

**Public Libraries Survey  
Fiscal Year 2008**

*June 2010*

## USER NOTE

The Institute of Museum and Library Services program report "Public Libraries Survey Fiscal Year 2008" contains corrections for errors in the state of Kansas. The Kansas errors related to the Collection variables, Electronic Books, State Licensed Databases, Other Licensed Databases, and Current Electronic Serial Subscriptions having the largest changes. Audio, Video, Local Licensed Databases, and Current Print Serial Subscriptions have minor changes. Notification was received after the report was posted on the web and printing was complete. The report and data files are now corrected. These corrections affect Tables 12, 12A, 14, 14A, 15, 15A, A4, and A5.

These changes in reported values for these data elements in Kansas also lead to some changes in imputed values for the same data elements in libraries in Iowa, Nebraska, North Dakota, and South Dakota. This is because imputed values are calculated based on the characteristics of libraries (administrative entities) in the same geographic region who serve legal service areas of comparable population size. The scale of the changes in these other states depended on the response rates of the libraries in those states for the variables that needed to be imputed. The minor imputed value change for North Dakota did not result in any changes in the publication tables.

### **Institute of Museum and Library Services**

Marsha L. Semmel, Acting Director

The Institute of Museum and Library Services is the primary source of federal support for the nation's 123,000 libraries and 17,500 museums. The Institute's mission is to create strong libraries and museums that connect people to information and ideas. The Institute works at the national level and in coordination with state and local organizations to sustain heritage, culture, and knowledge; enhance learning and innovation; and support professional development. To learn more about the Institute, please visit [www.ims.gov](http://www.ims.gov).

## Acknowledgments

Many individuals made important contributions to this report. The Institute of Museum and Library Services (IMLS) is grateful for their dedication.

Following is the list of those individuals (alphabetical by group):

U.S. Census Bureau staff:

Terri Craig, Suzanne Dorinski, Michael Freeman, Natasha Isaac, Jennifer Keng, Patricia O'Shea, and Peter Schilling.

IMLS would like to extend a special thank you to members of the survey advisory group for their help in managing the survey process. The Library Statistics Working Group (LSWG) is a vital part of the survey team. Their time and effort has helped make this report a more valuable resource to the library community and the public.

Members of the LSWG:

Dr. John Carlo Bertot, Professor and Director, Center for Library Innovation, University of Maryland

Hulen Bivins, State Data Coordinator, Alabama Public Library Service

Howard Boksenbaum, Chief of Library Services, Rhode Island Department of Administration

Ira Bray, State Data Coordinator, California State Library

Dianne Carty, State Data Coordinator, Massachusetts Board of Library Commissioners

Denise Davis, Director, American Library Association Office for Research and Statistics

Martha Kyrillidou, Director of Statistics and Service Quality, Association of Research Libraries

Suzanne Miller, State Librarian and Director, Minnesota State Library Services

Frank Nelson, State Data Coordinator, Idaho Commission for Libraries

Wayne Onkst, State Librarian and Commissioner, Kentucky Department for Libraries and Archives

Timothy Owens, State Data Coordinator, State Library of North Carolina

Peggy D. Rudd, Director and Librarian, Texas State Library and Archives Commission

Dr. Carol Tenopir, Chancellor's Professor, School of Information Sciences, University of Tennessee

Chris Walker, Director of Research and Assessment, Local Initiative Support Corporation

Jan Walsh, State Librarian, Washington State Library Division

IMLS also extends sincere gratitude to the State Data Coordinators and other State Library Agency staff who provided the data for this report. Their diligent efforts result in a national data resource with an exceptionally high response rate, year after year.

## Introduction

The Public Libraries Survey (PLS) is a voluntary survey conducted annually by the Institute of Museum and Library Services (IMLS). IMLS collects these data under the mandate in the Museum and Library Services Act of 2003 as stated in Section 210. The U.S. Census Bureau is the data collection agent for IMLS. The Fiscal Year (FY) 2008 survey is the 21st in the series.

### Survey Purpose and Data Items Included in This Report

The PLS provides a national census of public libraries and their public service outlets (see *Key Library Terminology* below). These data are useful to federal, state, and local policymakers; library and public policy researchers; and the public, journalists, and others.

This report provides summary information about public libraries in the 50 states and the District of Columbia for state FY 2008.<sup>1</sup> It covers service measures such as number of uses of electronic resources, number of Internet terminals used by the general public, reference transactions, interlibrary loans, circulation, library visits, children's program attendance, and circulation of children's materials. It also includes information about size of collection, staffing, operating revenue and expenditures, type of legal basis, and number and type of public library service outlets. This report is based on the final data file.

The PLS is designed as a universe survey. The survey frame consists of 9,259 public libraries (9,221 public libraries in the 50 states and the District of Columbia and 38 public libraries in the outlying areas of Guam, the Northern Mariana Islands, Puerto Rico, and the Virgin Islands), as identified by state library agencies. (Public libraries in one outlying area, American Samoa, are not included in the survey frame because their state library agencies have never responded to the request for participation in the survey.) A total of 9,073 of the 9,259 public libraries in the survey frame responded to the FY 2008 PLS (including Guam and Puerto Rico), for a unit response rate of 98.0 percent. Item response rates are included in the tables in this report.<sup>2</sup> The data were submitted over the Internet via a web-based reporting system. (See Data Collection in Appendix B for more information.)

### Organization of This Report

This report includes the following major sections:

- Introduction
  - Survey Purpose and Data Items Included in this Report
  - Congressional Authorization
  - Key Library Terminology
  - Types of Tables Included in this Report
  - History of the Public Libraries Survey
- Findings from the FY 2008 data collection
- Tables (including State Ranking Tables in Appendix A)
- Technical Notes (Appendix B)
- Survey Questionnaire (Appendix C)

---

<sup>1</sup>The fiscal year reporting period varies among states and among local jurisdictions in some states. Please see *Reporting Period* in Appendix B for more information.

<sup>2</sup> The item response rates in the Total line of the tables do not include the outlying areas.

## Congressional Authorization

Two separate laws cover the protection of the confidentiality of individually identifiable information collected by the Institute of Museum and Library Services - the Privacy Act of 1974 and the E-Government Act of 2002. The Guidelines for Ensuring and Maximizing the Quality, Objectivity, Utility, and Integrity of Information Disseminated by the Institute of Museum and Library Services are prepared under the Treasury and General Government Appropriations Act for Fiscal Year 2001, Section 515(b).

IMLS will fulfill the congressional mandate in the Museum and Library Services Act of 2003 as stated in Section 210. Analysis of Impact of Museum and Library Services:

'From amounts described in Sections 214(c) and 275(b), the Director shall carry out and publish analyses of the impact of...library services. Such analyses—

(1) shall be conducted in ongoing consultation with—

(A) State library administrative agencies;

(B) State, regional, and national library...organizations; and

(C) other relevant agencies and organizations;

(2) shall identify national needs for, and trends of...library services provided with funds made available under subtitles B and C...

IMLS library survey activities will be designed to address high-priority library data needs; provide consistent, reliable, complete, and accurate indicators of the status and trends of state and public libraries; and report timely, useful, and high-quality data to the U.S. Congress, the States, other education policymakers, practitioners, data users, and the general public.

## Key Library Terminology<sup>3</sup>

- **Public library.** A public library is an entity that is established under state enabling laws or regulations to serve a community, district, or region, and that provides at least the following: (1) an organized collection of printed or other library materials, or a combination thereof; (2) paid staff; (3) an established schedule in which services of the staff are available to the public; (4) the facilities necessary to support such a collection, staff, and schedule; and (5) that is supported in whole or in part with public funds.
- **Administrative entity.** An administrative entity is the agency that is legally established under local or state law to provide public library service to the population of a local jurisdiction. The administrative entity may have a single public library service outlet, or it may have more than one public library service outlet. (Note: In this report, the term public library means an administrative entity.)
- **Public library service outlet.** Public libraries can have one or more outlets that provide direct service to the public. The three types of public library service outlets included in this report are central library outlets, branch library outlets, and bookmobile outlets. Information on a fourth type of outlet, books-by-mail-only outlets, was collected but omitted from this report because these outlets are not open to the public. The four outlet types are defined in Appendix C in item 709 of the definitions. Table 3 reports data concerning public library service outlets.

---

<sup>3</sup>More detailed definitions of the terms used in this report can be found in the survey questionnaire in Appendix C.

## **Types of Tables Included in This Report**

There are 72 tables in this report: Tables 1 through 1B provide overview data, by state, about the number of public libraries and population of legal service area. Tables 2 through 30 are in sets of 2 each. The base table in each set (Tables 2 through 30) displays data for the nation as a whole and for each of the 50 states and the District of Columbia. The "A" table in each set displays the same data by 11 ranges of population of legal service area. Tables 29 through 32 include data about square footage. Appendix A includes 12 tables of state rankings. Appendix B includes 2 tables that expand on the technical notes.

## **History of the Public Libraries Survey**

In 1985, the National Center for Education Statistics (NCES) and the American Library Association (ALA) conducted a pilot project in 15 states to assess the feasibility of a federal-state cooperative program for the collection of public library data. The project was jointly funded by NCES and the U.S. Department of Education's former Library Programs (LP) office. In 1987, the project's final report recommended the development of a nationwide data collection system. The Hawkins-Stafford Elementary and Secondary School Improvement Amendments of 1988 (P.L. 100-297) charged NCES with developing a voluntary Federal-State Cooperative System (FSCS) for the annual collection of public library data.<sup>4</sup> To carry out this mandate, a task force was formed by NCES and the National Commission on Libraries and Information Science (NCLIS), and the FSCS was established in 1988.

The first survey report in this series, *Public Libraries in 50 States and the District of Columbia: 1989*, which included data from 8,699 public libraries in 50 states and the District of Columbia, was released by NCES in 1991. A data file and survey report have been released annually since then. The states have always submitted their data electronically, via customized personal computer survey software through FY 2004, and via a web-based application beginning in FY 2005.

On October 1, 2007 the survey was transferred from NCES to IMLS. The FY 2006 survey was collected by NCES and released by IMLS. The FY 2008 survey is the second PLS data collection and release by IMLS.

---

<sup>4</sup>This was superseded by the National Education Statistics Act of 1994 (P.L. 103-382) and, more recently, by the Education Sciences Reform Act of 2002.

# Findings

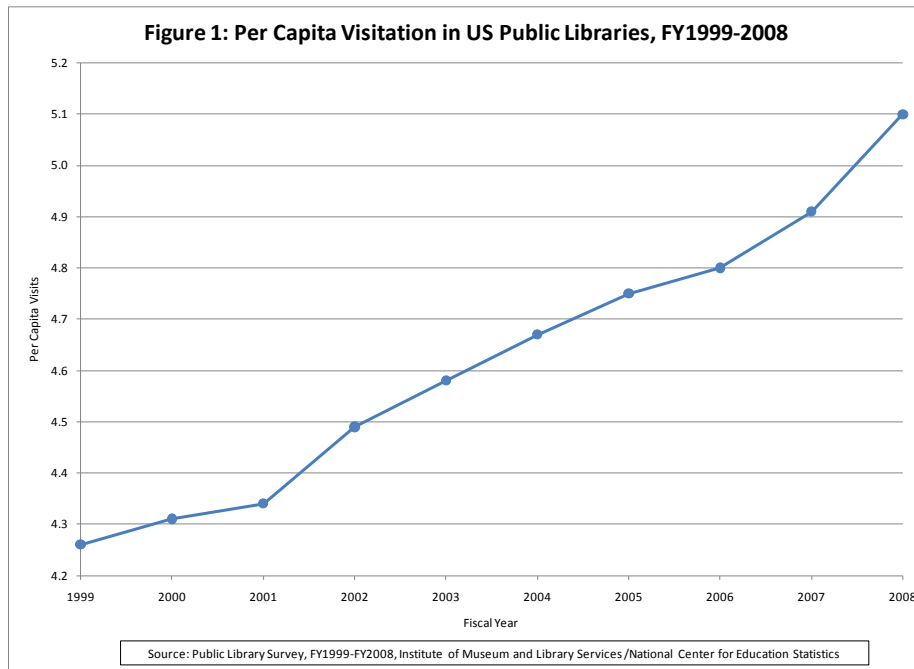

## Introduction

The following section provides highlights of the fiscal year 2008 Public Libraries Survey, comparing key elements from fiscal year 2008 to previous fiscal years. Many of the statistics presented in the long-term trend charts appear in per capita form; this was done because per capita metrics control for population growth and allow for standardized comparisons of change over time.<sup>5</sup> In each line graph that reports dollar amounts over time, inflation was accounted for using a GDP deflator.<sup>6</sup>

There were 9,221 public libraries (administrative entities) in the 50 states and the District of Columbia in fiscal year (FY) 2008 (Table 1), slightly up from the 9,214 that there were in FY2007. Public libraries are widely distributed across the United States; 98.4 percent of counties have at least one administrative entity or library outlet. Public library service areas encompassed 97.4<sup>7</sup> percent of the total population of the states and the District of Columbia in FY2008, either in legally established geographic service areas or in areas under contract. 11.7 percent of the public libraries served 72.8 percent of the population of legally served areas in the United States during FY2008; each of these public libraries had a legal service area population of 50,000 or more (derived from Tables 1A and 1B).

## Library Services

### Visits

Library visitation per capita has steadily increased over the past 10 years (Figure 1). In FY2008, the

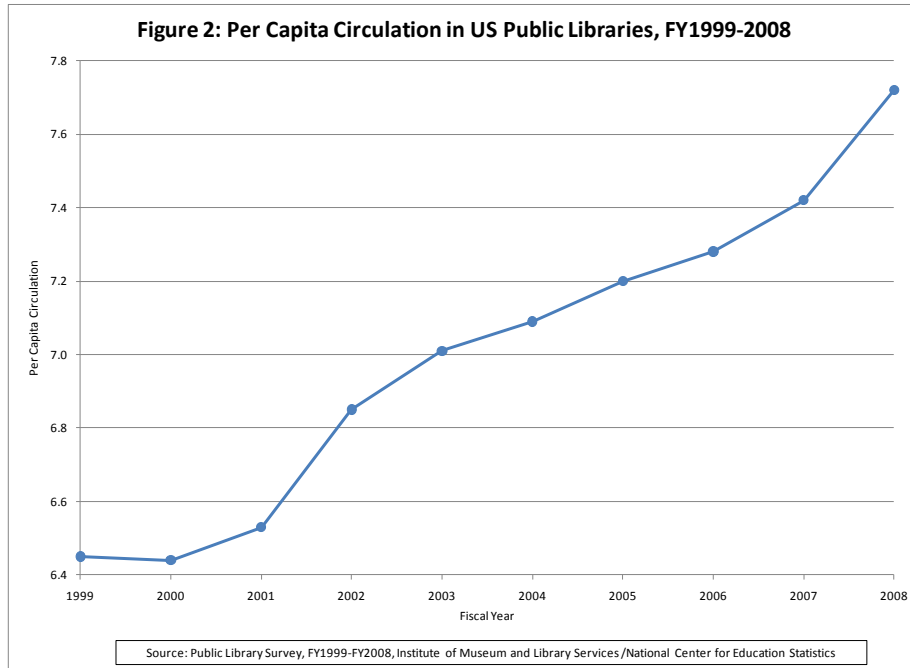

<sup>5</sup> The denominator for all per capita statistics that appear in this section is the total unduplicated population of all library service areas.

<sup>6</sup> <http://www.measuringworth.com/uscompare/>

<sup>7</sup> This percentage was derived by dividing the total unduplicated population of legal service areas for the 50 states and the District of Columbia by the sum of their official state total population estimates. The estimates were obtained from the state data center or other official state sources (table 1). The percentage is based on unrounded data. (Also see *Data File, Public Use: Public Libraries Survey: Fiscal Year 2008*).

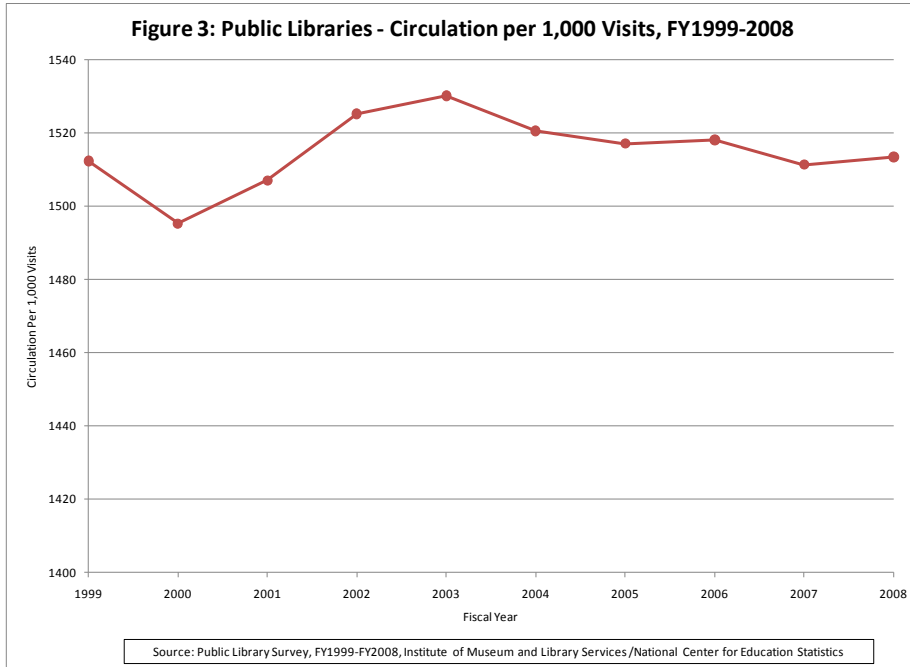

average individual in a library service area visited the library just over 5 times (5.1), compared to 4.3 visits per person in 1999, an increase of 19.7 percent. Overall, there were 1.50 billion public library visits in FY2008, up from 1.43 billion total visits the previous year.

### Circulation

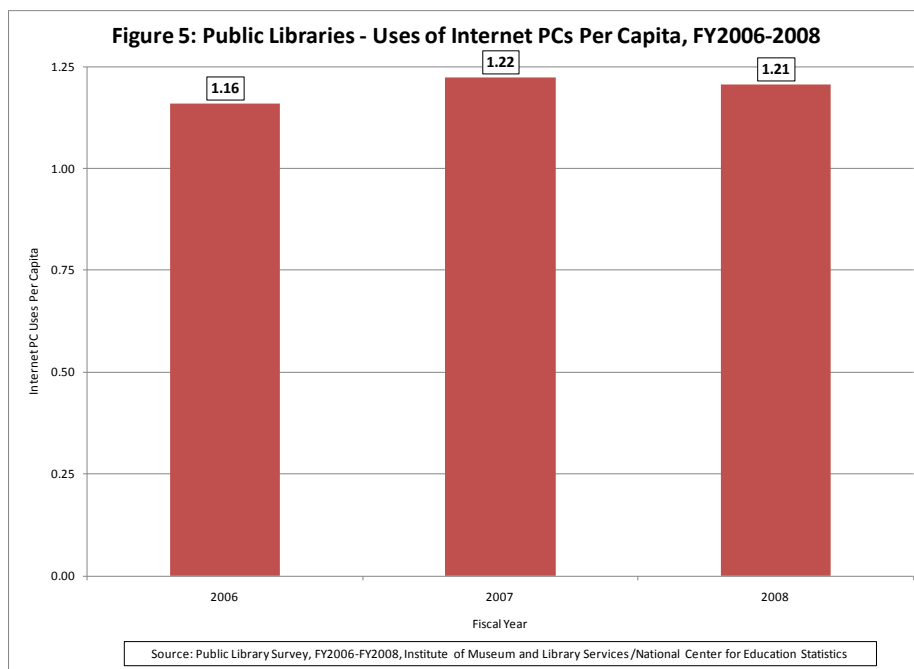

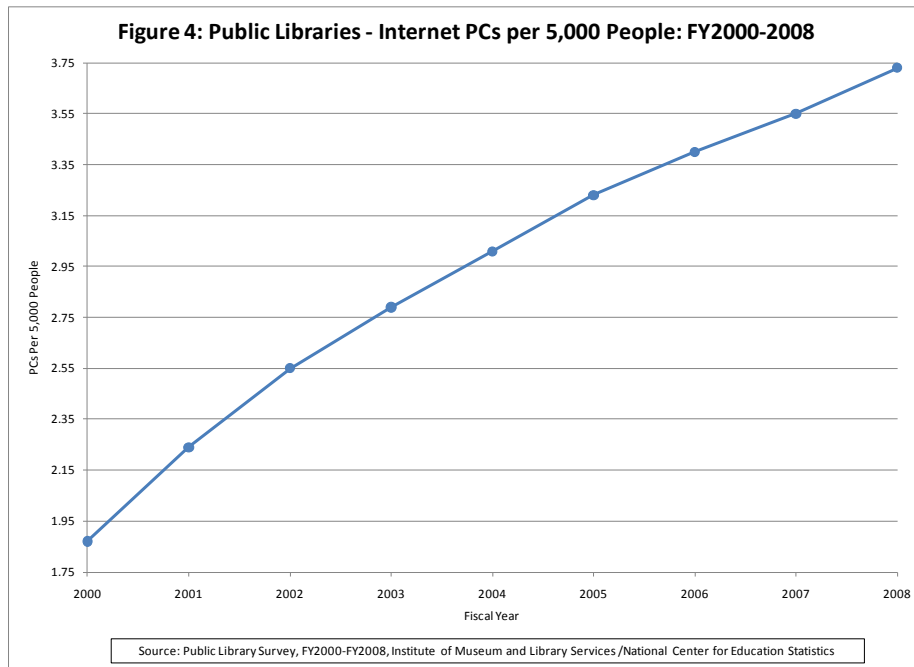

Circulation per capita has also generally increased during the past 10 years, increasing by 19.7 percent since FY1999, when per person circulation stood at 6.5 (Figure 2). The nation's libraries recorded 7.7 circulations per capita in FY2008, up from 7.4 the previous year. Overall, the nation's public libraries circulated 2.28 billion materials during FY2008, up from 2.17 billion in FY2007 and 1.69 billion in FY1999. Overall circulation has increased by 34.5 percent since FY1999.

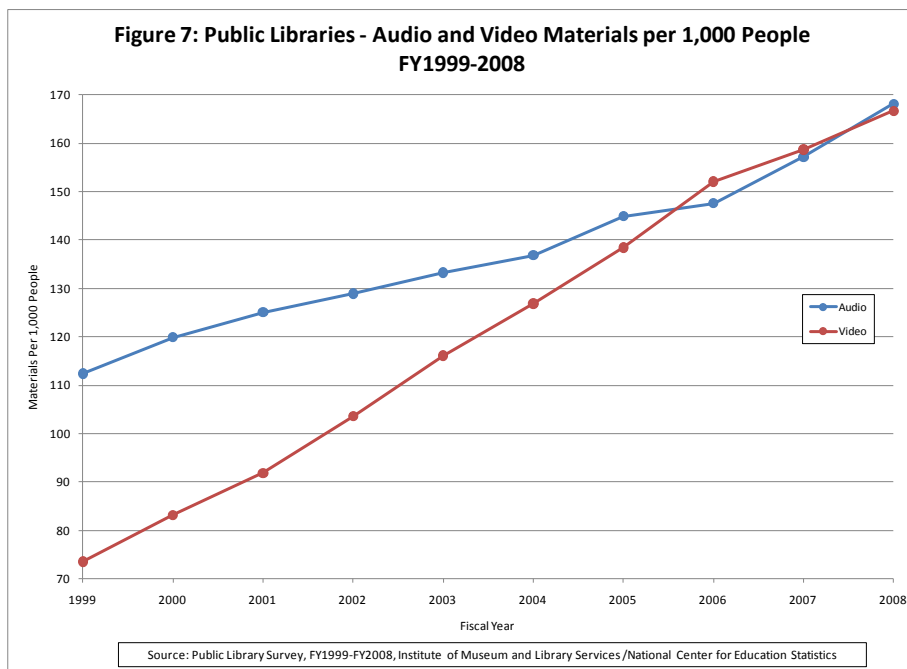

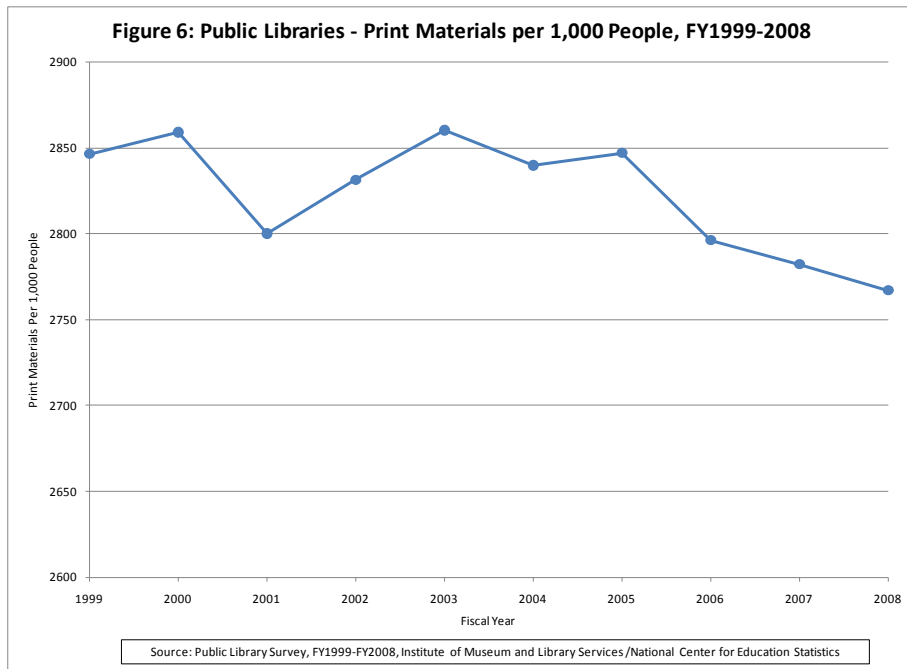

The circulations per 1,000 visits metric provides a rough measure of the likelihood that library visitors will check out materials and allows us to see how patterns of library use are evolving (Figure 3). Circulation per 1,000 visits was virtually the same in FY2008 (1,513) as it was in FY1999 (1,512). Fluctuation between these two points in time was rather modest; the difference between the low point (1,495 circulations per 1,000 visits in FY2000) and the high point (1,530 circulations per 1,000 visits in FY2003) was only 2.3 percent. Even though circulations per visit remained relatively flat during the 10 year study period, it is worth noting that in FY1997, there were 1,598 circulations per visit, so circulations per visit have declined 5.3 percent since then.

## PC Use and Availability

The availability of Internet terminals has nearly doubled over the past 10 years in response to patron demand; Internet PCs per 5,000 people rose from 1.9 in FY1999 to 3.7 in FY2008 (Figure 4). The number of uses of Internet PCs per person is a relatively new data element that was introduced in the FY2006 PLS, so it cannot be traced back as far as most of the other metrics. Internet PC uses per capita has remained at the same basic level since FY2006. There were 1.16 Internet uses per person in FY2006, 1.22 Internet uses per person in FY2007 and 1.21 Internet uses per person in FY2008 (Figure 5).

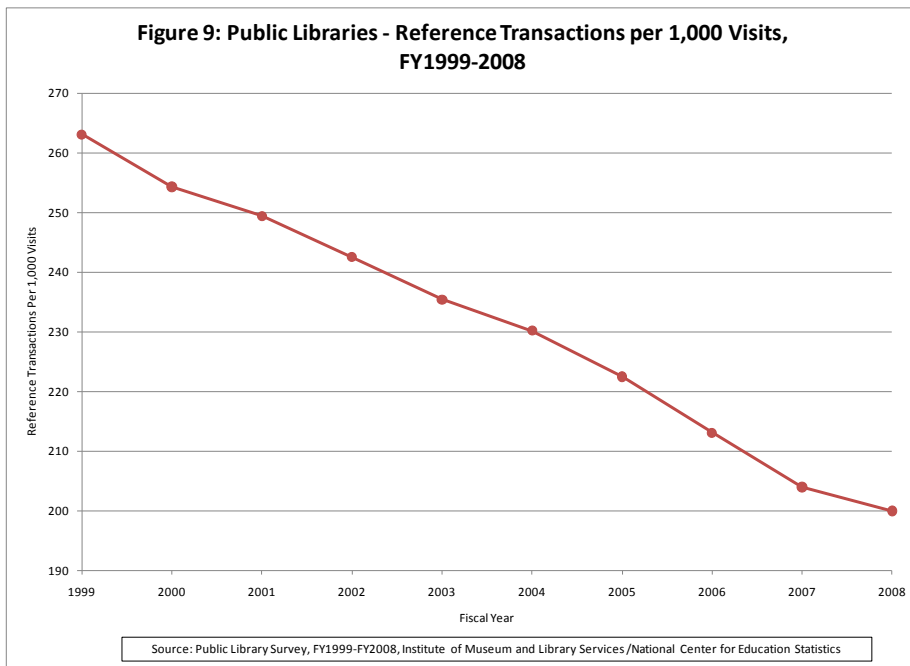

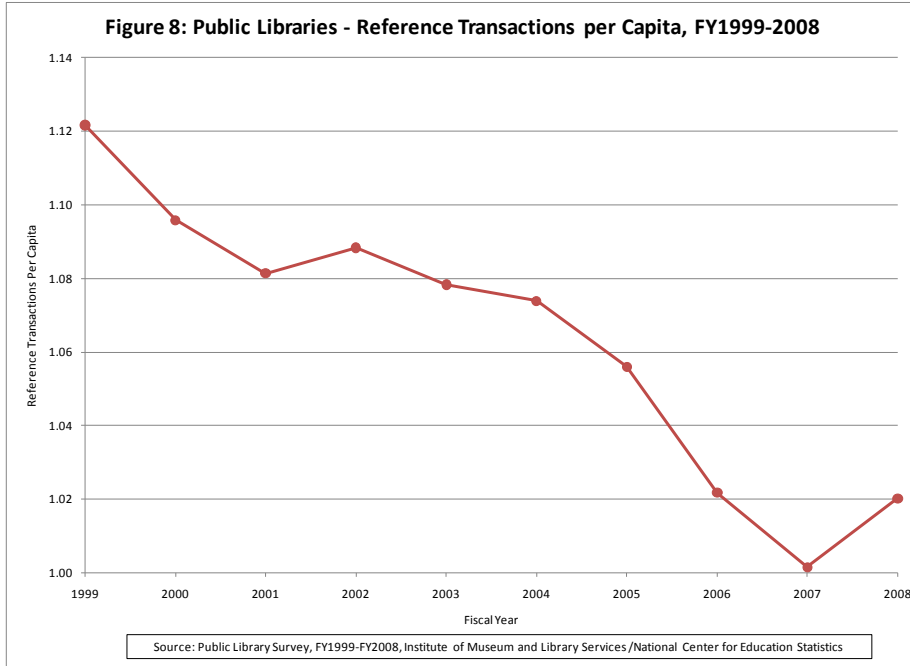

Collections

The composition of library collections has changed somewhat over the past 10 years. The number of print materials per 1,000 people has fluctuated up and down over the time period, but on the balance it has declined from 2,846 print materials per 1,000 people in FY1999 to 2,767 print materials per 1,000 people in FY2008, a decrease of 2.8 percent (Figure 6). The high point during the study period was FY2003, when libraries reported 2,860 print materials per 1,000 people. At the same time that print materials per person have decreased slightly, the amount of video and audio materials per person has increased considerably. Video materials per capita more than doubled during the study period, increasing from 73.5 video materials per 1,000 people in FY1999 to 166.7 video materials per 1,000

people in FY2008, an increase of 126.6 percent (Figure 7). The availability of audio materials also increased markedly, going from 112.4 materials per 1,000 people in FY1999 to 168.1 materials per 1,000 people in FY2008, an increase of nearly 50 percent (49.6 percent).

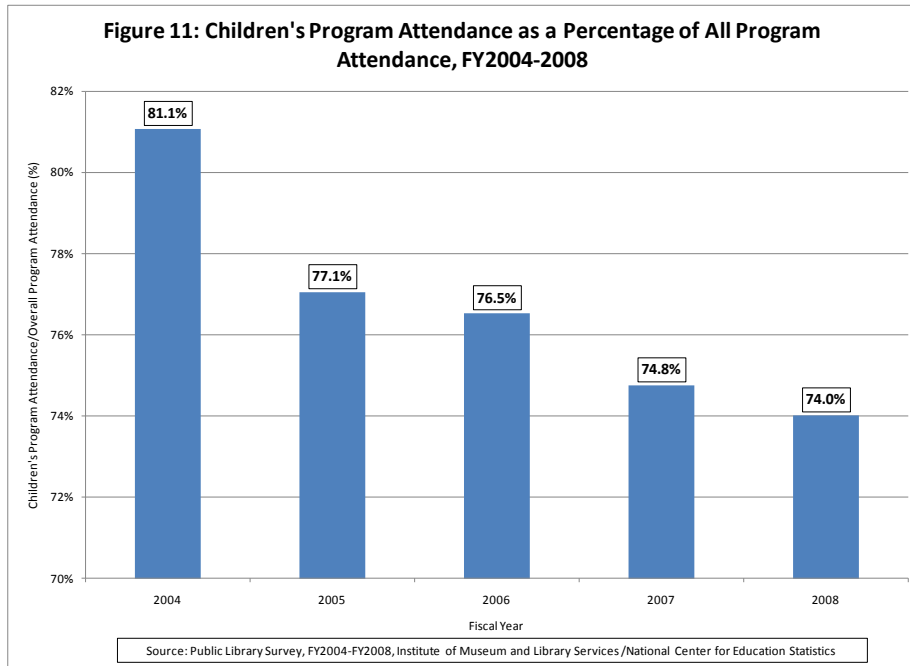

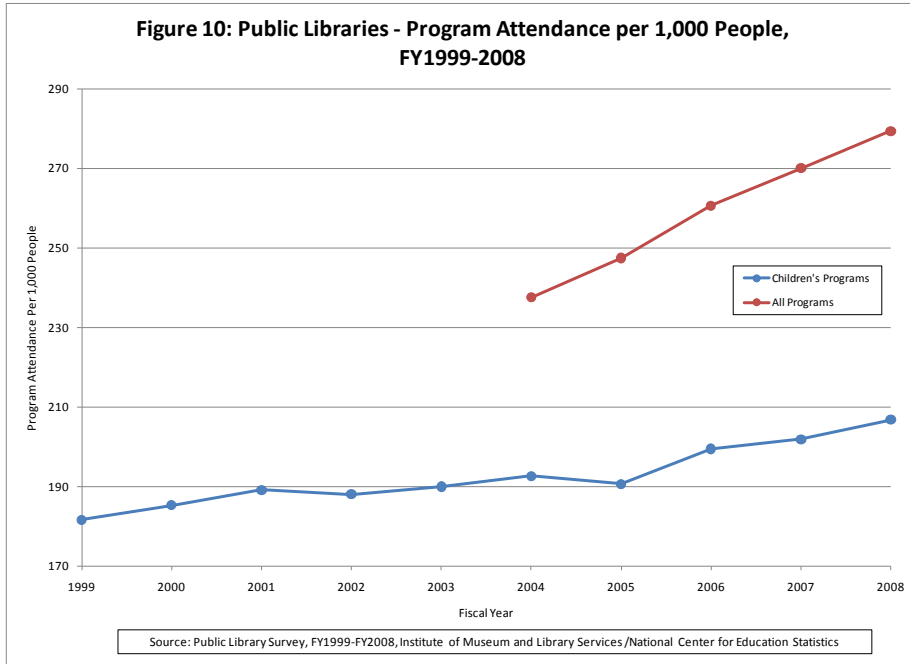

*Reference Transactions*

Unlike circulation per capita and per capita visitation, per capita reference transactions have generally declined over the last 10 years, going from 1.12 reference transactions per capita in FY1999 to 1.02 in FY2008, a decline of 9.0 percent (Figure 8). Not only have reference transactions declined relative to

population, but they have also declined relative to visitation. In FY1999, there were 263.1 reference transactions per 1,000 visits (Figure 9). By FY2008, the figure had declined to 200.0 reference transactions per 1,000 visits, a decrease of 24.0 percent. This decline in reference transactions is likely due to the rise of the Internet as an alternate source for information; patrons may be using the Internet to answer more straightforward questions and enlisting the help of library staff to answer questions that require more time, expertise and research experience.

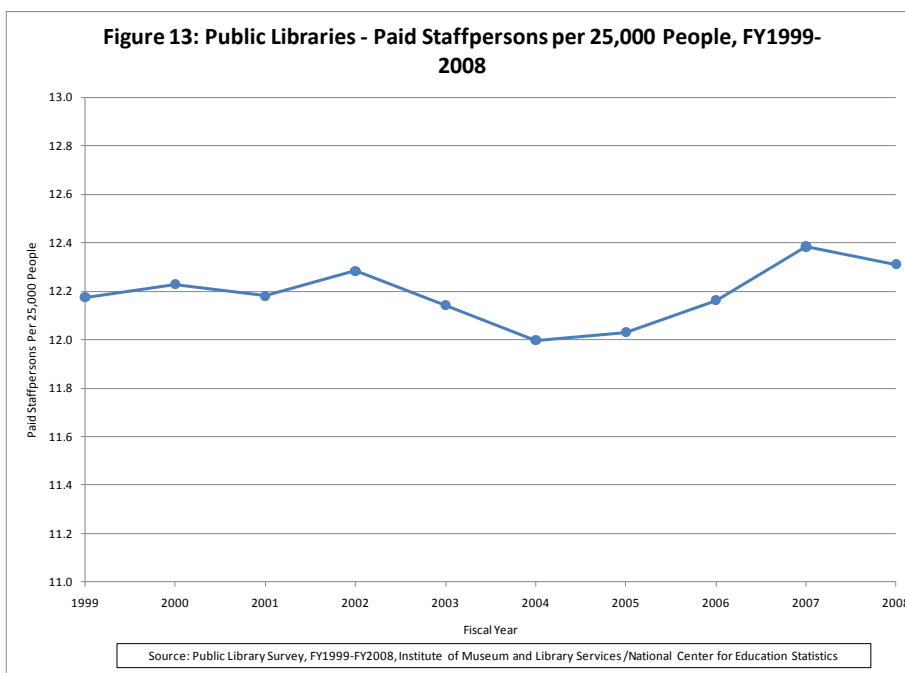

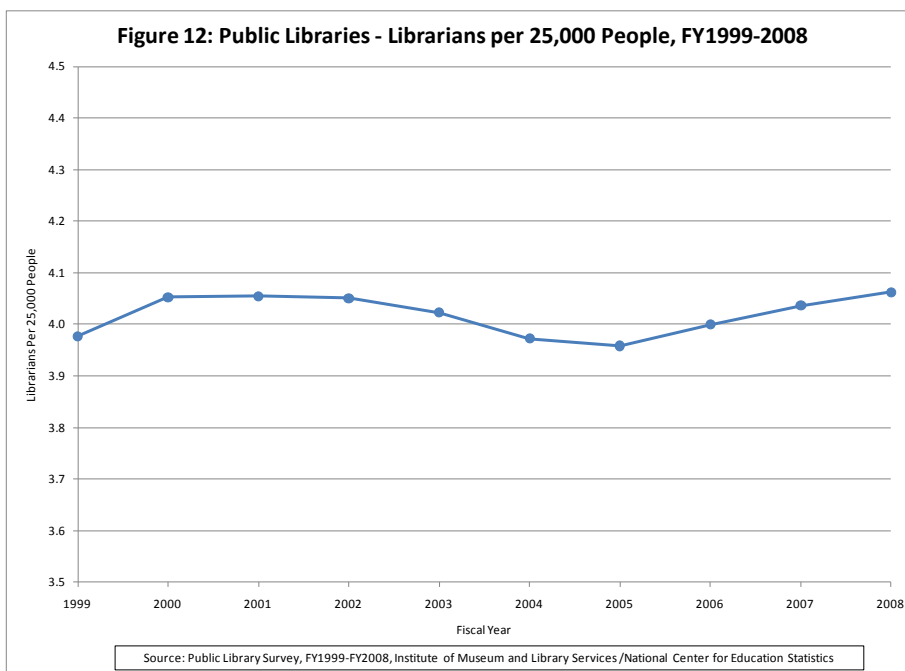

*Program Attendance*

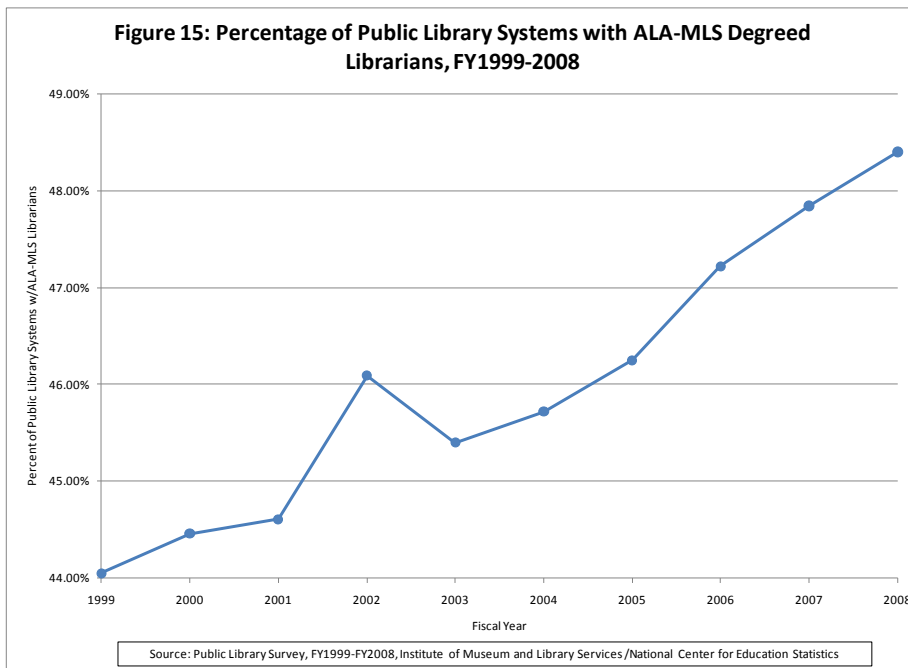

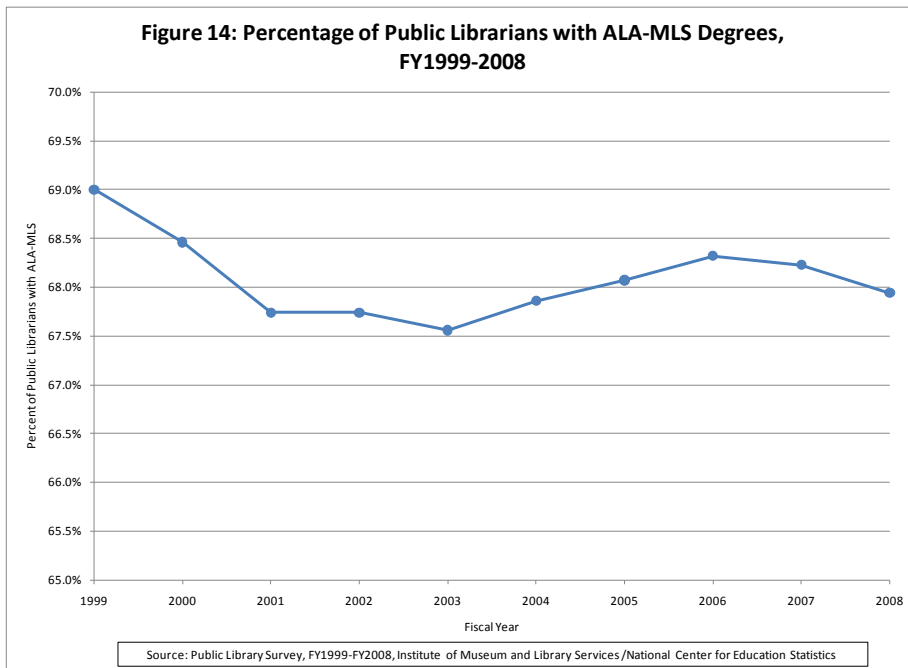

Children's program attendance at public libraries gradually rose during the study period, incrementally

increasing from 181.7 children's program attendances per 1,000 people in FY1999 to 206.8 program attendances per 1,000 people in FY2008, an increase of 13.9 percent (Figure 10). Information on overall program attendance (children's program attendance + other program attendance) has only been collected at the national level since FY2004; since then, overall program attendance has increased from 237.6 attendances per 1,000 people to 279.4 attendances per 1,000 people in FY2008, an increase of 17.6 percent. Program attendance per 1,000 visits increased by 7.5 percent (from 50.9 to 54.8) from FY2004 to FY2008. The majority of people who attend programs at libraries are attending children's programs, although children's program attendance as a share of all program attendance has decreased during the past few years. Children's programs accounted for 81.1 percent of all library program attendance in FY2004; since then, it has declined every year until reaching its FY2008 level of 74.0 percent of overall program attendance (Figure 11).

## Staffing

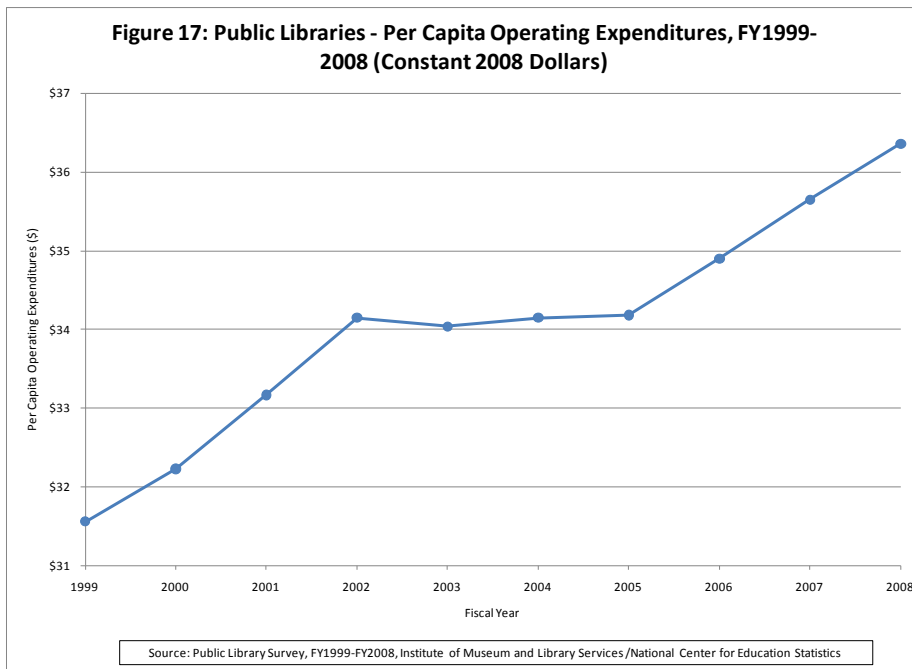

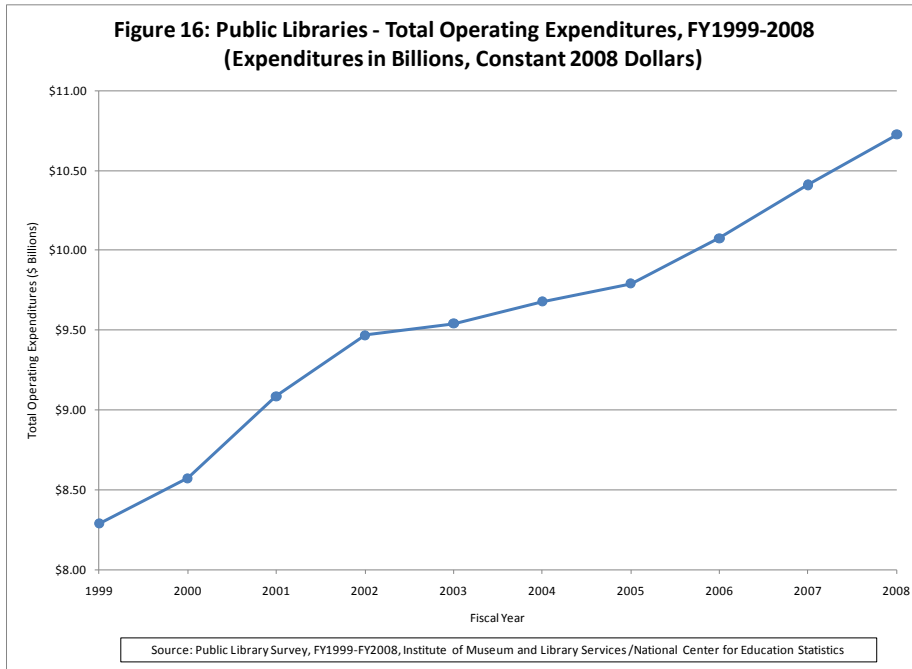

The number of public librarians per 25,000 people has remained more or less the same over the past 10 years, hovering around 4.0 (Figure 12). There were 4.0 librarians per 25,000 people in FY1999 and 4.1 in FY2008. The nation's libraries only reported having fewer than 4 librarians per 25,000 people during 2 of the last 10 years: FY2004 and FY2005. The number of paid staff per 25,000 people has similarly remained flat over the past 10 years (Figure 13). There were 12.3 paid staffers per 25,000 people in FY2008, up from 12.2 in FY1999. The year with the highest relative number of staff persons was FY2007, when there were 12.4 paid staffers per 25,000 people; the lowest was in FY2004, when there were 12.0 paid staffers per 25,000 people.

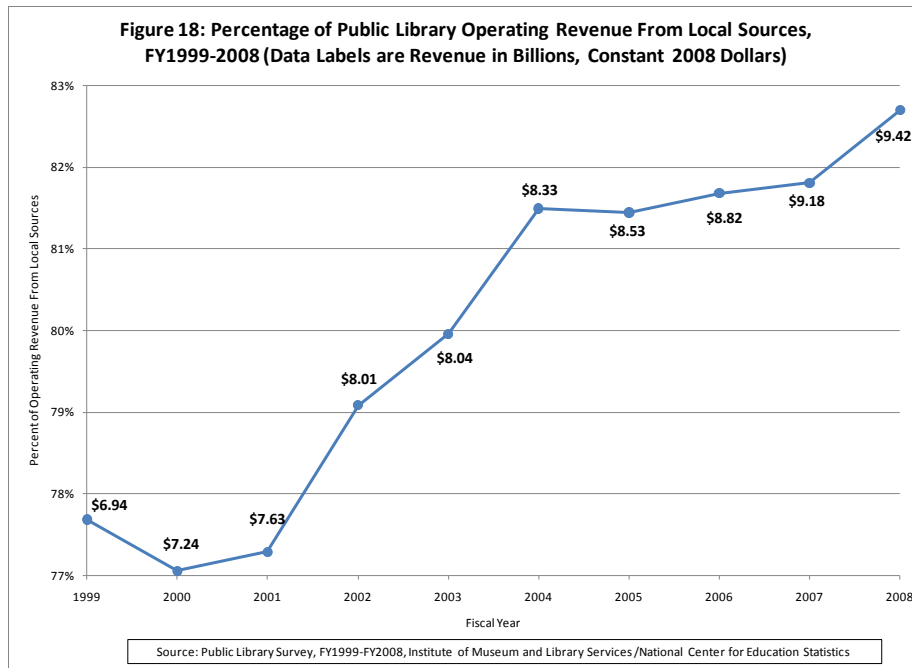

The percentage of librarians with American Library Association accredited master degrees in library science (ALA-MLS degrees) fell slightly during the study period. In FY1999, 69.0 percent of public librarians had ALA-MLS degrees; this percentage fell from then until FY2003, when it reached its low during the study period of 67.6 percent (Figure 14). From there, the percentage increased each year until it reached 68.3 percent in FY2006. In FY2008, the percentage of librarians with ALA-MLS degrees stood at 67.9 percent. In contrast, the number of library systems with at least one ALA-MLS degreed librarian increased somewhat during the study period, rising from 44.1 percent in FY1999 to 48.4 percent in FY2008 (Figure 15). This means that on average, public library systems were 9.9 percent more likely to have ALA-MLS degreed librarians in FY2008 than they were in FY1999.

## Operating Revenues and Expenditures

Total operating expenditures in public libraries steadily rose during the study period, going from \$8.29 billion in FY1999 to \$10.72 billion in FY2008 (figures are in constant 2008 dollars), an absolute increase of \$2.43 billion and a percentage increase of 29.4 percent (Figure 16). Per capita operating expenditures increased during the period as well. Per capita operating expenditures increased from \$31.56 in FY1999 to \$36.36 in FY2008, an absolute increase of \$4.80 per person and a percentage increase of 15.2 percent (Figure 17).

In the past ten years, local governments have borne an increasing share of the responsibility for funding libraries.<sup>8</sup> In FY2000, local governments supplied 77.1 percent of public library operating revenue (Figure

<sup>8</sup> Ohio incorrectly reported state operating revenues as local operating revenues and local operating revenues as state operating revenues in the FY2007 Public Libraries Survey (see user note at [http://harvester.census.gov/imls/pubs/pls/pub\\_detail.asp?id=122](http://harvester.census.gov/imls/pubs/pls/pub_detail.asp?id=122)). Ohio's total state operating revenues were actually \$457.3 million and its total local operating revenues were actually \$202.8 million in FY2007. This caused total state operating revenue to be underreported by \$254.5 million and total local operating revenue to be over reported by \$254.5 million in the FY2007 Public Libraries Survey findings section (figures 5 and 6 in the FY2007 report). This error was corrected in this year's findings section; figures 18 and 19 and the accompanying text reflect these corrections.

18). This percentage has gradually risen since then, reaching a high of 82.7 percent in FY2008. This trend of increasing local contributions to operating revenue has been paralleled by a decrease in the share of operating revenue that is supplied by state governments. In FY1999-2001, state government funds comprised 12.7-12.8 percent of public library operating revenue (Figure 19). After that, the state share of operating revenue steadily declined, reaching its low of 8.7 percent in FY2008. Revenue from federal (0.6 percent in FY1999, 0.4 percent in FY2008) and 'other' sources (9.0 percent in FY1999, 8.2 percent in FY2008) remained relatively flat over the same time period.

This happened because of large absolute increases in operating revenues from local sources and modest reductions in the amount of operating revenue provided by state governments. Local sources provided \$6.94 billion in operating revenue during FY1999; by FY2008, this figure had increased to \$9.42 billion, an increase of 35.8 percent and \$2.48 billion (in constant 2008 dollars). During the same period, state sources went from providing \$1.13 billion dollars in operating revenue (in FY1999) to providing \$0.99 billion in FY2008, a decrease of 13.0 percent and \$146.9 million. Federal sources showed very little change (\$55.8 million in FY1999, \$50.5 million in FY2008), while 'other' sources increased by \$130.8 million (from \$802.4 million to \$933.2 million, a 16.3 percent increase), helping to offset the decline in state funding.

<b>Figure 20: Public Libraries: Circulation by Locale Type, FY2008</b>			
<b>The 50 States and DC</b>			
Locale Type	Circulation in Thousands	Percentage of all Circulation	Percentage of Circulation by Major Locale Type
Large City	419,876	18.4%	
Midsize City	167,472	7.4%	34.3%
Small City	193,621	8.5%	
Large Suburb	874,190	38.4%	
Midsize Suburb	66,878	2.9%	43.3%
Small Suburb	44,024	1.9%	
Fringe Town	48,429	2.1%	
Distant Town	142,042	6.2%	12.2%
Remote Town	87,950	3.9%	
Fringe Rural	62,490	2.7%	
Distant Rural	122,727	5.4%	10.2%
Remote Rural	47,851	2.1%	
<b>Total</b>	<b>2,277,549</b>	<b>**</b>	<b>**</b>

Figure 20 (above) provides an illustration of this type of analysis using FY2008 data. The table compares circulation rates by locale code. Below we see that close to 40 percent of all circulation in the United States is accounted for by libraries serving large suburban communities. The large suburban circulation rate is followed by large cities, which account for 18.4 percent of all circulation nationally. Overall, towns account for 12.2 percent of national circulation and rural areas account for 10.2 percent of circulation nationally.

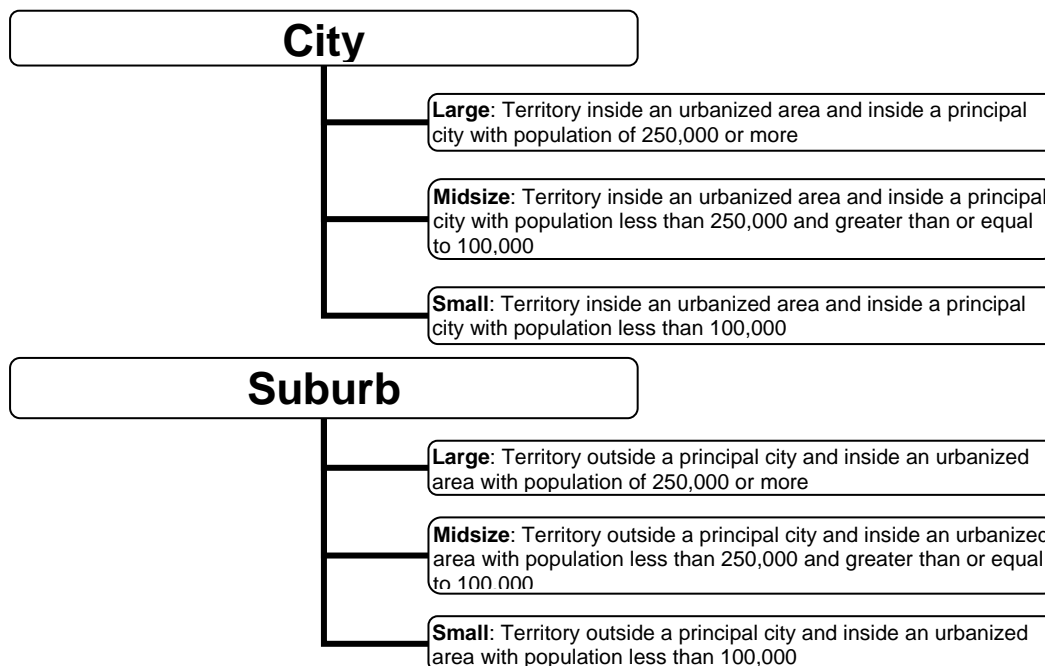

## Service Outlets & Legal Basis and Interlibrary Relationships

The majority of public libraries (85.2 percent) are public agencies connected to some form of local government. In FY2008, 52.9 percent of public libraries were part of a municipal government, 14.6 percent were separate government units known as library districts, 9.8 percent were part of a county/parish, 3.4 percent had multijurisdictional legal basis under an intergovernmental agreement, 2.0 percent were part of a school district, 1.0 percent were part of a city/county, and 1.5 percent reported their legal basis as "other". 14.9 percent of public libraries were operated by nonprofit associations/agencies; this means that they were privately controlled, but met the legal definition of a public library in the states in which they were located (Table 5).<sup>9</sup>

Though the majority of public libraries report single jurisdictions, many belong to broader service networks. 75.6 percent of public libraries were members of a federation or cooperative service, while 23.2 percent were not. 1.2 percent served as the headquarters of a federation or cooperative service (Table 7).<sup>10</sup>

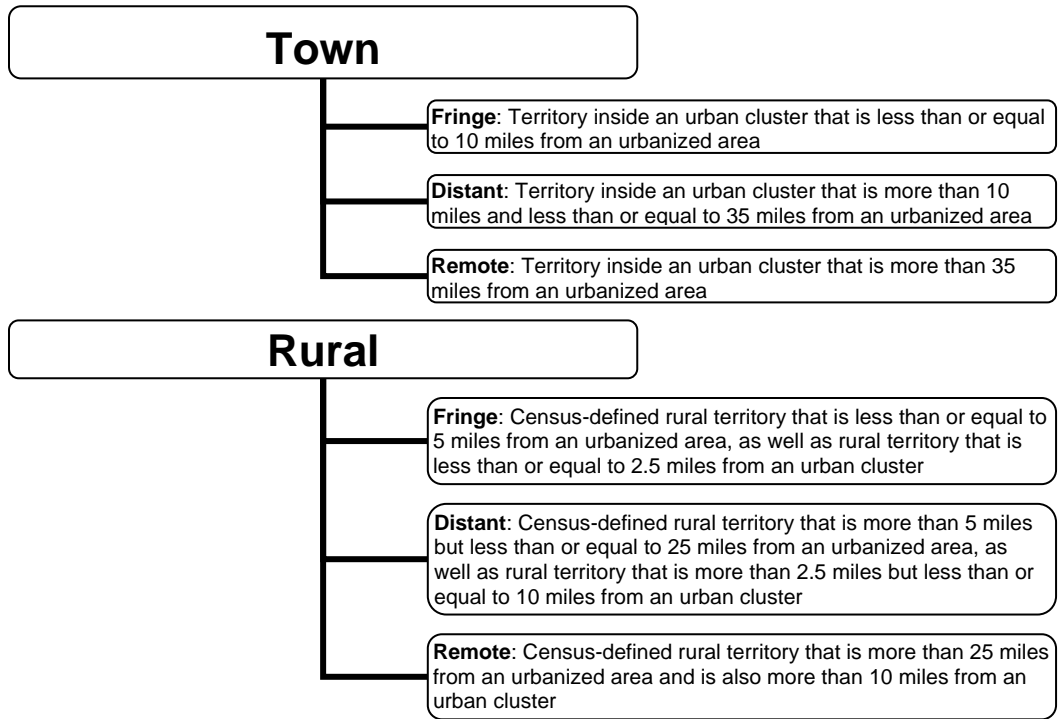

### An Introduction to Locale Codes

Beginning with the FY2008 data file, locale codes have been added to the outlet and administrative entity-level datasets. These locale codes allow users to quickly identify which library outlets and administrative entities are located in cities, suburbs, towns or rural areas. The new locale codes are based on an address's proximity to an urbanized area (a densely settled core with densely settled surrounding areas). The locale code system classifies territory into four major types: city, suburban, town, and rural. Each type has three subcategories. For city and suburb, these gradations are based on population size – large, midsize, and small. Towns and rural areas are further distinguished by their distance from an urbanized area. They can be characterized as fringe, distant, or remote. The coding methodology was developed by the Census Bureau as a way to identify the location of public schools in the National Center for Education Statistics' Common Core of Data. As of FY2008 each library outlet and administrative entity survey has one of the 12 locale codes assigned to it. Bookmobiles and books by mail only outlets were not assigned locale codes (see below).

<sup>9</sup> This and other percentage totals in the report may not sum to 100 because of rounding.

<sup>10</sup> Libraries that identify themselves as the headquarters of a federation or cooperative service are not included in the count of members of a federation or cooperative service.

These locale codes provide a new way to analyze library services in the United States. By incorporating objective measures of rurality and urbanicity into the data files, researchers and practitioners can benchmark services in a fundamentally different way by basing comparisons on community attributes as well as the attributes of the libraries themselves. In other words, library services in rural remote areas can now be compared to library services in other rural remote areas of the state or country using a standardized urbanicity/rurality metric that is applied consistently to each library in the country. Once communities of interest have been selected, comparisons can be made to any data that is available in the PLS whether it is financial, operational or service output-related.

**Figure 21: Distribution of Library Outlets, by State and Locale Code (FY2008)**

Source: Public Library Survey, FY2008, Institute of Museum and Library Services

Figure 21 (above) was developed using the new locale codes. It identifies the number of library outlets in

cities, suburbs, towns and rural areas for each state. Because the codes were developed using a standardized methodology, cross state comparisons of library service areas can be made in a more reliable and consistent manner. As can be seen in the chart, library services are delivered to many different types of communities. A large number of the library outlets in the country are located in rural areas. In a sizable portion of the states (16 of the 50) over 50 percent of their outlets are located in rural areas. Among these states, Alaska, Iowa, North Dakota, Nebraska, South Dakota and Vermont, have over 75 percent of their library outlets in rural areas. Geographic comparisons such as these provide a new way for understanding the nature of library services across the United States. In the coming year, IMLS will use the locale codes to explore some of the ways in which libraries are meeting the needs of these diverse communities.

### **Summary**

The data suggest that demand for library services is continuing to increase over time. Per person visitation and per person circulation have both increased by nearly 20 percent from FY1999 to FY2008 and library program attendance per person increased 17.6 percent from FY2004 to FY2008. The availability of information technology resources has increased rapidly in response to patron demand; the number of Internet PCs per person nearly doubled from FY2000 to FY2008. There is also evidence that library use patterns have changed somewhat over time. Library visitors are making fewer reference inquiries per visit and checking out fewer materials per visit - reference transactions per visit declined by nearly 25 percent from FY1999 to FY2008 and circulations per visit declined by 5.3 percent from FY1997 to FY2008. At the same time, visitors are becoming more likely to attend library programs such as youth reading events, book clubs and literacy classes - library program attendance per visit increased by 7.5 percent from FY2004 to FY2008.

The PLS data also show that libraries have become more expensive to run and more dependent on local funding sources. Per person operating expenditures increased by 15.2 percent from FY1999 to FY2008 and total operating expenditures increased by nearly 30 percent during the same period. The share of operating revenues from local sources increased from 77.7 percent to 82.7 percent from FY1999 to FY2008 while the share of operating revenue from state sources decreased from 12.7 percent to 8.7 percent during the same period. IMLS reports will continue to document this and other related trends during subsequent fiscal years.

<sup>1</sup>A public library is an administrative entity, the agency that is legally established under local or state law to provide public library service to the population of a local jurisdiction. The administrative entity may have a single public library service outlet, or it may have more than one outlet. The types of administrative structures for public libraries are reported in table 2. See table 3 for additional information on outlets.

<sup>2</sup>The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives revenue, plus any areas served under contract for which the library is the primary service provider. The determination of this figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state available from the State Data Center or other official state sources.

<sup>3</sup>This is the total unduplicated population of those areas in the state that receive library services. The determination of this figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state. The population of unserved areas is not included in this figure.

<sup>4</sup>This is the most recent official total population figure for the state that matches the local population figures that are submitted to IMLS. The state data coordinator for the state library agency is instructed to obtain the figure annually from the State Data Center or other official state sources.

<sup>5</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame.

NOTE: A state's total *population of legal service area* may be larger than the state's total *unduplicated population of legal service area* or the *official state population estimate* because some public libraries have overlapping service areas. Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives revenue, plus any areas served under contract for which the library is the primary service provider. (See Table 1.)<sup>2</sup>Response rate is calculated as the number of libraries that reported population of legal service area, divided by the total number of libraries in the survey frame.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>The administrative structure identifies an autonomous library entity (administrative entity) that has its own governance and funding.

<sup>2</sup>An administrative entity that serves the public directly with one central library, books-by-mail only, or one bookmobile.

<sup>3</sup>An administrative entity that serves the public directly with two or more service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-by-mail only.

<sup>4</sup>An administrative entity that serves the public directly with two or more service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-by-mail only. The administrative offices are separate from the direct service outlets and do not provide direct library services.

<sup>5</sup>Response rate is calculated as the number of libraries that reported administrative structure, divided by the total number of libraries in the survey frame.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>A bookmobile is a traveling branch library. It consists of at least one of the following: (1) A truck or van that carries an organized collection of library materials; (2) paid staff; and (3) regularly scheduled hours (bookmobile stops) for being open to the public.

<sup>2</sup>Total stationary outlets is the sum of central and branch libraries.

<sup>3</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame.

<sup>4</sup>Of the 9,221 public libraries in the 50 States and DC, 7,469 were single-outlet libraries and 1,752 were multiple-outlet libraries. Single-outlet libraries are a central library, bookmobile, or books-by-mail-only outlet. Multiple-outlet libraries have two or more direct service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-by-mail-only outlets.

NOTE: Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>These data are derived from the total *public service hours per year* and the total outlets (*central, branch, bookmobile, and books-by-mail*) of public libraries.

<sup>2</sup>Response rate is calculated as the number of libraries that reported public service hours, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>These data are derived from the total *public service hours per year* and the total outlets (*central, branch, bookmobile, and books-by-mail*) of public libraries.

NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas. The response rate is included in Table 4.

<sup>1</sup>Type of legal basis refers to the type of local government structure within which the library functions.

<sup>2</sup>An organized local government authorized in a state's constitution and statutes and established to provide general government for a specific concentration of population in a defined area.

<sup>3</sup>An organized local government authorized in a state's constitution and statutes and established to provide general government.

<sup>4</sup>A multi-jurisdictional entity that is operated jointly by a county and a city.

<sup>5</sup>A public library that is operated jointly by two or more units of local government under an intergovernmental agreement.

<sup>6</sup>A public library that is privately controlled but meets the statutory definition of a public library in a given state.

<sup>7</sup>A public library that is under the legal basis of a school district.

<sup>8</sup>A local entity other than a county, municipality, township, or school district is authorized by state law to establish and operate a public library.

<sup>9</sup>This includes libraries under the legal basis of Native American Tribal Government and combined public/school libraries.

<sup>10</sup>Response rate is calculated as the number of libraries that reported type of legal basis, divided by the total number of libraries in the survey frame. For item(s) with response rate below 100 percent, data for nonrespondents were imputed. Data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>The types of geographic service areas (Municipal government, County/parish, Metropolitan area, etc.) are from U.S. Census Bureau geography. Public libraries identified the geographic service area type that either exactly or most nearly described the geographic area for which the public library was established to offer services and from which (or on behalf of which) the library derives income, and any areas under contract for which the library is the primary service provider.

<sup>2</sup>Response rate is calculated as the number of libraries that reported geographic service area, divided by the total number of libraries in the survey frame. For item(s) with response rate below 100 percent, data for nonrespondents were imputed. Data was not imputed for outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>The types of geographic service areas (Municipal government, County/parish, Metropolitan area, etc.) are from U.S. Census Bureau geography. Public libraries identified the geographic service area type that either exactly or most nearly described the geographic area for which the public library was established to offer services and from which (or on behalf of which) the library derives income, and any areas under contract for which the library is the primary service provider.

NOTE: Detail may not sum to totals because of rounding. The response rate is included in Table 6. Data were not imputed for the outlying areas.

Puerto Rico	35	0	0	100.0	100.0

<sup>1</sup>The library or entity that provides the physical space and staff who manage, coordinate, or administer the programs of the federation or cooperative.

<sup>2</sup>An autonomous library joined by formal or informal agreement(s) with (a) other autonomous libraries in the same state to perform various services cooperatively, such as resource sharing, communications, etc. and (b) libraries that are part of national, multi-state or statewide library federations or cooperatives. This excludes the Online Computer Library Center (OCLC) system; multiple-outlet administrative entities (e.g., libraries with branches that have the word "system" in their legal name) if the entity does not have an agreement with another autonomous library; and libraries that serve as the headquarters of a federation or cooperative.

<sup>3</sup>Response rate is calculated as the number of libraries that reported interlibrary relationship, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed. Data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

# Rounds to zero.

<sup>1</sup>Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state.<sup>2</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state.

NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rates are included in Table 8. Data were not imputed for outlying areas.

# Rounds to zero.

<sup>1</sup>Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state.

<sup>2</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

<sup>2</sup>See Table 8 for total circulation used in deriving percentage of total circulation.

<sup>3</sup>Per 1,000 population are based on the total unduplicated population of legal service areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>The number of users (not uses) per year was reported on the survey. Survey respondents were instructed to count a user who uses the library's Internet computers three times a week as three users. In this table, "uses" was substituted for "users" for meaningful per capita comparisons as there cannot be more "users" than the population base. Electronic resources include, but are not limited to, Internet (World Wide Web, e-mail, Telnet, other), online indexes, CD-ROM reference materials, software, and the public library online catalog.

<sup>2</sup>The average per stationary outlet was calculated by dividing the total number of public-use Internet computers in central and branch outlets by the total number of such outlets. See Table 3 for number of service outlets.

<sup>3</sup>Per 5,000 population and per capita are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state.

<sup>4</sup>Response rate is the percentage of libraries that reported the item. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

NOTE: Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

Puerto Rico	35	273	0.2	62.9	53	42.3	42.9	5	4.2	42.9	10	7.6	51.4

<sup>1</sup>These materials include books and serial back files in print.

<sup>2</sup>Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state.

<sup>3</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

— Not available.

<sup>1</sup>The average was calculated by dividing the total number of materials of each type by the total number of public libraries.<sup>2</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

NOTE: Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>State government or state library

<sup>2</sup>Other cooperative agreements (or consortia) within state or region

<sup>3</sup>Response rate is calculated as the number of libraries that reported total income and/or all four sources of income, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>Paid staff were reported in FTEs. To ensure comparable data, 40 hours was set as the measure of full-time employment (for example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs). FTE data were reported to two decimal places but rounded to one decimal place in the table. Paid staff is one of four criteria used in the Public Libraries Survey to define a public library. Some states report public libraries that do not have paid staff but meet the definition of a public library under state law.

<sup>2</sup>“ALA-MLS”: A Master’s degree from a graduate library education program accredited by the American Library Association (ALA). Librarians with an “ALA-MLS” are also included in total librarians.

<sup>3</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

<sup>4</sup>The number of “certified” librarians was reported in the Librarians with “ALA-MLS” column, as the state does not distinguish between Master’s degrees from programs of library and information studies accredited by the American Library Association (ALA) and all other Master’s degrees in library science awarded by institutions of higher education. Nationally, 7162 Master’s degrees in library science were awarded by institutions of higher education in 2007-08 (Digest of Education Statistics, 2009, [NCES 2010013], Table 272. U.S. Department of Education, National Center for Education Statistics, Washington, DC: Government Printing Office.) Data for Master’s degrees from ALA-accredited programs were not available yet. However, the 4-year average was 87 percent, which is an estimated 5,887 graduates in 2006-2007. (ALA, Office for Human Resource Development and Recruitment, Degrees and Certificates Awarded by U.S. Library and Information Studies Education Programs).

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

Guam	1	0	0	0	0	0	0	100.0	0	0	0	100.0
Puerto Rico	35	0	0	11.4	25.7	40.0	14.3	5.7	2.9	0	0	100.0

<sup>1</sup>Paid staff were reported in FTEs. To ensure comparable data, 40 hours was set as the measure of full-time employment (for example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs). FTE data were reported to two decimal places. Paid staff is one of four criteria used in the Public Libraries Survey to define a public library. Some states report public libraries that do not have paid staff but meet the definition of a public library under state law.

<sup>2</sup>Response rate is calculated as the number of libraries that reported total paid FTE staff, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

# Rounds to zero.

<sup>1</sup>This includes federal funds, such as Library Services and Technology Act (LSTA) funds, that are distributed to public libraries through state library agencies. Other federal funds that are used by state library agencies or library cooperatives to provide services that benefit local public libraries are not included in the table because they are not received as income by public libraries.<sup>2</sup>This includes monetary gifts and donations received in the current year, interest, library fines, fees for library services, or grants.<sup>3</sup>Response rate is calculated as the number of libraries that reported total income and/or all four sources of income, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

# Rounds to zero.

<sup>1</sup>Per capita is based on the total unduplicated population of legal service areas.<sup>2</sup>This includes federal funds, such as Library Services and Technology Act (LSTA) funds, that are distributed to public libraries through state library agencies. Other federal funds that are used by state library agencies or library cooperatives to provide services that benefit local public libraries are not included in the table because they are not received as income by public libraries.<sup>3</sup>This includes monetary gifts and donations received in the current year, interest, library fines, fees for library services, or grants.<sup>4</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>This includes all expenditures other than those for staff and collection, such as binding, supplies, repair or replacement of existing furnishings and equipment, and costs of computer hardware and software used to support library operations or to link to external networks, including the Internet. Includes expenditures for contracts for services, such as costs of operating and maintaining physical facilities, and fees paid to a consultant, auditor, architect, attorney, etc.

<sup>2</sup>Response rate is calculated as the number of libraries that reported total operating expenditures and/or all three types of expenditures, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Missing data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>Per capita is based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent official state population figures for jurisdictions in the state.

<sup>2</sup>This includes all expenditures other than those for staff and collection, such as binding, supplies, repair or replacement of existing furnishings and equipment, and costs of computer hardware and software used to support library operations or to link to external networks, including the Internet. Includes expenditures for contracts for services, such as costs of operating and maintaining physical facilities, and fees paid to a consultant, auditor, architect, attorney, etc.

<sup>3</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

Includes expenditures for contracts for services, such as costs of operating and maintaining physical facilities, and fees paid to a consultant, auditor, architect, attorney, etc.

NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the Table. The response rates are included in Table 22. Data were not imputed for the outlying areas.

<sup>1</sup>This includes all operating expenditures for electronic (digital) materials. Types of electronic materials include e-books, e-serials (including journals), government documents, databases (including locally mounted, full text or not), electronic files, reference tools, scores, maps, or pictures in electronic or digital format, including materials digitized by the library. Electronic materials can be distributed on magnetic tape, diskettes, computer software, CD-ROM, or other portable digital carrier, and can be accessed via a computer, via access to the Internet, or by using an e-book reader. This includes expenditures for materials held locally and for remote electronic materials for which permanent or temporary access rights have been acquired. It also includes expenditures for database licenses.

<sup>2</sup>This includes all operating expenditures for other materials, such as microform, audio, video, DVD, and materials in new formats.

<sup>3</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Missing data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>Per capita is based on the total unduplicated population of legal service areas.

<sup>2</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Missing data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

# Rounds to zero.

<sup>1</sup>This includes federal funds, such as Library Services and Technology Act (LSTA) funds, that are distributed to public libraries through state library agencies. Other federal funds that are used by state library agencies or library cooperatives to provide services that benefit local public libraries are not included in the table because they are not received as income by public libraries.

<sup>2</sup>This includes monetary gifts and donations received in the current year, interest, library fines, fees for library services, or grants.

<sup>3</sup>Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Missing data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands).

Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>This includes federal funds, such as Library Services and Technology Act (LSTA) funds, that are distributed to public libraries through state library agencies. Other federal funds that are used by state library agencies or library cooperatives to provide services that benefit local public libraries are not included in the table because they are not received as income by public libraries.

<sup>2</sup>This includes monetary gifts and donations received in the current year, interest, library fines, fees for library services, or grants.

NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rate is included in Table 26. Missing data were not imputed for the outlying areas.

<sup>1</sup>Response rate is calculated as the number of libraries that reported total capital expenditures, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Missing data were not imputed for the outlying areas.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

<sup>1</sup>This is the total number of multiple-outlet public libraries on the public library outlet data file (multiple outlets consisting of bookmobiles only are excluded).<sup>2</sup>The response rate is the number of multiple-outlet public libraries on the public library outlet data file divided by the number of multiple-outlet public libraries on the public library data file.<sup>3</sup>The average square footage is calculated by dividing the total square footage reported by multiple-outlet public libraries (centrals or branches) by the total number of such outlets reporting the data.<sup>4</sup>Per 1,000 population data are based on the total unduplicated population of legal service areas. Only multiple-outlet public libraries that reported square footage for their central outlets are included in the "Per 1,000 population" figure for centrals. Only multiple-outlet public libraries that reported square footage for all of their branch outlets are included in the "Per 1,000 population" figure for branches.<sup>5</sup>The square footage response rate is calculated by dividing the number of multiple-outlet libraries (centrals or branches) reporting square footage by the number of such outlets on the public library outlet data file. IMLS ensures as part of edit follow-up that the number of outlets reported on the public library outlet data file equals the number reported on the public library data file.<sup>6</sup>50 States and DC totals exclude outlying areas.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail-only-outlets), and missing data are not imputed. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands).

1,000 to 2,499	1,573	21	79	4,176	2,324	30	1,301	1,052
Less than 1,000	997	2	3	1,681	2,938	1	450	1,304

<sup>1</sup>This is the total number of multiple-outlet public libraries on the public library outlet data file (multiple outlets consisting of bookmobiles only are excluded).

<sup>2</sup>The average square footage is calculated by dividing the total square footage reported by multiple-outlet public libraries (centrals or branches) by the total number of such outlets reporting the data.

<sup>3</sup>Per 1,000 population data are based on the total unduplicated population of legal service areas. Only multiple-outlet public libraries that reported square footage for their central outlets are included in the "Per 1,000 population" figure for centrals. Only multiple-outlet public libraries that reported square footage for all of their branch outlets are included in the "Per 1,000 population" figure for branches.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail-only outlets), and missing data are not imputed. The response rates are included in Table 30.

SOURCE: Institute of Museum and Library Services, Survey of Public Libraries in the United States, Fiscal Year 2008.

<sup>1</sup>This is the total number of central outlets on the public library outlet data file.<sup>2</sup>The response rate is the number of central outlets on the public library outlet data file divided by the number of centrals on the public library data file.<sup>3</sup>The average square footage of central outlets is calculated by dividing the total square footage reported by central outlets by the total number of such outlets reporting the data.<sup>4</sup>The square footage response rate is calculated by dividing the total number of central outlets reporting square footage by the total number of such outlets on the public library outlet file. IMLS ensures as part of edit follow-up that the number of outlets reported on the public library outlet data file equals the number reported on the public library data file.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail only-outlets), and missing data are not imputed. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands).

† Not applicable.

<sup>1</sup>This is the total number of branch outlets on the public library outlet data file.<sup>2</sup>The response rate is the number of branch outlets on the public library outlet data file divided by the number of branches on the public library data file.<sup>3</sup>The average square footage of branch outlets is calculated by dividing the total square footage reported by branch outlets by the total number of such outlets reporting the data.<sup>4</sup>The square footage response rate is calculated by dividing the total number of branch outlets reporting square footage by the total number of such outlets on the public library outlet data file. IMLS ensures as part of edit follow-up that the number of outlets reported on the public library outlet data file equals the number reported on the public library data file.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail-only outlets), and missing data are not imputed. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands).

## Appendix B—Technical Notes

### Reporting Period

The FY 2008 PLS requested data for state fiscal year 2008. In some states, the FY reporting period varies among local jurisdictions (these states are listed in the *Other* column in Table A–1 below). However, each public library provided data for a 12-month period. Note: The FY starting date and ending date of *each* public library are included on the data file.

**Table B–1. Reporting periods of public libraries: Fiscal Year 2008**

July 2007 through June 2008	January 2008 through December 2008	Other <sup>1</sup>
Arizona	Arkansas	Alabama <sup>2</sup>
California	Colorado	Alaska <sup>3</sup>
Connecticut	Indiana	District of Columbia <sup>2</sup>
Delaware	Kansas	Florida <sup>2</sup>
Georgia	Louisiana	Idaho <sup>2</sup>
Hawaii	Minnesota	Illinois <sup>11</sup>
Iowa	North Dakota	Maine <sup>5</sup>
Kentucky	New Jersey	Michigan <sup>6</sup>
Maryland	Ohio	Mississippi <sup>2</sup>
Massachusetts	South Dakota	Missouri <sup>7</sup>
Montana	Washington	Nebraska <sup>4</sup>
Nevada	Wisconsin	New Hampshire <sup>8</sup>
New Mexico	Puerto Rico	New York <sup>9</sup>
North Carolina		Pennsylvania <sup>8</sup>
Oklahoma		Texas <sup>10</sup>
Oregon		Utah <sup>8</sup>
Rhode Island		Vermont <sup>3</sup>
South Carolina		Guam <sup>2</sup>
Tennessee		
Virginia		
West Virginia		
Wyoming		

<sup>1</sup>The reporting period varies among localities for the states in this column; however, each public library provided data for a 12-month period.

<sup>2</sup>October 2007 to September 2008.

<sup>3</sup>January 2007 to September 2008.

<sup>4</sup>January 2007 to December 2008.

<sup>5</sup>April 2007 to December 2008.

<sup>6</sup>December 2006 to September 2008.

<sup>7</sup>October 2006 to December 2008.

<sup>8</sup>July 2007 to December 2008.

## Calculations Included in the Tables

Percentages rather than raw numbers are used in some tables to provide a clearer picture of data patterns. Percentage distributions may not sum to 100 due to rounding. To obtain a raw number from a percentage distribution table, multiply the percentage for the item by the total for the item. (The total may be in a different table.) For example, in Table 5, the number of public libraries in the 50 states and the District of Columbia with municipal government as their legal basis is 4,878 ( $9,221 \times 0.529$ ). The percentages are rounded, so multiplying a percentage by a total may not give an exact count for a desired category.

Selected tables include *per capita* values for some items and *per 1,000 population* or *per 5,000 population* values for others (e.g., Tables 8 and 11). Scales (per capita, per 1,000, etc.) were selected to provide the clearest display of differences across categories in the data. The calculations are based on the total *unduplicated* population of legal service areas (instead of the total population of legal service areas) in order to eliminate duplicative reporting due to overlapping service areas. The state population estimate was not used as the basis for the calculations because some states have unserved populations. See *Population items* below for more information.

## Caveats for Using the Data

The data include imputations, at the unit and item levels, for nonresponding libraries. See the *Imputation* section for a discussion of the imputation methodology. Comparisons to data prior to FY 1992 should be made with caution, as earlier data do not include imputations for nonresponse, and the percentage of libraries responding to a given item varied widely among the states.

State data comparisons should be made with caution because of differences in reporting periods (see Table B-1) and adherence to survey definitions. The definitions used by some states in collecting data from their public libraries may not be consistent with the PLS definitions. The 1994 NCES *Report on Coverage Evaluations of the Public Library Statistics Program* (NCES 94-430) and the 1995 NCES *Report on Evaluation of Definitions Used in the Public Library Statistics Program* (NCES 95-430) address issues of consistency in definitions among states. For information on these reports, visit the NCES web site at: <http://nces.ed.gov/pubsearch/getpubcats.asp?sid=041#052>.

The District of Columbia, while not a state, is included in this report. Special care should be used in comparing data for a city to state data. Caution should also be used in comparing Hawaii's data to other states as all public library data are reported under one entity, the Hawaii State Public Library System.

## Survey Items

A few key survey items are discussed below. The definitions of items included in this report are provided in the survey questionnaire in Appendix C.

**Library visits and reference transactions.** Public libraries reported annual library visits and annual reference transactions based on actual counts, if available. Otherwise, annual estimates were provided based on a typical week in October, multiplied by 52.

**Population items.** The PLS has three population items: (1) Population of Legal Service Area for each public library, (2) Total Unduplicated Population of Legal Service Areas for each state, and (3) State Total Population Estimate. The population data are provided by the state library agency. The methods of calculation of the first two items vary significantly among states, and the state reporting periods also vary. The Total Unduplicated Population of Legal Service Areas does not include unserved areas and may vary from data provided by sources using standard methodology (e.g., the Census Bureau).

The total Population of Legal Service Area for all public libraries in a state may exceed the state's Total Unduplicated Population of Legal Service Areas or the State Total Population Estimate. This

happens in states where there are overlaps in population of legal service areas served by individual libraries, resulting in the same population being counted twice. Twenty-three states had such overlapping service areas in FY 2008. (See following table.)

**Table B–2. States with public libraries with overlapping service areas: Fiscal Year 2008**

Arkansas	Nebraska
Connecticut	New Hampshire
Florida	New Jersey
Idaho	New York
Indiana	Pennsylvania
Kansas	Rhode Island
Louisiana	South Dakota
Maine	Utah
Massachusetts	Vermont
Michigan	Virginia
Minnesota	Puerto Rico
Mississippi	

SOURCE: Institute of Museum and Library Services, Survey of Public Libraries in the United States, Fiscal Year 2008.

To enable meaningful state comparisons using total Population of Legal Service Area data (for example, the number of print materials per capita), the Population of Legal Service Area data were adjusted to eliminate duplicative reporting due to overlapping service areas. The Public Library Data File includes a derived unduplicated population of legal service area figure for *each library* for this purpose (the variable is called POPU\_UND). This value was prorated for each library by calculating the ratio of a library's Population of Legal Service Area to the state's total Population of Legal Service Area and applying the ratio to the state's Total Unduplicated Population of Legal Service Areas. (The latter item is a single, state-reported figure found on the Public Library State Summary/State Characteristics Data File; the variable is called POPU\_UND on this file also.)

**Paid Full-Time-Equivalent (FTE) Staff.** Paid staff were reported in FTEs (Table 16). To ensure comparable data, 40 hours was set as the measure of full-time employment (for example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs). FTE data were reported to two decimal places (rounded to one decimal place in the tables).

### Survey Universe

The PLS is designed as a universe survey. The survey frame consists of 9,259 public libraries (9,221 public libraries in the 50 states and the District of Columbia and 38 public libraries in the outlying areas of Guam, the Northern Mariana Islands, Puerto Rico and the Virgin Islands), as identified by state library agencies. (Public libraries in one outlying area, American Samoa, are not included in the survey frame because their state library agency has never responded to the request for participation in the survey. Because their public libraries have not been identified, they are not included in the response rate calculations.) The survey frame (and the survey response rates in the next section) includes 296 public libraries that do not meet all the criteria in the FSCS Public Library Definition (see Appendix C, item 203 of the Administrative Entity definitions for the criteria). These libraries are included because they qualify as public libraries under state law. Military libraries that provide public library service and libraries that serve residents of institutions are not included. Data were not systematically collected from public libraries on Native American reservations, although 48 such libraries were reported.

## Survey Response

**Unit response.** A total of 9,073 of the 9,259 public libraries in the survey frame responded to the FY 2008 PLS (including Guam and Puerto Rico), for a unit response rate of 98.0 percent. Respondents to the survey are defined as public libraries for which the following data were reported: population of the legal service area and at least three of the five following items: total paid employees, total operating revenue, total operating expenditures, print materials, and total circulation. (Note: Some individual survey items, such as population of legal service area, service outlets, and type of legal basis have a 100.0 percent response rate for their state because the state library agency provided these data for all public libraries in their state).

**Total response.** The base for calculating response rates to individual survey items is the total number of libraries in the survey frame, including unit nonrespondents.

**Data File and Publication Response Rates.** The total response rates on the data file differ from the total response rates in the published report because the nonresponding outlying areas of the Northern Mariana Islands and the Virgin Islands are included on the data file but are not included in the publication. The responding outlying areas of Guam and Puerto Rico are included in both the data file and the publication. The response rates for the outlying territories are not included in the national totals in the publication.

## Data Collection

The FY 2008 PLS was released to the states over the Internet on December 10, 2008. States were placed into one of three reporting groups (with survey due dates of April 15, July 29, or August 26, 2009), based on their fiscal cycles or claim of extraordinary reporting hardship. States reported their data over the Internet via a web-based reporting system called WebPLUS (Web Public Library Universe System). WebPLUS was developed by the Census Bureau (the data collection agent). Edit follow-up was completed in December of 2009. The editing process is described below.

## Editing

**State level.** The respondent generates an Edit Report following direct data entry or import of their data into WebPLUS. The Edit Report, which can be viewed on-screen or printed, is used to identify and correct any errors, and to confirm the accuracy of data that generated edit warnings but required no change, before submitting the final file to the Census Bureau. In the FY 2008 PLS, four types of edit checks were performed:

1. *Relational edit checks.* This is a data consistency check between related data elements. For example, an edit message is generated if the number of "ALA-MLS" Librarians (librarians with master's degrees from programs of library and information studies accredited by the American Library Association) is greater than "Total Librarians".
2. *Out-of-range edit checks.* This is a range check that compares the data reported for an item to the "acceptable range" of numeric values for the item. For example, an edit message is generated if average Public Service Hours per outlet per week is less than 11.16 or greater than 129.67, or if the current year/past year change in Children's Circulation is less than 0.30 or greater than 3.44.

3. *Arithmetic edit checks.* This is an arithmetical accuracy check of a reported total and its parts to the generated total. For example, an edit message is generated if Total Operating Revenue is not equal to the sum of its parts (Local Government Revenue, State Government Revenue, Federal Government Revenue, and Other Revenue).
4. *Blank, zero, or invalid data edit checks.* This is a check of reported data against acceptable values. For example, an edit message is generated if the Reporting Period Start Date is missing, or Print Materials is 0, or the Legal Basis Code is not a valid code.

The WebPLUS application generates state summary tables (showing state totals for all numeric data items) and single-library tables (showing data for individual public libraries in a state). Respondents were encouraged to review the tables for data quality issues before submitting their data to IMLS. State data submissions also included a signed form from the Chief Officer of the State Library Agency certifying the accuracy of the data.

**National level.** The Census Bureau and IMLS reviewed and edited the state data submissions, working closely with the PLS State Data Coordinators.

### **Imputation**

Imputation is a procedure for entering a value for a specific data item where the response is missing. This is done to give the researcher a complete data set, as well as to give estimates of totals for the entire universe. This section describes the imputation methods that were used to fill in the missing data items for the 2008 survey year.

The responding and nonresponding libraries were sorted into imputation cells based on OBE region code and the size of the population. The cumulative root frequency method was used to determine the imputation cells. In survey year 2008, there were a total of 51 items subjected to imputations. The variable Registered Borrowers and the detail variables for Database (State Database, Local Database, and Other Database) were new items in survey year 2006. These variables were first imputed in survey year 2008. Data from 2006 and 2007 were used to impute these 4 new items. The other 47 items used data from survey years 2004 to 2007.

The imputation for nonresponding libraries was performed using the data calculated from respondents in their imputation cells. Item imputation was performed on each record with items that were not reported. All imputed data are flagged.

Imputations were performed in two distinct stages. In the first stage, imputations were carried out for nearly all missing values using the following methods: prior year data times the mean growth rate, adjusted cell mean, cell mean, prior year ratio, cell median ratio, direct substitution of prior year data, and cell median. In the second stage, imputed values were adjusted for some missing values (based on the variable) using the following methods: obtained value by relationship of total to detail items, raking, special imputations, and consistency checks.

### **First Stage: Initial imputations**

One or more of the methods outlined below is used to impute for nearly all missing values in the list of targeted variables for the FY 2008 PLS data set. Only the missing values for TOTSTAFF were not imputed in the first stage.

**METHOD 1:** Prior year multiplied by mean growth rate. The imputed value is equal to the prior year reported data times the cell mean growth rate. The growth rate is calculated by the mean of the growth rates of all the respondents in the imputation cells. It goes back as far as four years to find reported data.

**METHOD 2:** Adjusted cell mean. The adjustment factor is the ratio of the library's Population of Legal Service Area to the cell mean Population of Legal Service Area. The imputed value is equal to the cell mean of the item times the adjustment factor.

METHOD 3: Cell mean. The imputed value is equal to the mean of all respondents in a cell for that item.

METHOD 4: Prior year ratio to another item. The imputed value is equal to the current year data of a highly correlated item times the ratio of prior year data for the item to be imputed to prior year's data for the other item.

METHOD 5: Cell median ratio with another item. The imputed value is equal to the current year data of a highly correlated item times the cell median ratio. The cell median ratio is calculated by finding the median of all ratios of the item to be imputed to the other item for all respondents in the cell.

METHOD 6: Direct substitution of prior year data.

METHOD 7: Cell median. The imputed value is equal to the median of all respondents in the cell for that item.

### **Group One:**

A group of PLS variables was imputed using method 1 (the prior year data multiplied by the mean growth rate); if prior year reported data were not available then method 2 (the adjusted cell mean) was used; if the adjusted cell mean could not be calculated then method 3 (the cell mean) was used. Variables in this first group include:

- **Master (MASTER)**
- **Librarians (LIBRARIA)**
- **Other Paid Employees (OTHPAID)**
- **Local Government (LOCGVT)**
- **Total Operating Revenue (TOTINCM)**
- **Salaries (SALARIES)**
- **Total Staff Expenditures (STAFFEXP)**
- **Other Materials Expenditures (OTHMATEX)**
- **Total Collection Expenditures (TOTEXPCO)**
- **Other Operating Expenditures (OTHOPEXP)**
- **Total Operating Expenditures (TOTOPEXP)**
- **Print Materials (BKVOL)**
- **Audio (AUDIO)**
- **Video (VIDEO)**
- **Electronic Subscriptions (ESUBSCRIP)**
- **Library Visits (VISITS)**
- **Total Circulation (TOTCIR)**
- **Total Attendance at Library Programs (TOTATTEN)**
- **Registered Borrowers (REGBOR)**

### **Group Two:**

A second group of variables was imputed using method 2 (adjusted cell mean); if the adjusted cell mean could not be calculated, then method 3 (the cell mean) was used. These variables include:

- **Total Capital Expenditures (CAPITAL)**
- **Databases (DATABASE)**
- **Print Subscriptions (SUBSCRIP)**
- **Reference Transactions (REFERENC)**

### Group Three:

A third group of variables was imputed using method 1 (prior year multiplied by mean growth rate); if prior year reported data was not available to calculate growth rates, then method 7 (cell median) was used. These variables include:

- **State Government (STGVT)**
- **Other Revenue (OTHINCM)**
- **Local Capital Revenue (LCAP\_REV)**
- **Total Capital Revenue (CAP\_REV)**
- **Electronic Books (EBOOK)**
- **Other Databases (DB\_OTH)**

### Group Four:

A fourth group of variables was imputed using only method 7 (cell median); these variables were:

- **Federal Government (FEDGVT)**
- **State Capital Revenue (SCAP\_REV)**
- **Federal Capital Revenue (FCAP\_REV)**
- **Other Capital Revenue (OCAP\_REV)**
- **Local Databases (DB\_LOC)**

### Group Five:

A fifth group of variables was imputed using method 4 (prior year ratio to another item); if prior year reported data were not available, then method 2 (adjusted cell mean) was used; if the adjusted cell mean could not be calculated, then method 3 (cell mean) was used. The variables in the fifth group, along with the highly correlated variable(s) in the prior year ratio, include:

- **Benefits (BENEFIT):**
  - Total Staff Expenditures (STAFFEXP)
- **Electronic Materials Expenditures (ELMATEXP):**
  - Total Collection Expenditures (TOTEXPCO)
- **Hours Open (HRS\_OPEN):**
  - Total number of outlets. The total number of outlets is equal to the sum of Central Library (CENTLIB), Branches (BRANLIB), and Bookmobiles (BKMOB).
- **Loans To (LOANTO):**
  - Loans From (LOANFM)
- **General Public Terminals(GPTERMS):**
  - Visits (VISITS)

### Group Six:

A sixth group of variables was imputed using method 5 (cell median ratio with another item); if prior year reported data were not available, then method 2 (adjusted cell mean) was used; if the adjusted cell mean could not be calculated, then method 3 (cell mean) was used. The variables in the sixth group, along with the highly correlated variable(s) used in the cell median ratio, include:

- **Printed Material Expenditures (PRMATEXP):**
  - Total Collection Expenditures (TOTEXPCO)
- **State Databases (DB\_ST):**
  - Database (DATABASE)
- **Children's Circulation (KIDCIRCL):**
  - Total Circulation (TOTCIR)
- **Loans From (LOANFM):**
  - Loans To (LOANTO)

- **Total Library Programs (TOTPRO):**
  - Children's Programs (KIDPRO)
- **Children's Program Attendance (KIDATTEN):**
  - Total Attendance at Library Programs (TOTATTEN)
- **Electronic Users (PITUSR):**
  - General Public Terminals (GPTERMS)

The **Children's Program (KIDPRO)** variable can be considered part of both Groups One and Six. If missing values are imputed using method 5, then the **Total Library Programs (TOTPRO)** is used as the highly correlated value in the cell median calculations.

## **Second Stage: Adjustments**

The methods listed below adjust imputations for some of the missing values, based on the PLS variable. These adjustments verify that detail items sum to totals, making corrections as necessary.

METHOD 8: Obtained value by relationship of total to detail items.

The imputed value of a total is adjusted using its relationship with reported detail items.

METHOD 9: Raking of detail items to match total.

The imputed value for a detail item is adjusted by raking methods so that it matches a reported total.

METHOD 10: Special impute for an item.

The imputed value of an item is adjusted using its relationship with another reported item.

METHOD 11: Changed by consistency check.

The imputed value is adjusted using customized consistency checks specific to that variable.

### **Group One:**

These variables were adjusted using method 8 (Obtained value by relationship of total to detail items) or method 9 (Raking) after the initial stage of imputation:

- **Other Paid Employees (OTHPAID)**
- **Local Capital Revenue (LCAP\_REV)**
- **State Capital Revenue (SCAP\_REV)**
- **Federal Capital Revenue (FCAP\_REV)**
- **Other Capital Revenue (OCAP\_REV)**

### **Group Two:**

These variables were adjusted using method 8 (Obtained value by relationship of total to detail items) after the initial stage of imputation:

- **Total Staff (TOTSTAFF)**
- **Salaries (SALARIES)**
- **Benefits (BENEFIT)**
- **Total Staff Expenditures (STAFFEXP)**
- **Print Materials Expenditures (PRMATEXP)**
- **Total Collection Expenditures (TOTEXPCO)**
- **Other Operating Expenditures (OTHOPEXP)**
- **Total Operating Expenditures (TOTOPEXP)**
- **Total Capital Revenue (CAP\_REV)**

- **Other Databases (DB\_OTH)**
- **Databases (DATABASE)**

**Group Three:**

These variables were adjusted using method 9 (Raking) after the initial stage of imputation:

- **State Databases (DB\_ST)**
- **Local Databases (DB\_LOC)**
- **Other Databases (DB\_OTH)**

**Group Four:**

These variables are adjusted using method 10 (Special Impute) after the initial stage of imputation:

- **Total Capital Expenditures (CAPITAL)**
- **Hours Open (HRS\_OPEN)**

**Group Five:**

These variables are adjusted using method 11 (Consistency Check) after the initial stage of imputation:

- **Total Circulation (TOTCIR)**
- **Loans From (LOANFM)**
- **Total Library Programs (TOTPRO)**
- **Children's Programs (KIDPRO)**
- **Total Attendance at Library Programs (TOTATTEN)**
- **Children's Program Attendance (KIDATTEN)**
- **General Public Terminals (GPTERMS)**
- **Electronic Users (PITUSR)**

The variable **Librarians (LIBRARIA)** is adjusted using methods 8 (Obtained value by relationship of total to detail items), 9 (Raking), or 11 (Consistency Check) after the initial stage of imputation.

The variable **Master (MASTER)** is adjusted using methods 8 (Obtained value by relationship of total to detail items), or 11 (Consistency Check) after the initial stage of imputation.

**Nonsampling Errors**

Because all units in the universe are surveyed, the data are not subject to sampling error, but they are subject to nonsampling errors, such as errors in response, nonresponse errors, coverage errors arising from an incomplete listing of public libraries, coding errors, or processing errors.

Every effort is made to mitigate such errors. The editing efforts described above are designed to decrease the number of errors due to inaccurate response or due to processing problems. Imputation lessens the effect of nonresponse. Efforts are made to obtain complete listings of public libraries from the state library agencies. Although such efforts are made, some nonsampling error likely remains in the data.

## Appendix C—Survey Questionnaire

<b>State Characteristics</b>			
Item No.	Item	Current Year	Prior Year
100	Reporting Period Start Date (MM/YYYY)		
101	Reporting Period End Date (MM/YYYY)		
102	State Total Population Estimate		
103	Total Unduplicated Population of Legal Service Areas		

<b>Administrative Entity – Name/Addresses</b>

## State Characteristics Data Element Definitions

Note: The items below are answered by the state library agency.

#	<u>Data Element Name</u>	<u>Data Element Definition</u>
100	Reporting Period Starting Date	<p>This is the earliest date (month and year) for a 12-month period that applies to the state's data being submitted to IMLS.</p> <p>Note: Reporting period means data for the fiscal year that ended in the previous calendar year. If data are collected for different local reporting periods, provide the earliest starting date.</p>
101	Reporting Period Ending Date	<p>This is the latest date (month and year) for a 12-month period that applies to the state's data being submitted to IMLS.</p> <p>Note: Reporting period means data for the fiscal year that ended in the previous calendar year. If data are collected for different local reporting periods, provide the latest ending date.</p>
102	State Total Population Estimate	<p>This is the most recent total population figure for your state that matches the local population figures that you are submitting to IMLS. The State Data Coordinator should obtain this figure annually from the State Data Center or other official state sources.</p>
103	Total Unduplicated Population of Legal Service Areas	<p>This is the total unduplicated population of those areas in your state that receive library services. The population of unserved areas is not included in this figure.</p> <p>Note: A state's actual total population of legal service areas may be different from the total population of legal service areas as calculated by WebPLUS. This happens in states where there are overlaps in population of legal service areas served by individual libraries, resulting in the same population being counted twice in the WebPLUS calculation. For states that have no overlapping jurisdictions, this number will be identical to your state's total population of legal service areas as calculated by WebPLUS. For states that do have overlaps in population of legal service areas served by individual libraries, this number must be calculated separately.</p> <p>Use your state's most recent official state population figures for jurisdictions in your state as the basis for calculating the total unduplicated population of legal service areas.</p>

## Administrative Entity Data Element Definitions

**Administrative Entity.** (This is not a WebPLUS Data Element.) This is the agency that is legally established under local or state law to provide public library service to the population of a local jurisdiction. The administrative entity may have a single outlet, or it may have more than one outlet.

<u>#</u>	<u>Data Element Name</u>	<u>Data Element Definition</u>
150	FSCS ID (Automatic Display)	This is the identification code assigned by WebPLUS to the administrative entity.
151	LIB ID	This is the state-assigned identification code for the administrative entity.
152	Name	This is the legal name of the administrative entity.  Note: Provide the name of the public library. Do not use acronyms. Do not abbreviate the name unless it exceeds the WebPLUS field length of 60 characters. Avoid abbreviations at the beginning of the name and do not punctuate abbreviations. (See Standard Abbreviations for WebPLUS in Appendix I.)

### Street Address

153	Street Address	This is the complete street address of the administrative entity.  Note: Do not report a post office box or general delivery.
154	City (of street address)	This is the city or town in which the administrative entity is located.
155	ZIP Code (of street address)	This is the standard five-digit postal zip code for the street address of the administrative entity.
156	ZIP+4 (of street address)	This is the four-digit postal ZIP code extension for the street address of the administrative entity.

### Mailing Address

157	Mailing Address	This is the mailing address of the administrative entity.
158	City (of mailing address)	This is the city or town of the mailing address for the administrative entity.
159	ZIP Code (of mailing address)	This is the standard five-digit postal ZIP code for the mailing address of the administrative entity.
160	ZIP+4 (of mailing address)	This is the four-digit postal ZIP code extension for the mailing address of the administrative entity.
161	County of the Entity	This is the county in which the headquarters of the administrative entity is located.

162	Phone	<p>This is the telephone number of the administrative entity, including area code.</p> <p>Note: Report telephone number without spacing or punctuation. If the Administrative Entity has no phone, enter “-3” (for Not Applicable).</p>
163	Web Address	<p>This is the Web address of the administrative entity. http://_____</p> <p>Note: If the Administrative Entity has no web address, enter “-3” (for Not Applicable).</p>
200	Interlibrary Relationship Code	<p>Select one of the following:</p> <p>HQ—Headquarters of a Federation or Cooperative. The library or entity that provides the physical space and staff who manage, coordinate, or administer the programs of the federation or cooperative.</p> <p>Note: Agencies that serve other libraries rather than the public should not be reported to FSCS.</p> <p>ME—Member of a Federation or Cooperative. An autonomous library joined by formal or informal agreement(s) with (a) other autonomous libraries in the same state to perform various services cooperatively, such as resource sharing, communications, etc., and (b) libraries that are part of national, multi-state or statewide library federations or cooperatives. (Do not include OCLC.) Do not include multiple-outlet administrative entities (e.g., libraries with branches and that have the word "system" in their legal name) if the entity does not have an agreement with another autonomous library.</p> <p>NO—Not a Member of a Federation or Cooperative.</p>
201	Legal Basis Code	<p>The legal basis is the type of local government structure within which the entity functions. It reflects the state or local law, which authorizes the library.</p> <p>Select one of the following:</p> <p>CC—City/County. A multi-jurisdictional entity that is operated jointly by a county and a city.</p> <p>CI—Municipal Government (city, town or village). A municipal government is an organized local government authorized in a state’s constitution and statutes and established to provide general government for a specific concentration of population in a defined area.</p> <p>CO—County/Parish. An organized local government authorized in a state’s constitution and statutes and established to provide general government.</p>

LD—Library District. A library district is a local entity other than a county, municipality, township, or school district that is authorized by state law to establish and operate a public library as defined by FSCS. It has sufficient administrative and fiscal autonomy to qualify as a separate government. Fiscal autonomy requires support from local taxation dedicated to library purposes (e.g., a library tax).

MJ—Multi-jurisdictional. An entity operated jointly by two or more units of local government under an intergovernmental agreement which creates a jointly appointed board or similar means of joint governance; to be distinguished from a library which contracts to serve other jurisdictions and from special library districts.

Note: Please put city/county combinations under 'CC', rather than under Multi-jurisdictional.

NL—Native American Tribal Government. An organized local government authorized and established to provide general government to residents of a Native American reservation.

Note: Include native Alaskan villages in this category.

NP—Non-profit Association or Agency. An entity privately controlled but meeting the statutory definition of a public library in a given state; includes association libraries.

SD—School District. An organized local entity providing public elementary, secondary, and/or higher education which, under state law, has sufficient administrative and fiscal autonomy to qualify as a separate government. Excludes "dependent public school systems" of county, municipal, township, or state governments.

OT—Other.

202 Administrative Structure Code

This code identifies an autonomous library entity (administrative entity) that has its own governance and funding.

An administrative entity is the agency that is legally established under local or state law to provide public library service to the population of a local jurisdiction. The administrative entity may have a single outlet, or it may have more than one outlet.

Select one of the following:

MA—Administrative Entity with Multiple Direct Service Outlets where Administrative Offices are separate. An administrative entity that serves the public directly with two or more service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-by-mail only. The administrative offices are separate from the direct service outlets and do not provide direct library services.

MO—Administrative Entity with Multiple Direct Service Outlets where Administrative Offices are Not Separate. An administrative entity that serves the public directly with two or more service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-by-mail only.

SO—Administrative Entity with a Single Direct Service Outlet. An administrative entity that serves the public directly with one central library, books-by-mail only, or one bookmobile.

203 FSCS Public Library Definition

Answer <Y>es or <N>o to the following question: “Does this public library meet all the criteria of the FSCS public library definition?”

A public library is an entity that is established under state enabling laws or regulations to serve a community, district, or region, and that provides at least the following:

1. An organized collection of printed or other library materials, or a combination thereof;
2. Paid staff;
3. An established schedule in which services of the staff are available to the public;
4. The facilities necessary to support such a collection, staff, and schedule; and
5. Is supported in whole or in part with public funds.

Note: If the library meets all of the requirements of this definition, respond with a <Y>es. If the library does not meet one or more of the requirements, respond with a <N>o.

204 Geographic Code

Choose from among the following types of readily available Census Bureau geography, one code that either exactly or most nearly describes the geographic area for which the public library has been established to offer services and from which (or on behalf of which) the library derives revenue, plus any areas served under contract for which the library is the primary service provider.

Note: The Population of Legal Service Area (data element #208) should be reflected in the geographic code selected. For further clarification of municipal government, county/parish, and school district, refer to definitions under Legal Basis Code (data element #201). For further clarification of metropolitan area, see Metropolitan Status Code “NC—Metropolitan Area, but Not Within Central City Limits” (data element #710—Outlet Data Element Definitions).

CI1—Municipal Government (city, town or village) (exactly)  
 CI2—Municipal Government (city, town or village) (most nearly)  
 CO1—County/Parish (exactly)  
 CO2—County/Parish (most nearly)  
 MA1—Metropolitan Area (exactly)  
 MA2—Metropolitan Area (most nearly)  
 MC1—Multi-County (exactly)  
 MC2—Multi-County (most nearly)  
 SD1—School District (exactly)  
 SD2—School District (most nearly)  
 OTH—Other

- |     |                                      |  |
|-----|--------------------------------------|--|
| 205 | Legal Service Area Boundary Change   | <p>Answer &lt;Y&gt;es or &lt;N&gt;o to the following question: <i>“Did the administrative entity’s legal service area boundaries change since last year?”</i></p> <p>Note: Changes are likely to result, for example, when a municipality annexes land, when one municipality in a county becomes either an independent city or its own county necessitating its exclusion from the first county’s geography, or when an administrative entity contracts to provide public library service for some additional geographic area other than the geographic area for which it was established (e.g., a municipal library contracts to serve county residents).</p>                                      |
| 206 | Reporting Period Starting Date       | <p>This is the starting date (month, day, and year) for a 12-month period that applies to the administrative entity’s data being submitted to IMLS.</p> <p>Note: Reporting period means data for the fiscal year that ended in the previous calendar year.</p>   |
| 207 | Reporting Period Ending Date         | <p>This is the ending date (month, day, and year) for a 12-month period that applies to the administrative entity’s data being submitted to IMLS.</p> <p>Note: Reporting period means data for the fiscal year that ended in the previous calendar year.</p>   |
| 208 | Population of the Legal Service Area | <p>The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives revenue, plus any areas served under contract for which the library is the primary service provider.</p> <p>Note: The determination of this population figure shall be the responsibility of the state library agency. This population figure should be based on the most recent official state population figures for jurisdictions in your state available from the State Data Center. The State Data Coordinator should obtain these figures annually from the State Data Center or other official state sources.</p> |

209	Number of Central Libraries	<p>This is one type of single outlet library (SO) or the library, which is the operational center of a multiple-outlet library (MO or MA). Usually all processing is centralized here and the principal collections are housed here. Synonymous with main library.</p> <p>Note: Each administrative entity may report either no central library or one central library. No administrative entity may report more than one central library. In the administrative entity file, this simply means reporting "0" or "1" for central library. Where two or more libraries are considered "centrals" for state or local purposes, one central library and one or more branch libraries should be reported. If you wish to identify a central library in the outlet file, identify the library with the largest collection as the central library, and report all others as branches. Where there are several co-equal outlets and no principal collection, report all such outlets as branches, not central libraries.</p>
210	Number of Branch Libraries	<p>A branch library is an auxiliary unit of an administrative entity which has at least all of the following:</p> <ol style="list-style-type: none"> <li>1. Separate quarters;</li> <li>2. An organized collection of library materials;</li> <li>3. Paid staff; and</li> <li>4. Regularly scheduled hours for being open to the public.</li> </ol>
211	Number of Bookmobiles	<p>A bookmobile is a traveling branch library. It consists of at least all of the following:</p> <ol style="list-style-type: none"> <li>1. A truck or van that carries an organized collection of library materials;</li> <li>2. Paid staff; and</li> <li>3. Regularly scheduled hours (bookmobile stops) for being open to the public.</li> </ol> <p>Note: Count the number of vehicles in use, not the number of stops the vehicle makes.</p>

**PAID STAFF (FULL-TIME EQUIVALENT)**

Report figures as of the last day of the fiscal year. Include all positions funded in the library's budget whether those positions are filled or not. To ensure comparable data, 40 hours per week has been set as the measure of full-time employment (FTE). For example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs.

250	ALA-MLS	Librarians with Master's degrees from programs of library and information studies accredited by the American Library Association.
251	Total Librarians	Persons with the title of librarian who do paid work that usually requires professional training and skill in the theoretical or scientific aspects of library work, or both, as distinct from its mechanical or clerical aspect. This data element also includes ALA-MLS (data element #250).
252	All Other Paid Staff	This includes all other FTE employees paid from the reporting unit budget, including plant operations, security, and maintenance staff.

253 Total Paid Employees This is the sum of Total Librarians and All Other Paid Staff (data elements #251 and #252).

**OPERATING REVENUE**

Report revenue used for operating expenditures as defined below. Include federal, state, local, or other grants. DO NOT include revenue for major capital expenditures, contributions to endowments, revenue passed through to another agency (e.g., fines), or funds unspent in the previous fiscal year (e.g., carryover). (Funds transferred from one public library to another public library should be reported by only one of the public libraries. The State Data Coordinator shall determine which library will report these funds.)

- 300 Local Government Revenue This includes all local government funds designated by the community, district, or region and available for expenditure by the public library. Do not include the value of any contributed or in-kind services or the value of any gifts and donations, library fines, fees, or grants.  
  
Do not include state, federal, and other funds passed through local government for library use. Report these funds with state government revenue or federal government revenue, as appropriate.
- 301 State Government Revenue These are all funds distributed to public libraries by state government for expenditure by the public libraries, except for federal money distributed by the state. This includes funds from such sources as penal fines, license fees, and mineral rights.  
  
Note: If operating revenue from consolidated taxes is the result of state legislation, the revenue should be reported under state revenue (even though the revenue may be from multiple sources).
- 302 Federal Government Revenue This includes all federal government funds distributed to public libraries for expenditure by the public libraries, including federal money distributed by the state.
- 303 Other Operating Revenue This is all operating revenue other than that reported under local, state, and federal (data elements #300, #301, and #302). Include, for example, monetary gifts and donations received in the current year, interest, library fines, fees for library services, or grants. Do not include the value of any contributed or in-kind services or the value of any non-monetary gifts and donations.
- 304 Total Operating Revenue This is the sum of Local Government Revenue, State Government Revenue, Federal Government Revenue, and Other Operating Revenue (data elements #300 through #303).

## OPERATING EXPENDITURES

Operating expenditures are the current and recurrent costs necessary to support the provision of library services. Significant costs, especially benefits and salaries, that are paid by other taxing agencies (government agencies with the authority to levy taxes) "on behalf of" the library may be included if the information is available to the reporting agency. Only such funds that are supported by expenditure documents (such as invoices, contracts, payroll records, etc.) at the point of disbursement should be included. Do not report the value of free items as expenditures. Do not report estimated costs as expenditures. Do not report capital expenditures under this category.

### Staff Expenditures

350	Salaries & Wages Expenditures	This includes salaries and wages for all library staff (including plant operations, security, and maintenance staff) for the fiscal year. Include salaries and wages before deductions but exclude employee benefits.
351	Employee Benefits Expenditures	These are the benefits outside of salaries and wages paid and accruing to employees (including plant operations, security, and maintenance staff), regardless of whether the benefits or equivalent cash options are available to all employees. Include amounts for direct paid employee benefits including Social Security, retirement, medical insurance, life insurance, guaranteed disability income protection, unemployment compensation, workmen's compensation, tuition, and housing benefits.
352	Total Staff Expenditures	This is the sum of Salaries & Wages Expenditures and Employee Benefits Expenditures (data elements #350 and #351).

### Collection Expenditures

This includes all operating expenditures from the library budget for all materials in print, microform, electronic, and other formats considered part of the collection, whether purchased, leased, or licensed. Exclude charges or fees for interlibrary loans and expenditures for document delivery.

353	Print Materials Expenditures	Report all operating expenditures for the following print materials: books, serial back files, current serial subscriptions, government documents, and any other print acquisitions.
354	Electronic Materials Expenditures	Report all operating expenditures for electronic (digital) materials. Types of electronic materials include e-books, e-serials (including journals), government documents, databases (including locally mounted, full text or not), electronic files, reference tools, scores, maps, or pictures in electronic or digital format, including materials digitized by the library. Electronic materials can be distributed on magnetic tape, diskettes, computer software, CD-ROM, or other portable digital carrier, and can be accessed via a computer, via access to the Internet, or by using an e-book reader. Include expenditures for materials held locally and for remote materials for which permanent or temporary access rights have been acquired. Include expenditures for database licenses. [Note: Based on ISO 2789 definition.]

Note: Expenditures for computer software used to support library operations or to link to external networks, including the Internet, are reported under Other Operating Expenditures (data element #357).

355	Other Materials Expenditures	Report all operating expenditures for other materials, such as microform, audio, video, DVD, and materials in new formats.
356	Total Collection Expenditures	This is the sum of Print Materials Expenditures, Electronic Materials Expenditures, and Other Materials Expenditures (data elements #353, #354, and #355).
357	Other Operating Expenditures	This includes all expenditures other than those reported for Total Staff Expenditures (data element #352) and Total Collection Expenditures (data element #356).
<p>Note: Include expenses such as binding, supplies, repair or replacement of existing furnishings and equipment; and costs of computer hardware and software used to support library operations or to link to external networks, including the Internet. Report contracts for services, such as costs of operating and maintaining physical facilities, and fees paid to a consultant, auditor, architect, attorney, etc.</p>		
358	Total Operating Expenditures	This is the sum of Total Staff Expenditures, Total Collection Expenditures, and Other Operating Expenditures (data elements #352, #356, and #357).

**CAPITAL REVENUE**

Report all revenue to be used for major capital expenditures, by source of revenue. Include funds received for (a) site acquisition; (b) new buildings; (c) additions to or renovation of library buildings; (d) furnishings, equipment, and initial collections (print, non-print, and electronic) for new buildings, building additions, or building renovations; (e) computer hardware and software used to support library operations, to link to networks, or to run information products; (f) new vehicles; and (g) other one-time major projects. Exclude revenue to be used for replacement and repair of existing furnishings and equipment, regular purchase of library materials, and investments for capital appreciation. Exclude income passed through to another agency (e.g., fines), or funds unspent in the previous fiscal year (e.g., carryover). Funds transferred from one public library to another public library should be reported by only one of the public libraries. Report federal, state, local, and other revenue to be used for major capital expenditures in the following categories:

400	Local Government Capital Revenue	Report all governmental funds designated by the community, district, or region and available to the public library for the purpose of major capital expenditures, except for state and/or federal money distributed by the local government.
401	State Government Capital Revenue	Report all funds distributed to public libraries by state government for expenditure by the public libraries for the purpose of major capital expenditures, except for federal money distributed by the state.
402	Federal Government Capital Revenue	Report federal governmental funds, including federal funds distributed by the state or locality, and grants and aid received by the library for the purpose of major capital expenditures.

403	Other Capital Revenue	Report private (non-governmental funds), including grants received by the library for the purpose of major capital expenditures.
404	Total Capital Revenue	This is the sum of Local Government Capital Revenue, State Government Capital Revenue, Federal Government Capital Revenue, and Other Capital Revenue (data elements #400 through #403).

Note: The amounts reported for Total Capital Revenue and Total Capital Expenditures are not expected to be equal.

**CAPITAL EXPENDITURES**

405	Total Capital Expenditures	Report major capital expenditures (the acquisition of or additions to fixed assets). Examples include expenditures for (a) site acquisitions; (b) new buildings; (c) additions to or renovation of library buildings; (d) furnishings, equipment, and initial book stock for new buildings, building additions, or building renovations; (e) library automation systems; (f) new vehicles; and (g) other one-time major projects. Include federal, state, local, or other revenue used for major capital expenditures. Only funds that are supported by expenditure documents (e.g., invoices, contracts, payroll records, etc.) at the point of disbursement should be included. Estimated costs are not included. Exclude expenditures for replacement and repair of existing furnishings and equipment, regular purchase of library materials, and investments for capital appreciation. Exclude contributions to endowments, or revenue passed through to another agency (e.g., fines). Funds transferred from one public library to another public library should be reported by only one of the public libraries.
-----	----------------------------	---

**LIBRARY COLLECTION**

This section of the survey collects data on selected types of materials. It does not cover all materials (i.e., microform, scores, maps, and pictures) for which expenditures are reported under Print Materials Expenditures, Electronic Materials Expenditures, and Other Materials Expenditures (data elements #353, #354, and #355). Under this category report only items the library has acquired as part of the collection and catalogued, whether purchased, leased, licensed, or donated as gifts.

450	Print Materials	Report a single figure that includes both of the following: <ul style="list-style-type: none"> <li>1. Books in print. Books are non-serial printed publications (including music and maps) that are bound in hard or soft covers, or in loose-leaf format. Include non-serial government documents. Report the number of physical units, including duplicates. For smaller libraries, if volume data are not available, count the number of titles. Books packaged together as a unit (e.g., a 2-volume set) and checked out as a unit are counted as one physical unit.</li> </ul>
-----	-----------------	---

2. Serial back files in print. Serials are publications issued in successive parts, usually at regular intervals that are intended to be continued indefinitely. Serials include periodicals (magazines); newspapers; annuals (reports, yearbooks, etc.); journals, memoirs, proceedings, and transactions of societies; and numbered monographic series. Government documents and reference tools are often issued as serials. Except for the current volume, count unbound serials as a volume when the library has at least half of the issues in a publisher's volume. Report the number of physical units, including duplicates. For smaller libraries, if volume data are not available, count the number of titles. Serials packaged together as a unit (e.g., a 2-volume serial monograph) and checked out as a unit are counted as one physical unit.

451 Electronic Books (E-Books)

E-books are digital documents (including those digitized by the library), licensed or not, where searchable text is prevalent, and which can be seen in analogy to a printed book (monograph). Include non-serial government documents. E-books are loaned to users on portable devices (e-book readers) or by transmitting the contents to the user's personal computer for a limited time. Include e-books held locally and remote e-books for which permanent or temporary access rights have been acquired. Report the number of physical or electronic units, including duplicates, for all outlets. For smaller libraries, if volume data are not available, the number of titles may be counted. E-books packaged together as a unit (e.g., multiple titles on a single e-book reader) and checked out as a unit are counted as one unit.

Note: Under this category report only items the library has selected as part of the collection and made accessible through the library's Online Public Access Catalog (OPAC).

452 Audio

These are materials on which sounds (only) are stored (recorded) and that can be reproduced (played back) mechanically, electronically, or both. Include records, audiocassettes, audio cartridges, audio discs (including audio-CD-ROMs), audio-reels, talking books, and other sound recordings, such as web-based or downloaded audiobooks and MP3 files.

Report the number of units, both physical and electronic, including duplicates. Items packaged together as a unit (e.g., two audiocassettes for one recorded book) and checked out as a unit are counted as one physical unit. For electronic units, report only items the library has selected as part of the collection and made accessible through the library's Online Public Access Catalog (OPAC).

453 Video

These are materials on which moving pictures are recorded, with or without sound. Electronic playback reproduces pictures, with or without sound, using a television receiver or monitor. Video formats may include tape, DVD, CD-ROM, web-based or downloaded files, etc.

Report the number of units, both physical and electronic, including duplicates. Items packaged together as a unit (e.g., two video cassettes for one movie) and checked out as a unit are counted as one physical unit. For electronic units, report only items the library has selected as part of the collection and made accessible through the library's Online Public Access Catalog (OPAC).

Report the number of physical units, including duplicates. For smaller libraries, if physical unit data are not available, count the number of titles. Items packaged together as a unit (e.g., two video cassettes for one movie) and checked out as a unit are counted as one physical unit.

### **Licensed Databases**

Report the number of licensed databases (including locally mounted or remote, full-text or not) for which temporary or permanent access rights have been acquired through payment by the library, or by formal agreement with the State Library or a cooperative agreement within the state or region. A database is a collection of electronically stored data or unit records (facts, bibliographic data, abstracts, texts) with a common user interface and software for the retrieval and manipulation of the data.

Note: The data or records are usually collected with a particular intent and relate to a defined topic. A database may be issued on CD-ROM, diskette, or other direct access method, or as a computer file accessed via dial-up methods or via the Internet. Subscriptions to individual electronic serial titles are reported under Current Electronic Serial Subscriptions (data element #459). Each database is counted individually even if access to several databases is supported through the same vendor interface

Report the number of licensed databases acquired through payment or formal agreement, by source of access:

454*	Local	
455*	State (state government or state library)	
456*	Other cooperative agreements (or consortia) within state or region	
457**	Total Licensed Databases	This is the sum of Local, State, and Other licensed databases (data elements #454 through #456).

### **Current Serial Subscriptions**

Current serial subscriptions are arrangements by which, in return for a sum paid in advance, serials are provided for a specified number of issues. Include current serial subscriptions in print, electronic, and digital formats.

458**	Current Print Serial Subscriptions	Report the number of current print serial subscriptions, including duplicates, for all outlets. Examples of serials are periodicals (magazines), newspapers, annuals, some government documents, some reference tools, and numbered monographic series.
-------	------------------------------------	---

459**	Current Electronic Serial Subscriptions	Report the number of current electronic, electronic and other format, and digital serial subscriptions (e-serials, e-journals), including duplicates, for all outlets. Examples include periodicals (magazines), news-papers, annuals, some government documents, some reference tools, and numbered monographic series distributed in the following ways: (a) via the Internet (e.g., HTML, PDF, JPEG, or compressed file formats such as zipped files), (b) on CD-ROM or other portable digital carrier, (c) on databases (including locally mounted databases), and (d) on diskettes or magnetic tapes. Electronic serial subscriptions include serials held locally or remote resources that the library has authorization to access, including those available through statewide or consortia agreements. Do not include subscriptions to indexing and abstracting databases that include full-text serial content (e.g., EBSCO Host, ProQuest, OCLC FirstSearch).
-------	---	---

**SERVICES**

500	Public Service Hours Per Year	<p>This is the sum of annual public service hours for outlets.</p> <p>Note: Include the hours open for public service for Centrals (data element #209), Branches (data element #210), Bookmobiles (data element #211), and Books-by-Mail Only. For each bookmobile, count only the hours during which the bookmobile is open to the public. For administrative entities that offer ONLY books-by-mail service, count the hours that the outlet is staffed for service. Minor variations in scheduled public service hours need not be included, however, extensive hours closed to the public due to natural disasters or other events should be excluded even if the staff is scheduled to work.</p>
-----	-------------------------------	---

501	Library Visits	<p>This is the total number of persons entering the library for whatever purpose during the year.</p> <p>Note: If an actual count of visits is unavailable, determine an annual estimate by counting visits during a typical week in October and multiplying the count by 52. A "typical week" is a time that is neither unusually busy nor unusually slow. Avoid holiday times, vacation periods for key staff, or days when unusual events are taking place in the community or the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).</p>
-----	----------------	---

502	Reference Transactions	<p>A reference transaction is an information contact which involves the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a member of the library staff. It includes information and referral services. Information sources include printed and non-printed materials, machine-readable databases, catalogs and other holdings records, and, through communication or referral, other libraries and institutions and people inside and outside the library. The request may come in person, by phone, by fax, or by mail, electronic mail, or through live or networked electronic reference service from an adult, a young adult, or a child.</p> <p>Do not count directional transactions or questions of rules or policies. Examples of directional transactions are "<i>Where are the children's books?</i>" and "<i>I'm looking for a book with the call number 811.2G.</i>" An example of a question of rules or policies is "<i>Are you open until 9:00 tonight?</i>"</p> <p>Note: If an annual count of reference transactions is unavailable, determine an annual estimate by counting reference transactions during a typical week in October and multiply the count by 52. A "typical week" is a time that is neither unusually busy nor unusually slow. Avoid holiday times, vacation periods for key staff, or days when unusual events are taking place in the community or in the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).</p>
503*	Number of Registered Borrowers	<p>A registered borrower is a library user who has applied for and received an identification number or card from the public library that has established conditions under which the user may borrow library materials and gain access to other library resources. (<i>Output Measures for Public Libraries, 2<sup>nd</sup> edition</i>).</p> <p>Note: Files should have been purged within the past three (3) years.</p>
550	Total Circulation	<p>The total annual circulation of all library materials of all types, including renewals.</p> <p>Note: Count all materials in all formats that are charged out for use outside the library. Interlibrary loan transactions included are only items borrowed for users. Do not include items checked out to another library.</p>
551	Circulation of Children's Materials	<p>The total annual circulation of all children's materials in all formats to all users, including renewals.</p>

**INTER-LIBRARY LOANS**

552	Provided To	<p>These are library materials, or copies of the materials, provided by one autonomous library to another upon request. The libraries involved in interlibrary loans are not under the same library administration. These data are reported as annual figures.</p>
-----	-------------	--

553 Received From These are library materials, or copies of the materials, received by one autonomous library from another upon request. The libraries involved in interlibrary loans are not under the same library administration. These data are reported as annual figures.

### LIBRARY PROGRAMS

600 Total Number of Library Programs A program is any planned event which introduces the group attending to any of the broad range of library services or activities or which directly provides information to participants. Programs may cover use of the library, library services, or library tours. Programs may also provide cultural, recreational, or educational information, often designed to meet a specific social need. Examples of these types of programs include film showings, lectures, story hours, literacy, English as a second language, citizenship classes, and book discussions.

Count all programs, whether held on- or off-site, that are sponsored or co-sponsored by the library. Exclude programs sponsored by other groups that use library facilities.

If programs are offered as a series, count each program in the series. For example, a film series offered once a week for eight weeks should be counted as eight programs.

Note: Exclude library activities delivered on a one-to-one basis, rather than to a group, such as one-to-one literacy tutoring, services to homebound, resume writing assistance, homework assistance, and mentoring activities.

601 Number of Children's Programs A children's program is any planned event for which the primary audience is children and which introduces the group of children attending to any of the broad range of library services or activities for children or which directly provides information to participants. Children's programs may cover use of the library, library services, or library tours. Children's programs may also provide cultural, recreational, or educational information, often designed to meet a specific social need. Examples of these types of programs include story hours and summer reading events.

Count all children's programs, whether held on- or off-site, that are sponsored or co-sponsored by the library. Do not include children's programs sponsored by other groups that use library facilities. If children's programs are offered as a series, count each program in the series. For example, a story hour offered once a week, 48 weeks a year, should be counted as 48 programs. Exclude library activities for children delivered on a one-to-one basis, rather than to a group, such as one-to-one literacy tutoring, services to homebound, homework assistance, and mentoring activities. This figure is a subset of the Total Number of Library Programs (data element #600).

Note: *Output Measures for Public Library Services to Children: A Manual of Standardized Procedures* (ALA, 1992) defines children as persons age 14 and under.

602	Total Attendance at Library Programs	This is a total count of the audience at all library programs during the reporting period. (See Total Number of Library Programs, data element #600, for the definition of a library program.)
603	Children's Program Attendance	<p>The count of the audience at all programs for which the primary audience is children 14 years and under. Include adults who attend programs intended primarily for children.</p> <p>Note: Do not count attendance at library activities for children that are delivered on a one-to-one basis, rather than to a group, such as one-to-one literacy tutoring, services to homebound, homework assistance, and mentoring activities. (See Number of Children's Programs, data element #601, for the definition of a children's library program.)</p>

#### **OTHER ELECTRONIC INFORMATION**

650***	Number of Internet Computers Used by General Public	Report the number of the library's Internet computers [personal computers (PCs) and laptops], whether purchased, leased, or donated, used by the general public in the library.
651***	Number of Users of Public Internet Computers Per Year	<p>Report the total number of individuals that have used Internet computers in the library during the last year. If the computer is used for multiple purposes (Internet access, word-processing, OPAC, etc.) and Internet users cannot be isolated, report all usage. A typical week or other reliable estimate may be used to determine the annual number. Sign-up forms or Web-log tracking software also may provide a reliable count of users.</p> <p>Note: The number of users may be counted manually, using registration logs. Count each user that uses public internet computers, regardless of the amount of time spent on the computer. A user who uses the library's public internet computer(s) three times a year would count as three customers. Software such as "Historian" can also be used to track the number of users at each public internet computer. If the data element is collected as a weekly figure, multiply that figure by 52 to annualize it.</p>

## Outlet Data Element Definitions

#	<u>Data Element Name</u>	<u>Data Element Definition</u>
700	FSCS ID and SEQ (Automatic Display)	This is the identification code assigned by WebPLUS. Outlets are assigned the same FSCS ID as the administrative entity to which they belong, with a unique three-digit suffix added to distinguish each outlet.
701	LIB ID (Optional)	This is the state-assigned identification code for the outlet.
702	Name	<p>This is the legal name of the outlet.</p> <p>Note: Provide the legal name of the outlet. Do not use acronyms. Do not abbreviate the name unless it exceeds the WebPLUS field length of 60 characters. Avoid abbreviations at the beginning of the name and do not punctuate abbreviations. (See Standard Abbreviations for WebPLUS in Appendix I.)</p>
703	Street Address	<p>This is the complete street address of the outlet.</p> <p>Note: Do not report a post office box or general delivery. For a bookmobile that operates from an administrative entity, branch, or central library, report the address of the administrative entity, branch or central library from which it operates. For a bookmobile that is itself the administrative entity, report the address where the bookmobile is parked at night.</p>
704	City	This is the city or town in which the outlet is located.
705	ZIP Code	This is the standard five-digit postal ZIP code for the street address of the outlet.
706	ZIP+4	This is the four-digit postal ZIP code extension for the street address of the outlet.
707	County of the Outlet	This is the county in which the outlet is located.
708	Phone	<p>This is the telephone number of the outlet, including area code.</p> <p>Note: Report telephone number without spacing or punctuation. If the outlet has no phone, enter “-3” (for Not Applicable).</p>

709 Outlet Type Code

An outlet is a unit of an administrative entity that provides direct public library service.

Select one of the following:

**BM—Books-by-Mail Only.** A direct mail order service which provides books and other library materials. Books-by-mail typically serves rural residents, the disabled, the homebound, and others without access to another type of public library outlet. Requests for materials are usually received by mail and by telephone only. Only books-by-mail services that are housed separately from any other type of direct public service outlet (that is, central library, branches, or bookmobiles) should be coded here.

**BR—Branch Library.** A branch library is an auxiliary unit of an administrative entity which has at least all of the following:

1. Separate quarters;
2. An organized collection of library materials;
3. Paid staff; and
4. Regularly scheduled hours for being open to the public.

**BS—Bookmobile(s).** A bookmobile is a traveling branch library. It consists of at least all of the following:

1. A truck or van that carries an organized collection of library materials;
2. A paid staff; and
3. Regularly scheduled hours (bookmobile stops) for being open to the public.

Note: A separate outlet record may be created for each bookmobile. You may wish to create separate outlet records for individual bookmobiles if (1) they have different addresses and/or (2) they have different Metropolitan Status Codes (see outlet data element #710). Alternatively, a bookmobile outlet record may include more than one bookmobile.

**CE—Central Library.** This is one type of single outlet library (SO) or the library which is the operational center of a multiple-outlet library (MO or MA). Usually all processing is centralized here and the principal collections are housed here. Synonymous with main library.

Note: Each administrative entity may report either no central library or one central library. No administrative entity may report more than one central library. If you wish to identify a central library in the outlet file, identify the library with the largest collection as the central library, and report all others as branches. Where there are several co-equal outlets and no principal collection, report all such outlets as branches, not central libraries.

710 Metropolitan Status Code

Select one of the following. Bookmobiles should report the code which best describes their primary service area.

Note: Contact the State Data Center for specific information about Metropolitan Areas in your state.

CC—Central City. The largest central city and, in some cases, up to two additional central cities are included in the title of the Metropolitan Area; there also are central cities that are not included in a Metropolitan Area title. A Metropolitan Area central city does not include any part of that city that extends outside the Metropolitan Area boundary.

NC—Metropolitan Area, but Not Within Central City Limits. A large population nucleus, together with adjacent communities that have a high degree of economic and social integration with that nucleus. Some Metropolitan Areas are defined around two or more nuclei. Each Metropolitan Area must contain a place with a minimum population of 50,000 or a Census Bureau-defined urbanized area and a total Metropolitan Area population of at least 100,000 (75,000 in New England). A Metropolitan Area comprises one or more central counties. (Independent cities are considered county equivalents.) A Metropolitan Area may also include one or more outlying counties that have close economic and social relationships with the central county. An outlying county must have a specified level of commuting to the central counties and also must meet certain standards regarding metropolitan character, such as population density, urban population, and population growth. In New England, Metropolitan Areas are composed of cities and towns rather than whole counties.

NO—Not in a Metropolitan Area.

711 Square Footage of Outlet

Provide the area, in square feet, of the public library outlet (central library or branch). Report the total area in square feet for each library outlet (central library or branch) separately. This is the area on all floors enclosed by the outer walls of the library outlet. Include all areas occupied by the library outlet, including those areas off-limits to the public. Include any areas shared with another agency or agencies if the outlet has use of that area.

712      Number of Bookmobiles in the Bookmobile Outlet Record      The number of bookmobiles in the bookmobile outlet record.

Note: A bookmobile outlet record may include one or more bookmobiles. Complete this data element only if the outlet record is of the type BS—Bookmobile(s) (see outlet data element #709). A bookmobile is a traveling branch library. It consists of at least all of the following:

1. A truck or van that carries an organized collection of library materials;
2. A paid staff; and
3. Regularly scheduled hours (bookmobile stops) for being open to the public. Count vehicles in use, not the number of stops the vehicle makes.
