table A-1, figure 1, and table D-3). Texas had 18 districts among the 100 largest, followed by Florida with 14, and California with 13. Several other states had more than one district represented among the 100 largest: Georgia and Maryland each had 6; North Carolina and Virginia each had 5; Colorado and Utah each had 4; Tennessee had 3; and Arizona, Nevada, and Ohio each had 2. Each of the following states had one school district among the 100 largest: Alabama, Alaska, the District of Columbia, Hawaii, Illinois, Kansas, Kentucky, Louisiana, Massachusetts, Michigan, New Mexico, New York, Pennsylvania, Puerto Rico, South Carolina, and Wisconsin. (The District of Columbia, Hawaii, and Puerto Rico have only one school district each for their entire jurisdiction.)

Figure 1. The 100 largest school districts in the United States and jurisdictions: School year 2005–06

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), “Local Education Agency Universe Survey,” 2005–06, Version 1a.

<sup>3</sup> State enrollment data can be found in the following CCD data file: “State Nonfiscal Survey of Public Elementary/Secondary Education,” 2005–06, Version 1a and in Sable and Garofano (2007), table 1.

About three-quarters of the 100 largest school districts were located in coastal and Gulf Coast states (see table D-3 for a count of the 100 largest districts by state). The school districts among the 100 largest also tended to be in cities and counties with large populations, with administrative offices typically located in large cities and their environs. Many of the districts were in states where the school districts have the same boundaries as counties. However, school district boundaries need not be the same as county, city, or town boundaries.

## How Did the 100 Largest School Districts Compare With All School Districts?

### General Characteristics

In the 2005–06 school year, each of the 100 largest school districts had at least 47,595 students, whereas 72 percent of all regular school districts had fewer than 2,500 students (tables 3 and A-1). However, these smaller districts served only 17 percent of all students; 83 percent of students were enrolled in districts of 2,500 or more students (table 3).

The average school district in the United States and jurisdictions had 5.6 schools; in comparison, the 100 largest school districts averaged 165.8 schools per district (derived from table 1). Two of the three largest districts—New York City Public Schools, New York, and the Puerto Rico Department of Education—each had over 1,400 schools (table A-1).

Table 3. Number and percentage of districts and students, by district membership size for regular public elementary and secondary school districts in the United States and jurisdictions: School year 2005–06

District size (number of students)	Districts			Students			Cumulative totals	
	Number	Percent	Cumulative percentage	Number	Percent	Cumulative percentage	Districts	Students
<b>Total</b>	<b>14,170</b>	<b>100.0</b>	<b>†</b>	<b>47,729,216</b>	<b>100.0</b>	<b>†</b>	<b>†</b>	<b>†</b>
100,000 or more	27	0.2	0.2	5,689,837	11.9	11.9	27	5,689,837

1 to 149	1,521	10.7	97.4	109,076	0.2	100.0	13,803	47,729,216
Zero <sup>1</sup>	65	0.5	97.9	0	0.0	100.0	13,868	47,729,216
Not Applicable	302	2.1	100.0	†	†	100.0	14,170	47,729,216

† Not applicable.

<sup>1</sup> Membership may be zero in two situations: (1) if the school district does not operate schools, but pays tuition for its students to attend a neighboring district; and (2) if the district provides services for students who are accounted for in some other district(s).

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). Not included in this table are local supervisory unions, regional education service agencies, and state and federally operated agencies. For analytical purposes, New York City Public Schools, New York, is treated as a regular school district. The number of regular districts presented in this table differs from that presented in table 1, which represents all districts. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 2005–06, Version 1a.

## **School Characteristics**

Average regular school<sup>4</sup> size ranges from a low of 360 students (in the District of Columbia Public Schools) to a high of 1,461 (in the Gwinnett County School District, Georgia) in the 100 largest school districts in the 2005–06 school year (table A-2). The largest regular school in the 100 largest districts, and also one of the two largest regular schools in the United States, was the 5,452 student Chicago International Charter, Illinois.<sup>5</sup>

The 100 largest school districts had more students per school than the average school district (695 vs. 518) (table 1). Eighteen of the 100 largest school districts had an average regular school size of over 1,000 students (table A-2). In addition to larger school sizes, the 100 largest school districts also had a higher median pupil/teacher ratio than the average school district (15.9 to 1 vs. 15.4 to 1) (table 1). Among the 100 largest public school districts, Garden Grove Unified, California, had the highest median pupil/teacher ratio in regular schools (22.9 to 1) and the Puerto Rico Department of Education, and Fairfax County Public Schools, Virginia, had the smallest (12.8 to 1) (table A-3). The median pupil/teacher ratio for regular primary schools among the 100 largest public school districts that met reporting standards was lower than that for high schools (15.7 to 1 vs. 18.0 to 1).

Of the 15,024 schools with membership in the 100 largest public school districts, 9,904 were primary schools, 2,496 were middle schools, 1,937 were high schools, and 687 were schools with other instructional levels (table A-4). The Puerto Rico Department of Education—which had the most schools with membership in total—had the largest number of primary (865) and other instructional level (205) schools of the 100 largest public school districts, whereas New York City Public Schools, New York, had the largest number of middle schools (267) and high schools (187).

*School staff.* At the national level, 51 percent of staff were teachers (Sable and Garofano 2007),<sup>6</sup> while in the 100 largest districts 55 percent of staff were teachers (table A-5). Sixty-four of the 100 largest districts reported that 50 percent or more of staff were teachers, and 7 districts reported that 60 percent or more of staff were teachers (these districts were New York City Public Schools, New York; City of Chicago School District 299, Illinois; Clark County School District, Nevada; Greenville County School District, South Carolina; Washoe County School District, Nevada; Chesterfield County Public Schools, Virginia; and San Francisco Unified, California). Twenty-one of the 100 largest school districts had 1 percent or more of their staff assigned as LEA administrators.

*Title I eligibility.* Ninety-nine of the 100 largest school districts reported data for Title I eligible schools and programs for the 2005–06 school year (table A-6). The percentage of Title I eligible schools in these districts ranged from 6 percent (in Jordan District, Utah) to 99 percent (in Cleveland Municipal City, Ohio). Within the 99 of the 100 largest school districts that reported data, 54 percent of students attended a Title I eligible school, compared to 52 percent of students in the United States and jurisdictions (Hoffman 2007a).

*Magnet schools and charter schools.* Among the 91 of the 100 largest districts that reported data on magnet schools or reported that magnet schools did not exist in that state, there were 1,229 magnet schools. The largest number of magnet schools among these districts was in the City of Chicago School District, Illinois, with 297 magnet schools (or 47 percent of its schools and 50 percent of its students in magnet schools). There were 804 charter schools administered by the 100 largest school districts in the 2005–06 school year (table A-7). This number does not include charter schools that are independent of the school district.<sup>7</sup> Two percent of the students in these districts attended one of these charter schools. In the United States and jurisdictions, there were 3,780 charter schools, including both independent and dependent charter schools, attended by 2 percent of students in 2005–06 (Hoffman 2007a). The largest number of charter schools administered by any of the 100 largest school districts was 120 schools in the Puerto Rico Department of Education (table A-7).

---

<sup>4</sup> A regular school is a public elementary/secondary school that does not focus primarily on vocational, special, or alternative education.

<sup>5</sup> Data on school enrollment can be found in the following CCD file: “Public Elementary/Secondary School Universe Survey,” 2005–06, Version 1a. This data source is available online at <http://nces.ed.gov/ccd/pubschuniv.asp>.

<sup>6</sup> The national staff ratio does not include the Bureau of Indian Education schools.

<sup>7</sup> Because districts are administrative units, not geographic units, charter schools located in the same geographic area as the district’s schools, but not administered by the district, are not included in this total or in table A-7.

## **Student Body**

Overall, the 100 largest school districts in 2005–06 had 23 percent of the United States and jurisdictions' public school students (table 1). The 100 largest school districts were not homogeneous, and certain student characteristics, such as race/ethnicity, poverty level, and disability status, varied across the districts.

*Race/ethnicity.* American Indians/Alaska Natives, Asians/Pacific Islanders, Hispanics, non-Hispanic Blacks, and non-Hispanic Whites are the five racial/ethnic groups about which the CCD collects data. The 100 largest school districts served 37 percent of the 21.8 million public school students in the United States and jurisdictions who are other than White, non-Hispanic, compared to serving 12 percent of the 28.1 million students in the U.S. and jurisdictions who are White, non-Hispanic (derived from tables 1 and 2).<sup>8</sup> In 67 of the 100 largest districts, non-Hispanic Whites comprised less than 50 percent of student membership (table A-8). In more than one-third (37) of the 100 largest districts, students who were other than White, non-Hispanic comprised more than 75 percent of the student membership (table A-8). Seven of the 10 largest school districts had other than White, non-Hispanic student memberships of at least this size.

Even with the relatively high other than White, non-Hispanic membership in the 100 largest school districts, 33 of the districts reported 50 percent or more of their students as White, non-Hispanic (table A-8). In 8 of these 33 districts, at least 75 percent of students were White, non-Hispanic. In 15 of the 100 largest districts, half or more of the membership was Black, non-Hispanic. Twenty-two districts reported that the majority of students were Hispanic; 4 of these were among the 10 largest districts (table A-9). In Hawaii, a one-district state, and San Francisco Unified, California, the majority of students were Asian/Pacific Islander.

*Free and reduced-price lunch eligibility.* The 100 largest school districts had a disproportionate percentage of students eligible for the free and reduced-price lunch program relative to all public school districts. Among the 99 of the 100 largest school districts that reported free and reduced-price lunch eligibility, 51 percent of students were eligible, compared with 41 percent of students in all districts (table 2). Forty-three of these districts reported 50 percent or more of their students as eligible for the free and reduced-price lunch program (table A-9).

*Students with disabilities.* Approximately 1.5 million students in the 100 largest school districts had Individualized Education Programs (IEPs) (table A-10). Students with IEPs made up 13 percent of all students in these districts, slightly lower than the percentage for the United States and jurisdictions as a whole (14 percent).<sup>9</sup> In the largest school district, New York City Public Schools, New York, 14 percent (or 145,616 students) had IEPs. About 2 percent of the schools in the 100 largest school districts were special education schools (derived from table A-11).

*Migrants and English language learner (ELL) students.* Six of the 100 largest school districts did not report data on the number of migrant students enrolled in the previous school year and 1 district did not meet reporting standards. Among the 93 of the 100 largest public school districts for which data were available, the number of migrant students enrolled in the previous year ranged from 0 in some districts to 9,753 students in the Fresno Unified, California. In the 94 largest school districts for which data were available, 1.5 million English language learner (ELL) students were served in 2005–06, or 13 percent of all students in these districts (table A-12).

*High school completers, grades 9–12 dropout rate, and the averaged freshman graduation rate (AFGR).* The number of 2004–05 high school completers in the 99 of the 100 largest school districts for which data were available ranged from 1,697 (in the Brownsville Independent School District, Texas) to 41,322 (in New York City Public Schools, New York) (table A-13). For the 98 of the 100 largest school districts for which data were available, the grade 9–12 dropout rate<sup>10</sup> was 4 percent. Among these 99 districts, this ranged from 0.6 (in

---

<sup>8</sup> For the 100 largest school districts, the numbers of students in different racial/ethnic categories are reported at the school level and are aggregated up to the district level. In the 2005–06 school year, the total number of students other than White, non-Hispanic in the 100 largest school districts was 7,979,317

<sup>9</sup> Data on Individualized Education Programs can be found in the following CCD file: "Local Education Agency Universe Survey," 2005–06, Version 1a. This data source is available online at <http://nces.ed.gov/ccd/pubagency.asp>.

<sup>10</sup> The grades 9–12 dropout rate is calculated by dividing the number of grades 9–12 dropouts by the grades 9–12 enrollment. See the Methodology section, appendix B, for more information.

Capistrano Unified, California) to 16.2 (in Denver County 1, Colorado). The AFGR<sup>11</sup> was 70 percent for the 98 of the 100 largest school districts for which the rate could be calculated in 2004–05, as compared to a rate of 75 percent for the United States and jurisdictions (Sable and Garofano 2007). This ranged from a low of 43 percent (in Cleveland Municipal City, Ohio) to a high of 98 percent (in the Alpine District, Utah).

### ***Revenues and Expenditures for Fiscal Year (FY) 2005***

All revenue and expenditure data presented in this report are in current (unadjusted) dollars. In the 2004–05 school year (FY 2005), the 100 largest school districts received over \$111 billion for public elementary and secondary education (table A-14). Of this \$111 billion, 31 percent (\$34 billion) went to the 5 largest school districts (New York City Public Schools, New York; Los Angeles Unified, California; Puerto Rico Department of Education; City of Chicago School District 299, Illinois; and Dade County School District, Florida). Across the 100 largest districts, state sources accounted for 45 percent of revenues, local sources for 44 percent, and federal sources for 11 percent (table A-15). Revenues from the federal government received by the 100 largest school districts constituted between 2 percent (in Douglas County Re 1, Colorado) and 19 percent (in the Brownsville Independent School District, Texas) and 30 percent (in the Puerto Rico Department of Education) of all revenues to the district.

Taken together, the two largest school districts, New York City Public Schools, New York, and Los Angeles Unified, California, spent a little more than 1 out of every 5 current expenditure dollars spent by the 100 largest school districts (derived from table A-14). The percentage of total current expenditures spent on instruction ranged from a low of 32 percent (in the Greenville County School District, South Carolina) to highs of 68 percent (in New York City Public Schools, New York) and 96 percent (in the Puerto Rico Department of Education) in the 100 largest school districts (table A-15).

Current expenditures per pupil in FY 2005 ranged from lows of \$5,104 (in the Puerto Rico Department of Education) and \$5,503 (in the Alpine District, Utah) to a high of \$18,878 (in the District of Columbia Public Schools) in the 100 largest school districts in FY 2005 (table A-14). (See appendix C for definitions of specific revenues and expenditures.)

*Expenditures for charter and private schools.* Payments by, or on behalf of, public school districts to independent charter schools and private schools are not included in the expenditures in this report. In some states these payments are made by some entity other than the public school district, and are therefore not reported on the School District Finance Survey. Information on expenditures for independent charter schools and private schools, for those school districts reporting these expenditures, can be found on the Build a Table application at <http://nces.ed.gov/ccd/bat/>.

---

<sup>11</sup> The averaged freshman graduation rate for 2004–05 was calculated as total high school diploma recipients in 2004–05 divided by the averaged class membership of 8<sup>th</sup> graders in 2000–01, 9<sup>th</sup> graders in 2001–02, and 10<sup>th</sup> graders in 2002–03. See the Methodology section, appendix B, for more information.

## Changes in the 100 Largest School Districts Between 1995 and 2005

While there has been considerable change in rank by size within the 100 largest school districts over time, the lists of school districts in 1995–96 and 2005–06 are similar. Only 16 of the 100 largest school districts in 1995–96 were not among the 100 largest school districts in 2005–06 (see table D-4 for a list of the 100 largest school districts in 1995–96).<sup>12</sup>

Between 1995–96 and 2005–06, the number of students in the 100 largest school districts increased by 8 percent, and the number of FTE teachers increased by 23 percent (table 4). However, while the numbers of students and teachers increased between these years, the proportion of the national total these numbers represent was essentially unchanged. For example, the 100 largest school districts included 23 percent of all students in both 1995–96 and 2005–06.

Table 4. Number of public elementary and secondary students, full-time-equivalent (FTE) teachers, and schools in all districts and the 100 largest school districts in the United States and jurisdictions: School years 1995–96 and 2005–06

District characteristic	1995–96			2005–06			Percent change (1995–96 to 2005–06)	
	All districts	100 largest districts	100 largest districts as a percent of national total	All districts	100 largest districts	100 largest districts as a percent of national total	All districts	100 largest districts
	Students	45,547,183	10,437,831	22.9	49,894,627	11,302,149	22.7	9.5
FTE teachers <sup>1</sup>	2,642,122	563,582	21.3	3,191,539	690,773	21.6	20.8	22.6
Schools <sup>2</sup>	88,981	14,764	16.6	99,436	16,584	16.7	11.7	12.3

<sup>1</sup> Full-time equivalent (FTE) is the amount of time required to perform an assignment stated as a proportion of a full-time position. It is computed by dividing the amount of time employed by the amount of time normally required for a full-time position. FTE is not a head count; for example, 2 half-time employees represent 1 FTE.

<sup>2</sup> Totals for number of schools may differ from published estimates since for 1995–96, they exclude closed schools, and for 2005–06, they exclude closed, inactive, and future schools. Additionally, because inactive and future schools were not distinguished in 1995–96, and therefore cannot be excluded, the school totals for 1995–96 and 2005–06 are not directly comparable.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and Department of Defense dependents schools (overseas and domestic). In 1995–96, data for the Bureau of Indian Education, and Department of Defense dependents schools (domestic) were not collected, and therefore are not included. The Bureau of Indian Education and Department of Defense dependents schools (domestic) account for 0.2 percent of students, 0.1 percent of teachers, and 0.3 percent of schools among all districts in 2005–06. SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 1995–96 and 2005–06, Version 1a, "Local Education Agency Universe Survey," 1995–96 and 2005–06, Version 1a, and "State Nonfiscal Survey of Public Elementary/Secondary Education," 1995–96, Version 1b, and 2005–06, Version 1a.

<sup>12</sup> When comparing the 100 largest school districts in 1995–96 to those in 2005–06, note that some of the districts changed their name during this period. The sixteen public school districts that were among the 100 largest in 1995–96 but not in 2005–06 include Orleans Parish School Board, Louisiana; Jefferson Parish School Board, Louisiana; Portland School District 1J, Oregon; Cincinnati City School District, Ohio; Caddo Parish School Board, Louisiana; Buffalo City School District, New York; Ysleta Independent School District, Texas; Seattle, Washington; Minneapolis, Minnesota; Newark City, New Jersey; Shelby County School District, Tennessee; Escambia County School District, Florida; Indianapolis Public Schools, Indiana; Omaha Public Schools, Nebraska; Charleston County School District, South Carolina; and St. Paul, Minnesota.

### Data Files

Data files for school, agency, and state universe surveys may be found on the CCD Data Files page of the CCD website at <http://nces.ed.gov/ccd/ccddata.asp>.

Page intentionally left blank.

## Appendix A—Basic Tables

**Table A-1** presents basic data such as the number of students receiving educational services, full-time equivalent (FTE) teachers, 2004–05 completers, and number of schools for each of the 100 largest school districts. Also shown is information to fully identify each school district by its city, state, and county, since the name of the district is not always sufficient for this purpose. In this and all of the other basic tables, the districts are shown in descending order of size (students in membership as of October 2005). Since the districts are displayed by the number of students, it is easy to note differences in the numbers of teachers, high school completers, and schools as they relate to districts of similar size. For example, the Fairfax County Public Schools, Virginia, though smaller in size, has more high school completers than the six districts immediately preceding it.

Tables A-2, A-3, A-4, A-6, A-8, A-9, and A-12 include only schools with student membership (or regular schools with students, as specified in table A-2 and A-3).<sup>1</sup>

**Table A-2** provides information on school characteristics in the 100 largest school districts by displaying school size (students in membership) at different percentile levels, as well as mean school size for each district (computed using regular schools having membership). For example, in New York City Public Schools, New York, the table shows that the smallest 25 percent of schools have student memberships of 382 or less, while the largest 25 percent have student memberships of 869 or more. Dividing all the students in regular schools in the district by the number of such schools yields a mean, or average, size of 727.8 students. If all the regular schools in New York City Public Schools were listed by size, the school at the midpoint on the list (the median) would have 575 pupils in membership.

**Table A-3** presents median pupil/teacher ratios for the schools in the 100 largest school districts by instructional level. For some districts, data were not computed for some instructional levels because data were missing for more than 20 percent of schools.

**Table A-4** answers the question of how many “primary,” “middle,” and “high” schools there are in the 100 largest school districts. Since nearly every possible grade span is found among the schools in the 100 largest districts, grade spans are defined on the basis of the combination of the school’s lowest and highest grade offered. The following four categories are used: *primary* (lowest grade of prekindergarten to 3; highest grade up to 8), *middle* (lowest grade 4 to 7; highest grade 4 to 9), *high* (lowest grade 7 to 12; highest grade 12), and *other* (all other configurations, including PK, K, or 1 to 12).

**Table A-5** presents the percentage distribution of different types of FTE staff in each district. Teachers represented the largest proportion of staff. “Other staff,” which made up 29 percent of the total, is defined in the appendix C—Glossary.

**Table A-6** reports the number and percentage of Title I eligible schools, the percentage of students in Title I eligible schools, and the percentage of students in Title I school-wide eligible programs. The 2005–06 school year was the eighth year the CCD collected this Title I information. The percentage of schools that were Title I eligible ranged from 6 to 99 percent.

**Table A-7** reports data items that were added in the 1998–99 school year: magnet and charter schools. Among the 100 largest school districts, ninety-one were in states that reported the number of magnet schools or reported that magnet schools did not exist in that state. All districts in states that had charter schools reported the number of charter schools administered by that district. Many charter schools function as their own school districts, which is why a number of the districts in this report do not report any charter schools.

**Table A-8** gives the number of schools in each district in five ranges of percentage of other than White, non-Hispanic student membership, as well as the overall percentage of other than White, non-Hispanic student membership in each

---

<sup>1</sup> Schools with membership are schools that have an enrollment of at least one student. In the Common Core of Data (CCD), schools can be reported legitimately with no student enrollment because students can be included in the enrollment for only a single school. For example, if a student is dually enrolled in a regular school and a vocational school, that student can only be reported in the membership of one of these schools. Total number of schools includes schools with and without membership.

district. For example, in 9,029 schools, more than 80 percent of students were other than White, non-Hispanic. Across all of the 100 largest school districts, 71 percent of students were other than White, non-Hispanic.

Whereas table A-8 deals with the number of schools in each district that have at least one student whose race is other than White, non-Hispanic, **table A-9** presents the percentage of students in each district by specific racial/ethnic categories. This table illustrates that some school districts are made up of many other than White, non-Hispanic groups while others have high concentrations of one other than White, non-Hispanic group. For example, in Los Angeles Unified, California, 73 percent of students are Hispanic and 11 percent are Black, non-Hispanic, whereas in the New York Public Schools, New York, the other than White, non-Hispanic population is more evenly divided between Hispanic and Black, non-Hispanic students (39 and 33 percent, respectively).

Also shown in table A-9 is the percentage of students eligible for free or reduced-price lunch. One district did not report data on the number of students eligible for free or reduced-price lunch and 1 district did not meet reporting standards. Among the 98 of the 100 largest public school districts for which data were available, the percentages of students eligible for free or reduced-price lunch under the National School Lunch Program varied greatly. This percentage ranged from a low of 1 percent in the Brownsville Independent School District, Texas and San Francisco Unified, California to a high of 83 percent in the Dallas Independent School District, Texas.

**Table A-10** presents the numbers of students assigned to the schools in the 100 largest school districts. It should be noted that students attending a “non-regular” school (i.e., special education, vocational education, and other or alternative education school) are often counted at their regular home school rather than the school they attend part of the day. The number and percentage of students having Individualized Education Programs (IEPs), in accordance with the Individuals With Disabilities Education Act, Part B, is also shown in table A-10. Except for IEP data, the student counts presented in this table are aggregated from the school level and may differ from counts presented elsewhere in this report that are derived from the school district level. For example, student counts from the district level could include students enrolled in the district but not assigned to a school (e.g., hospitalized or homebound students).

**Table A-11** presents the number of schools in the 100 largest districts by type of school. All but three of the districts have specialized schools devoted to special, vocational, or alternative education. This table also includes schools that do not have students. Schools may not have students for a variety of reasons, the most common being that the school serves a student population that is counted at another school. For example, students with dual enrollment in a regular school and a vocational education school would be counted in only one of these schools.

**Table A-12** reports the number and percentage of migrant and summer migrant students, as well as the number and percentage of English language learners (ELL, formerly known as limited English proficient, or LEP). Of the 100 largest school districts, 6 did not report the number of migrant students enrolled in the previous year and 1 district reported data that did not meet reporting standards.

**Table A-13** presents the number of high school completers (regular diploma recipients and other completers) in the 100 largest school districts in 2004–05. Note that high school completers are reported on the CCD agency file for the previous year (e.g., 2004–05 high school completers are reported on the 2005–06 agency file). This table also presents the grades 9–12 dropout rate and the public school averaged freshman graduation rate (using diploma recipients only) for each district for 2005–06 (see appendix B—Methodology for a discussion of the calculation of the grades 9–12 dropout rate and the averaged freshman graduation rate).

**Table A-14** deals with school district revenues and expenditures and is based on fiscal year 2005 (school year 2004–05) local government financial data collected by the Governments Division of the U.S. Census Bureau. It presents the amount of revenue received by source (local, state, and federal); current expenditures and those current expenditures for instruction; and current expenditures per pupil in membership for fiscal year 2005. Data for Puerto Rico were obtained from the CCD National Public Education Financial Survey (NPEFS).

Whereas table A-14 deals with the dollar amounts of revenues and expenditures, **table A-15** presents the percentages of revenues by source as well as the percentage of current expenditures spent on instruction. For example, the 100 largest

school districts received 45 percent of their revenues from state sources and spent 53 percent of their current expenditures on instruction.

In **table A-16**, data are given on the number of students assigned to graded (three categories) and ungraded levels. In accounting for their students, 78 of the 100 largest districts assigned all of their students to numbered grades and 21 used the ungraded status for some students in some settings, such as special education, vocational education, and other specialized or alternative education programs. In this table, students assigned to all types of schools are counted in the grade for which they are reported. The student counts presented in this table are aggregated from the school level, and may differ from counts presented elsewhere in this report that are derived from the school district level. For example, student counts from the district level could include students enrolled in the district but not assigned to a school (e.g., hospitalized or homebound students).

Table A-1. Selected statistics for the 100 largest public elementary and secondary school districts in the United States and jurisdictions, by school district: School year 2005–06

Name of reporting district	City	State	County	Number of students <sup>1</sup>	Number of full-time-equivalent (FTE) teachers <sup>2</sup>	Number of 2004–05 completers <sup>3</sup>	Number of schools <sup>4</sup>
<b>Reporting districts<sup>5</sup></b>	<b>†</b>	<b>†</b>	<b>†</b>	<b>11,302,149</b>	<b>690,773</b>	<b>564,823</b>	<b>16,584</b>

— Not available.

† Not applicable.

<sup>1</sup> Count of students receiving educational services from the school district may differ somewhat from the counts in tables A-12 and A-16, which reflect the count of students from the schools aggregated up to the school district.

<sup>2</sup> Full-time equivalent (FTE) is the amount of time required to perform an assignment stated as a proportion of a full-time position. It is computed by dividing the amount of time employed by the amount of time normally required for a full-time position. FTE is not a head count; for example, 2 half-time employees represent 1 FTE.

<sup>3</sup> Includes high school diploma recipients as well as other high school completers (e.g., certificates of attendance), but not high school equivalencies (e.g., GEDs).

<sup>4</sup> Totals for number of schools may differ from published estimates since they exclude closed, inactive, and future schools.

<sup>5</sup> Totals do not include districts where data were not available.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic).

† Not applicable.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). How to read this table: Using the City of Chicago School District 299 as an example, the table shows that the smallest 25 percent of regular schools have a pupil membership of 377 or less, and largest 25 percent have a membership of 822 or more. If all the regular schools in the City of Chicago School District were listed by size, the school at the mid point on the list (the median) would have 574 pupils in membership. Dividing all City of Chicago School District students in regular schools by the number of such schools yields a mean, or average, size of 690.7 students.

— Not available.

† Not applicable.

‡ Reporting standards were not met. Data were missing for more than 20 percent of schools.

<sup>1</sup> Totals do not include districts where data were not available.

<sup>2</sup> Ratio based on data from two distance learning schools. Distance learning schools often have high pupil/teacher ratios.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). Primary = low grade, PK to 3; high grade, up to 8. Middle = low grade, 4 to 7; high grade, 4 to 9. High = low grade, 7 to 12; high grade 12. Other = any other combination, including PK, K, or 1 to 12. Pupil/teacher ratios are calculated using full-time-equivalent (FTE) teachers.

— Not available. District of Columbia did not report staff data for 2005–06.

† Not applicable.

# Rounds to zero.

<sup>1</sup> Full-time equivalent (FTE) is the amount of time required to perform an assignment stated as a proportion of a full-time position. It is computed by dividing the amount of time employed by the amount of time normally required for a full-time position. FTE is not a head count; for example, 2 half-time employees represent 1 FTE.

<sup>2</sup> LEA stands for "Local Education Agency" (a.k.a. "school district").

<sup>3</sup> Totals do not include districts where data were not available.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). Detail may not sum to 100 because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 2005–06, Version 1a.

† Not applicable.

<sup>1</sup> Number of Title I eligible schools includes those with and without schoolwide Title I eligible programs.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). Title I eligible schools and schoolwide eligible programs are defined in the following way in the CCD: Title I school—A school designated under appropriate state and federal regulations as being high poverty and eligible for participation in programs authorized by Title I of P.L. 107-110; Title I schoolwide program—A program in which all the students in a school are designated under appropriate state and federal regulations as being high poverty and eligible for participation in programs authorized by Title I of P.L. 107-110. Only schools with student membership greater than zero are included in this table.

— Not available.

† Not applicable. State does not have legislation authorizing magnet or charter schools.

# Rounds to zero.

<sup>1</sup> A magnet school is a school designed to attract students of different racial/ethnic backgrounds for the purpose of reducing, preventing, or eliminating racial isolation and/or to provide an academic or social focus on a particular theme.

<sup>2</sup> Charter schools are schools that provide free public elementary and/or secondary education to eligible students under a specific charter granted by the state legislature or other appropriate authority and designated by such authority to be a charter school.

<sup>3</sup> Totals do not include those districts where data were not available.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). Table includes only charter schools administered by the school district. Charter schools located in the same geographic area as a district's schools but not administered by the district itself are not included. For example, 52 charter schools were located in the District of Columbia in 2005–06, but each was reported as a separate agency.

† Not applicable.

<sup>1</sup> Puerto Rico reported all students in one category of race/ethnicity.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). This table reports numbers of schools and percentages of students. For example, in New York City Public Schools, 24 schools reported 20 percent or fewer of their students as other than White, non-Hispanic. Across the entire district, 86 percent of students were other than White, non-Hispanic.

— Not available.

† Not applicable.

‡ Reporting standards not met. Data were missing for more than 20 percent of students.

<sup>1</sup> Free and reduced-price lunch totals do not include Puerto Rico. Also, states may not have reported students eligible for reduced-price meals, and a number of states reported participation instead of eligibility data, which may not be strictly comparable. See appendix B—Methodology section for further description. Percentages are based on those schools that reported.

<sup>2</sup> Totals do not include districts where data were not available.

<sup>3</sup> Puerto Rico reported all students in one category of race/ethnicity.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). Detail may not sum to totals because of rounding.

† Not applicable.

<sup>1</sup> Type of school is a mutually exclusive category in the CCD. However, there may be cases in which special education, vocational education, and alternative programs reside in other types of schools.

<sup>2</sup> Student distribution by type of school is based on membership in the schools of the school district. This count may differ somewhat from the count of students receiving educational services from the school district reported in table A-1.

<sup>3</sup> Individualized Education Programs (IEPs) are written instructional plans for students with disabilities designated as special education students under the Individuals With Disabilities Education Act (IDEA, Part B).

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). Types of schools are defined in the following way on the CCD: regular school—a public elementary/secondary school that does not focus primarily on vocational, special, or alternative education; special education school—a public elementary/secondary school that (1) focuses primarily on special education, including instruction for any of the following: hard of hearing, deaf, speech impaired, health impaired, orthopedically impaired, mentally retarded, seriously emotionally disturbed, multihandicapped, visually handicapped, deaf and blind; and (2) adapts curriculum, materials, or instruction for students served; vocational education school—a public elementary/secondary school that focuses primarily on vocational education and provides education and training in one or more semiskilled or technical operations; and alternative education school—a public elementary/secondary school that (1) addresses the needs of students that typically cannot be met in a regular school; (2) provides nontraditional education; (3) serves as an adjunct to a regular school; and (4) falls outside of the categories of regular, special education, or vocational education.

# Rounds to zero.

‡ Reporting standards not met. Data were missing for more than 20 percent of students.

<sup>1</sup> Migrant students include those who were enrolled at any time during the previous (2004–05) regular school year.

<sup>2</sup> Migrant students include those who were served in a summer program immediately prior to the 2005–06 school year.

<sup>3</sup> English language learner (ELL, formerly known as limited English proficient, or LEP). Individuals who (1) were not born in the United States or whose native language is a language other than English; or (2) come from environments where a language other than English is dominant; or (3) are American Indians or Alaskan Natives and who come from environments where a language other than English has had a significant impact on their level of English proficiency; and who, by reason thereof, have sufficient difficulty speaking, reading, writing, or understanding the English language to deny such individuals the opportunity to learn successfully in classrooms where the language of instruction is English or to participate fully in U.S. society.

<sup>4</sup> Totals do not include those districts where data were not available.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). Only schools with student membership greater than zero are included in this table.

— Not available. Alabama did not report diploma recipient or other high school completer data.

† Not applicable.

‡ Reporting standards not met.

<sup>1</sup> Includes high school diploma recipients as well as other high school completers (e.g., certificates of attendance), but not high school equivalencies (e.g., GEDs). Total completers may be different than reported in the CCD state-level file.

<sup>2</sup> The grades 9–12 dropout rate estimates the percentage of public high school students who left high school between the beginning of one school year and the beginning of the next without earning a high school diploma or its equivalent (e.g., a GED) and do not meet any of the following exclusionary conditions: transfer to another public school district, private school, or state- or district-approved education program; temporary absence due to suspension or school-approved illness; or death. The grades 9–12 dropout rate is calculated by dividing the number of grades 9–12 dropouts by the grades 9–12 enrollment. Ungraded enrollment within each agency is redistributed across other grades in proportion to the graded enrollment.

<sup>3</sup> Averaged freshman graduation rate (AFGR) is an estimate of the percentage of an entering freshman class graduating in four years. For 2004–05, it equals the total number of high school diploma recipients in 2004–05 divided by the average membership of the 8<sup>th</sup>-grade class in 2000–01, the 9<sup>th</sup>-grade class in 2001–02, and the 10<sup>th</sup>-grade class in 2002–03. Ungraded students were allocated to individual grades proportional to each state's enrollment in those grades.

<sup>4</sup> Totals do not include districts where data were not available.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). High school completers for each year are reported on the following year's agency file (e.g., 2004–05 completers are reported on the 2005–06 agency file).

† Not applicable.

<sup>1</sup> The student membership obtained from the CCD fiscal district data collection varies slightly from the student membership obtained from the CCD nonfiscal data collection.

<sup>2</sup> Total current expenditures for elementary and secondary education. Excludes capital outlays, interest on debt, payments to private schools, and payments to public charter schools.

<sup>3</sup> Instructional expenditures are current expenditures for activities directly associated with the interaction between teachers and students. These include teacher salaries and benefits, supplies (such as textbooks), and purchased instructional services. New York City Public Schools includes guidance counselor costs in its instructional figures.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). Detail may not sum to totals because of rounding.

# Rounds to zero.

<sup>1</sup> Instructional expenditures are current expenditures for activities directly associated with the interaction between teachers and students. These include teacher salaries and benefits, supplies (such as textbooks), and purchased instructional services. New York City Public Schools includes guidance counselor costs in its instructional figures.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic). Detail may not sum to totals because of rounding.

† Not applicable. For grade range counts, district does not classify students as ungraded.

<sup>1</sup> Student distribution by grade range is based on grade-level membership in the schools of the school district. Grade-level membership may not be available for all students. Therefore, this count may differ from the count of students receiving educational services from the school district reported in table A-1 and from the count of students by type of school reported in table A-10.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic).

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2005–06, Version 1a, and "Local Education Agency Universe Survey," 2005–06, Version 1a.

## Appendix B—Methodology

The source of the data for this report is the 2005–06 Common Core of Data (CCD). Information was reported to NCES by state education agencies in the spring of 2006. There are three nonfiscal CCD surveys that collect basic descriptive data on public education in the nation: the school survey (Public School Universe Survey), local education agency survey (Local Education Agency Universe Survey), and state survey (State Nonfiscal Survey). Fiscal CCD data are gathered at the state level by NCES in the National Public Education Financial Survey (NPEFS) and at the local level in the Annual Survey of Local Government Finances (F-33 series of the Census of Local Governments) conducted by the Governments Division of the U.S. Census Bureau. The most recent fiscal year for which data are available is 2005. Puerto Rico fiscal data were taken from the fiscal year 2005 NPEFS.

CCD data are provided by a CCD Coordinator in each of the 50 states, the District of Columbia, Puerto Rico, the Bureau of Indian Education, the Department of Defense dependents schools (overseas and domestic), and four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands). Data for all of these states and jurisdictions are included in this report. If a data item is marked “data not available,” it indicates the state or jurisdiction did not report the data item in its CCD submission.

Districts represented in this report have various sizes and geographic locations. The District of Columbia, Hawaii, and Puerto Rico are each administered as one school district. Some districts comprise a substantial portion of a state’s total student membership, while others make up only a small fraction of membership.

### ***Data Quality***

CCD data are reported by state education agencies (SEAs) for individual schools and districts within the state, as well as for the state as a whole. Staff at NCES and its collection agent, the U.S. Census Bureau, work with the SEAs to clean and edit the data. State CCD coordinators correct or confirm any numbers that are challenged in the NCES edits. NCES accepts the states’ responses to these edit questions; however, in a limited number of situations, if the SEA does not provide NCES with the explanation or new data for an item, NCES will suppress or edit the data.

NCES challenges SEA data under several circumstances. Some examples of edits include numbers appearing out of range when compared to national averages, the previous year’s data, or internal state reports. If a response is logically impossible, NCES will consult with the state and replace the response with a logically acceptable alternative. In the 2005–06 CCD, one of the 100 largest districts was reported as having either all or none of their schools Title I eligible. These numbers appeared implausible when the percent of Title I eligible schools for each of the 100 largest districts was compared with 2004–05 reports. Consultation with the state CCD Coordinator confirmed that these numbers were incorrect, and the values were changed to “not available.” As another example of an edit, if a reported total is less than the sum of the detail comprising that total, the total will be changed to the sum of the detail. Missing data at the state level are imputed to support reporting national totals for the reporting year. Data may also be adjusted for confidentiality.

### ***Item Nonresponse***

Some items were not available at the school district level. The following items describe nonresponse in the CCD school and agency universe surveys that affected the information presented in this report:

- no staff counts for the District of Columbia;
- no data on magnet schools for Maryland, Nevada, or Puerto Rico.
- no data on free and reduced-price lunch eligibility for Puerto Rico;
- no school-year or summer migrant data for Puerto Rico, no school-year migrant data for Kentucky or Virginia, and no summer migrant data for New York, Ohio, Tennessee, Texas, or Utah;
- no English language learner (ELL) data for Illinois, Pennsylvania, Puerto Rico, or Tennessee;

- no diploma recipient or other high school completer data for Alabama;
- no dropout data for the District of Columbia.

***High School Completers, Grades 9–12 Dropout Rate, and Averaged Freshman Graduation Rate***

This report presents counts of high school completers, the grade 9–12 dropout rate, and an averaged freshman graduation rate. The term “high school completer” includes both diploma recipients and other high school completers, but not high school equivalency recipients. The averaged freshman graduation rate only includes diploma recipients; it does not include other high school completers or those receiving a GED-based equivalency credential.

*Diploma Recipients.* These are individuals who are awarded, in a given year, a high school diploma or a diploma that recognizes some equivalent level of academic achievement. They can be thought of as students who meet or exceed the coursework and performance standards for high school completion established by the state or other relevant authorities.

*Other High School Completers.* These individuals receive a certificate of attendance or some other credential in lieu of a diploma. Students awarded this credential typically meet requirements that differ from those for a high school diploma. Some states do not issue an “other high school completion” type of certificate, but award all students who complete school a diploma regardless of what academic requirements the students have met. In order to make data as comparable as possible across states, this report includes both regular and other diploma recipients in its total number of high school completers. High school equivalency recipients are not included.

*Exclusion of High School Equivalency Recipients.* High school equivalency recipients are awarded a credential certifying that they have met state or district requirements for high school completion by passing an examination or completing some other performance requirement. High school equivalency diplomas are considered valid completion credentials, but high school equivalency recipients are not included in the total number of completers, for two reasons. First, high school equivalency recipients are reported on the CCD only at the state level and cannot be disaggregated to the district level. Second, not all states report high school equivalency counts on the CCD, and the statistic is therefore not comparable across states.

*Grades 9–12 dropout rate.* The grades 9–12 dropout rate estimates the percentage of public high school students who left high school between the beginning of one school year and the beginning of the next without earning a high school diploma or its equivalent (e.g., a GED) and do not meet any of the following exclusionary conditions: transfer to another public school district, private school, or state- or district-approved education program; temporary absence due to suspension or school-approved illness; or death. It is calculated by the following method:

$$Rg = Dg/Eg$$

where  $Rg$  = the grades 9–12 dropout rate (rounded to a single decimal place),  $Dg$  = the number of grades 9–12 dropouts, and  $Eg$  = the grades 9–12 enrollment. Ungraded enrollment within each agency is redistributed across other grades in proportion to the graded enrollment.

*Averaged freshman graduation rate (AFGR).* The averaged freshman graduation rate provides an estimate of the percentage of high school students who graduate on time (i.e., within 4 years of entering 9<sup>th</sup> grade for the first time). The rate uses aggregate student enrollment data (to estimate the size of an incoming freshman class) and aggregate counts of the number of diplomas awarded 4 years later. The incoming freshman class size is estimated by summing the enrollment in 8<sup>th</sup> grade in one year, 9<sup>th</sup> grade for the next year, and 10<sup>th</sup> grade for the year after and then dividing by three. The averaging is intended to account for higher grade retentions in the 9<sup>th</sup> grade compared with 8<sup>th</sup> and 10<sup>th</sup> grades. Ungraded students reported to the CCD were prorated into the individual grade enrollment counts. Thus

$$\text{AFGR} = \left\{ \frac{\text{Diploma recipients in 2004–05}}{(\text{8}^{\text{th}} \text{ grade enrollment in 2000–01} + \text{9}^{\text{th}} \text{ grade enrollment in 2001–02} + \text{10}^{\text{th}} \text{ grade enrollment in 2002–03}) / 3} \right\} * 100.$$

**More Information on CCD Methodology**

*New York City Public Schools, New York.* New York did not report the New York City Public Schools as a single district in 2005–06. The state reported a total of 34 geographic districts comprising what had been the New York City Public Schools in previous years. For this report, data for the 34 geographic districts were aggregated to provide data for the New York City Public Schools, New York district.

For more information on CCD universe surveys and response rates, see Numbers and Types of Public Elementary and Secondary Schools From the Common Core of Data: School Year 2005–06 (Hoffman 2007a), Numbers and Types of Public Elementary and Secondary Education Agencies From the Common Core of Data: School Year 2005–06 (Hoffman 2007b) and Public Elementary and Secondary School Student Enrollment, High School Completions, and Staff From the Common Core of Data: School Year 2005–06 (Sable and Garofano 2007). These reports discuss missing data and data quality and present state totals for CCD data items from the school, agency, and state surveys. They include state-idiosyncratic treatment of charter and magnet schools as well as schools and districts with no student membership.

## Appendix C—Glossary

**alternative education school**—A public elementary/secondary school that (1) addresses needs of students that typically cannot be met in a regular school, (2) provides nontraditional education, (3) serves as an adjunct to a regular school, or (4) falls outside the categories of regular, special education, or vocational education.

**American Indian/Alaska Native**—A person having origins in any of the original peoples of North America and who maintains cultural identification through tribal affiliation or community recognition.

**Asian/Pacific Islander**—A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa. Includes Native Hawaiian.

**averaged freshman graduation rate (AFGR)**—An estimate of the percentage of an entering high school class that graduates on time. See Appendix B—Methodology for more information.

**Black**—A person having origins in any of the black racial groups of Africa.

**Bureau of Indian Education schools and districts**—A school or district that is directly funded by the Bureau of Indian Affairs, U.S. Department of the Interior.

**charter school**—A school that provides free public elementary and/or secondary education to eligible students under a specific charter granted by the state legislature or other appropriate authority, and designated by such authority to be a charter school. Charter schools can be administered by regular school districts, state education agencies, or chartering organizations. They are reported on the CCD by the type of district that administers them.

**current expenditures**—Funds spent operating local public schools and local education agencies, including such expenses as salaries for school personnel, student transportation, school books and materials, and energy costs, but excluding capital outlay, interest on school debt, payments to private schools, and payments to public charter schools.

**diploma, high school**—A formal document certifying the successful completion of a secondary school program prescribed by the state education agency or other appropriate body

**English language learner (ELL)**—An individual who (1) was not born in the United States or whose native language is a language other than English; or (2) comes from environments where a language other than English is dominant; or (3) is an American Indian or Alaska Native and who comes from environments where a language other than English has had a significant impact on their level of English language proficiency; and (3) who, by reason thereof, has sufficient difficulty speaking, reading, writing, or understanding the English language to deny such individual the opportunity to learn successfully in classrooms where the language of instruction is English or to participate fully in the larger U.S. society.

**federal revenues**—Include direct grants-in-aid to schools or agencies, funds distributed through a state or intermediate agency, and revenues in lieu of taxes to compensate a school district for nontaxable federal institutions within a district's boundary.

**free and reduced-price lunch eligible**—Number of students who are eligible for the Free and Reduced-Price Lunch Program under the National School Lunch Act. In any school that reported 100 percent eligible students, the number is adjusted to prevent the identification of any individual student. Caution

should be used when interpreting these data. Three states did not report free and reduced-price lunch eligibility, and others may not have included reduced price lunch students or may have reported participation instead of eligibility data.

**full-time equivalent (FTE)**—The amount of time required to perform an assignment stated as a proportion of a full-time position. It is computed by dividing the amount of time employed by the amount of time normally required for a full-time position. FTE is not a head count; for example, 2 half-time employees represent 1 FTE.

**grades 9–12 dropout rate**—The grades 9–12 dropout rate estimates the percentage of public high school students who left high school between the beginning of one school year and the beginning of the next without earning a high school diploma or its equivalent (e.g., a GED) and do not meet any of the following exclusionary conditions: transfer to another public school district, private school, or state- or district-approved education program; temporary absence due to suspension or school-approved illness; or death. See Appendix B—Methodology for more information.

**guidance counselors**—Professional staff assigned specific duties and school time for counseling students and parents, addressing learning problems, evaluating student abilities, and assisting students in career and personal development.

**high school completers**—Students who completed the course of public elementary and secondary education offered by the school district and who received a high school diploma, or who met other requirements of completion as defined by state law or policy during the period October 2004 through September 2005. Does not include high school equivalency recipients.

**Hispanic**—A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

**Individualized Education Program (IEP)**—As used here, refers to a written instructional plan for students with disabilities designated as special education students under the Individuals With Disabilities Education Act (IDEA, Part B). Each plan includes a (1) statement of the child’s present levels of educational performance, (2) statement of annual goals, including short-term instructional objectives, (3) statement of specific educational services to be provided and the extent to which the child will be able to participate in regular educational programs, (4) projected date for initiation and anticipated duration of services, and (5) appropriate objectives, criteria, and evaluation procedures and schedules for determining, on at least an annual basis, whether instructional objectives are being achieved.

**instructional expenditures**—Current expenditures for activities directly associated with the interaction between teachers and students, including teacher salaries and benefits, supplies (such as textbooks), and purchased instructional services.

**instructional support staff**—Includes instructional coordinators and supervisors and instructional aides.

**library/media staff**—Professional staff members who are assigned specific duties and school time for professional library and media service activities. Includes library/media specialists and support staff.

**local education agency (LEA)**—A government agency administratively responsible for providing public elementary and/or secondary instruction or educational support services.

**local education agency (LEA) (district) administrators**—Local education agency superintendents, deputy and assistant superintendents, and other persons with district-wide responsibilities such as business managers and administrative assistants.

**local revenues**—Include revenues from such sources as local property and nonproperty taxes, investments, and student activities such as textbook sales, transportation and tuition fees, and food service revenues.

**magnet school**—Regardless of the source of funding, a magnet school or program is a special school or program designed to attract students of different racial/ethnic backgrounds for the purpose of reducing, preventing, or eliminating racial isolation and/or to provide an academic or social focus on a particular theme.

**migrant students**—A migrant student as defined under 34 CFR 200.81:

- A. is younger than 22 (and has not graduated from high school or does not hold a high school equivalency certificate); and
- B. is a migrant agricultural worker or a migrant fisher or has a parent, spouse, or guardian who is a migrant agricultural worker or a migrant fisher; and
- C. performs, or has a parent, spouse, or guardian who performs qualifying agricultural or fishing employment as a principal means of livelihood; and
- D. has moved within the preceding 36 months to obtain or to accompany or join a parent, spouse, or guardian to obtain, temporary or seasonal employment in agricultural or fishing work; and
- E. has moved from one school district to another; or in a state that is composed of a single school district, has moved from one administrative area to another within such district; or resides in a school district of more than 15,000 square miles, and migrates a distance of 20 miles or more to a temporary residence to engage in a fishing activity. (Provision E currently applies only to Alaska.)

**other staff**—Includes support staff for local education agencies, schools, student support services and other areas, such as data processing, health, and transportation.

**outlying areas**—Include: American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands.

**per-pupil expenditures**—Current expenditures for public elementary and secondary education in a state divided by the student membership. The numbers reported here, based on membership, can be expected to be smaller than per-pupil expenditures based on average daily attendance because membership counts are generally larger than average daily attendance.

**public school**—An institution that provides educational services and has the following characteristics:

- has one or more grade groups (prekindergarten through grade 12) or is ungraded;
- has one or more teachers to give instruction;
- is located in one or more buildings or sites;
- has an assigned administrator;
- receives public funds as primary support; and
- is operated by an education agency.

**pupil/teacher ratio**—The ratio of pupils to teachers in a school district, based on the total number of pupils (student membership) and the total full-time-equivalent (FTE) number of teachers reported in the schools associated with the school district. The pupil/teacher ratio does not represent class size, but rather is a district-level measure of pupils and teachers.

**pupils in membership**—Count of all students whose names have been entered on the roll, minus those whose names have been withdrawn, on or before the closest school day to October 1. Membership counts at the district level may include students for whom the district is providing educational services through some other agency or institution.

**regular school**—A public elementary/secondary school that does not focus primarily on vocational, special, or alternative education. It is possible for a regular school, as it is for a vocational, special, or alternative education school, to have no students in membership.

**regular school district**—Agency responsible for providing free public education for school-age children residing within its jurisdiction. This category excludes local supervisory unions that provide management services for a group of associated school districts; regional education service agencies that typically provide school districts with research, testing, and data processing services; state and federally operated school districts; and other agencies that do not fall into these groupings.

**revenues**—Additions to assets that do not incur an obligation that must be met at some future date, do not represent exchanges of fixed assets, and are available for expenditure by the local education agencies in the state. Revenues include funds from local, intermediate, state, and federal sources.

**school administrators**—Staff members whose activities are concerned with directing and managing the operation of a particular school.

**schools having membership**—Schools at which students are counted for administrative purposes, even though the students may attend one or more other schools for all or part of their school day.

**special education school**—A public elementary/secondary school that (1) focuses primarily on special education, including instruction for any of the following: hard of hearing, deaf, speech impaired, health impaired, orthopedically impaired, mentally retarded, seriously emotionally disturbed, multi-handicapped, visually handicapped, deaf and blind; and (2) adapts curriculum, materials, or instruction for students served.

**state revenues**—Includes both direct funds from state governments and funds in lieu of taxation. Revenues in lieu of taxes are paid to compensate a school district for nontaxable state institutions or facilities within the district's boundary.

**teacher**—A professional school staff member who instructs students and maintains daily student attendance records.

**Title I eligible school**—A Title I school is a school designated under appropriate state and federal regulations as being high poverty and eligible for participation in programs authorized by Title I of P.L. 107-110.

**Title I schoolwide eligible**—A program in which all the students in a school are designated under appropriate state and federal regulations as eligible for participation in programs authorized by Title I of P.L. 107-110.

**vocational education school**—A public elementary/secondary school that focuses primarily on vocational, technical, or career education, and provides education and training in one or more semiskilled or technical occupations.

**White**—A person having origins in any of the original peoples of Europe, North Africa, or the Middle

Page intentionally left blank.

## Appendix D—Supplementary Tables

**Tables D-1 and D-2** present data on the 2005–06 school year. Table D-1 presents the mailing addresses and phone numbers of the 500 largest school districts by rank according to membership size. Table D-2 is an alphabetic listing of the 500 largest school districts.

**Table D-3** presents data on the 2005–06 school year. This table presents a count of the 100 largest school districts by state.

**Table D-4** presents data for the 1995–96 school year. This table presents the name, city, state and county of the 100 largest districts, as well as the number of students, teachers, completers, and schools.

Table D-1. The 500 largest public school districts in the United States and jurisdictions, by school district: School year 2005–06

Rank	Students	Agency name	Mailing address	City	State	ZIP	Schools <sup>1</sup>	Telephone

Alpine School District	American Fork	UT	Utah	42,763	16,925	2,709	48
St. Paul <sup>5</sup>	St. Paul	MN	Ramsey	42,520	—	1,533	142

— Not available.

† Not applicable.

<sup>1</sup> Full-time equivalent (FTE) is the amount of time required to perform an assignment stated as a proportion of a full-time position. It is computed by dividing the amount of time employed by the amount of time normally required for a full-time position. FTE is not a head count; for example, 2 half-time employees represent 1 FTE.

<sup>2</sup> Includes high school diploma recipients as well as other high school completers (e.g., certificates of attendance), but not high school equivalencies (e.g., GEDs).

<sup>3</sup> Totals for number of schools may differ from published estimates since they exclude closed schools.

<sup>4</sup> Totals do not include districts where data were not available.

<sup>5</sup> School district was no longer among the 100 largest school districts in the 2005–06 school year.

NOTE: Data include all 50 states, the District of Columbia, Puerto Rico, four outlying areas (American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the U.S. Virgin Islands), the Bureau of Indian Education, and the Department of Defense dependents schools (overseas and domestic).
