

### 2009 Science Assessment Content

Guided by a new framework, the NAEP science assessment was updated in 2009 to keep the content current with key developments in science, curriculum standards, assessments, and research. The 2009 framework organizes science content into three broad content areas.

**Physical science** includes concepts related to properties and changes of matter, forms of energy, energy transfer and conservation, position and motion of objects, and forces affecting motion.

**Life science** includes concepts related to organization and development, matter and energy transformations, interdependence, heredity and reproduction, and evolution and diversity.

**Earth and space sciences** includes concepts related to objects in the universe, the history of the Earth, properties of Earth materials, tectonics, energy in Earth systems, climate and weather, and biogeochemical cycles.

The 2009 science assessment was composed of 143 questions at grade 4, 162 at grade 8, and 179 at grade 12. Students responded to only a portion of the questions, which included both multiple-choice questions and questions that required a written response.

### Compare the Average Score in 2009 to Other States/Jurisdictions

□ District of Columbia  
■ DoDEA<sup>1</sup>

<sup>1</sup> Department of Defense Education Activity (overseas and domestic schools).

In 2009, the average score in **Hawaii** was

- lower than those in 41 states/jurisdictions
- higher than that in 1 state/jurisdiction
- not significantly different from those in 4 states/jurisdictions
- 5 states/jurisdictions did not participate

### Overall Results

- In 2009, the average score of eighth-grade students in Hawaii was 139. This was lower than the average score of 149 for public school students in the nation.
- The percentage of students in Hawaii who performed at or above the NAEP *Proficient* level was 17 percent in 2009. This percentage was smaller than the nation (29 percent).
- The percentage of students in Hawaii who performed at or above the NAEP *Basic* level was 50 percent in 2009. This percentage was smaller than the nation (62 percent).

### Achievement-Level Percentages and Average Score Results

\* Significantly different ( $p < .05$ ) from Hawaii. Significance tests were performed using unrounded numbers.  
# Rounds to zero.

NOTE: The percentage at *Advanced* was higher in the Nation (1.40) than in Hawaii (0.32). Detail may not sum to totals because of rounding.

### Results for Student Groups in 2009

Reporting Groups	Percent of students	Avg. score	Percentages at or above		Percent at Advanced
			Basic	Proficient	
<b>Gender</b>					
Male	51	140	53	19	1
Female	49	137	48	15	#
<b>Race/Ethnicity</b>					
White	14	153	68	30	#
Black	3	133	45	15	#
Hispanic	3	148	62	25	1
Asian/Pacific Islander	68	136	46	14	#
American Indian/Alaska Native	#	‡	‡	‡	‡
<b>National School Lunch Program</b>					
Eligible	41	127	36	9	#
Not eligible	59	147	60	23	#

# Rounds to zero.

‡ Reporting standards not met.

NOTE: Detail may not sum to totals because of rounding, and because the "Information not available" category for the National School Lunch Program, which provides free/reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed.

### Score Gaps for Student Groups

- In 2009, male students in Hawaii had an average score that was higher than female students.
- In 2009, Black students had an average score that was 20 points lower than White students. This performance gap was narrower than the nation (36 points).
- In 2009, Hispanic students had an average score that was 5 points not significantly different from White students. This performance gap was narrower than the nation (30 points).
- In 2009, students who were eligible for free/reduced-price school lunch, an indicator of low family income, had an average score that was 20 points lower than students who were not eligible for free/reduced-price school lunch. This performance gap was narrower than the nation (28 points).
