Education & The American Jobs Act:

Creating Jobs Through Investments In Our Nation's Schools

On September 8, 2011, the President proposed the American Jobs Act to Congress, including investments of \$25 billion to renovate and modernize at least 35,000 of America's public schools; \$5 billion to upgrade infrastructure at America's community colleges; and \$30 billion to keep hundreds of thousands of educators in the classroom.

This report documents the need for Congress to take decisive action on the American Jobs Act, and provides detailed estimates of the benefits each school district in the country can expect to receive with passage of the American Jobs Act. These critical investments will create jobs now and improve the physical condition of the schools that teach and train future workers for the jobs of the twenty-first century.

School Modernization: A National Imperative

A 2000 study by the National Center for Education Statistics reported on the condition of public schools and on estimates of the costs for repairs and renovations needed to return them to good condition.¹ Nineteen percent of schools' original buildings were reported to be in less than adequate condition. Fifty percent of schools reported that at least one building characteristic—such as roofing, ventilation, plumbing, or electrical circuitry—was inadequate. Seventy-six percent of schools needed funding for repairs and renovation, totaling \$127 billion across America, and averaging \$2.2 million for each school in need of repair.

The situation has not improved. The American Society of Civil Engineers recently gave a "D" grade in assessing our nation's public school infrastructure.² Renovation and repair needs include upgrades to boilers and HVAC systems; upgrades to fire code, safety, and security systems; electrical and lighting retrofitting; improved laboratory facilities for science instruction; and updated technology infrastructure.

Modernization and repair needs in America's schools persist, as nationwide school districts have an estimated \$271 billion of deferred building maintenance, or more than \$5,000 per student, in our nation's public schools.³ Most school districts simply do not have funding available to keep pace with the repairs or renovations needed to support student learning, even though districts spent \$49.4 billion on school building operation and maintenance in 2009, which amounts to 8 percent of their total spending (including capital spending) of \$605 billion for that year.⁴

EDUCATION & THE AMERICAN JOBS ACT:
CREATING JOBS THROUGH INVESTMENTS IN OUR NATION'S SCHOOLS

Districts across the country face a need for modernizing, upgrading, and repairing their schools. Responses to a recent independent survey of urban school districts provide specific examples of the range and scale of repair and renovation needs:⁵

- Charlotte-Mecklenburg, NC has identified \$108,366,521 for 12 renovation projects, as well as \$132,982,509 for deferred maintenance—such as electric and electronic code compliance, plumbing, roofing and HVAC upgrades and repairs.
- Orange County, FL has identified \$169,590,260 for renovation projects, and \$13,245,180 for deferred maintenance.
- Clark County, NV has identified a need for \$478,890,000 to renovate 18 schools, replace HVAC and electrical systems at 7 middle schools, and perform electrical upgrades at 14 more schools, in addition to \$116,715,000 for deferred maintenance across the district.

Within districts, examples abound of schools facing challenges from inadequate facilities:

- Antlers Middle School, located in Antlers, Oklahoma, was built in the 1960s. The school's flat roof has been leaking for ten years in 15-20 areas, and its condition continues to worsen. The heating and cooling units on the roof are over twenty years old and are failing. The entire facility has inefficient energy usage, which results in high costs to heat and cool the facility.⁶
- Moose Lake Elementary and High School, located in rural Minnesota, was built in 1935. Moose Lake's aging roof, boiler, and air ventilation systems are in need of repair, and electrical systems are insufficient to accommodate modern technology needs. Many of the district's classrooms and bathrooms are not accessible to students with disabilities.⁷
- Trenton Central High School, located in Trenton, New Jersey, was built in 1932. The school's leaky roof and broken pipes routinely allow water to spill throughout the building. Warped floors are dangerous to students, doors cannot be secured, and windows must be propped to stay open. Rotting drainpipes, embedded in the school's interior walls and insulated with asbestos, are difficult to reach and repair.⁸
- And the Wilbur & McMahon School, located in Little Compton, Rhode Island, was built in 1929. The school is currently running on outdated mechanical, electrical, and plumbing systems. According to a July 2011 report, these systems are "at the end of their useful life and need immediate replacement." Science labs and other educational spaces need to be upgraded.⁹

EDUCATION & THE AMERICAN JOBS ACT:
CREATING JOBS THROUGH INVESTMENTS IN OUR NATION'S SCHOOLS

The problem of inadequate funding for modernization is not limited to elementary and secondary schools. Aggregate community college facilities needs are estimated at roughly \$100 billion, including the costs of upgrades, major renovation, and new construction.¹⁰ Investment in modernizing community colleges fills a key resource gap, and ensures these institutions have the facilities and equipment to address current workforce demands, particularly in today's highly technical and growing fields.

Over the past several years, enrollment at America's over 1,000 community colleges has grown, as they serve both recent high school graduates and adults who have chosen to learn additional skills for the jobs of the new economy. State and local budgets have not been able to support the renovation and modernization needs of community colleges—many of which were built during an expansion of community colleges systems forty or fifty years ago—much less fund the expansion of facilities to support the growth in enrollments. The need is especially acute at a time when community colleges are critical in helping the U.S. again lead the world in college attainment.

- California community colleges have identified \$13.2 billion in renovation needs for existing buildings and \$201 million for critical safety renovations over the next five years.¹¹
- Virginia community colleges have identified over \$1.6 billion in needed construction and upgrades by 2014.¹²

Building The Future In Our Schools

The physical condition of a school is related to a wide range of outcomes, including student attendance and success, as well as teacher retention and job satisfaction. Continuing to defer maintenance and delay renovation does not serve our students or teachers well: multiple research studies have shown a linkage between the physical condition of the school and student achievement. School buildings with poor lighting, ineffective heating and cooling systems, excessive noise, or other deficiencies put students at a disadvantage—simply put, students in poor buildings are more likely to struggle academically.¹³

Several reports have documented a relationship between inadequate school building conditions with decreased student attendance and lowered student achievement:

- Students in schools that need structural repairs are more likely to miss days of school and more likely to drop out of school. An elementary or secondary school with 1,000 students and needing significant renovation may experience attendance that is four to five students lower each

EDUCATION & THE AMERICAN JOBS ACT:
CREATING JOBS THROUGH INVESTMENTS IN OUR NATION'S SCHOOLS

day compared to a school in good repair, and a secondary school of similar size may have more than ten additional dropouts each year, correlated with the condition of the school building.¹⁴

- One study found better academic performance among Virginia middle school students in newer buildings or in recently renovated buildings as compared to students in older buildings. The percentage of students passing standardized state examinations in English, mathematics, and science in academic year 2005-06 was significantly higher in buildings rated as being in standard condition than in buildings rated as substandard.¹⁵
- A study of Texas high schools showed a significant difference in 2006 mathematics, English-language arts, and science test scores between students in buildings in fair condition, poor condition, or needs-replacing condition and students in buildings in excellent condition. Additionally, a significant difference in graduation rate was found, with students in buildings in excellent condition graduating at a higher rate than students at buildings in fair or poor condition.¹⁶
- A 2008 study of New York Public Schools showed that students attending schools in poor physical condition miss more days of instruction and perform worse on standardized tests in Mathematics and English Language Arts, even after controlling for other possible factors like economic status, school size, and teacher quality.¹⁷

In addition to positive effects on teaching and learning, modernizing and renovating our nation's schools will also help save energy, and therefore help districts save money. Every year, school districts spend more than \$6 billion on energy - more than is spent on computers and textbooks - and up to 30 percent of this cost is wasted on inefficient or unnecessary energy use.¹⁸ School districts that use energy more efficiently can redirect more savings to other uses.

- Louisiana's Ascension Parish public schools recently invested \$10 million in energy-efficient upgrades to electrical and ventilation systems—upgrades which are expected to initially save the district \$860,000 annually.¹⁹

EDUCATION & THE AMERICAN JOBS ACT:
CREATING JOBS THROUGH INVESTMENTS IN OUR NATION'S SCHOOLS

- Pennsylvania's Central Bucks School District is spending \$14 million to upgrade electrical systems, including energy-saving lighting and computerized controls to increase efficiency. These investments are expected to save the district \$28 million over the next 14 years.²⁰
- California's San Ramon Valley Unified School District installed 10,000 photovoltaic panels at five of the district's 23 schools. Those panels will generate enough electricity to offset up to 75% of the electrical use in each school, leading to savings that will effectively pay for the panels in 16 years.²¹

Keeping America's Educators In The Classroom

America's education system has always been one of our greatest sources of strength and global economic competitiveness, as well as an engine of progress in science, technology and the arts. Our nation cannot expect to train our children for the high-skilled jobs of today, or for the opportunities of the future, without investments in a world-class education system. And America cannot build a world-class education system without teachers in our classrooms.

The severe recession has caused serious budget problems for many state and local governments that fund the vast majority of the costs of public elementary through high school education. This means that school districts have been forced to make difficult decisions. Over the twelve months ending October 2011, despite private-sector job growth of 1.8 million, local governments have significantly reduced the number of teachers and education personnel they employ, accounting for about 120,000 jobs lost or nearly sixty percent of all local government job losses during this period. Nearly 250,000 educator jobs were lost between October 2008 and October 2011, which accounts for almost half (48 percent) of all job losses in local government over that period.²²

Our nation cannot expect to train our children for the high-skilled jobs of today, or for the opportunities of the future, without investments in a world-class education system. And America cannot build a world-class education system without teachers in our classrooms.

Without additional support, many school districts will have to make another round of difficult decisions. At the time that the President proposed the American Jobs Act, the Administration estimated that, as a result of state and local funding cuts, as many as 280,000 educator jobs could be at risk.²³ Unless they receive federal assistance, many school districts will be forced to reduce the number of teachers in their classrooms or turn to other measures, such as further deferring maintenance, shortening the school year, or cutting spending on schoolbooks and supplies.

EDUCATION & THE AMERICAN JOBS ACT:
CREATING JOBS THROUGH INVESTMENTS IN OUR NATION'S SCHOOLS

The revenue received by state and local governments from sources other than the federal government, which had been increasing at a steady pace prior to the recession, fell a precipitous 9.6 percent between the middle of 2008 and the middle of 2009. It took until the second quarter of this year for state and local revenue to return to its mid-2008 level, and that excludes the effect of inflation. It remains well below what would have been predicted had revenue growth kept pace with its pre-recession trend. The large drop in revenue from non-federal sources forced states and localities to reduce expenditures, seek increases in revenue from other sources (including the federal government), or both.²⁴

Recently-released data from the Center on Budget and Policy Priorities show that these problems continue to exist. State budget shortfalls totaled over \$100 billion in each of fiscal years 2009, 2010, and 2011, and shortfalls are projected to continue, even as the economy continues to recover from the recession.²⁵

Safeguarding Student Success

None of the choices available to school systems dealing with losses in funding for teachers is good. Some districts have chosen to increase class sizes; others have eliminated summer school programs and after-school programs or discontinued instruction in subjects such as art and music, all in an effort to make ends meet.

Especially in an era of intensifying global competition, in which it is critical that all students leave school ready for work and further learning, these cuts are troubling. The most convincing scholarly research on class sizes, based on experimental evidence from the Tennessee Student Teacher Achievement Ratio (STAR) project, shows that smaller class sizes in the early primary years not only produce short term gains in student achievement, but also raise the likelihood that students will attend and graduate from college and study STEM subjects.²⁶

Additionally, research showing the importance of summer learning losses as a key factor in the achievement gap between socioeconomically disadvantaged students and their classmates makes the case for keeping at-risk students in school during the summer.²⁷ Other reports show that students who participate in after-school programs have lower delinquency rates and lower pregnancy rates.²⁸ And while subjects such as art and music may be viewed as targets for cuts, such courses may be important for keeping students engaged in school and preventing dropouts.²⁹

The American Jobs Act: Investing In America's Students

President Obama believes we need to do more than just recover from the economic crisis we are currently facing—we need to rebuild the economy the American way, and we need to continue to make long-term investments in our future.

The President unveiled the American Jobs Act as a way to work together to create the jobs of the future by helping small business entrepreneurs, by investing in education, and by making things the world buys. The purpose of the American Jobs Act is simple: put more people back to work and put more money in the pockets of working Americans. And it would do so without adding a dime to the deficit.

President Obama's plan will invest \$30 billion in enhancing the condition of our nation's public schools—with \$25 billion allocated to K-12 schools, including a priority for rural schools and dedicated funding for Bureau of Indian Education funded schools, and \$5 billion to community colleges. The range of critical repairs and needed construction projects would put hundreds of thousands of Americans—including construction workers, engineers, maintenance staff, boiler repairmen, and electrical workers—back to work. Funds can be used for a range of emergency repair and renovation projects, such as greening and energy efficiency upgrades, modernizing science and computer labs, and upgrading technology infrastructure in our schools.

The President's plan calls for substantial investments in school infrastructure, modernizing at least 35,000 of America's public schools to meet 21st-century needs and supporting repairs and upgrades in the nation's community colleges.

- **\$25 billion in funds will be used to upgrade existing public school facilities.** \$10 billion of the funds will be awarded directly to the 100 largest high-need public school districts. \$15 billion of the funds will be distributed to the states. Funds cannot be used for new construction.
- **Safer, Healthier, and Technologically Advanced Schools of the Future.** Local districts will be able to put these funds to work on a range of repair and renovation projects, to invest in upgrades, and to allow schools to continue to serve as centers of the community (including upgrades to shared spaces for adult vocational and job development centers). These efforts will not only make our schools safer and healthier learning environments, but also ensure that our schools are fully equipped to teach 21st century skills in math, science, and other technical fields and to serve as effective centers for workforce training and development.
- **Maximum flexibility to the states and funding for small repairs and large-scale maintenance and upgrade projects.** Funds could be used for a variety of projects, including greening and energy-efficiency upgrades; asbestos abatement and removal; improvements to after-school facilities and community spaces; and modifications to comply with the Americans with Disabilities Act.
- **To ensure that schools in the most disrepair will be able to make necessary enhancements, almost 40 percent of the funds will be awarded to the 100 largest high-need public school districts.** Each of the 100 Local Educational Agencies (LEAs) with the largest numbers of children living in poverty would receive a formula amount proportionate to its Elementary and Secondary Education Act Title I Part A allocation within 60 days of enactment.

EDUCATION & THE AMERICAN JOBS ACT:
CREATING JOBS THROUGH INVESTMENTS IN OUR NATION'S SCHOOLS

- **The remaining approximately 60 percent will be given to states to allocate, and states would have flexibility to direct those funds to additional high-need districts, including schools in rural areas.** Funding would be allocated to states on the basis of their Title I shares. States would be required to obligate those funds by September 30, 2012, and outstanding balances would be reallocated to other states. States would direct half the funding to local school districts on a formula basis, and the other half through an application process based on need, with a priority for rural districts. A portion of the overall funding would be set-aside for Bureau of Indian Education schools (0.5 percent) and for the Outlying Areas (0.5 percent).
- **Funds will be put to work quickly.** For formula grants, states would be expected to get funds to districts within 3 to 6 months of enactment and the districts would have to expend the funds within 24 months of enactment. Districts would have to expend funds they receive based on applications to states within 36 months.
- **Community Colleges will be upgraded to ensure that facilities are equipped to meet the demands of the 21st century workforce.** The President's plan proposes \$5 billion of investments for facilities modernization needs at community colleges. Investment in modernizing community colleges fills a key resource gap, and ensures these institutions have the facilities and equipment to address current workforce demands in today's highly technical and growing fields. Funds would only be used for the repair, renovation, or modernization of facilities used primarily for instruction and research, including facilities housing programs that prepare students for in-demand jobs. Funds would be awarded to states based on the relative share of students enrolled in community colleges and two year or certificate programs at four year schools and would have to be used by colleges within 36 months.

We've designed the school modernization funding so that dollars reach schools that need them quickly; the largest 100 school districts in the nation will receive funds directly, and an ambitious timeline will deliver the remaining funds through the states and quickly down to school districts and community colleges. The aim is to get Americans to work fast. Many school districts and states already have a list of school renovation projects to undertake, but lack the resources to execute their plans. This funding will allow them to take action on school modernization, while creating jobs in industries that have experienced significant job losses. Modernizing our schools will not only put people back to work: it will improve the health and safety of our teachers and students, and contribute to the future competitiveness of our nation.

The American Jobs Act also makes great strides in keeping our educators in the classroom, with the potential to prevent hundreds of thousands of layoffs and to allow schools to hire or rehire thousands more. In addition to the work that the American Jobs Act will do to modernize our schools, it will support nearly 400,000 education jobs—preventing layoffs and allowing educators to be hired or rehired.

The American Jobs Act will invest \$30 billion to support state and local efforts to retain, rehire, and hire early childhood, elementary, and secondary educators. If enacted, these teacher stabilization funds would help prevent layoffs and support the hiring or re-hiring of teachers, guidance counselors, classroom assistants, afterschool personnel, tutors, and literacy and math coaches. These funds will ensure

EDUCATION & THE AMERICAN JOBS ACT:
CREATING JOBS THROUGH INVESTMENTS IN OUR NATION'S SCHOOLS

that schools are able to keep teachers in the classroom, preserve or extend the regular school day and school year, and maintain important afterschool activities.

The impact of this funding is clear: in the states with the largest numbers of students, the American Jobs Act will support tens of thousands of educator jobs—California (37,300), Florida (25,900), Illinois (14,500), New York (18,000) and Texas (39,500). Funding is targeted to the school districts most in need of support across the country, especially those with a high share of students living in poverty. Even in states with smaller student enrollments, the American Jobs Act will have a significant impact—supporting over a thousand educator jobs in states like Montana (1,400), Arkansas (4,100), Nevada (3,600), and Iowa (4,100). Medium-size school districts like those in Wake County, North Carolina and Nashville, Tennessee will receive funding ranging from \$50 million to \$75 million.

State By State Appendix

The state-by-state appendix that follows integrates state- and school district-level data detailing the education investments that the American Jobs Act will make in schools around the nation. A summary of this information at the state level can be found on the next page, and full district-level information can be found online at <http://data.ed.gov/american-jobs-act>.

Alabama

The American Jobs Act will invest an estimated **\$909,216,795** in education funding for the students and schools of Alabama. This investment includes \$451,477,775 to support an estimated 7,000 educator jobs, as well as \$390,260,746 for K-12 school modernization and \$67,478,274 for community college modernization to support an estimated 6,000 modernization jobs.

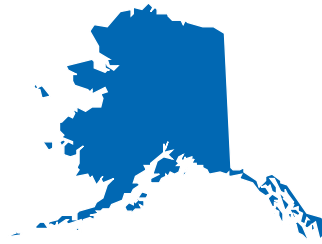

Below are some examples of how the American Jobs Act will invest in education in Alabama:

- **Mobile County School District**, with an enrollment of 62,767 students, will receive approximately \$44,024,333 in education jobs funding and approximately \$53,490,072 in K-12 school modernization funding, for a total education investment of approximately **\$97,514,405** under the American Jobs Act.
- **Birmingham City School District**, with an enrollment of 26,721 students, will receive approximately \$23,715,900 in education jobs funding and approximately \$35,241,852 in K-12 school modernization funding, for a total education investment of approximately **\$58,957,752** under the American Jobs Act.
- **Montgomery County School District**, with an enrollment of 31,764 students, will receive approximately \$22,556,930 in education jobs funding and approximately \$11,479,765 in K-12 school modernization funding, for a total education investment of approximately **\$34,036,695** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Jefferson County School District**, with an enrollment of 36,058 students, will receive approximately \$19,289,477 in education jobs funding and approximately \$6,479,414 in K-12 school modernization funding, for a total education investment of approximately **\$25,768,891** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Baldwin County School District**, with an enrollment of 27,880 students, will receive approximately \$15,513,157 in education jobs funding and approximately \$5,630,732 in K-12 school modernization funding, for a total education investment of approximately **\$21,143,890** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.

A full listing and interactive map detailing education investments proposed in the American Jobs Act for all states and districts can be found at <http://data.ed.gov/american-jobs-act>.

Estimates above are based on the legislative proposal contained in the American Jobs Act and are subject to change. District-level estimates are based on current information reported by the National Center for Education Statistics for the 2009-10 school year.

Changing enrollment levels may affect district funding allocations.

Alaska

The American Jobs Act will invest an estimated **\$134,985,663** in education funding for the students and schools of Alaska. This investment includes \$70,483,533 to support an estimated 900 educator jobs, as well as \$62,002,130 for K-12 school modernization and \$2,500,000 for community college modernization to support an estimated 800 modernization jobs.

Below are some examples of how the American Jobs Act will invest in education in Alaska:

- **Anchorage School District**, with an enrollment of 49,592 students, will receive approximately \$25,235,433 in education jobs funding and approximately \$10,178,333 in K-12 school modernization funding, for a total education investment of approximately **\$35,413,766** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Matanuska-Susitna Borough School District**, with an enrollment of 16,770 students, will receive approximately \$8,418,133 in education jobs funding and approximately \$3,314,958 in K-12 school modernization funding, for a total education investment of approximately **\$11,733,092** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Fairbanks North Star Borough School District**, with an enrollment of 14,553 students, will receive approximately \$7,519,258 in education jobs funding and approximately \$3,111,993 in K-12 school modernization funding, for a total education investment of approximately **\$10,631,252** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Lower Kuskokwim School District**, with an enrollment of 4,097 students, will receive approximately \$3,227,931 in education jobs funding and approximately \$2,097,613 in K-12 school modernization funding, for a total education investment of approximately **\$5,325,544** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Lower Yukon School District**, with an enrollment of 1,932 students, will receive approximately \$2,354,126 in education jobs funding and approximately \$1,903,792 in K-12 school modernization funding, for a total education investment of approximately **\$4,257,918** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.

A full listing and interactive map detailing education investments proposed in the American Jobs Act for all states and districts can be found at <http://data.ed.gov/american-jobs-act>.

Estimates above are based on the legislative proposal contained in the American Jobs Act and are subject to change. District-level estimates are based on current information reported by the National Center for Education Statistics for the 2009-10 school year.

Changing enrollment levels may affect district funding allocations.

Arizona

The American Jobs Act will invest an estimated **\$1,286,549,389** in education funding for the students and schools of Arizona. This investment includes \$625,502,087 to support an estimated 9,700 educator jobs, as well as \$544,400,210 for K-12 school modernization and \$116,647,092 for community college modernization to support an estimated 8,600 modernization jobs.

Below are some examples of how the American Jobs Act will invest in education in Arizona:

- **Mesa Unified District**, with an enrollment of 67,471 students, will receive approximately \$49,583,033 in education jobs funding and approximately \$58,771,607 in K-12 school modernization funding, for a total education investment of approximately **\$108,354,640** under the American Jobs Act.
- **Tucson Unified District**, with an enrollment of 55,369 students, will receive approximately \$43,969,188 in education jobs funding and approximately \$56,539,001 in K-12 school modernization funding, for a total education investment of approximately **\$100,508,189** under the American Jobs Act.
- **Phoenix Union High School District**, with an enrollment of 25,187 students, will receive approximately \$22,752,035 in education jobs funding and approximately \$32,688,303 in K-12 school modernization funding, for a total education investment of approximately **\$55,440,338** under the American Jobs Act.
- **Washington Elementary District**, with an enrollment of 23,288 students, will receive approximately \$17,687,861 in education jobs funding and approximately \$8,815,442 in K-12 school modernization funding, for a total education investment of approximately **\$26,503,303** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Phoenix Elementary District**, with an enrollment of 7,073 students, will receive approximately \$10,713,436 in education jobs funding and approximately \$8,164,655 in K-12 school modernization funding, for a total education investment of approximately **\$18,878,091** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.

A full listing and interactive map detailing education investments proposed in the American Jobs Act for all states and districts can be found at <http://data.ed.gov/american-jobs-act>.

Estimates above are based on the legislative proposal contained in the American Jobs Act and are subject to change. District-level estimates are based on current information reported by the National Center for Education Statistics for the 2009-10 school year.

Changing enrollment levels may affect district funding allocations.

Arkansas

The American Jobs Act will invest an estimated **\$591,499,762** in education funding for the students and schools of Arkansas. This investment includes \$278,349,252 to support an estimated 4,100 educator jobs, as well as \$270,703,905 for K-12 school modernization and \$42,446,605 for community college modernization to support an estimated 4,100 modernization jobs.

Below are some examples of how the American Jobs Act will invest in education in Arkansas:

- **Little Rock School District**, with an enrollment of 25,837 students, will receive approximately \$16,725,663 in education jobs funding and approximately \$9,129,648 in K-12 school modernization funding, for a total education investment of approximately **\$25,855,312** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Pulaski County Special School District**, with an enrollment of 17,734 students, will receive approximately \$10,499,750 in education jobs funding and approximately \$5,091,671 in K-12 school modernization funding, for a total education investment of approximately **\$15,591,421** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Springdale School District**, with an enrollment of 18,727 students, will receive approximately \$9,808,568 in education jobs funding and approximately \$3,843,660 in K-12 school modernization funding, for a total education investment of approximately **\$13,652,228** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Fort Smith Public Schools**, with an enrollment of 14,010 students, will receive approximately \$8,669,717 in education jobs funding and approximately \$4,471,774 in K-12 school modernization funding, for a total education investment of approximately **\$13,141,491** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **North Little Rock School District**, with an enrollment of 9,661 students, will receive approximately \$6,698,125 in education jobs funding and approximately \$3,946,662 in K-12 school modernization funding, for a total education investment of approximately **\$10,644,787** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.

A full listing and interactive map detailing education investments proposed in the American Jobs Act for all states and districts can be found at <http://data.ed.gov/american-jobs-act>.

Estimates above are based on the legislative proposal contained in the American Jobs Act and are subject to change. District-level estimates are based on current information reported by the National Center for Education Statistics for the 2009-10 school year.

Changing enrollment levels may affect district funding allocations.

California

The American Jobs Act will invest an estimated **\$7,564,956,593** in education funding for the students and schools of California. This investment includes \$3,621,259,606 to support an estimated 37,300 educator jobs, as well as \$2,812,563,514 for K-12 school modernization and \$1,131,133,473 for community college modernization to support an estimated 51,300 modernization jobs.

Below are some examples of how the American Jobs Act will invest in education in California:

- **Los Angeles Unified School District**, with an enrollment of 670,746 students, will receive approximately \$571,729,665 in education jobs funding and approximately \$743,536,701 in K-12 school modernization funding, for a total education investment of approximately **\$1,315,266,366** under the American Jobs Act.
- **San Diego City Unified School District**, with an enrollment of 131,417 students, will receive approximately \$87,864,811 in education jobs funding and approximately \$91,761,585 in K-12 school modernization funding, for a total education investment of approximately **\$179,626,396** under the American Jobs Act.
- **Fresno Unified School District**, with an enrollment of 75,468 students, will receive approximately \$70,532,158 in education jobs funding and approximately \$97,509,501 in K-12 school modernization funding, for a total education investment of approximately **\$168,041,659** under the American Jobs Act.
- **Long Beach Unified School District**, with an enrollment of 86,283 students, will receive approximately \$64,538,571 in education jobs funding and approximately \$75,539,032 in K-12 school modernization funding, for a total education investment of approximately **\$140,077,603** under the American Jobs Act.
- **San Bernardino City Unified School District**, with an enrollment of 53,837 students, will receive approximately \$46,188,086 in education jobs funding and approximately \$60,330,244 in K-12 school modernization funding, for a total education investment of approximately **\$106,518,330** under the American Jobs Act.

A full listing and interactive map detailing education investments proposed in the American Jobs Act for all states and districts can be found at <http://data.ed.gov/american-jobs-act>.

Estimates above are based on the legislative proposal contained in the American Jobs Act and are subject to change. District-level estimates are based on current information reported by the National Center for Education Statistics for the 2009-10 school year.

Changing enrollment levels may affect district funding allocations.

Colorado

The American Jobs Act will invest an estimated **\$801,199,637** in education funding for the students and schools of Colorado. This investment includes \$478,613,481 to support an estimated 7,000 educator jobs, as well as \$265,104,258 for K-12 school modernization and \$57,481,898 for community college modernization to support an estimated 4,200 modernization jobs.

Below are some examples of how the American Jobs Act will invest in education in Colorado:

- **Denver County School District 1**, with an enrollment of 77,267 students, will receive approximately \$73,776,110 in education jobs funding and approximately \$75,450,524 in K-12 school modernization funding, for a total education investment of approximately **\$149,226,634** under the American Jobs Act.
- **Jefferson County School District R-1**, with an enrollment of 86,282 students, will receive approximately \$43,302,906 in education jobs funding and approximately \$8,710,125 in K-12 school modernization funding, for a total education investment of approximately **\$52,013,030** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Adams-Arapahoe School District 28J**, with an enrollment of 36,967 students, will receive approximately \$27,881,874 in education jobs funding and approximately \$9,851,271 in K-12 school modernization funding, for a total education investment of approximately **\$37,733,145** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Colorado Springs School District 11**, with an enrollment of 29,673 students, will receive approximately \$20,404,492 in education jobs funding and approximately \$6,611,753 in K-12 school modernization funding, for a total education investment of approximately **\$27,016,245** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Pueblo City School District 60**, with an enrollment of 18,325 students, will receive approximately \$14,752,249 in education jobs funding and approximately \$5,493,964 in K-12 school modernization funding, for a total education investment of approximately **\$20,246,213** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.

A full listing and interactive map detailing education investments proposed in the American Jobs Act for all states and districts can be found at <http://data.ed.gov/american-jobs-act>.

Estimates above are based on the legislative proposal contained in the American Jobs Act and are subject to change. District-level estimates are based on current information reported by the National Center for Education Statistics for the 2009-10 school year.

Changing enrollment levels may affect district funding allocations.

Connecticut

The American Jobs Act will invest an estimated **\$559,320,882** in education funding for the students and schools of Connecticut. This investment includes \$336,337,446 to support an estimated 3,800 educator jobs, as well as \$185,012,563 for K-12 school modernization and \$37,970,873 for community college modernization to support an estimated 2,900 modernization jobs.

Below are some examples of how the American Jobs Act will invest in education in Connecticut:

- **Hartford School District**, with an enrollment of 21,216 students, will receive approximately \$29,553,823 in education jobs funding and approximately \$14,814,610 in K-12 school modernization funding, for a total education investment of approximately **\$44,368,432** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Bridgeport School District**, with an enrollment of 20,161 students, will receive approximately \$22,861,327 in education jobs funding and approximately \$10,487,132 in K-12 school modernization funding, for a total education investment of approximately **\$33,348,459** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **New Haven School District**, with an enrollment of 19,853 students, will receive approximately \$22,287,866 in education jobs funding and approximately \$10,173,159 in K-12 school modernization funding, for a total education investment of approximately **\$32,461,025** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Waterbury School District**, with an enrollment of 18,152 students, will receive approximately \$19,980,936 in education jobs funding and approximately \$9,029,547 in K-12 school modernization funding, for a total education investment of approximately **\$29,010,482** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **New Britain School District**, with an enrollment of 10,226 students, will receive approximately \$10,678,893 in education jobs funding and approximately \$4,688,968 in K-12 school modernization funding, for a total education investment of approximately **\$15,367,861** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.

A full listing and interactive map detailing education investments proposed in the American Jobs Act for all states and districts can be found at <http://data.ed.gov/american-jobs-act>.

Estimates above are based on the legislative proposal contained in the American Jobs Act and are subject to change. District-level estimates are based on current information reported by the National Center for Education Statistics for the 2009-10 school year.

Changing enrollment levels may affect district funding allocations.

Delaware

The American Jobs Act will invest an estimated **\$167,871,489** in education funding for the students and schools of Delaware. This investment includes \$82,997,471 to support an estimated 1,100 educator jobs, as well as \$73,285,210 for K-12 school modernization and \$11,588,808 for community college modernization to support an estimated 1,100 modernization jobs.

Below are some examples of how the American Jobs Act will invest in education in Delaware:

- **Christina School District**, with an enrollment of 16,980 students, will receive approximately \$13,523,211 in education jobs funding and approximately \$6,482,463 in K-12 school modernization funding, for a total education investment of approximately **\$20,005,675** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Red Clay Consolidated School District**, with an enrollment of 15,674 students, will receive approximately \$11,544,829 in education jobs funding and approximately \$4,948,282 in K-12 school modernization funding, for a total education investment of approximately **\$16,493,111** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Capital School District**, with an enrollment of 6,250 students, will receive approximately \$6,686,394 in education jobs funding and approximately \$4,272,094 in K-12 school modernization funding, for a total education investment of approximately **\$10,958,488** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Colonial School District**, with an enrollment of 10,125 students, will receive approximately \$7,436,469 in education jobs funding and approximately \$3,173,072 in K-12 school modernization funding, for a total education investment of approximately **\$10,609,541** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.
- **Seaford School District**, with an enrollment of 3,467 students, will receive approximately \$4,113,134 in education jobs funding and approximately \$2,815,789 in K-12 school modernization funding, for a total education investment of approximately **\$6,928,922** under the American Jobs Act. This district is also eligible for additional K-12 school modernization funding based on a state-level determination of need.

A full listing and interactive map detailing education investments proposed in the American Jobs Act for all states and districts can be found at <http://data.ed.gov/american-jobs-act>.

Estimates above are based on the legislative proposal contained in the American Jobs Act and are subject to change. District-level estimates are based on current information reported by the National Center for Education Statistics for the 2009-10 school year.

Changing enrollment levels may affect district funding allocations.

District of Columbia

The American Jobs Act will invest an estimated **\$132,321,992** in education funding for the students and schools of District of Columbia.
