

Australian vocational education and training statistics

Apprentices and trainees 2017

March quarter

National Centre for Vocational Education Research

Highlights

In-training as at 31 March 2017

There were 275 200 apprentices and trainees in-training as at 31 March 2017, a decrease of 3.7% from 31 March 2016.

Quarterly training activity

In the March quarter 2017, compared with the March quarter 2016:

- commencements decreased by 0.1%, to 56 200
- completions decreased by 5.1%, to 25 300
- cancellations and withdrawals increased by 0.1%, to 23 700.

Training activity: 12-month ending series

In the 12 months ending 31 March 2017, compared with the 12 months ending 31 March 2016:

- commencements decreased by 1.9%, to 166 700
- completions decreased by 15.1%, to 97 300
- cancellations and withdrawals decreased by 0.5%, to 93 400.

Introduction

This publication presents estimates of apprentice and trainee activity in Australia for the March quarter 2017. The figures in this publication are derived from the National Apprentice and Trainee Collection no.92 (June 2017 estimates).

The most recent figures in this publication are estimated (that is, for training activity from the June quarter 2015 to the March quarter 2017). Estimates take into account reporting lags that occur at the time of data collection. Consequently, the figures in this publication may differ from those published in earlier or later reports. The figures in bold are the actual numbers.

Estimated data are presented on a quarterly and 12-month ending series basis. The 12-month ending series is particularly useful in showing longer-term data trends, but is less useful in identifying turning points.

This publication also presents early trend estimates for the June quarter 2017 for seasonally adjusted and smoothed commencements at the national level for trades and non-trades occupations. Seasonal adjustment and smoothing involves the use of a mathematical model to smooth out fluctuations due to seasonal influences. These early trend estimates cannot be disaggregated further by state and territory.

Note that the percentages presented in this publication are reported to one decimal place. All other numbers, after aggregation, have been rounded to the nearest hundred. Rounding can lead to instances where the numbers in the body of a given table might not add to the rounded totals.

More information

Details on the estimation methodology used for reporting apprentices and trainees may be found at <http://www.ncver.edu.au/publications/2267.html>.

For additional data tables on apprentices and trainees, please refer to <https://www.ncver.edu.au/data/collection/apprentices-and-trainees-collection/apprentices-and-trainees-quarterly>. These tables include state and territory breakdowns of information contained in this publication and pivot tables to allow further manipulation of the data.

In September 2016, NCVET implemented a number of collection and system changes and as such some activity may differ to that reported in previous publications. These included implementation of release 7.0 of the AVETMIS Standard for apprentices and trainees, and migration of the historical data collections to a new database.

Historical time series information is available at <https://www.ncver.edu.au/data/data/infographics/historical-time-series-of-apprenticeships-and-traineeships-in-australia>. This series presents a summary of training activity in apprenticeships and traineeships in Australia for the period 1963–2016. A timeline of major policy changes affecting apprenticeships and traineeships in Australia from 1901 to the present is provided to give the summary information context. Training rate data are also presented by occupation and state and territory for the period 1996–2016.

Australia in summary

Quarterly training activity: March quarter 2017

In-training

The number of apprentices and trainees in-training as at 31 March 2017 was 275 200, a decrease of 3.7% from 31 March 2016.

Table 2

Commencements

Overall, 56 200 apprentices and trainees commenced in the March quarter 2017, a decrease of 0.1% from the March quarter 2016.

Table 4

In the March quarter 2017, compared with the March quarter 2016:

Table 10

- trades commencements decreased by 1.0%, to 27 700. Commencements for those aged:
 - 24 years and under increased by 2.0%
 - 25 years and over decreased by 11.9%
- non-trades commencements increased by 0.8%, to 28 500. Commencements for those aged:
 - 24 years and under increased by 2.3%
 - 25 years and over decreased by 2.2%.

Completions

The number of completions in the March quarter 2017 was 25 300, a decrease of 5.1% from the March quarter 2016.

Table 6

In the March quarter 2017, compared with the March quarter 2016:

Table 11

- trades completions decreased by 4.0%, to 12 800. Completions for those aged:
 - 24 years and under decreased by 4.5%
 - 25 years and over decreased by 3.1%
- non-trades completions decreased by 6.3% to 12 500. Completions for those aged:
 - 24 years and under increased by 9.3%
 - 25 years and over decreased by 23.8%.

Cancellations and withdrawals

The number of cancellations and withdrawals in the March quarter 2017 was 23 700, an increase of 0.1% from the March quarter 2016.

Table 8

- trades cancellations and withdrawals increased by 3.2% to 13 000
- non-trades cancellations and withdrawals decreased by 3.4% to 10 700.

Table 12

Training activity: 12 months ending

Commencements

The number of commencements in the 12 months ending 31 March 2017 was 166 700, a decrease of 1.9% from the previous 12 months. However, New South Wales (up 2.3%), Queensland (up 1.9%), Tasmania (up 5.8%), Northern Territory (up 10.1%) and Australian Capital Territory (up 26.1%) all showed an increase over this 12 month period.

Table 16

In the 12 months ending 31 March 2017, compared with previous 12 months:

Table 16

- trades commencements decreased by 9.0% to 72 300
- non-trades commencements increased by 4.3% to 94 400.

For detailed information on commencements by occupation, refer to table 19.

Completions

The number of completions in the 12 months ending 31 March 2017 was 97 300, a decrease of 15.1% from the previous 12 months:

Table 17

- trades completions decreased by 13.2% to 43 800
- non-trades completions decreased by 16.5% to 53 500.

Cancellations and withdrawals

The number of cancellations and withdrawals in the 12 months ending 31 March 2017 was 93 400, a decrease of 0.5% from the previous 12 months:

Table 18

- trades cancellations and withdrawals increased by 0.7% to 50 800
- non-trades cancellations and withdrawals decreased by 1.8% to 42 600.

Early trend estimates

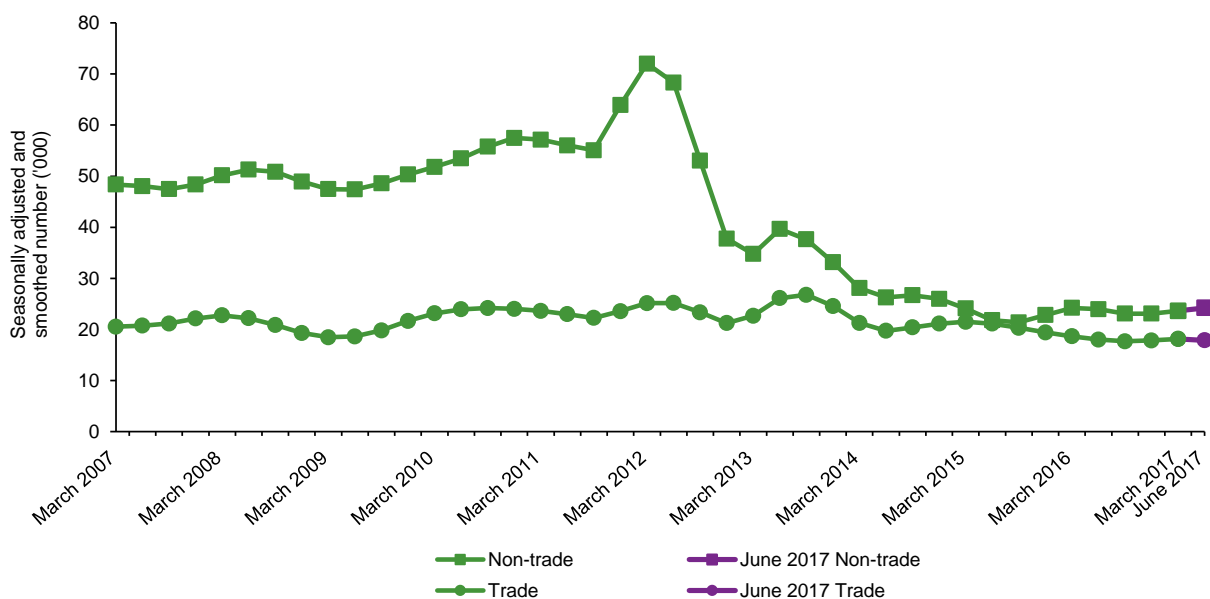

Early trend estimates suggest that:

- Over the last year and a half, the trends for both trades and non-trades commencements have remained relatively flat, averaging around 18 000 for trades and 23 700 for non-trades.

For notes on figures and tables, see the explanatory notes on page 21.

Please note: Trend estimates are produced by optimally smoothing the seasonally adjusted series. Any referencing of early trend estimates must be done with caution due to the preliminary nature of the submitted data. The submitted data are subject to reporting lags and are updated each quarter. Therefore, results in the trend series are revised quarterly. These revisions affect the most recent four quarters to a much greater extent than the preceding quarters.

Terms

AQF (Australian Qualifications Framework) is the national policy framework for regulated qualifications in Australian education and training. It incorporates the qualifications from each education and training sector into a single comprehensive national qualifications framework. For more details on the AQF, go to <<http://www.aqf.edu.au>>.

ANZSCO (Australian and New Zealand Standard Classification of Occupations) is a classification of the occupations of individuals. The classification is based on the Australian Bureau of Statistics (ABS) publication, *Australian and New Zealand Standard Classification of Occupations* (First edition, Revision 2, ABS cat.no.1220.0).

Cancellations and withdrawals refers to apprentices and trainees whose contract of training has been terminated prior to a successful completion. Cancellation and withdrawal figures may also include contracts which have been transferred due to a change in employer.

Commencements refers to apprentices and trainees starting a program of training. The date of commencement is the date that an apprentice or trainee contract of training is registered or approved under the provisions of the relevant state/territory legislation.

Completions refers to apprenticeship or traineeship contracts of training where all of the prescribed requirements have been met.

Contract status indicates the status of apprentice and trainee contracts of training, including the commencement, completion, cancellation/withdrawal of contracts, and apprentices and trainees in-training.

Early trend estimates refers to early indications of training activity for the quarter being collected for the first time. These estimates are only available for seasonally adjusted and smoothed commencements at the national level for trades and non-trades occupations.

Existing workers refers to those apprentices and trainees who were employed by their current employer for more than three months full-time (or 12 months part-time/casual) prior to commencing their training contract.

Full-time apprentices or trainees are those whose ordinary hours of employment, including the training component, are at least the usual hours of employment of a full-time employee in that occupation.

In-training refers to apprentices and trainees who are actively training, at the end of each quarter, under the terms of their training contract, and who have not completed, cancelled or withdrawn from their training, or had their training contract expire without meeting all of the prescribed requirements of their program.

Non-trades refers to those apprentices and trainees employed in occupations outside the trades. Non-trades includes all occupations listed under ANZSCO, First edition, Revision 2, with the exception of major group 3 (Technicians and trades workers).

Part-time apprentices or trainees are defined as those whose ordinary hours of employment, including the training component, are less than full-time. Part-time provisions vary across Australia and across occupations, with 'part-time' defined by each state and territory.

Seasonal adjustment refers to a mathematical model used in time series data to smooth out the fluctuations attributable to seasonal influences.

Trades refers to those apprentices and trainees employed in trades occupations under major group 3 (Technicians and trades workers) of ANZSCO, First edition, Revision 2.

Training duration indicates the amount of time that an apprentice or trainee takes to complete their contract of training from the time of commencement.

Training packages are a set of nationally endorsed standards, guidelines and qualifications for training and for recognising and assessing skills. For more details on training packages, go to <<http://www.training.gov.au>>.

12-month ending series refers to the total number of commencements, completions and cancellations/withdrawals within a 12-month period (that is, summing the current quarter with the previous three quarters).

Explanatory notes

Data source

1. The information included in this publication is, unless stated otherwise, derived from the National Apprentice and Trainee Collection no.92, June 2017 estimates, which is compiled under the Australian Vocational Education and Training Management Information Statistical Standard (AVETMISS) for Apprentice and Trainee Collection Specifications, Release 7.0, October 2015.

Estimation procedure

2. This publication contains figures on apprentice and trainee activity (such as commencements, completions and in-training) based on the date of effect rather than the date of processing. Due to lags in processing, the most recent figures in this publication are estimated (for training activity from June quarter 2015 to March quarter 2017). The estimation method involves weighting recently processed numbers, based on average reporting lags. Because estimates are revised for up to seven quarters, the figures for the last two years may differ from those published in earlier or in subsequent reports. The figures in bold are the actual numbers. Further details on the methodology can be found at <http://www.ncver.edu.au/publications/2267.html>. For the standard errors on the estimates used in this publication, see the data tables at <https://www.ncver.edu.au/data/collection/apprentices-and-trainees-collection/apprentices-and-trainees-quarterly>.

Early trend estimates

3. Early trend estimates for the quarter being collected for the first time (June quarter 2017) are only provided for commencements at the national level for trades and non-trades occupations. These estimates are then seasonally adjusted and smoothed using X-11-ARIMA methodology, based on data from March 2007 to March 2017. Because estimates are revised for up to seven quarters, the figures for the last two years may differ from those published in earlier or in subsequent reports.
4. Due to the variability of first submission data, these early trend estimates cannot be disaggregated further by state and territory.

State and territory comments

5. Due to the transition to a new IT system in the June quarter 2013, the data for the South Australian Department of State Development (DSD) may be subject to future revisions in subsequent quarters.
6. In April 2012, the Victorian Department of Education and Early Childhood Development announced through *Refocusing vocational training in Victoria* that it would refocus subsidy rates for VET courses to better target the areas of greatest public benefit and future jobs growth. New fee and funding rates were effective from 1 July 2012 for all new course commencements. Changes to these subsidy rates may influence employer decisions on whether to commence trainees in some VET courses.

Definitions and derivations

7. As the vocations approved to be under an apprenticeship or traineeship training contract are not consistent across all jurisdictions, NCVER has adopted a Trade/Non-trade categorisation for the purpose of the National Apprentices and Trainees Collection with 'Trades' classified as all occupations listed under ANZSCO major group '3—Technicians and trades workers' and 'Non-trades' classified as all other major occupations groups 1—2 and 4—8 (ANZSCO, First edition, Revision 2). ANZSCO has been back-cast by NCVER to 1994 for reporting purposes. For further information on the methodology, see <http://www.ncver.edu.au/publications/2266.html>.
8. Unknown data have not been reported in any tables, whereas the total includes all contracts, including those with unknown status. Hence, some figures in the tables may not sum to the total.
9. A dash (-) represents a true zero figure, with no contracts reported in these categories.

Additional information

10. In September 2016, NCVET implemented a number of collection and system changes and as such some activity may differ to that reported in previous publications. These included implementation of release 7.0 of the AVETMIS Standard for apprentices and trainees, and migration of the historical data collections to a new database.
11. From 1 July 2012 the Australian Government discontinued the \$1500 standard employer commencement incentive payment and increased the standard completion incentive by \$500 to \$3000 for existing worker apprentices and trainees in non-National Skills Needs List occupations. The observed changes to commencements and completion levels need to be seen in the context of this policy change. Further details on incentive changes may be found in the 2012–13 Budget <http://www.budget.gov.au/2012-13/content/bp2/html/bp2_expense-15.htm>.
