Chapter IX

Degrees Arranged Alphabetically

IN THIS CHAPTER will be found in single alphabetical order more than 2,400 academic degrees currently or formerly conferred or offered by American institutions of higher education. The Latin forms of more than 100 degrees are given as well as the modern English forms. Degrees printed in roman type are those currently offered, as reported by the registrars of the cooperating colleges in this study. Degrees printed in *italics* are not currently offered, as far as known. The sources for them are stated in chapter I.

After each degree is given the number of institutions which reported its current use. In the case of non-current degrees (except spurious ones) this number is replaced by the symbol "x" since their number is generally unknown, and not of present significance. Numbers have been added for spurious degrees (*Spur.*) derived as explained in chapter VI.

On the second line is stated the subject matter field, or fields, in which further information concerning the degree will be found in chapter VIII. This information includes data on abbreviations used for the degree and their frequency. For more than 300 degrees two fields are listed, in either of which detailed information will be found. Thus data on Agricultural Engineering will be found in either the section on Agriculture or Engineering. In a dozen cases reference is made to three fields. Thus data on Fine Arts in Music Education will be found in either of the sections on Education, Fine Arts, or Music.
