Executive Summary

The NCAA Minority Opportunities and Interests Committee's Study of the Ethnicity and Gender Demographics of NCAA® Member Institutions' Athletics Personnel

Introduction

The NCAA compiled the following statistical information regarding the ethnicity and gender demographic information of athletics administrators and coaches in intercollegiate athletics at its member institutions. The proceeding charts, graphs and tables show the results from the 2007-08 academic year. Also included in this report for comparison are the data from 1995-96, the first year the demographic information was collected. The 1995-96 data are used as the baseline year for comparison in each race demographics report.

Organization of the report

Data for this report are divided into three categories: athletics administrators, head coaches and assistant coaches. All three groups are then organized by overall figures, percentages and then a divisional breakdown. Included within each of these categories are tables that provide data with the historically black colleges and universities (HBCUs) excluded. For all overall and divisional categories, both with and without HBCUs, a specific minority breakdown for American Indian/Alaskan Native, Asians, Hispanics, Native Hawaiian/Pacific Islander, Other Minority and Two or More Races is also provided.

Changes to the report

In 1990, the NCAA began collecting annual demographic data on each member institution utilizing the NCAA Certification of Compliance Form. Each institution was required to return this form to the national office. In 1995, legislation was passed at the NCAA Convention that eliminated this requirement. The Institution Staff Demographic Form was developed to gather this vital information; however, completion of this form was voluntary.

Therefore, starting in 1995, only a sample of the population is represented in the Biennial reports. Since the form on which the information is collected changed slightly and there was no longer a census, the MOIC decided to use the 1995 as baseline data and calculate the aggregate figures every other year to measure broad changes over time. The 1997-98, 1999-00, 2001-02, 2003-04 and the 2005-06 reports were all created from the Institution Staff Demographic Form.

The 2007-08 academic year marked another change in the way the gender, race and ethnicity data were collected. Similar to 1990, race and ethnicity data are required to be reported from the membership on official information forms. Therefore, all member schools are represented in this report and the collection is available annually.

Factors affecting the data

As with any data collection effort, there were minor errors and omissions in the data collection process. Data were evaluated on a school by school basis and every effort was made to ensure that corrections were made. Therefore, because of the high response rate and the low error rate the reported percentages and frequencies can be considered good estimations of the actual administrators and coaches' gender and ethnicity data.

The gender, race and ethnicity for all coaching and administrative positions within the athletics department were reported for each school. Coaching staff includes both full- and part-time positions and volunteers. Individuals with multiple administrative or coaching duties are counted for each position. Therefore, the total percentages reported in the tables reflect the number of positions, not necessarily the total number of individuals.

Suggestions for the reader

It is important to note that the statistics provided by the NCAA in this report are derived from self-reported data supplied by member institutions. No specific checks were made to verify the information provided by the institutions. While this information provides our best estimate of recent administrator and coach race and ethnicity, the data may not be absolutely precise.

Specific questions concerning the statistics included in this report should be directed to the NCAA research department or the public and media relations department at 317/917-6222.

Race and ethnicity category definitions

For the purposes of this report the following definitions were used for the race and ethnicity categories:

- American Indian/Alaskan Native - A person having origins in any of the original peoples of North America and who maintains cultural identification through tribal affiliation or community recognition.
- Asian - A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian Subcontinent. This includes people from China, Japan, Korea, the Philippine Islands, India, and Vietnam.
- Black, Non-Hispanic - A person having origins in any of the black racial groups of Africa (except those of Hispanic origin).
- Hispanic/Latino - A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.
- White, Non-Hispanic - A person having origins in any of the original peoples of Europe, North Africa, or the Middle East (except those of Hispanic origin).
- Native Hawaiian/Pacific Islander - A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.
- Two or More Races - A person having origins in more than one ethnicity category.
- Other - A person unable to identify with the other ethnicity categories.

Findings

Gender Findings

Overall, 56.4% of the athletics administrative positions are held by men and 43.6% are held by women. Currently, the highest representations of females are in the positions of administrative assistant, academic advisor/counselor, business manager, associate or assistant athletic trainer and life skills coordinator. Since 1995-96, gender representation in athletics administrative roles has had an 8.2% increase. During this time females saw the largest increases in the positions of business manager, graduate assistant, academic advisor/counselor and administrative assistant.

Both head coach and assistant coach data indicate that overall, female coaching representation has slightly increased in men's teams and decreased in women's teams. The increase since 1995-96 for female head coaches of men's teams is 0.4% and women's teams show a 4.3% decrease for female head coaches. The increase since 1995-96 for female assistant coaches of men's teams is 1.8% and women's teams show a 6.4% decrease for female assistant coaches. In the divisional breakdown of female head and assistant coaches, all divisions had a decrease in women head and assistant coaches for women's teams since the 1995-96.

Race Findings

Overall, in athletics administrative roles, the black representation has only had a minimal increase from 1995-96. Black men saw the largest increases in the positions of promotions/marketing manager, intern, fund raiser/development manager and faculty athletics representative. Black women saw the largest increases in the positions of academic advisor, promotions/marketing manager, graduate assistant and assistant director or athletics. Overall, the percentage of black athletics administrators increased slightly in 2007-08; however, the proportion of black male administrators has actually decreased by 0.3% while black female administrators have increased 1.5% since 1995-96. All increases from the 1995-96 report for both black men and women have been less than four percent.

Head coach data indicate that overall, black representation in both men's and women's teams has increased. The increase since 1995-96 for black head coaches of men's teams is 1.5% and women's teams show a 1.7% increase for black head coaches. Men's and women's revenue sports show the largest

Executive Summary (continued)

increases in the number of black head coaches. However, nonrevenue sports do not show that same increase.

In the divisional breakdown of black head coaches, all divisions had an increase in both black men and women head coaches since the 1995-96. Overall revenue and non-revenue sports for both men and women had increases among all divisions. However, a breakout of Division I revenue sports revealed that both FBS and FCS had decreases in black male coaches since 1995-96.

Assistant coach data also showed small increases in minority representation for men's teams. As with the head coach data, any increases were generally more significant among the revenue sports particularly for women. Yet overall, the percentage of black assistant coaches has remained virtually the same since 1995-96.

In the divisional breakdown, Division I minority representation has increased slightly since 1995-96. Division I black assistant coaches have shown modest steady increases in football and in men's and women's basketball. Division II exhibited slight increases overall in both men's and women's teams with small gains in the revenue sports. The percentage of Blacks as assistant football coaches has increased both since the last report and since 1995-96. Division III men's revenue sport percentages have not shown any significant change over the years. Overall, the Division III percentage of black assistant coaches of both men's and women's teams has remained static.
