LETTER OF TRANSMITTAL

DEPARTMENT OF THE INTERIOR,
BUREAU OF EDUCATION,
Washington, D. C., March 8, 1927.

SIR: American people are no longer satisfied for their school buildings, erected usually at heavy cost, to be used only for day classes in ordinary instruction. Such loss of educational opportunity is not to be endured with complacency. Furthermore, idleness during six-sevenths of the hours of the year is contrary to the principle of full utilization of plant, and it means waste of investment that is abhorrent to a Nation which prides itself upon its business sense.

The past quarter of a century has seen, therefore, wide extension of the use of schoolhouses for social, recreational, and community purposes. Thirty-two States have definitely provided by law for such use, and in the other States school authorities permit it under their general powers as custodians. In two bulletins of the Bureau of Education the progress of this movement has been recorded, and the time has arrived for another appraisal of its development.

In making this, I sought the active cooperation of the National Community Center Association, through Leroy E. Bowman, its secretary; of the Russell Sage Foundation, through Clarence Arthur Perry, its associate director, who was the author of the two previous bulletins of this Bureau upon this subject; and of the social ethics department of Harvard University, through Prof. James Ford. The cordial assistance of all these was unstintedly given. Extensive correspondence was conducted by this office with school administrative officers, and a great volume of information was collected.

Arrangements were made for this material to be digested and tabulated by Mrs. Eleanor Touroff Glueck, Ed. D. Suitable portions of her work have been selected and arranged for publication. I recommend that this manuscript be printed as a bulletin of the Bureau of Education.

Respectfully,

JNO. J. TIGERT,
Commissioner of Education.

The SECRETARY OF THE INTERIOR.

EXTENDED USE OF SCHOOL BUILDINGS

TYPES OF "EXTENDED USE"

The current utilization of public-school buildings for community purposes may be divided into four broad classes, of which any two or more may occur simultaneously in the same building.

(1) The use of the school building by individual groups, at whatever time they desire it, for other than the regular educational purposes (within legal limitations and when not interfering with regular school activities), upon permit from school authorities or other public bodies having the custody of school property.

(2) Activities initiated and supervised by the school authorities or other public bodies. In some of the larger cities (e. g., New York, Boston, Washington, and Chicago) there are special bureaus within the department of education or municipal commission which are specifically charged with the conduct of all "extended use" activities. In some cases, notably Pittsburgh and Milwaukee, the same body is also responsible for the supervision of night schools.

(3) The use of the school building in the evenings for the extra-curricular activities of day-school pupils, usually under the supervision of members of the school faculty.

(4) The utilization of the building as a "center" of certain kinds of neighborhood life. Such enterprises are usually initiated by a local group, a civic society, a woman's club, or a parent-teacher association. They are sometimes also stimulated by a central city-wide organization, such as the People's Institute of Brooklyn or Community Service of Cincinnati. The term "center" may be preceded by "community," "civic," "social," "recreation," "neighborhood," or "school." Sometimes, but not always, the name indicates the character of the dominant activity. In the organization of these activities there is usually some degree of self-support and self-government.

DEFINITION OF SCHOOL CENTER

The investigator who attempts to determine the extent of after-class use of school buildings through the questionnaire method is confronted by well-nigh insurmountable difficulties. If school superintendents are asked to state how many "centers" of any specific kind exist in the local system, the data obtained will not be significant, because the activities connoted by "social," "community," or any

other type of school center have nowhere been standardized as to quantity and character. "Civic center" implies one kind of a program here and a quite different one there. If the questionnaire calls for detailed information as to kind and frequency of activity, it will be too burdensome to answer.

The same situation confronted Clarence Arthur Perry when he made a similar survey of the 1919-20 school extension season, and the device used in that case was an arbitrary definition based upon frequency and regularity of activity. He admitted to the school center category any "school which is used regularly at least one evening a week for two or more activities—or twice a week for one—not counting night schools."¹

Despite the emphasis upon quantity rather than spirit and substance which is implied in this definition, it seemed on the whole best suited to the situation and most likely to elicit response from the school authorities. Its use had the further advantage of making possible a comparison of the results of the two surveys.²

SCOPE OF THE INVESTIGATION

The questionnaire used for this survey was similar in all essential respects to the one employed by Perry in his 1919-20 study. The distribution of the questionnaire by the United States Bureau of Education carried it to 6,353 school officials, of whom 2,891 were city superintendents (of independent municipalities), 2,859 were county superintendents, and 603 township and district superintendents. The total number of replies received was 2,729, which represents a return of 42 per cent. Of these, 58 per cent were from independent municipalities and 41 per cent from counties, townships, and districts.

In the Perry 1919-20 survey there was a 77 per cent return, but since that inquiry did not include places under 5,000 in population, as this one does, there is no basis for comparison.

Of the total number replying, 17 per cent listed centers which met the standard frequency, 31 per cent mentioned some community use but less than the defined requirement, while the rest (52 per cent) reported that there were no school centers under their jurisdiction.

This latter statement refers, of course, to centers as defined in the questionnaire and can not be interpreted to mean a total absence of community activity.³ As a matter of fact, many of those who made negative reports incidentally referred to public activities on school premises under other than school auspices, and the early inquiries of Perry indicate that there is a widespread utilization of school buildings by the community for all sorts of occasions.

¹"School Center Gazette," pamphlet, Russell Sage Foundation, 1920, p. 3.

²For previous studies by Perry in this field see the following bulletins of the United States Bureau of Education: "The Extension of Public Education," Bulletin, 1915, No. 28, and "School Extension Statistics," Bulletin, 1917, No. 30.

Only 16 of the States have no laws relating to the extended use of school buildings, and throughout the country the broad powers granted to school authorities as custodians of school property, generally imply their right to grant the use of buildings for community purposes. Occasional and sporadic "wider use" we may then assume is quite general, but its precise extent could be ascertained only through an exceedingly costly and well-nigh impracticable investigation. In this survey the yardstick is applied only to the activity above a certain arbitrarily fixed level. It seeks to measure the upper part, and not the base of the pyramid. In what follows, "school center" does not refer to the local name but simply to after-class community activities which reached the frequency and regularity prescribed in the Perry definition.

DISTRIBUTION OF SCHOOL CENTERS

The existence of centers meeting the standard was reported by school officials in 563 independent municipalities and by 103 superintendents of counties, townships, or districts. Many of the latter officials reported for more than one place. In fact, the total number of cities, townships, and villages in the United States for which standard centers were reported is 722, and of these the majority—67 per cent—have a population under 5,000,³ the extremes being represented by Whitewater, Wayne County, Ind., with its 96 inhabitants, and New York City, with its 5,620,000. The distribution of the 722 places according to population groupings is shown in Table 1.

TABLE 1.—*Distribution by population groupings of the 722 places reporting standard school centers in 1923-24*

Population	Number of places	Per cent
Less than 2,500	339	46.8
2,500 to 5,000	143	20.0
5,000 to 10,000	88	12.2
10,000 to 20,000	55	7.6
20,000 to 30,000	17	2.4
30,000 to 50,000	25	3.5
50,000 to 100,000	24	3.3
100,000 to 1,000,000	29	4.0
1,000,000 to 5,000,000	1	.1
Over 5,000,000	1	.1
Total	722	100.0

The total number of school centers in the 722 places is 1,569, of which precisely two-thirds (1,031) are in cities of over 5,000 population, the class which constituted one-third of all the places reporting centers. As would be expected, the returns showed that the larger the place, the greater the number of centers reported.

³The places with more than and under 5,000 population were tabulated separately so as to make possible a comparison with the Perry study, and a differentiation also of the urban and rural classes. True, some rural districts exceed 5,000 and vice versa, but the classification is approximately correct.

4 EXTENDED USE OF SCHOOL BUILDINGS

LENGTH OF SEASON

The questionnaire called for information as to the period in months for which an appropriation had been made for school centers, or for which a fund had been raised, or for which a definite administrative plan had been made, not contingent for its working upon funds still unraised. The length of season reported for 1,480 standard centers (89 of the 1,569 did not reply) showed it to be 9 months in one-fourth of the places, while another one-fourth was divided equally between the 6 and 12 months seasons (see Table 2).

TABLE 2.—*Length of season of 1,480 standard school centers in 1923-24*

Months	Centers	Per cent	Months	Centers	Per cent
1	2	0.01	8	169	11.57
2	13	.88	9	368	25.00
3	22	1.50	10	158	10.50
4	67	4.50	11	3	.02
5	135	9.12	12	185	12.51
6	189	12.77	Total	1,480	100.00
7	171	11.02			

EVENINGS PER WEEK CENTERS OPEN

In Table 3 the returns are presented as to the average number of evenings a week that the centers were open. As might be expected, the local information necessary to give an accurate figure was in many cases lacking, and a reply such as "from 2 to 5" was given. In such cases only the minimum figure was tabulated. A glance at the table shows that the most common frequencies were two, one, and five nights.

TABLE 3.—*Number of evenings per week 1,569 school centers were open in 1923-24*

Evenings	Centers	Per cent
Indefinite		
1	13	0.82
2	330	21.03
3	353	22.51
4	284	18.83
5	217	13.83
6	301	19.18
7	78	4.97
Total	1,569	100.00

AUSPICES

The replies to the question relating to the administrative control of centers are summarized in Table 4 (322 places did not report). Of course many reported "school" and this was interpreted as meaning "board of education," it being understood that the actual direction would in most cases be in the hands of the regular school staff. The

term "municipal bodies" refers to recreation commissions, park boards, and similar governmental departments. The term "private" groups includes such organizations as parent-teacher associations, Y. M. C. A.'s, Boy Scouts; civic, fraternal, religious, patriotic, and other "special interest" groups and organizations composed of representatives of the individuals or groups who are participating in school-center activities, usually known as "center councils," or "committees." Table 4 shows that control and management of centers is predominantly in the hands of school authorities, as would be expected.

TABLE 4.—*Controlling organizations of 1,247 school centers, 1923-24*

Controlling organization	Centers	Percent
Board of education	760	61.0
Other municipal bodies	149	11.9
Municipal and private bodies	204	16.4
Private organizations	134	10.7
Total	1,247	100.0

FINANCIAL SUPPORT.

The sources of the funds used in the maintenance of school centers are shown in Table 5. "City" means that all funds were derived from municipal taxation. "Contributions" signifies donations or subscriptions, while "Fees" refers to paid admissions and other kinds of income received directly from the public in return for the enjoyment of the activities of a school center. Wide variation manifest in budgetary provision is due to differences in salary scales, length of season, the number of evenings open weekly, the number and character of the activities provided (some including night schools), the number of paid workers, the amounts appropriated for heat, light, and janitor service, the size of the rental fees exacted by boards of education, and in the degree of support by the people themselves. The returns show that a little under one-half are supported wholly by taxation, one-third by a combination of public and private funds, and one-fifth entirely from private sources. No replies on support were received from 283 centers.

TABLE 5.—*Sources of support of 1,286 centers in 1923-24*

Kinds of support	Centers	Percent
Public ("city")	569	44.2
City and fees	311	24.1
City and contributions	105	8.2
City, fees, and contributions	31	2.4
Fees	138	10.8
Contributions	90	7.0
Fees and contributions	42	3.3
Total	1,286	100.0

THE SCHOOL CENTER STAFF

The questionnaire asked for a report on the average number of paid and volunteer workers in attendance nightly. The staff was considered to include all persons who regularly assisted in the direction, management, or conduct of the activities. Lantern operators, ticket takers, cloakroom attendants regularly engaged at the center were to be considered "workers." The janitor was not to be included unless he performed for the center some service other than janitorial work; nor were the musicians hired for a dance, the lecturers, or the performers at an entertainment to be considered "workers." All regular staff members who received no financial compensation for their services were to be reported as "volunteers." Helpers whose compensation was paid by a philanthropist or by private organizations were to be considered "workers." Upon this point no replies were received from 343 centers, while the answers given regarding 1,226 centers very often stated only the kinds of workers and not their number. A summary of the numbers of paid and volunteer workers would therefore be misleading; 505 centers (41 per cent) had paid workers exclusively, 511 (42 per cent) volunteers only, while 210 (17 per cent) reported a staff of both paid and volunteer workers.

ACTIVITIES

The questionnaire called for a statement of the activities already established in school centers or that were to begin in the near future. Activities occurring some time during every month, but not necessarily every night, or even every week, were to be reported. They were to be entered by means of code letters in accordance with an adopted classification (see Table 10, p. 12), any activity not clearly covered by one of the types to be assigned to the one most like it in spirit.

In addition, it was to be indicated whether or not there were branch public libraries located in the school buildings. Only those open after the regular school hours were to be reported.

The actual returns on this question are set forth in Table 10, but being shown in code letters they are not very individual or descriptive. A closer view of many of them was indicated in a column headed "Remarks," which, due to limitations in space, had to be omitted from Table 10. The following notes have been taken from this column:

Night schools.—Among these were mentioned schools for "foreigners," and for negroes. Americanization and English classes were frequently reported.

Lectures.—These were variously reported under the auspices of the board of education, the high school, lyceum, Chautauqua, or State university extension division.

Entertainments.—Concerts (including radio concerts), motion pictures, plays, operettas, pageants, festivals, school contests were among the varieties reported.

Society meetings.—The organizations frequently reported include parent-teacher association, mother's club, community club, community-advancement association, patron's-day association, school-improvement association, school-welfare association, farm bureau, farmers' club, farmers' union, farmers' institute, community-improvement organization, various churches, Young Men's Christian Association, Young Women's Christian Association, Woman's Christian Temperance Union, Red Cross, Community Service (Inc.), American Legion, chamber of commerce, board of trade, taxpayers' association, Knights of Columbus, and Odd Fellows. This is only a partial list.

Civic occasions.—Open forums for the discussion of public questions, debates, oratorical contests, and mass meetings.

Athletics.—Basketball, volley ball, swimming, and gymnasium classes were frequently mentioned.

Clubs and classes.—Boy Scouts, Girl Scouts, Camp Fire Girls, Hi-Y's, Girl Reserves, agricultural clubs devoted to cotton, poultry, corn, or fruit canning; radio, science, debating, and glee clubs; classes in sewing, dressmaking, millinery, cooking, home making, lamp-shade making, basketry; classes in civics, parliamentary law, and similar groups were reported.

Rooms open for quiet games and study.—Checkers, chess, and other table games; reading rooms; and in a few instances supervised study hours for children of school age were specifically mentioned.

Dancing.—Dances were reported, both as following social gatherings and as distinct events.

Social occasions.—Banquets, whist parties, spelling matches, box socials, pie socials, and school parties were mentioned.

Cooperative activities.—Among these were reported "community nights" and "community days," and in one instance a "community skate." There were also sings, orchestras, picnics, and choruses under community auspices; also interschool contests in spelling, debating, athletics, and intercenter contests of various kinds.

In Table 6 there is presented a summary of the replies in which the various types are ranked according to the frequency with which they were reported.

EXTENDED USE OF SCHOOL BUILDINGS

TABLE 6.—*Incidence of types of activities in 1,569 school centers in 1923-24*

Type of activity	Number of centers	Per cent
Athletics	1,107	70
Clubs and groups	795	50
Entertainments	706	45
Society meetings	704	44
Lectures	438	27
Social occasions	436	27
Civic occasions	367	23
Dancing	338*	21
Night schools	285	18
Cooperative activities	214	13
Rooms open for quiet games and study	202	12
Public-library branches	168	10
Total	1,569	100

Activities with a recreational content obviously bulk largest in the average school-center program. Civic and educational features are also distinctly present, but their proportion can not be fixed with any precision because so many activities exhibit more than one aspect. This is especially true of many group affairs. A club may have a debate on one evening and a dance on another, yet both are entered on the records as "club meetings."

A much larger part of school-center activity than is indicated by the above table is in reality group enterprise. The school building is increasingly being used as the meeting place of all sorts of local associations. The actual volume of such use can not be stated, because the necessary data are not available. We can, however, offer a rough classification which, despite its unavoidable overlapping, may give some idea of the content and range of group activity in the school center.

CLASSES OF GROUPS MEETING IN SCHOOL CENTERS

1. Local groups organized about special interests, such as music, drama, literature, and civic improvement.
2. School clubs, athletic associations, and student-government associations.
3. Organizations closely related to the schools, such as parent-teacher and school-improvement associations.
4. Boys' and girls' clubs which are stimulated by national organizations such as Boy Scouts, Girl Scouts, Camp Fire Girls, and the National Committee on Boys and Girls' Club Work.
5. Philanthropic and social-service organizations, such as Community Service (Inc.), and welfare federations.
6. Organizations, both National and State, which are particularly concerned with the improvement of rural life, such as farm bureaus and granges.
7. Religious organizations, as churches and Sunday schools.
8. Organizations which render service to school centers, such as State university extension departments, lyceums, and chautauquas.
9. Industrial groups connected with factories and trades.

10. Patriotic organizations, like the American Legion.
11. Fraternal organizations, such as the Knights of Columbus and the Odd Fellows.
12. Municipal bodies, such as the city council.

The local group most responsive to school-center hospitality is the parent-teacher association, having been reported in 243 instances or in more than 15 per cent of the centers, as carrying on "society meetings," and it more than any other group shares in the management of centers.

COMPARISON WITH THE PERRY SURVEY

In his 1919-20 study Perry reported 667 centers in 107 cities⁴ of over 5,000 population. The present inquiry found 1,031 centers in 240 cities of the same class. This represents an increase of 55 per cent in centers and a growth of 128 per cent in the number of cities reporting them. In 56 instances, the same places report centers in 1919-20 and in 1923-24, and we can therefore note the changes in the number of centers during the four-year interval. These are set forth in detail in Table 7, and a summary of the results shows that in 27 cases (48 per cent) there was an increase, in 18 places (32 per cent) no change, and in 11 cases (20 per cent) a decrease. Thus in 80 per cent of the places the school center movement either showed growth or held the ground it had gained. The net gain in all 56 places was 56 centers, or 11 per cent. When we inspect the losses more closely we find 74 per cent of the decrease occurred in two big cities, Chicago⁵ and St. Louis, which of course lessens their significance. A temporary slump in a populous city may seriously affect the total number of centers in the United States, but as a mark of decline in the movement it carries little weight.

⁴School Center Gazette, p. 3.

⁵As a matter of fact, Chicago has since made a vigorous "comeback." The recovery is largely due to the work of an effective "Joint Committee on School Affairs," composed of leading citizens who made a thorough investigation of the causes leading to the discontinuance of so many centers. Their report, "Extension Activities Survey of the Chicago Public Schools, 1924," enumerated the following causes: "Too strict a policy of the board of education. Centers not able to meet requirements of policy. Financial difficulties and small attendance. Building difficulties. Policing or heavy discipline required. Too near a park field house. Not enough need. Race problems. Neighborhood conditions. Indifference of people. Lack of cooperation."

Another indication of the growing use of schools as community centers is found in a comparison of the number of evenings open weekly reported for 1919-20 and for 1923-24. The figures, in terms of percentages, are shown in Table 8 from which we discover that the

centers open four or more nights weekly constituted only 36 per cent of the total in this group in 1919-20, while in the same cities during the season of 1923-24 a frequency of four or more nights was shown in 48 per cent of the centers. What makes these figures still more significant is the fact that the increase was distributed among all of the frequencies from four to seven.

TABLE 8.—*Comparison of number of evenings a week school centers were open in 58 cities of more than 5,000 population in 1919-20 and 1923-24*

Percentage	Evenings open						
	1	2	3	4	5	6	7
Percentage, 1919-20.....	11	30	23	17	14	5	0
Percentage, 1923-24.....	10	22	20	18	23	6	1

The present investigation into the administrative authority of school centers indicates that by far the largest proportion of control and management is in the hands of boards of education. A comparison (see Table 9) with the Perry study on this point shows a distinct trend toward control by boards of education or other municipal authorities, and corresponding decreases both in partial and total control by private groups:

TABLE 9.—*Percentage distribution according to administrative authority of school centers in 58 cities during seasons of 1919-20 and 1923-24*

Authority	1919-20	1923-24
Board of education or other municipal body.....	55	80
Board of education and private groups.....	34	13
Private groups.....	11	7
Total.....	100	100

The present survey leads to the following generalizations:

1. The school-center movement is enjoying a gradual growth.
2. In a majority of cases the school-center season is six or more months in length.
3. Twice a week is the most common number of nights a center is open, one and five evenings being next in frequency.
4. Practically two-thirds of the centers are under the management of school authorities, and the trend is toward an increase of their control.
5. The support of school centers is predominantly by public taxation.
6. Not quite half of the school centers have a paid staff.
7. The activities of school centers show a high recreational content and are participated in by many local groups.

EXTENDED USE OF SCHOOL BUILDINGS

TABLE 10.—Places and school centers in 43 States and the District of Columbia for which returns were received covering season of 1923-24.

Key to activities: NS, night school; L, lectures; E, entertainments (concerts, etc.); SM, society meetings (adult), such as taxpayers' or parent-teacher associations; CM, civic occasions, mass meetings, public discussions; CP, cooperative activities (credit unions, club councils, etc.); A, athletics, gymnastics, bathing, active games or folk dancing; C, clubs (social, athletic, etc.) or groups (musical, handicraft, etc.); R, rooms open for quiet games, reading, or study; D, dancing (social); S, social occasions (parties, banquets, etc.).

1. Official centers are those which are established by the department of extended use of public schools of the board of education, and for the conduct of which the department pays all expenses, including salary of janitor and teachers. They are uniting in a means of neighborhood school centers, each center being represented by a teacher of the center.
 2. Where there are no "official centers" the board of education cooperates by paying the salary of the custodian and of one teacher and all building charges. In some cases it pays only the custodian's salary and building charges. Sometimes the board of education pays only building charges. A permit is procured from the extended use department for every activity, groups must being required to get permission from the school principal before filing request for use with the department. This applies to all activities after 4 P.M.
