NURSE-TRAINING SCHOOLS, 1926-27

This report contains statistics of nurse-training schools for the year 1926-27. The principal items included are: Number of schools; number of nurse-training pupils; number of graduates; bed capacity of the hospitals maintaining the schools; average number of patients in these hospitals; length of the nurse-training course; admission requirements, including age limitations; number of hours nurse-training pupils are on duty; tuition charges for the course; money allowances for services of pupils; State summaries containing the above items; and detail information for each institution.

SCHOOLS

Reports were received from 1,797 schools in 1927, an increase of 42 over 1920 and of 288 over 1915. General hospitals maintain 1,722 of these schools, and hospitals for the insane maintain 75 nurse-training schools. Every State reports schools excepting Nevada.

PUPILS

The total number of nurse-training pupils reported for 1927 is 77,768, an increase over 1920 of 41.5 per cent and over 1915 of 68.5 per cent. New York reports 8,835 pupils, Pennsylvania 8,331, Illinois 5,908, Massachusetts 5,293, Minnesota 3,851, Ohio 3,846, and California 3,549. A total of 549 men pupils are reported from 25 States. Men pupils are reported from 48 general hospitals and from 23 hospitals for the insane. One out of every thirty-six schools in general hospitals, and one out of every three hospitals for the insane, have men-training for the profession of nursing. Pupils in schools in general hospitals number 75,638 and in hospitals for the insane 2,130.

GRADUATES

The number of graduates of nurse-training courses reported for 1927 is 18,623, which is an increase of 24.3 per cent over the number for 1920 and 67.5 per cent over 1915. The number of graduates from schools in general hospitals is 18,176 and from schools in hospitals for the insane 447. The number of men graduates in schools in general hospitals is 82 and in hospitals for the insane 43.

TUITION AND ALLOWANCES

A charge is made for tuition in only 58 of the 1,797 schools. Only 14 of the 58 charge tuition for the second and third years. The tuition range for the full course is from \$25 to \$325, with an average of \$92 per school. Of the 58 schools which charge a tuition, 19 do not grant money allowances to pupils. The range of allowances in the 39 schools which charge a tuition and which grant allowances is from \$80 for the period of training to \$1,908, with an average of \$652. No tuition is charged in schools in hospitals for the insane.

The money allowance in nurse-training schools varies considerably. Among schools in general hospitals, 749 pay less than \$100 to those in training for the first year; 279 pay less than \$100 during the third year of training; 91 pay more than \$200 during the first year of training; and 193 pay more than \$200 during the third year of training.

Of schools in hospitals for the insane, only 7 pay the pupils less than \$300 during the first year, while 49 pay more than \$400 during the first year; 10 pay less than \$300 during the third year; and 42 pay more than \$400 during the third year. Allowances have increased in schools in general hospitals since 1920, and have decreased in schools in hospitals for the insane.

ADMISSION REQUIREMENTS

The entrance age requirement is about the same for schools in general hospitals as it is in hospitals for the insane. The typical requirement is 18 years. In 1920 the average age requirement was 18.6 years for 1,755 schools, and in 1927 it was 18.1 years for 1,787 schools.

The average educational requirements for entrance to schools in general hospitals was a little less than tenth grade work in 1920. It is about halfway through the tenth grade in 1927. Forty-eight schools in hospitals for the insane required one year of high-school work for entrance in both 1920 and 1927.

HOURS OF DUTY

In 1918, nurse-training pupils in 689 general hospitals were required to be on duty 10 hours. In 1920 eight hours were required by 539 schools, 9 hours by 474 schools, and 10 hours by 439 schools. In 1927, a total of 954 schools required 8 hours, 399 required 9 hours, and 293 required 10 hours. In other words, nearly half the schools required 10 hours of work per day in 1918, and considerably more than half required but 8 hours in 1927. A few schools still require as many as 12 hours of work per day of nurse-training pupils. In schools in hospitals for the insane the typical day was over 12 hours

long in 1918. More schools require 8 hours of work in 1927 than require any other number of hours, although nearly as many require 10 hours of work.

CAPACITY OF HOSPITALS

The hospitals with which these 1,797 schools are connected have a bed capacity of 359,077, and an average daily number of patients of 276,194. This is an average bed capacity of about 200 per hospital, an average of 154 daily patients per hospital, and an average of 43 nurse-training pupils per school. The typical general hospital has about 50 beds and 40 patients. Hospitals for the insane have a bed capacity range from less than 100 beds to nearly 7,000, with no typical size.

Tables 1 to 8 give summaries concerning nurse-training schools; Tables 9 to 11, computations by States; and Tables 12 and 13 give detail information for each school reporting.

TABLE 1.—Comparative statistics of nurse-training schools, 1880-1927

Year	Schools	Nurse pupils	Graduates	Capacity of hospitals (beds)	Average daily number of patients
