Bulletin 1955, No. 1

U. S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

MARION B. FOLSOM, Secretary

Office of Education

SAMUEL MILLER BROWNELL, Commissioner

FOREWORD

This catalog lists and describes more than 4,000 motion pictures and filmstrips of the United States Government which are now available for public use within the United States. While all departments and establishments of the Government assisted in its preparation, the catalog is primarily the result of unique cooperation between the Office of Education and the Library of Congress. Briefly stated, the Office of Education collects and catalogs information about all U.S. Government films and sends such information to the Library of Congress. The Library reviews these data, indexes the films by subjects, and prints 3x5-catalog cards. These cards, prepared cooperatively by the Office and the Library, provided the basic material used in compiling this 1955 catalog of U.S. Government Films for Public Educational Use.

It is our hope that the catalog will help schools and colleges and libraries in choosing and using the many educational films of the United States Government. Film users can keep their catalogs up-to-date through Library of Congress film catalog cards which are issued on a continuing basis.

To the members of our respective staffs and to the Government agencies that cooperated in the preparation of this catalog, we wish to express our sincere appreciation.

SAMUEL MILLER BROWNELL,
U.S. Commissioner of Education.

L. QUINCY MUMFORD,
The Librarian of Congress.

16mm Film Libraries Distributing U.S. Government Films

The following 16mm film libraries lend or rent motion pictures of the United States Government. Some of them are official depositories of the films of individual agencies such as the Department of Agriculture or the Bureau of Mines. Others have purchased prints of various Government films and lend or rent these films. Both depository and nondepository libraries are listed; they have not been differentiated.

For the convenience of users, these film libraries have been arranged alphabetically by States and cities. Only libraries with 50 or more Government films (titles) have been listed, and each such library is described briefly in terms of the number and kinds of Government films in its collection and the restrictions, if any, placed upon its circulation of these films. Catalog users should note and observe these restrictions which are, in many cases, set by law.

Because of their variability, local loan and rental rates have not been specified. Film users can and should obtain such information from individual libraries.
