Foreword

THIS DIRECTORY of preparatory trade and industrial training programs in the public schools of the United States was compiled to help meet a continuing demand for current information about specific courses available in the schools. It should be of assistance to school administrators, counselors, students, parents, personnel directors, employers, and others.

The last previous directory of this type, published in 1954, listed only day trade programs. The matter of enlarging the scope, and hence the usefulness, of the next issue of the directory was discussed at the 1961 National Conference of State Supervisors of Trade and Industrial Education in Kansas City, Missouri. As a result, the present directory also lists part-time cooperative training programs meeting the standards of the respective State Plans for Vocational Education. Listed under "Industrial Cooperative Training," these programs cover a wide range of occupations.

The present directory also lists short-unit preparatory training courses offered on a regular basis. It does not list technician training programs under Title VIII of the National Defense Education Act.

Specific details concerning the programs listed in this directory may be obtained from the local director of vocational education or the principal of the schools conducting the courses, and information about trade and technical education courses under other programs may be obtained from the State Supervisor, Trade and Industrial Education.

Acknowledgement is made of the cooperation of the State Supervisors of Trade and Industrial Education, who supplied the information needed to make this directory possible.

WALTER M. ARNOLD
*Assistant Commissioner
for Vocational and
Technical Education*

Preparatory Trade and Industrial Programs in Public Schools

A Directory: 1961-62

THE TRAINING PROGRAMS in this directory are listed by State and city, and school and program, in alphabetical order. The availability of courses for high school pupils and adults is shown by an "X" in the columns correspondingly identified. For a given course, if it is available to both high school pupils and adults, an "X" appears in both columns. Usually, high school and adult students are enrolled in separate classes, but mixed classes are offered in some vocational schools and in some junior or community colleges.

In compiling the directory standard course titles were used. Although titles for certain occupational areas may vary from State to State, the nature of the programs is basically the same. If a particular course title used by a given school differs greatly from the standard course title, the one used by the school is also given in parentheses.
