## EXECUTIVE SUMMARY

The state-administered grant program authorized under the Adult Education and Family Literacy Act (AEFLA), enacted as Title II of the Workforce Investment Act (WIA) of 1998, is the major source of federal support for adult basic and literacy education programs. The purpose of the grant is to provide educational opportunities to adults sixteen and older, not currently enrolled in school, who lack a high school diploma or the basic skills to function effectively in society, or who are unable to speak, read, or write the English language.

When AEFLA was reauthorized in 1998, Congress made accountability for results a central focus of the new law, setting out new performance accountability requirements for states and local programs that measure program effectiveness on the basis of student academic achievement and employment related outcomes. To define and implement the accountability requirements of AEFLA, the U.S. Department of Education's Office of Vocational and Adult Education (OVAE) established the National Reporting System (NRS).

To monitor data collection procedures and to promote data quality improvement, OVAE developed data quality standards to clarify the policies, processes, and materials the states and local programs should have in place to collect valid and reliable data. To assist states in meeting the standards, OVAE has provided resources, training, and technical assistance activities to improve data quality. OVAE has provided individual technical assistance to states on NRS implementation, published documents further refining NRS requirements, including guidelines for conducting follow-up surveys. Since 2001, OVAE has made available online training resources to states and local providers.

States continue to make improvements to their data collection systems and procedures, moving away from reliance on individual student survey methodologies to collect and report performance on the employment-related and postsecondary outcomes. The use of administrative records to identify post-program outcomes (i.e., consulting unemployment insurance wage records or other state agency administrative records) is becoming more prevalent, and states are also improving their assessment methods for measuring educational gain. Due to the requirements for certifying data quality through the use of a data quality checklist, more states are improving their local data collection systems.

In program year (PY) 2002–2003, the program enrolled 2,736,192 learners, of which just under 40 percent were enrolled in Adult Basic Education, 18 percent were enrolled in Adult Secondary Education, and 43 percent were enrolled in English Literacy programs.

Below is a summary table providing a comparison of actual performance on each of the core measures for adult education for the first three years under the NRS. The data show a steady, modest increase in educational gain (2–4 percentage points over three years), high school completion (11 points), and postsecondary transition (5 points). The data reveal a more significant gain for the two employment measures, entering and retaining employment (6 and 7 points, respectively).

## Actual Performance on Core Measures

### National Totals 2000–01, 2001–02, and 2002–03

<b>Actual Performance: 2000–2001, 2001–2002, and 2002–2003</b>

## INTRODUCTION

Adult education programs meet a critical need in our nation to improve the literacy skills of adults and enhance their ability to be more productive members of society and the workforce. The Adult Education and Family Literacy Act (AEFLA), enacted as Title II of the Workforce Investment Act (WIA) of 1998, is the principal source of federal support for adult basic skills programs. The purpose of the program, as defined in AEFLA, is to:

- Assist adults to become literate and obtain the knowledge and skills necessary for employment and self-sufficiency;
- Assist adults who are parents to obtain the educational skills necessary to become full partners in the educational development of their children; and
- Assist adults in the completion of a secondary school education.

The purpose of the state-administered grant program is to provide educational opportunities for adults sixteen and older, not currently enrolled in school, who lack a high school diploma, the basic skills, or the ability to function effectively in the workplace or in their daily lives. These state grants are allocated by formula based upon the number of adults sixteen and over who are not enrolled or required to be enrolled in secondary school and who do not have a secondary school credential. This data is drawn from the U.S. Census on Population and Housing as required by WIA, Title II.

The federal allocation for AEFLA grants to states for Program Year (PY) 2002–2003 (or Fiscal Year 2002) was \$564,833,768. Nationally, this amount represented approximately 25 percent of the total amount expended at the state and local levels to support adult education and literacy in PY 2002–2003. States distribute 82.5 percent of the federal funds competitively, using 12 quality criteria identified in the law, to local adult education providers. The provider network includes a variety of local agencies – local educational agencies, community colleges, community-based organizations, and volunteer literacy organizations. Many adult education programs also work with welfare agencies at the state and local level to provide instruction to adults needing basic skills who are receiving Temporary Assistance for Needy Families (TANF) benefits. In addition, adult education supports adults in job training programs through partnerships with One Stop Career Centers and other job training programs in the community.

Courses of instruction offered by local providers include:

- Adult Basic Education (ABE), instruction in basic skills designed for adults functioning at the lower literacy levels to just below the secondary level;

- Adult Secondary Education (ASE), instruction for adults whose literacy skills are at approximately the high school level, and who are seeking to pass the General Educational Development (GED) tests or obtain an adult high school credential; and
- English Literacy (EL), instruction for adults who lack proficiency in English and who seek to improve their literacy and proficiency in English.

In PY 2002–2003, the program enrolled 2,736,192 learners, of which just under 40 percent were enrolled in Adult Basic Education, 18 percent were enrolled in Adult Secondary Education, and 43 percent were enrolled in English Literacy programs, as shown in Table 1, below.

**Table 1**

**Enrollment by Program Area, PY 2002–2003**

---

<b>Program Area</b>	<b>Enrollment</b>	<b>Percent of Total Enrollment</b>
Adult Basic Education	1,081,392	39.5%
Adult Secondary Education	479,269	17.5%
English Literacy	1,175,531	43.0%
<b>Total</b>	<b>2,736,192</b>	

Table 2 shows the percent of learners in the three program areas by age and Table 3 shows the ethnic composition of learners by age.

## Accountability System – The National Reporting System

Since Program Year 2000, the National Reporting System (NRS) has been the accountability system for the adult education program. Each state has established a performance accountability system that meets NRS requirements and NRS data are the basis for assessing the effectiveness of states in achieving continuous improvement of adult education and literacy activities to optimize the return on investment of federal funds [P.L. 105-220 Section 212(a)]. The NRS includes three core indicators, identified in AEFLA, that are used to assess state performance:

- Demonstrated improvements in the literacy skill levels in reading, writing and speaking English, numeracy, problem-solving, English language acquisition, and other literacy skills;
- Placement in, retention in, or completion of postsecondary education, training, unsubsidized employment, or career advancement; and
- Receipt of a secondary school diploma or a recognized equivalent [P.L. 105-220, Section 212(b)(2)].

These indicators are embodied in the five basic core measures of the NRS:

- **Educational Gain** – The percentage of adult learners in basic and English literacy programs who acquire the basic or English language skills needed (validated through standardized assessment) to complete the educational functioning level in which they were initially enrolled.

To measure educational gain, the NRS established a hierarchy of six educational functioning levels from beginning literacy through high school-level completion, and six levels for English literacy, from beginning literacy level to high advanced. The levels are defined through reading, writing, numeracy, functional and workplace skills (and, for English literacy, speaking and listening skills) at each level. Included for each level is a corresponding set of benchmarks on commonly used standardized assessments, such as the Test of Adult Basic Education (TABE) and the Comprehensive Adult Student Assessment System (CASAS), as examples of how students functioning at each level would perform on these tests.

- **High School Completion** – The percentage of adult learners with a high school completion goal who earned a high school diploma or recognized equivalent.
- **Entered Postsecondary Education** – The percentage of adult learners who establish a goal to continue their education at the postsecondary level and who entered postsecondary education or training after program exit.

- **Entered Employment** – The percentage of unemployed adult learners (in the workforce) with an employment goal who obtained a job within one quarter after program exit.
- **Retained Employment** – The percentage of adult learners with a job retention goal who (a) entered employment within one quarter after exiting and (b) were still employed in the third quarter after program exit.

States also may identify additional performance indicators for adult education and literacy activities and incorporate these indicators, as well as corresponding annual levels of performance, in their state plans.

### Setting Performance Benchmarks

The Adult Education and Family Literacy Act requires that states work with OVAE to determine the levels of performance for the core measures that become baseline performance levels for subsequent decisions related to federal incentives. States that exceed the agreed upon performance levels may be eligible for incentive awards. To qualify for an incentive award, a state must exceed performance levels for Title I and Title II of the Workforce Investment Act as well as for the Carl D. Perkins Vocational and Technical Education Act.

The determination of whether a state has exceeded its adjusted levels of performance is based on the state's cumulative achievement across all measures. This is done by calculating the percent of the state adjusted level achieved for each measure, and then averaging the percent achieved across all measures. When the cumulative average exceeds 100 percent, the state will be determined to have exceeded the overall adjusted performance levels.

WIA section 503 indicates that incentive awards are to be issued in an amount not less than \$750,000 and not more than \$3,000,000, to the extent that funds are available; otherwise, prorated amounts are to be awarded. In PY 2002–2003, forty-seven states exceeded their adult education performance levels. Twenty-three of those states also exceeded WIA Title I and Perkins performance levels and qualified to receive a share of the \$25.4 million available for incentive awards for PY 2002–2003. The twenty-three states were: Alabama, Colorado, Florida, Georgia, Iowa, Illinois, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Missouri, Mississippi, Montana, North Carolina, North Dakota, Nebraska, New Hampshire, Oklahoma, Oregon, South Dakota, Tennessee, and Texas. In PY 2002–2003, AEFLA funds for the incentive grants were \$10,100,151, Perkins funds were \$6,437,880, and WIA (Title I) were \$7,922,000.

Table 4 identifies the core outcome measures and the number of states that met, exceeded, or did not meet their performance targets on the outcome measures for PY 2002–2003. Forty-three

states met or exceeded the average performance targets negotiated for the basic literacy sub-measures for educational gain, while nine states did not meet their negotiated targets. Forty states met or exceeded the average performance targets negotiated for the English literacy (English language acquisition) sub-measures for educational gain, while twelve states did not meet their targets. Forty states met or exceeded their targets for the high school completion measure, and forty-six states met or exceeded their performance targets for transitioning into postsecondary education or training. Forty-six states met or exceeded their performance targets for the employment measure, and forty-one states met or exceeded their job retention targets.

**Table 4**

**States Meeting/Not Meeting Performance Targets for Core Performance Measures**

Core Performance Measures						
Core Measures	Educational Gain		High School Completion	Transition Post-Secondary Education	Entered Employment	Retained Employment
Sub-Measures	Basic Literacy Skills	English Literacy Skills				
Number of States Meeting/Exceeding Targets	43*	40*	40	46	46	41
Number of States Not Meeting/Exceeding	9	12	12	6	6	11
Number of States Reporting	52	52	52	52	52	52

\* The average performance of all sub-measures exceeded the average performance targets for all sub-measures.

**Measuring Educational Gain**

Under the NRS, each state must establish standardized assessment procedures local programs must use, first at intake, to identify an adult learner’s educational functioning level and then, after a period of instruction, to measure educational gain (level advancement). States are free to use the assessments that best address the needs of their students and delivery system, but they must use *standardized* assessments. Consequently, each state assesses students somewhat differently, using different assessments and posttests of students at different times. The most frequently used assessments are the Test of Adult Basic Education (TABE), Comprehensive Adult Student Assessment System (CASAS) and the Basic English Skills Test (BEST or BEST Plus), the last used exclusively with English Literacy learners.

The following tables identify the number and percentage of adults enrolled in each of the educational levels in the ABE, ASE, and EL programs. The enrollment figures represent initial student placement based on standardized tests administered at program entry. Within ABE/ASE, the majority of students (46 percent) fall within the intermediate level, while for English literacy the

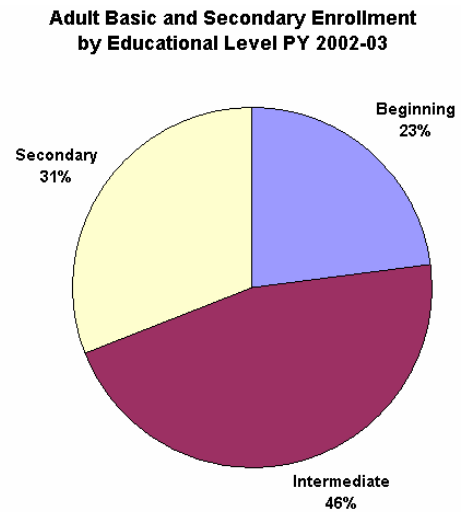

majority (52 percent) are within the beginning level. Secondary (ASE) or advanced (EL) levels comprise 31 and 15 percent, respectively.

**Table 5**

**Adult Basic and Secondary Education by Educational Level**

<b>ABE/ASE Level*</b>	<b>Number Enrolled</b>	<b>Percent Enrolled</b>
Beginning Literacy	162,013	10
Beginning	204,429	13
Low Intermediate	307,380	20
High Intermediate	407,570	26
Low Adult Secondary	295,615	19
High Adult Secondary	183,654	12
<b>Total</b>	<b>1,560,661</b>	

\* Grade Level Equivalent –2 years

**Table 6**

**English Literacy Enrollment by Educational Level**

<b>EL Level</b>	<b>Number Enrolled</b>	<b>Percent Enrolled</b>
Beginning Literacy	266,703	22.7
Beginning	341,478	29.0
Low Intermediate	237,940	20.2
High Intermediate	153,718	13.1
Low Advanced	131,995	11.2
High Advanced	43,697	3.7
<b>Total</b>	<b>1,175,531</b>	

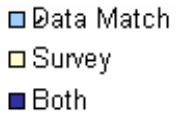

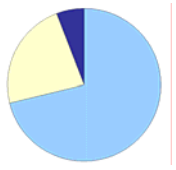

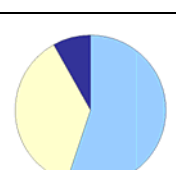

## Collecting Follow-up Measures

The four follow-up outcome measures need only be collected for students who identified the outcomes as a goal for attending and who left the program within this reporting period, July 1, 2002, through June 30, 2003. States may collect these measures through the use of administrative records or through a follow-up survey. The use of administrative records is clearly preferred because of its greater accuracy and lower cost and is possible in most states for the high school completion measure. In PY 2002–2003, 37 states used administrative records to determine student outcomes for high school completion and 3 additional states supplemented administrative records with surveys. For the employment measures, consulting state unemployment insurance (UI) wage records is the most efficient, accurate, and cost-effective approach to determine the post-program employment outcomes. However, not all states have the capability to use the UI system due to data privacy issues or technical problems within their states. Nonetheless, there was a significant improvement for PY 2002–2003 in the number of states using the UI wage records to validate employment, with 28 states using this method solely (compared to 22 states in PY 2001) and an additional 4 states using this method in combination with surveys. For entrance to postsecondary education, there are few comprehensive databases available to states for measuring postsecondary enrollment. Consequently, most states must use individual student surveys to collect some or all of the follow-up measures. Table 7 identifies how states currently collect data for the four follow-up measures.

**Table 7**

**Number of States Using Data Collection Methods for Follow-up Measures**

Measure	Data Collection Method			
	Administrative Records/ Data Matching	Survey	Both	
Obtained High School Diploma or Passed GED	37	12	3	
Entered Postsecondary Education	18	26	8	
Entered Employment	28	20	4	
Retained Employment	28	20	4	

**FEDERAL INVESTMENTS TO IMPROVE PROGRAM DATA AND ACCOUNTABILITY**

Through the NRS project, OVAE has provided states with training and technical assistance to improve the quality and use of NRS data. This assistance has also included the development of guidebooks that helped states implement the NRS requirements and provided additional instruction on conducting follow-up surveys and other data quality issues. Over the last three years, OVAE has also made training resources available online. To monitor improvements in data quality, OVAE has continued to use state NRS data quality standards, which identify the policies, processes and materials that states and local programs should have in place to collect valid and reliable data. The

standards define quality data policies and procedures and also provide guidance to states on how to improve their systems.

## Federal Assistance in PY 2002

In PY 2002, OVAE promoted improvement in the quality and use of state NRS data through resources and providing state training. The NRS project provided training on improving NRS data quality and produced the *Guide for Improving NRS Data Quality: Procedures for Data Collection and Training*. Regional training, based on the *Guide*, was held early in PY 2002. Web-based training courses were made available through the project's Web site at <http://www.nrsweb.org/>, and the trainings around data quality and, more recently, data use continue to be expanded and updated.

"The professional development workshops designed and delivered by NRS staff were invaluable to us as we helped local adult educators develop the skills they needed to use the data collection/reporting system as a tool for improving the overall adult education system."  
- State Director of Adult Education

Later in PY 2002, the NRS project held a second set of regional training institutes on *Using NRS Data for Program Management and Improvement*, based on a second guidebook with the same title. More than 120 people from over 45 states attended each training. Web-based courses for this guide were developed following the training.

## NRS Implementation by States

States continue to reallocate resources to develop and improve data collection and reporting systems. For example, states have reported:

- Developing new policies around follow-up and assessment.
- Improving their data systems to make it easier for local programs to review and use their data to improve their services.
- Training teachers to examine their class data to inform changes in instructional delivery.

States also report becoming more skilled at using data to monitor local performance, using

"Would [improvements] have occurred without the NRS? I am convinced that they would not have. Without the NRS, we would never have known the true statement of what was happening in adult education..."

-State Director of Adult Education

the data in meaningful ways, and are training local program staff on methods of data collection and validation. States and local programs now have the ability to make data-driven decisions to help them design more effective programs to meet students' needs. States and even local programs now

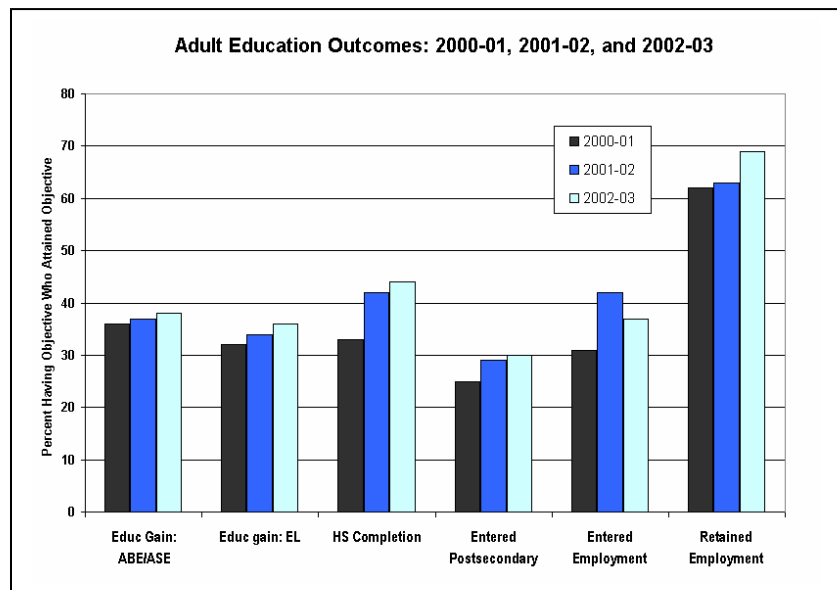

have access to data that include characteristics of students, program features, teacher characteristics,

student attendance, and student outcomes that they can use to demonstrate the value and effects of adult education instruction. For example, states and local programs can use NRS data to gain insight on the effects of class size, instructional hours, staffing patterns, and student characteristics on performance and other aspects of program operation. In addition, assessment systems are improving with more consistent and widespread use of standardized, psychometrically sound assessments.

## SUMMARY OF NATIONAL PERFORMANCE RESULTS

Program Year 2002–2003 marked the third year of the implementation of the NRS accountability requirements. Below is a summary chart providing a comparison of actual

performance on each of the core measures for adult education for the first three years under the NRS. All measures showed improvement over the three years, ranging from 6 to 33 percent gains. For the two educational gain measures, there was a steady, modest increase (a 6 to 13 percent increase), while high school

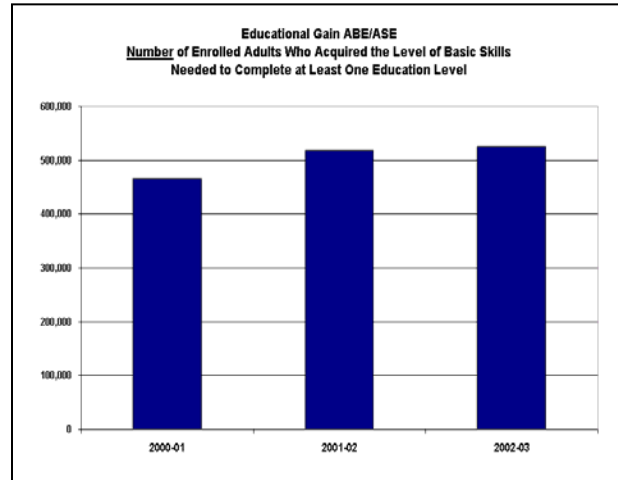

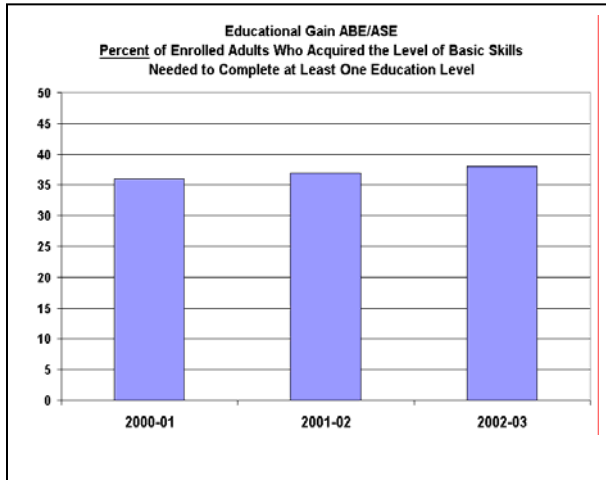

completion showed a 33 percent improvement. Postsecondary transition improved by 20 percent over the three years, and employment entrance and retention improved by 19 and 11 percent, respectively. From 2000–2001 to 2002–2003, program participation grew by 2 percent, while the program simultaneously demonstrated a 2 percent increase in the number of students attaining one or more outcome.

## Exhibit 1

### Educational Gain — Basic Literacy Skills

*Percent of enrolled adults who acquired the level of basic skills needed to complete at least one educational level (minimum Grade Level Equivalent — 2 years).*

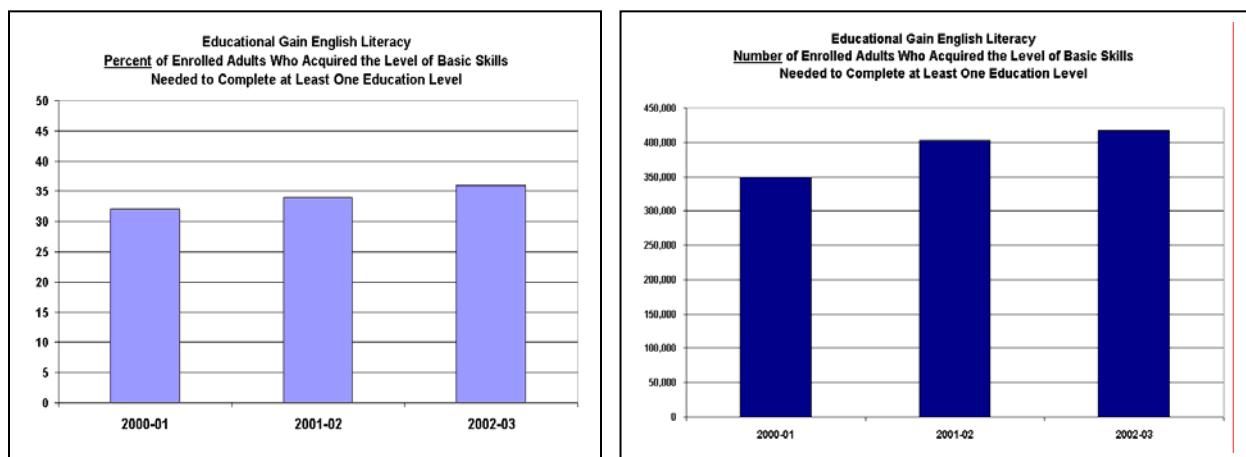

- **Over three program years, 1,509,475 adults advanced one or more educational levels**

Exhibit 1 shows that 38 percent of students enrolled in ABE and low ASE in PY 2002–2003 advanced at least one educational level. This is a modest 1 percentage point increase over the previous year and a 2 percentage point increase over the baseline year. The number of students who advanced one or more educational levels rose to a three-year high of over 525,000 in PY 2002–2003.

## Exhibit 2

### Educational Gain — English Language Acquisition

*Percent of enrolled adults who acquired the level of English language skills needed to complete at least one educational level.*

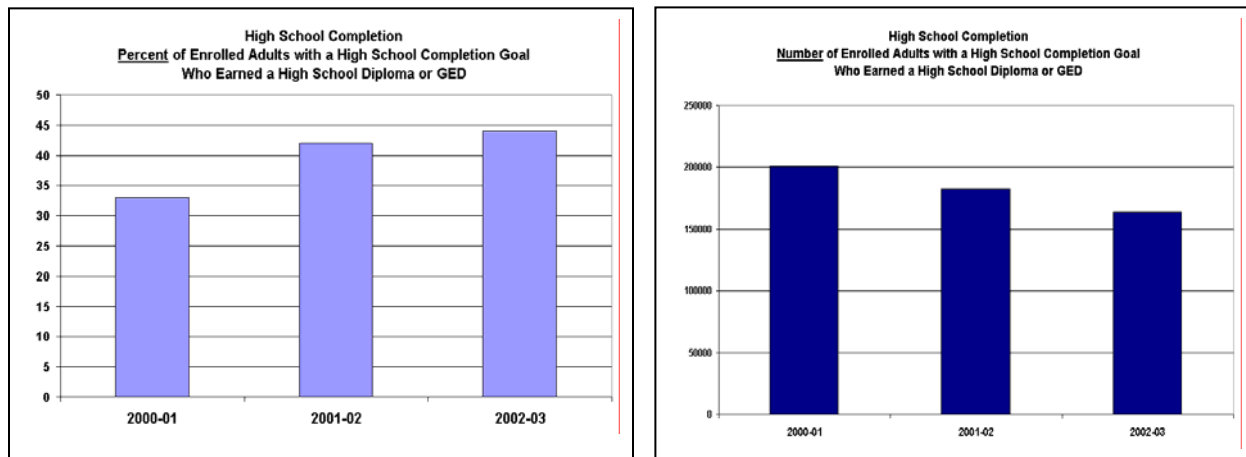

- **Over three program years, 1,169,696 adults advanced one or more education levels**

Exhibit 2 shows the percentage and number of learners enrolled in the six EL levels that advanced one or more educational levels in PY 2002–2003, compared to the baseline PY of 2000–2001 and PY 2001–2002. The number of learners advancing at least one level increased from 350,271 in the baseline year to a high of nearly 420,000 students in PY 2002–2003.

## Exhibit 3

### High School Completion

*Percent of enrolled adults with a high school completion goal who earned a high school diploma or GED.*

- **Over three program years, 547,590 earned a high school diploma or GED**

Exhibit 3 shows the percent and number of enrolled adults who had a goal of high school completion and obtained a diploma or passed the GED tests. The percent of students achieving this goal continued to increase to 44 percent in PY 2002–2003, a 33 percent increase over the baseline. However, the number of students having and attaining this goal has declined by almost 20 percent since PY 2000–01. This difference is, in part, a result of the publication of a revised version of the GED test in PY 2001 to replace the one that had been in use for over twenty years. A large number of adults enrolled in PY 2000–2001 to prepare to complete the GED prior to the publication of the new test.

## Exhibit 4

### Entered Postsecondary Education or Training

*Percent of enrolled adults with a goal to transition to postsecondary education or training who enrolled in postsecondary education or training after exiting the program.*

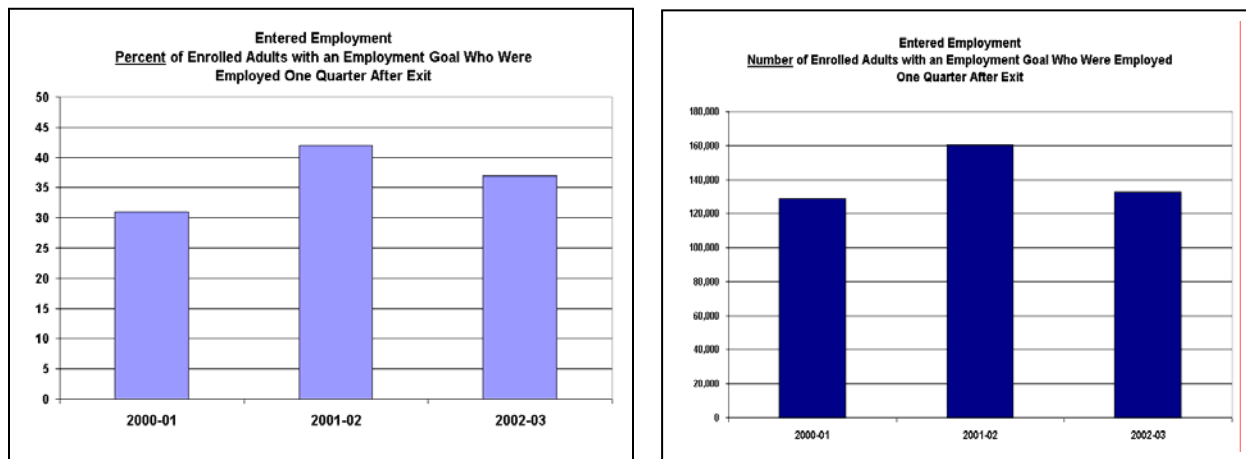

- **Over three program years, 145,845 adults enrolled in postsecondary education or training**

Exhibit 4 shows that, among adults who entered with a goal of transition to postsecondary education or training, 30 percent, or nearly 50,000 students, entered a postsecondary institution after exiting the program in PY 2002–2003. This is an increase from the 25 percent and 29 percent of adults in the two preceding program years who entered postsecondary education.

## Exhibit 5

### Entered Employment

*Percent of enrolled adults with an employment goal who were employed one quarter after exit.*

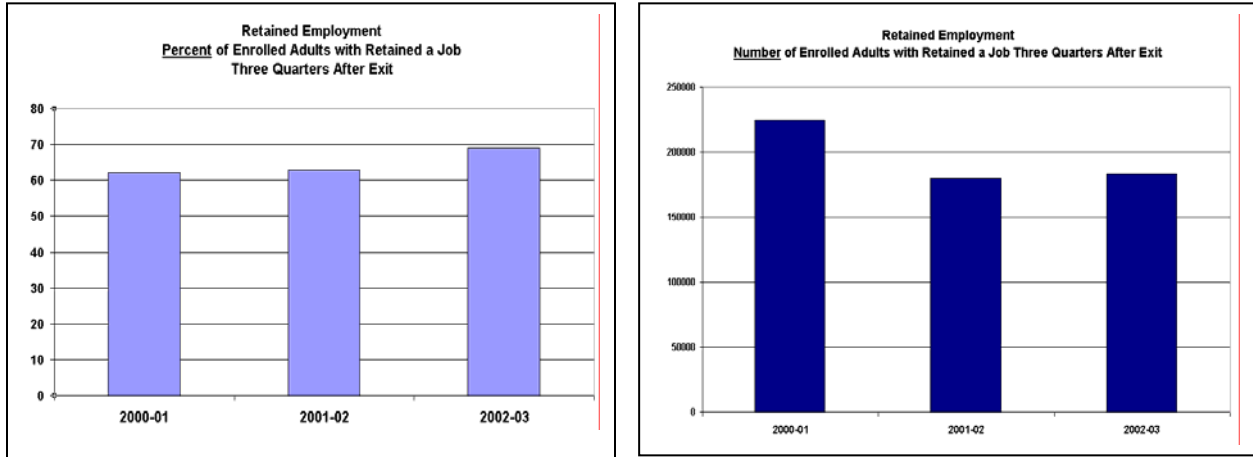

- **Over three program years, 421,862 adults were employed one quarter after program exit**

Exhibit 5 shows that, although the number declined from the previous year, in PY 2002–2003, the percent of enrolled adults who had a goal of obtaining employment and were employed one quarter after exiting the program increased by nearly 20 percent over the baseline year to about 37 percent (over 130,000 students).

## Exhibit 6

### Job Retention

*Percent of enrolled adults who retained a job three quarters after program exit.*

- **Over three program years, 587,910 adults retained employment three quarters after leaving the program**

Exhibit 6 shows that in PY 2002–2003, 69 percent of participants, or over 180,000 participants, retained a job three quarters after program exit, an 11 percent increase from the 62 percent of the students in PY 2000–2001.

The following table presents national student and program data from the NRS. Following this table are data tables for each of the 50 states, the District of Columbia, and Puerto Rico. The state tables begin with a one-page demographic display of each state's program, including the amount of federal adult education funds allocated to the state for FY 2002. The second page of each state analysis contains a summary of the state's performance on each performance measure required by AEFLA. The state's PY 2002–2003 performance is compared to its PY 2000–2001 and PY 2001–2002 performance on each measure.

### Retention and Completion

### Numbers Enrolled by Age and Program Type (Adult Basic Education, Adult Secondary Education, and English Literacy) 2002-03

# PROGRAM FACTS 2002–2003

Wisconsin	Actual Performance				
	2000–01	2001–02	2002–03		TOTAL
	Percent	Percent	Percent	# Adults completing at least one level or one outcome	3-Year Total #
<b>Performance Measure I: Demonstrated Improvement in Literacy Skills</b>					
<i>Sub Measures:</i>					
<b>1. Adult Basic and Secondary Education<sup>1</sup></b> The percentage of adults enrolled in basic literacy programs who acquired the basic skills needed to complete one or more levels of instruction in which they were initially enrolled.	60	80	58	11,547	38,644
<b>2. English Literacy<sup>2</sup></b> The percentage of adults enrolled in English literacy programs who acquired the level of English language skills needed to complete one or more levels of instruction in which they were initially enrolled.	43	50	54	3,914	10,854
<b>Performance Measure II: High School Completion</b>					
The percentage of adult learners with a high school completion goal who earned a high school diploma or GED after exiting the program.	29	36	47	1,961	6,012
<b>Performance Measure III: Entered Postsecondary Education or Training</b>					
The percentage of adult learners with a goal to continue their education who enter postsecondary education or training after exiting the program.	35	42	54	1,967	5,436
<b>Performance Measure IV: Entered Employment</b>					
The percentage of unemployed adult learners (in the workforce) with an employment goal who were employed at the end of the first quarter after exiting the program.	18	44	48	1,762	4,042
<b>Performance Measure V: Retained Employment</b>					
The percentage of adult learners with (a) a job retention goal at the time of enrollment and (b) those adults with an employment goal who obtained work by the end of the first quarter after leaving the program who were employed at the end of the third quarter after exiting the program.	72	56	46	907	7,544

<sup>1</sup> Adult Basic and Secondary Education programs consist of five instructional levels representing a hierarchy of basic skills ranging from beginning literacy to high school completion.

<sup>2</sup> English Literacy education programs consist of six instructional levels representing a hierarchy of English language skills ranging from beginning English and literacy to advanced language proficiency.
