Section 1008.30 (formerly 240.117), Florida Statutes, requires the State Board of Education to develop and implement a common placement testing program to assess the basic computation and communication skills of students who intend to enter a degree program at any public community college or state university.

Every year the State provides reports to districts and high schools on their graduates' performance on these entry-level placement tests administered at Florida public community colleges and state universities. All entering freshmen must demonstrate certain basic skills before beginning college-level courses. Students who meet minimum standards on the elementary Algebra, Reading Comprehension, and Sentence Skills portions of the Florida College Entry-Level Placement Test (CPT) are considered 'ready' for college-level math, reading, and writing, respectively. Students may be exempted from these tests if they score high enough on the SAT or ACT. Students who test below the cutoff score for an area are required to enroll in remedial coursework.

The students represented in this report are not a random sample of all Florida high school graduates nor a random sample of all M-DCPS graduates. This report focuses on the test results for students who:

- # graduated during the 1999-2000, 2000-01, 2001-02, and 2002-03 school year with a standard diploma from a Florida High School and
- # entered a Florida public university or community college as degree-seeking students.

These students represent roughly half of the 2000-03 graduates in Florida and a little more than half of the M-DCPS graduates. The report does not include: graduates who do not go to college, graduates who attend private or out-of-state colleges, transfer students, casual or non-degree-seeking students, students who take time off between high school and college, GED or non-standard diploma recipients, and private high school graduates.

The compendium is organized by M-DCPS senior high schools and it provides test results for students graduating in 1999-2000, 2000-01, 2001-02, and 2002-03. Data include the number of students tested and the percent of students scoring above the established criteria or cutoff established by Section 1008.30, Florida Statutes. These data are provided for five groups of students including: 1) Black, non-Hispanic; 2) White, non-Hispanic; 3) Hispanic; 4) Other (includes American Indian, Asian, and unknown); and 5) all students combined. District and State figures are included on the final two pages of the compendium.

The present compendium has been completed to assist M-DCPS high schools in preparation of students for college. These results can be used by high schools to determine the extent to which graduates are prepared for college-level courses. These reports will be updated as soon as the State makes data available for the 2003-04 graduating class.

For additional information, the interested reader is referred to a Research Services Research Brief which examines districtwide performance of M-DCPS students from 2000-2003 (Froman, T. and Rubiera, V. *Readiness for College: The Performance of M-DCPS Students on the Common Placement Test*, Vol. 0503, August 2005).
