PART I. GENERAL FINDINGS AND INTERPRETATIONS:	Page
Problem of compiling statistics of higher education	1
Number and distribution of institutions reporting:	
Totals by States	3
Professional schools by States	5
Historical summary, 1900-1938	8
High-school and college enrollments	8
Rise of the junior college	9
Other trends	10
Faculty, students, and degrees, 1937-38	10
Faculty	10
Students, total enrollments	12
Percentage of men and women students	13
Public and private institutions compared	13
Number of freshmen	16
Students in other types of courses	17
Earned degrees	17
Honorary degrees	18
Finances, general summary	19
Income:	
Student fees	19
Endowments	19
Public funds	19
Gifts and grants	19
Nonsalaried service	20
Auxiliary enterprises and activities	20
Comparisons of amounts of income from the several sources	20
Expenditures:	
Educational and general	22
Capital outlay	22
Property	23
Buildings, grounds, and equipment	23
Endowment, annuity funds, loan funds, and other permanent funds	23
Socio-economic factors	23
Population changes	24
Income per capita	25
Student enrollments	28
Graduates	32
Income of higher education	34
Higher education income per capita	35
Expenditures	36
PART II. SUMMARIES FOR THE UNITED STATES:	
Table 1. Historical summary, 1900-1938	43
1. All institutions of higher education, 1930-38	43
2. Universities, colleges, professional schools, and junior colleges	44
3. Teachers colleges and normal schools	45

CHAPTER IV

STATISTICS OF HIGHER EDUCATION

1937-38¹

PART I. GENERAL FINDINGS AND INTERPRETATIONS

Problem of Compiling Statistics of Higher Education

FOR THE statistical compilations found in the following pages the data were gathered by means of two questionnaires—one on faculty, students, and degrees; and the other on receipts, expenditures, and property. These questionnaires were sent to all of the 1,709 institutions listed in Office of Education Bulletin 1939, No. 1, *Educational Directory: 1939*. This directory list is made up as follows:

- A. Universities, colleges, and teachers-colleges:
 - 1. Accredited by a national or regional accrediting association, or by State universities or State departments of education.
 - 2. All State-supported institutions of collegiate grade.
 - 3. Four-year institutions not accredited by any agency, but enrolling at least 100 resident college students in regular session and graduating at least 10 students annually.
- B. Independent professional and technological schools:
 - 1. Accredited by professional associations or approved by State universities or State departments of education.
 - 2. Not accredited by any agency but enrolling at least 25 resident students of college grade in regular session and graduating at least 5 students annually.
- C. Junior colleges and normal schools:
 - 1. Accredited by a national or regional accrediting agency, or by State universities or State departments of education.
 - 2. Not accredited by any agency but:
 - (a) Requiring high-school graduation for entrance.
 - (b) Offering 2 years of work of college grade.
 - (c) Enrolling 50 or more resident students of college grade in regular session.

¹ Prepared under the supervision of Emery M. Foster, Chief, Division of Statistics; statistical editing and tabulating done by Margaret J. S. Carr and Maude Farr, senior statistical clerks.

(It should be noted also that questionnaires were sent to and replies received from institutions of college grade in the outlying parts of the United States, but these institutions are not included in the general summaries.)

Of the 1,709 questionnaires sent out, usable returns on the personnel blank were received from 1,616 institutions. Not all of these institutions supplied data on every item. In these instances, and also in the 74 instances in which institutions did not report for 1937-38, data for 1935-36 were used. The personnel data therefore include 1,690 institutions. Usable reports on finances were received from 1,474 institutions; inserting 1935-36 data for the institutions not replying in 1937-38 results in the inclusion of data on receipts and expenditures from 1,586 institutions, and on property from 1,434.

While it is impossible to indicate exactly the significance of the omission of schools from the tables for one year which are included for another year, the following statements may help to give some indication of the types of schools failing to report.

First, of those failing to report on the personnel blank, very few were among the publicly controlled institutions or the large privately controlled universities, colleges, and professional schools. Practically all were highly specialized technical schools such as conservatories of music, theological seminaries, law schools, schools of optometry, etc., or were among the junior colleges intimately associated with public high schools; or if under private control, lately raised from the status of preparatory schools. The total enrollment of all these schools probably does not exceed 4,000 students of college grade.

The omissions from the list of institutions supplying financial data while outnumbering those failing to supply personnel data consist quite largely of these same groups of schools, namely, privately controlled technical or professional schools and junior colleges maintained by city or district school authorities. Another type of school failing to supply financial data is the college which occupies quarters jointly with a motherhouse, an orphanage, a Y. M. C. A., or some other institution of a philanthropic character. It is clear that data on the higher education unit of an organization of this sort are difficult to segregate. The difficulty is accentuated when a large amount of nonsalaried service is involved in conducting the institution's work.

Furthermore, some institutions occupy rented quarters the cost or value of which they have no way of knowing. Examples of this type are the professional schools of a proprietary character, particularly those operating in downtown office buildings in the urban centers. These schools, while they often supply excellent data on financial operations, have little or no usable data on property.

Considering all of these omissions, however, it is conservative to

estimate that if all institutions reported their financial data the national totals would not be increased by more than 5 percent.

In studying statistical tables on higher education with a view to determining trends the factor of comparability of items and of totals from one biennium to another looms large. This factor is affected by (1) the number of institutions reporting the various items at different times, (2) variations in interpretation of the items in the questionnaires, and (3) changes made by the U. S. Office of Education in the questions asked or in the manner of editing the returns received.

The first of these matters was studied carefully in connection with the *Biennial Survey of Education for 1932-34* and the conclusion was reached that even though the number of institutions reporting may vary from biennium to biennium, comparisons of totals from one biennium to another are not seriously invalidated by that fact.

Variations among institutions in their usage of items contained in the questionnaires still constitute a major source of difficulty in statistical compilations in higher education. The U. S. Office of Education goes carefully over all reports and edits them with a view to uniformity of interpretation, but in spite of progress toward uniformity it is recognized that certain differences in recording data still exist among the institutions.

Changes in phrasing the various items of a questionnaire are made from time to time in order to reflect changing educational conditions or to increase uniformity of reporting. When any such change is made, the data returned in reply to the revised questionnaire must be carefully interpreted in terms of both the old and the new phrasing if a break in the trends is to be avoided. For example, the single question formerly used relating to the number of persons receiving the Ph. D. degree on examination no longer brings in complete data on the number of persons receiving the doctorate on examination. In recent years this question has had to be reframed so as to provide for the number of persons receiving other doctorates (Ed. D., Sc. D., etc.) and the compilations must be interpreted accordingly.

Finally, although the identical item may be carried in a questionnaire for several years, a change in tabulating the replies may cause an apparent fluctuation in the final results. To illustrate, a report may be called for on the total amount of Federal money received. Clearly, the results of any compilation based on this question will depend on whether temporary allotments from emergency funds are included in the statements or not.

Number and Distribution of Institutions Reporting

Totals by States.—The total number of institutions of various types which reported personnel data is 1,690 (Table I). In 15 States the

publicly controlled college and university work (excluding teachers colleges, normal schools, and junior colleges) is concentrated in one institution. Other States maintain several publicly controlled colleges and universities. Georgia, for example, has 5; North Carolina, 5; Ohio, 8; Oklahoma, 5; South Carolina, 7; Texas, 9; and Virginia, 6. This latter group of States illustrates the effects of two tendencies: First, the building up of more than one State college in a State; and second, the more recent development of municipal colleges and universities.

Two States (California and New York) report a total of more than 100 institutions each and eight others (Illinois, Iowa, Massachusetts, Michigan, Ohio, Pennsylvania, Texas, and Wisconsin) report 60 or more each. At the other end of the scale we find the two States of Nevada and Wyoming centering all their higher education activity in one institution each.

Junior colleges are found in 45 States, the greatest concentration of them being in California (50 institutions), Texas (42), and Iowa (37). These 3 States have well over one-fourth of all the junior colleges in the country. Other States having 20 or more institutions of this type are Kansas (21) and Missouri (20).

Professional schools by States.—Many of the 1,690 institutions reporting maintain professional schools as part of their organizations. The total number of professional schools classified is 1,473, not including 138 "other" schools (table II).

Hasty generalizations should not be made from this table. The fact, for instance, that no school of architecture is listed in the District of Columbia, no school of music in Georgia, no school of library science in Indiana, no school of agriculture in Massachusetts, does not mean that these subjects are not offered in these States. It means only that there are no separately organized and administered schools of these subjects reporting to this Office. In many instances professional curricula of various types are offered in colleges of arts and sciences. These professional curricula are not included in this tabulation.

TABLE II.—Distribution of degree-granting professional schools, 1937-38

Historical Summary—1900-1938

When the trend in college enrollments is compared with that in population from 1900 to 1938, certain facts stand out in bold relief:

(1) Whereas in 1900 less than one-third of 1 percent of the total population were enrolled in college, in 1938 more than 1 percent were so enrolled.

(2) Whereas in 1900 a little more than 4 percent of the number of persons 18 to 21 years of age were enrolled in college, in 1938 nearly 14 percent of the corresponding number were so enrolled.

(3) The increase in college enrollments during the 38-year period is 468 percent, while that in total population is only 71 percent and that in population 18 to 21 years of age is only 63 percent.

(4) In 1900 there was 1 college student to every 24.9 persons 18 to 21 years of age; in 1938 the ratio was 1 to 7.2.

TABLE III.—Population and student enrollment in higher education, 1900 to 1938

Year	Population ¹		Student enrollment in higher education ²	Percent student enrollment is of—	
	Total	Ages 18 to 21		Total population	Population, ages 18 to 21
1	2	3	4	5	6
1900	75,994,575	5,930,765	237,592	0.31	4.01
1905	84,219,378	6,583,109	264,345	.31	4.02
1910	91,972,266	7,335,453	355,213	.39	4.84

¹ Total population intercensal years (1905, 1915, 1918, 1922, 1924, 1926, 1928, 1932, 1934, 1936, and 1938) estimated by Bureau of the Census; column 3 by U. S. Office of Education.

² Resident students of college grade, regular session (September to June) only, duplicates omitted.

High-school and college enrollments.—In connection with the rapid increase in college enrollments, the question is often asked whether an increasing proportion of high-school graduates is going on to college each year. In spite of the fact that the increase in enrollments in higher education since 1900 has been very marked, it has been much

less marked than the increase in high-school enrollments. The percentage of high-school graduates entering college has been decreasing since 1900.

If we compare the enrollments in all types of secondary schools, including preparatory departments in colleges, with collegiate-grade enrollments in colleges and universities, including teachers colleges and normal schools, we find the following:

In 1900 the ratio was 1 college student to each 2.9 secondary school

FIGURE 1.—Percent college enrollment is of college and total population.

students. In 1910 the ratio was 1 to 3.1; in 1920, 1 to 4.2; in 1930, 1 to 4.4; in 1934, 1 to 5.8; in 1936, 1 to 5.3, and in 1938, 1 to 4.9.

This trend is even more apparent when undergraduate enrollments in colleges and universities of a given year are compared with those in secondary schools 4 years earlier. In 1900, for example, there were 237,592 resident undergraduate students in colleges of arts and professional schools. This was 42.5 percent of the 559,003 students in secondary schools in 1896. That is, the ratio of undergraduate college enrollment to secondary enrollment 4 years earlier was 1 to 2.4. In 1910 this ratio was 1 to 2.4; in 1920 it was 1 to 3; and in 1930 it was 1 to 4. In 1932 it was 1 to 4.2, in 1934 and 1936 it was 1 to 5, and in 1938 it was 1 to 4.8.

Rise of the junior college.—One of the most interesting developments in the field of higher education in recent years has been the growth

of the junior college. Statistics on this type of school have been collected by this Office since 1918 only, but this period represents the era of their greatest growth.

During this 20-year period junior colleges have increased rapidly both in numbers and in enrollment. In 1937-38 the numbers enrolled in junior colleges equalled 17.6 percent of all undergraduate enrollments in arts and sciences, including arts and science divisions in teacher-training institutions. The corresponding percentage for 1917-18 was only 1.9.

The publicly controlled junior colleges in 1938 enrolled on the average 393 students each, while the average enrollment of the privately controlled junior colleges was 162. In 1917-18 the average enrollment for each type of junior college was 98.

TABLE IV.—Number of junior colleges and their enrollment, 1917-18 to 1937-38

Year	All schools reporting		Publicly controlled		Privately controlled

1937-38.....	453	121,510	209	82,041	244	39,469

Other trends.—For other trends reference is made to table 1, page 43, which gives a historical summary of certain items of general interest for institutions of higher education from 1899-1900 to 1937-38. It is in three parts, part 1 summarizing all institutions from 1929-30 to the present, part 2 giving certain details on universities, colleges, and professional schools from 1899-1900 on, and part 3 presenting data on teacher-training institutions.

Faculty, Students, and Degrees, 1937-38

Faculty.—The 1,690 institutions in the country required the equivalent of more than 123,000 full-time staff members, including administrative officers, teachers, extension and research workers, and other professional employees, but not including clerical or custodial help. This represents a noteworthy increase over the 1935-36 report, both in number of institutions reporting and in number of persons employed (table 2, p. 46).

Resident instruction as distinguished from extension instruction and research claimed the services of 80,596 men and 29,696 women, or 110,292 persons in all. These figures are not reduced to a full-time basis (table 7, p. 72).

These included 46,641 employed in publicly controlled institutions and 63,651 in institutions under private (including church) control. Of the total number reported, 102,895 were in work of collegiate grade; 5,966 were reported as critic teachers; and 3,734 were teaching secondary school students. The figures reveal that 2,303 teachers were counted twice in these groups—collegiate, critic, and secondary teachers—thus showing that they divided their time among the three types of teaching.

The total numbers of teachers conducting resident classes of college grade increased from 76,080 in 1927-28 to 102,895 in 1937-38. This is an increase of 11.1 percent.

TABLE V.—*Resident instructional staff (collegiate, professional, and graduate, not including critic teachers) 1927-28 to 1937-38*

Year	Number	Increase over previous biennial report	
		Number	Percent
1	2	3	4
1927-28	76,080	5,406	7.6
1929-30	82,366	6,306	8.3
1931-32	88,172	5,786	7.0
1933-34	86,914	-1,258	-1.4
1935-36	92,580	5,666	6.5
1937-38	102,895	10,315	11.1

1 Decrease.

The numbers of staff members engaged in services other than regular resident teaching increased from 1935-36 to 1937-38. The percentages of increase are as follows: Correspondence work, 9.8; extension class instruction, 11.6; agriculture and home economics extension, 15; county home and club agencies, 0.1; agricultural experiment station staff, 8.9; other research workers, 75.6. Summer sessions in 1937 required the services of 34,145 teachers. This is 17.5 percent more than the 29,055 so employed in the 1935 session.

TABLE VI.—*Staff engaged in special work of various sorts, 1935-36 and 1937-38*

Type of work	1935-36	1937-38	Percent of increase
1	2	3	4
Summer session, 1935 and 1937	29,055	34,145	17.5
Correspondence work	3,388	3,719	9.8
Extension class instruction	6,015	6,713	11.6
Agricultural and home economics extension	2,186	2,490	15.0
County, home, and club agents	5,816	5,836	.1
Agricultural experiment station staff	3,689	3,943	8.9
Other research workers	1,376	2,361	75.6

The ratio of men to women in teaching staffs varies greatly according to the type of institution. While the number of women staff members is a little less than one-third the number of men in publicly controlled colleges and universities, and a little more than one-third of the number of men in the privately controlled colleges and universities, women far outnumber men in the staffs of teachers colleges and normal schools, and somewhat outnumber men in all the nondegree-granting institutions taken as a group.

TABLE VII.—Percentage analysis of staff by type of school, control, and sex, 1937-38

Item	All institutions report- ing			Universities, colleges, and professional schools			Teachers colleges and normal schools		
	Pub- lic	Pri- vate	All	Pub- lic	Pri- vate	All	Pub- lic	Pri- vate	All

Women	23.7	28.2	51.9	18.6	30.2	48.8	51.9	17.5	69.4
Total.....	52.4	47.6	100.0	48.4	51.6	100.0	74.6	25.4	100.0
Total number of staff mem- bers.....	10,750			9,100			1,650		

The question is frequently asked whether the ratio of men to women staff members has changed greatly in recent decades. By reference to a comparable table for 1890 it is found that the women constituted 20.9 percent of the staffs of all colleges and universities taken as a group (excluding teachers colleges and normal schools). For 1938, the comparable figure is 25.9 percent. This gain in the percentage of women college teachers may well be placed side by side with the fact that women are gaining on men in the number of graduate degrees earned. (See table 1.) While the number of graduate degrees granted to men increased 8.5 fold from 1900 to 1938, the number granted to women increased 24.2 fold, or nearly three times as fast.

Students, total enrollments.—The 1,690 institutions carried in this

compilation enrolled a total of more than 1,350,000 resident students above secondary grade during the regular session (September-June) 1937-38, and more than 425,000 for the summer session of 1937. The total enrollment in the regular session has increased 433,443, or 47.2 percent, in the past 12 years, although the increase has not been continuous or regular.

TABLE VIII.—*Resident college enrollments in all institutions of higher education, summer session excluded, 1925-26 to 1937-38*

Year	Enrollment	Increase over previous report	
		Number	Percent
1	2	3	4
1925-26	917,462	91,399	11.5
1927-28	1,053,955	136,493	14.9
1929-30	1,100,737	46,782	4.4
1931-32	1,154,117	53,380	4.9
1933-34	1,055,360	1-98,757	1-8.6
1935-36	1,208,227	152,867	14.5
1937-38	1,350,905	142,678	11.8
12-year increase		433,443	47.2

1 Decrease.

Percentage of men and women students.—The ratio between men and women students in all institutions of higher education taken together is approximately 3 to 2. Considering the fact that women were admitted to institutions of higher education such a short time ago this ratio is quite remarkable.

The slowly increasing percent of men students is also worthy of note. In 1931-32, 57.8 percent of all students in higher education were men. In 1933-34 the corresponding percentage was 58.3. In 1935-36 it was 58.3 and in 1937-38 it was 59.5. This same tendency is observable in the teachers college and normal school group, where the percent of men has risen from 33.2 in 1931-32 and 1933-34 to 35.4 in 1935-36 and 35.5 in 1937-38.

Public and private institutions compared.—When this study is carried further, certain facts stand out prominently.

First, in the regular session (September to June) the increasing tendency of students to attend publicly controlled institutions is quite apparent. In 1937-38, just 51 percent of all students in higher education were in institutions under the control of a State or local governmental unit. This is a slight increase over 1935-36, when the percentage was 50.8. In 1933-34 it went over 50 for the first time, reaching 50.2. In 1931-32 it was 48.

This tendency is especially marked in the junior colleges, where 67.5 percent of the enrollment is in publicly controlled institutions. Nevertheless, this group has exhibited a slight downward trend since

1933-34, when 71.2 percent of all junior college students were in publicly controlled institutions.

Total number of students.....	19,725			10,774			8,951		

In the teachers colleges and normal schools 94.5 percent of all enrollments are in publicly controlled schools, where this percentage has been above 96 within the last few years. The more rapid increase in enrollments of the publicly controlled institutions of higher education is also noticeable in the degree-granting university, college, and professional school group, although as yet (1937-38) not quite half of the enrollments are in the publicly controlled group. The percentages from 1931-32 on are: 1931-32, 4.05; 1933-34, 43.6; 1935-36, 44.8; 1937-38, 49.

Second, in the summer session of 1937 the tendency toward publicly controlled institutions was very pronounced. In all the schools reporting for that session, 61 percent of the enrollments were in institutions under public control. (Data are not at hand to permit comparisons with previous summer sessions.)

Another feature is the numerical relation between summer school enrollment and that in the regular session. Among the teacher-training institutions, summer session enrollments ran more than three-fourths as large as those of the regular session. They were only about one-fourth as large in the degree-granting university, college, and professional school group and were a minor factor in the junior colleges.

Certain other facts concerning enrollments should be mentioned. First, the enrollments in professional schools are approaching the numbers enrolled in arts and sciences. Comparisons based on the 1937-38 enrollments may be seen at a glance in the following tabulation:

Students	Enrolled in—	
	Colleges of arts and sciences	Professional schools
	1	2
Undergraduate:		
Men.....	374, 147	381, 203
Women.....	315, 143	190, 981
Total.....	689, 290	581, 184
Graduate:		
Men.....	29, 065	26, 789
Women.....	19, 852	15, 005
Total.....	48, 917	41, 884

Considering men students only, it will be noted that the enrollments in professional schools exceed the enrollments in arts and sciences. The majority of women, however, are attending arts and sciences.

It should be borne in mind when interpreting these figures, that all undergraduate enrollments in colleges of arts and sciences are counted as arts and science students in the tabulations even though some of

them may be pursuing a professional curriculum, such as commerce and business offered by the liberal arts colleges. If such students were added to those enrolled in professional schools, the differential in favor of professional enrollments would be greater than is here shown.

Second, between 1936 and 1938 the increase in graduate enrollments in arts and sciences was 7,569, while that in graduate enrollments in professional schools was 3,661. This is a reversal of the trend from 1934 to 1936, when the increase in arts and sciences was 2,652 and that in professional schools was 6,117. For the 4-year period, 1934-38, the increase in arts and sciences graduate enrollments was 10,221; in professional schools the corresponding increase was 9,778. In other words, although graduate enrollments in professional schools are still below those in arts and sciences, they are increasing at a faster rate. This is especially significant when it is recalled that in many universities the doctorate is administered by the graduate school, regardless of whether the degree is general or professional in character.

Third, it may be surprising to note that graduate enrollments in professional schools exceed graduate enrollments in arts and sciences in the privately controlled institutions, but fall notably below them in institutions under public control. That is, in publicly controlled institutions graduate work in arts and sciences predominates over graduate work in professional curricula. This is true in spite of the fact that the ratio of graduate men students to graduate women students is markedly higher in the publicly controlled institutions than in the privately controlled ones.

Number of freshmen.—Estimates of the total numbers of freshmen in institutions of higher education are: 1933-34, 307,690; 1935-36, 366,734; and 1937-38, 367,983. These numerical estimates are based on reports from institutions having well over 90 percent of the total undergraduate enrollment for each year, and the percentages used in the table are calculated on this basis so as to approximate the actual total freshman students divided by the total enrollment (undergraduate and graduate). By "freshman" is meant a student pursuing his first year above a 4-year high-school course.

It is evident that the percent of the total student body enrolled in the freshman class remained fairly stationary throughout the period, but detailed analysis of the figures shows that it fluctuated somewhat in certain types of institutions.

A decrease in number of freshmen from 1933-34 to 1937-38 is shown in each of the teachers college and normal school groups. A decrease in percent of freshmen is shown for every type of school except the publicly controlled junior college. In this group the 59.03 percent reported for 1933-34 gives place to 63.77 percent for 1937-38.

Closely related to this fact is the large number of freshmen in junior

colleges and normal schools. Of all freshmen entering college in 1937-38, 21.4 percent entered junior colleges or normal schools. In 1935-36 the corresponding percentage was 18.3; in 1933-34 it was 17.2.

TABLE X.—*Estimated number of freshmen in institutions of higher education, by types of institutions, 1933-34, 1935-36, and 1937-38*

Type of institution ^a	1933-34 ¹		1935-36 ²		1937-38 ³

Total	307,690	29.15	366,734	30.35	367,983	27.24

¹ Based on 91.70 percent of undergraduate enrollment reported.

² Based on 93.67 percent of undergraduate enrollment reported.

³ Based on 96.18 percent of undergraduate enrollment reported.

Data at hand do not offer an explanation of the fact that from 1933-34 to 1937-38 enrollments of freshmen increased only 19.6 percent, whereas enrollments of all resident undergraduate students increased 28.1 percent; those of graduate students, 26.9 percent; and all resident college enrollments 28 percent. Increasing interest in the more advanced college and graduate courses, improving financial conditions and the relatively large freshmen enrollment in 1933-34 following the low year of 1932-33 are three possible explanations.

Students in other types of courses.—The enrollment figures so far discussed do not include the following: 71,946 collegiate and 15,458 noncollegiate students in correspondence work; 223,405 collegiate and 60,364 noncollegiate students in extension work; 80,542 persons taking short courses, usually of not more than a week in length; 32,874 secondary pupils in collegiate institutions (not in training schools); 30,960 persons enrolled for individual lessons in music, art, etc.; and 30,298 secondary and 50,683 elementary pupils in training schools attached to institutions which train teachers. Further details of these enrollments will be found in table 9, page 80.

Earned degrees.—Almost 165,000 persons received the baccalaureate or the first professional degree in 1937-38; more than 21,000 the master's degree or a comparable advanced degree; and the doctorate was conferred on 2,932 persons. Percents of increase from 1935-36 are: Baccalaureate and first professional, 15.2 percent; master's, 18.2; and doctor's, 5.8 percent (tables 1 and 2, pp. 43 and 46).

When degrees in professional schools in 1937-38 are compared with those granted in 1935-36, some rather striking changes are noticeable. When professional school enrollments for the 2 years are brought into comparison, these changes appear all the more striking. Of the 11 professions traditionally listed by this Office (table 6, p. 70), five show a greater percent of increase in students than in degrees, one (medicine) showing an increase of 3 percent in students, but a decrease of 1 percent in degrees. Six professions show a greater percent of increase in degrees than in students, the most striking being agriculture, where an increase of 47 percent in students is more than matched by one of 65 percent in degrees granted; and education, where the number of students increased 0.01 of 1 percent, but 15 percent more persons took degrees in 1938 than in 1936.

Honorary degrees.—The total number of honorary degrees reported in 1937-38 was 1,500. This is 11.4 percent more than in 1935-36, when 1,347 were reported.

The doctorate was as usual the most popular honorary degree, 1,397, or 93.1 percent, being of this designation. Thirty-three different types of doctorate were conferred, the four most frequent being the LL. D., the D. D., the Litt. D., and the Sc. D. These four degrees have been the most frequent for each biennium since 1918, although the order of frequency has varied somewhat. From 1917-18 to 1925-26 the D. D. was given most frequently; from 1927-28 to the present the LL. D. has led. Up to 1935-36 the Sc. D. was third, but in 1937-38 the Litt. D. was awarded to a few more persons. One honorary Ph. D. was conferred in 1937-38.

Thirteen types of honorary master's degrees were conferred on 91 persons, the M. A. and M. S. being the most common. Four types of honorary baccalaureate were conferred on 11 persons.

TABLE XI.—*Honorary degrees conferred by institutions of higher education, 1927-28 to 1937-38*

Finances, General Summary

In 1937-38 the total income of 1,586 institutions of higher education, available for general purposes, amounted to well over half a billion dollars. (Table 3, page 50.) If we add to it the amount usable only for increase of physical plant, the total comes to just over \$580,000,000. This represents an increase of 18.2 percent over the amount reported by 1,541 institutions in 1936. The increase in institutions is 2.9 percent.

Income

From student fees.—Income from student fees (for matriculation, tuition, laboratory and library fees, and other educational purposes) amounted in all institutions reporting to \$178,996,228. This represents an increase of 13.2 percent over the 1935-36 total of \$158,134,025. In 1933-34 the corresponding figure was \$138,257,350.

Student fees in 1937-38 constituted 17.8 percent of the total receipts of publicly controlled institutions; they amounted to 50.7 percent of the total receipts of privately controlled institutions.

From endowments.—Earnings of endowment funds came to a total of \$70,654,211 for all institutions reporting in 1937-38. This amount was 17.6 percent more than the \$60,090,075 reported in 1935-36. It constituted 2.6 percent of the total general income of publicly controlled institutions, but amounted to 25.1 percent of the total in institutions under private control.

From public funds.—Income from public sources totaled \$192,394,548, or 36.8 percent of the total. Of this amount \$29,344,723, or 5.6 percent, was from Federal funds; \$140,959,123, or 27 percent, came from State governments; and \$22,090,702, or 4.2 percent, was provided by cities, counties, school districts, and other local subdivisions of the various States. These figures do not include appropriations specially designated for building purposes and therefore should not be compared with the figures given in 1935-36, which do include such appropriations.

From gifts and grants.—Private gifts for current or undesignated purposes amounted to \$36,908,257, or 7.1 percent of the total. In addition, \$20,665,165 was received for increasing the physical plant, making a total of \$57,573,422 for current and capital purposes. This represents an increase of \$20,458,182, or 55.1 percent, over the \$37,115,240 reported for these purposes in 1935-36.

Gifts for increase of permanent funds totaled \$39,800,025, which is \$7,238,523, or 15.4 percent, less than the \$47,038,548 reported in 1935-36.

The total of private gifts and grants for all purposes in 1937-38 was \$97,373,447. This is greater by \$13,219,659, or 15.7 percent, than the \$84,153,788 reported in 1935-36.

As might be expected, the bulk of private gifts to higher education went to institutions under private control, more than \$85,000,000 going to these institutions. Of special interest is the shift in the share going to publicly controlled institutions. In 1929-30, these schools received 6.3 percent of the total of all private gifts and grants reported; in 1931-32 their share was 7.1 percent; in 1933-34 it rose to 9.8 percent; and in 1935-36 it came to 16.9 percent. In 1937-38, however, it dropped to 12.2 percent.

Nonsalaried service.—Included among the nearly 37 million dollars of private gifts and grants for current expenses is nonsalaried service valued by the 198 institutions receiving it at a total of \$7,176,944. This is 8.3 percent more than in 1935-36, when \$6,626,715 was reported by 170 institutions.

Details of the contributions of this type in 1937-38 and earlier years are found in table XII.

TABLE XII.—*Estimated value of nonsalaried personal service rendered, 1937-38 and earlier years*

Years	All institutions reporting		Publicly controlled institutions		Privately controlled institutions	
	Number	Amount	Number	Amount	Number	Amount
1	2	3	4	5	6	7
1937-38						
Degree-granting	152	\$6,461,742	5	\$60,143	147	\$6,401,599
Non-degree-granting	46	715,202	3	1,620	43	713,362
Total	198	7,176,944	8	61,763	190	7,114,961
1935-36	170	6,626,715	3	64,574	167	6,562,141
1933-34	160	6,077,877	6	82,800	154	5,995,077
1931-32	141	5,102,905	7	243,350	134	4,859,555

Auxiliary enterprises and activities.—Receipts from all auxiliary enterprises and activities totaled \$130,523,094. These included athletics, boarding and rooming houses operated by the institutions, student unions, student infirmaries, and similar extracurricular activities.

Comparisons of Amounts of General Income From the Several Sources

The growing tendency of universities and colleges to assess educational costs against students is still apparent (table XIII). Whereas in 1927-28 institutions under public control derived 14 percent of their general income from student fees, in 1937-38 the portion thus derived was 17.8 percent. In like manner privately controlled institutions pushed their collections from students from 47 percent of the total in 1927-28 to 50.8 percent of it in 1937-38. The percent for all institutions rose from 31 to 34.3.

During this same 10-year period, endowment earnings dropped for publicly controlled institutions, but increased slightly for those under private control. For the entire field of higher education, the trend is downward.

Contributions from the United States Government shot up and those from State and local governments (for current purposes only) went up slightly in the entire field of higher education. They dropped a fraction of 1 percent, however, in the publicly controlled group.

Private gifts and grants increased in importance in all types of schools.

Receipts from other (miscellaneous) sources dropped sharply. Whether this drop is due to an actual drying up of institutional earnings, rents of college properties, and other sources not easily classifiable, or whether it is due to excluding bond sales and borrowings from the report in 1937-38 cannot be determined from the data at hand (table XIII, fig. 2).

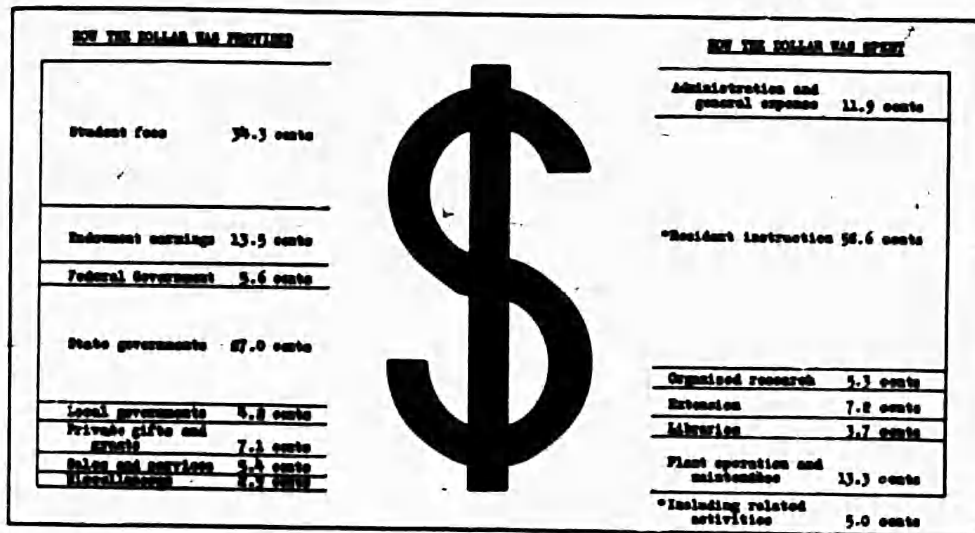

FIGURE 2.—Higher education's current operating dollar, 1937-38.

TABLE XIII.—Percentage analysis, receipts for current purposes,¹ institutions of higher education, 1927-28 and 1937-38

Item	Publicly controlled institutions		Privately controlled institutions		All institutions reporting

¹ Including educational and general, noneducational, and other nonrevolving funds.
² Includes bond sales and borrowings in 1927-28, but excludes these items in 1937-38.

Expenditures

Educational and general.—Educational and general expenditures, as reported by 1,586 institutions, totaled \$475,191,638 in 1937-38. This is \$55,308,805, or 13.2 percent, more than the amount reported in 1935-36 by 1,540 institutions. Increases are reported in all of the items as follows: Administration and general control, 17.3 percent; resident instruction: Colleges, schools, and departments, 12.4 percent; related activities, 18.7 percent; organized research, 14.1 percent; extension, 16.2 percent; libraries, 13.2 percent; operation and maintenance of the physical plant, 10.5 percent.

These percentages of increases from 1936 to 1938 are much more uniform than those shown from 1934 to 1936. When it is recalled that the increase in student enrollment for the biennium was 11.8 percent, it will be seen that these increases in expenditures are only a little more than would be expected to care for the increased load of instruction.

Percentage analyses of the educational and general expenditures in degree-granting universities, colleges, and professional schools are given in table XIV. Analyses of these same expenditures, excepting extension, are presented in table 4.

TABLE XIV.—Percentage analysis, all itemized educational and general expenditures, degree-granting universities, colleges, and professional schools (excepting teachers colleges), 1935-36 and 1937-38

Total.....	100.0	100.0	100.0	100.0	100.0	100.0

Capital outlay.—Expenditures under this heading were in 1937-38: For buildings and grounds, \$58,523,210; for equipment, \$11,942,452; total, \$70,465,662. This represents an increase of 48.8 percent over the 1935-36 total of \$47,369,407, which may be compared with the 60.6 percent increase for the period 1934-36. The proportion of total capital outlays spent at publicly controlled institutions fluctuated

from 38.8 percent in 1933-34 to 71.3 percent in 1935-36 and to 58.1 percent in 1937-38.

Property

Buildings, grounds, and equipment.—The buildings, grounds, and equipment used primarily for educational purposes were valued at a total of \$2,556,074,571 in 1938. Of this amount, 42.9 percent was

FIGURE 3.—Value of property, 1,434 institutions of higher education, 1938

held by publicly controlled institutions and 57.1 percent by institutions under private control. The total represents an increase of 8.3 percent over that reported in 1936.

Reports on property were received from 1,434 institutions. This is an increase of 72, or 5.3 percent, over the number of schools reporting these items for 1935-36.

Endowment, annuity funds, loan funds, and other permanent funds.—In 1938 the amount of these funds totaled \$1,721,841,136, which represents an increase of 6.1 percent over the \$1,623,105,000 reported in 1936. As might be expected, by far the greater portion of these funds is held by private institutions, \$1,507,461,732, or 87.5 percent, being held by schools of this type.

Socioeconomic Factors

Up to this point the discussion has served to focus attention on the extent of higher education as an American institution. The

number of schools and colleges, the thousands of teachers and students, the large-scale financial operations and great investments in plant and in income-producing properties, these have all received attention.

No less vital to an understanding of the system is a study of its background of social and economic conditions. Probably the two most obvious factors in this background are those of population and per capita income, as it is clear that the number and size of colleges in an area is very closely related to the number of people in that area and the amount of money each of them is able to spend. The next few paragraphs will therefore explore some of these related matters.

Population Changes

Estimates of population prepared by the United States Bureau of the Census show a remarkably regular increase for the period 1929-37 (table XV). This regularity is especially noticeable from 1931 on, although it is not apparent in all sections of the country. The North Atlantic States show the greatest stability of population; the North Central group appear to have grown the most slowly and the South Atlantic group the most rapidly; the other sections (South Central and Western) have kept fairly close pace and in 1937 stood at 8.2 percent above the 1929 figure.

TABLE XV.—Population trends and analyses,¹ 1929-1937, by divisions

Income per Capita.

When data on population in the several States and grand divisions are set alongside estimates of personal income, as prepared by the National Industrial Conference Board² for the calendar years shown, the great differences in per capita income among the various sections of the country become apparent. In 1929, for example, the income per capita ranged from \$263.98 in the poorest State to \$1,084.34 in the wealthiest (the District of Columbia omitted). (Table XVI.) The ratio is thus seen to be 1 to 4.11. In 1931 this ratio, similarly calculated, was 1 to 5.68, in 1933 it was 1 to 4.69, in 1935 it was 1 to 4.11 again, and in 1937 it was 1 to 3.93.

When States are grouped in grand divisions the more extreme of these variations disappear, but it is noteworthy that in each of the years the per capita income in the wealthiest division (North Atlantic) is more than twice that in the poorest division (South Central).

² Income estimates made by the United States Department of Commerce were published just after the preparation of this bulletin. While they carry different totals by States, their general trend is similar to that shown by the figures here used.

TABLE XVI.—Income per capita in the United States, 1929, 1931, 1933, 1935, and 1937

Division and State	Personal Income (in millions of dollars)					Population, July 1 (in thous. inda)					Income per capita

 2 Source: United States Bureau of the Census.

The national and regional trends of per capita income over the 8-year period are no less significant to higher education.

In 1929 this figure was \$655.26 for the Nation. In 1931 it dropped to less than three-fourths this figure, with certain sections of the country going even lower. In 1933 it went to approximately half the 1929 figure, going to just under half in one section. In 1935 and 1937 it rose, but in the latter year it was still less than five-sixths the 1929 figure, although in one section it was over nine-tenths the earlier figure for that section (table XVII).

The per capita income of the North Atlantic States has consistently run from 27 to 44 percent higher than that of the Nation as a whole. That of the Western States comes next, ranging from 17 to 22 percent above the national average. In the North Central States it hovers close to the national average and in the South it is consistently below it. In the South Central group it is lowest, ranging from 53 to 59 percent of the national average.

TABLE XVII.—Changes in per capita income, United States, 1929-37, by divisions

Division	1929	1931	1933	1935	1937

Student Enrollments

Data on resident college enrollments in the various States and larger divisions of the United States from 1929-30 to 1937-38 show that student enrollments have fluctuated sharply and unevenly (table XVIII). In 1931-32, for example, Idaho colleges had 47.4 percent more students than they had in 1929-30, whereas Mississippi had 12.3 percent fewer. In 1933-34, Utah had 127.9 percent of its 1929-30 enrollments, and Mississippi had 76.1 percent. In 1935-36 Louisiana had 161.8 percent of its 1929-30 enrollments, and Pennsyl-

vania had 91.1 percent. In 1937-38 Louisiana again led the Nation with 195.1 percent of its 1929-30 enrollments and South Dakota had dropped to 90.5 percent.

Figure 4 shows the percent the 1937-38 resident college enrollment was of the 1929-30 enrollment in the individual States.

¹ Not including United States military and naval service schools.

FIGURE 4.--Percent 1929-30 student enrollment in higher education was of 1929-30 enrollment, by State.

When the various States are combined in major divisions of the Nation and when these divisions are considered in relation to the national total, certain shifts in college enrollments from one section to another become apparent. The North Atlantic and North Central divisions show a net decrease of 1.9 each in percentage of the total enrollment of the Nation. The South Atlantic division shows an increase of 0.8 of 1 percent, the South Central division an increase of 1.2 percent, and the Western division an increase of 1.8 percent.

Total.....	100.0	100.0	100.0	100.0	100.0

¹ U. S. Service schools omitted.

When enrollment is compared with the total population certain facts stand out. For the United States as a whole the number per 10,000 of the total population enrolled in college increased from 94 in 1935-36 to 104 in 1937-38.

One State showed the same proportion of students to total population; two showed decreases; and the others showed increases of varying magnitude. For both years the largest proportion of college and university students to total population were found in the District of Columbia and the State of Utah.

Graduates

An analysis of degrees granted men and women in the various sections of the United States from 1931-32 to 1937-38 shows some rather interesting facts:

(1) No area shows a net decline in number of bachelor's degrees conferred during the period, but the increases in the South Atlantic, South Central, and Western divisions were such that they granted a total of 39.7 percent of all baccalaureates in 1937-38, as contrasted with only 34.9 percent in 1931-32.

(2) In the South Atlantic States there was a net decrease of 1 in the number of master's degrees conferred on men, but an increase of 113 in the number conferred on women. There was thus a net increase of 112 master's degrees conferred in this area. At the same time, the number of master's degrees conferred over the country increased by 2,259, so that the percent conferred in this area dropped from 6.9 to 6.7.

(3) Similar observations could be made of the doctorate, where the North Central States showed an increase in men receiving the degree, but a slight decrease in women; and where the Western States showed just the opposite tendency.

(4) The North Atlantic States granted a smaller share of the baccalaureate degrees but a larger share of the doctorates in 1937-38

than in 1931-32. The shift was the other way in the West, where an increasing proportion of baccalaureates was accompanied by a decreasing proportion of doctorates.

Income of Higher Education

A similar study of the income of institutions of higher education brings out some significant facts (table XXII):

(1) From 1929-30 to 1933-34 the income of higher education dropped, rather slowly the first biennium, but quite sharply from 1931-32 to 1933-34. Since 1933-34 there have been increases to more than the amount reported for 1929-30.

(2) This decline and subsequent recovery were by no means regular, nor were they uniform the country over. In the North Atlantic States only was the net deviation less than 25 percent from the low year to the high year. In the North Central group the 1937-38 income was still slightly below that for 1929-30. The deepest cut (27.2 percent) was in the North Central States. The greatest net improvement over 1929-30 (18.2 percent) has occurred in the Western States.

These fluctuations in income are particularly interesting when the major sources of income are studied. In a circular ³ recently issued by this Office this was done for a group of 269 institutions of higher education. Here it was found that the index number of student fees rose from 100 in 1929-30, to 103.7 in 1931-32, then dropped to 94.5

³ Badger, Henry G., and Kelly, Frederick J. College income and expenditures, 1933-39 (Preliminary Sampling Report), Federal Security Agency, U. S. Office of Education, Circular No. 182. Mimeoog.

in 1933-34, and rose again to 106.9 in 1935-36 and 122.9 in 1937-38. The index number for earnings of endowment funds dropped from 100 in 1929-30 to 95.9 in 1931-32 and 81.3 in 1933-34, then rose to 90.3 in 1935-36 and 95.7 in 1937-38. Similar index numbers for income from public sources are: 100; 99.4; 75.5; 101.1; and 109.7. For private gifts and grants they run 100; 129.3; 124; 168.1; and 158.6.

It is clear that certain of the items of income just referred to are more or less impersonal in character and give little or no indication of the effort of the present gainfully employed population to support higher education. Other sources are more direct and more representative of educational effort.

Higher Education Income per Capita

One of these direct measures is that of receipts from the State in relation to total population. When these factors are combined, the range of State appropriations per capita is from 43 cents in one State to \$3.37 in another. It is also noteworthy that, with the single exception of Wisconsin, all the States which appropriated more than \$2 per capita lie in whole or in part west of the Mississippi River. It should be mentioned, however, that many of the States whose per capita appropriations are small maintain excellent private institutions (table XXIII).

When data on private gifts and grants to universities, colleges, and professional schools are analyzed in the same manner as those on receipts from the State, the range is far greater. It runs from 1 cent to \$2.74.

The annual income per capita from these two items totals \$1.93 for the Nation at large. It is to be noted that frequently a State will run low in income from one of these sources, but high enough in the other to place the State near the average for the two together.

(1) Less than 1 cent

Expenditures

Cognate to a study of income of higher education and perhaps affording even a better measure of its activity is a study of expenditures incurred for it. This may be taken up in the same double fashion as that of income: (1) a historico-geographical trend analysis, and (2) a per capita study for 1935-36 and 1937-38.

The total educational and general expenditures of institutions of higher education in 1929-30 came to \$377,903,377. In 1931-32 it was \$418,623,399, or 110.8 percent of the 1929-30 total. Corresponding figures for later years are: 1933-34, \$366,896,078, or 97.1 percent of 1929-30; 1935-36, \$416,849,067, or 110.3 percent; and 1937-38, \$475,191,638, or 125.7 percent. These percents may be compared with those contained in the circular of this Office previously referred to,⁴ where the percents were: 1929-30, 100; 1931-32, 106.1; 1933-34, 95.7; 1935-36, 105.6; and 1937-38, 121.6.

When the national totals of expenditures are broken down by geographic divisions, significant differences appear (table XXV). The

⁴ See footnote on page 34.

North Atlantic States, for example, spent 31.3 percent of the national total in 1929-30, rose to 35.4 percent of that for 1933-34, and dropped back to 32.5 percent of it in 1937-38. The Western States, on the other hand, ranged only 0.4 of 1 percent: from 11.9 percent of the national totals in 1929-30 and 1933-34 to 12.3 percent in 1935-36.

Again, educational and general expenditures for education may be considered in relation to personal income. In 1929-30 the Nation as a whole spent just one-half of 1 percent of its income on higher education (current expenditures only, capital outlay omitted). The North Atlantic States spent only two-fifths of 1 percent, but other sections spent more, the South Atlantic States reaching 0.62 of 1 percent.

In 1931-32 these percentages ran much higher, the national average being 0.78 of 1 percent and the North Central States going to 0.89 of 1 percent.

In like manner the national averages for 1933-34 and 1935-36 were, respectively, 0.77 and 0.70 of 1 percent and that for 1937-38 was 0.72 of 1 percent, with the South Central group standing at 0.83 of 1 percent.

TABLE XXV.—*Educational and general expenditures, institutions of higher education, 1929-30 to 1937-38*

Total.....	.50	.78	.77	.70	.72

When the total educational and general expenditures of the Nation are divided by the total population, another measure of educational effort results. Thus, it appears that for every person in the United States on July 1, 1935, an average of \$3.29 was spent by colleges in 1935-36. Two years later this average had risen to \$3.68, an increase of 11.9 percent. Increases are shown everywhere except the District of Columbia, Maryland, and Nevada, where decreases appear. The range is great for each of the 2 years: in 1935-36 it was from \$1.14 to \$7.83 and in 1937-38 from \$1.54 to \$6.73.

TABLE XXVI.—*Educational and general expenditures for both publicly and privately controlled institutions of higher education per capita of total population, 1935-36 and 1937-38*

State	1935-36	1937-38	State	1935-36	1937-38

Mississippi	1.75	1.91	Wisconsin	3.66	4.42
Missouri	2.70	2.16	Wyoming	3.36	3.85
Montana	3.02	3.68			
			Continental United States	3.29	3.68

As has already been pointed out, certain of the States have few or no higher educational institutions under private control. Accordingly, it is advisable to consider effort in terms of expenditures of publicly controlled institutions alone. When this is done, the average for the Nation increases from \$1.63 in 1935-36 to \$1.85 in 1937-38, an increase of 13.5 percent. Increases are reported in all States except the District of Columbia, Maryland, Nevada, and West Virginia. In this last-named State the decrease is just 1 cent per capita (table XXVII).

The range is again great, from \$0.34 to \$5.17 in 1935-36 and from \$0.38 to \$4.99 in 1937-38. Nevada stands at the head of the list each year.

TABLE XXVII.—*Educational and general expenditures of publicly controlled institutions of higher education per capita of total population, 1935-36 and 1937-38*

State	1935-36	1937-38	State	1935-36	1937-38

			Continental United States.....	1.63	1.84

These tables can do no more than suggest further study of the situation in higher education as it has existed during the period under review. They are of greatest value when considered in relation to each other, rather than as individual tables. For example, trends in spending for institutions for higher education should be considered in relation to trends in student enrollment, in total population, in personal income, etc.

¹ D. H. D.

² Doctor of both (canon and civil) laws, 1; doctor of pharmacy, 1; master of foreign service, 1; bachelor of education, 5.

³ Master of letters.

⁴ Doctor of pharmacy.

⁵ Master of pedagogy.

⁶ Doctor of philanthropy.

⁷ Doctor of commercial science, 1; doctor of public service, 1.

⁸ Master of forest administration.

⁹ Master of physical education.

¹⁰ Master of nursing, 1; doctor of business administration, 1.

¹¹ Doctor of social science, 1; bachelor of music, 1.

¹² Doctor of commercial science, 2; doctor of pharmacy, 1; doctor of art, 2; master of physical education, 1.

¹³ Doctor of arts in business administration, 1; juris doctor, 2; master of education, 7; master of science in home economics, 1; bachelor of science in nursing, 4.

¹⁴ Doctor of philosophy, 1; doctor of science in osteopathy, 1.

¹⁵ Doctor of science in business administration, 1; mechanical engineer, 1; master of fine arts, 1.

¹⁶ Bachelor of science.

¹⁷ Doctor of public health.

¹⁸ Doctor of Hebrew law, 1; doctor of religious education, 1; master of music, 2.

¹⁹ Doctor of commercial science.

²⁰ Doctor of child pedagogy, 1; doctor of naval science, 1; doctor of aeronautical science, 1; doctor of pharmacy, 2; master of pharmacy, 3.

In addition to the textual interpretation and the National and State summaries in the previous pages (Parts I, II, and III) which have been published separately as the abridged edition of this chapter, detailed data for each college are given in tables 18 to 22 in Part IV and for each land-grant college for the school years 1936-37 and 1937-38 in tables 23 to 46 in Part V. These two parts follow immediately, beginning on page 132 in the complete edition of the chapter Statistics of Higher Education, 1937-38.

Part IV.—Detail by Institutions

PART V. LAND-GRAFT COLLEGES AND UNIVERSITIES,
1936-37 AND 1937-38

By John H. McNeely ^{1/}
Senior Specialist in Higher Education

The 69 land-graft colleges and universities constitute the group of higher educational institutions receiving support from Federal land-grant funds and annual Federal appropriations. Among the group are 21 separate State agricultural and mechanic arts colleges ^{2/}, 29 State and Territorial universities ^{3/}, 2 privately controlled universities ^{4/}, and 17 State Negro colleges.

In this part are summarized biennial and other significant statistical data concerning these institutions. The summaries comprise tabulations showing: (1) Comparative figures for 1936-37 and 1937-38 on staff, students, degrees, property values, Federal land-grant funds (endowments), Federal appropriations, income and expenditures; (2) Ten-year figures on total undergraduate enrollments in different fields of instruction; (3) Ten-year figures on total degrees conferred in different fields of instruction; and (4) Ten-year figures on amounts of Federal funds and appropriations under the several Federal acts. Preliminary reports of land-graft colleges and universities are issued annually in November by the Office of Education covering the preceding year ending June 30. Data contained in the tabulations are based on revised figures from two of these reports--Circular 172 for the year 1936-37 and Circular 176 for the year 1937-38.

Comparative summary for 1936-37 and 1937-38.-- With a few exceptions increases occurred from 1936-37 to 1937-38 in the staff, student enrollments, degrees, Federal land-grant funds, Federal appropriations, income from different sources, and expenditures for different purposes, as shown by table 23 comprising the first summary tabulation. The table gives separate figures for the 52 white land-graft institutions and for the total 69 institutions which includes the 17 Negro colleges. The principal decreases were in the value of lands, equipment, private gifts and income from other than regular sources of the institutions.

Of special interest are the variations in the extent of the increase or decrease of the several items or sub-items during the biennium. Such variations are presented in table IXVIII, only the more pertinent of them being included. The table gives the number or amount, and percent of the increase or decrease for the total 69 institutions.

It will be observed that the Federal funds and Federal appropriations for the support of the institutions showed increases for the two-year period. The amount of the 1862 land-grant fund together with unsold lands increased by 6.29 percent while the income from the fund had a gain of 13.62 percent. Income from other Federal land grants to the institutions advanced by 7.09 percent. Of the several items and sub-items, the

- ^{1/} Major statistical editing and tabulating done by Maude Farr, statistical clerk.
- ^{2/} The State Agricultural and Mechanic Arts College in Connecticut recently became a State university.
- ^{3/} In North Carolina, the State College of Agriculture and Mechanic Arts is a branch of the State university.
- ^{4/} The New York State Colleges of Agriculture, Home Economics, Veterinary medicine, and the agricultural experiment station are parts of Cornell University, a privately controlled university.

Capital outlays.....	2,907,162	17.71
1/ Decrease		

greatest percentage of increase was in expenditures for organized research due in part to the increase in the Federal appropriations for research. The institutions expended 17.16 percent more for this service in 1937-38 than in 1936-37.

Increases among certain other items and sub-items were strikingly at variance. For example, students of college grade increased by 7.92 percent, correspondence and extension students by 8.77 percent, summer session students by 12.78 percent, and total students by 9.03 percent. At the same time the staff of the institutions including professors, instructors, extension workers and experiment station staff increased by 4.66 percent. The staff, therefore, did not increase in the same proportion as the students. Similarly, the expenditures for resident instruction showed an increase of 5.37 percent, a lower percentage of increase than that for students.

Particular notice should be taken of the increase in the income of the institutions from State government appropriations as compared with other sources. State government appropriations increased by 13.22 percent in contrast with an increase of 7.41 percent from student fees, 7.44 percent from endowment income, 6.00 percent from Federal appropriations, and 9.87 from county and district government appropriations. This indicates that State governments in 1937-38 assumed a greater financial responsibility for supporting the institutions than in 1936-37. Since the beginning of the economic depression private individuals have in general diminished their contributions to higher educational institutions, as indicated by a decrease of 11.11 percent in income from private gifts and grants.

A distribution on a percentage basis of the total educational and general income of the institutions for each of the years conveys information as to changes in their support derived from the several sources. Table XXIX gives this percentage distribution.

TABLE XXIX.--PERCENTAGE DISTRIBUTION BY SOURCE OF TOTAL EDUCATIONAL AND GENERAL INCOME OF 69 LAND-GRANT INSTITUTIONS, 1936-37 AND 1937-38

Sources of Income	Percent for	
	1936-1937	1937-1938
	1	2
Student fees.....	16.07	16.26
Endowment.....	4.15	4.16
Federal government.....	18.55	18.53
State government.....	44.25	47.20
County or district government.....	1.70	1.77
Private gifts and grants.....	3.21	2.50
Sales and services.....	7.47	7.19
Other income ^{1/}	4.60	2.39
Total.....	100.00	100.00

^{1/} See footnote table 23.

From this table it will be noted that the percent of the total educational and general income derived from student fees, endowment, Federal government, county or district government, and sales and services did not alter materially in 1937-38 as compared with 1936-37. The percent of such income from the State government, however, was 2.95 higher in 1937-38 than in 1936-37. Conversely, the percent of income from private gifts and grants was .71 lower and from other income 2.21 lower.

Probably of greater significance is a comparison of the proportionate expenditures of the institutions for different purposes between 1936-37 and 1937-38. From such a comparison it is possible to ascertain the particular phases of their educational services for which proportionately higher or lower expenditures were made in one or the other of the years. Table XXX contains a percentage distribution of the total educational and general expenditures for each of the years giving information with respect to this question.

TABLE XXX.--PERCENTAGE DISTRIBUTION OF TOTAL EDUCATIONAL AND GENERAL EXPENDITURES BY PURPOSES OF 69 LAND-GRANT INSTITUTIONS, 1936-37 AND 1937-38

Purposes of expenditures	Percent for	
	1936-1937	1937-1938
1	2	3
Administration and general expense.....	6.67	6.87
Resident instruction.....	47.37	45.76
Organized research.....	12.68	13.72
Extension.....	20.75	21.13
Libraries.....	2.58	2.66
Operation and maintenance of plant.....	9.95	9.86
Total.....	100.00	100.00

Not a great deal of difference is found in the percentages of the total expenditure by the institutions in 1936-37 and 1937-38 for administration and general expense and for operation and maintenance of plant. The percent of the expenditures was 1.04 higher for organized research in 1937-38 than in 1936-37, .38 for extension and .08 for libraries. On the other hand, the percent of the expenditures for resident instruction was 1.61 lower. This would appear to indicate that the institutions curtailed their proportionate expenditures for the instruction of students in 1937-38 in favor of larger expenditures for research and extension activities.

Ten-year undergraduate enrollment summaries.-- Undergraduate enrollments classified by fields of instruction and by sex of students at the 52 white land-grant institutions over ten years are contained in table 24 comprising the second summary tabulation.

From 1927-28 to 1937-38 the total undergraduate enrollments including both men and women showed an increase of 60,760 students. This represents a gain of 40.19 percent. Men students increased at a much greater rate than women students. The percentage of increase for men students was 46.04 and for women students 27.43, a difference of 18.61. A further illustration of this point is found in the percentage distribution of men and women students for 1927-28 and 1937-38. Of the total undergraduate enrollment in 1927-28, there were 68.53 percent who were men students and 31.47 percent who were women students. In 1937-38 the percent for men students was 71.39 and for women students 28.61. Hence, the percent for men students in 1937-38 was greater than that in 1927-28 while the percentage for women students was smaller 5/.

5/ The enrollments of 6 land-grant institutions consist either exclusively or almost exclusively of men students. These institutions are: University of Florida, Massachusetts Institute of Technology, State College of Agriculture & Engineering of the University of North Carolina, Clemson Agricultural College of South Carolina, Agricultural and Mechanical College of Texas, and Virginia Polytechnic Institute.

Comparing the undergraduate enrollments in the different fields of instruction for 1927-28 and 1937-38, a different picture is presented. In certain fields, there were decreases rather than increases in enrollments. Moreover, the extent of the increases and decreases varies for each of the fields. This indicates that the educational programs of the institutions have undergone modification during the 10 years by the growth of some fields of instruction and by the decline of others. Table XXXI contains data showing the extent of increase or decrease in the enrollments for each field of instruction between 1927-28 and 1937-38. In the table are given the increase or decrease in number of students and the percentage of increase or decrease.

TABLE XXXI.--EXTENT OF INCREASE OR DECREASE IN UNDERGRADUATE ENROLLMENTS FOR DIFFERENT FIELDS OF INSTRUCTION IN 52 LAND-GRANT INSTITUTIONS, 1927-28 TO 1937-38

Field of instruction	Increase		Decrease	
	:Number of:		:Number of:	
	: students:	Percent	: students:	Percent

All other undergraduate fields.....	6,315	188.39	-	-

^{1/} Includes part of enrollments in forestry in 1937-38.

^{2/} Increase from 1931-32 to 1937-38.

^{3/} Increase from 1927-28 to 1936-37.

Receiving support from the Federal government for the specific purpose of providing educational service and conducting research in agriculture, mechanic arts and related branches, it is of special interest to note that the greatest increases in enrollments occurred in these fields. According to table XXXI, the largest percentage of increase in 1937-38 over 1927-28 was made in forestry, the second largest in veterinary medicine, the third largest in agriculture, and the fourth largest in home economics. The percentage of increase in enrollments of engineering was not as great as in these other fields.

There were two additional fields which showed fairly substantial percentages of increase. One was arts and sciences. The second was commerce and business. Among the fields with rather small percentages of increase were teachers college (education), journalism, law, library science, medicine, and nursing. Decreases in enrollments were recorded in five fields--architecture, dentistry, fine arts, music and pharmacy. The percentages of decrease ranged from 62.50 to 19.86, the highest being in fine arts

and the lowest in dentistry.

Further light is thrown on changes in the undergraduate enrollments of the institutions in 1927-28 and 1937-38 by a percentage distribution of the total enrollment of each of these years according to fields of instruction. Such a distribution is presented in table XXXII.

TABLE XXXII.--PERCENTAGE DISTRIBUTION OF UNDERGRADUATE ENROLLMENTS FOR DIFFERENT FIELDS OF INSTRUCTION AT 52 WHITE LAND-GRAFT INSTITUTIONS, 1927-28 AND 1937-38

Fields of instruction	Percent for	
	1927-28	1937-38
	1	2
Arts and sciences.....	34.89	36.11

All other undergraduates.....	2.17	4.49
Total.....	100.00	100.00

1/ Undergraduate enrollment not available for 1927-28.

2/ Included in "Agriculture" and "All other undergraduates."

3/ Included in "All other undergraduates."

Analysing this table, arts and sciences is seen to have had the largest percent of the total enrollment of the institutions in 1927-28, engineering the second largest, teachers college (education) the third largest, commerce and business the fourth largest, agriculture the fifth largest, and home economics the sixth largest. Due to the proportionate expansion of enrollments in some of these fields and the proportionate diminution in others, this order of rank was altered by 1937-38. In this latter year arts and sciences had the largest percent, engineering the second largest, agriculture the third largest, teachers college (education) the fourth largest, commerce and business the fifth largest, and home economics the sixth largest. In other words, agriculture advanced from the fifth largest percent in 1927-28 to the third largest in 1937-38 while teachers college (education) dropped from the third to the fourth largest and commerce and business from the fourth largest to the fifth largest.

Differences in the percent of the total enrollment for 1927-28 and 1937-38 in these several fields are of significance. Such percent for 1937-38 in arts and sciences exceeded that for 1927-28 by 1.22, agriculture by 4.51 and home economics by .63. Contrawise, the percent of the total enrollment for 1937-38 was 2.55 less in teachers college

(education) than that for 1927-28, .26 less for commerce and business, and 1.80 less for engineering. Several other fields of instruction showed a smaller percent in 1937-38 as compared with 1927-28. Among them were architecture, dentistry, fine arts, journalism, law, medicine, music and pharmacy.

Ten-year summaries of degrees.-- The product of the 52 white land-grant institutions as indicated by the number of degrees conferred over ten years is presented in table 25, the third summary tabulation. The table classifies the degrees by first, master's, and doctor's degrees, by sex of students receiving them, and by fields of instruction.

A total of 14,107 more degrees were conferred by the institutions in 1937-38 than in 1927-28, a gain of 53.34 percent. First degrees increased by 11,008, a gain of 47.67 percent; master's degrees by 2,689, a gain of 95.04 percent; and doctor's degrees by 410, a gain of 78.54 percent. Thus, the highest percentage of increase occurred in graduate degrees evidencing an expansion in this level of work in the institutions. Comparing the undergraduate degrees by sex of students, it is found that the increase of such degrees was 8,611 for men students, a gain of 57.46 percent, while the increase was 2,397 for women students, a gain of 29.57 percent. The percentage of increase for degrees conferred on men students was almost twice that for degrees conferred on women students.

For the purpose of showing changes in first degrees conferred in the different fields of instruction by the institutions, table XXIII has been compiled. In this table is presented a percentage distribution of the total degrees for each field of instruction in the year 1927-28 as compared with 1937-38.

TABLE XXIII.--PERCENTAGE DISTRIBUTION OF TOTAL FIRST DEGREES FOR THE DIFFERENT FIELDS OF INSTRUCTION AT 52 LAND-GRANT INSTITUTIONS, 1927-28 AND 1937-38

Fields of instruction	Percent for	
	1927-28	1937-38
1	2	3
Arts and sciences.....	30.09	32.79
Teachers college (education).....	13.35	12.88
Agriculture.....	7.64	10.96
Engineering.....	18.80	14.24
Commerce and business.....	7.15	7.27
Architecture.....	.52	.56
Dentistry.....	1.49	.98
Fine arts.....	.53	.15
Forestry.....	.60	1/
Home economics.....	6.05	5.58
Journalism.....	.93	.94
Law.....	2.92	2.83
Library science.....	2/	.29
Medicine.....	4.24	4.27
Music.....	.41	.29
Nursing.....	2/	.78
Pharmacy.....	2.10	1.22
Veterinary medicine.....	.44	3/
All other first degrees.....	3.14	3.97
Total.....	100.00	100.00

1/ Included with degree in agriculture. 2/ Not available for 1927-28.
 3/ Included with "All other first degrees."

Using a similar method of comparison as in the case of undergraduate enrollments, it is found from table XXVIII that the largest percent of the total first degrees conferred by the institutions in 1927-28 was in arts and sciences. Teachers college (education) had the second largest percent, engineering the third, agriculture the fourth, commerce and business the fifth, and home economics the sixth. In 1937-38 there was no change in this ranking of the different fields with the exception of engineering and teachers college (education). For the latter year engineering had the second largest percent of the total first degrees and teachers college (education) the third largest.

It will be observed that there was considerable alteration in the distribution among the different fields between the two years. As an illustration, the percent of the total first degrees conferred in arts and sciences and in agriculture was 2.70 and 3.32 higher for 1937-38 respectively. On the other hand, such percent for engineering decreased by 4.16 from 1927-28 to 1937-38, for teachers college (education) by .47, for dentistry by .51, for home economics by .47, and for pharmacy by .88. The decreases or increases in the other fields were so slight as not to be significant.

1. Lands (campus and farms).....	957,482,053	959,345,921	951,418,515	953,326,196
2. Buildings and structures.....	286,210,953	294,477,342	317,688,215	331,349,009
3. Equipment (books, apparatus, tools, etc.).....	114,132,825	121,216,717	111,997,115	114,708,700
4. Funds:				
a. Endowment.....	146,204,695	146,432,609	160,787,871	161,846,960
b. Amenity.....	3,503,987	3,503,987	3,695,202	3,695,202
c. Student loan.....	6,282,909	6,282,951	5,919,131	5,922,221
V. FEDERAL LAND-GRANT FUNDS (REVENUES):				
1. 1862 land-grant:				
a. Amount of fund.....	24,539,741	25,034,609	25,744,219	26,243,512
b. Value of unsold lands.....	4,497,471	4,497,471	5,212,250	5,212,250
c. Income.....	975,509	1,009,571	1,043,082	1,147,066
2. Other land-grants (income).....	443,346	443,346	517,701	517,701
VI. FEDERAL APPROPRIATIONS:				
1. Supplementary Morrill, 1890, 1907, and 1935.....	3,639,312	4,030,000	4,093,122	4,530,000
2. Smith-Bugbee, George-Deen, 1917, 1936.....	364,578	413,341	429,735	514,120
3. Hatch-Adams, 1887.....	1,437,786	1,437,786	1,445,977	1,645,977
4. Smith-Lever, 1914.....	6,162,422	6,162,422	6,097,742	6,097,742
5. Additional cooperative extension funds.....	784,235	784,235	795,347	795,347
6. Clarke-Mohrly, 1924.....	74,018	74,018	75,221	75,221
7. Furnell, 1925.....	2,755,845	2,755,845	2,759,222	2,759,222
8. Copper-Erskine, 1928.....	1,463,122	1,463,122	1,466,276	1,466,276
9. Bushland-Jones (Sec. 1-21), 1935.....	5,580,770	5,580,770	10,928,163	10,928,163
Total recurring appropriations.....	26,280,288	26,729,599	27,240,289	28,332,108
10. Public Works Administration grants, 1935.....	3,704,226	4,202,257	3,586,129	4,093,349
VII. INCOME:				
1. Student fees.....	22,759,943	23,144,171	24,462,755	24,660,573
2. Endowment income.....	5,947,519	5,971,500	6,390,444	6,415,726
3. Appropriation from:				
a. Federal Government.....	25,280,288	26,719,599	27,240,289	28,332,108
b. State government.....	62,253,274	63,725,741	70,220,212	72,160,454
c. County or district government.....	2,434,846	2,448,410	2,644,173	2,629,267
4. Private gifts and grants.....	4,476,997	4,628,704	3,801,075	3,214,307
5. Sales and services.....	10,654,951	10,757,651	10,220,629	10,220,799
6. Other income.....	6,282,647	6,423,895	7,043,760	7,699,716
Total educational and general income.....	141,146,005	144,029,691	149,903,943	152,927,971
7. Auxiliary enterprises.....	20,790,256	22,070,023	25,926,514	27,394,200
VIII. EXPENDITURES:				
1. Administration and general expense.....	8,264,102	8,548,647	9,221,254	9,616,432
2. Resident instruction.....	99,533,295	69,729,290	62,416,122	65,993,949
3. Organized research.....	12,260,459	12,260,459	12,170,421	12,121,343
4. Extension.....	25,539,288	25,627,974	29,440,080	29,246,212
5. Libraries.....	3,246,374	3,308,099	3,634,059	3,713,776
6. Operation and maintenance of plant.....	12,214,022	12,731,078	13,190,630	13,789,294
Total educational and general expenditures.....	128,059,234	128,195,267	137,166,206	139,242,128
7. Auxiliary enterprises and activities.....	21,028,224	22,243,114	24,751,139	25,012,509
8. Miscellaneous purposes.....	2,543,023	2,673,671	2,823,213	2,934,046
9. Capital outlay.....	25,312,629	16,413,946	12,373,462	19,321,122

1/ Excludes all non-duplicates and 142 items duplicated between the undergraduate and graduate schools.
 2/ The reports for 1937-38 include one item which was included in the reports for 1936-37.

TABLE 21. -- THE-TIME DEGREE - TOTAL UNDERGRADUATE ENROLLMENTS IN DIFFERENT FIELDS OF INVESTIGATION BY SEX AND-QUALITY INSTITUTIONS

17 Includes 2,774 non-applicants and 795 women applicants.
 18 Includes 211 non-applicants and 342 women applicants between the undergraduate and graduate schools.
 19 Includes 258 non-applicants and 342 women applicants in General College.
 20 Figures represent total enrollment in General College.
 21 Information not available.
 22 Includes 250 non-applicants.
 23 Includes students enrolled in teachers college.
 24 Includes students enrolled in chemistry.
 25 Includes in College of Education.

Amount of fund not reported in Table 4.

Includes Federal student loans (Act of 1957). See Table 14, Column 3 and 4.

Total of this column agrees with Table 14, Column 13, less Col. 2.

Includes an item of \$200,000 provided from the sale of educational buildings and land owned by the institution.

Includes \$299,099 from permanent fund shared by University of Tennessee included here. Amount of fund not reported in Table 4.

Includes \$66,613 derived from oil royalties reported in Schedule 3 - Federal funds.
