FALL 2004 COLLEGE AND UNIVERSITY ENROLLMENT IN CONNECTICUT — COMPREHENSIVE REPORT —

Total enrollment at Connecticut's 47 colleges and universities¹ reached an all-time record of 172,740 in fall 2004. (See Tables 1 and 3.)

A November 2004 report, *Fall 2004 College and University Headcounts in Connecticut*, analyzed headcount enrollment by status, level, institution and sector.² This broader report discusses general trends in headcount enrollment; analyzes data on full-time equivalent (FTE) enrollment and presents demographic details on residence, race, freshmen, migration of recent high school graduates, gender and age.

GENERAL TRENDS

The fall 2004 total of 172,740 students is the highest ever for Connecticut and represents a third consecutive year of record enrollment. Each of the last three years in turn surpassed the previous record of 169,132, set in 1989. Fall 2004 also represents the seventh consecutive year of growth since 1997, when total enrollment (154,059) was the lowest of the last quarter century.

This year's increase of 2,116 students (1.2%) over 2003 is better than last year's anemic growth (0.5%), but below the average increase of the last seven years. Growth was higher among public institutions (up 1.5% over 2003) than at the independent institutions (up 0.8%). Growth by system within the public sector also varied, with the University of Connecticut (UConn) up 3.6 percent, the 12 community colleges up 1.3 percent and the four campuses of Connecticut State University (CSU) up 0.3 percent.

	Total Enrollment Fall 2004	Percent of State Total
Public Institutions		
University of Connecticut	27,579	16%
Connecticut State University	35,537	21%
Community Colleges	45,743	26%
U.S. Coast Guard Academy	994	1%
Subtotal	109,853	64%
Independent Institutions		
National Independents	18,953	11%
Regional Independents	40,559	23%
Two-Year Independents	3,375	2%
Subtotal	62,887	36%
Statewide Total	172,740	100%

Public institutions enrolled 64 percent of all students, and the independents captured the other 36 percent. The 12 community colleges are the largest sector of higher education in Connecticut, enrolling more than one in every four students. In second place are the 18 regional independent colleges. These two sectors combined enroll just short of a majority (49.96%) of college students in Connecticut.

The overall growth of 1.2 percent statewide masks a 3.4 percent increase in full-time enrollment and a 2.3 percent decline in part-time enrollment. In 1992, full-time students were a slight majority (50.7%) of the total enrollment, but by 2004 they reached a solid majority of 64 percent. See below for data on FTE enrollments.

Especially striking is the growth of traditional students (defined here as full-time, undergraduates under 25 years of age) between 1993 and 2004:

	Change 1993-2004	Percent Change
Traditional undergraduates (full-time, under age 25)	22,882	37%
All other students	-12,618	-13%
Total Enrollment	10,264	6%

Traditional students, however, still are just shy of a majority of the statewide total — 49.2 percent in 2004 vs. 38 percent in 1993.

Total fall 2004 enrollment consists of 80 percent undergraduates, 18 percent graduate students and two percent first-professional students (medical doctors, broadly defined; lawyers and clergy.) An overwhelming majority of both first-professional students (88%) and undergraduates (67%) are enrolled full-time and almost a majority of graduate students (47%) attend full-time.

FULL-TIME EQUIVALENT (FTE) ENROLLMENT

FTE enrollments are a more standardized and comparable measure because they re-express the total credit hours taken by all students as the hypothetical headcount if every student were taking a full-time course load. Table 2 displays both headcount and FTE data by level for every institution, along with the percent change for each total since last year.

As shown in Table 2, the statewide headcount enrollment of 172,631³ translates into 130,125 FTE enrollment, meaning that the “average” student is three-fourths full-time (75% FTE). The 12 community colleges, whose headcount enrollment of 45,743 (26% of the state total) made it the largest of the six major sectors, falls to third place in its FTE enrollment of 25,212 — 19 percent of the state total, behind the 25 percent share of statewide FTE for the regional independents and the 20 percent for CSU.

The 2004 increase of 2.8 percent in FTE enrollment, compared to a 1.2 percent rise in

headcount enrollment, indicates that average credit loads are still growing. That is no surprise given the 3.4 percent increase in full-time headcount and the 2.3 percent decline in part-time headcount.

The average FTE per headcount student by sector this year are:

- 97 percent at the national independents (i.e., virtually all full-time)
- 84 percent at UConn
- 81 percent at the regional independents
- 75 percent at CSU
- 55 percent at the community colleges

Table 3 (headcount) and Table 4 (FTE) present 15 years of enrollment data.

DEMOGRAPHIC PROFILE

RESIDENCE. Total headcount enrollment in fall 2004 is comprised of 74 percent Connecticut residents, 22 percent out-of-state students and four percent non-resident aliens. Non-resident aliens are non-citizens who are in the U.S. on student visas. That data, and analogous figures from one and two decades ago, appear below.

	Connecticut	Out-of-State	Non-Resident Aliens	Total
1984	81%	16%	2%	100%
1994	80%	17%	3%	100%
2004	74%	22%	4%	100%

The number of in-state students rose in each of the last six years but generally at a slower rate than overall enrollment to yield a decline in the in-state share. Out-of-state students, both in numbers and as a share of the total, rose in each of the last eight years.

For the first time in our 23 years of complete residence data, non-resident alien enrollment was down for two years in row — off six percent in 2004 after falling four percent in 2003. They were up two percent in 2002, in the first year after the September 11, 2001 attacks. Greater difficulty in obtaining student visas (either directly or as a deterrent to trying to study in the U.S.) is shrinking the size of our international enrollment. The decreases in non-resident aliens generally are greater among first-time students than among continuing students, which will tend to keep those enrollments down in the near future.

Table 5 shows the residence breakdown by level and sector during the last six years. At the undergraduate level in recent years, the in-state share of students ranges from virtually all (i.e., 97%-99%) at the community colleges and the UConn regional campuses to less than 15 percent at the national independents (Connecticut College, Trinity, Wesleyan and Yale). Non-resident aliens represent a much larger share at the graduate level, especially at UConn (21%) and Yale (27%), although both saw a decline this year in the share of non-resident alien graduate students.

In the last seven years at the UConn Storrs campus, out-of-state undergraduates have more than doubled in numbers (from 1,683 to 3,726) and went from 15 percent to 24 percent of all undergraduates. The number of in-state undergraduates rose every year since 1995 — from 9,569 to 11,867 in 2004. The in-state share of the total, however, fell from 84 percent to 75 percent, and the in-state headcount of 11,867 this year is below the peak of 12,217 in 1988.

RACE/ETHNICITY. Data on race and ethnicity among college students in Connecticut for fall 2004 appear in Tables 6 (all enrollments) and 6-A (undergraduate enrollments only). Total enrollment of minority students is just over one in five (21.1%) among all students and just over two percentage points higher (23.2%) among undergraduates.⁴

From 1982 to 2004, the share of total minority students has much more than doubled (from 8.2% to 21.1%), with the larger increases coming in the early 1990s. The share of African Americans has more than doubled during the last 23 years, while the percentages of both Hispanics/Latinos and Asian Americans have more than tripled.

	Fall Enrollment in Connecticut		CT Population 2000 Census	
	1982	2004	All	18 or older
African-American	4.7%	9.5%	8.7%	7.9%
Hispanic/Latino	1.9%	7.3%	9.4%	8.0%
Asian American	1.2%	3.9%	2.4%	2.4%
American Indian	0.4%	0.4%	0.2%	0.2%
Total Minority	8.2%	21.1%	20.7%	18.5%

As seen above, the overall minority share among college students in fall 2004 (21.1%) is just slightly over the share in the general Connecticut population (20.7%) but significantly higher than that same share among the adult population (18.5%).

Among the four minority communities, Hispanics or Latinos are the only group whose representation among college students still is significantly less than their representation in the general population, under either definition. The share of African Americans among college students (9.5%) is not much higher than their share among the general population (8.7%) but is significantly higher than in the adult population (7.9%).

Minority students are more underrepresented among degree recipients than they are among general college students. In fall 2003, the minority share of enrollment was 20.6 percent, while at the end of that academic year, the minority share among those receiving degrees or certificates was 16.7 percent. That 16.7 percent share of degrees for minorities in 2003-04 is about equal to the 16.8 percent share of minority enrollment back in fall 1997. We expect that recent gains in minority enrollment will soon show up in degree production.⁵

FIRST-TIME FRESHMEN. A total of 27,814 students enrolled as first-time freshmen in fall 2004. (See Tables 7 & 8.) Of that total, 23,855 (86%) were full-time.

First-time freshmen represent 53 percent of those with freshmen status (the other 47% were

enrolled in the past — either at their current college or elsewhere — but have not earned enough credits to reach sophomore status), 20 percent of all degree-seeking undergraduates and 16 percent of all college students.

More than four in five (82%) first-time freshmen graduated from high school within the last year, two-thirds (68%) of all freshmen were from Connecticut, and a slight majority (52%) were both recent high school graduates and from in-state. That pool of in-state high school graduates is expected to increase until the year 2008.

Complete reporting of this data (i.e., designating recent high school graduates) has only been available for the last six years. Between 1999 and 2002, the share of first-time freshmen who were both in-state and recent high school graduates ranged between 44 and 48 percent. The last two years were the first time that a majority of incoming freshmen were both in-state and recent high-school graduates.

RECENT HIGH SCHOOL GRADUATES. The data on recent high school graduates who enroll as first-time freshmen yields two sets of numbers — an indicator of likely enrollment trends in the near future and statewide data on in-state retention.

Recent high school graduates from Connecticut who enroll in Connecticut colleges are the “seed corn” for future enrollment, especially at the public four-year colleges. Schools with major declines in enrollment of those freshmen are, in effect, eating their seed corn.

The good news is that the disturbing data in fall 2003 at the CSU (i.e., down 8% in those seed corn freshmen vs. down 2% in all other undergraduates) were reversed in fall 2004 (up 9% in seed corn vs. down .01% in all other undergraduates). The total number of CSU freshmen climbed 11 percent, primarily because of a 30 percent increase in in-state freshmen who were not recent high school graduates.

The bad news is that the independent sector showed some weakness in freshmen data for 2004. The total of first-time freshmen fell two percent, while other undergraduates rose three percent. The number of in-state and recent high school graduate freshmen at the independents declined 19 percent. Those freshmen are less essential in the independent sector, where they represent only about a quarter of all first-time freshmen. This data may be a blip and reflect increased intra-state competition due to major increases in the seed corn of nine percent at the CSU and 18 percent at the community colleges, but warrants watching.

Less timely data on inter-state migration of recent high school graduates is available for 2002, the last year of full data.⁶ In fall 2002, some 23,528 Connecticut residents graduating in the high school Class of 2002 enrolled as first-time freshmen in the U.S. — 12,796 enrolled in a Connecticut college and the other 10,732 matriculated elsewhere.

**CONNECTICUT RESIDENTS
RECENT (LAST 12 MONTHS) HIGH SCHOOL GRADUATES
ENROLLED AS FIRST-TIME FRESHMEN IN THE U.S.**

	1992	1994	1996	1998	2000	2002
Total CT Resident Freshmen in U.S.	19,768	19,343	19,577	21,399	22,812	23,528
Total remaining in Connecticut	9,550	9,011	9,202	10,429	11,824	12,796
Total attending elsewhere in U.S.	10,218	10,332	10,375	10,970	10,988	10,732
Percent remaining in Connecticut	48%	47%	47%	49%	52%	54%

Connecticut retained a majority of its in-state freshmen in both 2002 (54%) and 2000 (52%), after retaining less than half during the 1990s.

GENDER. Females enrolled in Connecticut colleges in fall 2004 (100,553) constitute 58 percent of total enrollment, with both that number and percentage representing all time records. (See Tables 9 & 10.) In contrast, as late as 1967 (which incorporates the first four years of the post-World War II baby boom) total in-state college enrollment of both men and women was only 95,796, or less than just the female enrollment 37 years later.

The gender ratio in higher education differs significantly from that in the general population of older teenagers and adults. The data below show that females are just shy of a majority in the age group (15-34) that provides 84 percent of all college students, yet constitute 58 percent of total enrollment.

DEMOGRAPHIC DATA BY AGE GROUP

Age Group	Percent	
	Female in General Population*	Percent of all College Students**
15-34	49.9%	84%
35-59	51.2%	15%
60+	58.1%	1%
Total		100%

*Connecticut, 2000 U.S. Census

**Connecticut, Fall 2004

This increased representation of females is part of a trend that started at least 44 years earlier. Women represented 35 percent of full-time undergraduate enrollment in 1960. They were 40 percent of all enrollment in 1970, became a majority of Connecticut college students by 1978 and were at 55 percent by 1986 before first reaching 58 percent in 2002.

The changes in the overall gender mix over the last 29 years are summarized on the next page. The share of male and female in the general population have remained both extremely stable and virtually a 50-50 split over those almost three decades. Moreover, at least among potential college students under age 25, the genders do not significantly differ in the socio-economic status (SES) factors associated with college attendance. Yet, one gender grew in college enrollment by 42 percent while the other gender fell in its college enrollment by five percent.

The female majority is nearly uniform between undergraduates (58% female) and graduate students (60% female), although women are more likely than men to attend part-time at both levels; however, women fall just short of a majority (49%) in the first-professional fields of training medical doctors (broadly defined), lawyers and clergy. Women are very likely to become a majority at this level soon because they were 29 percent of first-professional students in 1976, have been above 40 percent since 1986 and first exceeded 45 percent in 2000.

	1976	2004	Change 1976-2004	Percent Change
Female Enrollment	70,705	100,553	29,848	42%
Male Enrollment	75,853	72,078	-3,775	-5%
Total	146,558	172,631	26,073	18%

This decisive female majority in college enrollment also appears in degree recipients. That majority is actually slightly magnified at the exiting end of the education pipeline because women received 59 percent of all degrees and awards during 2003-04 vs. their likewise 58 percent share among all enrollment at the start of that year.⁵

AGE. Connecticut undergraduates in 2004 tend to be younger than their counterparts from previous years. (See Tables 10A & 11.) The percent of undergraduates age 25 or older peaked at 37 percent in 1994 and has declined every year since then to 26 percent in fall 2004.

The exhibit on the next page shows the age distribution of both undergraduate and combined graduate/first-professional enrollment in fall 2004.⁷ Also included in the exhibit is the Connecticut age distribution from the 2000 Census, which counted people living in the state, as of April 1, 2000, regardless of their “permanent” residence. Students physically in Connecticut, whether living on or off campus, should have been counted by the Census Bureau as residing in Connecticut. Please note that the Census data is 4½ years older than the enrollment data.

Although there is much imprecision in this comparison, the data gives a rough sense of the share of each age bracket attending college — e.g., the 42,909 Connecticut undergraduate students who are aged 18 or 19 vs. the 84,014 Connecticut residents aged 18 or 19 in 2000 suggests that just over half (51%) of those aged 18 or 19 are undergraduates. Almost half (47%) of those aged 20 or 21 and about one in six (17%) of those aged 22-24, are undergraduates.

Note the distinction between the just presented “percent attending” data and “share of the total market” data. The 35,866 undergraduates aged 25 or older are a very significant share (26%) of total undergraduate enrollment. However, because they come from a pool of almost 2.3 million Connecticut residents aged 25 or older, those 35,866 represent just 1.6 percent of that population pool. Those aged 25 or older are a very large potential pool of college students, even though a relatively small share of them dip their toes into that pool.

**CONNECTICUT POPULATION AND AGE DISTRIBUTION
FALL 2004 ENROLLMENT**

Age Range	CT-2000 Census	Undergraduates		Graduate + First-Professional, Combined	
		Number	Est. % Attending	Number	Est. % Attending
-14	709,075				
15-17	132,613	4,135	3%	4	*
18-19	84,014	42,909	51%	9	*
20-21	79,206	37,125	47%	334	0.4%
22-24	108,365	18,314	17%	7,729	7%
25-34	451,640	17,765	4%	16,203	4%
35-44	581,049	10,180	2%	5,234	1%
45-59	657,768	6,629	1%	3,892	1%
60-64	131,652	418	0.3%	245	0.2%
65 and up	470,183	874	0.2%	144	*
Total	3,405,565	138,349		33,794	
Population 15 or older	2,696,490	138,349	5.1%	33,793	1.3%

* = less than 0.05%

Est. % attending: Total college students in age group divided by total population in age group.

Median age = 21 for undergraduates and 29 for graduate & first-professionals combined.

The other 102,483 undergraduates who are under aged 25 comprise the remaining 74 percent of undergraduates with reported ages. These students, however, represent just 25.4 percent of the potential student pool of residents aged 15-24, which totals just over 404,000.

This data is not meant to minimize the role of students aged 25 or older. They represent 36 percent of all enrollment in Connecticut — 26 percent of undergraduate and 76 percent of combined graduate and first-professional students. Even just among undergraduates, those 25 and older are almost a majority (49.9%) at the two-year independents, close to a majority (46%) at the community colleges and just about one in five at both CSU and the regional independents.

SUMMARY

The major **positive** findings from the fall 2004 enrollment data are:

- It is the third consecutive record year for total headcount and the seventh consecutive year of growth.
- It is the sixth consecutive record year for full-time headcount and the tenth consecutive year of growth.
- It is the fifth consecutive record year of full-time equivalent (FTE) enrollment and the seventh consecutive year of growth.
- Enrollment growth is more robust than last year.
- There are increases in both numbers and percentage shares of minority enrollments.
- 52 percent of first-time freshmen were both recent high-school graduates and Connecticut residents.

Areas of some concern:

- A continuing gender imbalance that is approaching three females for every two males.
- A decline in enrollment of non-resident aliens for a second straight year.
- Slight decline in freshmen in the independent sector.

The developments that present **mixed implications** include:

- Increasing share of full-time enrollment.
- Growth among traditional students.
- Growth among younger students.

The positive implications of these trends are efficiency and the increased likelihood of timely degree completion. The negative implications reflect concerns about access — an overemphasis on full-time and/or “day” students should not preclude those who attend part-time or on nights/weekends.

The negative implications also relate to the number of new public high school graduates in Connecticut because they are projected to peak in 2008. As the number of high school graduates levels off in the coming years, Connecticut colleges will need to develop new strategies to maintain enrollments. The future looks good, but the colleges and universities in Connecticut must adapt to reflect the changing demographic and social circumstances.

ENDNOTES

1. Connecticut gained its 47th college in fall 2004 with the opening of Legion of Christ College of Humanities as a new two-year college. (The 47 colleges consist of 19 publics and 28 independents.) Briarwood College switched from a two-year college to a four-year college, also effective in fall 2004, but still appears in the tables (for the last time) as a two-year institution for historical consistency.

The University of Connecticut, with its main campus in Storrs, counts as one institution, but includes the UConn Health Center (its stand-alone medical and dental school in Farmington) and the three full UConn branch campuses in Avery Point, Stamford and Tri-Campus. (Tri-Campus is further broken down into its campuses in Hartford, Torrington and Waterbury.)

Not included in these statewide totals is Charter Oak State College, the state's external degree program, which enrolled 1,495 part-time undergraduates in fall 2004. The time-series data throughout this report consistently excludes Charter Oak from the analysis. Many Charter Oak students are simultaneously enrolled elsewhere in Connecticut and already are in the statewide total. They would be double counted if the Charter Oak totals were included in the statewide tallies. However, we are working with Charter Oak on how best to incorporate their non-double-counted students into that total.

2. *Fall 2004 College and University Headcounts in Connecticut*; November 2004, <http://www.ctdhe.org/info/pdfs/EnrollmentFall2004Report.pdf>. The current statewide headcount enrollment of 172,740 is higher than the 172,735 reported in that document and reflects a correction from Holy Apostles College producing that net gain of five students. No substantive differences in that earlier report result from this correction.
3. The rest of this analysis excludes the 18 students enrolled at St. Thomas Seminary and the 91 students at Legion of Christ, for whom complete FTE and demographic details are not available. With those 109 students (all of whom are undergraduates) excluded, the statewide total in all subsequent tables thus is 172,631 rather than the 172,740 total already introduced.
4. This data understates minority enrollment because four percent of all students in fall 2004 are non-resident aliens here on student visas (and could be of any race) and eight percent were reported as race/ethnicity unknown. Unless all of these 12 percent are White non-Hispanic, the minority share would be higher.
5. *2003-04 Degrees Conferred by Connecticut Institutions*, December 2004, <http://www.ctdhe.org/info/pdfs/DegreesConferred2004.pdf>.
6. Although we get timely data from Connecticut colleges every year, the national data, from which we get Connecticut residents who enroll in other states, is only collected for the fall semester of even-numbered years. That data is from the Integrated Postsecondary Education Data System (IPEDS) maintained by the National Center for Education Statistic (NCES) in the U.S. Department of Education.
7. Assumes that all college students under age 18 are in the 15-17 age bracket. Note that the totals by age are slightly smaller than they appear earlier in this report because age was unknown for 488 students, or 0.3 percent. Also note that the 13 graduate students who are under age 20 almost certainly are taking a graduate-level course and likely are not matriculated and degree seeking

*Briarwood became a four-year college this fall, but is still listed in the two-year category in this table comparing 2003 and 2004.

This table includes a correction with a net shift of five more students at Holy Apostles that was reported in Fall 2004, *Fall 2004 College and University Headcounts in Connecticut*.
