# **Tuition and Fees Report Fiscal Year 2019-20 January 2020**

1600 Broadway, Suite 2200 • Denver, Colorado 80204 • (303) 862 - 3001  
DR. ANGIE PACCIONE, EXECUTIVE DIRECTOR

## Executive Summary

The Tuition and Fee Report is produced annually by the Colorado Department of Higher Education to provide detailed information on the tuition and fee rates at Colorado's public institutions, as well as to give context regarding the state funding environment in which tuition and fee rate-setting occurs.

Colorado has mirrored national trends over the past fifteen years as the cost of higher education has shifted from the state to the student. In Fiscal Year (FY) 2000-01, the state covered 68 percent of the cost of college, while students and families were responsible for 32 percent. By FY 2011-12, the balance had effectively reversed, leaving students and families responsible for two-thirds of the costs while the state paid a third.

This shifting funding structure comes at a time when a postsecondary credential has become an economic necessity. The Colorado Commission on Higher Education's Master Plan, *Colorado Rises*, establishes as an overarching goal increasing the number of adults who hold a high-quality postsecondary credential to 66 percent by 2025. This attainment goal recognizes research suggesting that by 2020, almost three-fourths of jobs will require some education beyond high school. Colorado has mirrored the nation in moving from a model of funding primarily supported by state appropriations to one that considers all sources of revenue, including resident and nonresident tuition and fees.

From FY 2018-19 to FY 2019-20, resident tuition and fees increased an average of 1.1 percent across all of Colorado's public institutions. At four-year institutions, the average increase was 1.5 percent, and at two-year institutions, the average was 0.2 percent. This relatively small increase was in large part thanks to a significant General Fund investment of \$121 million in FY 2019-20.

This year, the report highlights flat tuition across nearly all the state's institutions as a result of a historic state investment of \$121 million in FY 2019-20. While mandatory fees did increase at most institutions, tuition being held flat for one year demonstrates the commitment of both the state and institutions to contain costs.

## Introduction

Higher education funding structures have shifted since the turn of the century, both in Colorado and across the nation. In Fiscal Year (FY) 2000-01, the state covered 68 percent of the cost of college, while students and families were responsible for 32 percent. By FY 2011-12, those numbers had effectively reversed: students and families were covering two-thirds of the costs while the state paid only a third. Although General Fund investment has since increased, the split has remained largely the same—in FY 2018-19, the state-student split was 36-64. Although Colorado is a particularly striking example of this shift in postsecondary costs, other states have also disinvested from higher education due to budget pressures. Over the same time period, the economic demand for postsecondary credentials has increased. The Colorado Commission on Higher Education's Master Plan, *Colorado Rises*, sets a goal that by 2025, 66 percent of Colorado's adult population will earn some type of postsecondary credential to meet the needs of Colorado's dynamic economy.

Because General Fund investment and tuition and fees are the two primary funding streams for public higher education, any thoughtful analysis of tuition and fees at public institutions of higher education in Colorado must also include thorough examination of Colorado's General Fund investment. Colorado's shift from a funding structure that was largely supported by state appropriations to one primarily dependent on tuition revenues has required institutions to carefully consider how they balance operational realities with affordable access to higher education for Colorado students and families.

Recent investments by the General Assembly have leveled what had been a high rate of growth in tuition rate increases. In fiscal years 2014-15 and 2015-16, Colorado's public institutions witnessed the smallest year-over-year percent increases in tuition rates in more than a decade. This was largely the result of increases in General Fund support for higher education. In 2014, the College Affordability Act (Senate Bill 14-001) provided an historic \$60 million (11 percent) increase for Colorado's public institutions of higher education. Tied to this investment in operating dollars was a requirement that resident tuition rate increases be capped at no more than 6 percent in FY 2014-15 and FY 2015-16. For FY 2015-16, the state provided a total operating increase for public colleges and universities of 11 percent, or \$66.6 million. All Colorado public institutions of higher education complied with the requirements of tuition restraint in FY 2015-16.

To maintain this progress, the General Assembly chose to hold the Colorado Department of Higher Education's (CDHE) appropriation flat in FY 2016-17 rather than proceed with a \$20 million (3 percent) cut as originally requested in the Governor's budget request. Fiscal Year 2017-18 saw modest investment in higher education based an inflationary increase to the General Fund share of both Education and General expenses as well as inflationary increases to employee health benefit increases. The 2018-19 appropriation saw an increase of \$81.6 million in General Fund appropriations to higher education; an 11.8 percent increase enabled institutions to limit tuition increases to 3 percent for FY 2018-19.

Finally, in the 2019 Legislative session the General Assembly chose to increase funding for higher education operations by \$93.9 million, a 12.9 percent increase that allowed nearly all institutions to hold tuition flat in FY 2019-20.

In accordance with C.R.S. § 23-1-105.5(2), this report provides detailed information on the tuition and fee rates that Colorado public institutions of higher education charged to resident and non-resident students in Fiscal Year 2016-17 and is organized into the following sections:

- (1) Definitions
- (2) Key Findings
- (3) The Process of Tuition Setting and the Relationship to Costs
- (4) A Summary of Tuition and Fee Changes in the 2018-19 Academic Year
- (5) Interstate Comparisons
- (6) Appendices which provide detailed examples and comparisons across institution type, student groups and year to year comparisons (available in excel upon request)

## Definitions

To assess trends in tuition and fees, it is important to understand some basic higher education terminology:

1. **Student Groups** encompasses the following:
  - a. In-district undergraduate, out-of-district undergraduate, in-state undergraduate; out-of-state undergraduate; in-state graduate; out-of-state graduate; in-state professional; and out-of-state professional students.
  - b. In-district and out of district classifications are limited to the local district colleges (Aims, Colorado Mountain College, which have the ability to collect certain local taxes, thereby enabling a lower rate for those students who live within that tax district)
2. **Full Time Equivalent Student (FTE)**: The number of full time equivalent students at an institution. For undergraduate students, FTE is calculated by taking the total number of credit hours divided by 30 credit hours a year for a school following the semester system and 45 credit hours for a school following the quarter system. For graduate students, the total number of credit hours is divided by 24 hours in a semester system and 36 hours in a quarter system.
3. A student planning to attend a public college or university in Colorado should expect to pay the charges defined as follows:
  - a. **Mandatory Fees**: A fixed sum charged to all students for items not covered by tuition and required of such a large proportion of all students that the student who does not pay the charge is an exception. Mandatory student charges can be used to support a range of activities and programs related to the student experience, including but not limited to: instruction, research and public service, academic support, student health services, athletics, recreational activities, campus transportation and capital debt service.
  - b. **Designated Fees**: Student charges assessed to specific students based on course enrollment, program participation or services used.
  - c. **Tuition and Fees**: Sum of tuition and mandatory fees (designated fee data are submitted to CDHE as part of the Institutional Plan for Student Fees). This sum amounts to the base charges for an institution of higher education.
  - d. **Room and Board**: Optional charges used to support the on-campus housing and dining functions for students choosing to live and/or eat on campus.
  - e. **Cost of Attendance**: The total charge to students and their families, excluding student financial aid. This total includes the sum of tuition, mandatory fees and room and board.
4. Various financing mechanisms are employed by institutions of higher education to determine a student's final cost of attendance:
  - a. **Tuition Differential**: A tuition setting strategy whereby an institution charges a higher per-credit-hour rate for programs that cost more to deliver.
  - b. **Credit Hour Window**: A tuition setting strategy whereby an institution charges a flat rate over a range of credit hours to encourage students to take a greater number of credit hours.
  - c. **Linear Tuition Structure**: A tuition setting strategy whereby students are charged the same amount per credit hour, regardless of the number of hours taken.

## Key Findings

- General Fund support is a decisive factor in moderating tuition rate increases and buying down tuition rates.
- According to SHEEO, Colorado fell from 47th to 48th in the nation in state funded support per student to higher education. This has resulted in greater reliance on tuition by institutions.
- Colorado is turning the corner. The Colorado General Assembly has led the nation in increased state investment—47 percent increase over the last five years.

## Process of Tuition and Fee Setting

Governing boards have the responsibility and authority for the financial management of their institutions. A major component of sound financial management is setting tuition. Since institutions have unique roles and missions and differing student needs, governing boards are best equipped to set tuition and account for the fiduciary duty to their respective institutions. The Colorado Commission on Higher Education (CCHE) has a responsibility to exercise oversight and to ensure that educational quality and student access are maintained. While governing boards determine the tuition for the institutions they govern, they often do so within certain statutory parameters. For example, HB 16-1405 re-established the appropriation of tuition and variable tuition rate limits through footnotes in the Long Bill.

Tuition setting usually occurs in the spring to allow incoming and returning students to make financial decisions in preparation for the upcoming year. The actual impact of tuition rate increases on individual students varies and depends on several factors, such as the student's area of study and eligibility for financial aid. A governing board's tuition price determination process includes a variety of aspects that depend on the pricing strategy at the particular institution. According to a 2013 report from the State Higher Education Executive Officers Association (SHEEO), the amount of state appropriations is the single greatest factor influencing tuition rate setting, followed by the prior year's tuition rate, financial aid, cost of instruction and institutional role and mission.

In addition to setting tuition, governing boards are also able to determine the amounts and types of fees collected by their institution. In setting fees, the Colorado Commission on Higher Education's fee policy states that "student fees should be used to support and enhance the overall student experience." The student body must receive notice of any planned increase in fees, and governing boards must also establish methods of receiving student input regarding fees.

Governing boards must adopt an Institutional Plan for Student Fees containing information, guidance, policies, and procedures regarding all fees assessed at the institution, and are required to review that plan each year.

## Tuition Costs and their Relationship to Higher Education Costs

Tuition increases are a function of higher education costs relative to an institution's ability to generate dollars (either General Fund or tuition) to cover those costs. Costs not funded by General Fund will therefore likely be supported through tuition increases. As states have disinvested in higher education over the last 15 years, tuition increases have largely made up the difference. In FY 2000-01, the state covered 68 percent of the cost of college, while students and families picked up 32 percent. By FY 2011-12, those numbers had reversed: students and families were covering two-thirds of the costs and the

state was paying for a third. Recent investments by the General Assembly have started to reverse this trend so that in FY 2018-19, the state share covers 36 percent of the total cost of college.

The Colorado Department of Higher Education contracted with the National Center for Higher Education Management Systems (NCHEMS) to perform an analysis of higher education costs in Colorado and how they compare to national costs (“Why Higher Education Costs are What They Are,” June 30, 2015). Chief among the findings is that all of Colorado’s public institutions of higher education have fewer resources to support basic operations than do similar institutions in other states. This level of funding means that Colorado institutions are less able to absorb revenue shortfalls through productivity enhancements.

Because state appropriations are closely tied to tuition levels, the condition of the state general fund and state investment levels in higher education are at the core of the Commission’s tuition policy. This policy integrates the tuition recommendation process with the General Fund appropriation process. More information on the Commission’s tuition policy can be found in the appendices.

## Tuition and Fee Changes in the 2019-20 Academic Year

Tuition and mandatory fees comprise the base charges for an institution of higher education. In FY 2019-20, higher education received a 12.9 percent increase in operating funds. As a result of this investment, all institutions held tuition rates flat, with one exception. Metropolitan State University received permission from the General Assembly to increase their tuition by 3.0 percent. Metropolitan State University also received permission to close their tuition window and move to a linear tuition model. Previously, any student enrolled in 12 to 18 credit hours was charged the 12 hour rate. After the closing of the tuition window, this is no longer the case. Since the tuition and fee report shows tuition at the 15-credit hour rate, this resulted in Metropolitan State University’s 15.9 percent increase in posted

tuition rates, as seen in Table One below. The charts below detail the tuition and fee rate increases by institution for resident and non-resident undergraduate students. Detailed tuition and fee information as it pertains to graduate and professional students can be found in Appendix E.

The average tuition and mandatory fee increase for resident undergraduate students across Colorado’s public institutions was \$79 (1.1 percent). At four-year institutions, posted tuition and mandatory fees increased by an average of \$166 (1.5 percent); at two-year institutions tuition and mandatory fees increased by an average of \$9 (0.2 percent). See Appendix A for more details.

\* Continuing resident students at UCB do not pay annual tuition increases during their studies. The tuition reported is for the entering freshman class.

At all Colorado public institutions, tuition and mandatory fees for out-of-state undergraduates increased by an average of \$364 (1.6 percent). At four-year institutions, tuition and mandatory fees increased by an average of \$808 (3.4 percent) and at two-year institutions, tuition and fees increased by an average of \$9 (0.1 percent). A more detailed look at all tuition and fees for FY 2018-19 can be found in the attached Appendices.

**Table 2. One-Year Change Non-Resident Undergraduate Base Tuition and Fees (30 Credit Hours Per Academic Year)**

<sup>1</sup> Continuing non-resident students at UCB do not pay annual tuition increases during their studies. The tuition reported is for the entering freshman class.

Over the past five years, mandatory undergraduate fees have increased an average of 20.6 percent across all institutions. At four-year institutions, fees increased 23.8 percent; at two-year institutions that increase was 22.4 percent. At two-year institutions, mandatory fees ranged from \$100 to \$1,148 per year. At four-years, fees ranged from \$963 to \$3,813 per year.

### Interstate Comparisons

State appropriations are the key incentive to keeping tuition low and play the biggest role in determining the actual tuition rate charged to students. According to the State Higher Education Executive Officer’s (SHEEO) annual State Higher Education Finance (SHEF), Colorado is among the lowest in every measure of state support. Because of this, Colorado’s institutions of higher education are especially cognizant of the risk of pricing themselves out of the market by setting tuition rates too high. The chart below, published as part of the Western Interstate Commission on Higher Education (WICHE) Annual Tuition and Fees Report, compares the average cost of resident and nonresident undergraduate tuition and fees across WICHE member states.

**Table 3: Resident Undergraduate Tuition and Fees at Public Four-Year Institutions, 2009-10 to 2019-20, State Averages**

	Resident									Non-Resident

Figure 3 demonstrates how much Colorado appropriates per FTE compared to the national average. Only Vermont and New Hampshire, two traditionally high tuition states, appropriate General Fund on a per-FTE basis lower than Colorado. In 18 states, educational appropriations per FTE are within \$1,000 of the U.S. average, and a majority of states are within \$2,000. Colorado appropriates general fund on a per-FTE basis \$3,655 below the national average.

Figure 3: Educational Appropriations per FTE (adjusted) - Difference from U.S. Average, FY 2018

- NOTES:**
1. Educational appropriations are a measure of state and local support available for public higher education operating expenses including ARRA funds, and exclude appropriations for independent institutions, financial aid for students attending independent institutions, research, hospitals, and medical education.
  2. Adjustment factors to arrive at constant dollar figures include Cost of Living Index (COLI), Enrollment Mix Index (EMI), and Higher Education Cost Adjustment (HECA). The COLI is not a measure of inflation over time.

**SOURCE:** State Higher Education Executive Officers Association

In most other measures, Colorado falls near the bottom in terms of state support for higher education. Figures 4-6 demonstrate various measurements of state support for higher education.

**Figure 4: Higher Education Support Per Capita by State, FY 2017**

**NOTE:** Higher education support is state and local tax and non-tax support for public and independent higher education, including special purpose appropriations for research-agricultural-medical.

**SOURCES:** State Higher Education Executive Officers Association, with data from the U.S Census Bureau.

Figure 5. Higher Education Support per \$1,000 of Personal Income by State, FY 2017

**NOTE:** Higher education support is state and local tax and non-tax support for public and independent higher education, including special purpose appropriations for research-agricultural-medical.

**SOURCES:** State Higher Education Executive Officers Association, with data from the Bureau of Economic Analysis.

Figure 6. Percent of Tax Revenues Allocated to Higher Education by State, FY 2015

**NOTE:** Higher education support is state and local tax and non-tax support for public and independent higher education, including special purpose appropriations for research-agricultural-medical.

**SOURCES:** State Higher Education Executive Officers Association, with data from the U.S. Census Bureau and North American Association of State and Provincial Lotteries.

On an institutional level, Adams State University and the University of Colorado Boulder have taken steps towards making tuition predictable for their students by implementing tuition guarantees. Adams State University has had a resident tuition guarantee in effect since 2016; the University of Colorado Boulder has had a non-resident tuition guarantee in place since 2005 and a resident tuition guarantee was implemented in 2016.

The average published resident tuition and fee rate at Colorado's four year-institutions is \$11,084, which is \$644 higher than the national average of \$10,440. New Hampshire, which has the lowest level of state funding per FTE, has a much higher resident tuition and fee rate of \$16,460. In contrast, Wyoming, which receives the greatest amount of state funding per FTE, has the lowest resident tuition and fee rate in the country \$5,400.

### Figure 7: Tuition and Fees by State, Public Four-Year

In 2019-20, average published tuition and fee prices for in-state students at public four-year institutions range from \$5,580 in Wyoming and \$6,350 in Florida to \$16,920 in New Hampshire and \$17,470 in Vermont.

SOURCES: College Board, Annual Survey of Colleges; NCES, IPEDS Fall 2017 Enrollment data.

As demonstrated in Figure 8, Colorado’s resident rate for public two-year institutions is near the median, but note the national average rate is somewhat skewed by California and New Mexico’s low rates.

**Figure 8: Tuition and Fees by State, Public Two-Year**

In 2019-20, average published tuition and fees for in-district students at public two-year colleges range from \$1,430 in California and \$1,860 in New Mexico to \$7,100 in New Hampshire and \$8,210 in Vermont.

NOTE: Alaska is not included in Figure 5 because it does not have a separate community college system.

SOURCES: College Board, Annual Survey of Colleges; NCES, IPEDS Fall 2017 Enrollment data.

In closing, the importance of General Fund support for institutions of higher education tuition setting cannot be overstated. As the NCHEMS Cost Driver Study Report finds, Colorado institutions have so far managed to become lean and efficient. To move the needle on the attainment gap and reach the 66 percent attainment goal by 2025, General Fund investment must persist.

## NOTE:

Dark shading denotes what CCHE & DHE consider to be the "Base Tuition Rate" when differentials exist

N/A denotes a year in which the stated tuition differential no longer exists.

<sup>1</sup> In 2013-14, Adams State University converted a portion of their fees to tuition.

<sup>2</sup> 2012-13 was the final year for the returning phase in rate at Colorado Mesa University.

<sup>3</sup> Effective 2019-20 Aims Community College merged all of their differential tuition rates to one differential rate.

<sup>4</sup> Effective 2018, Colorado Mountain College merged their bachelor degree tuition rates to match their associate degrees.

## SECTION VI

### PART C TUITION AND FEES

#### 1.1 General Description and Intent

Tuition and fees, along with state support, provide financial resources to the institutions of higher education to conduct academic programs and to support a complete and comprehensive learning environment for students. Tuition and fees represent a portion of a student's cost of attendance and are used to provide goods and services to students.

Governing boards have the responsibility and authority for the financial management of their institutions. A major component of sound financial management is the setting of tuition and fees, including refund policies. Since institutions have unique roles and missions and differing student needs, governing boards must consider a number of factors when setting tuition and fees, and when establishing a refund policy. The Colorado Commission on Higher Education (the Commission) has responsibility to exercise oversight to ensure that educational quality and student access are maintained consistent with the role and mission of each institution.

It is the intent of the Commission that the following will be considered when Governing Boards are setting tuition and fee rates:

- Be done in an open and transparent manner, including providing opportunities for student input.
- Promote clarity, simplicity and predictability for students, families and public institutions of higher education.
- Be consistent with the goals of the Colorado Commission on Higher Education's Master Plan, and strive to maintain access and affordability for resident students.
- Reflect the need of each institution to enhance the quality of educational programs and offerings, strengthen the financial position of the institution and support institutional strategic plans and goals.

#### 1.50 Definition of Key Terms

- Academic Course: For purposes of this policy, includes all instruction, including, but not limited to: academic, vocational, occupational, technical, music, and

physical education courses.

- Academic Facilities Construction: Includes buildings and site improvements, or specific space within a multi-use building (including utilities and transportation infrastructure) as defined in C.R.S. 24-75-301. The determination of whether it is an academic facility or space shall be determined based on the function/purpose of the building or space. Academic Facilities are those facilities that are core to the role and mission of the institution and may include, but not be limited to, space dedicated to instructional, student services, or administration. If a multi-purpose building, the space determination shall be based on the primary usage of the space during the regular academic year.
- Auxiliary Facility: As defined in C.R.S. 23-5-101.5 (2) (a).
- Fees: Any amount, other than tuition, that is assessed to all individual students as a condition of enrollment in the university. Fees may be used for academic and non-academic purposes, including, but not limited to: funding registered student organizations and student government; construction, remodeling, maintenance and improvement of student centers, recreational facilities, and other projects and improvements for which a facility fee is approved; intercollegiate and intramural athletics; student health services; technology; mass transit; parking; and bond payments for which fees have been pledged.
- Institution of Higher Education: Means any state-supported institution of higher education in Colorado and the Auraria Higher Education Center. For purposes of this section, does not include local district junior colleges or the area vocational schools.
- Cost Sharing Matrix: An analytical tool used to calculate possible tuition increase limits by utilizing fixed costs governing boards must meet in order to maintain and enhance the quality of their institutions and the relationship of those costs to state funding levels.
- Tuition Increase Limit: Means an annual tuition rate increase limit, cap (including no limit or cap), or guideline established by CCHE on resident undergraduate tuition rate increases.

## .1 Tuition Policy—Establishment of Tuition Increase Limit

Tuition increases are a function of costs and how those costs are shared among the state, student and institution. Because state appropriations are the key incentive to keeping tuition low, the condition of the state general fund and state investment levels in higher education are at the core of the Commission’s tuition policy.

For each fiscal year, the Commission will establish a Tuition Increase Limit for resident undergraduate students. In doing so the Commission, in consultation with the governing boards, will develop a Cost Sharing Matrix, which shall recognize:

- The condition of the state general fund and state investment levels in higher education; specific space within a multi-use building (including utilities and transportation infrastructure) as defined in C.R.S. 24-75-301. The determination of whether it is an academic facility or space shall be determined based on the function/purpose of the building or space. Academic Facilities are those facilities that are core to the role and mission of the institution and may include, but not be limited to, space dedicated to instructional, student services, or administration. If a multi- purpose building, the space determination shall be based on the primary usage of the space during the regular academic year.
- Auxiliary Facility: As defined in C.R.S. 23-5-101.5 (2) (a).
- Fees: Any amount, other than tuition, that is assessed to all individual students as a condition of enrollment in the university. Fees may be used for academic and non-academic purposes, including, but not limited to: funding registered student organizations and student government; construction, remodeling, maintenance and improvement of student centers, recreational facilities, and other projects and improvements for which a facility fee is approved; intercollegiate and intramural athletics; student health services; technology; mass transit; parking; and bond payments for which fees have been pledged.
- Institution of Higher Education: Means any state-supported institution of higher education in Colorado and the Auraria Higher Education Center. For purposes of this section, does not include local district junior colleges or the area vocational schools.
- Cost Sharing Matrix: An analytical tool used to calculate possible tuition increase limits by utilizing fixed costs governing boards must meet in

order to maintain and enhance the quality of their institutions and the relationship of those costs to state funding levels.

- Tuition Increase Limit: Means an annual tuition rate increase limit, cap (including no limit or cap), or guideline established by CCHE on resident undergraduate tuition rate increases.

## .2 Statutory Authority

C.R.S. § 23-1-108(12)(b): For Fiscal years beginning on or after July 1, 2016, the Commission shall establish tuition policies based on institutional role and mission, and the governing boards shall set tuition consistent with said policies.

C.R.S. § 23-5-129(6)(c): “While operating pursuant to a performance contract negotiated pursuant to this section, the governing board of a state institution of higher education”...such institution “shall report to the Colorado commission on higher education its plans for any tuition or other proposed increases for the following fiscal year, using approved forms, for the commission to review and make recommendations to the general assembly during the annual budget process.”

C.R.S. § 23-18-306(5): “Commission shall submit to the Joint Budget Committee and to the Education Committees”...“tuition policies that ensure both accessible and affordable higher education for Colorado residents.”...“Must also reflect the level of state funding”...“the need of each institution to enhance the quality of education programs and offerings and strengthen the financial position of the institution.”

In times of emergency, certain students (including reserve military units, individuals with specialized skills, or firefighters) are called to provide services to the country.

When the call for service or national emergency is issued, it is often necessary for students to interrupt their coursework in mid-semester without advance notice. Public two-year and four-year institutions’ policies should explicitly recognize that normal withdrawal and refund policies may not be appropriate and make provisions for individuals who leave the institution mid-semester to respond to a state or national emergency, including:

- Institutions’ tuition policies should permit individuals to withdraw from the course without a grade or receive an incomplete with an

opportunity to complete the course work at a later time and refunds should be made on a pro-rated basis for tuition paid by reservists called to active status during times of national emergency.

- Institutions may offer these individuals the option of crediting the current term's tuition to a future semester's tuition charges.
- Institutions shall waive any fee penalty related to breaking the room and board contract for reservists who are called to active status during a national or state emergency.
- In addition, an institution shall offer a pro-rated refund of fees paid for room and board based on the date that the individual left the residence hall.
- Institutions shall adopt policy language that ensures that individuals who are unable to complete a course due to a call to active status under a state or national emergency have a choice either
- The refund and grading policies should recognize that normal withdrawal procedures such as standard withdrawal timetables may not apply.

.3 Institutions will not be penalized financially and state support funding will not be reduced for interrupted enrollment and will be allowed to include in-state students who are called to active duty in the FTE report during the semester they are called to active duty.

### 3.1 Student Fee Policy

C.R.S. 23-1-105.5(1) tasks the Commission to “adopt policies concerning the collection and use of student fees by the governing boards of the state institutions of higher education, as defined in 23-5-119.5 C.R.S. The policies may address, but need not be limited to, the purposes for student fees, categories of student fees, the distinctions between tuition revenue and student fee revenue, accounting for student fee revenue, student fee fund balances, the minimum level of student involvement in the processes for establishing, reviewing, and changing the amount of, and discontinuing student fees...”

In accordance with C.R.S. 23-5-119.5(3), student fees and the use of student fee revenues should provide benefit to students consistent with the stated purpose of the fee by covering related costs including, but not limited, to:

- The construction, maintenance, furnishing, and equipping of buildings and infrastructure;
- Specific courses or programs that benefit the students who choose to enroll in the course or program;
- Student-centered facilities, services, or activities such as student centers, recreation facilities, technology, parking lots, child care, health clinics, mandatory insurance, student government, and other student organizations or activities; and
- Registration costs, costs for student orientation and graduation, and those incurred to communicate with students and their family.

Student fees should be used to support and enhance the overall student experience. Student fees and the use of student fee revenue may benefit students both directly and indirectly. For example, given capital construction timelines some students currently attending an institution may not benefit as directly from fees for capital improvements, however, up-to-date facilities enhance and support the overall student experience and ultimately increase the value of the degree conferred. Likewise, a student may not take advantage of all the programs funded through specific fees, but these fees benefit the student body as a whole.

House Bill 11-1301 made significant changes to State statutes regulating fee policy. Part of the intent of the legislation was to provide greater flexibility at the governing board level to determine fee policy while protecting opportunities for student input and allowing for greater transparency and

disclosure. Commission fee policy is consistent with this legislative intent.

### 3.1 Governing Board Duties

- 3.1.1 Each governing board shall adopt for each institution it governs an Institutional Plan for Student Fees within the requirements outlined in Section 3.02 below.
- 3.1.2 Each institution of higher education, including the Auraria Higher Education Center, shall give at least a thirty-day notice to students of any fee assessment or increase. At a minimum, such notice shall specify:
- The amount of the new fee or fee increase;
  - The reason for the fee assessment or increase;
  - The purpose for which the institution will use revenues received from the fee assessment or increase;
  - Whether the fee assessment or increase is temporary or permanent and, if temporary, the repeal date for the fee assessment or increase; and
  - Any additional requirements as outlined in the institution’s student fee plan.
- 3.1.3 “Each governing board shall annually review the institutional plan for student fees and approve any new fees or changes to existing fees.
- 3.1.4 Each governing board shall establish appropriate methods for receiving meaningful student input that consider the unique student-body characteristics of its institution, necessary to establish and set student fees and fee rates. The established level of student input for all fees shall be listed in the Institutional Plan for Student Fees as outlined in section 3.02.
- 3.1.5 For all Four-Year Institutions - The administration of each institution, in consultation with student representatives, shall establish a fee policy for such institution. Such policy shall be subject to the modification and approval of the governing board of the institution, in accordance with the requirements of the Institutional Plan for Student Fees as outlined in section 3.02.
- 3.1.6 For all Colorado Community College System Institutions - The State Board for Community Colleges and Occupational Education shall meet with the Student Advisory Council, established in C.R.S. 23-60-104, to establish a

fee policy for all institutions under its control. Such policy shall be subject to the modification and approval of the board, in accordance with the requirements of the Institutional Plan for Student Fees as outlined in section 3.02.

3.17 For Institutions Located at the Auraria Campus - The administration of the Auraria Higher Education Center and the Student Advisory Council to the Auraria Board (SACAB) shall establish a fee policy for the institutions located at the Auraria Campus. Such policy shall be for all fees assessed by the Auraria Higher Education Center and is in addition to the policy each institution will have with its respective governing board. The policy shall be consistent with the requirements of section 3.06 and C.R.S. 23-70-107 relating to student fees assessed by the Auraria Board. Such policy shall be subject to the modification and approval of the board, in accordance with the requirements of the Institutional Plan for Student Fees as outlined in section 3.02.

3.18 The student body of the institution, through its duly elected student government may institute rules and processes for assessing student input, including referenda and student government resolutions. No new fee, fee increase, or fee extension that is defeated by a vote of the student body may be resubmitted for a student vote until the following regularly scheduled student government election.

### 3.2 Institutional Plan for Student Fees:

- All fees are subject to the requirements of C.R.S. 23-5-119.5 and section 3.02 of this policy. Governing boards must ensure the opportunity for student involvement in the development and subsequent revisions to the applicable institutional plans for student fees. A governing board shall review its institutional fee plans annually.

Institutional fee plans shall be publicly available on the individual institution's website.

A current and accurate copy of each institution's Institutional Plan for Student Fees and any revisions to the plan must be filed with the Department of Higher Education (DHE) by September 1<sup>st</sup> of each year with the Tuition and Fee Survey outlined in section 5.00.

Institutional Plans for Student Fees are to contain information, guidance, policies, and procedures with regards to all fees assessed at the institution. Each Institutional Plan for Student Fees shall include, but not be limited to, the following components:

- Definition and categorization of all student fees based on categories deemed relevant by the governing board. Description of the purposes for each fee established at the institution(s).
- Established procedures and the method and level of student participation in establishing, setting, reviewing, modifying, and discontinuing student fees and fee rates at the institution.
- An established complaint resolution process for disputes on the imposition or amount of a student fee.”
- A time frame for budget approval and board action on tuition and fees.
- Language that specifies whether to allow for the use of student fees or tuition for academic facilities construction and describes the method and level of student involvement in any such decision. Established procedures for any student vote or referendum relating to student fees.
- A list and description of any administrative costs charged to students or student groups for the administration of the student fee. These costs may vary by type or category of fee.
- Established procedures for the institutional review of fee fund balances. The institution shall determine the threshold at which such reviews are required and may utilize different thresholds for different fees.

A clear and transparent process for the regular review and evaluation of: fee rate assessments, fee expenditures, and institution fee policies. The institution may determine whether such reviews are to be conducted by institutional administration, independent internal entities (e.g., departments and offices review each other), or independent, external entities. The processes may vary by type or category of fee.

#### .1 Disclosure Requirements:

Each institution of higher education shall separately disclose the fees charged to the students by their respective governing board for the institution, by the institution, or by any auxiliary facility associated with the institution in its student billing statements.

This requirement shall apply to fees; however, such itemization shall not be required for any academic and instructional fee that is specifically listed in the course catalogue.

- If a governing board uses revenues from a general student fee for the

repayment of bonds or other debt obligations, the governing board shall specify the portion of the general student fee that is actually applied to repayment of the bonds or other debt obligations.

- 321 Each institution shall provide a tuition calculator on its website to enable prospective students, current students, and the general public to accurately assess the cost of attendance at the institution.

Each institution shall make information available to students and the general public on its website containing a description of all current fees, including the purposes for which the institution uses revenues from the fees.

- 3.3.3 Each billing statement shall conspicuously identify any optional fees or charges that are automatically assessed unless the student chooses not to pay the fee through a negative check off.

- A form or method to elect not to pay the optional fees shall accompany the billing statements.

Any optional fees or charges that are automatically assessed unless the student chooses not to pay, except for health care fees, shall be refunded by the institution or organization that receives the fee, upon request, to any student who paid the fee. The refund shall be available during the entire semester in which the student paid the fee.

#### 3.4 Fees Related to Bonds Issued on Behalf of Auxiliary Facilities

All governing boards shall follow the procedures outlined in statute regarding fees related to bonds issued on behalf of auxiliary facilities. Procedures for fees related to bonds issued on behalf of auxiliary facilities are outlined in C.R.S. 23-5-119.5

#### 4.00 Use of Tuition and Fees for Academic Facilities Construction

Student fees or tuition may be used for academic facilities construction if approved for use in the institutional plan for student fees as outlined in section 3.02.

#### 5.0 Reporting Requirements

- 5.1 By September 1 of each year, each governing board is required to submit to

the DHE a report detailing:

- Tuition rates by credit hour for all differentials assessed to undergraduate, graduate, and professional degree and non-degree seeking students.
- Fee rates by credit hour for all fees assessed to undergraduate, graduate, and professional degree and non-degree seeking students.
- Current and accurate copies of all current Institutional Plans for Student Fees.
- Reporting and explanation of any changes in current student fee rates and all new student fees as including the date of governing board review and approval.
- Other information as may be required by the DHE.

## 5.2 Tuition and Fee Report

By January 15 of each year, the DHE will submit to the Commission for approval and distribution to the Education Committees of the House of Representatives and the Senate of the Colorado General Assembly a report summarizing:

- Tuition decisions made by each Governing Board and their consistency with Commission policy and legislative intent.
- Fee decisions made by each Governing Board and their consistency with Commission policy.

- Significant changes or trends in tuition and fees throughout the state.

## 6.00 Tuition and Fee Appropriation Over-Expenditure

Anytime a governing board exceeds its appropriation for tuition set by the General Assembly in the long bill, the Department of Higher Education will review the reasons for the increase in revenue, in order to determine that tuition policies have been followed, and whether a supplemental appropriation for spending authority should be requested.

Governing boards shall notify the Department of any projected over-expenditure in tuition spending authority following the deadlines established in the budget calendar. If the over-expenditure is due to increases in enrollment the Commission may transfer spending authority from the Enrollment/Tuition Contingency line from the annual long bill to the requesting Governing Board.
