

MEMORANDUM

May 25, 2016

TO: Annvi S. Utter
Officer, Student Support Services

FROM: Carla Stevens
Assistant Superintendent, Research and Accountability

SUBJECT: **An Evaluation of State Compensatory Education**

Attached is the State Compensatory Education report for the 2014–2015 school year. The State Compensatory Education Program (SCE) program is designed to reduce dropout rates and increase academic performance of students identified as being at-risk of dropping out of school. SCE operates as a funding source to supplement instructional services and offer academic support to students who meet the SCE at-risk criteria established by the state. Funds allocated under SCE law are to be channeled toward programs and services that eliminate disparities in performance on assessment instruments administered under Subchapter B, Chapter 39.

Key findings include:

- Of the 215,225 students attending HISD, 71.5 percent were identified as being at-risk according to SCE criteria.
- On the 2015 STAAR 3–8 English-language assessments, the gap in the percent of not-at-risk and at-risk students who met or exceeded the level II satisfactory standard was 32 percentage points in reading, 28 percentage points in mathematics, 35 percentage points in writing, 38 percentage points in science, and 38 percentage points in social studies.
- On the 2015 STAAR End-of-Course exams, the gap in the percent of not-at-risk and at-risk students who met or exceeded the level II satisfactory standard ranged from 15 percentage points in U.S. History to 40 percentage points in English II.
- The four-year longitudinal graduation rate for not-at-risk students in the class of 2014 saw slight improvement over the previous graduating cohort, moving from 89.9 to 91.9 percent. The corresponding rate for at-risk students in the class of 2014 decreased over the previous graduating cohort, dropping from 74.5 to 69.7 percent.

Further distribution of this report is at your discretion. Should you have any further questions, please contact me at 713-556-6700.

AN EVALUATION OF STATE COMPENSATORY EDUCATION 2014–2015

Executive Summary

Program Description

The State Compensatory Education (SCE) program is designed to reduce dropout rates and increase academic performance of students identified as being at-risk of dropping out of school. SCE operates as a funding source to supplement instructional services and offer academic support to students who meet the SCE at-risk criteria established by the state. Funds allocated under SCE law are to be channeled toward programs and services that eliminate disparities in performance on assessment instruments administered under Subchapter B, Chapter 39. Further, programs designated for SCE funding should reduce disparities in the rates of high school completion between students who are at-risk of dropping out of school and all other students. The Iowa Test of Basic Skills (ITBS) and Logramos Third Edition (formerly Stanford Tenth Edition and Aprenda Third Edition) served as the assessment measures for grades 1 and 2, the State of Texas Assessments of Academic Readiness (STAAR) served as the state assessment measures for grades 3 through 8, STAAR End-of-Course (EOC) served as the state assessment measures for grades 9 through 11 for the 2014–2015 school year. In order for SCE funds to be allocated to a campus, the campus must not only meet the state criteria for percent of students at-risk of dropping out of school, but the services provided to students must also be described in the district and/or campus improvement plan.

As defined by law, SCE programs and/or services are designed to supplement the regular education program that districts offer to students and funds must provide additional support for at-risk students. Supplemental costs include costs for program and student evaluation, instructional materials and equipment and other supplies required for quality instruction, supplemental staff expenses, salary for teachers of at-risk students, smaller class sizes, and individualized instruction (TEC §42.152(c)).

Program Cost and Funding Source

The annual budget for SCE programs in HISD for the 2014–2015 academic year was \$120,359,164. This figure included \$49,795,547 of supplemental campus-based funds. These amounts are budgeted amounts and not final expenditures for 2014–2015. Final expenditures as of June 2015 may be obtained from HISD's Budgeting and Financial Planning Department.

Highlights

- Of the 215,225 students attending HISD, 153,946 students (72 percent) were identified as being at-risk according to SCE criteria. More males than females were identified as at-risk (74 percent vs. 69 percent, respectively).
- The ethnic composition of at-risk students was 68 percent Hispanic, followed by 25 percent African American, four percent white, two percent Asian/Pacific Islander, and less than one percent American Indian or two or more races. Eighty-three (83) percent of at-risk students were economically disadvantaged.

- Districtwide, on the 2015 English language STAAR, the gaps in the percentage of students meeting the satisfactory standard between not-at-risk and at-risk students were 32 percentage points in reading, 28 percentage points in mathematics, 35 percentage points in writing, 38 percentage points in science, and 38 percentage points in social studies. The gaps decreased in all subjects from 2014 to 2015, reversing the increase in gaps in all subjects that occurred from 2013 to 2014.
- Districtwide, on the 2015 STAAR EOC, the gaps in the percent of not-at-risk and at-risk students who met the satisfactory standard ranged from 15 percentage points in U.S. History to 40 percentage points in English II. The gaps in performance between not-at-risk and at-risk high school students decreased in all subjects except U.S. History from 2014 to 2015. The gap in U.S. History performance remained flat.
- For the class of 2014, 91.9 percent of not-at-risk students and 69.7 percent of at-risk students graduated from HISD. The completion rate (which includes graduates, continuers, and GED recipients) for not-at-risk students was 94.2 percent and the at-risk rate was 83.1 percent. The gaps between the two classes increased from 2013 to 2014 for both graduation and completion rates.
- When comparing gaps in the percentage of students scoring at or above the 50th percentile on the Iowa Test of Basic Skills (ITBS) between at-risk and not-at-risk students in the first and second grades districtwide, not-at-risk students outperformed at-risk students by anywhere from 39 to 55 percentage points, depending on the subtest considered. Districtwide, the largest gap was on the English Language Arts (ELA) Total section (55 percentage points).
- Districtwide performance on the Logramos Third Edition, administered to Spanish-speaking students in the first and second grades, indicated that not-at-risk students outperformed their at-risk peers on all sections by anywhere from three to nine percentage points. Districtwide, the largest gap in the percentage of students scoring at or above the 50th percentile on the Logramos Third Edition was on the Language section (nine percentage points).
- In general, the 2015 English STAAR and STAAR EOC results indicated that passing rates of students who received and/or participated in various SCE programs and services did not meet or exceed the passing rates of all at-risk students in the district.

Recommendations

1. STAAR English and STAAR EOC performance improved from 2013–2014 to 2014–2015 for all students (not-at-risk and at-risk) in most grades in most subjects. Elementary, middle, and high school leadership should continue to work hard to not only maintain these gains, but to build upon them to as great an extent as possible using proven methods that lead to the closing achievement gap.
2. The completion rate for not-at-risk students increased from the class of 2013 to the class of 2014, while the at-risk completion rate decreased, thus furthering the gap between the two groups of students. As was suggested in last year's report, high schools need to investigate the divergence in academic attainment between not-at-risk and at-risk students.
3. While the district continues to administer the state-mandated criterion-referenced assessments (i.e., the STAAR), such tests are limited in their utility for policy-related decision-making. Knowledge of whether students are meeting standards set by the state should be accompanied by information gleaned from the administration of norm-referenced tests, which shows families in the district where their children perform relative to their same-aged peers in a national sample. It is recommended that the district consider adopting an exam similar to the Stanford Tenth Edition and Iowa Test of Basic Skills (and their Spanish-language counterparts).

Introduction

Program Description

The State Compensatory Education (SCE) program is designed to reduce dropout rates and increase academic performance of students identified as being at-risk of dropping out of school. SCE operates as a funding source to supplement instructional services and offer academic support to students who meet the SCE at-risk criteria established by the state. Funds allocated under SCE law are to be channeled toward programs and services that eliminate disparities in performance on assessment instruments administered under Subchapter B, Chapter 39. Further, programs designated for SCE funding should reduce disparities in the rates of high school completion between students who are at-risk of dropping out of school and all other students. In order for SCE funds to be allocated to a campus, the campus must not only meet the state criteria for percent of students at-risk of dropping out of school, but the services provided to students must also be described in the district and/or campus improvement plan.

As defined by law, SCE programs and/or services are designed to supplement the regular education program that districts offer to students and funds must provide additional support for at-risk students. Supplemental costs include costs for program and student evaluation, instructional materials and equipment and other supplies required for quality instruction, supplemental staff expenses, salary for teachers of at-risk students, smaller class sizes, and individualized instruction (TEC §42.152(c)).

For the 2014–2015 academic year, the Iowa Test of Basic Skills (ITBS) and Logramos Third Edition, tests normed to a national reference, served as the assessment measures for grades 1 and 2 (in previous years the district utilized the Stanford Tenth Edition and Aprenda Third Edition norm-referenced tests for students in grades 1 and 2), the State of Texas Assessments of Academic Readiness (STAAR) served as the state assessment measures for grades 3 through 8, and the State of Texas Assessments of Academic Readiness for End-of-Course (STAAR EOC) served as the state assessment measures for grades 9 through 11.

Program History

Since the early 1960s, federal, state, and local governmental agencies have demonstrated concern regarding the provision of equitable and appropriate learning opportunities for economically disadvantaged youth served in public educational institutions. The growing number of disadvantaged students, particularly in large, urban school districts, helped fuel the compensatory education movement. The underlying assumption was that many students were at an educational disadvantage because of circumstances associated with their minority and/or socioeconomic status, which ultimately contributed to their lowered academic achievement. Supporters of the movement maintained that these students should be provided extra assistance to “compensate” for those disadvantages (Rossi and Montgomery, 1994).

In 1975, Texas joined the compensatory education movement by enacting the first of a series of legal and administrative guidelines, which, in amended form, shaped compensatory education programs in Texas. The Texas legislature has since amended compensatory education law and guidelines several times, in 1997, 2001, 2003, 2009, and 2014 (A more detailed history of recent legislative changes is provided in **Appendix A** [see page 26]). The ultimate aim of compensatory education funding in the state of Texas is to forestall the increased likelihood of school noncompletion of students deemed at-risk of dropping out of school as defined under Section 29.081 of the Texas Education Code. Examples of such students include, but are not limited to, those from socioeconomically disadvantaged backgrounds, students who experience removal from normal instruction as a consequence of behavioral infractions, and teenaged expectant mothers.

Program Cost and Funding Source

The annual budget for SCE programs in HISD for the 2014–2015 academic year was \$120,359,164. This figure included \$49,795,547 of supplemental campus-based funds. These amounts are budgeted amounts and not final expenditures for 2014–2015. The money allocated for state-funded compensatory education programs and/or services was based on the number of economically disadvantaged students in the district. A detailed description is provided in **Appendix B** (see page 27). Final expenditures as of June 2015 may be obtained from HISD's Budgeting and Financial Planning Department.

Purpose of the Evaluation Report

The purpose of this report is to describe and evaluate the SCE-funded programs in HISD as required by law. The district must evaluate and document the effectiveness of instructional programs in reducing any disparities in performance on the ITBS, Logramos, STAAR, and STAAR EOC and disparities in the rates of high school completion between students at-risk of dropping out of school and all other district students. This evaluation compares at-risk students' performance on the ITBS, Logramos, STAAR, and STAAR EOC with the performance of their not-at-risk counterparts. As required by the TEA (2004), differences in passing rates between at-risk and not-at-risk students are reported for the past three years when data are available so that movement in reducing the disparity in passing rates can be ascertained. In compliance with guidelines specified by the TEA (2010), high school completion rates are reported for at-risk and not-at-risk students attending HISD.

Additionally, the district must evaluate and document the effectiveness of instructional programs in reducing any disparities in performance on the ITBS, Logramos, STAAR, and STAAR EOC and disparities in the rates of high school completion between students at-risk of dropping out of school and all other district students. These evaluations are required annually. SCE resources must be redirected when evaluations indicate that programs and/or services are unsuccessful in producing desired results for students at-risk of dropping out of school (TEA, 2010).

Finally, this evaluation provides a profile of the SCE programs and services offered to at-risk students in HISD during the 2014–2015 school year. For the purpose of this report, programs and services were grouped according to the following programmatic categories:

- Disciplinary Alternative Education Programs (DAEP): Beechnut School, Juvenile Justice Alternative Education Program (JJAEP), and Elementary Disciplinary Alternative Education Program (EL DAEP);
- Supplemental campus-based programs and services;
- Pregnancy-Related Services (PRS); and
- Districtwide Initiative: Excess Cost Model.

The evaluation of individual programs and services is summarized in the abstract that precedes each set of profiles. Four SCE programs and services were profiled. Each profile includes a program description, student demographics, budget allocations, staffing/funding, school improvement plan information, program-specific student outcomes, and an executive summary.

Methods

Data Collection

Student data were obtained using a variety of sources. In HISD, the Public Education Information Management System (PEIMS) database served as the foundation from which students were matched and information was combined with other sources of data for analysis. PEIMS contains information from the “fall snapshot” of students taken on the last Friday of October each academic year. Most student demographic information and at-risk status are taken from the PEIMS October 2014 snapshot. Completion status and attendance data were also obtained from PEIMS.

Student performance on the STAAR and STAAR EOC were extracted from their respective databases. Information for multiple years was extracted with the number of years dependent on state reporting requirements. Similarly, student performance on the Iowa Test of Basic Skills (ITBS) and Logramos Third Edition were obtained from those respective databases. Only non-Special Education students in the first or second grade were included in the ITBS and Logramos profiles.

Data Analysis

Students were identified as being at-risk if they were labeled as such in the PEIMS database. A detailed description of how students are identified as at-risk by the state and district is provided in **Appendix C** (see page 28).

Attendance rate outcomes were calculated by dividing the total number of students’ days present at the educational program or service by the students’ total number of days eligible to participate in the program or service for the 2013–2014 and the 2014–2015 school years. Attendance rates for specific programs were analyzed by matching the electronic file submitted by program personnel to the summer resubmission of the Average Daily Attendance (ADA) database. Students in all grades were included in the calculations with the exception of students with multiple impairments.

The annual TAPR report provides a completion rate indicator for individual campuses and districts in the state of Texas. The formula used by the TEA was adopted for this report. The completion rate is calculated based on a cohort of students identified at ninth grade for the first time and tracked longitudinally for four years. Students are excluded from this cohort as specified in TEC §39.053. To become a member of the cohort, a student must have attained one of the following final statuses: (i) graduated, (ii) received a GED, (iii) continued in a Texas public high school in the fall following the completion year of interest, or (iv) dropped out. All four of these calculations use the number of first-time ninth graders in the longitudinal cohort, plus transfers in, minus transfers out, which is the denominator of the rate calculations. The results presented are with exclusions applied.

For the numerator of the rate calculation, the first three of the above outcomes (high school diplomas, GEDs, and continuing students) are summed. These three indicators are then divided by the number of students in the 9th grade cohort of interest (the sum of all four outcome indicators). This is referred to as the completion indicator. Completion rates are calculated separately for at-risk and not-at-risk students.

Completion rate is a lagging indicator, meaning that information is only available to report one year after the completion of the previous academic year. Thus, completion information is available only for the class of 2013 and previous academic years.

The report provides information pertaining to the proportion of at-risk and not-at-risk students on the English and Spanish STAAR assessments for grades 3–8 for 2014 who met the satisfactory standard at the current phase-in 1 standard. Differences in percentages of students meeting the satisfactory standard between at-risk and not-at-risk students are also reported. Student performance was reported for the overall district and at the school level. The only students whose scores were included in the analysis of

school and district-level performance were those students who were present during the “fall snapshot.” That is, students who transferred into the district after that point in October were not included in these analyses.

The report provides information pertaining to the proportion of at-risk and not-at-risk students who met the satisfactory phase-in 1 standard on the STAAR EOC tests for Algebra, Biology, English I, English II, and US History for 2015, expressed as a percent. Differences in percentages of students meeting the satisfactory standard between at-risk and not-at-risk students are also reported. Student performance was reported for the overall district and the school level. The only students whose scores were included in the analysis of school and district-level performance were first-time test takers and those students who were present during the “fall snapshot.” That is, students who transferred into the district after that point in October were not included in these analyses.

To make comparisons between at-risk and not-at-risk students in first and second grades, this report details the percentage of students scoring at or above the 50th percentile on the ITBS or Logramos assessments for 2015. Since both tests were first administered during the 2014–2015 academic year, percentages are also presented for first and second grade students scoring at or above the 50th percentile on the previously used norm-referenced tests, i.e., the Stanford Tenth Edition and the Aprenda Third Edition, for 2013 and 2014. Assessments on the Stanford and Aprenda include reading, mathematics, language, and environment. Assessments on the ITBS and Logramos include English Language Arts (or Language Arts for Spanish-speaking pupils), mathematics, language, and science. The ITBS and Logramos language test is a subset of the ELA/LA test. School and district-level performance is based on first and second grade students who were not enrolled in Special Education courses and who were present during the PEIMS fall snapshot.

Data Limitations

By relying on PEIMS for student enrollment information, it is possible that students served by SCE programs after the snapshot are not counted in the analysis. High student mobility into and out of SCE-funded programs that are not on the traditional educational campus (such as Disciplinary Alternative Education Centers), make it difficult to accurately count the number of students served on these campuses, rendering some counts under-representations of the number of students served. Whenever possible, alternative campuses and programs provided information on the total number of students served, and PEIMS was only used in instances where total enrollment information was not available.

Because the district moved from administering the Stanford Tenth Edition and Aprenda Third Edition tests to administering the ITBS and Logramos Third Edition tests in the 2014–2015 academic year, there is no prior year comparison on a nationally normed exam for students in the first and second grades.

Results

Demographic Characteristics: At-Risk Students

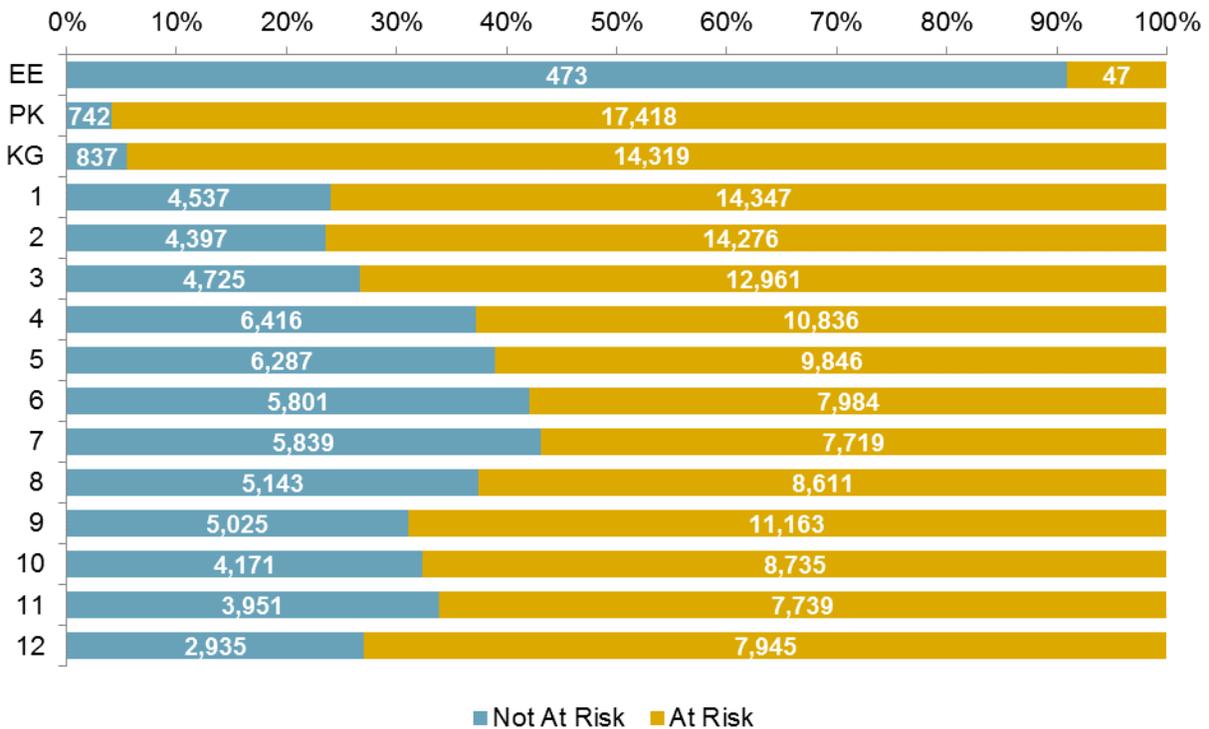

- Of the 215,225 students attending HISD at the fall snapshot for the 2014–2015 school year, 153,946 students (71.5 percent) were identified as being at-risk according to SCE criteria (see **Table 1**).
- In 2014–2015, a larger proportion of males than females (74 and 69 percent, respectively) were identified as at-risk (see Table 1).
- Hispanic students accounted for the largest total number of at-risk students (105,240) and constituted about 68 percent of all at-risk students. African Americans made up the next largest group of at-risk students at 37,778, or about 25 percent of all at-risk students. Whites accounted for only 6,386 of the total at-risk students in the district, or just over four percent (see Table 1).
- While only about half of those who were categorized as not-economically disadvantaged were identified as at-risk, about four-fifths of those categorized as economically disadvantaged were identified as at-risk (see Table 1).
- Relative to students in other grades, a higher proportion (19 out of 20, or about 96%) of pre-kindergarteners were identified as at-risk (see **Figure 1**, page 9). This is expected since at-risk criteria are similar to prekindergarten eligibility criteria.

Table 1. Districtwide Not At-Risk and At-Risk Student Distribution, 2014-2015

Demographic Characteristic	Total	Not At-Risk			At-Risk		
		N	% of Row Total	% of Not At-Risk	N	% of Row Total	% of At-Risk

Figure 1. Districtwide not-at-risk and at-risk student distribution by grade, 2014–2015 academic year

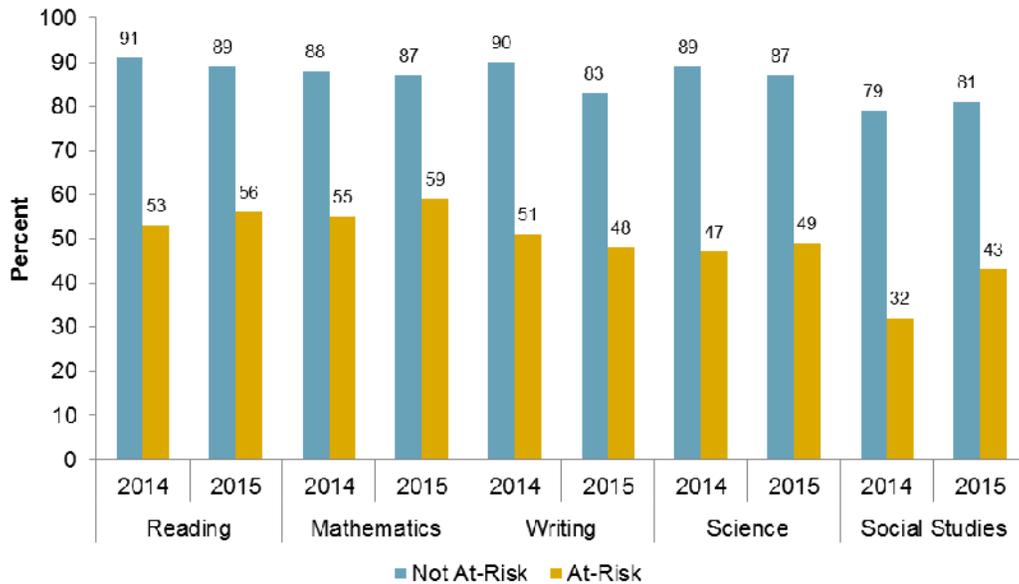

Source: PEIMS 2014–2015 fall snapshot.

STAAR Performance Grades 3–8

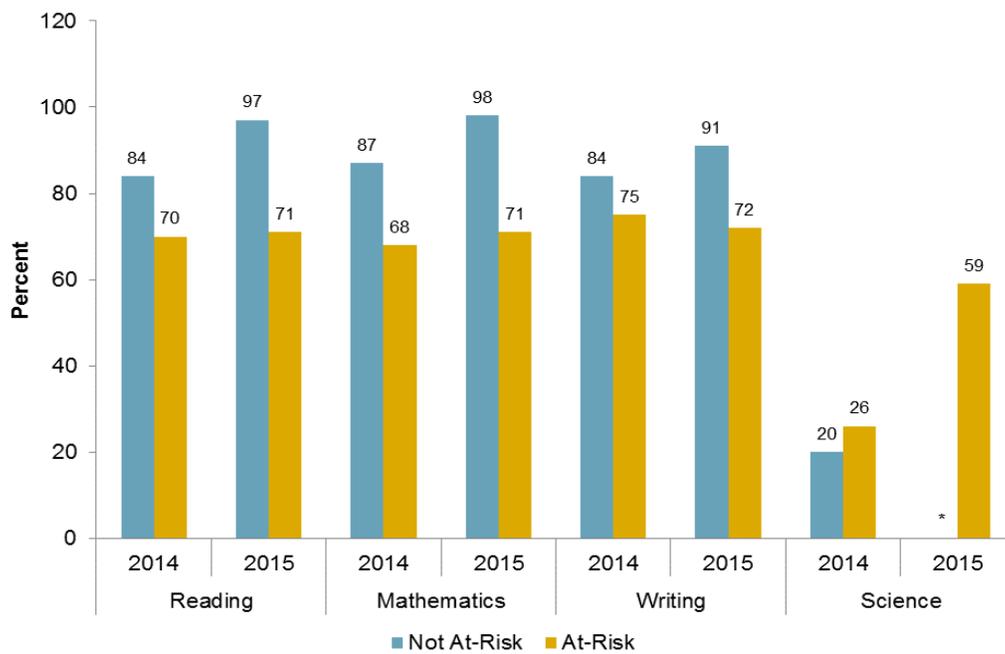

- Overall, on the English language STAAR, the gap in the percentage of students meeting the satisfactory standard between not-at-risk students and at-risk students was at least 24 but no more than 39 points on all tests and at all grade levels (see page 29). The range for the previous year was 24 to 48.
- Taking all grades combined, not-at-risk students outperformed at-risk students on each subtest of the English language STAAR: the gap was 32 percentage points for reading, 28 percentage points for mathematics, 35 percentage points for writing, 38 percentage points for science, and 38 percentage points for social studies.
- Gaps decreased in all subjects from the 2013–2014 to the 2014–2015 academic years (see **Figure 2**, page 9).
- On the 2015 Spanish language STAAR, not-at-risk students performed better than at-risk students on all subtests at all grade levels. The gap was 26 percentage points in reading, 27 percentage points in mathematics, and 19 percentage points in writing.
- Gaps increased in all subjects from the 2013–2014 to the 2014–2015 academic years (see **Figure 3**, page 9).

Figure 2. Districtwide English STAAR percent of students who met level II satisfactory phase-in I standard for not-at-risk and at-risk students, 2014–2015 academic year

Source: 2014–2015 STAAR 3–8 English-language data file, accountability subset of students.

Figure 3. Districtwide Spanish STAAR percent of students who met level II satisfactory phase-in I standard for not-at-risk and at-risk students, 2014–2015 academic year

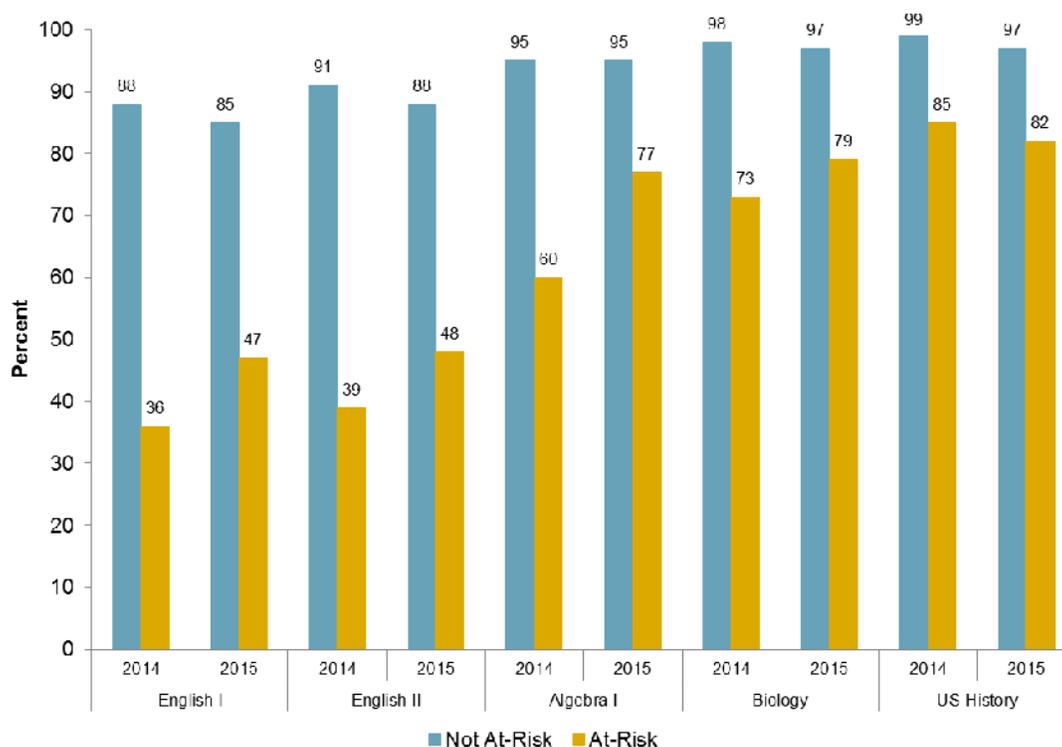

Source: 2014–2015 STAAR 3–8 Spanish-language data file, accountability subset of students. *N < 5, Results not reported for fewer than five students.

STAAR EOC Performance

- In 2015, the difference between at-risk and not-at-risk students who met the phase-in I satisfactory standard was 38 percentage points on the English I test, 40 percentage points on the English II test, 18 percentage points on the Algebra I test, 18 percentage points on the Biology test, and 15 percentage points on the U.S. History test (see page 30).
- The gap in performance between not-at-risk and at-risk students on the English I, English II, Algebra I, and Biology tests between not-at-risk and at-risk students decreased 15, 12, 17, and 7 percentage points, respectively, from the 2013–2014 to the 2014–2015 academic years while the gap in performance between not-at-risk and at-risk students on the U.S. History test increased by one percentage point over the same period (see **Figure 4**).

Figure 4. STAAR EOC percent of students who met level II satisfactory standard for not-at-risk and at-risk students, 2013–2014 and 2014–2015 academic years

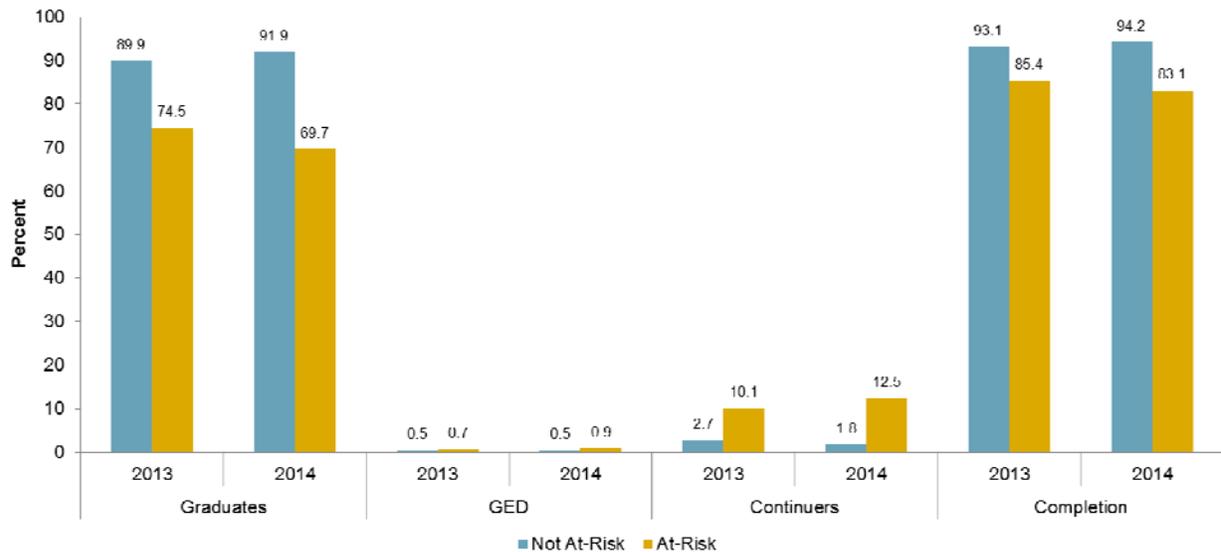

Source: 2014–2015 STAAR End-of-Course data file, accountability subset of students. Includes first-time testers.

Completion Rates

- Graduation and completion rates increased among not-at-risk students and decreased among at-risk students from 2012–2013 to 2013–2014 (see page 30).
- For the class of 2014, 91.9 percent of not-at-risk students and 69.7 percent of at-risk students graduated from HISD within four years of starting ninth grade (see page 30). The corresponding 2013 numbers were 89.9 percent and 74.5 percent for not-at-risk and at-risk students, respectively.

- For the class of 2014, 94.2 percent of not-at-risk students and 83.1 percent of at-risk students were completers of one type or another (see page 31). The corresponding 2013 numbers were 93.1 percent and 85.4 percent for not-at-risk and at-risk students, respectively.
- A greater percentage of at-risk than not-at-risk class of 2014 students were GED recipients (0.9% vs. 0.5%) and continuers (12.5% vs. 1.8%); see **Figure 5**).

Figure 5. Districtwide completion rates for not-at-risk and at-risk students in the classes of 2013 and 2014

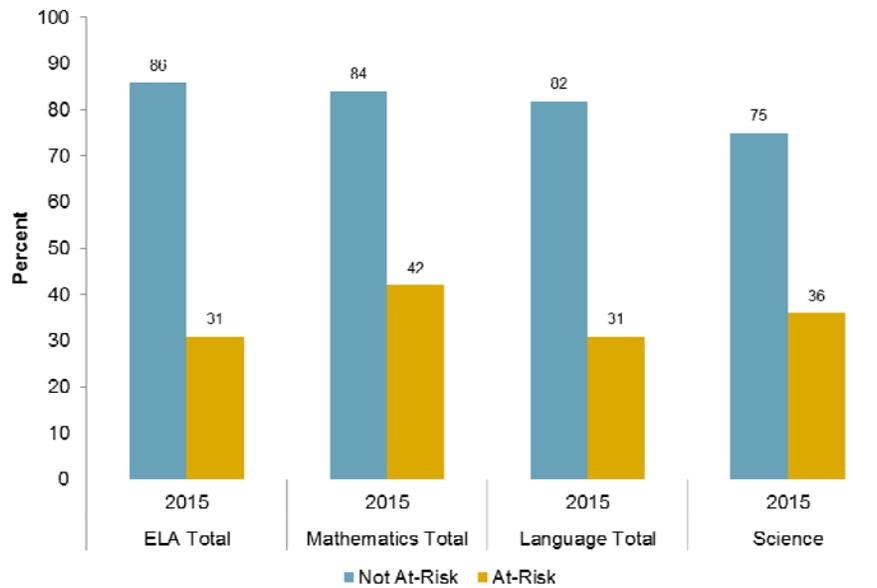

Source: 2013–2014 Texas Education Agency (TEA) 4-year longitudinal graduation data file.

Iowa Test of Basic Skills (ITBS) and Logramos Third Edition Performance

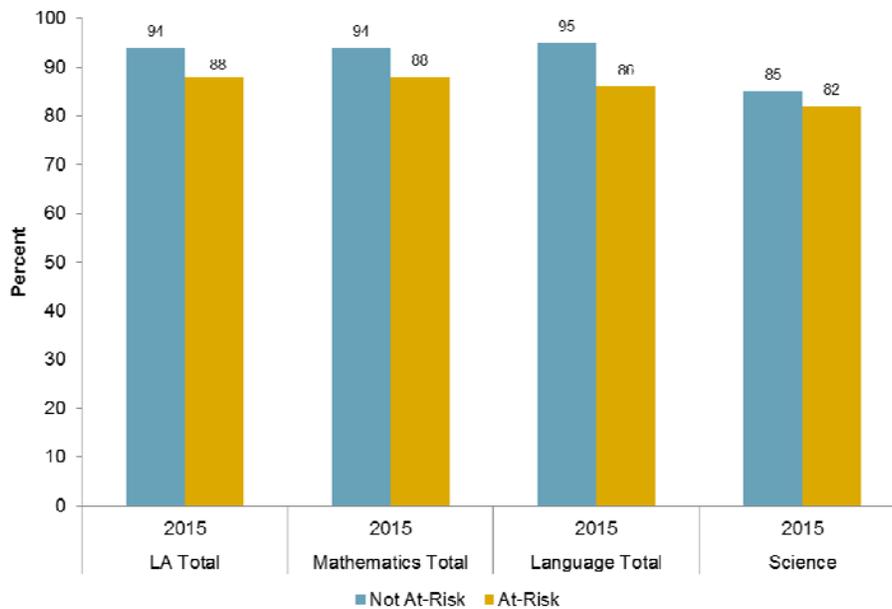

- Among non-special education first and second graders in the 2014–2015 academic year, not-at-risk students outperformed at-risk students on each subtest of the ITBS and Logramos Third Edition (see page 31). These trends reflect those evidenced on the Stanford Tenth Edition and Aprenda Third Edition, the norm-referenced tests administered in the district prior to the most recent academic year. Generally, gaps in performance between not-at-risk and at-risk first and second graders were smaller on the Logramos Third Edition than they were on the ITBS.
- The largest gap in performance between not-at-risk and at-risk students on the ITBS was on the English Language Arts (ELA) subtest (55 percentage points), followed by the Language subtest (51 points), Mathematics subtest (42 points), and Science subtest (39 points; see **Figure 6**, page 12).
- The largest gap in performance between not-at-risk and at-risk students on the Logramos Third Edition was on the Language subtest (9 percentage points), followed by the Mathematics subtest (6 points), Language Arts (LA) subtest (5 points), and science subtest (3 points; see **Figure 7**, page 12).

Figure 6. Percent at or above the 50th percentile on the Iowa Test of Basic Skills for not-at-risk and at-risk students in grades 1 and 2, 2014–2015 academic year

Source: 2014–2015 Logramos Third Edition data file, accountability subset of students.

For specific SCE programs, the following findings are relevant.

- In general, the 2015 STAAR English version and STAAR EOC results indicate that passing rates of students who received and/or participated in various SCE programs and services did not meet or exceed the passing rates of all at-risk students in the district. Students removed to JJAEP and young women who received pregnancy-related services had a lower passing rate on the STAAR Reading, Mathematics, Science, and Social Studies subtests AND on the STAAR EOC English I, English II, Algebra I, U.S. History, and Biology than did their districtwide peers (see pp. 16–22).
- The Excess Cost Model (see page 23) was implemented to reduce class sizes through the provision of additional instructional positions. Program effectiveness was measured through attendance rates and completion rates. Districtwide attendance rates remained unchanged at 95.6 percent from the 2013–2014 to the 2014–2015 academic year. At-risk students in the class of 2014 improved their graduation and completion rates over their class of 2013 peers. The overall passing rate of not-at-risk students exceeded those of at-risk students at all grade levels on all subtests of the English and Spanish language STAAR (excepting the Spanish language Science subtest, for which there were too few students for comparison) and all STAAR EOC tests.

Detailed findings at the district, school office, and campus levels are presented beginning on page 29 of this report for each of the STAAR subtests, STAAR EOC tests, Iowa Test of Basic Skills subtests, and Logramos Third Edition subtests. Completion rates are presented as well. Results are presented for at-risk and not-at-risk students by grade at all levels. The next section of the report also provides detailed information about the SCE-funded disciplinary alternative education programs and centers and pregnancy-related services.

Discussion

Overall, the findings from this Evaluation of State Compensatory Education indicates that at-risk students underperform their not-at-risk peers on every measure detailed here, gains over previous years notwithstanding. For instance, a greater percentage of not-at-risk than at-risk students met or exceeded (1) the 50th percentile on the subtests of the Iowa Test of Basic Skills and Logramos Third Edition, administered to pupils in the first and second grades, (2) the Level II Satisfactory Academic Performance Standard on the English and Spanish language STAAR tests, administered to students in third grade through eighth grade, and (3) the Level II Satisfactory Academic Performance Standard on the STAAR End-of-Course tests, administered to students in high school. Similarly, the graduation rate for at-risk students continued to lag behind the graduation rate for not-at-risk students, with a concomitant widening of the gap between these two groups for the class of 2014 relative to the class of 2013. Given these facts, and given that at-risk students represent a large proportion of the students in HISD, continued support for students at-risk of dropping out of school is necessary in order to improve their performance and close the achievement gap.

Despite the continued existence of an achievement gap between at-risk and not-at-risk students districtwide in 2015, there were some individual schools that appeared to be closing achievement gaps in one or more subject areas. For example, Henry MacGregor Elementary School saw a reduction in the third and fourth grade reading gaps on the English language STAAR exam by eight and 21 percentage points, respectively, and a reduction in the fourth grade writing gaps on the STAAR by 30 percentage points. Sidney Lanier Middle School sixth and seventh grade at-risk students underperformed their not-at-risk peers by 16 and 22 percentage points, respectively, on the reading subtest of the English language STAAR exam in 2015, down from 34 and 49 percentage points in 2014. Sixth, seventh, and eighth grade at-risk students underperformed their not-at-risk peers by 26, 22, and 11 percentage points, respectively, on the mathematics subtest of the English language STAAR exam in 2015, down from 34, 37, and 42 percentage points in 2014. Ross Sterling High School saw reductions in the gap between not-at-risk and at-risk students meeting the STAAR End-of-Course standard on four of five tests. The shrinkage in the achievement gap between Sterling's not-at-risk and at-risk students between spring 2014 and spring 2015 went from 47 to 37 on the STAAR EOC English I test, 62 to 48 on the English II test, 24 to 18 on the Algebra I test, and 25 to 18 on the Biology test.

The SCE-funded programs in HISD serve students who are considered at-risk. Enrollment in each program is inconsistent and relatively short-term, making it difficult to draw conclusions and attribute performance patterns to the programs. However, that does not necessarily mean these programs are ineffective. For instance, support from Pregnancy-Related Services assists in the retention of young women who use these services, a result that would not be reflected by test scores.

HISD continues to implement programs to address students' educational achievement and attainment. More generally, the district is focused on recruiting highly qualified teachers and supporting them with on-going in-service professional development to help them tackle the perennial challenges of transmitting curricular knowledge effectively. Despite the apparent narrowing of the achievement gap on a number of measures during the 2014–2015 academic year, further efforts beyond effective teaching are also needed to ensure that the district is serving its neediest students well. Such efforts may include increasing the availability of campus-level counseling and psychological staff to assist students to deal with familial and community factors impinging on their educational trajectories. District initiatives aimed at encouraging behaviors known to lead to optimal life outcomes, such as reading and positive social engagement with peers, should also be promoted at all levels, from the offices of administrative staff down to the classroom. The combination of all these efforts will keep the district on a course of reducing achievement gaps.

Beechnut Academy (#303)

Program Description

Beechnut Academy is a privately managed Disciplinary Alternative Education Program (DAEP) for middle and high school students with behavioral problems. Its primary purpose is to provide a continuum of academic and social services for students who have been removed from a regular education program for serious violations of the Code of Student Conduct. The academic goal of Beechnut Academy is to provide an academic program comparable with the program offered at the student's home school. The program utilizes individualized computer-program-assisted instruction as well as teacher-directed instruction. A student is approved and accepted into the program for a minimum of 30 days and a maximum of 180 days of successful attendance. Upon successful completion of the program, students return to their regular school settings. The expected outcomes include development of grade-appropriate academic and social skills necessary to be successful upon returning to the home school campuses.

Biology	298	46	US History					

Source: All results shown are for students who received compensatory education and who were present in the 2014–2015 PEIMS Fall Snapshot.

Executive Summary

Beechnut Academy offered educational instruction and support services to a total of 1,572 students over the 2014–2015 school year. The majority of students served were male (73 percent). The racial/ethnic composition of students consisted mostly of Hispanic (57 percent) and African American (40 percent) students. Ninety-three percent of the students served were classified as at-risk according to SCE criteria, up from 83 percent the previous year.

The budget allocation for Beechnut Academy increased from \$12,046,223 in 2013–2014 to \$12,310,351 in 2014–2015.

Program effectiveness was measured using the attendance rate and test performance data on the English language STAAR and STAAR EOC tests. The attendance rate increased from 76.2 percent during the 2013–2014 academic year to 80.4 percent during the 2014–2015 academic year. Overall performance on the English language version of the State of Texas Assessments of Academic Readiness (STAAR) remained relatively flat from the 2013–2014 to the 2014–2015 academic years for all tests. Among students served by Beechnut Academy, seventh grade mathematics and eighth grade social studies performance saw a slight bump in the percentage meeting or exceeding the Level II Satisfactory Phase-in I Academic Performance Standard. Conversely, the proportion of sixth-, seventh-, and eighth-grade students meeting or exceeding the satisfactory standard on the STAAR reading subtest was largely unchanged. Similar results held for the sixth mathematics performance, seventh grade writing performance, and eighth grade science performance.

On the 2015 STAAR EOC exams, performance fell in all subject areas, with the largest drops evidenced in English II (26% met or exceeded the standard in 2014 and 21% did so in 2015) and U.S. History (63% met or exceeded the standard in 2014 and 51% did so in 2015).

Students served by Beechnut Academy lagged far behind their peers districtwide. Based on the findings presented here, it is recommended that the program administration continue efforts to improve the attendance rate and focus on all subject areas that are tested by identifying instructional approaches that are more effective for students with behavioral issues. Since this is a short-term placement program, most of the students tested and served each year are not the same students unless they are being served again for additional placement (repeaters).

Juvenile Justice Alternative Education Program (#320)

Program Description

Juvenile Justice Alternative Education Program (JJAEP) is a program for middle and high school students who have been placed by the courts in detention and residential facilities managed by the Harris County Juvenile Probation Department. Its primary purpose is to provide a continuum of academic and transition services for middle and high school students who have been removed from a regular education program for serious criminal activity or serious misconduct.

The focus of JJAEP is to promote academic growth and behavioral skills that will allow students to transition back into school upon the completion of their sentences. Additional services such as probation-related requirements, mentoring, counseling, mental health services, substance abuse intervention, health services, and prevention-related services are available. JJAEP also provides after-school programs as well as summer school. JJAEP is funded by the Texas Juvenile Probation Commission, local school districts, and state and federal grants. The expected outcomes include development of grade-appropriate academic and social skills necessary to be successful upon returning to the home school campuses.

Biology	6	33	US History					

Source: All results shown are for students who received compensatory education and who were present in the 2014–2015 PEIMS Fall Snapshot. *N < 5

Executive Summary

JJAEP offered educational instruction and support services to a total of 39 students during the 2014–2015 school year. The majority of students were male (86%), and the racial/ethnic composition of the students was mostly Hispanic (64%) and African American (36%). Ninety-six percent of the students served were considered at-risk according to SCE criteria.

The budget allocation for JJAEP decreased from \$1,435,450 for the 2013–2014 academic year to \$891,774 for the 2014–2015 academic year, continuing the previous year’s trend, which saw a decrease in the JJAEP budget of more than \$60,000.

Program effectiveness was measured using the attendance rate and test performance data on the English language STAAR and STAAR EOC tests. The attendance rate among JJAEP students decreased a little more than three percentage points from 2013–2014 to 2014–2015, from 86.4 to 82.9 percent. Grade-level performance of students served by JJAEP remained flat on all subtests of the English language version of the STAAR except science. Total reading performance was down while total math performance was slightly better over the previous year.

On the STAAR EOC, from 2013–2014 to 2014–2015, performance improved in Algebra I, stayed the same in Biology, and decreased in English I.

Based on these findings, it is recommended that the program administration continue efforts to improve the attendance rate and continue to introduce instructional strategies that reflect best practices for improving academic performance. Since this is a temporary placement facility, most of the students served and tested each year are not the same unless they are being served again for an additional placement (repeater).

Elementary Disciplinary Alternative Education Program (#466)

Program Description

Elementary Disciplinary Alternative Education Program (EL DAEP) is a Disciplinary Alternative Education Program (DAEP) for elementary school students. The Texas Education Code prohibits children under the age of ten years old from being expelled so students are placed in EL DAEP. Initial placement is for fifteen days. The program's primary purpose is to provide a structured, rigorous, and individualized behavior and academic curriculum for elementary school students who have been removed from a regular education program for serious criminal activity or misconduct.

Source: All results shown are for students who received compensatory education and who were present in the 2014–2015 PEIMS Fall Snapshot. *N < 5

Executive Summary

EL DAEP, which had a budget allocation of \$509,249, offered educational instruction and support services to a total of 29 students during the 2014–2015 school year. Eighty-nine percent of the students were male, 63 percent were African American, 33 percent were Hispanic, and 85 percent were classified as at-risk according to SCE criteria. Performance on the English language STAAR remained the same or was up over the previous year in all subjects except mathematics for students receiving EL DAEP instruction. There was an appreciable increase in the percentage of students achieving the Level II Satisfactory Academic Performance Standard on the writing subtest of the English language STAAR.

Based on these findings, it is recommended that the program administration implement practices that will raise student performance to meet or exceed that at the overall district level. Since this is a temporary placement facility, most of the students served and tested each year are not the same unless they are being served again for an additional placement (repeater).

Pregnancy-Related Services (#634)

Program Description

Pregnancy-Related Services (PRS) are support services for pregnant students to help them (1) adjust to pregnancy and parenting and (2) remain in school during the pregnancy and postpartum periods. The program is offered at all high schools and all middle schools that have referrals. Any pregnant high school student is eligible for services under the PRS Program. Services include: counseling, career guidance, school and other health-related services, transportation, referrals to external agencies, education on child development, parenting and job-readiness training, child care, case management, service coordination, and specialized counseling. Additionally, Compensatory Education Home Instruction (CEHI) is provided during the prenatal and postpartum periods. The CEHI component allows teachers to provide academic services to students at home or at the hospital, when students are unable to attend school. CEHI consists of at least four hours per week of instruction by a certified teacher.

Source: All results shown are for students who received compensatory education and who were present in the 2014–2015 PEIMS Fall Snapshot. *N < 5

Executive Summary

During the 2014–2015 school year, 425 students received pregnancy-related services. The racial/ethnic composition was dominated by Hispanic students (63 percent) and African American students (36 percent). Ninety-four percent of these students were considered at-risk according to SCE criteria.

The budget allocation for this program decreased from \$676,564 in 2013–2014 to \$633,786 in 2014–2015.

Program effectiveness was measured with test performance data on the STAAR and STAAR EOC. English language STAAR performance in the spring of 2015 was low for all subjects tested. STAAR EOC performance decreased in English I, English II, and U.S. History, remained flat in Biology, and increased in Algebra I in 2015.

Based on these results, program administrators should continue to implement best instructional practices for improving academic performance. Since this is a temporary placement facility, the students served and tested each year are not the same.

Excess Cost Model (#999)

Program Description

HISD used SCE funds to help supplement the regular educational program by reducing class sizes. District recommended student to teacher ratios are as follows:

- Grades PK-4 22:1 (State Requirement)
- Grade 5 26:1
- Grades 6-8 28:1
- Grades 9-12 30:1

The district determines the appropriate level of funding for each campus based on the following formulae:

Elementary Campuses

Number of students by grade level ÷ recommended class size = standard number of teachers required.

Secondary Campuses

[Total number of students in a subject area ÷ recommended class size] ÷ standard number of classes (6) = standard number of teachers required.

The standard number of teachers required is compared to the actual number of teachers for that subject area. The value in excess of the standard requirement is considered excess cost and coded accordingly with the appropriate IA code.

Executive Summary

As part of a districtwide initiative, the Excess Cost Model was implemented in order to reduce class sizes below the district's class-size guidelines by providing additional instructional positions. For the 2014–2015 school year, an additional 1,376 FTE positions were funded to serve a total of 215,225 students. The budget allocation for the 2014–2015 school year was \$41,160,585. In 2014–2015, the racial/ethnic composition for the district consisted of 25 percent African American, four percent Asian/Pacific Islander, 62 percent Hispanic, less than one percent Native American, and eight percent White students. Regarding gender, 51 percent of the students were male and 49 percent were female. Districtwide, 72 percent of students were identified as at-risk.

Program effectiveness was measured using attendance rates. As shown on the Student Outcomes panel above, the districtwide attendance rate remained unchanged at 95.6 percent from the 2013–2014 to the 2014–2015 academic year, a high attendance rate for a large urban district.

Summary of Districtwide Results

Analysis of districtwide results (pages 29–31) reveals that, overall, the performance of not-at-risk students exceeded that of at-risk students on all tests of the STAAR, STAAR EOC, ITBS, and Logramos Third Edition in 2015 and at all grade levels. The total performance gap on the English version of the STAAR exam between at-risk and not-at-risk students was the largest in social studies and science (38 percentage points), followed by writing (35 percentage points), reading (32 percentage points), and mathematics (28 percentage points).

On most subjects of the 2015 STAAR EOC exams, the gap in performance between at-risk and not-at-risk students was also large. The performance gap in the proportion of students meeting or exceeding the standard for English I, English II, and Algebra I, Biology, and U.S. History was 38, 40, 18, 18, and 15 percentage points, respectively. These proportions represented decreases over the 2013–2014 academic year. While the graduation and completion rates for not-at-risk students increased slightly among the class of 2014 relative to the class of 2013, the corresponding rates among at-risk students over the same period decreased.

Based upon these findings, it is recommended that the district's and schools' administrative staffs focus on instructional strategies to increase student achievement for at-risk students in all subject areas. Academic intervention for at-risk students must begin early in order to prepare them for graduation.

APPENDIX A

RECENT LEGISLATIVE CHANGES TO SCE

In 1997, Senate Bill 1873 amended Section 42.152 of the Texas Education Code and placed new restrictions on compensatory education. The bill required that school districts develop reporting and auditing systems to monitor the use of compensatory education funds.

The next major change came in 2001 when Senate Bill 702 (TEC §29.081), amended the sections of the Texas Education Code that governed the SCE Program. First, the statute required school districts to use student performance on basic skills assessment and achievement tests administered under Subchapter B, Chapter 39, to design and implement appropriate compensatory, intensive, or accelerated instructional services for students at-risk of dropping out of school to enable these students to perform at grade level at the conclusion of the subsequent regular school term. SCE legislation later expanded funding to cover mentoring services to at-risk students (Senate Bill 16 of the 78th Legislature), accelerated reading programs, and programs helping students who have dyslexia or a related disorder (House Bill 1691 of the 78th Legislature).

In 2003, House Bill 1691 of the 78th Legislature also amended Section 42.152 of the Texas Education Code to allow charges to the state compensatory education allotment (in proportion to the percentage of students that meet the criteria in Section 29.081(d) or (g)) for programs that serve students that are enrolled in an accelerated reading program under Section 28.006(g) or that are enrolled in a program for treatment of students who have dyslexia or a related disorder as required by Section 38.003.

Senate Bill 16 of the 78th Legislature also amended Subchapter C, Chapter 29, of the Texas Education Code, by adding Section 29.089, relating to mentoring services. According to Section 29.089, programs that provide mentoring services to students at-risk of dropping out of school, as defined by Section 29.081, are also eligible to be charged to the state compensatory education allotment.

The electronic reporting and auditing system implemented in Update 11 of the Financial Accountability System Resource Guide assesses the risk that schools did not use the state compensatory education allotment “to fund supplemental programs and services designed to eliminate any disparity in performance on assessment instruments administered under Subchapter B, Chapter 39, or disparity in the rates of high school completion between students at-risk of dropping out of school, as defined by Section 29.081, and all other students (see Texas Education Code Section 42.152(c).” One primary purpose of the risk assessment activities by TEA staff is to test whether the school district or charter school complied with this general requirement for the expenditure of the supplement funds from the SCE allotment. In most all instances, schools will not be burdened in the future with the cost of obtaining a separate audit of state compensatory education, if only effective strategies, programs and activities are supported by the SCE allotment.

In 2009, House Bill 2703 of the 81st Legislature added a provision to §29.081 (added Subsection (d-1) to §29.081, Education Code) that changed the compensatory education definition of “student at-risk of dropping out of school” by excluding a student who did not advance from prekindergarten or kindergarten to the next grade level only as the result of the request of the student’s parents. Previously the law under §29.081(d)(1) included in the compensatory education definition of “student at-risk of dropping out of school” any student who was not advanced from one grade level to the next.

Also in 2009, another change to Section 42.152(c), Education Code was the amendment of the indirect cost allotment for the compensatory education allotment. The allotment was raised from 45 to 48 percent. In Section 53 of the bill, a new category of compensatory education, funding for the military dependent allotment was established. Section 53 of the bill amends Section 42.152, Education Code, by adding

Subsections (s), (s-1), (s-2), and (s-3) to provide a compensatory education allotment of \$650 per ADA for students who have a parent or guardian on active duty in a combat zone and for students who have a parent or guardian on active duty who have transferred to a school district as a result of a change related to an action taken under the Defense Base Closure and Realignment Act of 1990. Districts would be permitted to use this funding only to serve eligible students.

In 2014, under House Bill 5 high school students were required to pass five State of Texas Assessments of Academic Readiness (STAAR®) end-of-course exams to meet the new graduation requirements. There were exams that were no longer required and some students were classified as at-risk based on their failure on the assessments that were no longer in use. A student who was identified as at-risk based on this category in 2013–2014 was considered to be identified as at-risk in 2014–2015, but the at-risk status was removed at the end of the 2014–2015 school year.

House Bill 5 increased the age of students considered at-risk for dropping out of school from 21 to 26 years of age for state compensatory education eligibility purposes. It also amended TEC §29.081 to require school districts to offer, without cost to a student, additional accelerated instruction in any subject if the student failed to perform satisfactorily on an EOC assessment test that measured the knowledge and skills in that course and which was required for graduation. The LEA is required to separately budget and prioritize state compensatory education funding and any other funding necessary for additional accelerated instruction for students who fail to perform satisfactorily on an EOC assessment instrument. State compensatory education funds cannot be used for any other purpose until the district or charter school has sufficiently funded additional accelerated instruction. TEC §29.081, as amended by House Bill 5, also requires each school district to evaluate the effectiveness of accelerated instruction programs for high school students and to hold an annual public hearing to consider the results of the evaluation.

The LEA should also determine whether the student meets any of the other criteria under TEC §29.081(d). The LEA should also review local eligibility criteria adopted by the board of trustees in accordance with §29.081(g) to determine whether the student is eligible for services/supports.

APPENDIX B

Funding Source

Pursuant to TEC §29.081, the money allocated by the state for compensatory education programs and/or services was based on the number of economically disadvantaged students in the district. The number of economically disadvantaged students is determined by averaging the best six months of enrollment for those who qualify in the national school lunch program for free- or reduced-price lunches for the preceding school year. Districts are entitled to receive an additional annual allotment equal to the adjusted basic allotment, multiplied by 0.2, for each student who is economically disadvantaged and who does not have a disability. Students must reside in a residential placement facility in a district in which their parent or legal guardian does not reside. Districts are also entitled to receive an annual allotment equal to the adjusted basic allotment, multiplied by 2.41, for each full-time equivalent student in a remedial and support program because the student is pregnant or a parent.

APPENDIX C

CRITERIA FOR IDENTIFYING AT-RISK STUDENTS

State Criteria

TEC §29.081 defines a student at-risk of dropping out of school as each student who is under 21 years of age and who:

1. Was not advanced from one grade level to the next for one or more school years, except if the student did not advance from prekindergarten or kindergarten to the next grade level only as a result of the request of the student's parent;
2. Is in grades 7, 8, 9, 10, 11, or 12 and did not maintain an average equivalent to 70 on a scale of 100 in two or more subjects in the foundation curriculum during a semester in the preceding or current school year or is not maintaining such an average in two or more subjects in the foundation curriculum in the current semester;
3. Did not perform satisfactorily on an assessment instrument administered to the student under TEC Subchapter B, Chapter 39, and who has not in the previous or current school year subsequently performed on that instrument or another appropriate instrument at a level equal to at least 110 percent of the level of satisfactory performance on that instrument;
4. Is in pre-kindergarten, kindergarten, or grades 1, 2, or 3, and did not perform satisfactorily on a readiness test or assessment instrument administered during the current school year;
5. Is pregnant or is a parent;
6. Has been placed in an alternative education program in accordance with TEC §37.006 during the preceding or current school year;
7. Has been expelled in accordance with TEC §37.007 during the preceding or current school year;
8. Is currently on parole, probation, deferred prosecution, or other conditional release;
9. Was previously reported through the Public Education Information Management System (PEIMS) to have dropped out of school;
10. Is a student of limited English proficiency, as defined by TEC §29.052;
11. Is in the custody or care of the Department of Protective and Regulatory Services or has, during the current school year, been referred to the department by a school official, officer of the juvenile court, or law enforcement official;
12. Is homeless, as defined by 42 U.S.C. Section 11302, and its subsequent amendments; or
13. Resided in the preceding school year, or resides in the current school year, in a residential placement facility in the district, including a detention facility, substance abuse treatment facility, emergency shelter, psychiatric hospital, halfway house, or foster group home.

Local Criteria

In addition to the 13 state criteria outlined in TEC §29.081 for identifying students who are at-risk of dropping out of school, there is a provision that allows the board of trustees of a school district to adopt local eligibility criteria (TEC §29.081(g)). The following local criteria also identify students who are at-risk for dropping out of school:

1. Students who are identified as dyslexic under general education; or
2. Students who are placed into a Disciplinary Alternative Education Program for reasons other than those in TEC §37.006, such as continued misbehavior in the classroom.
