<sup>1</sup> These figures will not agree with the number of urban places of 2,500 population or more as shown by the U. S. Census because where 2 urban areas use 1 school system jointly, population classification is given in this directory for the name of the city by which the school system is known.

### 1. PRINCIPAL SCHOOL OFFICERS IN CITIES AND OTHER URBAN PLACES OF 2,500 POPULATION AND MORE <sup>1</sup>

[Explanation: Listing is by State, urban community, population for the city or area served by the school system where obtainable (census of 1940), and those persons reported to be filling the positions of superintendents, business managers (B. M.), and research directors (R. D.), regardless of local titles. Information for this section of the Educational Directory is collected by postal card. In September a card is sent to the superintendent of schools of each city with a population of 2,500 or more, as listed in the U. S. Census for 1940, requesting that changes in chief school officers be noted and the card returned at once. *If the card is not returned previous listings are used.*

<sup>1</sup> In a few States the schools in all cities are under the supervision of the local county superintendent, and in several other States some of the cities have this administrative arrangement. As part I of the Educational Directory (State and County School Officers) is not compiled by the U. S. Office of Education until after the November elections, the listings therein of county superintendents invariably show some changes over part II which is compiled as of October.

†—Preceding any of the above letters indicates that the institution is rated in class B.

‡—Preceding any of the above letters indicates that the institution is provisionally accredited, or accredited with some reservation, or is admitted on probation.

A dash (—), instead of any of the above symbols, indicates that the institution is not accredited by any national or regional accrediting association.

The accreditation or approval of colleges and universities by State departments of education or State universities is not shown in this directory, but may be found in U. S. Office of Education Bulletin 1944, No. 3, entitled "Accredited Higher Institutions."

County and County School Officers and City and City School Officers.....	2
Superintendents of Catholic Parochial Schools.....	111

*Explanation:* County school officers; i. e., superintendent, business manager (B. M.), and research director (R. D.), are listed by State and by county or similar area. (For example, in Connecticut the towns constitute a unit for supervisory purposes.)

City school officers; i. e., superintendent, business manager (B. M.), and research director (R. D.), are also listed by State, and by city or urban community if incorporated and having a population of 2,500 or more. For each State the list of city school officers follows the list of county school officers. The number in parenthesis after the name of each city, if incorporated, indicates the population according to the 1940 census.

Officers of Catholic parochial schools are listed by city according to the headquarters of the supervising official.

Information for this section of the educational directory is collected in September. A request is sent to each State department of education asking for a correct list of county school officers, and another request is sent to the superintendent of schools of each city having a population of 2,500 or more, as listed in the U. S. Census Report for 1940, asking for a correct list of the chief city school officers. *If the information is not provided, previous listings are used.*

\* In a few States, having the county unit plan for school administration, all schools of each county are under the supervision of the county superintendent; in some other States this is true for some city schools, but not for all. (See footnote 1 in connection with certain States.)

## PART 2

### COUNTY AND CITY SCHOOL OFFICERS AND SUPERINTENDENTS OF PAROCHIAL SCHOOLS

---

#### CONTENTS

	Page
County and County School Officers and City and City School Officers.....	2
Superintendents of Catholic Parochial Schools.....	77
Superintendents of Lutheran Parochial Schools.....	82

---

#### *Explanation:*

County\* school superintendents with their post office addresses are listed by State and by county. (*See* footnote.)

City school officers (superintendent, business manager B. M., and research director R. D.) are listed by State and by school district (city, town, borough, or village) if, according to the 1940 census, the population was 2,500 or more. The list of these officers, for each State, follows the list of county school superintendents. The number in parenthesis which follows the name of the school district or city, indicates the population.

Superintendents of Catholic parochial schools with their addresses are listed according to Archdiocese and Diocese.

Superintendents of Lutheran parochial schools with their addresses are listed according to supervisory district.

---

\*The county, or part of it, is a unit for school supervision in most of the States. In a few States, all schools of each county are under the supervision of the county superintendent; in other States, this is true for some but not all schools of the county, for large city school systems commonly have their own school superintendents independent of the county school system. In the New England States, the county is not a unit for school supervision; there, the unit for this service (usually excepting certain city school systems) is composed of two or more town [township] school districts; in these States, such a unit for school supervision is designated "district" or "union." In New York, the unit for school supervision (excepting any school district with a population of 5,000 or more) is the county or a part of the county and is designated "district." In Utah, the unit for school supervision is a city, a county, or a part of a county and is designated "district." In Virginia, the unit for school supervision is a city, a county, or a union of two counties and is designated "division."

<sup>1</sup> Discrepancies between this table and the corresponding one for 1946-47 are due in part to actual changes in numbers and classification of institutions and in part to a change in the method of counting institutions. Branch institutions, counted in 1946-47, are this year listed with their parent institutions and omitted from the summaries. The 1946-47 total, adjusted for comparison to the 1947-48 total, is 1,685.
