

HOW MANY CURRENTLY ENROLLED (FALL 2007) AISD STUDENTS FAILED BOTH 2006 AND 2007 TAKS READING/ENGLISH LANGUAGE ARTS (ELA) OR MATHEMATICS? HOW MANY CURRENTLY ENROLLED (FALL 2007) AISD STUDENTS PASSED BOTH 2006 AND 2007 TAKS READING/ELA OR MATHEMATICS?

Response:

TAKS data in reading/English language arts (ELA) and mathematics from 2006 and 2007 for currently enrolled AISD students (Fall 2007) were examined to find out how many students failed both tests, passed both tests, or failed one but not the other, for two consecutive years.

How many currently enrolled AISD students (Fall 2007) failed or passed 2006 and 2007 TAKS reading/ELA or mathematics?

For currently enrolled AISD students (as of November 13, 2007) who had a scored test on both TAKS 2006 and 2007 reading/ELA and mathematics (n = 29,531), 18,276 (62%) currently enrolled students who passed both TAKS reading/ELA and mathematics both years, and the largest numbers of these are 5th graders (n = 2,826). There are 1,652 (6%) who failed all 4 tests (both TAKS reading/ELA and mathematics in 2006 and 2007), and the largest number of these students are currently 9th graders (n = 443). The remaining students failed 1 of the 4 tests during this two-year period. For instance, 10% of students passed both 2006 and 2007 reading/ELA but failed one mathematics test in those 2 years, and most of these students are currently 7th (15%) or 12th (14%) graders. Approximately 7% passed both years' reading/ELA tests, but failed both mathematics tests in the same period, and most of these students (21%) are currently 7th graders. A summary of the data is presented in the following table.
