

HIGHER EDUCATION

BUILDING CONNECTICUT'S WORKFORCE

State of Connecticut
Department of Higher Education

October 2010

Dear Colleague,

The Departments of Labor and Higher Education, working in close collaboration with the constituent units of public higher education, are pleased to present *Higher Education: Building Connecticut's Workforce*, a comprehensive report on the employment of graduates of our public colleges and universities. The report summarizes the employment and compensation experience of students who graduated from the State's 18 public colleges in 2008.

Employment results continue a positive trend with approximately 7 out of 10 public college graduates working in Connecticut nine months after graduation (69% or 12,753 out of 18,462). Other highlights include:

- Employed graduates earned an average of over \$40,000 on an annualized basis, with the highest earnings found among those working in Utilities (\$78,200 per year).
- Almost 45 percent of graduates were working in Education and Health Services.
- The majority of employed graduates were women (63%).

An important aspect of this report is that it connects information about graduates by program of study and the industry in which they were employed. This allows us to track where graduates eventually find work by major. For example, almost half (49%) of Liberal Arts and Sciences graduates were working in Health Care and Social Assistance, Retail Trade and Education Services sectors. Likewise, almost half (48%) of Engineering graduates were working in the Manufacturing sector.

This report is a reflection of the relationship between the CT Department of Labor, the public colleges and universities and the Department of Higher Education. It demonstrates the value of collaborating across agencies for conducting research to assist state policy makers with addressing critical state needs.

We hope you find the report useful and welcome your comments and suggestions for future reports.

Sincerely,

A handwritten signature in black ink, appearing to read "Linda L. Agnew".

Linda L. Agnew
Acting Commissioner
Connecticut Department of Labor

Connecticut Department of Higher Education

About this Report...

The Connecticut Departments of Labor and Higher Education, working in close collaboration with the University of Connecticut, Connecticut State University, Connecticut Community Colleges and Charter Oak State College, are pleased to present a comprehensive report on the employment of graduates of the State's public college system.¹ The report summarizes the employment and compensation experience of students who graduated from our 18 public colleges during the 2007-2008 school year. The report also provides a detailed summary of graduate employment by industry sector and college degree program for the state as a whole, for each system of education and for each individual institution.

This project builds upon the Department of Labor's work on the Connecticut Employment and Training Commission's annual report of employment outcomes for the State's education and training programs, and the Department of Higher Education's efforts to assess the employment success of its graduates through its annual accountability report.² Overall, 69 percent of the 18,462 graduates were found to be working in Connecticut seven to nine months after their graduation in a wide variety of industry sectors, including educational services, health care, professional and technical services, manufacturing and retail trade.

It is extremely important to note that all the data and analyses provided in the report reflect employment in Connecticut only, and exclude self-employment and federal employment. Some graduates not found to be working in Connecticut may have found employment in other states or may be continuing their education (i.e. attending graduate school). Data on employment in other states, the federal government, and self-employment were not available for this analysis.

The report has been designed to provide a convenient, easy-to-understand summary for all of public higher education in the State, each of the four public college systems, and each individual institution. These summaries include information on program of study, demographic characteristics, industry sector, average quarterly earnings and size of company for students employed in the third quarter after their graduation. Readers are encouraged to use this information in their planning and analyses as they may find appropriate.

Acknowledgements: Sarah York, Economist, and Dana Placzek, Research Analyst, at the Connecticut Department of Labor, prepared this report. Jan Kiehne of the Department of Higher Education contributed to the text and coordinated the review and input of the constituent units on the project.

Copies of the report may be downloaded from www.ct.gov/dol under the link to *Labor Market Information*, or may be obtained by calling 860-263-6275. For further information, comments or questions about this report please contact Andrew Condon (DOL) at 860-263-6255 or andrew.condon@ct.gov, or Braden Hosch (DHE) at 860-947-1821 or bhosch@ctdhe.org.

¹ The information contained in this report is made possible through a joint data-sharing agreement between the Department of Labor (DOL), Department of Higher Education (DHE) and each constituent unit of higher education. Under this agreement, graduate data is provided to and matched with information contained in the Unemployment Insurance program records by DOL. All data extracts and analyses are made by DOL, with external review of aggregate data analyses made by DHE.

HIGHER EDUCATION BUILDING CONNECTICUT'S WORKFORCE

Report Highlights

7 out of 10 of our public college graduates are working here in Connecticut. Of the 18,462 Connecticut public college graduates in 2008, 69% were employed *in Connecticut* nine months after graduation. As would be expected, the percentage varied somewhat across each higher education system with 77 percent of those from the Connecticut State University System (CSUS) employed in the State, 75 percent of graduates from the Connecticut Community Colleges (CCCs), 59 percent of those from the University of Connecticut (UConn), and 40 percent from Charter Oak State College (COSC). These results reflect, in part, the student population each system serves from the predominantly local communities served by the CCCs to other states and potentially other countries around the world pursuing completely on-line offerings at COSC. While all of the four-year public colleges serve students from inside and outside of the State, UConn attracts a larger percentage of its students (about 33% of undergraduate enrollment) from other states and countries than CSUS.

Graduates of our public colleges are meeting Connecticut's knowledge needs with almost 45% working in Education and Health Services. The Department of Labor regularly projects the need for workers in the State's industries and occupations. One-third of the career opportunities are in the education and health services sectors. In addition, sixty percent of the twenty fastest growing occupations in Connecticut will require a minimum of a bachelor's or master's degree, reflecting the importance of higher education in meeting the knowledge and skill needs of Connecticut's economy.

Addressing these needs, the greatest numbers of employed graduates majored in Business Management (2,233), followed by Education (1,682), Liberal Arts & Sciences (1,653) and Health Professions and Related Sciences (1,564).

Employed graduates earned an average of \$40,500. The 2008 graduates are realizing the financial rewards of their education, with those working for utilities companies reaping the highest average quarterly earnings (Utilities - \$19,550). Those working in Manufacturing and Management of Companies and Enterprises also had notable quarterly earnings (over \$14,000, respectively).

The majority of employed graduates are women. Almost two out of every three (63%) employed graduates were women. This was relatively consistent across all systems, ranging from a high of 67% at the CCCs to 58% at UConn. This also reflects long-term degree trends. In the 2008 graduating class, women earned 61 percent of all degrees awarded in the public sector institutions.

Employment by Program of Study:

- Of the 18,462 Connecticut public college graduates, 69% were employed in Connecticut (CT) during the third quarter after graduation.
- The greatest number of employed graduates majored in Business Management & Administration (2,233), followed by Education (1,682) and Liberal Arts and Sciences (1,653).
- The rate of employed graduates by program of study ranged from a high of 80% for Education to a low of 47% for Multi/Interdisciplinary Studies.
- 63% of employed graduates were women, 8% were African American and almost 7% were Hispanic.
- Over 71% of employed graduates worked in firms with 100 or more employees; 47% worked in large firms of 500 or more employees.

Employment by Industry and Degree Program:

- Graduates majoring in Business Management and Administration were employed in a wide variety of industries, but half (50%) were working in Finance & Insurance, Professional and Technical Services and Manufacturing
- Similarly, Liberal Arts and Sciences graduates were found to be working in virtually all industries, but almost half 49% were working in Health Care and Social Assistance, Education Services, or Retail Trade.

Department of Higher Education
Department of Labor

Employment and Gender:

- Females had a higher employment rate than males at 72% compared to 65%.
- For females, those who majored in Education or Public Administration & Services had the highest employment rate (approximately 80%); for males, the highest employment rate was for those who majored in Public Administration & Services (over 79%).
- More than half (54%) of the 8,078 female graduates employed during the third quarter after graduation were working in the Health Care & Social Assistance (2,256) or Educational Services (2,073) sectors; 30% of the 4,675 employed male graduates were working in the Educational Services (841) or Retail Trade (544) sectors.
