

MEMORANDUM

March 14, 2014

TO: School Board Members

FROM: Terry B. Grier, Ed.D.
Superintendent of Schools

SUBJECT: **STATE COMPENSATORY EDUCATION REPORT**

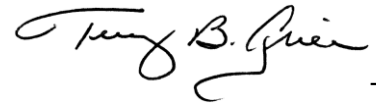

CONTACT: Carla Stevens, 713-556-6700

Attached is the State Compensatory Education report for the 2012–2013 school year. The State Compensatory Education (SCE) program is designed to reduce dropout rates and increase academic performance of students identified as being at-risk of dropping out of school. SCE operates as a funding source to supplement instructional services and offer academic support to students who meet the SCE at-risk criteria established by the state. Funds allocated under SCE law are to be channeled toward programs and services that eliminate disparities in performance on assessment instruments administered under Subchapter B, Chapter 39.

Some of the highlights are as follows:

- Of the 203,354 students attending HISD, 57 percent were identified as being at-risk according to SCE criteria.
- Districtwide, on the 2013 English language STAAR, the gaps in the percentage of students meeting the satisfactory standard between not at-risk and at-risk students were 29 percentage points in reading, 19 percentage points in mathematics, 25 percentage points in writing, 30 percentage points in science, and 39 percentage points in social studies. The gaps decreased in all subjects from 2012 to 2013.
- Districtwide, on the 2013 STAAR EOC, the gaps in the percent of not at-risk and at-risk students who met the satisfactory standard ranged from 24 percentage points in Geometry to 53 percentage points in English II Writing. The gaps in Algebra I, Geometry, and Biology increased from 2012 to 2013 while the gaps in English I Reading, English I Writing, and World Geography decreased.
- For the class of 2012, 86.9 percent of not at-risk students and 78.7 percent of at-risk students graduated from HISD. The completion rate (which includes graduates, continuers and GED recipients) for not at-risk students was 91.1 percent and the at-risk rate was 87.3 percent. The gaps between the two groups increased from 2011 to 2012 for both graduation and completion rates.
- In general, the 2013 English STAAR, STAAR EOC, and TAKS results indicate that passing rates of students who received and/or participated in various SCE programs and services did not exceed the passing rates of all at-risk students in the district, with the following exceptions: JJAEP students on the English STAAR Reading, Beechnut students on the TAKS Science, and students who received pregnancy-related services on the STAAR Reading and English I Writing EOC exams.

Should you have any questions, please contact my office or Carla Stevens in the Research and Accountability Department at 713-556-6700.

AN EVALUATION OF STATE COMPENSATORY EDUCATION 2012–2013

Executive Summary

Program Description

The State Compensatory Education (SCE) program is designed to reduce dropout rates and increase academic performance of students identified as being at-risk of dropping out of school. SCE operates as a funding source to supplement instructional services and offer academic support to students who meet the SCE at-risk criteria established by the state. Funds allocated under SCE law are to be channeled toward programs and services that eliminate disparities in performance on assessment instruments administered under Subchapter B, Chapter 39. Further, programs designated for SCE funding should reduce disparities in the rates of high school completion between students who are at-risk of dropping out of school and all other students. The Stanford 10 and Aprenda 3 served as the assessment measures for grades 1 and 2, the State of Texas Assessments of Academic Readiness (STAAR) served as the state assessment measures for grades 3 through 8, STAAR End-of-Course (EOC) served as the state assessment measures for grades 9 and 10, and the Texas Assessment of Knowledge and Skills (TAKS) served as the state assessment measure for grade 11 for the 2012–2013 school year. In order for SCE funds to be allocated to a campus, the campus must not only meet the state criteria for percent of students at-risk of dropping out of school, but the services provided to students must also be described in the district and/or campus improvement plan.

As defined by law, SCE programs and/or services are designed to supplement the regular education program that districts offer to students and funds must provide additional support for at-risk students. Supplemental costs include costs for program and student evaluation, instructional materials and equipment and other supplies required for quality instruction, supplemental staff expenses, salary for teachers of at-risk students, smaller class sizes, and individualized instruction (TEC §42.152(c)).

Program Cost and Funding Source

The annual budget for SCE programs in HISD for the 2012–2013 academic year was \$110,990,982. This figure included \$53,621,542 of supplemental campus-based funds. These amounts are budgeted amounts and not final expenditures for 2012–2013.

Highlights

- Of the 203,354 students attending HISD, 115,416 students (57 percent) were identified as being at-risk according to SCE criteria. More males were identified as at-risk than females (60 percent vs. 54 percent, respectively).
- The ethnic composition of at-risk students was 74 percent Hispanic, followed by 19 percent African American, four percent White, two percent Asian/Pacific Islander, and less than one percent American Indian. Eighty-eight (88) percent of at-risk students were economically disadvantaged.
- Districtwide, on the 2013 English language STAAR, the gaps in the percentage of students meeting the satisfactory standard between not at-risk and at-risk students were 29 percentage points in reading, 19 percentage points in mathematics, 25 percentage points in writing, 30 percentage points

in science, and 39 percentage points in social studies. The gaps decreased in all subjects from 2012 to 2013.

- Districtwide, on the 2013 STAAR EOC, the gaps in the percent of not at-risk and at-risk students who met the satisfactory standard ranged from 24 percentage points in Geometry to 53 percentage points in English II Writing. The gaps in Algebra I, Geometry, and Biology increased from 2012 to 2013 while the gaps in English I Reading, English I Writing, and World Geography decreased.
- Districtwide, there were total gap reductions between at-risk and not at-risk students from 2012 to 2013 in ELA and science TAKS passing rates. The gap increased in mathematics and stayed the same in social studies.
- For the class of 2012, 86.9 percent of not at-risk students and 78.7 percent of at-risk students graduated from HISD. The completion rate (which includes graduates, continuers and GED recipients) for not at-risk students was 91.1 percent and the at-risk rate was 87.3 percent. The gaps between the two groups increased from 2011 to 2012 for both graduation and completion rates.
- When comparing gaps in the percentage of students scoring at or above the 50th percentile on the Stanford 10 between at-risk and not at-risk students in the first and second grades districtwide, not at-risk students outperformed at-risk students by 27 to 41 percentage points. Districtwide, the largest gap was on the reading section (41 percentage points).
- Districtwide performance on the Aprenda 3, among students in the first and second grades, indicated that not at-risk students outscored at-risk students on all sections by three to ten percentage points. Districtwide, the largest gap in the percentage of students scoring at or above the 50th percentile on the Aprenda 3 was on the mathematics section (10 percentage points).
- In general, the 2013 English STAAR, STAAR EOC, and TAKS results indicate that passing rates of students who received and/or participated in various SCE programs and services did not exceed the passing rates of all at-risk students in the district, with the following exceptions: JJAEP students on the English STAAR Reading, Beechnut students on the TAKS Science, and students who received pregnancy-related services on the STAAR Reading and English I Writing EOC exams.

Recommendations

1. From 2011–2012 to 2012–2013, performance gaps between at-risk and not at-risk students increased on the Algebra I EOC, Geometry EOC, and TAKS math exams, which indicates that schools should focus on mathematics instruction for at-risk students in high school.
2. Although performance gaps may not have increased from 2011–2012 to 2012–2013 in the subject areas of reading and writing, large gaps between at-risk and not at-risk students were seen on the English I Reading EOC (46 percentage points), English I Writing EOC (45 points), English II Writing EOC (53 points), and the Stanford reading exam (41 points). These results show that schools still need to focus on reading and writing instruction for at-risk students.
3. Historically, students have performed well on the social studies portion of the TAKS, but on the STAAR, performance on the social studies portion has been lower compared to other subject areas. The gap on the STAAR social studies test was also the largest among all other subject areas at 39 points between at-risk and not at-risk students. Schools need to investigate and address the reasons for students performing poorly in social studies.

Administrative Response

The State Compensatory Education Department has reviewed the 2012–2013 State Compensatory Education evaluation report that assessed the implementation of the State Compensatory Education programs in the Houston Independent School District (HISD). The evaluation met the department's expectations in terms of providing budgetary, implementation, and outcome data for the three (3) centralized programs. These programs include (1) the district Disciplinary Alternative Education Programs (DAEPs); (2) The evaluation includes Pregnancy Related Services; and, (3) all campus-based State Compensatory Education Programs and Services. The district DAEPs are Beechnut Academy, Juvenile Justice Alternative Education Program, and the Elementary Disciplinary Alternative Education Program. The evaluation included three specific recommendations which address achievement gaps between at-risk students and not at-risk students. These recommendations will be reviewed with upper administration for potential improvement in the program's strategies.

Introduction

Program Description

The State Compensatory Education (SCE) program is designed to reduce dropout rates and increase academic performance of students identified as being at-risk of dropping out of school. SCE operates as a funding source to supplement instructional services and offer academic support to students who meet the SCE at-risk criteria established by the state. Funds allocated under SCE law are to be channeled toward programs and services that eliminate disparities in performance on assessment instruments administered under Subchapter B, Chapter 39. Further, programs designated for SCE funding should reduce disparities in the rates of high school completion between students who are at-risk of dropping out of school and all other students. The Stanford 10 and Aprenda 3 served as the assessment measures for grades 1 and 2, the State of Texas Assessments of Academic Readiness (STAAR) served as the state assessment measures for grades 3 through 8, STAAR End-of-Course (EOC) served as the state assessment measures for grades 9 and 10, and the Texas Assessment of Knowledge and Skills (TAKS) served as the state assessment measure for grade 11 for the 2012–2013 school year. In order for SCE funds to be allocated to a campus, the campus must not only meet the state criteria for percent of students at-risk of dropping out of school, but the services provided to students must also be described in the district and/or campus improvement plan.

As defined by law, SCE programs and/or services are designed to supplement the regular education program that districts offer to students and funds must provide additional support for at-risk students. Supplemental costs include costs for program and student evaluation, instructional materials and equipment and other supplies required for quality instruction, supplemental staff expenses, salary for teachers of at-risk students, smaller class sizes, and individualized instruction (TEC §42.152(c)).

Program History

Since the early 1960s, federal, state, and local governmental agencies have demonstrated concern regarding the provision of equitable and appropriate learning opportunities for economically disadvantaged youth served in public educational institutions. The growing number of disadvantaged students, particularly in large, urban school districts, helped fuel the compensatory education movement. The underlying assumption was that many students were at an educational disadvantage because of circumstances associated with their minority and/or socioeconomic status, which ultimately contributed to their lowered academic achievement. Supporters of the movement maintained that these students should be provided extra assistance to “compensate” for those disadvantages (Rossi and Montgomery, 1994).

In 1975, Texas joined the compensatory education movement by enacting the first of a series of legal and administrative guidelines, which, in amended form, shaped compensatory education programs in Texas. Then, in 1997, Senate Bill 1873 amended Section 42.152 of the Texas Education Code and placed new restrictions on compensatory education. The bill required that school districts develop reporting and auditing systems to monitor the use of compensatory education funds.

The next major change came in 2001 when Senate Bill 702 (TEC §29.081), amended the sections of the Texas Education Code that governed the SCE Program. First, the statute required school districts to use student performance on basic skills assessment and achievement tests administered under Subchapter B, Chapter 39, to design and implement appropriate compensatory, intensive or accelerated instructional services for students at-risk of dropping out of school to enable these students to perform at grade level at the conclusion of the subsequent regular school term. SCE legislation later expanded funding to cover mentoring services to at-risk students (Senate Bill 16 of the 78th Legislature), accelerated reading

programs, and programs helping students who have dyslexia or a related disorder (House Bill 1691 of the 78th Legislature).

In 2003, House Bill 3459 amended the sections of the Texas Education Code that govern the SCE Program to allow use of the compensatory education allotment to fund costs that are attributed to programs that are specifically designed to serve students at-risk of dropping out of school, as defined by Texas Education Code Section 29.081. The bill also lowered the required threshold percentage for low income students on a campus to 40 percent (or greater), which was expected to permit expanded use of the SCE allotment to supplement school-wide components of federal *No Child Left Behind* projects.

Program Cost and Funding Source

The annual budget for SCE programs in HISD for the 2012–2013 academic year was \$110,990,982. This figure included \$53,621,542 of supplemental campus-based funds. These amounts are budgeted amounts and not final expenditures for 2012–2013. The money allocated for state-funded compensatory education programs and/or services was based on the number of economically disadvantaged students in the district. A detailed description is provided in **Appendix A** (see page 26).

Purpose of the Evaluation Report

The purpose of this report is to describe and evaluate the SCE funded programs in HISD as required by law. The district must evaluate and document the effectiveness of instructional programs in reducing any disparities in performance on the Stanford, Aprenda, STAAR, STAAR EOC, and TAKS and disparities in the rates of high school completion between students at-risk of dropping out of school and all other district students. This evaluation compares at-risk students' performance on the Stanford, Aprenda, STAAR, STAAR EOC, and TAKS with the performance of their not at-risk counterparts. As required by the TEA (2004), differences in passing rates between at-risk and not at-risk students are reported for the past three years when data are available so that movement in reducing the disparity in passing rates can be ascertained.

In compliance with guidelines specified by the TEA (2004), high school completion rates are reported for at-risk and not at-risk students attending HISD. As will be discussed in more detail in the Methods section of this report, the reported completion rate includes students who graduated, received a GED, or continued to be enrolled.

Additionally, the district must evaluate and document the effectiveness of instructional programs in reducing any disparities in performance on the Stanford, Aprenda, STAAR, STAAR EOC, and TAKS and disparities in the rates of high school completion between students at-risk of dropping out of school and all other district students. These evaluations are required annually. SCE resources must be redirected when evaluations indicate that programs and/or services are unsuccessful in producing desired results for students at-risk of dropping out of school (TEA, 2004).

Finally, this evaluation provides a profile of the SCE programs and services offered to at-risk students in HISD during the 2012–2013 school year. For the purpose of this report, programs and services were grouped according to the following programmatic categories:

- Disciplinary Alternative Education Programs (DAEP): Beechnut School, Juvenile Justice Alternative Education Program (JJAEP), and Elementary Disciplinary Alternative Education Program (EL DAEP);
- Supplemental campus-based programs and services;
- Pregnancy-Related Services (PRS); and

- Districtwide Initiative: Excess Cost Model.

The evaluation of individual programs and services is summarized in the abstract that precedes each set of profiles. Four SCE programs and services were profiled. Each profile includes a program description, student demographics, budget allocations, staffing/funding, school improvement plan information, program-specific student outcomes, and an executive summary.

Methods

Data Collection

Student data were obtained using a variety of sources. In HISD, the Public Education Information Management System (PEIMS) database served as the foundation from which students were matched and information was combined with other sources of data for analysis. PEIMS is a statewide data collection and reporting system operated by the state, which includes extensive information on students, staffing, and school budget/finances and serves as the fundamental database for many statewide reports on public education, such as the Academic Excellence Indicator System (AEIS) and the new Texas Academic Performance Report (TAPR). PEIMS contains information from the “fall snapshot” of students taken on the last Friday of October each academic year. Most student demographic information and at-risk status are taken from the PEIMS October 2012 snapshot. Completion status and attendance data were also obtained from PEIMS.

Student performance on the STAAR, STAAR EOC and TAKS were extracted from their respective databases. Information for multiple years was extracted with the number of years dependent on state reporting requirements. Similarly, student performance on the Stanford 10 and Aprenda 3 were obtained from the Stanford and Aprenda databases. Only non-Special Education students in the first or second grade were included in the Stanford and Aprenda profiles.

Data Analysis

At-Risk Status

Students were identified as being at-risk if they were labeled as such in the PEIMS database. If a student was identified as at-risk in the PEIMS database, that information was then attached to the student’s scores in the STAAR, STAAR EOC, TAKS, Stanford 10, and Aprenda 3 databases. A detailed description of how students are identified as at-risk by the state and district is provided in **Appendix B** (see page 27).

Attendance Rate

Attendance rate outcomes were calculated by dividing the total number of students’ days present at the educational program or service by the students’ total number of days eligible to participate in the program or service for the 2011–2012 and the 2012–2013 school years. Attendance rates for specific programs were analyzed by matching the electronic file submitted by program personnel to the summer resubmission of the Average Daily Attendance (ADA) database. Students in all grades were included in the calculations with the exception of students with multiple impairments.

Completion Rate Indicator

The annual TAPR report provides a completion rate indicator for individual campuses and districts in the state of Texas. The formula used by the TEA was adopted for this report. The completion rate is calculated based on a cohort of students identified at ninth grade for the first time and tracked longitudinally for four years. Students are excluded from this cohort as specified in TEC §39.053. To

become a member of the cohort, a student must have attained one of the following final statuses: (i) graduated, (ii) received a GED, (iii) continued in a Texas public high school in the fall following the completion year of interest, or (iv) dropped out. All four of these calculations use the number of first-time ninth graders in the longitudinal cohort, plus transfers in, minus transfers out, which is the denominator of the rate calculations. The results presented are with exclusions applied.

For the numerator of the rate calculation, the first three of the above outcomes (high school diplomas, GEDs, and continuing students) are summed. These three indicators are then divided by the number of students in the 9th grade cohort of interest (the sum of all four outcome indicators). This is referred to as the completion indicator. Completion rates are calculated separately for at-risk and not at-risk students.

Completion rate is a lagging indicator, meaning that information is only available to report one year after the completion of the previous academic year. Thus, completion information is available only for the class of 2012 and previous academic years.

STAAR Performance

The report provides information pertaining to the proportion of at-risk and not at-risk students on the English and Spanish STAAR assessments for grades 3–8 for 2013 who met the satisfactory standard. Differences in percentages of students meeting the satisfactory standard between at-risk and not at-risk students are also reported. Student performance was reported for the overall district and at the school level. The only students whose scores were included in the analysis of school and district-level performance were those students who were present during the “fall snapshot.” That is, students who transferred into the district after that point in October were not included in these analyses.

STAAR EOC Performance

The report provides information pertaining to the proportion of at-risk and not at-risk students who met the satisfactory standard on the STAAR EOC tests for Algebra I, Geometry, Biology, Chemistry, English I Reading, English I Writing, English II Reading, English II Writing, World Geography, and World History for 2013, expressed as a percent. Differences in percentages of students meeting the satisfactory standard between at-risk and not at-risk students are also reported. Student performance was reported for the overall district and the school level. The only students whose scores were included in the analysis of school and district-level performance were those students who were present during the “fall snapshot.” That is, students who transferred into the district after that point in October were not included in these analyses.

TAKS Performance

The report provides information pertaining to the proportion of at-risk and not at-risk students passing the 11th grade TAKS for 2011, 2012, and 2013, expressed as a percent. Differences in passing rates between at-risk and not at-risk students are also reported for the past three years so that movement in reducing the disparities in passing rates can be ascertained. Student performance was reported for the overall district and at the school level. The only students whose scores were included in the analysis of school and district-level performance were those students who were present during the “fall snapshot.” That is, students who transferred into the district after that point in October were not included in these analyses.

Stanford 10/Aprenda 3 Performance

To make comparisons between at-risk and not at-risk students in first and second grades on the Stanford 10 and Aprenda 3, the percentages of students scoring at or above the 50th percentile for those two grade levels are reported for 2011, 2012, and 2013. School and district-level performance is based on first and second grade students, who were not enrolled in Special Education courses and were present during the “fall snapshot.”

Results

Demographic Characteristics: At-Risk Students

- Of the 203,354 students attending HISD at the fall snapshot for the 2012–2013 school year, 115,416 students (57 percent) were identified as being at-risk according to SCE criteria (see **Table 1**).
- The majority of students attending HISD in 2012–2013 identified themselves as Hispanic. Hispanic students accounted for the largest number of at-risk students (85,803). Students who identified themselves as African American made up the next largest group, and 22,038 were at-risk. White students made up the third most populous group where 4,205 were at-risk (see **Table 1**).
- In 2012–2013, more male (60 percent) than female (54 percent) students were identified as at-risk (see **Table 1**).
- Thirty-three percent of non-economically disadvantaged students were identified as at-risk while 63 percent of economically disadvantaged students were identified as at-risk (see **Table 1**).
- The highest percentage of students identified as at-risk were in prekindergarten with 92 percent (see **Figure 1**, page 9). This is expected since at-risk criteria are similar to prekindergarten eligibility criteria.

Table 1. Districtwide Not At Risk and At Risk Student Distribution						
Demographics	Total	Not At Risk		At Risk		
		N	%	N	% of Total	% of At-Risk
Total	203,354	87,938	43	115,416	57	100
Gender						
Female	99,533	45,974	46	53,559	54	46

Economically Disadvantaged Status						
Not Economically Disadvantaged	41,311	27,730	67	13,581	33	12
Economically Disadvantaged	162,043	60,208	37	101,835	63	88

Figure 1. Districtwide not at-risk and at-risk student distribution by grade, 2012–2013

STAAR Performance

- Overall, on the English language STAAR, the gap in the percentage of students meeting the satisfactory standard between not at-risk students and at-risk students was at least nine percentage points on all tests and at all grade levels (see page 28).
- Not at-risk students outperformed at-risk students districtwide on the English STAAR by a margin of 19 to 39 percentage points: the gap was 29 percentage points for reading, 19 percentage points for mathematics, 25 percentage points for writing, 30 percentage points for science, and 39 percentage points for social studies. Gaps decreased in all subjects from 2012 to 2013 (see **Figure 2**, page 10).
- On the Spanish language STAAR, not at-risk students performed better than at-risk students on all tests and at most grade levels. The gaps were five percentage points in reading, 16 points in mathematics, and three points in writing. Gaps decreased in all subjects from 2012 to 2013 (see **Figure 3**, page 10).

Figure 2. Districtwide English STAAR percent of students who met level II satisfactory standard for not at-risk and at-risk students, 2012–2013

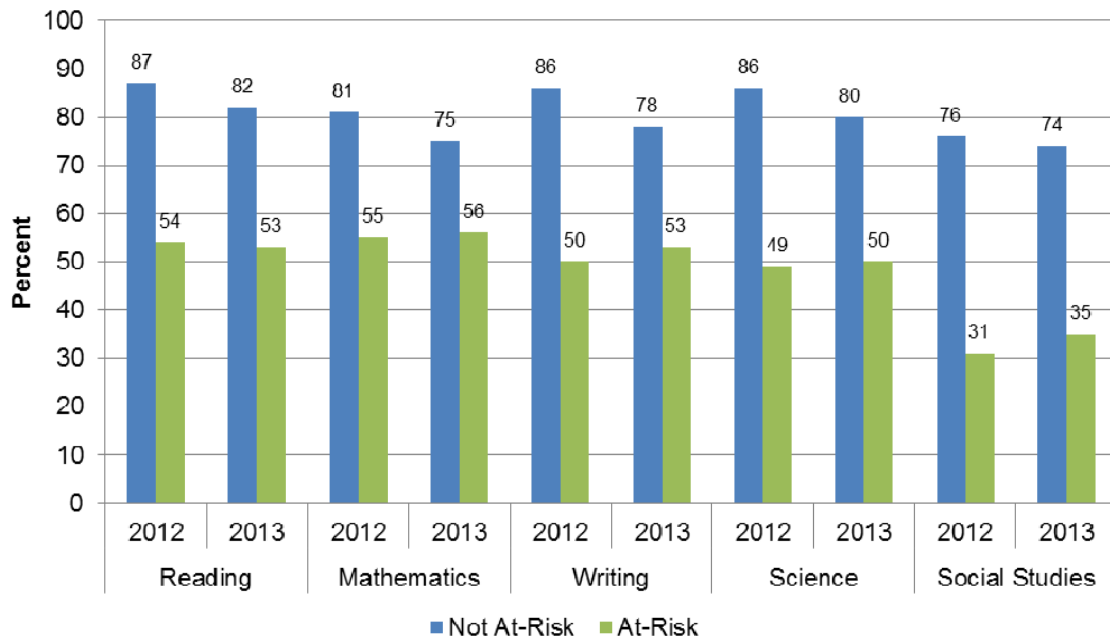

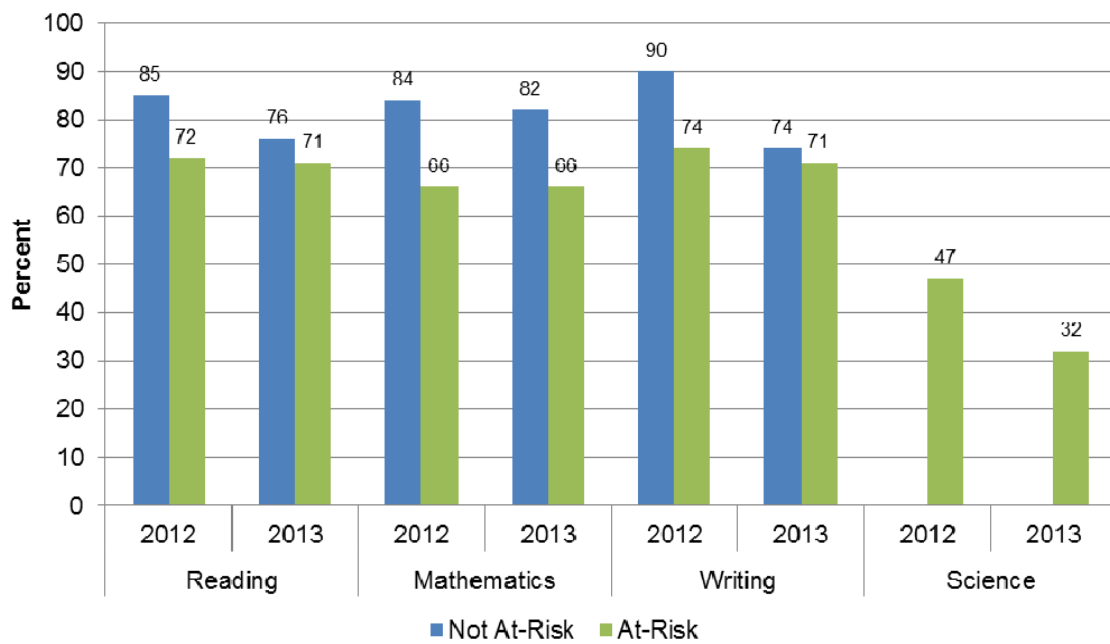

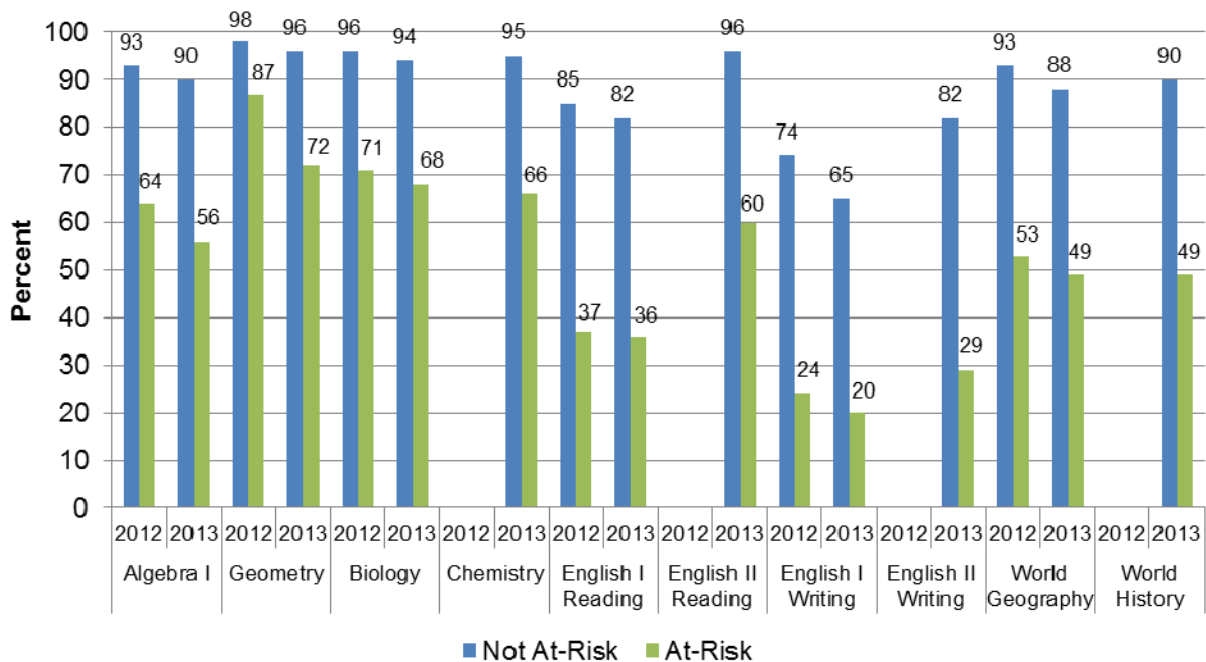

Figure 3. Spanish STAAR percent of students who met level II satisfactory standard for not at-risk and at-risk students, 2012–2013

STAAR EOC Performance

- Overall, performance on the STAAR EOCs decreased from 2012 to 2013. In 2013, the largest gap in the percent of not at-risk and at-risk students who met the satisfactory standard was 53 percentage points in English II Writing, followed by 46 percentage points in English I Reading, 45 percentage points in English I Writing, 41 percentage points in World History, 39 percentage points in World Geography, 36 percentage points in English II Reading, 34 percentage points in Algebra I, 29 percentage points in Chemistry, 26 percentage points in Biology, and 24 percentage points in Geometry. The gaps in Algebra I, Geometry, and Biology increased from 2012 to 2013 while the gaps in English I Reading, English I Writing, and World Geography decreased (see **Figure 4**).

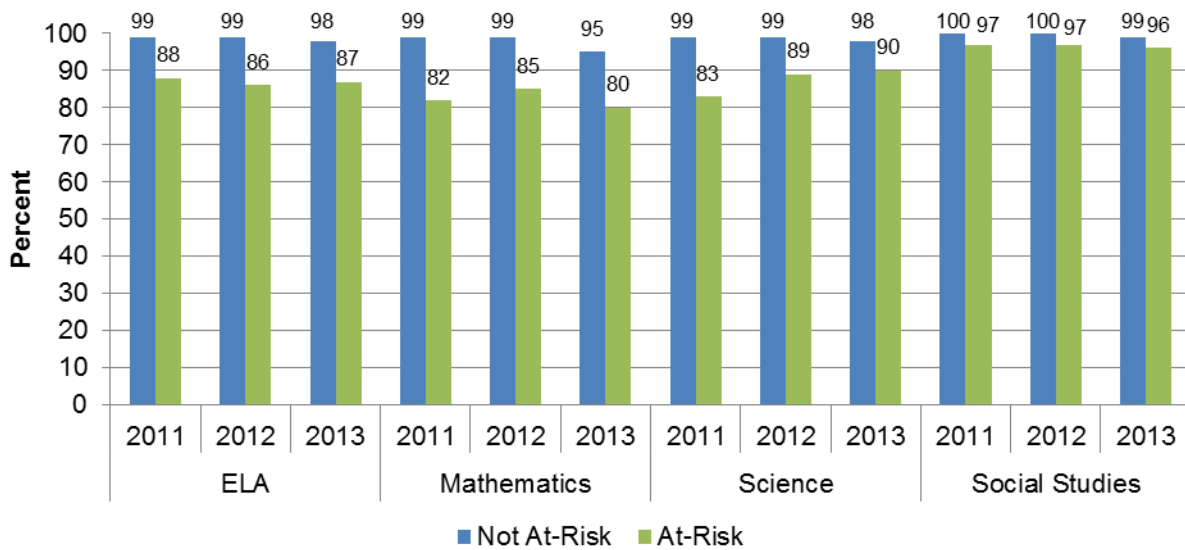

Figure 4. STAAR EOC percent of students who met level II satisfactory standard for not at-risk and at-risk students, 2012–2013

11th Grade TAKS Performance

- Districtwide in 2013, not at-risk students outperformed at-risk students in each content area by three to 15 percentage points: the gap was 11 percentage points for English/language arts, 15 percentage points for mathematics, eight percentage points for science, and three percentage points for social studies (see page 29).
- Districtwide, there were total gap reductions between at-risk and not at-risk students from 2012 to 2013 in ELA and science. The gap in mathematics increased and stayed the same in social studies (see **Figure 5**, page 12).

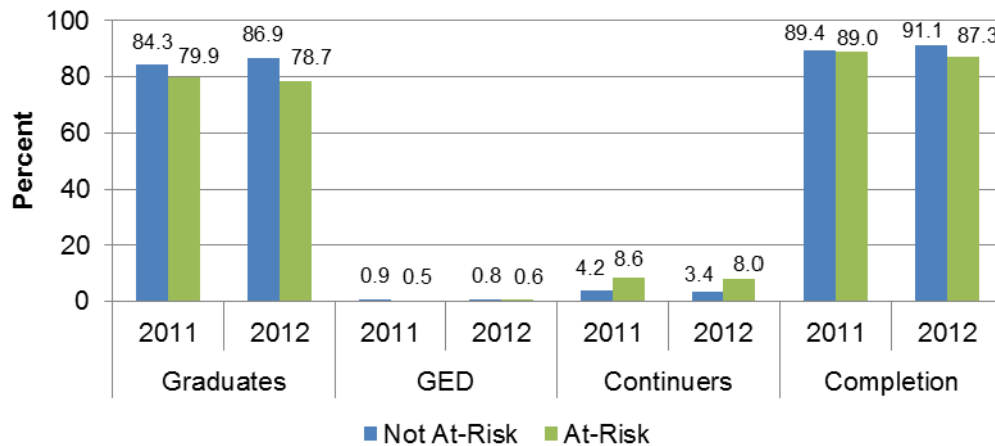

Figure 5. TAKS percent meeting standard for not at-risk and at-risk students in grade 11, 2011–2013

Completion Rates

- Overall, graduation and completion rates of not at-risk students increased from 2011 to 2012, while at-risk students' graduation and completion rates decreased from 2011 to 2012 (see page 30).
- For the Class of 2012, 86.9 percent of not at-risk students and 78.7 percent of at-risk students graduated from HISD four years after starting ninth grade (see page 29).
- The completion rate for not at-risk students was 91.1 percent and the at-risk rate was 87.3 percent (see page 29).
- The gaps in the graduation and completion rates increased from 2011 to 2012 (see **Figure 6**).

Figure 6. Districtwide completion rates for not at-risk and at-risk students in the class of 2012 and the class of 2011

Stanford 10 and Aprenda 3 Performance

- In 2013 among non-Special Education students, on the Stanford 10 in grades 1 and 2, not at-risk students outperformed at-risk students by 27–41 percentage points (see page 30).
- Districtwide, the largest gap was on the reading section of the Stanford 10 (41 percentage points), followed by the language (36 points), mathematics (30 points), and environment (27 points) sections (see **Figure 7**).
- From 2012 to 2013, the districtwide performance gap between not at-risk and at-risk students decreased in reading, mathematics, and environment while the gap stayed the same in language (see page 30).
- Districtwide performance on the 2013 Aprenda 3 among non-Special Education students in the first and second grades indicated that not at-risk students outscored at-risk students on all sections by 3–10 percentage points (see page 30).
- Districtwide, the largest gap in scores on the Aprenda 3 was on the mathematics section (10 percentage points), followed by the language (7 points), environment (6 points), and reading (3 points) sections (see **Figure 8**, page 14).
- The gap in performance on the Aprenda 3 between at-risk and not at-risk students decreased in reading and environment, increased in mathematics, and stayed the same in language from 2012 to 2013 (see page 30).

Figure 7. Percent at or above the 50th percentile on the Stanford 10 for not at-risk and at-risk students in grades 1–2, 2011–2013

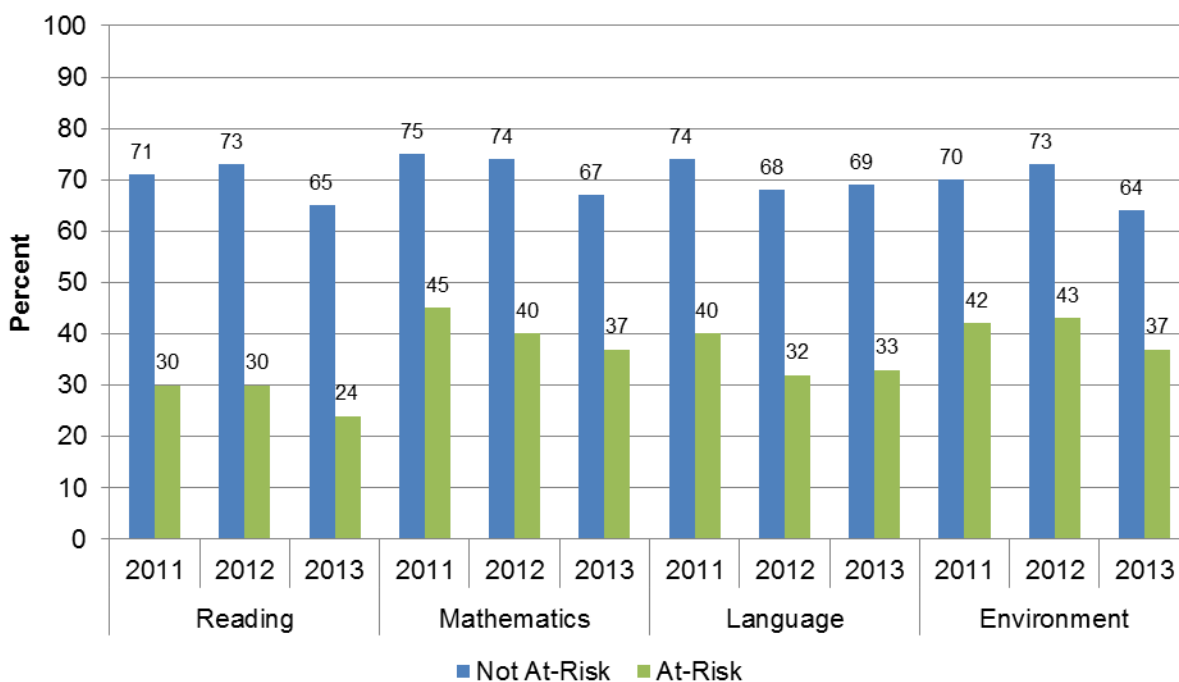

Figure 8. Percent at or above the 50th percentile on the Aprenda 3 for not at-risk and at-risk students in grades 1–2, 2011–2013

For specific SCE programs, the following findings are relevant.

- In general, the 2013 English STAAR, STAAR EOC, and TAKS results indicate that passing rates of students who received and/or participated in various SCE programs and services did not exceed the passing rates of all at-risk students in the district, with the following exception: Beechnut students on the TAKS Science, JJAEP students on the English STAAR Grade 3–8 Reading, and students who received pregnancy-related services on the STAAR Grade 3–8 Reading and EOC English I Writing (see pages 17–25).
- The Excess Cost Model was implemented to reduce class sizes through the provision of additional instructional positions. Program effectiveness was measured through attendance rates, completion rates, and TAKS performance. Districtwide attendance rates have stayed the same at 95.7 percent in 2011–2012 and 2012–2013. Graduation and completion rates decreased for at-risk students from 2011 to 2012. The overall passing rates of not at-risk students exceeded those of at-risk students on all tests of the STAAR Grade 3–8, STAAR EOC, and TAKS, and at all grade levels (see pages 24–25).

Detailed findings at the school office and campus level are presented beginning on page 28 of this report. In particular, TAKS results and completion rates are presented at the district, school office, and school levels. Results are presented for at-risk and not at-risk students by grade at all levels. The next section of the report also provides detailed information about the SCE-funded disciplinary alternative education programs and centers and pregnancy-related services.

Discussion

Overall, the findings from the State Compensatory Education Report indicated that at-risk students underperform their not at-risk counterparts in every measure so continued support for students at-risk of dropping out of school is necessary in order to improve their performance and close the achievement gap between at-risk and not at-risk students. At-risk students represent a large and important proportion of the students in HISD. Gaps in student achievement between at-risk and not at-risk students remain large. Although gap reductions from 2012 to 2013 occurred in all the English and Spanish STAAR Grade 3–8 subject tests, improvements were incremental. There were small gap reductions on the STAAR EOC English I Reading and Writing tests and World Geography tests, but gaps between at-risk and not at-risk students increased from 2012 to 2013 on the Algebra I, Geometry, and Biology tests. Similarly, graduation rates for at-risk students continue to lag behind those of not at-risk students.

HISD is implementing programs to address student achievement and graduation rates. The district continues to focus on recruiting highly qualified teachers and supporting them with on-going professional development. Additional emphasis in high school is provided to help students complete credits for graduation.

The SCE-funded programs in HISD serve students who are considered at-risk. Enrollment in each program is inconsistent and relatively short-term, making it difficult to draw conclusions and attribute any performance patterns to programs that are transient. However, that does not necessarily mean these programs are ineffective. For instance, the support provided from Pregnancy-Related Services likely prevents young women who use these services from dropping out of school, a result that would not be indicated in their test performance.

Beechnut Academy (#303)

Program Description

This program is a privately managed Disciplinary Alternative Education Program (DAEP) for middle and high school students with behavioral problems. Its primary purpose is to provide a continuum of academic and social services for students who have been removed from a regular education program for serious violations of the Code of Student Conduct. The academic goal of Beechnut Academy is to provide an academic program comparable with the program offered at the student's home school. The program utilizes individualized computer-program-assisted instruction as well as teacher-directed instruction. A student is approved and accepted into the program for a minimum of 30 days and a maximum of 180 days of successful attendance. Upon successful completion of the program, students return to their regular school settings. The expected outcomes include development of grade-appropriate academic and social skills necessary to be successful upon returning to the home school campuses.

Beechnut Academy (cont.)

Executive Summary

Beechnut Academy offered educational instruction and support services to a total of 1,844 students over the 2012–2013 school year. The majority of students were male (71 percent). The racial/ethnic composition of students consisted mostly of Hispanic (57 percent) and African American (40 percent) students. Ninety-five percent of the students served were classified as at-risk according to SCE criteria.

The budget allocation for Beechnut Academy decreased from \$12,663,344 in 2011–2012 to \$11,985,518 in 2012–2013.

Program effectiveness was measured using the attendance rate, and test performance data on the STAAR, EOC, and TAKS tests. The attendance rate increased from 76.0 percent in 2012 to 79.5 percent in 2013. Performance increased from 2012 to 2013 on the English language STAAR in every subject except writing. On the STAAR EOC, performance increased from 2012 to 2013 in Biology but decreased in Algebra I, English I Reading and Writing and World Geography. Performance from students at Beechnut Academy still lags behind that at the district level.

Based on these findings, it is recommended that the program administration continue efforts to improve the attendance rate and focus on all subject areas that are tested by identifying instructional approaches that are more effective for students with behavioral issues.

Juvenile Justice Alternate Education Program (#320)

Program Description

Juvenile Justice Alternate Education Program (JJAEP) is a program for middle and high school students who have been placed by the courts in detention and residential facilities managed by the Harris County Juvenile Probation Department. Its primary purpose is to provide a continuum of academic and transition services for middle and high school students who have been removed from a regular education program for serious criminal activity or serious misconduct.

The focus of JJAEP is to promote academic growth and behavioral skills that will allow students to transition back into school upon the completion of their sentences. Additional services such as probation-related requirements, mentoring, counseling, mental health services, substance abuse intervention, health services, and prevention-related services are available. JJAEP also provides after-school programs as well as summer school. JJAEP is funded by the Texas Juvenile Probation Commission, local school districts, and state and federal grants. The expected outcomes include development of grade-appropriate academic and social skills necessary to be successful upon returning to the home school campuses.

JJAEP (cont.)

Executive Summary

JJAEP offered educational instruction and support services to a total of 53 students during the 2012–2013 school year. The majority of students were male (89 percent), and the racial/ethnic composition of the students was mostly Hispanic (55 percent) and African American (42 percent). All of the students served were considered at-risk according to SCE criteria.

The budget allocation for JJAEP increased from \$984,270 in 2011–2012 to \$1,497,203 in 2012–2013.

Program effectiveness was measured using the attendance rate and test performance data on the STAAR, EOC, and TAKS tests. The attendance rate decreased from 87.9 percent in 2012 to 84.9 percent in 2013. Due to the small number of tests taken by students, trends in performance were not analyzed.

Based on these findings, it is recommended that the program administration continue efforts to improve the attendance rate and continue to introduce instructional strategies that reflect best practices for improving academic performance.

Elementary Disciplinary Alternative Education Program (#466)

Program Description

Elementary Disciplinary Alternative Education Program (EL DAEP) is a Disciplinary Alternative Education Program (DAEP) for elementary school students. The Texas Education Code prohibits children under the age of ten years old from being expelled so students are placed in EL DAEP. Initial placement is for fifteen days. The program's primary purpose is to provide a structured, rigorous, and individualized behavior and academic curriculum for elementary school students who have been removed from a regular education program for serious criminal activity or misconduct.

Student Demographics		Staffing/Funds	
		<u>2012–2013</u>

5	14	29	14	29			13	38			
Total	35	40	36	28	11	18	13	38	0		

Executive Summary

EL DAEP offered educational instruction and support services to a total of 44 students during the 2012–2013 school year. Ninety percent of the students were male, 60 percent were African American, 36 percent were Hispanic, and 89 percent were classified as at-risk according to SCE criteria.

The budget allocation for EL DAEP was \$491,395.

Program effectiveness was measured using the attendance rate and STAAR performance test data. Since the EL DAEP program began during the 2012–2013 school year, there are no previous data for comparison. However, the percent meeting the satisfactory standard at EL DAEP was lower at all grade levels than that at the district level.

Based on these findings, it is recommended that the program administration implement practices that will raise student performance to meet or exceed that at the overall district level.

Pregnancy-Related Services (#634)

Program Description

Pregnancy-Related Services (PRS) are support services for pregnant students to help them adjust to pregnancy and parenting, and to remain in school during the pregnancy and postpartum periods. The program is offered at all high schools and all middle schools that have referrals. Any pregnant high school student is eligible for services under the PRS Program. Services include: counseling, career guidance, school and other health-related services, transportation, referrals to external agencies, education on child development, parenting and job-readiness training, child care, case management, service coordination, and specialized counseling. Additionally, Compensatory Education Home Instruction (CEHI) is provided during the prenatal and postpartum periods. The CEHI component allows teachers to provide academic services to students at home or at the hospital, when students are unable to attend school. CEHI consists of at least four hours per week of instruction by a certified teacher.

Pregnancy-Related Services (cont.)

Executive Summary

During the 2012–2013 school year, 578 students received pregnancy-related services. The racial/ethnic composition was dominated by Hispanic students (73 percent) and African American students (25 percent). Ninety-one percent of these students were considered at-risk according to SCE criteria.

The budget allocation for this program decreased from \$868,186 in 2011–2012 to \$590,285 in 2012–2013.

Program effectiveness was measured with test performance data on the STAAR, EOC, and TAKS. English language STAAR performance increased from 2012 to 2013 in reading and math but decreased in science and social studies. EOC performance increased in all subject areas that were tested in 2012 and 2013. However, performance on these tests for students receiving pregnancy-related services still lags behind that at the district level.

Based on these results, program administrators should continue to implement best instructional practices for improving academic performance.

Excess Cost Model (#999)

Program Description

HISD used SCE funds to help supplement the regular educational program by reducing class sizes. District recommended student to teacher ratios are as follows:

- Grades PK-4 22:1 (State Requirement)
- Grade 5 26:1
- Grades 6-8 28:1
- Grades 9-12 30:1

The district determines the appropriate level of funding for each campus based on the following formulae:
Elementary Campuses

Number of students by grade level ÷ recommended class size = standard number of teachers required.

Secondary Campuses

[Total number of students in a subject area ÷ recommended class size] ÷ standard number of classes (6) = standard number of teachers required.

The standard number of teachers required is compared to the actual number of teachers for that subject area. The value in excess of the standard requirement is considered excess cost and coded accordingly to the appropriate IA code.

*Source: PEIMS ADA Resubmission

Executive Summary

As part of a districtwide initiative, the Excess Cost Model was implemented in order to reduce class sizes below the district's class-size guidelines by providing additional instructional positions. For the 2012–2013 school year, a total of 203,354 students were served. The budget allocation for the 2012–2013 school year was \$42,944,670. In 2012–2013, the racial/ethnic composition for the district consisted of 25 percent African American, four percent Asian/Pacific Islander, 63 percent Hispanic, less than one percent Native American, and eight percent White students. Regarding gender, 51 percent of the students were male and 49 percent were female. Districtwide, 57 percent of students were identified as at risk.

Program effectiveness was measured using the following outcome indicators: attendance rates, completion rates, STAAR, STAAR EOC, and TAKS performance. Attendance rates and completion rates were collected over a two-year period so that the presence or absence of progress on these indicators could be ascertained. TAKS data were collected for a three-year period. As shown on the outcomes portion of this page, the districtwide attendance rate remained at 95.7 percent from 2011–2012 to 2012–2013.

Analysis of districtwide results reveal that, overall, the performance of not at-risk students exceeded those of at-risk students on all tests of the STAAR, STAAR EOC, and TAKS, Stanford, and Aprenda in 2013 and at all grade levels. The performance gap on the STAAR exam between at-risk and not at-risk students was the highest in social studies (39 percentage points), followed by science (30 points), reading (29 points), writing (25 points), and mathematics (19 points). Although the gaps decreased in all subjects from 2011–2012 to 2012–2013, there is still much room for improvement.

On most subjects of the 2013 STAAR EOC exams, the gap in performance between at-risk and not at-risk students was quite large. Performance was lower in 2013 for all students in Algebra I, Geometry, Biology, English I Reading and Writing, English II Writing, and World Geography. In addition to these subject areas, the 2013 performance gaps in Algebra I, English I Reading and Writing, English II Reading and Writing, World Geography, and World History were especially large (greater than 30 percentage points).

In general, there has been no significant improvement in TAKS performance over the last three years. The gap in performance between at-risk and not at-risk students in mathematics is consistently larger than the gaps in other subjects. Programs focusing on the performance of at-risk students in mathematics would likely prove beneficial.

While the graduation and completion rates for not at-risk students increased from 2011 to 2012, the rates decreased for at-risk students. Academic intervention for at-risk students must begin early in order to put them on track for graduation.

Based upon these findings, it is recommended that the district's and schools' administrative staffs focus on instructional strategies to increase student achievement for at-risk students in all subject areas.

APPENDIX A

Funding Source

The money allocated by the state for compensatory education programs and/or services was based on the number of economically disadvantaged students in the district. The number of economically disadvantaged students is determined by averaging the best six months of enrollment for those who qualify in the national school lunch program for free- or reduced-price lunches for the preceding school year. Districts are entitled to receive an additional annual allotment equal to the adjusted basic allotment, multiplied by 0.2, for each student who is economically disadvantaged and who does not have a disability. Students must reside in a residential placement facility in a district in which their parent or legal guardian does not reside. Districts are also entitled to receive an annual allotment equal to the adjusted basic allotment, multiplied by 2.41, for each full-time equivalent student in a remedial and support program because the student is pregnant or a parent (TEC §29.081).

APPENDIX B

CRITERIA FOR IDENTIFYING AT-RISK STUDENTS

State Criteria

TEC §29.081 defines a student at-risk of dropping out of school as each student who is under 21 years of age and who:

1. Was not advanced from one grade level to the next for one or more school years;
2. Is in grades 7, 8, 9, 10, 11, or 12 and did not maintain an average equivalent to 70 on a scale of 100 in two or more subjects in the foundation curriculum during a semester in the preceding or current school year or is not maintaining such an average in two or more subjects in the foundation curriculum in the current semester;
3. Did not perform satisfactorily on an assessment instrument administered to the student under TEC Subchapter B, Chapter 39, and who has not in the previous or current school year subsequently performed on that instrument or another appropriate instrument at a level equal to at least 110 percent of the level of satisfactory performance on that instrument;
4. Is in pre-kindergarten, kindergarten, or grades 1, 2, or 3, and did not perform satisfactorily on a readiness test or assessment instrument administered during the current school year;
5. Is pregnant or is a parent;
6. Has been placed in an alternative education program in accordance with TEC §37.006 during the preceding or current school year;
7. Has been expelled in accordance with TEC §37.007 during the preceding or current school year;
8. Is currently on parole, probation, deferred prosecution, or other conditional release;
9. Was previously reported through the Public Education Information Management System (PEIMS) to have dropped out of school;
10. Is a student of limited English proficiency, as defined by TEC §29.052;
11. Is in the custody or care of the Department of Protective and Regulatory Services or has, during the current school year, been referred to the department by a school official, officer of the juvenile court, or law enforcement official;
12. Is homeless, as defined by 42 U.S.C. Section 11302, and its subsequent amendments; or
13. Resided in the preceding school year, or resides in the current school year, in a residential placement facility in the district, including a detention facility, substance abuse treatment facility, emergency shelter, psychiatric hospital, halfway house, or foster family group home.

Local Criteria

In addition to the 13 state criteria outlined in TEC §29.081 for identifying students who are at-risk of dropping out of school, there is a provision that allows the board of trustees of a school district to adopt local eligibility criteria (TEC §29.081(g)). The following local criteria also identify students who are at-risk for dropping out of school:

1. Students who are identified as dyslexic under general education; or
2. Students who are placed into a Disciplinary Alternative Education Program for reasons other than those in TEC §37.006, such as continued misbehavior in the classroom.
