

HIGHER EDUCATION

BUILDING CONNECTICUT'S WORKFORCE

State of Connecticut
Department of Higher Education

April 2009

Dear Colleague,

The Departments of Labor and Higher Education, working in close collaboration with the constituent units of public higher education, are pleased to present *Higher Education: Building Connecticut's Workforce*, a comprehensive report on the employment of graduates of our public colleges and universities. The report summarizes the employment and compensation experience of students who graduated from the State's 18 public colleges in 2007.

Employment results continue a positive trend with at least 7 out of 10 public college graduates working in Connecticut nine months after graduation (70% or 12,471 out of 17,928). This is two percentage points higher than the rate for prior year graduates. Other highlights include:

- Employed graduates earned an average of over \$40,000 on an annualized basis, with the highest earnings found among those working in Utilities (\$82,064 per year).
- Almost 45 percent were working in Education and Health Services.
- The majority of employed graduates were women (63%).

For the first time, this year's report includes tables of graduates by program of study and industry in which they were employed. This allows us to track where graduates eventually find work by college major. For example, over one-third of graduates majoring in business were employed in the Finance & Insurance and Professional & Technical Services sectors. Almost 50 percent of Liberal Arts and Sciences graduates were working in Health Care and Social Assistance, Education Services or Retail Trade.

Through this collaborative effort, we have been able to quantify the benefits of attaining a college degree and the importance of our higher education system to building and sustaining an educated workforce. It also demonstrates the value of using research and information resources across agencies to assist state policy makers with addressing critical state needs.

We hope you find the report useful and welcome your comments and suggestions for future reports.

Sincerely,

A handwritten signature in black ink that reads "Pat H. Mayfield".

About this Report...

The Connecticut Departments of Labor and Higher Education, working in close collaboration with the University of Connecticut, Connecticut State University, Connecticut Community Colleges and Charter Oak State College, are pleased to present a comprehensive report on the employment of graduates of the State's public college system.¹ The report summarizes the employment and compensation experience of students who graduated from our 18 public colleges during the 2007 school year. The report also provides a detailed summary of graduate employment by industry sector and college degree program for the state as a whole, for each system of education and for each individual institution. This year for the first time the report also includes a matrix of employed graduates by program of study and industry sector.

This project builds upon the Department of Labor's work on the Connecticut Employment and Training Commission's annual report of employment outcomes for the State's education and training programs, and the Department of Higher Education's efforts to assess the employment success of its graduates through its annual accountability report.² Overall, 70 percent of the 17,928 graduates were found to be working in Connecticut seven to nine months after their graduation in a wide variety of industry sectors including educational services, health care, professional and technical services, manufacturing and retail trade.

It is extremely important to note that all the data and analyses provided in the report reflect employment in Connecticut only, and exclude self-employment and federal employment. Some graduates not found to be working in Connecticut may have found employment in other states or may be continuing their education (i.e. attending graduate school). Data on employment in other states, the federal government and self-employment were not available for this analysis.

The report has been designed to provide a convenient, easy to understand summary for all of public higher education in the State, each of the four public college systems, and each individual institution. These summaries include information on program of study, demographic characteristics, industry sector, average quarterly earnings and size of company for students employed in the third quarter after their graduation. Readers are encouraged to use this information in their planning and analyses as they may find appropriate.

Acknowledgements: Cynthia DeLisa and Dana Placzek, Research Analysts at the Connecticut Department of Labor, prepared this report. Mary Johnson of the Department of Higher Education contributed to the text and coordinated the review and input of the constituent units on the project.

Copies of the report may be downloaded from www.ct.gov/dol under the link to *Labor Market Information*, or may be obtained by calling 860-263-6275. For further information, comments or questions about this report please contact Roger Therrien (DOL) at 860-263-6255 or roger.therrien@ct.gov, or Mary K. Johnson (DHE) at 860-947-1848 or mkjohnson@ctdhe.org.

¹ The information contained in this report is made possible through a joint data-sharing agreement between the Department of Labor (DOL), Department of Higher Education (DHE) and each constituent unit of higher education. Under this agreement, graduate data is provided to and matched with information contained in the Unemployment Insurance program records by DOL. All data extracts and analyses are made by DOL, with external review of aggregate data analyses made by DHE.

HIGHER EDUCATION BUILDING CONNECTICUT'S WORKFORCE

Report Highlights

7 out of 10 of our public college graduates are working here in Connecticut. Of the 17,928 Connecticut public college graduates in 2007, at least 70% were employed *in Connecticut* nine months after graduation. As would be expected, the percentage varied somewhat across each higher education system with 78 percent of those from the Connecticut State University System (CSUS) employed in the State, 77 percent of graduates from the Connecticut Community Colleges (CCCs), 60 percent of those from the University of Connecticut (UConn), and 31 percent from Charter Oak State College (COSC). These results reflect, in part, the student population each system serves from the predominantly local communities served by the CCCs to other states and potentially other countries around the world pursuing completely on-line offerings at COSC. While all of the four-year public colleges serve students from inside and outside of the State, UConn attracts a larger percentage of its students (about 22% of total enrollment) from other states and countries than CSUS.

Graduates of our public colleges are meeting Connecticut's knowledge needs with almost 45% working in Education and Health Services. The Department of Labor regularly projects the need for workers in the State's industries and occupations. One-third of the career opportunities are in the education and health services sectors. In addition, sixty percent of the twenty fastest growing occupations in Connecticut will require a minimum of a bachelor's or master's degree, reflecting the importance of higher education in meeting the knowledge and skill needs of Connecticut's economy.

Addressing these needs, the greatest numbers of employed graduates majored in Business Management (2,304), followed by Education (1,633), Liberal Arts & Sciences (1,514) and Health Professions and Related Sciences (1,497).

Employed graduates earned an average of over \$40,000. The 2007 graduates are realizing the financial rewards of their education, with those working for utilities companies reaping the highest average quarterly earnings (Utilities - \$20,516). Those working in Manufacturing, Finance & Insurance and Management of Companies and Enterprises also had notable quarterly earnings (over \$14,000, respectively).

The majority of employed graduates are women. Almost two out of every three (63%) employed graduates were women. This was relatively consistent across all systems, ranging from a high of 67% at the CCCs to 57% at UConn. This also reflects long-term degree conferred trends. In the 2007 graduating class, women earned 60 percent of all degrees awarded in the public sector institutions.

CONNECTICUT HIGHER EDUCATION SYSTEM

Employment by Program of Study:

- Of the 17,928 Connecticut public college graduates, 70% were employed in Connecticut (CT) during the third quarter after graduation.
- The greatest number of employed graduates majored in Business Management & Administration (2,304), followed by Education (1,633) and Liberal Arts and Sciences (1,514).
- The rate of employed graduates by program of study ranged from a high of 81% for Public Administration & Services to a low of 48% for Philosophy & Religious Studies, Physical Sciences, and Agribusiness & Related Sciences.
- 63% of employed graduates were women, 8% were African American and almost 7% were Hispanic.
- Over 70% of employed graduates worked in firms with 100 or more employees; 46% worked in large firms of 500 or more employees.

Employment by Industry and Degree Program:

- Graduates majoring in Business Management and Administration were employed in a wide variety of industries, but over one-third (37%) were working in Finance & Insurance and Professional and Technical Services.
- Similarly, Liberal Arts and Sciences graduates were found to be working in virtually all industries, but almost 50% were working in Health Care and Social Assistance, Education Services, or Retail Trade.

Department of Higher Education
Department of Labor

Employment and Gender:

- Females had a higher employment rate than males at 72% compared to 66%.
- For females, those who majored in Computer & Information Sciences, Engineering-related Technologies, Public Administration & Services, or Health Professions & Related Science had the highest employment rate (over 80%); for males, the highest employment rate was for those who majored in Public Administration & Services (over 80%).
- More than half (54%) of the 7,885 female graduates employed during the third quarter after graduation were working in the Health Care & Social Assistance (2,195) or Educational Services (2,030) sectors; 31% of the 4,593 employed male graduates were working in the Educational Services (863) or Retail Trade (563) sectors.

CONNECTICUT STATE UNIVERSITY SYSTEM

Employment by Program of Study:

- Of the 6,363 Connecticut State University System (CSUS) graduates, 78% were employed in CT during the third quarter after graduation, up from 76% last year.
- The greatest number of employed graduates majored in Education (1,284), followed by Business Management & Administration (864) and Psychology (424).
- The rate of employed graduates by program of study ranged from a high of 83% for both Mathematics & Statistics and Computer & Information Sciences to a low of 57% for Library Science.
- 65% of employed graduates were women.
- Almost 74% of employed graduates worked in firms with 100 or more employees; 48% worked in large firms of 500 or more employees.

Employment by Program of Study:

- Of the 2,268 Central Connecticut State University (CCSU) graduates, 80% were employed in CT during the third quarter after graduation.
- The greatest number of employed graduates majored in Education (511), followed by Business Management & Administration (425) and Social Sciences (146).
- The rate of employed graduates by program of study ranged from a high of 93% for Public Administration & Services to a low of 68% for both Health Professions & Related Sciences and Biological & Biomedical Sciences.
- 60% of employed graduates were women.
- Almost 76% of employed graduates worked in firms with 100 or more employees; 51% worked in firms with 500 or more employees.
