<sup>1</sup> These figures will not agree with the number of urban places of 2,500 population and more as shown by the U. S. Census because where two urban areas use 1 school system jointly, population classification is given in this directory for the name of the city by which the school system is known.

### 1. PRINCIPAL SCHOOL OFFICERS IN CITIES AND OTHER URBAN PLACES OF 2,500 POPULATION AND MORE<sup>1</sup>

[Explanation: Listing is by State, urban community, population for the city or area served by the school system where obtainable (census of 1940), and those persons reported to be filling the positions of superintendents, business managers (B. M.), and research directors (R. D.), regardless of local titles. Information for this section of the Educational Directory is collected by postal card. In September a card is sent to the superintendent of schools of each city with a population of 2,500 or more, as listed in the U. S. Census for 1940, requesting that changes in chief school officers be noted and the card returned at once. *If the card is not returned previous listings are used.*]

<sup>1</sup> These figures will not agree with the number of urban places of 2,500 population or more as shown by the U. S. Census because where 2 urban areas use 1 school system jointly, population classification is given in this directory for the name of the city by which the school system is known.

### 1. PRINCIPAL SCHOOL OFFICERS IN CITIES AND OTHER URBAN PLACES OF 2,500 POPULATION AND MORE<sup>1</sup>

[Explanation: Listing is by State, urban community, population for the city or area served by the school system where obtainable (census of 1940), and those persons reported to be filling the positions of superintendents, business managers (B. M.), and research directors (R. D.), regardless of local titles. Information for this section of the Educational Directory is collected by postal card. In September a card is sent to the superintendent of schools of each city with a population of 2,500 or more, as listed in the U. S. Census for 1940, requesting that changes in chief school officers be noted and the card returned at once. *If the card is not returned previous listings are used.*]

<sup>1</sup> In a few States the schools in all cities are under the supervision of the local county superintendent, and in several other States some of the cities have this administrative arrangement. As part I of the Educational Directory (State and County School Officers) is not compiled by the U. S. Office of Education until after the November elections, the listings therein of county superintendents invariably show some changes over part II which is compiled in October.
