## About Cascadia Community College

Cascadia is the newest community college in Washington State. It is a public institution offering 2-year degrees and is located on a 128-acre campus shared with the University of Washington, Bothell, where 58 acres of campus are currently being restored to high-functioning wetlands, similar to those found on the site 200-300 years ago. It is the largest wetlands restoration project ever accomplished in Washington.

Cascadia's degrees include an associate degree in integrated studies (AIS), an associate in science (AS) and an associate in applied science (AAS). The AIS is a good match for students looking to pursue a variety of liberal arts majors after transferring to a university, and the AS is ideal for students planning to pursue majors in the natural sciences, pre-med, engineering, or computer science.
