CONTENTS.—Changes in the normal school list—Additions to endowment funds—Review of statistics of all normal schools and teachers' colleges—Review of statistics of teachers' colleges and State normal schools—Review of statistics of city and county normal schools—Review of statistics of private normal schools—Distribution of normal schools—Expenditures in 50 State normal schools and teachers' colleges—Detailed statistics of teachers' colleges—Detailed statistics of State normal schools—Detailed statistics of city and county normal schools—Detailed statistics of private normal schools.

This report presents the statistics of 371 teachers' colleges and normal schools for 1919-20. For the first time the list of teachers' colleges appears. It is composed of institutions offering four years of work above the secondary school and granting degrees. The work offered in such schools is considered of collegiate grade and is of such importance as to merit separate and special treatment.

A graphic treatment and the discussion of the statistics contained herein will appear later in the Biennial Survey of Education for 1918-1920. This bulletin, however, contains all the data on which such treatment will be based.
