CHAPTER XVIII.

STATISTICS OF NORMAL SCHOOLS.

This chapter presents the statistics of schools devoted to the professional training of teachers. There were 264 public and private normal schools reporting to this Bureau for the year ending June, 1906. In the regular training courses for teachers in these schools there were enrolled 68,937 students, as compared with 65,300 the preceding year. In 1906 there were 10,996 graduates, as compared with 10,360 in 1905.

In 1906 there were 181 public normal schools reporting to this Office, an increase of two since the preceding year. In these schools there were 3,059 instructors, as compared with 2,957 in 1905. The number of students in teachers' training courses increased from 54,521 in 1905 to 59,429 in 1906. The number of graduates from public normal schools in 1906 was 9,680, as compared with 9,274 the preceding year.

There was a decrease of six in the number of private normal schools reporting in 1906, the number being 83, as compared with 89 in 1905. In the same time the number of instructors decreased from 694 to 597, the number of students from 10,779 to 9,508, while the number of graduates increased from 1,086 in 1905 to 1,316 in 1906.

The following comparison with the statistics of 1890 will indicate the progress made by public and private normal schools in the sixteen years:

	1889-90.				1905-6.			
	Schools.	In-struct-ors.	Normal stu-dents.	Normal gradu-ates.	Schools.	In-struct-ors.	Normal stu-dents.	Normal gradu-ates.
Public normal schools.....	135	1,182	26,917	4,413	181	3,059	59,429	9,680
Private normal schools.....	43	274	7,897	824	83	597	9,508	1,316
Total.....	178	1,456	34,814	5,237	264	3,656	68,937	10,996

Public normal schools have had a steady growth since 1890, while the progress of private normal schools in the same period has been fluctuating. The largest number reached by the latter was in 1897, when there were reported to this Bureau 198 private normal schools, with 24,181 students. For the last nine years there has been a gradual decline in the number of schools and enrollment of students, although the quality of the work done by the remaining schools is undoubtedly superior to the average of 1897. Many of the weaker schools closed, while many others ceased to be distinctively training schools for teachers, becoming private secondary schools or business schools.

The 264 public and private normal schools in 1906 had 97,257 students in training courses for teachers. There were 972 other institutions in 1906 in which 28,340 students were pursuing courses of study preparatory to teaching. These included 269 universities and colleges, 464 public high schools, and 239 private high schools and academies. The following table shows the number and classes of institutions offering professional instruction to teachers, and the number of students in each class for the last four years:

Students in teachers' training courses reported for four years.

Classes of institutions.	1902-3.		1903-4.		1904-5.		1905-6.	
	Institutions.	Students.	Institutions.	Students.	Institutions.	Students.	Institutions.	Students.
Public normal schools.....	177	49,175	178	51,635	179	54,521	181	59,429
Private normal schools.....	109	14,939	91	11,992	89	10,779	83	9,508
Public universities and colleges.....	37	2,997	34	2,765	38	3,038	40	4,211
Private universities and colleges.....	204	8,340	196	7,396	213	8,649	229	9,560
Public high schools.....	458	6,665	449	7,488	390	10,476	464	9,021
Private high schools.....	279	5,887	272	5,963	296	6,177	239	5,528
Grand total.....	1,264	88,003	1,220	87,239	1,205	93,640	1,236	97,257
In all public institutions.....	672	58,837	661	61,888	607	68,035	685	72,661
In all private institutions.....	592	29,166	559	25,351	598	25,605	551	24,596

The 10,996 graduates of public and private normal schools in 1906 comprised about 16 per cent of the total number of students in training courses for teachers in these institutions for the year named. If the percentage of graduates from such courses in other institutions was about the same there must have been at least 14,500 trained teachers added to the teaching force of the country in 1906. Undoubtedly as many more with partial professional training joined the great army of more than half a million teachers. This estimate does not include the thousands who began teaching without any professional training whatever.

Tables 19 and 20 of this chapter show by States the distribution of students training for teaching, according to the classification in the above table.

PUBLIC NORMAL SCHOOLS.

Delaware, Nevada, and Wyoming make provision for the professional training of teachers in the State colleges. All the other States and Territories have public normal schools supported by taxation, direct or indirect.

For the school year ended June, 1906, the States and Territories paid \$4,643,365 for the running expenses of their public normal schools, an increase of \$511,759 over the preceding year. In addition, the expenditure for new buildings and improvements aggregated \$1,549,906. The following table, which is a synopsis exhibiting the aggregate of State appropriations for public normal schools for each year since 1889, will illustrate the growth of these institutions in this country:

Public appropriations to public normal schools for seventeen years.

Year.	For support.	For build-ings.	Year.	For support.	For build-ings.
1889-90.....	\$1,312,419	\$900,533	1898-99.....	\$2,510,934	\$560,896
1890-91.....	1,285,700	409,916	1899-1900.....	2,769,003	718,507
1891-92.....	1,567,082	394,635	1900-1901.....	3,068,485	709,217
1892-93.....	1,452,914	816,826	1901-2.....	3,228,090	906,301
1893-94.....	1,906,271	1,583,399	1902-3.....	3,582,168	1,268,742
1894-95.....	1,917,375	1,003,933	1903-4.....	3,927,808	915,443
1895-96.....	2,187,875	1,124,834	1904-5.....	4,131,606	1,684,789
1896-97.....	2,426,185	743,333	1905-6.....	4,643,365	1,549,906
1897-98.....	2,566,132	417,866			

The statistics of the 181 public normal schools will be found summarized in Tables 1 to 11, while Tables 21 and 22 give in detail such information concerning these schools as could be collected by this Bureau.

In 1906 the 181 public normal schools had 3,059 teachers engaged in the instruction of students pursuing teachers' training courses, 1,214 men and 1,845 women, as shown in Table 1. There were 1,016 teachers wholly in other departments, making the total number of teachers giving instruction in these institutions 4,075, the number of men being 1,352 and women 2,723.

Table 2 shows that there were 59,429 students in the teachers' training departments of the 181 schools, 12,539 men and 46,890 women. There were 803 students in business courses and 6,599 in other courses of secondary grade. There were 35,708 pupils in elementary grades, making an aggregate of 102,539 enrolled in these schools, as shown in Table 3. The number of colored normal students was 2,373, the number of men being 862 and women 1,511, most of them being in normal schools for the colored race in the Southern States. Table 3 also shows that the number of children in the model schools connected with public normal schools was 49,404. As shown in Table 4 the public normal schools had 9,680 graduates from teachers' training courses, 1,216 men and 8,464 women.

Tables 5 and 6 show that 159 of the 181 public normal schools reported their financial statistics to this Office. The aggregate of \$4,643,365 was received from public appropriations for support by 157 schools; 120 received \$631,680 from tuition; 16 received \$142,941 from productive funds; and 37 received \$341,167 from sources not named. The aggregate income of 159 schools was \$5,759,153 for the year. This does not include the \$1,549,906 appropriated from public funds for buildings and improvements.

The aggregate value of property possessed by 152 of the 181 schools was \$31,738,192, as shown in Table 6. The libraries of 167 schools contain 981,033 volumes, of an estimated value of \$1,245,086.

The annual appropriations for the support of the public normal schools of each State for the past six years are shown in Table 7, while Table 8 exhibits the appropriations for buildings and improvements for the same period.

The above table is a synopsis showing the number and per cent of the 59,429 students in training courses for teachers pursuing each of the nine leading branches of professional training in the public normal schools of the United States. Tables 9, 10, and 11 give the summaries by States, showing the number of students by sex in each of the branches reported.

PRIVATE NORMAL SCHOOLS.

The statistics of the 83 private normal schools are summarized in Tables 12 to 17, these tables being similar in form to Tables 1 to 6 for public normal schools. The total number of teachers employed in the private normal schools was 1,327, only 597 being teachers of students who were in teachers' training courses, while 730 were wholly employed in other departments. Of the total enrollment of 30,653 in all departments of private normal schools in 1906 only 9,508 were in the departments for the professional training of teachers.

The aggregate income of 64 of the 83 private normal schools was \$989,771. The total value of property possessed by 59 of the schools was \$5,566,008, and 67 had libraries containing 177,095 volumes.

A comparison between public and private normal schools is made in Table 18. In public normal schools the male students comprised only about 21 per cent of the enrollment, while they comprised 40 per cent in the private normal schools. Over 16 per cent of the professional students in public normal schools graduated in 1906, while less than 14 per cent of such students graduated from the private normal schools. The statistics of the 83 private normal schools are given in Table 23.

CHAPTER XIX.

STATISTICS OF SECONDARY SCHOOLS.

This chapter is devoted to a statistical review of secondary education in the United States for the year ended June, 1906. In most of the State school systems the public schools are divided according to a well-devised scheme of studies into twelve grades. The first eight are known as the elementary grades, and the grades from nine to twelve, inclusive, are the secondary or high school grades. In one or two States all above the sixth grade are known as secondary grades, but generally the secondary school is the high school. The grades in private schools correspond very closely to the grades of the public schools. Public secondary or high schools, private high schools, academies, and seminaries, and college preparatory schools maintain practically the same grades. The table which follows gives in condensed form the four courses of study recommended by the committee of ten on secondary school studies to the National Educational Association in 1893. The figure "1" indicates that the study is to be pursued a whole year, and the " $\frac{1}{2}$ " limits the study to half a year. The notes explain the provisions for optional studies.

Secondary school studies recommended by the Committee of Ten (1893), showing time devoted to each study.

Studies.	The four courses of study.															
	Classical.				Latin-scientific.				Modern languages.				English.

a German or French.
 b Latin, German, or French.
 c Geology or physiography.

d Botany or zoology.
 e Trigonometry and higher algebra, or history.

So far as could be ascertained by this Bureau the number of secondary students enrolled in all institutions in the United States for the year ending June, 1906, was 924,399, a gain of 48,349 over the preceding year, nearly all the increase being in the public high schools.

The secondary students reported for the two years were distributed among eight classes of institutions as follows:

Institutions.	1904-5.			1905-6.		
	Boys.	Girls.	Total.	Boys.	Girls.	Total.
Public high schools.....	288,391	391,311	679,702	305,308	417,384	722,692
Public normal schools.....	1,863	2,801	4,664	2,016	4,583	6,599
Public universities and colleges.....	8,967	2,656	11,623	9,805	2,854	12,659
Private high schools.....	51,778	55,429	107,207	49,106	52,649	101,755
Private normal schools.....	6,607	4,653	11,260	4,369	2,970	7,339
Private universities and colleges.....	32,043	14,792	46,835	35,951	16,464	52,415
Private colleges for women.....	5,627	5,627	7,895	7,895
Manual training schools.....	5,651	3,481	9,132	8,483	4,562	13,045
Total.....	395,300	480,750	876,050	415,038	509,361	924,399

The aggregate enrollment in the schools and colleges of the United States for the year ending June, 1906, was 18,434,847. In the elementary schools, public and private, the enrollment was 17,231,178. Of this number the public common schools had 15,919,278, while the estimated number in the private elementary schools was 1,311,900. It will be seen that the 924,399 secondary students comprise over 5 per cent of the aggregate enrollment in all the schools. The enrollment of secondary students in public and private institutions is given by geographical divisions for the two years mentioned in the following table, the percentage of increase or decrease being indicated:

Students receiving secondary instruction in public and private high schools and academies and in preparatory departments of colleges and other institutions.

	1904-5.			1905-6.			Per cent of increase.		
	Public.	Private.	Total.	Public.	Private.	Total.	Public.	Private.	Total.
United States.....	695,989	180,061	876,050	741,950	182,449	924,399	6.60	1.33	5.52
North Atlantic Division.....	226,834	52,702	279,536	241,633	56,874	298,507	6.52	7.92	6.79
South Atlantic Division.....	38,140	25,403	63,543	40,721	26,323	67,044	6.77	3.62	5.51

α Per cent of decrease.

The number of secondary students in both public and private institutions in 1890 was 367,003, or about 5.900 to the million of population; in 1895 the number had increased to 539,712, or 7.900 to the million; in 1900 the number was 719,241, or 9,500 to the million; while for the year 1906 the number of secondary students aggregated 924,399, or about 11,000 to the million population, or over 1 per cent. The following table makes the comparison for each year since 1890:

Secondary students and per cent of population.

Year.	In public institutions.		In private institutions.		In both classes.	
	Secondary students.	Per cent of population.	Secondary students.	Per cent of population.	Secondary students.	Per cent of population.

The remainder of this chapter will be devoted to a presentation of the statistics of the 9,560 public and private high schools reporting to this Office for the year 1905-6. While the number of secondary students in the preparatory departments of colleges and other institutions is given above, it has been found impracticable to collect complete statistics of such departments. The following table shows the progress of public and private high schools since 1890:

Public and private high schools since 1889-90.

Year reported.	Public.			Private.			Total.		
	Schools.	Teachers.	Students.	Schools.	Teachers.	Students.	Schools.	Teachers.	Students.
1889-90.....	2,526	9,120	202,963	1,632	7,209	94,931	4,158	16,329	297,894
1890-91.....	2,771	8,270	211,596	1,714	6,231	98,400	4,485	14,501	309,996

1900-1901.....	6,318	21,778	541,730	1,892	9,775	108,221	8,210	31,553	649,951
1901-2.....	6,292	22,415	550,611	1,835	9,903	104,690	8,127	32,318	655,301
1902-3.....	6,800	24,349	592,213	1,690	9,446	101,847	8,490	33,795	694,060
1903-4.....	7,230	26,760	635,808	1,606	9,566	103,407	8,836	36,326	739,215
1904-5.....	7,576	28,461	679,702	1,627	9,850	107,207	9,203	38,311	786,909
1905-6.....	8,031	30,844	722,692	1,529	9,787	101,755	9,560	40,631	824,447

The remarkable growth of public high schools in the last sixteen years is shown in the above table. In 1890 there were 2,526 public high schools, with 202,963 students, while in 1906 the number of schools had increased to 8,031, with 722,692 students. The number of private high schools increased up to 1895. Since that date there has been a decrease, the number reporting in 1906 being 1,529, with 101,755 students. The number of these private schools is now less than in 1890, although the number of students is considerably greater.

The relative progress of public and private high schools since 1890 may be learned from the following table:

Relative progress of public and private high schools in sixteen years.

Year reported.	Per cent of number of schools.		Per cent of number of teachers.		Per cent of number of students.	
	Public.	Private.	Public.	Private.	Public.	Private.
1889-90.....	60.75	39.25	55.85	44.15	68.13	31.87
1890-91.....	61.78	38.22	57.03	42.97	68.26	31.74
1891-92.....	66.19	33.81	57.42	42.58	70.40	29.60
1892-93.....	66.23	33.77	60.25	39.75	70.78	29.22
1893-94.....	66.67	33.33	60.21	39.79	70.91	29.09
1894-95.....	68.37	31.63	62.26	37.74	74.74	25.26
1895-96.....	70.25	29.75	64.21	35.79	78.11	21.89
1896-97.....	70.87	29.13	63.71	36.29	79.18	20.82
1897-98.....	72.76	27.24	65.72	34.28	81.03	18.97
1898-99.....	73.74	26.26	66.55	33.45	82.10	17.90
1899-1900.....	75.22	24.78	66.82	33.18	82.41	17.59
1900-1901.....	76.95	23.05	69.02	30.98	83.35	16.65
1901-2.....	77.42	22.58	69.36	30.64	84.02	15.98
1902-3.....	80.04	19.96	72.05	27.95	85.33	14.67
1903-4.....	81.82	18.18	73.67	26.33	86.01	13.99
1904-5.....	82.32	17.68	74.29	25.71	86.38	13.62
1905-6.....	84.01	15.99	75.91	24.09	87.66	12.34

From the above table it is seen that in 1890 about 68.13 per cent of the secondary students were in the public high schools and in 1906 over 87.66 per cent.

PUBLIC HIGH SCHOOLS.

The more important items of public high school statistics are summarized by States in Tables 1 to 13 in this chapter. Information in detail concerning the 8,031 schools is given in Table 31.

Table 1 shows that there were 30,844 teachers of secondary students in the 8,031 public high schools in 1905-6. This force included 16,508 men and 14,336 women. Of the 722,692 secondary students, 305,308 were boys and 417,384 girls. There was an increase of 16,917 in the number of boys and 26,073 in the number of girls in these schools over the preceding year. In the elementary grades connected with the high schools there were 176,604 pupils.

Table 2 shows that 36,151 students were preparing for the college classical course and 29,842 for college scientific courses. The number of graduates for the year ending June, 1906, was 85,449, an increase of 5,852 over the preceding year. Of the total number of graduates, 30,419 were college preparatory students, an increase of 2,123. The schools had 9,427 in military drill.

Tables 3 to 8, inclusive, show the number of students in each State in each of the leading high school studies. A synopsis of these tables is given below, preceded by items relating to the number of students preparing for college and the number of graduates.

Students in certain courses and studies in public high schools.

Courses, studies, etc.	Number of students.	Per cent of total number.	Boys.	Per cent of total number of boys.	Girls.	Per cent of total number of girls.
Students preparing for college:

Civics.....	126,361	17.48	54,583	17.88	71,778	17.20

The total number preparing for college was 65,993, an increase of 1,694 over the preceding year. The total number of graduates was 85,449, almost 12 per cent of the total number of students. Over 30 per cent of the graduates were college preparatory students.

It is shown that 363,091 students were studying Latin. This was more than half the total enrollment. Only 8,886 were studying Greek, 1.23 per cent of the total enrollment. It is somewhat misleading to make a comparison between the 363,091 students in Latin (50.24 per cent of the total enrollment) and the 8,886 students in Greek (1.23 per cent of the total enrollment). Where both languages are taught, students have the opportunity of studying Latin four years and Greek the last year of the course.

It is estimated that there were 310,758 students in the first year of the public high schools, 187,900 in the second year, 130,084 in the third, and 93,950 in the fourth year in 1906. If all the schools offered both languages, all the students would have the opportunity of studying Latin, while only 93,950, or the fourth-year students, would have the opportunity to study Greek. Moreover, it is known from Table 3 that 7,196 of the 8,031 schools had students in Latin and only 803 had students in Greek.

The per cent of students in each of the leading high school studies reported annually for the past eleven years is given in the table which follows:

Per cent of total number of secondary students in public high schools in certain courses and studies, etc.

Students and studies.	1895-96	1896-97	1897-98	1898-99	1899-1900	1900-1901	1901-2	1902-3	1903-4	1904-5	1905-6

The statistics of public high schools in cities of 8,000 population and over are compared with statistics for public high schools outside of such cities in Tables 10, 11, and 12. In the cities named there were 868 schools with 351,986 students, while the remaining 7,162 high schools outside of such cities had 370,706 students.

Table 13 is an exhibit of the equipment and income of public high schools in each State, so far as the information could be obtained. In most cases the accounts of high schools are not separated from the accounts of public school systems, and for this reason no satisfactory aggregate can be obtained or estimated as to the income of all the public high schools.

Of the 8,031 public high schools, 7,425 reported libraries aggregating 4,415,079 volumes, and 7,320 had property aggregating \$181,238,980 in value. Only 2,560 schools reported receipts from public appropriations, amounting to \$9,751,940.

PRIVATE HIGH SCHOOLS AND ACADEMIES.

The statistics of private high schools, academies, and seminaries are summarized in Tables 14 to 23. Tables 14 to 22, inclusive, are similar to Tables 1 to 9, relating to public high schools, and may be compared with those tables. Tables 23 and 13 may also be compared. Comparisons of certain averages computed for public and private high schools are made in Table 26.

The number of private high schools reporting to this Office for 1905-6 was 1,529. These schools had 9,787 teachers of secondary students and 101,755 secondary students, 49,106 boys and 52,649 girls. Of the secondary students 18,240 were preparing for college, 10,452 for the classical course, and 7,788 for scientific courses. There were 12,428 graduates in 1906, of whom 5,319 had prepared for college. There were 8,499 students in military drill.

The number of students in each of the leading high school studies in each State will be found by consulting Tables 16 to 21. The following table is a synopsis of the number and per cent of students, by sex, in college preparatory courses, the number and per cent of graduates, and the number and per cent in each of the high school studies in private secondary schools for the scholastic year ending June, 1906.

Students in certain courses and studies in private high schools.

Courses, studies, etc.	Number of students.	Per cent of total number.	Boys.	Per cent of total number of boys.	Girls.	Per cent of total number of girls.

The preceding table shows that nearly 18 per cent of the students in private secondary schools were preparing for college. Less than 10 per cent of public high school students were making such preparation. The per cent of students in Latin was nearly 49.63, as compared with nearly 50.24 per cent in the public high schools. In Greek the private high schools had about 6.25 per cent, as compared with 1.23 per cent in the public high schools.

The increased percentages in certain courses and studies, as shown in the following synopsis, indicate the progress made by private secondary schools in the last ten years:

Per cent of total number secondary students in private high schools and academies in certain courses and studies.

Table 23 shows the value of equipment, income, benefactions, endowments, etc., of private high schools, academies, and seminaries. The number of volumes in the libraries of 1,300 schools was 2,200,318. The value of the property of 1,152 aggregated \$74,014,676. Tuition fees amounting to \$4,861,643 were received by 772 schools.

Religious denominations control 831 of the 1,529 schools. Tables 24 and 25 show the number of schools in each State controlled by each leading denomination. In Table 32, which gives in detail the statistics of private secondary schools, the name of the denomination controlling each is given in column 4. The following is a synopsis of Tables 24 and 25:

Religious denomination and nonsectarian.	Schools.	Instructors.	Students.
Nonsectarian	698	4,560	45,609
Roman Catholic	382	2,140	19,949

The total number of public and private high schools reporting was 9,560, with 40,631 secondary instructors and 824,447 secondary students. Of the aggregate, 354,414, or 43 per cent, were males, and 470,033, or 57 per cent, were females. There were 84,233 college preparatory students, or over 9 per cent of the whole. The graduates for 1906 numbered 97,877, or 10.59 per cent, of the enrollment for the school year. The number of graduates prepared for college was 35,733, or 36.51 per cent of the number graduating.

The following synopsis showing the percentage of students in certain studies from year to year will indicate the progress made by the secondary schools of the country in the past ten years:

Per cent of the total number of secondary students in public and private high schools and academies in certain courses and studies, etc.

Students and studies.	1895-96	1896-97	1897-98	1898-99	1899-1900	1900-1901	1901-2	1902-3	1903-4	1904-5	1905-6

^a Per cent of total number of graduates.

In 1889-90 there were 100,152 students in public and private secondary schools studying Latin. This was 33.62 per cent of the total enrollment of secondary students in these schools for that year. In 1905-6 the number had increased to 413,595, or 50.17 per cent of the total number of high school students. Since 1890 the per cent of secondary students in algebra has increased from 42.77 per cent to 57.57 per cent in 1905-6. Percentages for other studies for eleven years are shown in the above table.

DISTRIBUTION OF SECONDARY STUDENTS.

From an examination of the enrollment of secondary students by grades in the high schools of a number of cities it appears that 43 per cent of the enrollment was in the first year, 26 per cent in the second, 18 per cent in the third, and 13 per cent in the fourth or graduating year. Upon this basis the following estimate may be made:

Secondary students in 1905-6.....	924,399
43 per cent in first year.....	397,491
26 per cent in second year.....	240,344
18 per cent in third year.....	166,352
13 per cent in fourth year.....	120,172

Tables 27 and 28 show by States and divisions the distribution of the 924,399 secondary students in the eight classes of institutions mentioned on the first page of this chapter.

Table 29 compares the number of students in secondary education with the total population. The number of secondary students to each 1,000 of population in 1906 was 11.01. The number of students in institutions of learning above the high school was 279,270, or 3.33 to the 1,000 population. This number includes all students who in 1905-6 were receiving higher instruction in universities and colleges, all professional students, including those in theology, law, medicine, dentistry, pharmacy, and veterinary medicine, and all in training courses for teachers in normal schools. Students in nurse training schools, business schools, and in schools for the defective classes are not here included as in either secondary or higher education.

Of the public high schools of the country there were 40 for boys only and 29 for girls only, all the others being coeducational. Of the private high schools there were 304 for boys only, 500 for girls only, and 725 coeducational. These comparisons are made by States in Table 30. Tables 31 and 32 give in detail the statistics of public and private secondary schools.

SECONDARY SCHOOLS.

CHAPTER XX.

MANUAL AND INDUSTRIAL TRAINING.

References to recent Reports of the United States Commissioner of Education, in which this subject has been treated or statistics published: Annual Report for 1888-89, pages 411-428, 1362-1367; 1889-1890, pages 1148, 1209-1212, 1351-1356; 1891-92, page 1197; 1892-93, pages 186, 188, 560-575; 1893-94, pages 877-949, 2093-2169; 1894-95, page 2170; 1895-96, pages 989-992, 1001-1152, 1321-1329, 1510-1521 (column 8); 1896-97, pages 193-197, 699-703, 2211-2222 (column 8), 2279-2294; 1897-98, pages 141, 194, 723, 2370-2382 (column 8), 2419-2440; 1898-99, pages 26, 83, 179-189, 208-209, 853-863, 1355-1361, 1442, 1448, 1525-1536 (column 8), 2139-2162; 1899-1900, pages 329, 875, 1811-1821 (column 8), 2437-2467, 2505; 1900-1901, pages 216, 217, 1510, 1961, 2231-2268, 2342-2372; 1901-2, pages 1294-1311 (column 9), 1959-2002; 1902-3, pages 1019-1046, 1427-1445 (column 9), 2139-2190; 1903-4, pages 1343-1361 (column 9), 2057-2108; 1904-5, pages 461-479 (column 9), 1165-1217.

There are in the United States 1,327 cities of 4,000 population and over having organized systems of public schools which were reported to this Bureau for the scholastic year ended June, 1906. Manual training was taught in the public schools of 510 of these cities. This was an increase of 90 over the preceding year. In 1890 only 37 city school systems included manual training in the course of instruction. In 1894 the number had increased to 95, in 1896 to 121, in 1898 to 146, in 1900 to 169, in 1901 to 232, in 1902 to 270, in 1903 to 322, in 1904 to 411, and in 1905 the number had increased to 420. Table 1 gives these figures by States and geographical divisions. Table 2 gives the names of the cities in which manual training was given in 1905-6, indicating for each city the grades in which it was taught.

In 1894 this Bureau received reports from 15 independent manual training schools. These schools had 3,362 students in manual training, 2,403 males and 959 females, all of secondary or high school grade. The next year, with the same number of schools reporting, there were 4,892 students, 3,621 males and 1,271 females. In 1897 the number of schools had increased to 40, with 13,890 students, 9,224 males and 4,666 females. Industrial training schools, or schools in which certain trades were taught, were included with the manual training schools proper, and since 1897 the statistics given are for "manual and industrial training." In 1898 there were 58 manual and industrial training schools, with 18,977 students, 12,975 males and 6,002 females. All these were reported as students of secondary or high school grade. Those not actually pursuing secondary studies had been required to master certain secondary branches before entering. In 1899 the number of schools had increased to 66, with 20,701 students, 13,903 males and 6,798 females. In 1900 there were 69 schools, with 24,716 students, 15,819 males and 8,897 females. In 1901 the number of schools reporting was 78, with 28,981 students, 18,928 males and 10,053 females. In 1902 the number had increased to 85 schools, with 29,507 students, 18,771 males and 10,736 females. In 1903 there were 95 schools, with 33,062 students, 20,170 males and 12,892 females; and in 1904 there were 98 schools, with 36,680 students, 20,701 males and 15,979 females. In 1905 there were 106 schools, with 43,197 students, 25,571 males and 17,626 females; and in 1906 there were 113 schools, with 48,610 students, 31,153 males and 17,457 females. Tables 3, 4, 5, and 6 give the statistics for the ten years mentioned, showing the growth

of manual and industrial training schools since 1894. Every effort has been made to exclude from these tables the enumeration of all students below secondary or high school grade.

In 1906 reports were received from 211 manual and industrial training schools. These included the 113 of high school grade mentioned above, 37 of elementary grade, and 61 industrial schools for Indians. Table 7 gives a summary of the 211 schools. These schools had 82,545 pupils in manual and industrial training, 31,950 in elementary grades, and 50,595 in secondary or high school grades. Of those in secondary grades 20,525 were not receiving literary instruction, but were regarded as students of high school grade before admission. The actual number receiving literary instruction of secondary school grade in these 211 schools was 30,070. It may be noted also that of the elementary pupils in industrial training 8,809 were not receiving literary instruction. The actual number receiving such instruction of elementary grade was 23,141. Table 7 also shows that the 211 schools had 1,472 teachers of elementary and secondary studies and 2,526 instructors in manual and industrial training. Table 8 gives, by sex, the number of teachers and students already shown by totals in Table 7. The statistics of the 61 Indian schools are included in these two tables. Nine of the Indian schools had 1,985 students of high school grade and the 61 had 11,108 pupils of elementary grades in industrial training.

So far as the requisite data could be obtained Table 9 gives a summary of the finances of manual and industrial training schools, not including the schools for Indians. The aggregate value of buildings, machinery, tools, and other equipment for the schools reporting was \$10,909,223. These schools had a total expenditure for the scholastic year of \$1,899,002. Of this amount \$1,108,615 was for pay of teachers, \$249,521 for materials, \$123,553 for new tools and repairs, and \$417,313 for incidentals and for purposes not classified.

Table 10 gives in detail the number of students and teachers in the 150 manual and industrial training schools, exclusive of Indian schools. Table 11 is a statistical showing for the 61 schools for Indian children. Tables 12 and 13 show the number of pupils in each branch of industrial or manual training in each school from which this information could be obtained. Industrial training is offered in most of the negro schools, reform schools, and schools for defectives, statistics of which will be found in the chapters devoted to these classes of institutions.

Certain schools which could not be classified or fully reported as manual or industrial training schools and others giving incomplete statistics are mentioned below:

Cooper Union, New York, N. Y.; School of Industrial Art and Technical Design for Women, New York, N. Y.; New York School of Art, New York, N. Y.; The School of Industrial Art of the Pennsylvania Museum, Philadelphia, Pa.; The Rhode Island School of Design, Providence, R. I.; Pittsburg School of Design for Women, Pittsburg, Pa.; Wells Memorial Institute, Boston, Mass.; The Young Women's Christian Association, Boston, Mass.; Bliss Electrical School, Washington, D. C.; School of Messrs. R. Hoe & Co., New York, N. Y.; Illinois College of Photography, Effingham, Ill.; Waltham Horological School, Waltham, Mass.; Omaha Watch Repairing, Engraving, and Optical Institute, Omaha, Nebr.; St. Louis Watchmaking School, St. Louis, Mo.; The Industrial Chemical Institute, Milwaukee, Wis.; Wahl-Henius Institute of Fermentology, Chicago, Ill.; National Brewers' Academy, New York, N. Y.; United States Brewers' Academy, New York, N. Y.

		Greensboro.....	3 to 7.
		Salisbury.....	Fourth.
		Washington.....	1 to 7.
		NORTH DAKOTA.	
		Fargo.....	1 to 8 and high school.
		Valley City.....	Primary.

TABLE 2.—*Cities in which manual training (other than drawing) was given in the public schools, 1905-6—Continued.*

City.	Grade in which manual training was given.	City.	Grade in which manual training was given.
OHIO.		TENNESSEE.	
Canton.....	7 to 8.	Chattanooga.....	Eighth.
Cincinnati.....	Do.	Jackson.....	4 to 7.
Cleveland.....	All grades.	Knoxville.....	All grades.
Conneaut.....	1 to 5.	Nashville.....	1 to 9.
Coshocton.....	7 to 8.		
Dayton.....	1 to 8 and high school.	TEXAS.	
Delaware.....	Elementary.	Austin.....	7 to 11.
Elyria.....	5 to 10.	Belton.....	Do.
Fostoria.....	1 to 8.	Beaumont.....	6 to 11.
Galion.....	All grades.	Brownwood.....	1 to 6.
Greenville.....	7 to 12.	Cleburne.....	1 to 4.
Hamilton.....	7 and 8.	Corsicana.....	1 to 3.
Jackson.....	1 to 8.	Dallas.....	9 to 12.
Mansfield.....	1 to 3.	Fort Worth.....	8 to 11.
Mount Vernon.....	6 to 8.	Hillsboro.....	1 to 3.
Newark.....	Do.	Martin.....	High school.
Norwood.....	5 to 8.	Marshall.....	1 to 4.
Painesville.....	Eighth.	Paris.....	High school.
Portsmouth.....	First.	Sherman.....	All grades.
Toledo.....	In 4 upper grades.	Taylor.....	7 to 10.
Troy.....	All grades.	Victor.....	High school (colored).
Warren.....	1 to 3.	Waco.....	8 to 11.
Wapakoneta.....	All grades.		
Washington Court House.	Primary.	UTAH.	
Xenia.....	1 to 4.	Logan.....	1 to 3.
OKLAHOMA.		Provo City.....	All grades.
Oklahoma City.....	High school.	Salt Lake City.....	Do.
Ponca City.....	Third.	VERMONT.	
OREGON.		Montpelier.....	4 to 6.
Portland.....	5 to 9	St. Johnsbury.....	1 to 6.
PENNSYLVANIA.		VIRGINIA.	
Allegheny.....	All grades.	Bristol.....	First.
Altoona.....	Do.	Lynchburg.....	6 and 7.
Braddock borough.....	Fifth year and above.	Newport News.....	All grades.
Bradford.....	7 to 9.	Petersburg.....	Primary.
Conshohocken.....	All above primary.	Richmond.....	All grades.
Carlisle.....	High school (colored).	Staunton.....	Eighth.
Clearfield.....	7 to 8.	WASHINGTON.	
Eric.....	5 to 7.	Aberdeen.....	1 to 4.
Franklin.....	High school.	Ballard.....	1 to 10.
Harrisburg.....	Do.	Seattle.....	5 to 8 and high school.
Homestead.....	6 to 8.	Spokane.....	7 to 12.
Johnstown.....	Grammar and high school.	Tacoma.....	High school.
Kittanning.....	4 to 10.	Walla Walla.....	1 to 9.
Latrobe.....	Fourth.	WISCONSIN.	
Meadville.....	5 to 7.	Appleton.....	High school.
Monessen.....	7 and 8.	Ashland.....	All grades.
Monongahela.....	All grades.	Chippewa Falls.....	1 to 10.
Norristown.....	4 to 12.	De Pere.....	1 to 4.
Philadelphia.....	3 to 8.	De Pere (District 2).....	1 to 8.
Pittsburg.....	5 to 8.	Eau Claire.....	Do.
Scranton.....	8 to 9 and high school.	Fond du Lac.....	1 to 12.
Titusville.....	3 to 7.	Grand Rapids.....	4 to 10.
Westchester.....	1 to 8 and high school.	Janesville.....	9 to 12.
Williamsport.....	Primary.	Kaukauna.....	6 to 8.
Wilkes-Barre.....	High school.	Kenosha.....	6 to 8 and high school.
RHODE ISLAND.		Marshfield.....	6 to 9.
Newport.....	4 to 13.	Menasha.....	1 to 10.
Providence.....	High school.	Menomonie.....	All grades.
Woonsocket.....	7 to 9.	Milwaukee.....	Do.
SOUTH CAROLINA.		Madison.....	1 to 8.
Anderson.....	1 to 3.	Manitowoc.....	All grades.
Charleston.....	In the lower grades.	Marinette.....	7 to 8 and high school.
Columbia.....	Elementary.	Merrill.....	6 to 8.
Spartanburg.....	8 to 9.	Neenah.....	Sixth.
SOUTH DAKOTA.		Oshkosh.....	1 to 10.
Deadwood.....	8 to 10.	Racine.....	5 to 8 and high school.
Mitchell.....	1 to 5.	Sheboygan.....	4 to 7.
Sioux Falls.....	All grades.	Stevens Point.....	6 to 8 and high school.
		Superior.....	1 to 12.
		Wausau.....	All grades.
		WYOMING.	
		Cheyenne.....	1 to 3.

CHAPTER XXI.

COMMERCIAL AND BUSINESS SCHOOLS.

For the year ended June, 1906, this Bureau received reports from 4,925 institutions in which were enrolled 253,318 students in business and commercial studies. This was an apparent decrease of 9,480 in enrollment from the preceding year. This apparent decrease was probably not an actual falling off in attendance to the extent indicated, but was partly due to the failure of many commercial schools to respond to the Bureau's requests for information. Reports were received from 529 commercial schools in 1905, while only 477 reported in 1906. The regular business schools in 1906 had an enrollment of 130,085 students, universities and colleges had 11,868 business students, public and private normal schools 2,497, private high schools and academies 13,868, and public high schools 95,000. The following table gives a synopsis of these items compared with like statistics for 1905.

Class of institutions.	1904-5.				1905-6.			
	Number of schools	Male.	Female.	Total.	Number of schools.	Male.	Female.	Total.
Universities and colleges.....	191	7,909	2,468	10,377	178	8,910	2,958	11,868
Public and private normal schools..	52	1,561	1,071	2,632	52	1,538	959	2,497
Private high schools and academies.	696	8,178	5,216	13,394	718	8,183	5,685	13,868
Public high schools.....	3,468	42,636	47,673	90,309	3,500	45,000	50,000	95,000
Commercial and business schools....	529	84,621	61,465	146,086	477	74,366	55,719	130,085
Total.....	4,936	144,905	117,893	262,798	4,925	137,997	115,321	253,318

The organization of public business high schools and commercial departments and courses in public high schools has undoubtedly had the effect of checking the growth of commercial schools as private enterprises. However, it is well known that there are hundreds of small private business schools which do not report to this Bureau.

The following summary shows the fluctuations in enrollment of business students each year since 1890:

Students pursuing commercial studies.

Scholastic year.	In institutions not distinctly business schools.					In commercial and business schools.	Aggregate of students in commercial studies.
	Universities and colleges.	Normal schools.	Private high schools and academies.	Public high schools.	Total.

CHAPTER XXIII.

SCHOOLS FOR THE COLORED RACE.

[References to preceding publications of the United States Bureau of Education in which this subject has been treated: Annual Reports—1870, pp. 61, 337-339; 1871, pp. 6, 7, 61-70; 1872, pp. xvii, xviii; 1873, p. lxvi; 1875, p. xxiii; 1876, p. xvi; 1877, pp. xxxiii-xxxviii; 1878, pp. xxviii-xxxix; 1879, pp. xxxix-xlv; 1880, p. lviii; 1881, p. lxxxii; 1882-83, pp. xlviii-lvi, 85; 1883-84, p. liv; 1884-85, p. lxviii; 1885-86, pp. 596, 650-656; 1886-87, pp. 790, 874-881; 1887-88, pp. 20, 21, 167, 169, 988-998; 1888-89, pp. 768, 1412-1439; 1889-90, pp. 620, 621, 624, 634, 1073-1102, 1388-1392, 1395-1485; 1890-91, pp. 620, 624, 792, 808, 915, 961-980, 1469; 1891-92, pp. 8, 686, 688, 713, 861-867, 1002, 1234-1237; 1892-93, pp. 15, 442, 1551-1572, 1976; 1893-94, pp. 1019-1061; 1894-95, pp. 1331-1424; 1895-96, pp. 2081, 2115; 1896-97, pp. 2255-2333; 1897-98, pp. 2479-2507; 1898-99, pp. 2201-2225, lxxxviii-xcii; 1899-1900, pp. 2501-2531; 1900-1901, pp. 2299-2331; 1901-2, pp. 191-224, 285-307, 2063-2095; 1902-3, pp. 2253-2285; 1903-4, pp. 2175-2207; 1904-5, pp. 1293-1327; Circulars of Information—No. 3, 1883, p. 63; No. 2, 1886, pp. 123-133; No. 3, 1888, p. 122; No. 5, 1888, pp. 53, 54, 59, 60, 80-86; No. 1, 1892, p. 71; Special report on District of Columbia for 1869, pp. 193, 300, 351-400; Special report, New Orleans Exposition, 1884-85, pp. 468-470, 775-781.]

In the 16 former slave States and the District of Columbia there are separate schools for the whites and negroes. It is estimated that at the present time about 20 per cent of the public school funds in the South is for the support of schools for the negroes. For the year 1905-6 the sum of \$46,140,967 was expended for the schools of both races. The table which follows shows the common school enrollment in the South, separate as to race, each year since 1877. The annual expenditure for the schools for both races since 1870 is shown in the same table. The public school expenditure for the entire South since 1870 has aggregated \$864,383,520. It is estimated that at least \$155,000,000 of this sum has been expended to support common schools for the colored race.

Table 2 exhibits, by States, the comparative statistics of the common schools for both races for the year ending June, 1906. The totals for the South are compared with like items for the year 1889-90.

Public high schools for negroes are included in this table, and their statistics are also summarized separately in Table 3. There were 129 of these high schools in 1906 as compared with 146 the preceding year, the enrollment of secondary students being 6,576 as compared with 7,250 the year before. These public high school statistics are given in detail in the chapter on secondary schools. Tables 4 to 9 summarize the statistics devoted to the secondary and higher education of the negro race, excluding public high schools; Tables 10 and 11 give in detail the statistics of these schools so far as it was possible for this Bureau to obtain the information. A number of schools failed to respond to repeated requests for statistics.

CHAPTER XXIV.

STATISTICS OF REFORM SCHOOLS.

State reformatories, State industrial schools for juveniles, and other institutions of like character and purpose are classified in this chapter under the general head of reform schools. In nearly all cases the inmates have been committed in accordance with State laws, but not all have been guilty of criminal acts. The younger inmates, at least, have been rescued from criminal environment and placed in these schools for protection.

In the 97 reformatories and other schools of the classes indicated reporting to this Office in 1906 there were 37,683 inmates, 29,289 boys and 8,394 girls. There were 35,789 of the inmates receiving elementary instruction in the common branches, leaving only 1,894 not under such instruction. Only 824 teachers were employed, a seemingly inadequate number. There were 2,256 assistants caring for the inmates. There were 30,144 of the inmates learning useful trades.

The summarized statistics of the 97 reform schools are given by States in Tables 1 and 2 on the following pages. The commitments for the year numbered 13,307 and the discharges 13,803. Of the inmates, there were 30,406 white and 4,284 colored, so far as reported. So far as known, 16,834 were children of native parents and 9,707 children of foreign-born parents. Of the inmates committed, 3,264 could only read, and 2,072 could neither read nor write. So far as reported, the value of grounds and buildings occupied by these institutions aggregated \$26,162,659. Of expenditures for the year, the sum of \$1,413,911 was for buildings and improvements and \$3,967,278 for support.

In the North Atlantic Division there were 34 of the 97 schools. These schools had 326 teachers and 16,600 pupils. There were 17,546 inmates, 14,900 males and 2,646 females, 15,645 of the total number receiving industrial training. The value of grounds and buildings was \$14,444,175, or more than one-half the value of all the property occupied by reformatories in the United States. The expenditure for buildings and improvements was \$544,729 and for support \$1,837,782 for the year.

Reports were received from 15 reformatories in the South Atlantic Division. There were 3,137 pupils instructed by only 85 teachers. There were 206 assistants caring for inmates. In these schools 2,524 of the 3,470 inmates were learning useful trades. So far as reported, 2,201 of the inmates belonged to white schools and 1,162 to negro schools. The value of grounds and buildings was \$1,860,000. Expenditures on buildings amounted to \$72,843, while \$274,835 was expended for support. *

The South Central Division reported only 6 reform schools, with 54 teachers and 2,008 pupils. The institutions had 2,020 inmates, 1,730 being taught useful trades. In white reformatories there were 1,580 inmates and in negro schools 439. The value of grounds and buildings was \$725,000. For improvements there was an expenditure of only \$4,382 and for support \$239,270.

There are 31 reformatories in the North Central Division, with 309 teachers and 12,470 pupils. There were 13,073 inmates, 8,967 males and 4,106 females. Of the inmates, 8,879 were receiving training in useful trades. The 31 schools occupied property valued at \$8,151,838, upon which \$722,823 had been expended during the year. The expenditure for support was \$1,305,307.

In the Western Division there were 11 reform schools, with 50 teachers and 1,574 pupils. There were 1,574 inmates, 1,341 males and 233 females. The number taught useful trades was 1,366. The institutions occupied property valued at \$981,646. Buildings and improvements cost \$69,134, while \$310,084 was expended for the support of these institutions.

CHAPTER XXV.

SCHOOLS FOR THE DEFECTIVE CLASSES.

This chapter presents the statistics of schools for the blind, schools for the deaf, and schools for the feeble-minded for the year ended June, 1906. As noted in the detail tables, several important schools have failed to report for the past two years.

Schools for the blind.—The 39 schools reporting employed 479 teachers—162 men and 317 women. There were 149 teachers of music and 142 instructors in industrial departments. In the 39 institutions there were 4,205 pupils—2,264 boys and 1,941 girls. The number studying vocal music was 2,095; instrumental music, 2,266. There were 444 children in the kindergarten and 2,871 in the industrial departments. The schools had 118 graduates in 1906. The libraries had 105,785 volumes, the value of scientific apparatus was \$130,505, and the value of grounds and buildings \$7,505,478, on which \$109,472 was expended during the year. For salaries and other expenditures the aggregate was \$974,040. These items are given by States in Tables 1, 2, and 3 of this chapter, while the statistics of the schools will be found in detail in Tables 4 and 5.

Schools for the deaf.—This chapter gives statistics of 135 schools for the deaf, 59 State institutions, 60 public day schools, and 16 private day schools, with an aggregate enrollment of 12,270 pupils. The 59 State institutions report 1,242 teachers—436 men and 806 women—instructing 10,634 pupils—5,848 boys and 4,786 girls. These statistics are given by States in Tables 6 and 7. The number of pupils taught by the purely oral method was 4,548; by the manual method, 2,707, and by the combined system, 5,962. There were 594 pupils in the kindergartens, and the institutions had 238 graduates. Table 8 shows that the school libraries had 122,191 volumes. The value of scientific apparatus was \$13,970, and the value of grounds and buildings, \$13,370,576. Expenditures on grounds and buildings amounted to \$605,027, the aggregate for salaries and other expenses being \$2,556,459.

In the 60 public day schools for the deaf there were 143 teachers and an enrollment of 1,111 pupils—574 boys and 537 girls. The 16 private day schools had 80 teachers and 525 pupils—222 boys and 303 girls. The statistics of these public and private day schools will be found summarized in Table 9. Table 10 gives in detail the statistics of State schools for the deaf. Tables 11 and 12 give similar information concerning public and private day schools for the deaf. Table 13 indicates the branches of manual and industrial training taught in the State schools for the deaf.

Schools for the feeble-minded.—Table 14 summarizes the statistics of the 25 State schools and the 16 private schools for the feeble-minded. In the State institutions there were 16,500 pupils—8,872 boys and 7,628 girls—taught by 305 instructors. There were 1,271 assistants caring for the inmates. In the private institutions the enrollment was 853 pupils—472 boys and 381 girls—taught by 79 instructors. The State institutions cost \$2,442,665 for maintenance for the year. Tables 15 and 16 give in detail the statistics of the institutions for the feeble-minded. Table 17 shows the branches of manual and industrial training in the public institutions.

^b Thirteen day schools of the deaf belonging to the city school system.^a Statistics from the Annals of the Deaf.^e Statistics of 1904-5.

TABLE 13.—Branches of manual training taught in State schools for the deaf, 1905-6.

Name of institution.	Branches of instruction.	Number of in-structors.	Number of pupils.			
			Boys.	Girls.	Total.	
Alabama School for the Deaf, Talladega, Ala.	In industrial training		78	42	120	
	Sewing	2		42	42	
	Carpentry	2	30		30	
Arkansas Deaf Mute Institute, Little Rock, Ark.	Shoemaking	1	24		24	
	In industrial training		109	74	183	
	Sewing	1		53	53	
	Cooking	1		24	24	
	Carpentry	1		29	29	
	Wood turning	1	6		6	
	Carving	1	3	2	5	
	Tailoring	1	12	14	26	
	Shoemaking	1	33		33	
	Printing	1	9		9	
Institution for the Deaf and Blind, Berkeley, Cal.	Painting	1	4		4	
	In industrial training		34	20	54	
	Free-hand drawing	1	6	13	19	
	Mechanical drawing	1	6		6	
	Carpentry	1	17		17	
	Laundrying	1		40	40	
School for the Deaf and Blind, Colorado Springs, Colo.	Printing	1	17		17	
	In industrial training		72	51	123	
	Free-hand drawing		30	13	43	
	Sewing			51	51	
	Cooking			18	18	
	Sloyd, or knife work		40	18	58	
	Carpentry		10		10	
	Shoemaking		8		8	
	Farm or garden work		7		7	
	Printing		10		10	
	Painting		2		2	
American School at Hartford for the Deaf, Hartford, Conn.	In industrial training		61	31	92	
	Sewing	1		31	31	
	Cooking	1		21	21	
	Sloyd, or knife work	1	31		31	
	Laundrying	1		6	6	
	Dressmaking	1		13	13	
	Cabinetmaking	1	30		30	
	In industrial training		5	18	23	
Mystic Oral School for the Deaf, Mystic, Conn.	Free-hand drawing			10	10	
	Clay modeling		4	8	12	
	Paper cutting and folding		4	8	12	
	Sewing			14	14	
	Sloyd, or knife work		5		5	
	Carpentry		3		3	
	In industrial training		9		9	
The Kendall School, Washington, D. C.	Carpentry		9		9	
	In industrial training		10	18	28	
Florida Institute for Blind, Deaf, and Dumb, St. Augustine, Fla.	Sewing					
	Shoemaking	1		2	2	
	Laundrying			20	20	
School for the Deaf, Cave Spring, Ga.	In industrial training		114	102	216	
	In industrial training		179	150	329	
Indiana Institution for the Education of the Deaf and Dumb, Indianapolis, Ind.	Household work			150	150	
	Sewing			82	82	
	Cooking		4	18	22	
	Baking		2		2	
	Carpentry		26		26	
	Wood turning		22		22	
	Art work			36	36	
	Shoemaking		23		23	
	Laundrying			102	102	
	Sheet-metal work		6		6	
	Printing		20		20	
	Painting		3		3	
	Barbering		2		2	
	Harness making		2		2	
	General labor		97		97	
	International School for Blind and Deaf, Fort Gibson, Ind. Ter.	In industrial training		4	4	8
		Free-hand drawing	1	4		4
Sewing		1		4	4	
Cooking		1		4	4	
Laundrying				4	4	
Machine shop work			4		4	
School for Deaf, Council Bluffs, Iowa.	In industrial training		100	90	190	
	Free-hand drawing	1	75	90	165	
	Sewing			74	74	
	Sloyd, or knife work	1	12		12	
	Carpentry		18		18	
	Shoemaking	1	12		12	
	Laundrying	1		64	64

PREFATORY NOTE.

The Constitution of the United States provides that all powers not delegated by it to the General Government are reserved to the several States. The establishment and management of schools is one of the powers not thus delegated, and remains therefore with the individual States. Each State makes its own laws for the government of educational matters within its borders, and there is not, consequently, in the European sense of the term, a national system of education. The General Government, however, has not been indifferent to the education of the youth of the land, but has encouraged and aided the several States in the establishment and support of common schools and higher institutions of learning by large grants of public lands, by appropriations of money, and by the establishment of the Bureau of Education for the collection and dissemination among the people of the United States of information in regard to education.

While the General Government does not control education in the several States, it controls and makes provision for the United States Military and Naval academies, the various service schools for the training of officers connected with the military and the naval service, the Indian schools, the schools for natives of Alaska, the National Museum, and the Library of Congress. It supports largely the Howard University and the Columbia Institution for the Deaf and Dumb in Washington, and grants in the aggregate a large sum of money annually for the support of colleges of agriculture and the mechanic arts, and of agricultural experiment stations in the several States and Territories. It pays out of the general funds in the Treasury of the United States one-half of the cost of maintaining the public schools of the District of Columbia, and enacts all laws for the government of such schools.

The enactments of the Fifty-ninth Congress relating to education, aside from appropriations, are comparatively few in number, and are arranged in this compilation under the Executive Departments having to do with the carrying out of the several laws.

The appropriations by the Fifty-ninth Congress in behalf of education, including the continuing appropriations for colleges of agriculture and the mechanic arts under the acts of August 30, 1890, and March 4, 1907, amounting to over thirty-four millions of dollars, may be summarized as follows:

Summary of appropriations by the Fifty-ninth Congress for educational purposes, out of the general funds in the Treasury of the United States.

Object.	Amount.	
	Fiscal year 1907.	Fiscal year 1908.
Department of State:		
Student interpreters.....	\$18,000	\$18,000
War Department:		
United States Military Academy.....	1,664,706	1,929,703
Army War College.....	24,400	24,400
Service schools.....	70,742	108,500
Department of Justice:		
Reform School (District of Columbia).....	88,480	141,300
Navy Department:		
United States Naval Academy.....	1,171,598	853,265
Naval War College.....	18,100	18,700
Naval training stations.....	1,130,661	945,852
Department of the Interior:		
Bureau of Indian Affairs.....	4,400,342	4,440,495
Bureau of Education.....	175,220	275,270
Colleges of agriculture and the mechanic arts.....	1,200,000	1,440,000
Howard University, Washington, D. C.....	47,000	59,700
Columbia Institution for the Deaf and Dumb.....	70,000	67,500
Department of Agriculture:		
Agricultural experiment stations.....	1,168,660	1,290,220

Summary of appropriations by the Fifty-ninth Congress for educational purposes, etc.—Continued.

Object.	Amount.	
	Fiscal year 1907.	Fiscal year 1908.
Department of Commerce and Labor:		
Investigation of woman and child labor conditions.....		\$150,000
Library of Congress.....	\$789,805	822,885
Smithsonian Institution:		
International exchanges between United States and foreign countries.....	28,800	32,000
American ethnology.....	40,000	49,000
International catalogue of scientific literature.....	5,000	5,000
Astrophysical observatory.....	14,000	13,000
National Museum, building.....	500,000	1,250,000
National Museum, current expenses.....	240,080	250,080
National Zoological Park.....	a 47,500	a 47,500
Roadways and walks.....		15,000
Printing and binding.....	70,000	73,500
Casa Grande Ruin, Arizona.....		3,000
District of Columbia (one-half of total appropriations).....	1,188,193	1,287,167
Oklahoma (in lieu of Indian Territory lands).....	5,000,000	
Total.....	19,171,887	15,602,017

^a The total appropriation for each year was \$95,000, one-half payable from revenues of the District of Columbia.

DEPARTMENT OF STATE.

Student interpreters.—Appropriates \$18,000 for ten student interpreters at the United States legation to China, and six at the embassy to Japan, whose duty it shall be to study the language of the country to which they are assigned with a view to supplying interpreters to the legations and consulates in China and Japan. The salary of a student interpreter is fixed at \$1,000, with tuition at \$125 per annum, and each student interpreter must sign an agreement to continue in the service as interpreter to the legations and consulates in China and Japan, respectively, so long as his services may be required within a period of ten years. (Chap. 3337, June 16, 1906.)

Student interpreters.—Appropriates \$11,250 for ten student interpreters at the legation to China, and \$6,750 for six student interpreters at the embassy to Japan. (Chap. 1184, Feb. 22, 1907.)

TREASURY DEPARTMENT.

Revenue-Cutter Service.—The cadets of the Revenue-Cutter Service before receiving appointments as third lieutenants must complete a course of study under the direction of the Treasury Department. The course extends through three years, but this period may be reduced to two years in the discretion of the Secretary of the Treasury. The instructors are drawn from the corps of officers of the Revenue-Cutter Service, and in addition there are two civilian instructors appointed by the Secretary. The practice cutter *Itasca*, when not cruising at sea, is stationed at Arundel Cove, near Baltimore, Md. There is no specific appropriation made for the school of this service, but the expenses attending the instruction of the cadets are paid from the general appropriation for the service.

South Carolina.—Transfers to the State of South Carolina the sum of \$50,490 heretofore invested in United States bonds under the provisions of the act of March 3, 1873 (17 Stat., p. 600), as a fund for the use and support of free public schools in the parishes of St. Helena and St. Luke, S. C. (Chap. 933, Feb. 18, 1907.)

This fund arose from the sale of lands in South Carolina acquired by the United States under acts levying direct taxes; it has been held heretofore by the Secretary of the Treasury in trust, and the interest upon it applied to the support of schools in the parishes mentioned above.

WAR DEPARTMENT.

The educational activities of the War Department include the management of the United States Military Academy at West Point, N. Y., for the education of young men to be commissioned as officers of the Army on their graduation from the Academy; of the Army War College, Washington, D. C.; of the service schools at Fort Totten, N. Y., Washington, D. C., Fort Monroe, Va., Fort Leavenworth, Kans., and Fort Riley, Kans., for the special training of the younger officers of the Army, and of the army post schools for officers. These institutions are supported in part by specific annual appropriations by Congress. Nearly all the instruction at the schools is given by officers of the Army, detailed for the purpose from the various branches of the service. Their pay is not included in the appropriations made specifically for the several institutions, but is included in the lump sums appropriated for the pay of the Army. Therefore the specific appropriations for the several institutions are only a part of the actual annual cost to the United States of their operation, the large expense of teachers' salaries not being included.

The specific appropriations by the Fifty-ninth Congress for the educational work of the War Department are as follows:

Appropriations for educational purposes under the War Department.

Object.	Amount.	
	Fiscal year 1907.	Fiscal year 1908.
United States Military Academy:		
Current expenses.....	\$629,763	\$686,678
Grounds and buildings.....	1,034,943	1,243,025
School of Submarine Defense, Fort Totten, N. Y.....	16,000	16,000
Army War College.....	24,400	24,400
Engineer School, Washington, D. C.....	25,000	57,500
United States service schools.....	20,000	25,000
Army post schools for officers, equipment.....	9,742	10,000
Total.....	1,759,848	2,062,603

ORDNANCE AND ORDNANCE STORES.

Idaho, University of.—Authorizes the Secretary of War to donate to the University of Idaho two obsolete cannon, with their carriages and equipments. (Chap. 426, Jan. 28, 1907.)

State institutions.—Permits the loan of such obsolete ordnance and ordnance stores as may be available to State and Territorial educational institutions and to State soldiers' and sailors' orphans' homes, for purposes of drill and instruction. (Chap. 3938, June 30, 1906.)

Vincennes University, Indiana.—Authorizes the Secretary of War to donate to the board of trustees such obsolete arms and other military equipments as are now in the possession of the university, to be used in military instruction. (Joint Res., No. 34, June 25, 1906.)

DEPARTMENT OF JUSTICE.

The Reform School in the District of Columbia is under the control of a board of trustees consisting of seven members appointed by the President of the United States upon the recommendation of the Attorney-General. It is

supported by annual appropriations made by Congress. The legislation in its behalf by the Fifty-ninth Congress is as follows:

Reform School, District of Columbia.—Appropriates \$3,000 to enable the Attorney-General to procure plans for a main building upon a basis of construction of a building or buildings to cost not exceeding \$100,000. Appropriates \$4,500 for repair of main building and purchase of supplies. (Chap. 510, Feb. 27, 1906.)

Reform School, District of Columbia.—Appropriates \$50,000 for new building and \$30,980 for salaries, repairs, and miscellaneous expenses during year ending June 30, 1907. (Chap. 3914, June 30, 1906.)

Reform School, District of Columbia.—Appropriates \$85,000 for new buildings and \$56,300 for current expenses during the fiscal year 1908. (Chap. 2918, Mar. 4, 1907.)

NAVY DEPARTMENT.

The Navy Department is charged with the duty of conducting the United States Naval Academy at Annapolis, Md., the Naval War College at Newport, R. I., and the various naval training stations throughout the country for the training of naval apprentices. As in the institutions under the War Department, practically all of the instruction is given by commissioned officers, whose pay is included in the lump sum for pay of the Navy, and does not appear in the amounts appropriated annually for the specific educational work of the Navy Department. Such appropriations by the Fifty-ninth Congress are as follows:

Appropriations for educational purposes under the Navy Department.

Object.	Amount.	
	Fiscal year 1907.	Fiscal year 1908.
United States Naval Academy:		
Current expenses.....	\$389,061	\$440,728
Buildings.....	750,000	380,000
Salaries, pay department.....	2,017	2,017
Engineering experiment station.....	30,520	30,520
Naval War College.....	18,100	18,700
Naval training stations.....	1,130,661	945,852
Total.....	2,320,359	1,817,817

United States Naval Academy.—Granting authority to the Secretary of the Navy, in his discretion, to dismiss midshipmen from the United States Naval Academy, and regulating the procedure and punishment in trials for hazing at the said academy. (Chap. 1370, Apr. 9, 1906.)

Previous laws for the punishment of hazing at the United States Naval Academy required midshipmen found guilty of such offense to be dismissed from the service. The law mentioned above provides that the Secretary of the Navy, with the approval of the President, may dismiss a midshipman whose continued presence at the academy may be contrary to the best interests of the service. It provides also that the punishment for hazing may be other than dismissal and that no midshipman shall be dismissed for a single act of hazing except after trial by court-martial. The act defines hazing to "consist of any unauthorized assumption of authority by one midshipman over another midshipman whereby the last-mentioned midshipman shall or may suffer or be exposed to suffer any cruelty, indignity, humiliation, hardship, or oppression, or the deprivation or abridgment of any right, privilege, or advantage to which he shall be legally entitled."

LOANS OF PROPERTY TO SCHOOLS.

Military schools.—Authorizes the loan to one well-established military school of any State having seacoast line or bordering on one or more of the Great Lakes of one fully equipped man-of-war's cutter for every 25 cadets in actual attendance, and such other equipment as may be spared and be deemed adequate for instruction in elementary seamanship, provided the said school shall have adequate facilities for cutter drill, and shall have in actual attendance at least 140 cadets in uniform, receiving military instruction and quartered in barracks under military regulation, and shall have the capacity to quarter and educate at the same time 150 cadets. (Chap. 3612, June 29, 1906.)

Nautical School, Philippine Islands.—Permits the loan of a vessel of the United States Navy for the use of the school. (Chap. 3937, June 30, 1906.)

DEPARTMENT OF THE INTERIOR.

Among the duties with which the Secretary of the Interior is charged are included the supervision of public business relating to public lands, Indians, and education; the distribution of appropriations for colleges of agriculture and the mechanic arts in the several States and Territories; and the supervision of certain eleemosynary institutions in the District of Columbia. Certain of these duties are performed in the office of the Secretary, while others are assigned to the heads of the appropriate bureaus of the Department.

The Department and its bureaus are supported by annual appropriations by Congress, some of which are made specifically for the several bureaus, while others are made in a lump sum for the Department as a whole. The appropriations for printing and binding, stationery, postage, and contingent expenses, for example, are made to the Department as a whole. It is impossible, therefore, to ascertain in advance the amount of those appropriations for the years 1907 and 1908 that will be expended for educational purposes.

The bureaus of the Department having to do with educational matters are the Bureau of Indian Affairs and the Bureau of Education.

BUREAU OF INDIAN AFFAIRS.

To the Bureau of Indian Affairs is committed the charge of the Indian tribes of the United States (exclusive of Alaska), their lands, moneys, schools, etc. The following appropriations, including amounts made immediately available, were made by the Fifty-ninth Congress for the education of Indians:

Appropriations for education under the Bureau of Indian Affairs.

Object.	Amount.	
	Fiscal year 1907.	Fiscal year 1908.
Support of Indian day and industrial schools.....	\$1,300,000	\$1,300,000
School buildings and other improvements.....	450,000	400,000
Collection and transportation of Indian pupils.....	60,000	75,000
Superintendent of Indian schools, salary.....	3,000	3,000
Traveling expenses.....	1,500	1,500
Matrons to teach Indian girls in housekeeping.....	25,000	25,000
Farmers and stockmen to teach Indians.....	125,000	125,000
Indian schools:		
Fort Mojave, Ariz.....	45,000	47,000
Phoenix, Ariz.....	143,400	136,900
Truxton Canon, Ariz.....	27,045	23,470
Sherman Institute, Riverside, Cal.....	117,750	120,500
Fort Lewis, Colo.....	62,100	45,100
Grand Junction, Colo.....	42,500	43,200
Sac and Fox School, Iowa.....	15,860	16,560
Haskell Institute, Lawrence, Kans.....	160,250	162,750
Kickapoo School, Kansas.....	14,190	17,660
Mount Pleasant, Mich.....	58,900	56,100
Morris, Minn.....	28,550	29,650

Appropriations for education under the Bureau of Indian Affairs—Continued.

Object.	Amount.	
	Fiscal year 1907.	Fiscal year 1908.
Indian schools—continued.		
Pipestone, Minn.	\$51,175	\$16,075
Genoa, Nebr.	57,800	58,100
Carson City, Nev.	63,900	88,100
Albuquerque, N. Mex.	60,400	62,100

Hayward, Wis.	43,900	41,070
Tomah, Wis.	46,450	46,750
Shoshone, Wyo.	36,025	35,025
Deficiency appropriation:		
Navajo School, Arizona, and Zuni School, New Mexico.	42,143
Indian School, Grand Junction, Colo.	20
Riverside, Cal.	1,244
Indian Territory schools.	150,000	300,000
Annuity for education of Choctaws.	6,000	6,000
Education of—		
Quapaws.	1,000	1,000
Seminoles.	2,500	2,500
Sacs and Foxes.	200	200
Chippewas.	4,000	4,000
Pawnees (two manual-labor schools).	10,000	10,000
Moles.	3,000	3,000
Sioux.	225,000	200,000
Utes.	1,800	1,800
Transportation of Carlisle School pupils.	3,500
Transportation of Carlisle School pupils to Alaska.	3,705
Division of education, salaries of employees.	a 13,200	a 13,200
Office of superintendent of Indian schools, salaries of employees.	a 4,300	a 4,300
Total.	4,400,342	4,440,495

^a These amounts represent the salaries of employees in the division of education of the Bureau of Indian Affairs and in the office of the superintendent of Indian schools.

In addition to the sums appropriated specifically for educational purposes, the acts making appropriations for the Indian Department include a considerable number of appropriations to Indian tribes for general purposes, among which education may be included.

Schools in Indian Territory.—Directs the Secretary of the Interior to assume control and direction of the schools in the Choctaw, Chickasaw, Cherokee, Creek, and Seminole tribes, with the lands and all school property pertaining thereto, March 5, 1906, and to conduct such schools until such time as a public school system shall have been established under Territorial or State government, and proper provision made thereunder for the education of the Indian children of said tribes. (Chap. 1876, Apr. 26, 1906.)

By acts of Congress approved June 28, 1898 (30 Stat. L., 495), and March 3, 1903 (32 Stat. L., 982), it was provided that after March 4, 1906, all tribal institutions in the Indian Territory should be abolished. That enactment was made presumably under the supposition that by said date the Territory would be admitted to statehood. Such action having failed, it was necessary to provide otherwise for the continuance of the schools of the tribes; hence the legislation indicated above. The same act provides for the continuance of the tribal governments "for all purposes authorized by law, until otherwise provided by law."

Osage Boarding School, Oklahoma.—Sets aside from the royalties received from oil and gas taken from Osage Indian lands not to exceed \$50,000 per annum for ten years from January 1, 1907, for the support of the Osage Boarding School, and for other schools on the Osage Indian Reservation conducted or to be established and conducted for the education of Osage children. (Chap. 3572, June 28, 1906.)

BUREAU OF EDUCATION.

The Education Office of the United States was established as a Department of Education by an act of Congress approved March 2, 1867. By an act approved July 20, 1868, it was made, on July 1, 1869, a Bureau of the Department of the Interior. The purpose and duties of this Bureau, as defined in the act of Congress, are "to collect statistics and facts showing the condition and progress of education in the several States and Territories, and to diffuse such information respecting the organization and management of schools and school systems, and methods of teaching, as shall aid the people of the United States in the establishment and maintenance of efficient school systems, and otherwise promote the cause of education throughout the country." To these duties there have been added certain administrative functions in connection with the management of the education of natives in Alaska and of the reindeer industry in Alaska, and the appropriations made by Congress in behalf of the colleges of agriculture and the mechanic arts.

The Bureau is supported by annual appropriations made by Congress. The appropriations by the Fifty-ninth Congress are as follows:

Appropriations for objects under the Bureau of Education.

Object.	Amount.	
	Fiscal year 1907.	Fiscal year 1908.
Salaries:		
Commissioner of Education.....	\$3,500	\$3,500
Chief clerk.....	1,800	2,000
Statistician.....	1,800	1,800
Specialist in charge of land-grant college statistics.....	1,800	1,800
Translator.....	1,800	1,800
Collector and compiler of statistics.....	2,400	2,400
Specialist in foreign educational systems.....	1,800	1,800
Specialist in educational system.....	1,800	1,800
Two clerks of class 4.....	3,600	3,600
Two clerks of class 3.....	3,200	3,200
Four clerks of class 2.....	5,600	5,600
Seven clerks of class 1.....	8,400	8,400
Five clerks, at \$1,000 each.....	5,000	5,000
Six copyists.....	5,400	5,400
Two copyists, at \$800 each.....	1,600	1,600
Copyist.....	720	720
Skilled laborer (1 in 1907; 2 in 1908).....	840	1,680
Messenger.....		840
Assistant messenger.....	720	720
Two laborers.....	1,320	
Three laborers, at \$450 each.....	1,440	1,440
Laborer.....	400	400
Total for salaries.....	54,940	55,500
Books for library, current educational periodicals, other current publications, and completing valuable sets of periodicals.....	250	250
Collecting statistics for special reports and circulars of information.....	2,500	4,000
Purchase, distribution, and exchange of educational documents, and for the collection, exchange, and cataloguing of educational apparatus and appliances, text-books, and educational reference books, articles of school furniture and models of school buildings illustrative of foreign and domestic systems and methods of education, and for repairing the same.....	2,500	2,500
Rent of building.....	4,000	4,000
Education and support of natives of Alaska.....	100,000	100,000
Additional day schools for natives of Alaska.....		100,000
Reindeer for Alaska.....	9,000	9,000
Reindeer for Alaska, deficiency for 1905.....	2,030	
Total.....	175,220	275,250

In addition to the specific appropriations for the Bureau of Education, the Bureau shares in several appropriations made for the Department of the Interior as a whole. Such appropriations are those for contingent expenses, for stationery, for postage, and for public printing and binding. Of the appropriations for printing and binding, the sum of \$20,000 for each of the two fiscal years was made available for printing and binding the annual report of the Commissioner of Education. For the year ending June 30, 1908, the Department allotted tentatively the sum of \$40,000 for the printing and binding of the Bureau.

Education in Alaska.—With respect to education in Alaska, the act making appropriations for sundry civil expenses for the year ending June 30, 1908, provides "that all expenditure of money appropriated herein for school purposes in Alaska shall be under the supervision and direction of the Commissioner of Education and in conformity with such conditions, rules, and regulations as to conduct and methods of instruction and expenditure of money as may from time to time be recommended by him and approved by the Secretary of the Interior." (Chap. 2918, Mar. 4, 1907.)

Education in Alaska.—Permits the assignment by teachers and other employees of the United States Bureau of Education in Alaska of their pay, and authorizes the reimbursement of school teachers in Alaska for expenses incurred by them in the discharge of their duties and paid from their personal funds. (Public Res., No. 10, Mar. 21, 1906.)

Reindeer for Alaska.—In connection with the appropriation for reindeer, Congress provided that "all reindeer owned by the United States in Alaska shall as soon as practicable be turned over to the missions in Alaska, to be held and used by them under such conditions as the Secretary of the Interior shall prescribe." (Chap. 3914, June 30, 1906.)

That provision was modified by an act of Congress approved March 4, 1907 (chap. 2918), so as to read as follows: "All reindeer owned by the United States in Alaska shall as soon as practicable be turned over to missions in or natives of Alaska, to be held and used by them under such conditions as the Secretary of the Interior shall prescribe." The same act also authorized the sale of surplus male reindeer.

COLLEGES OF AGRICULTURE AND THE MECHANIC ARTS.

Under the provisions of an act of Congress approved August 30, 1890, popularly known as the "second Morrill Act," a continuing appropriation was made to each State and Territory in aid of the colleges of agriculture and the mechanic arts established under an act of Congress approved July 2, 1862. The amount appropriated by the act was \$15,000 for the year ending June 30, 1890, with an annual increase thereafter of \$1,000 over the amount for the preceding year until the annual appropriation to each State and Territory should amount to \$25,000, which sum should be appropriated annually thereafter. The total amount paid to the several States and Territories under that act for the year ending June 30, 1907, was \$1,200,000. During the second session of the Fifty-ninth Congress the following provision, known as the "Nelson amendment," was incorporated in the act making appropriations for the Department of Agriculture:

That there shall be, and hereby is, annually appropriated, out of any money in the Treasury not otherwise appropriated, to be paid as hereinafter provided, to each State and Territory for the more complete endowment and maintenance of agricultural colleges now established, or which may hereafter be established, in accordance with the Act of Congress approved July second, eighteen hundred

and sixty-two, and the Act of Congress approved August thirtieth, eighteen hundred and ninety, the sum of five thousand dollars, in addition to the sums named in the said Act, for the fiscal year ending June thirtieth, nineteen hundred and eight, and an annual increase of the amount of such appropriation thereafter for four years by an additional sum of five thousand dollars over the preceding year, and the annual sum to be paid thereafter to each State and Territory shall be fifty thousand dollars, to be applied only for the purposes of the agricultural colleges as defined and limited in the Act of Congress approved July second, eighteen hundred and sixty-two, and the Act of Congress approved August thirtieth, eighteen hundred and ninety.

That the sum hereby appropriated to the States and Territories for the further endowment and support of the colleges shall be paid by, to, and in the manner prescribed by the Act of Congress approved August thirtieth, eighteen hundred and ninety, entitled "An Act to apply a portion of the proceeds of the public lands to the more complete endowment and support of the colleges for the benefit of agriculture and the mechanic arts established under the provisions of the Act of Congress approved July second, eighteen hundred and sixty-two," and the expenditure of the said money shall be governed in all respects by the provisions of the said Act of Congress approved July second, eighteen hundred and sixty-two, and the said Act of Congress approved August thirtieth, eighteen hundred and ninety: *Provided*, That said colleges may use a portion of this money for providing courses for the special preparation of instructors for teaching the elements of agriculture and the mechanic arts. (Chap. 2907, Mar. 4, 1907.)

The administration of the act of August 30, 1890, and consequently of the Nelson amendment to the act of March 4, 1907, was committed by Congress to the Secretary of the Interior. The Bureau of Education acts as the medium of communication between the Department and the institutions concerned and collects and examines the reports that are to be made by these institutions to the Secretary of the Interior.

The total amount to be paid to these institutions for the year ending June 30, 1908, is \$1,440,000. The additional funds appropriated are to be expended for the same purposes as are the funds received under the act of August 30, 1890, with the proviso, however, that a portion of the increase may be expended for the training of teachers of the elements of agriculture and the mechanic arts.

LAND GRANTS.

The Fifty-ninth Congress did not make many grants of land for educational purposes, and, aside from the enactments in favor of California and Oklahoma, the few that were made are of minor importance. The Congress provided for large grants of land and money for a new State to be composed of the Territories of Arizona and New Mexico. As the offer of statehood was not accepted by Arizona under the conditions prescribed by Congress, the grants of land and money authorized for the new State became null and void, and are therefore not included in this summary.

States and Territories.—Ten per cent of all money received from each forest reserve during any fiscal year shall be paid at the end thereof to the State or Territory in which said reserve is situated, to be expended as the State or Territorial legislature may prescribe for the benefit of the public schools and public roads of the county or counties in which the forest reserve is located; the amount to be paid to any one county is limited to 40 per cent of the total income of such county from all other sources. (Chap. 3913, June 30, 1906.)

California.—Appropriates to the State of California 5 per cent of the net proceeds of the cash sales of public lands which have been heretofore made since the admission of said State, or may hereafter be made in said State, to aid in the support of the public or common schools. (Chap. 3557, June 27, 1906.)

Colorado Agricultural College.—Grants 160 acres of land to be used for forestry experimental purposes. (Chap. 2565, Mar. 2, 1907.)

Florida.—Conveys to the board of public instruction of St. Johns County a piece of ground in St. Augustine, known as "The Lines," for school purposes. (Chap. 1179, Feb. 21, 1907.)

Idaho.—Grants 3½ acres of land to school district No. 57, in Nez Perces County. (Chap. 3580, June 28, 1906.)

Montana.—Authorizes the Secretary of the Interior to dispose of the Fort Shaw Military Reservation, and to reserve for Indian school purposes that part of section 2 lying south of Sun River, all of sections 11, 14, and 23, and that portion of section 26 lying within the limits of the reservation. (Chap. 3066, June 9, 1906.)

Montana College of Agriculture and Mechanic Arts.—Leases one section of land for the period of ten years for the purpose of maintaining thereon experiments in so-called dry-land farming and other experimental farming operations connected with the institution. (Chap. 3586, June 28, 1906.)

Oklahoma.—Grants one section (640 acres) of land for the University Preparatory School. (Chap. 3617, June 29, 1906.)

Oklahoma (when admitted to the Union).—Grants sections 16 and 36 in every township in Oklahoma Territory for common schools. Appropriates \$5,000,000 for common schools in lieu of sections 16 and 36 and other lands of Indian Territory. Grants section 13 in the Cherokee Outlet, the Tonkawa Indian Reservation, and the Pawnee Indian Reservation for the use and benefit of certain institutions, as follows: The University of Oklahoma and the University Preparatory School, one-third; the normal schools, one-third; the Agricultural and Mechanical College and the Colored Agricultural and Normal University, one-third. Appropriates 5 per cent of the proceeds of the sales of public lands in said State as a permanent fund for the support of common schools. Grants, in lieu of lands for internal improvement and swamp-land grants, for the benefit of the University of Oklahoma, 250,000 acres; University Preparatory School, 150,000 acres; Agricultural and Mechanical College, 250,000 acres; Colored Agricultural and Normal University, 100,000 acres; normal schools, 300,000 acres. (Chap. 3335, June 16, 1906.)

Oklahoma.—Provides for the establishment of town sites and for the sale of lots within the common lands of the Kiowa, Comanche, and Apache Indians in Oklahoma, and reserves one block in each town site for the establishment of common schools under the laws of Oklahoma. (Chap. 1125, Mar. 20, 1906.)

Oklahoma.—Authorizes the legislature of the State of Oklahoma, when the State of Oklahoma shall have been admitted, to grant one section of school lands to the board of education of the city of Chandler, Lincoln County, for school purposes. (Chap. 2934, Mar. 4, 1907.)

Oklahoma, University of.—Grants one section of land reserved for common school purposes to the university for campus and building purposes, providing the legislature of Oklahoma shall assent thereto. (Chap. 1199, Feb. 25, 1907.)

Oklahoma: Sisters of St. Francis.—Grants to the order of the Sisters of St. Francis 160 acres of land on which the St. Louis school, near Pawhuska, is located, and 160 acres on which the St. Johns school, on Homing Creek, Osage Indian Reservation, is located. (Chap. 3572, June 28, 1906.)

South Dakota.—Provides for the sale and disposition of a portion of the surplus or unallotted lands in the Rosebud Indian Reservation in South Dakota, and grants sections 16 and 36 of such land in each township to the State of South Dakota for the use of the common schools. Appropriates \$165,000 to pay for the lands thus granted, at the rate of \$2.50 per acre. (Chap. 2536, Mar. 2, 1907.)

Utah.—Grants about 32 acres of the Fort Douglas Military Reservation to the University of Utah. (Chap. 2463, May 16, 1906.)

HOWARD UNIVERSITY, WASHINGTON, D. C.

Howard University was chartered by an act of Congress approved March 2, 1867, and received through the Bureau of Refugees, Freedmen, and Abandoned Lands about \$500,000, which was expended in lands and buildings. In 1879 Congress made its first general appropriation of \$10,000 toward the current expenses of the institution. Annual appropriations have been made since that time, the appropriations for 1907 being \$47,600, and for 1908, \$59,700.

COLUMBIA INSTITUTION FOR THE DEAF AND DUMB.

This institution was chartered by an act of Congress of February 16, 1857. By an act approved April 8, 1864, it was authorized to grant degrees, and in June of that year a department for the higher education of the deaf was organized. The institution is supported almost wholly by the Federal Government. The appropriations for the past two years have been as follows: 1907, \$70,000, including deficiency appropriation of \$2,500 for 1906; 1908, \$67,500. See also under "District of Columbia," page 1242.

DEPARTMENT OF AGRICULTURE.

Agricultural experiment stations.—Providing for an increased annual appropriation for agricultural experiment stations and regulating the expenditure thereof. (Chap. 951, Mar. 16, 1906.)

An act of Congress approved March 2, 1887, known as the "Hatch Act," provided for the establishment, in connection with the several colleges of agriculture and the mechanic arts established under an act of July 2, 1862, of departments to be known as agricultural experiment stations, and provided for an annual appropriation of \$15,000 to each State and Territory for the support and maintenance of such stations, to be specifically appropriated each year by Congress. The act authorized States in which agricultural experiment stations had been established separate from the colleges to apply to such stations the benefits granted by the act. The act of March 16, 1906, known as the "Adams Act," provides that in addition to the sum named in the act of March 2, 1887, there shall be paid to each State and Territory for the more complete endowment and maintenance of agricultural experiment stations the sum of \$5,000 for the year ending June 30, 1906, and that this additional appropriation shall be increased each year, for a period of five years, by the sum of \$2,000 over the preceding year, so that the total annual amount to be paid thereafter to each State and Territory shall be \$30,000. The funds appropriated by the act of March 16, 1906, are "to be applied only to paying the necessary expenses for conducting original researches or experiments bearing directly on the agricultural industry of the United States."

Since 1895, the annual agricultural appropriation act provides that "the Secretary of Agriculture shall prescribe the form of the annual financial statement required by section 3 of said act of March 2, 1887, shall ascertain whether the expenditures under the appropriation hereby made are in accordance with the provisions of the said act, and shall report thereon to Congress." The administration of the experiment stations acts has been committed to the Office of Experiment Stations by the Secretary of Agriculture. The expenses of the Office of Experiment Stations are met partly by specific appro-

priations for that Office, and partly out of lump sum appropriations. The appropriations for agricultural experiment stations and for the Office of Experiment Stations, by the Fifty-ninth Congress, not including appropriations for nutrition, irrigation, and drainage investigations, were as follows:

	1907.	1908.
Office of Experiment Stations.....	\$29,160	\$31,220
Agricultural experiment stations.....	803,500	827,000
Increase.....	336,000	432,000
Total.....	1,168,660	1,290,220

The appropriation acts provide that of the amounts appropriated for agricultural experiment stations, \$5,000 shall be expended in each year by the Secretary of Agriculture to investigate and report upon the organization and progress of farmers' institutes and agricultural schools in the several States and Territories, and upon similar organizations in foreign countries.

DEPARTMENT OF COMMERCE AND LABOR.

Woman and child workers.—Authorizes and directs the Secretary of Commerce and Labor to investigate and report on the industrial, social, moral, educational, and physical condition of woman and child workers in the United States. (Chap. 432, Jan. 29, 1907.)

Woman and child workers.—Appropriates \$150,000 for investigation and report on the industrial, social, moral, educational, and physical condition of woman and child workers in the United States. (Chap. 2918, Mar. 4, 1907.)

LIBRARY OF CONGRESS.

The Library of Congress was established in 1800, and is maintained by annual appropriations by Congress. From 1800 to 1897 it was located in the Capitol building; in 1897 it was removed to the new Library building erected for it at a cost of \$6,347,000. Additions to the Library are made through appropriations by Congress, by deposits under the copyright law, by gifts and exchanges, and by exchanges of the Smithsonian Institution. The books are available to all persons for reference. The appropriations for all purposes of the Library by the Fifty-ninth Congress were as follows: For 1907, \$789,805; for 1908, \$822,885.

SMITHSONIAN INSTITUTION.

The Smithsonian Institution was created by an act of Congress of August 10, 1846, to carry out the provisions of the will of James Smithson, of London, England, who bequeathed the reversion of an estate amounting to \$515,169 to the United States to found an establishment for the "increase and diffusion of knowledge among men." Congress has, from time to time, added other duties to the Smithsonian Institution, such as the system of international exchanges between the United States and foreign countries, the care of the National Museum and the National Zoological Park, the direction of the Bureau of American Ethnology, and the Astrophysical Observatory. The collection of titles of American scientific publications for the international catalogue of scientific literature is conducted under its supervision. The annual reports of the American Historical Association are made to the Secretary of the Smithsonian Institution, and the expense of printing such reports is paid from funds appro-

propriated by Congress. The appropriations out of the general funds in the Treasury of the United States made by the Fifty-ninth Congress for objects under the Smithsonian Institution are given on page 1231.

DISTRICT OF COLUMBIA.

Under an act of Congress approved June 11, 1878, entitled "An act providing a permanent form of government for the District of Columbia," it is provided that 50 per cent of the expenses of the government of the District of Columbia shall be appropriated by Congress, and the remaining 50 per cent shall be levied and assessed upon the taxable property and privileges in said District other than the property of the United States and of the District of Columbia. The taxes collected in the District of Columbia are deposited in the United States Treasury and are appropriated by Congress for the expenses of the District. Thus all appropriations made by Congress for public school purposes in the District are payable one-half from the revenues of the District of Columbia and one-half from any funds in the Treasury not otherwise appropriated. All legislation affecting schools in the District is enacted by Congress. The appropriations by the Fifty-ninth Congress for public education in the District of Columbia were as follows:

Appropriations for educational purposes included in the acts making appropriations for the government of the District of Columbia.

Object.	Amount.	
	Fiscal year 1907.	Fiscal year 1908.
Public schools:		
Officers.....	\$17,120	\$53,700
Attendance officers.....	1,200	2,100
Teachers.....	1,281,015	1,334,755
Night schools.....	12,700	17,800
Kindergarten supplies.....	2,500	2,500
Janitors and care of buildings and grounds.....	96,700	99,120
Medical inspectors.....	6,000	6,000
Miscellaneous.....	360,306	373,634
Buildings and grounds.....	386,358	535,000
Deficiency appropriations for 1906 and preceding years.....	30,919
Deaf and dumb in Columbia Institution for the Deaf and Dumb.....	10,500	10,500
Colored deaf-mutes in the Maryland School for Colored Deaf-Mutes.....	6,050	6,050
Deficiency for 1906.....	4,500
Industrial Home School.....	18,894	20,550
Industrial Home School for Colored Children.....	50,000	16,620
Reform School, care and maintenance of boys committed to.....	20,000	20,000
Reform School for Girls.....	24,365	21,365
Public Library.....	47,260	54,640
Total (one-half payable from United States Treasury).....	2,376,387	2,574,334

In addition to the appropriations for educational purposes in the District of Columbia, Congress enacted legislation changing the method of selecting the members of the board of education and fixing the salaries of teachers, officers, and other employees, providing for compulsory education and for the admission of nonresident pupils, and regulating admission to the practice of veterinary medicine.

SALARIES OF TEACHERS AND EMPLOYEES.

(Chap. 3446, June 20, 1906.)

An Act To fix and regulate the salaries of teachers, school officers, and other employees of the board of education of the District of Columbia.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That on and after July first, nineteen hundred and six, all children of school age being instructed in the

schools of the District beyond the second grade shall be given a whole school day session.

Sec. 2. That the control of the public schools of the District of Columbia is hereby vested in a board of education to consist of nine members all of whom shall have been for five years immediately preceding their appointment bona fide residents of the District of Columbia and three of whom shall be women. The members of the board of education shall be appointed by the supreme court judges of the District of Columbia for terms of three years each, except that the original appointments under this Act shall be as follows: Three for one year, three for two years, and three for three years, and members shall be eligible for reappointment. The members shall serve without compensation. Vacancies for unexpired terms, caused by death, resignation, or otherwise, shall be filled by the judges of the supreme court of the District of Columbia. The board shall meet for organization within thirty days after appointment. They shall appoint a secretary, who shall not be a member of the board, and they shall hold stated meetings at least once a month during the school year and such additional meetings as they may from time to time provide for. The organization meeting, and all meetings whatsoever thereafter, shall be open to the public, except committee meetings dealing with the appointment of teachers.

No appointment, promotion, transfer, or dismissal of any director, supervising principal, principal, head of department, teacher, or any other subordinate to the superintendent of schools, shall be made by the board of education, except upon the written recommendation of the superintendent of schools.

The board shall determine all questions of general policy relating to the schools, shall appoint the executive officers hereinafter provided for, define their duties, and direct expenditures. All expenditures of public funds for such school purposes shall be made and accounted for as now provided by law under the direction and control of the Commissioners of the District of Columbia. The board shall appoint all teachers in the manner hereinafter prescribed and all other employees provided for in this Act.

The board of education shall annually on the first day of October transmit to the Commissioners of the District of Columbia an estimate in detail of the amount of money required for the public schools for the ensuing year, and said Commissioners shall transmit the same in their annual estimate of appropriations for the District of Columbia, with such recommendations as they may deem proper.

Sec. 3. That the board shall appoint one superintendent for all the public schools in the District of Columbia, who shall hold said office for a term of three years and who shall have the direction of and supervision in all matters pertaining to the instruction in all the schools under the board of education. He shall have a seat in the board and the right to speak on all matters before the board, but not the right to vote.

The board shall have power to remove the superintendent at any time for adequate cause affecting his character and efficiency as superintendent.

The board, upon the written recommendation of the superintendent of schools, shall also appoint one white assistant superintendent for the white schools and one colored assistant superintendent for the colored schools. The white assistant superintendent, under the direction of the superintendent of schools, shall have general supervision over the white schools, and is specifically charged, under the direction of the superintendent, with the unification, as far as may be practicable, of the educational work of the white high schools and of all academic and scientific subjects in the McKinley Manual Training School and the Business High School.

The colored assistant superintendent, under the direction of the superintendent of schools, shall have sole charge of all teachers, classes, and schools in which colored children are taught. And he is specifically charged, under the direction of the superintendent, with the unification, so far as may be practicable, of the educational work of the colored high schools, and of all the academic and scientific subjects of the Armstrong Manual Training School. And he also shall be charged specifically, under the direction of the superintendent, with the unification of the educational work of the intermediate grades of the colored schools.

The board, upon the written recommendation of the superintendent of schools, shall appoint a director of intermediate instruction for the white schools who shall have charge under the direction of the superintendent of the unification of educational work of grades five to eight, inclusive.

There shall be appointed by the board a supervisor of manual training who, under the direction of the superintendent, shall have supervision of manual training instruction.

Sec. 4. That the salaries of teachers, school officers, and other employees of the board of education of the District of Columbia shall be as follows:

Teachers.

Class 1.	Class 2.	Class 3.	Class 4.	Class 5.	Class 6.
\$500	\$600	\$650	\$800	\$950	\$1,000
525	625	675	830	990	1,000
550	650	700	860	1,030	1,100
575	675	725	890	1,070	1,200
600	700	750	920	1,110	1,300
		775	950	1,150	1,400
		800	980	1,190	1,500
		825	1,010	1,230	1,600
		850	1,040	1,270	1,700
		875	1,070	1,310	1,800
		900	1,100	1,350	1,900
					2,000
					2,100
					2,200

Kindergarten assistants, class one.

Model teachers of first and second grades, and of kindergarten, class four.

Teachers of first and second grades, class two.

Teachers of third and fourth grades, and kindergarten principals, class three.

Teachers of fifth, sixth, and seventh grades, class four.

Teachers of eighth grades, class five.

Teachers of manual training, drawing, physical culture, music, domestic science, domestic art, in the graded schools, classes three to four, inclusive.

Teachers of manual training, drawing, physical culture, music, domestic science, and domestic art in the normal high and manual training schools, classes four to five.

Assistants to directors of primary instruction, classes four and five.

Head teachers and teachers of normal, high, and manual training schools, Group A, class six: *Provided*, That teachers of the normal, high, and manual training schools now receiving less than eight hundred dollars, who have not taught five years or more in graded or high schools, shall receive an annual increase not to exceed one hundred and fifty dollars until the minimum salary of class six is reached, when they shall thereafter receive the increase provided in said class: *And provided further*, That special beginning teachers in the normal school may be appointed for a two years' probationary period upon the recommendation of the principal of the normal school at a salary of eight hundred dollars for the first year and nine hundred dollars for the second year, and thereafter, if continued, they shall receive the increase provided for in this class.

Heads of departments in high and manual training schools, Group B of class six.

Librarians and clerks, classes one, two, and three.

Librarian of the teachers' library, class four.

Teachers not otherwise provided for, classes one to four.

Teachers, librarians, and clerks eligible to more than one class shall be placed in the lowest class to which they are eligible.

Sec. 5. That the board of education shall classify all academic and scientific subjects in the Central, Eastern, Western, and Business high schools, and the McKinley Manual Training School into eight departments so that each department shall contain correlated subjects and the M Street High School and the Armstrong Manual Training School shall be similarly classified into four departments so that each department shall contain correlated subjects.

Whenever a department includes two or more high schools then the teacher in charge of the department shall be designated "Head of the department," otherwise the teacher in charge of the department shall be designated "Head teacher:" *Provided*, That heads of departments as such have only an advisory capacity in educational matters and upon all questions shall be inferior in authority to the principal of each particular school: *Provided further*, That no class shall be formed in the high schools with less than ten pupils except in

the M Street High School in the case of subjects not offered as well in the Armstrong Manual Training School but this limitation shall not apply to pupils who have already entered upon a continuous course of two or more years.

SEC. 6. That the board of education shall arrange all teachers in the classes and groups in the above schedule, except as hereinafter specified.

For the year ending June thirtieth, nineteen hundred and seven, each head of department and teacher shall receive the salary in his class next above his present salary, and no teacher or principal shall in any event receive less than his or her present salary. If promoted to a higher class he shall receive the salary in that class next above his present salary, and after June thirtieth, nineteen hundred and seven, if his work is satisfactory, he shall receive an annual increase within his class or group, as herein provided, without action of the board of education: but no teacher shall in any one year receive more than one promotion within his class or group: *Provided*, That if the salary in his class next above his present salary shall be less than twenty-five dollars in excess of his present salary he shall receive the next higher salary, so that no teacher shall receive for the first year an increase of less than twenty-five dollars.

A teacher shall not be promoted from one class to another, except by the board of education, upon the recommendation of the officer having direct supervision of said teacher and in the case of colored teachers upon the additional recommendation of the colored assistant superintendent. Such recommendations shall in each case be made through and with the approval of the superintendent of schools.

Teachers shall be promoted for superior work from Group A to Group B of class six only after oral and written examinations by the boards of examiners upon recommendation as follows:

All high and normal school teachers and teachers of the manual training schools upon the recommendation of their respective principals.

Such recommendations shall in each case be made through and with the approval of the superintendent of schools, and with the additional recommendation of the colored assistant superintendent for the colored teachers.

No teacher, head of department, principal, or supervising principal shall be appointed to any position in the graded schools, high schools, manual training schools, or normal schools, and no director, assistant director, or teacher of special studies shall be appointed until he shall have passed an examination prescribed by the boards of examiners. No person without a degree from an accredited college, or a graduation certificate from an accredited normal school, such normal-school graduate to have had at least five years of experience as a teacher in a high school, shall hereafter be appointed to teach any academic or scientific subjects in the normal, high, and manual training schools. This provision for examination shall not apply to teachers coming from the normal schools, or teachers being advanced from the different classes in the grade schools: *Provided*, That no teacher or officer in the service of the public schools of the District of Columbia at the time of the passage of this Act shall, by the operation of this Act, be required to take any examination, either mental or physical, to be continued in the service. The boards of examiners for carrying out the above provisions with reference to examinations shall consist of the superintendent and two heads of departments of the white schools for the white teachers and of the superintendent and two heads of departments of the colored schools for colored teachers. The designation of such heads of departments for membership on these boards to be made by the board of education annually.

Every new teacher at the time of his appointment shall be assigned to a class or group by the board of education on the recommendation of the superintendent of schools, and shall receive for the first year the minimum pay of said class or group. The first year in Group A, class six, shall be probationary.

For the purpose of this Act a model teacher shall be held to be a teacher of the first or second grade, or of the kindergarten, whose special aptitude for primary teaching makes it desirable to retain him in said grades with the pay of a higher grade.

Teachers of classes one and two shall receive an annual increase of salary of twenty-five dollars for four years, or until the maximum is reached.

Teachers of class three shall receive an annual increase of salary of twenty-five dollars for ten years, or until the maximum is reached.

Teachers of class four shall receive an annual increase of salary of thirty dollars for ten years, or until the maximum is reached.

Teachers of class five shall receive an annual increase of salary of forty dollars for ten years, or until the maximum is reached.

Teachers in Group A of class six, after the probationary year, shall receive an annual increase of salary of one hundred dollars for eight years; in Group B, of one hundred dollars for three years.

SEC. 7. That principals of grade-school buildings shall receive for services rendered as such, in addition to their grade salary, the yearly sum of thirty dollars for each session room in the building.

The term "session room" shall be held to designate a class room in which the regular work of a class of not less than twenty-five people is carried on.

Principals of normal, high, and manual training schools shall receive a salary of two thousand dollars per annum, together with an annual increase of one hundred dollars for five years. All such principals shall be appointed at the minimum salary, and each shall have entire control of his school, both executive and educational, subject only in authority to the superintendent of schools for the white schools and to the colored assistant superintendent for the colored schools, to whom in each case he shall be directly responsible.

DIRECTORS.

SEC. 8. That the salary of the directors shall be as follows: Directors of drawing, physical culture, music, fifteen hundred dollars, with an annual increase of one hundred dollars for five years; domestic science, domestic art, and kindergartens shall receive a salary of one thousand five hundred dollars per annum with an annual increase of fifty dollars per year for five years; the assistant directors of drawing, physical culture, music, domestic science, domestic art, and kindergartens, in charge of colored schools shall receive a salary of one thousand three hundred dollars per annum, with an annual increase of fifty dollars per year for five years; the director of primary instruction shall receive a salary of one thousand eight hundred dollars per year, with an increase of fifty dollars per year for five years; the assistant director of primary instruction, in charge of colored schools, shall receive a salary of one thousand four hundred dollars, with an increase of fifty dollars per year for five years. Directors and assistant directors shall be appointed at the minimum salary.

PAY OF OFFICERS.

SEC. 9. That the pay of officers shall be as follows: The superintendent, five thousand dollars; the assistant superintendents, three thousand dollars each; director of intermediate instruction, supervisor of manual training, and supervising principals, two thousand two hundred dollars per annum, with an increase of one hundred dollars per year for five years.

Director of intermediate instruction, supervisor of manual training, and supervising principals who may be hereafter appointed shall be appointed at the minimum salary provided in this Act unless the said salary is less than that received at the time of his appointment.

SEC. 10. When a teacher is on trial or being investigated he or she shall have the right to be attended by counsel and by at least one friend of his or her selection.

SEC. 11. That a commission, consisting of the superintendent of schools, the Engineer Commissioner, and the Supervising Architect of the Treasury Department, is hereby created for the purpose of submitting to Congress at its session beginning December, nineteen hundred and six—

First. A general plan for the consolidation of the public schools in the District of Columbia, and the abandonment and sale of such school buildings and sites as may by them be deemed necessary and desirable for the best good of the public school service.

Second. A general plan for the character, size, and location of school buildings in accordance with which the educational and business interests of the public school system may be subserved.

SEC. 12. That wherever the masculine pronoun occurs in this Act it shall be construed to apply to either male or female teachers or employees of the board of education.

SEC. 13. That this Act shall take effect on the first day of July, nineteen hundred and six, and all Acts or parts of Acts in conflict herewith are hereby repealed.

COMPULSORY EDUCATION.

(Chap. 3054, June 8, 1906.)

An Act Providing for compulsory education in the District of Columbia.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That every parent, guardian, or other person residing in the District of Columbia having charge and control of a child between the ages of eight and fourteen years shall cause such child to be regularly instructed in the elementary branches of knowledge, including reading, writing, English grammar, geography, and arithmetic, and pursuant to this end every such parent, guardian, or other person aforesaid shall cause any child under the charge and control of such person to attend some public, private, or parochial school during the period of each year the public schools in the District are in session, on the customary days and during the customary hours of the school term. No child shall be credited with attendance upon a private or parochial school unless the attendance officer hereinafter provided for receives a certificate of attendance signed by the person in charge of such school. A child between the ages aforesaid may be excused from school attendance or instruction upon presentation of satisfactory evidence to the superintendent of schools that such child is being or has been within said year instructed a like period of time in the branches taught in the public schools, or that such child has acquired these branches of learning, or that the physical or mental condition of such child is such as to render such attendance or instruction inexpedient or impracticable.

SEC. 2. That if any person having under control a child, as described in section one, shall neglect for three day sessions or six half-day sessions, within any period of five months to cause such child to attend school, a written notice shall be sent to such person by an attendance officer, hereinafter provided for, informing him that the attendance of the child under the control of such person is required at school within a period of three days. If such child is not excused as provided for in section one, and is not in school within three days, prosecution shall be begun in the police court by an officer empowered under this Act against the parent or other person in control of the child, and upon conviction the parent or other person in control of the child shall be punished for each and every offense by a fine of not more than twenty dollars.

SEC. 3. That any child between the ages of eight and fourteen who is an habitual truant, who is willfully and habitually absent from school, or who can not be controlled by the regular school discipline while in attendance upon school, shall be committed by the board of education to a special or ungraded school for instruction. The board of education may set apart school buildings or special rooms in a school building for the establishment of ungraded schools to provide, under a qualified teacher, for the instruction of habitual truants or for pupils who can not be controlled by the regular school discipline while in attendance upon school, and such children may be restricted to such schools for instruction until satisfactory evidence of improvement is furnished the board of education by the teacher in charge whereupon such child may be restored to a graded school in the district in which he resides.

SEC. 4. The board of education of the District of Columbia is hereby authorized, empowered and directed to appoint two truant officers at a salary of six hundred dollars per annum each, who, together with the inspectors provided for in the bill to regulate the employment of child labor and the probation officers provided for in the bill establishing a juvenile court shall under the direction of the board of education carry out the provisions of this Act.

SEC. 5. That any person who induces or attempts to induce any child to be absent unlawfully from school, or who knowingly employs or harbors while school is in session any child absent unlawfully from school, shall be deemed guilty of a misdemeanor and be punished by a fine of not more than twenty dollars.

SEC. 6. That the officers empowered under this Act shall visit any place or establishment where minor children are employed to ascertain whether the provisions of this law are duly complied with, and shall as often as twice a year demand from all employers of such children a list of children employed, with their names and ages.

SEC. 7. That any parent or other person who makes a false statement concerning the age or school attendance of a child between the ages of eight and fourteen who is under his control, such false statement being made with intent

to deceive under this Act, shall upon conviction thereof be punished by a fine not to exceed twenty dollars.

SEC. 8. That this Act shall take effect on July first, nineteen hundred and six.

SEC. 9. That all Acts and parts of Acts in conflict herewith are hereby repealed.

Nonresident pupils in public schools.—Hereafter pupils shall not be admitted to or taught free of charge in the public schools of the District of Columbia who do not reside in said District, or who during such tutelage do not own property in and pay taxes levied by the District, or whose parents do not reside or are not engaged in business or public duties therein, or during such tutelage pay taxes levied by the District. Such pupils may be admitted on the payment of an amount to cover the expense of their tuition and the cost of the text-books and school supplies used by them. (Chap. 1623, Apr. 14, 1906.)

Veterinary medicine.—Candidates for license to practice veterinary medicine must pass an examination, and must have a diploma from some veterinary college authorized by law to confer the same, which college shall require at least two sessions of study of veterinary medicine of not less than six months each prior to the issue of such diploma. Graduates of two-year colleges shall accompany their diplomas by satisfactory evidence that they have practiced veterinary medicine for five years last past subsequent to the issue of such diplomas. (Chap. 442, Feb. 1, 1907.)

ACTS OF INCORPORATION.

ARCHAEOLOGICAL INSTITUTE OF AMERICA.

(Chap. 2560, May 26, 1906.)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Simeon E. Baldwin, Frederic C. Bartlett, William N. Bates, W. K. Bixby, Charles J. Bonaparte, Charels P. Bowditch, Henry F. Burton, H. W. Callahan, John Campbell, Mitchell Carroll, R. R. Converse, J. T. Edmundson, Howard P. Eells, John W. Foster, Harold N. Fowler, Basil L. Gildersleeve, John S. Gray, J. E. Harry, John B. Jackson, Francis W. Kelsey, John O. Keopfli, William A. Lamberton, John B. Larner, Seth Low, Charles F. Lummis, G. F. Moore, Edward Delavan Perry, Henry Kirke Porter, John Dyneley Prince, Edward Robinson, J. G. Schurman, Thomas Day Seymour, F. W. Shipley, M. S. Slaughter, Charles F. Smith, George S. Sykes, Frank B. Tarbell, Andrew F. West, Benjamin Ide Wheeler, James R. Wheeler, John Williams White, John H. Wright, their associates and successors be, and they are hereby, created a body corporate and politic in the District of Columbia by the name, title, and style of the Archaeological Institute of America, and by that name shall have perpetual succession for the purpose of promoting archaeological studies by investigation and research in the United States and foreign countries by sending out expeditions for special investigation, by aiding the efforts of independent explorers, by publication of archaeological papers, and reports of the results of the expeditions which the institute may undertake to promote, and by any other means which may from time to time be desirable.

SEC. 2. That the government of said corporation shall be vested in a council consisting of the following ex officio members: The presidents, the honorary presidents, the vice-presidents, the treasurer, and the secretary of the institute and the editor in chief and the business manager of its journal, the presidents of affiliated societies and the chairmen of the managing committees of any American schools founded by the Archaeological Institute of America in foreign countries for classical or archaeological studies and research (including those now affiliated with the voluntary association known as the Archaeological Institute of America), and the chairman of the committee on American Archaeology, and of additional members annually chosen by the members of affiliated societies, as may be provided by the by-laws.

SEC. 3. That said corporation may make all by-laws, rules, and regulations not inconsistent with law that may be necessary or expedient to accomplish

the purposes of its creation; and it may hold real estate and personal property in the United States and any foreign country for the necessary use and purposes of said organization to an amount not to exceed one million dollars. The principal office of said corporation shall be in Washington, in the District of Columbia, and its annual meetings may be held in such places as its by-laws may provide.

CARNEGIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING.

(Chap. 636, Mar. 10, 1906.)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the persons following, namely, Arthur T. Hadley, Charles William Eliot, Nicholas Murray Butler, Jacob G. Schurman, Woodrow Wilson, L. Clark Seelye, Charles C. Harrison, Alexander C. Humphreys, S. B. McCormick, Edwin B. Craighead, Henry C. King, Charles F. Thwing, Thomas McClelland, Edwin H. Hughes, H. McClelland Bell, George H. Denny, William Peterson, Samuel Plantz, David S. Jordan, William H. Crawford, Henry S. Pritchett, Frank A. Vanderlip, T. Morris Carnegie, Robert A. Franks, their associates and successors duly chosen, are hereby incorporated and declared to be a body corporate in the District of Columbia by the name of The Carnegie Foundation for the Advancement of Teaching, and by that name shall be known and have perpetual succession, with the powers, limitations and restrictions herein contained.

SEC. 2. That the objects for which said corporation is incorporated shall be—

(a) To receive and maintain a fund or funds and apply the income thereof as follows:

To provide retiring pensions, without regard to race, sex, creed, or color, for the teachers of universities, colleges and technical schools in the United States, the Dominion of Canada, and Newfoundland, who, by reason of long and meritorious service, or by reason of old age, disability, or other sufficient reason, shall be deemed entitled to the assistance and aid of this corporation, on such terms and conditions, however, as such corporation may from time to time approve and adopt: *Provided, however,* That the said retiring pensions shall be paid to such teachers only as are or have been connected with institutions not under control of a sect or which do not require their trustees, their officers, faculties, or students (or a majority thereof) to belong to any specified sect, and which do not impose any theological test as a condition of entrance therein or of connection therewith.

(b) In general, to do and perform all things necessary to encourage, uphold, and dignify the profession of the teacher and the cause of higher education within the United States, the Dominion of Canada, and Newfoundland aforesaid, and to promote the objects of the foundation, with full power, however, to the trustees hereinafter appointed and their successors from time to time to modify the conditions and regulations under which the work shall be carried on, so as to secure the application of the funds in the manner best adapted to the conditions of the time: *And provided,* That such corporation may by a vote of two-thirds of the entire number of trustees enlarge or vary the purposes herein set forth, provided that the objects of the corporation shall at all times be among the foregoing or kindred thereto.

(c) To receive and hold by gift, bequest, devise, grant, or purchase, any real or personal property, and to use and dispose of the same for the purposes of the corporation.

SEC. 3. That the direction and management of the affairs of the corporation, and the control and disposition of its property and funds, shall be vested in a board of trustees, twenty-five in number, to be composed of the following individuals: Arthur T. Hadley, Charles William Eliot, Nicholas Murray Butler, Jacob G. Schurman, Woodrow Wilson, L. Clark Seelye, Charles C. Harrison, Alexander C. Humphreys, S. B. McCormick, Edwin B. Craighead, Henry C. King, Charles F. Thwing, Thomas McClelland, Edwin H. Hughes, H. McClelland Bell, George H. Denny, William Peterson, Samuel Plantz, David S. Jordan, William H. Crawford, Henry S. Pritchett, Frank A. Vanderlip, T. Morris Carnegie, and Robert A. Franks, being twenty-four in number with power to said board to increase the same to twenty-five in all, who shall constitute the first board of trustees and constitute the members of the corporation. Vacancies occurring by death, resignation, or otherwise shall be filled by the remaining

trustees in such manner as the by-laws shall prescribe, and the persons so elected shall thereupon become trustees and also members of the corporation.

SEC. 4. The principal office of the corporation shall be located in the District of Columbia, but offices may be maintained and meetings of the corporation or the trustees and committees may be held in other places such as the by-laws may from time to time fix.

SEC. 5. That the said trustees shall be entitled to take, hold, and administer any securities, funds, or property which may be transferred to them for the purposes and objects hereinbefore enumerated, and such other funds or property as may at any time be given, devised, or bequeathed to them, or to such corporation, for the purposes of the trust; with full power from time to time to adopt a common seal, to appoint officers, whether members of the board of trustees or otherwise, and such employees as may be deemed necessary in carrying on the business of the corporation and at such salaries or with such remuneration as they may think proper; and full power to adopt by-laws and such rules or regulations as may be necessary to secure the safe and convenient transaction of the business of the corporation; and full power and discretion to invest any principal and deal with and expend the income of the corporation in such manner as in their judgment will best promote the objects hereinbefore set forth; and in general to have and use all the powers and authority necessary to promote such objects and carry out the purposes of the donor.

The said trustees shall have further power from time to time to hold as investments any securities transferred or which may be transferred to them or to such corporation by any person, persons, or corporation, and to invest the same or any part thereof from time to time in such securities and in such form and manner as is or may be permitted to trustees or to savings banks or to charitable or literary corporations for investment, according to the laws of the District of Columbia or in such securities as may be transferred to them or authorized for investment by any deed of trust or gift or by any deed of gift or last will and testament to be hereafter made or executed.

SEC. 6. That the said corporation may take and hold any additional donations, grants, devises, or bequests which may be made in the further support of the purposes of the said corporation.

SEC. 7. That the services of the trustees of the said corporation, acting as such trustees, shall be gratuitous, but such corporation may provide for the reasonable expenses incurred by trustees in the performance of their duties.

SEC. 8. That as soon as may be possible after the passage of this Act, a meeting of the trustees hereinbefore named shall be called by Henry S. Pritchett, Charles William Eliot, Arthur T. Hadley, Nicholas Murray Butler, Woodrow Wilson, Jacob G. Schurman, Charles C. Harrison, Alexander C. Humphreys, and George H. Denny, or any six of them, at the Borough of Manhattan, in the city and State of New York, by notice served in person or by mail addressed to each trustee at his place of residence; and the said trustees named herein, or a majority thereof, being assembled, shall organize and proceed to adopt by-laws, to elect officers, fix their compensation, and generally to organize the said corporation.

The corporation hereby incorporated may accept a transfer of all the real and personal property of any other corporation created for similar objects, notwithstanding the fact that both said corporations may have common trustees, upon such terms as may be agreed upon, and may receive, take over, and enter into possession, custody, and management of all such property, real and personal: *Provided, however,* That such property shall be applied to the purposes of the corporation hereby incorporated as hereinbefore set forth.

SEC. 9. That such corporation hereby incorporated upon accepting a transfer of all the real and personal property of such other corporation shall succeed to the obligations and liabilities and be held liable to pay and discharge all the debts, liabilities, and contracts of such corporation so existing to the same effect as if such corporation hereby incorporated had itself incurred the obligation or liability to pay such debt or damages.

SEC. 10. That Congress may from time to time alter, repeal, or modify this Act of incorporation, but no contract or individual right made or acquired shall thereby be divested or impaired.

SEC. 11. That this Act shall take effect immediately on its passage.

INTERNATIONAL SUNDAY SCHOOL ASSOCIATION OF AMERICA.

(Chap. 436, Jan. 31, 1907.)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That William N. Harsthorn, of Boston, Massachusetts; Honorable J. J. Maclaren, of Toronto, Canada; Marion Lawrence, of Toledo, Ohio; George W. Bailey, of Philadelphia, Pennsylvania; A. B. McCrillis, of Providence, Rhode Island; H. J. Heinz, of Pittsburg, Pennsylvania; H. M. Hamill, of Nashville, Tennessee; B. R. Machum, of Saint John, New Brunswick; W. A. Eudaly, of Cincinnati, Ohio; F. A. Wells, of Chicago, Illinois; G. G. Wallace, of Omaha, Nebraska; G. W. Watts, of Durham, North Carolina; E. K. Warren, of Three Oaks, Michigan; John Stites, of Louisville, Kentucky; Honorable W. D. Wood, of Seattle, Washington; and Seth P. Leet, of Montreal, Province of Quebec, and their associates and successors, are created a body corporate in the District of Columbia under the name of The International Sunday School Association, and as such shall have power to contract and be contracted with, sue and be sued; to take and hold real estate not exceeding one million dollars in value in the aggregate or personal estate by purchase, gift, devise, or bequest, and to manage, sell or convey, or transfer same for the purposes of the association; to have perpetual succession; to have a common seal, and to break, alter, or change the same at will.

SEC. 2. That the purpose of the association shall be to promote organized Sunday school work, to encourage the study of the Bible, and to assist in the spread of Christian religion.

SEC. 3. That the members of the executive committee of the International Sunday School Association, as it may be constituted by said association, shall be the members of this association.

SEC. 4. That the affairs of the association shall be managed by the members. It may by by-laws provide for a board of not less than fifteen trustees, who shall be elected annually, to act between meetings of the association, whose duties and powers shall be prescribed in said by-laws. Until the members of this association meet and elect trustees, the persons named as incorporators herein shall constitute the board of trustees; *Provided*, That a majority of said trustees shall at all times be citizens of the United States.

SEC. 5. That the officers of the association shall be a chairman, one or more vice-chairmen, a secretary, and a treasurer, with such other officers, employees, and committees as the association shall choose, who shall hold their respective offices, appointments, or employments as may be provided in the by-laws of the association.

SEC. 6. That the association may adopt and change at will such rules and by-laws as it deems proper for its government and control not in conflict with this charter, the Constitution of the United States of America, the Provinces and Territories of the Dominion of Canada, or any State, Territory, province, county, or district in which such rule or by-law is sought to be enforced, and shall provide the time of meetings and the number necessary to constitute a quorum for the transaction of business and how votes of members shall be cast.

SEC. 7. That the association shall have no capital stock, and the private property of its members shall not be subject to its corporate debts.

SEC. 8. That the association's principal place of business shall be at Washington, District of Columbia. Meetings of the association and its trustees may be held at any point that may be fixed by the by-laws or by order of the board of trustees or in any call for a meeting issued as may be authorized in the by-laws.

SEC. 9. The right to alter, amend or repeal this Act is reserved.

NATIONAL CHILD LABOR COMMITTEE.

(Chap. 1180, Feb. 21, 1907.)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Felix Adler, Francis G. Caffey, Robert W. de Forest, Edward T. Devine, Homer Folks, William E. Harmon, John S. Huyler, Mrs. Florence Kelley, James H. Kirkland, V. Everit Macy, Edgar Gardner Murphy, Isaac N. Seligman, Miss Lillian D. Wald, Paul M. Warburg, and John W. Wood, and their successors and associates, be, and they hereby are, constituted a body corporate of the District of Columbia; that the

name of such body corporate shall be National Child Labor Committee, and that by such name the said persons, or a majority of them, shall hold a meeting and adopt a constitution and by-laws, and shall have power to amend the same at pleasure: *Provided*, That such constitution or by-laws, or any amendments thereof, do not conflict with the laws of the United States; and that they may use a common seal and alter and change the same at pleasure, and may take, receive, hold, and convey real and personal estate necessary for the purposes of the organization.

SEC. 2. That the objects of the said corporation shall be: To promote the welfare of society with respect to the employment of children in gainful occupations; to investigate and report the facts concerning child labor; to raise the standard of parental responsibility with respect to the employment of children; to assist in protecting children, by suitable legislation, against premature or otherwise injurious employment, and thus to aid in securing for them an opportunity for elementary education and physical development sufficient for the demands of citizenship and the requirements of industrial efficiency; to aid in promoting the enforcement of laws relating to child labor; to coordinate, unify, and supplement the work of State or local child-labor committees, and encourage the formation of such committees where they do not exist.

SEC. 3. That said corporation shall have a right to hold its meetings at any place in the United States as may be best suited or most advantageous for the carrying out of the purposes for which this corporation is formed.

SEC. 4. That said corporation shall not engage in any business for gain, the purposes of said corporation being educational and philanthropic.

SEC. 5. That the right to alter, amend, or repeal this Act is hereby expressly reserved.

NATIONAL EDUCATION ASSOCIATION OF AMERICA.

(Chap. 3929, June 30, 1906.)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following-named persons, who are now the officers and directors and trustees of the National Educational Association, a corporation organized in the year eighteen hundred and eighty-six, under the Act of general incorporation of the revised statutes of the District of Columbia, namely: Nathan C. Schaeffer, Eliphalet Oram Lyte, John W. Lansinger, of Pennsylvania; Isaac W. Hill, of Alabama; Arthur J. Matthews, of Arizona; John H. Hinemon, George B. Cook, of Arkansas; Joseph O'Connor, Josiah L. Pickard, Arthur H. Chamberlain, of California; Aaron Gove, Ezekiel H. Cook, Lewis C. Greenlee, of Colorado; Charles H. Keyes, of Connecticut; George W. Twitmyer, of Delaware; J. Ormond Wilson, William T. Harris, Alexander T. Stuart, of the District of Columbia; Clem Hampton, of Florida; William M. Slaton, of Georgia; Frances Mann, of Idaho; J. Stanley Brown, Albert G. Lane, Charles I. Parker, John W. Cook, Joshua Pike, Albert R. Taylor, Joseph A. Mercer, of Illinois; Nebraska Cropsey, Thomas A. Mott, of Indiana; John D. Benedict, of Indian Territory; John F. Riggs, Ashley V. Storm, of Iowa; John W. Spindler, Jasper N. Wilkinson, A. V. Jewett, Luther D. Whittemore, of Kansas; William Henry Bartholomew, of Kentucky; Warren Easton, of Louisiana; John S. Locke, of Maine; M. Bates Stephens, of Maryland; Charles W. Elliot, Mary H. Hunt, Henry T. Bailey, of Massachusetts; Hugh A. Graham, Charles G. White, William H. Elson, of Michigan; William F. Phelps, Irwin Shepard, John A. Cranston, of Minnesota; Robert B. Fulton, of Mississippi; F. Louis Soldan, James M. Greenwood, William J. Hawkins, of Missouri; Oscar J. Craig, of Montana; George L. Towne, of Nebraska; Joseph E. Stubbs, of Nevada; James E. Klock, of New Hampshire; James M. Green, John Enright, of New Jersey; Charles M. Light, of New Mexico; James H. Canfield, Nicholas Murray Butler, William H. Maxwell, Charles R. Skinner, Albert P. Marble, James C. Byrnes, of New York; James Y. Joyner, Julius Isaac Foust, of North Carolina; Pitt Gordon Knowlton, of North Dakota; Oscar T. Corson, Jacob A. Shawan, Wells L. Griswold, of Ohio; Edgar S. Vaught, Andrew R. Hickam, of Oklahoma; Charles Carroll Stratton, Edwin D. Ressler, of Oregon; Thomas W. Bicknell, Walter Ballou Jacobs, of Rhode Island; David B. Johnson, Robert P. Pell, of South Carolina; Moritz Adelbert Lange, of South Dakota; Eugene F. Turner, of Tennessee; Lloyd E. Wolfe, of

Texas; David H. Christensen, of Utah; Henry O. Wheeler, Isaac Thomas, of Vermont; Joseph L. Jarman, of Virginia; Edward T. Mathes, of Washington; T. Marcellus Marshall, Lucy Robinson, of West Virginia; Lorenzo D. Harvey, of Wisconsin; Thomas T. Tynan, of Wyoming; Cassia Patton, of Alaska; Frank H. Ball, of Porto Rico; Arthur F. Griffiths, of Hawaii; C. H. Maxson, of the Philippine Islands, and such other persons as now are or may hereafter be associated with them as officers or members of said association, are hereby incorporated and declared to be a body corporate of the District of Columbia by the name of the "National Education Association of the United States," and by that name shall be known and have perpetual succession with the powers, limitations, and restrictions herein contained.

SEC. 2. That the purpose and object of the said corporation shall be to elevate the character and advance the interests of the profession of teaching, and to promote the cause of education in the United States. This corporation shall include the National Council of Education and the following departments, and such others as may hereafter be created by organization or consolidation, to wit: The departments, first, of superintendence; second, of normal schools; third, of elementary education; fourth, of higher education; fifth, of manual training; sixth, of art education; seventh, of kindergarten education; eighth, of music education; ninth, of secondary education; tenth, of business education; eleventh, of child study; twelfth, of physical education; thirteenth, of natural science instruction; fourteenth, of school administration; fifteenth, the library department; sixteenth, of special education; seventeenth, of Indian education; the powers and duties and the number and names of these departments and of the National Council of Education may be changed or abolished at the pleasure of the corporation as provided in its by-laws.

SEC. 3. That the said corporation shall further have power to have and to use a common seal, and to alter and change the same at its pleasure, to sue or to be sued in any court of the United States, or other court of competent jurisdiction; to make by-laws not inconsistent with the provisions of this Act or of the Constitution of the United States; to take or receive, whether by gift, grant, devise, bequest, or purchase, any real or personal estate, and to hold, grant, convey, hire, or lease the same for the purposes of its incorporation, and to accept and administer any trust or real or personal estate for any educational purpose within the objects of the corporation.

SEC. 4. That all real property of the corporation within the District of Columbia, which shall be used by the corporation for the educational or other purposes of the corporation as aforesaid, other than the purposes of producing income, and all personal property and funds of the corporation held, used, or invested for educational purposes aforesaid, or to produce income to be used for such purposes, shall be exempt from taxation: *Provided, however,* That this exemption shall not apply to any property of the corporation which shall not be used for or the income of which shall not be applied to the educational purposes of the corporation: *And provided further,* That the corporation shall annually file with the Commissioner of Education of the United States a report in writing stating in detail the property, real and personal, held by the corporation, and the expenditure or other use or disposition of the same, or the income thereof, during the preceding year.

SEC. 5. That the membership of the said corporation shall consist of three classes of members, namely, active, associate, and corresponding, whose qualifications, terms of membership, rights, and obligations shall be prescribed by the by-laws of the corporation.

SEC. 6. That the officers of the said corporation shall be a president, twelve vice-presidents, a secretary, a treasurer, a board of directors, an executive committee, and a board of trustees.

The board of directors shall consist of a president, the first vice-president, the secretary, the treasurer, the chairman of the board of trustees, and one additional member from each State, Territory, or District, to be elected by the active members for the term of one year, or until their successors are chosen, and of all life directors of the National Educational Association. The United States Commissioner of Education, and all former presidents of the said association now living, and all future presidents of the association hereby incorporated, at the close of their respective terms of office, shall be members of the board of directors for life. The board of directors shall have power to fill all vacancies in their own body; shall have in charge the general interests of the corporation, excepting those herein intrusted to the board of trustees, and shall possess such other powers as shall be conferred upon them by the by-laws of the corporation.

The executive committee shall consist of five members, as follows: The president of the association, the first vice-president, the treasurer, the chairman of the board of trustees, and a member of the association, to be chosen annually by the board of directors, to serve one year. The said committee shall have authority to represent and to act for the board of directors in the intervals between the meetings of that body, to the extent of carrying out the legislation adopted by the board of directors under general directions as may be given by said board.

The board of trustees shall consist of four members, elected by the board of directors for the term of four years, and the president of the association, who shall be a member *ex officio* during his term of office. At the first meeting of the board of directors, held during the annual meeting of the association at which they were elected, they shall elect one trustee for the term of four years. All vacancies occurring in said board of trustees, whether by resignation or otherwise, shall be filled by the board of directors for the unexpired term; and the absence of a trustee from two successive annual meetings of the board shall forfeit his membership.

SEC. 7. That the invested fund now known as the "Permanent fund of the National Educational Association," when transferred to the corporation hereby created, shall be held by such corporation as a permanent fund and shall be in charge of the board of trustees, who shall provide for the safe-keeping and investment of such fund, and of all other funds which the corporation may receive by donation, bequest, or devise. No part of the principal of such permanent fund or its accretions shall be expended, except by a two-thirds vote of the active members of the association, present at any annual meeting, upon the recommendation of the board of trustees, after such recommendation has been approved by vote of the board of directors, and after printed notice of the proposed expenditure has been mailed to all active members of the association. The income of the permanent fund shall be used only to meet the cost of maintaining the organization of the association and of publishing its annual volume of proceedings, unless the terms of the donation, bequest, or devise shall otherwise specify, or the board of directors shall otherwise order. It shall also be the duty of the board of trustees to issue orders on the treasurer for the payment of all bills approved by the board of directors, or by the president and secretary of the association acting under the authority of the board of directors. When practicable, the board of trustees shall invest, as part of the permanent fund, all surplus funds exceeding five hundred dollars that shall remain in the hands of the treasurer after paying the expenses of the association for the previous year, and providing for the fixed expenses and for all appropriations made by the board of directors for the ensuing year.

The board of trustees shall elect the secretary of the association, who shall also be secretary of the executive committee, and shall fix the compensation and the term of his office for a period not to exceed four years.

SEC. 8. That the principal office of the said corporation shall be in the city of Washington, District of Columbia: *Provided*, That the meetings of the corporation, its officers, committees, and departments, may be held, and that its business may be transacted and an office or offices may be maintained elsewhere within the United States, as may be determined by the board of directors, or otherwise, in accordance with the by-laws.

SEC. 9. That the charter, constitution, and by-laws of the National Educational Association shall continue in full force and effect until the charter granted by this Act shall be accepted by such association at the next annual meeting of the association, and until new by-laws shall be adopted, and that the present officers, directors, and trustees of said association shall continue to hold office and perform their respective duties as such until the expiration of the terms for which they were severally elected or appointed, and until their successors are elected. That at such annual meeting the active members of the National Educational Association then present may organize and proceed to accept the charter granted by this Act and adopt by-laws, to elect officers to succeed those whose terms have expired or are about to expire, and generally to organize the "National Education Association of the United States," and that the board of trustees of the corporation hereby incorporated shall thereupon, if the charter granted by this Act be accepted, receive, take over, and enter into possession, custody, and management of all property, real and personal, of the corporation heretofore known as the National Educational Association, incorporated as aforesaid under the Revised Statutes of the Dis-

trict of Columbia, and all its rights, contracts, claims, and property of every kind and nature whatsoever; and the several officers, directors, and trustees of such last-named association, or any other person having charge of any of the securities, funds, books, or property thereof, real or personal, shall on demand deliver the same to the proper officers, directors, or trustees of the corporation hereby created: *Provided*, That a verified certificate executed by the presiding officer and secretary of such annual meeting, showing the acceptance of the charter granted by this Act by the National Educational Association shall be legal evidence of the fact, when filed with the recorder of deeds of the District of Columbia: *And provided further*, That in the event of the failure of the association to accept the charter granted by this Act at said annual meeting, then the charter of the National Educational Association and its corporate existence shall be, and are hereby, extended until the thirty-first day of July, nineteen hundred and eight, and at any time before said date its charter may be extended in the manner and form provided by the general corporation law of the District of Columbia.

SEC. 10. That the rights of creditors of the said existing corporation, known as the National Educational Association, shall not in any manner be impaired by the passage of this Act, or the transfer of the property heretofore mentioned, nor shall any liability or obligation, or the payment of any sum due or to become due, or any claim or demand, in any manner, or for any cause existing against the said existing corporation, be released or impaired; and the corporation hereby incorporated is declared to succeed to the obligations and liabilities, and to be held liable to pay and discharge all of the debts, liabilities, and contracts of the said corporation so existing, to the same effect as if such new corporation had itself incurred the obligation or liability to pay such debt or damages, and no action or proceeding before any court or tribunal shall be deemed to have abated or been discontinued by reason of this Act.

SEC. 11. That Congress may from time to time alter, repeal, or modify this Act of incorporation, but no contract or individual right made or acquired shall thereby be divested or impaired.

CHAPTER XXVII.

SUMMER COLONIES FOR CITY PEOPLE.

The people of Berlin have the reputation of being prone to boasting of their city. They share this tendency, however, with the inhabitants of all large cities. Local patriotism is not at all a reprehensible quality, for it is apt to engender a desire for improvements which will be of benefit to strangers as well as to residents. Still, it can not be said that Berlin has been boastful of a new sociological feature it has developed within the last few years, a feature so revolutionary in its bearing upon education and upon the general health of future generations, that it is worthy of being made known to the world. It may not be the innate modesty of the citizens of Berlin which accounts for the circumstance that as yet little has been said about this new agency. It may rather be the fact that it is not a governmental institution, but the result of self-help, of recognition of a plain necessity, of the spirit of self-government, and of a socialistic tendency or cooperative spirit that strongly characterizes the people of Germany. It may be assumed that if the new plan of summer colonies for the great majority of the poor had been instituted by the Government it would not have succeeded as well as it has, for the average citizen of Berlin is prone to criticise all governmental efforts. Berlin is entitled to the credit of having produced original ideas in public education. Compulsory school attendance became a State institution in Germany only after it had been thoroughly tested in the Prussian capital; Realschulen became popular after Berlin had set the example by the establishment of such schools; Pestalozzian principles and practices, introduced through the agency of Queen Louisa, were first applied in Berlin; Prussian normal school reorganization became possible only through Diesterweg's work in Berlin; trade schools and similar institutions for the technical advancement of laborers in Germany have their prototypes in Berlin. And not only original ideas are there brought out, but ideas from outside are welcomed in a most cordial manner, particularly in the public schools, the schools of the great majority of the people. Thus, for instance, the teachers of the public schools maintain, aided by the city government, a splendid school museum, which provides the schools every week with appliances for teaching.

Before the new method of caring for children in large numbers during the summer is explained, it will be well to refer to an incident of more than thirty-five years ago. It had been the common observation of primary teachers in Berlin that young children just entering school were lacking conceptions of common natural phenomena, such as the rising sun, the moon, thunderstorms, etc., hence that the work in school became increasingly difficult as the city grew larger and the children of the tenements were further and further removed from mother nature. To determine the extent of this poverty of conceptions or ideas, an original investigation of the contents of the children's minds on entering school was instituted by the public school teachers of the city. The results of this investigation, carefully tabulated, were published in the *Berliner Jahrbuch* of 1870. An English version appeared in the *Annual Report of this Bureau of 1901* (pp. 709-730).

A few items of that report may here be inserted to show that the teachers' complaints were well founded: Of 10,000 children entering school at 6 years of age only 1,640 had seen a huckleberry bush; only 2,078 had seen a lake; only 2,364 knew what dew is; only 2,466 could recognize a rabbit; only 2,636 had seen plowing; only 3,952 had seen the sun rise; only 3,646 had seen the woods; only 4,750 recognized a snail; only 5,085 knew a frog when they saw it; only 6,028 had seen a butterfly; only 7,770 had seen a rainbow. This proved a poverty of ideas which seriously hampered the instruction of the primary teachers, who naturally relied upon a certain stock of early impressions and concepts on which to base their language lessons.

This comprehensive investigation has been frequently adduced in urging the necessity of nature study. During the course of pedagogical and psychological discussions in many countries arguments have been based upon the results of the Berlin investigation, and upon those of many similar ones undertaken since then in Germany and in this country. The teachers, seeing that the horizon of their pupils was limited by brick and mortar (for open park spaces are rare in Berlin), came to the conclusion that only by giving their pupils opportunity to live in the open air could they succeed in laying a sound substratum of knowledge of natural objects and phenomena as a basis for subsequent school studies. The teachers of themselves, however, could succeed only in applying palliative remedies, such as having sent to them, on application to the botanical gardens, thousands of specimens of plants, twigs, flowers, fruit, etc., for nature study in the schoolroom; planting flower beds around the school-houses; also, brief excursions into parks and hanging up before the class colored pictures of landscapes and rural scenery.

While in many cases, especially in large cities, the necessity was recognized of getting the children out of the great desert of brick and mortar into the open air and into intimate companionship with life in the field, the garden, the woods, and the brook, it had nowhere resulted in a systematic effort to aid the children of an entire city in that way until it was tried in Berlin. Of course it is well understood, not only abroad, but in New York and in other large cities of this country, that something must be done to alleviate the detrimental influence of want of fresh air and space, and so recreation piers and roof gardens are provided, excursions of schools into parks are undertaken, open-air playgrounds are instituted, and similar efforts are made tending to alleviate the evil effects of life in a city; but all these efforts are merely sporadic, temporary, or unsystematic; they do not cure the evil at the roots; moreover, they are only drops in the bucket when compared with what seems necessary.

Now, if we consider that there are hundreds of thousands of children in Berlin, it would seem an impossibility to take them all, or even a majority of them, into the open air outside the city, be it only for a few hours a day—yet the Berlin people succeeded in doing this. Naturally, the teachers' influence alone was inadequate to convince the public and the authorities of the necessity of decisive measures. Stronger inducements were needed to bring about appropriate action. First, the school physicians (of whom there are 36 in Berlin), followed by others of the profession, added their influence to that of the teachers in the press and in the deliberations of the city council, but instead of the intellectual, they emphasized the physical deterioration of children. When the decrease of the birth rate and the lamentably high death rate of children became marked, the health authorities began to move in the direction suggested by the teachers. But when finally it was shown by unmistakable evidence from the statistics of crime that juvenile criminality in Berlin increased out of all proportion to the increase of criminality in general, the appeal for relief became urgent.

Perhaps it is not generally known that the city of Berlin has in its governmental relations a tendency to adopt socialistic measures, but certainly, compared with our American cities, it may be said to be a notable example of ownership of public utilities "by the people and for the people." This tendency to cooperation and collective action has resulted in this particular case in so brilliant a result that the most determined antisocialist must duly appreciate the children's thousands of arbor gardens round about the city. It is an experiment "en gros" which we see in Berlin, one of such dimensions that cavil ceases and admiration rises supreme.

Parents were induced to rent, at a nominal price of 4 marks (\$1), or about 20 to 25 cents a month, for the whole summer season, a patch of land in the suburbs of Berlin, available for the purpose in view, but unfit for farm land because cut up by railroad tracks and newly laid-out streets. On one of these patches a family might erect an arbor, or a small structure of boards with a wide veranda and a corrugated iron roof, for housing themselves and children during the summer months. Fences were built of wire so as to keep the different plots apart. On these patches the children, under guidance of teachers, parents, and appointed guardians began to sow seeds, plant shrubs, vines, and trees, or raise kitchen vegetables, each group or family according to its own desires and needs. Since the "arbors" are small they do not decrease the arable land of the allotments much, and there is still room enough left for swings, gymnastic apparatus, and similar contrivances, as well as bare sandy spots for little tots to play in. The various allotments are mostly uniform in size, and can be reached by narrow 3 or 4 foot lanes, on which occasionally are seen probationary officers or guardians who keep the peace and settle cases of disturbance.

The "arbor gardens" are established on every square rod of unused land round about the city, between railroads, on vacant lots, far out to the borders of the well-trained woods and royal forests. Small tradesmen, laboring men, civil officials of low degree, etc., have found it profitable to forsake their tenements in the city and move kith and kin into these "arbor colonies." The dwellings they erect are of the most primitive kind and rather flimsy; no permanent structure can be allowed to the tenant, for at any time the owner of the land may give notice to vacate for the purpose of erecting a row of houses, railroad buildings, or other permanent structures.

Not all of these arbor gardens are occupied by families during the night. Thousands return to their city homes for the night. Some parents, unable to free themselves from duties in town, send their children under guidance of servants, and spend only Sundays and holidays with them.

The people, especially the children, getting some information concerning the treatment of the crops from competent advisers in school and out in the arbor colonies, derive a great deal of good from their horticultural and floricultural work. Families who are aesthetically inclined devote their space to flowers and trailing vines exclusively; others, utilitarians from necessity, plant potatoes, carrots, turnips, beets, beans, strawberries, and the like. The feeling of ownership being strongly developed in the children in witnessing the results of their own labor, the crops are respected by the neighbors and pilfering rarely occurs, except perhaps in a case of great hunger. Her Majesty the Empress visited some of the arbor colonies last year, and was so delighted with what she saw, with the thrift, the happiness, and the health of the "colonists," young and old, that she ordered the gardeners of the royal and imperial gardens to send thirty healthy strawberry plants and a variety of flower seeds to each of the little colonists who signified his or her willingness to accept the gift. This may be the reason for the abundance of strawberries this year in the arbor colonies.

Several hundreds or a thousand of such patches of land, or gardens, situated in close proximity to each other, and separated only by wire fences and narrow lanes, form an arbor colony, which has a governor, or mayor, who is an unpaid city official. He arranges the leasing of the ground, collects the rents, and hands them over to the owners of the land. There is always a retired merchant or civil officer who is public-spirited enough to accept the office, to which is attached neither special honor, title, nor emolument. He is assisted by a "colonial committee" of trustees selected from the colonists who act as justices of the peace, in case disturbances should arise. Colonists who prove frequent disturbers of the peace or are found incapable of living quietly are stricken from the list of that particular community or colony, and their leases are not renewed. Of course there are such cases, but they are rare.

Since the size of an arbor garden is from 20 to 30 square rods, those forming a colony collectively make a considerable community, in which the authority of the committee, or board of trustees, is absolute, and the very few cases they have had to adjudicate have almost invariably been caused by a few women of nagging dispositions. Such persons are gradually weeded out. It is publicly claimed in the press that these colonies are literally without scandals, and that the life led by young and old is a most peaceful and happy one. This is easily explained: People who are hard at work are not likely to be quarrelsome; good wholesome food, much exercise in the form of play and labor, and an abundance of fresh air and sunshine are conducive to happiness, especially as the clothing may be of a primitive kind, or need not conform to the dictates of fashion.

A Berlin teacher remarked: "It is noticeable that since these school children are engaged in lucrative work which does not go beyond their strength, and since they perceive with their own eyes the results of their labor, a sense of responsibility is engendered which has a beneficial influence upon school work also. Respect for all kinds of labor and a perceptible decrease in the destructiveness so often found among boys are unmistakable effects of the labor in arbor gardens. It is not easy work which the children are performing, for spade and rake require muscular effort; but it is ennobling work, for it leads to self-respect, self-dependence, and self-reliance, also respect for others, as well as willingness to aid others. The most beautiful sight is afforded when, on a certain date agreed on by all the members of a colony, a harvest festival is held. Then flag raisings and illuminations and, as a matter of course, singing and music, make the day a memorable one."

It was well understood that many thousands of families had not the means to buy the lumber and hardware to erect an "arbor," and yet they were the very ones to whom the life in the open would be of the greatest benefit. Hence philanthropy stepped in and erected the structures. The Patriotic Woman's League of the Red Cross built half of all the arbors of the colony found on the "Jungferneheide." Many colonies reach into the woods, and naturally are of a different character from those in the open, for there tents are used instead of wooden structures. Everywhere the colonist must fence in his allotted land himself, which is done in the simplest manner, by means of a few posts and a few lengths of wire; some plant living hedges. For protection during the night a number of watchmen pace up and down the lanes; this entails a cost of $7\frac{1}{2}$ cents a month to each family. The season lasts five months, from May 1 to October 1.

The school-going population meanwhile attend their schools, which can be reached by means of the elevated cars or surface tramways for $2\frac{1}{2}$ cents, and much cheaper if they have commuters' tickets. Many schools are near enough to be reached on foot. The children do not loiter on the way, but when school

is out they hurry "home" to begin work in the garden, or to sit down to a meal on the veranda, which under the benign influence of sunshine and fresh air is relished more than a meal taken in a city tenement house filled with fetid air and wanting in light. Nearly every one of these gardens has a flag pole, at the head of which flutters a small German national flag, and at night a Japanese paper lantern with a tallow dip in it illuminates the veranda. Flags by day and lanterns at night give the colony a festive appearance. The teachers find that city children who spend five months in the open air are well equipped with elementary ideas in physical geography and astronomy. Their mental equipment is better, indeed, in all fields of thought, their physical health is improved, and their ethical motives and conduct are purer than they were in former years.

To realize fully the extent of these wholesale efforts in behalf of the physical, the intellectual, and the moral health of youth (for put children into close contact with nature and they will improve in all directions), it is well to take a ride on the North belt line (elevated steam railroad), the trains of which start from the Friedrich's street depot and bring one back to it after a ride of an hour and a half. Then one may do the same on the South belt line. On these two trips one will see, not hundreds, but tens of thousands of such "arbor gardens" as have been described, full of happy women and children at work or play. The men come out on the belt line when their work in town is done. The writer was riding through the city in an open cab, and seeing hardly any children on the streets and in the parks, he asked, "How is it that we see no children out?" "Ah, sir," was the reply, "if you will see the children of Berlin you must go out to the arbor colonies outside of the city. There is where our children are." Subsequent visits to these colony gardens showed that Berlin is by no means a childless city. To judge from the multitudinous arbors to be seen from the windows of the belt line cars there must be about 50,000 of them. As far as the eye reaches the flag poles and the orderly fences and the little structures can be seen; and since the city has 2,000,000 inhabitants, it is very likely that an estimate of several hundred thousands of children thus living in the open air, an estimate made by a city official, is not excessive. The most beautiful and best arranged gardens are not found in the vicinity of railroads, but several miles out toward the north and the south of the city. Here, where the soil is better, fine crops are raised.

If we turn our eyes homeward and contemplate the many thousands of small efforts made in this country toward the alleviation of city children's misery, we can say truthfully that we in America are perhaps fully alive to the necessity which has prompted the people of Berlin to action; we only need to be reminded of Mayor Pingree, of Detroit, and his potato patches on empty city lots, our children's outing camps, our occasional children's excursions, and the like. Still, there is nothing in this country to compare with the thousands of Berlin arbor gardens and their singularly convincing force; they challenge admiration for the spirit of combined action which animates the inhabitants of Berlin.

The arbor gardens of Berlin should not be mistaken for the numerous "forest schools" (Waldschulen) in Germany, respecting which the press has contained accounts lately. These schools "in the woods" are for sickly children, both physically crippled and mentally weak. The pupils have their lessons in the open, and the teachers live, play, and work with them; long recesses separate the various lessons, and a two-hour nap in the middle of the day out in the open is on the time-table of every one of these forest schools. These special open-air schools for weaklings and defectives are now found in many parts of

Germany, notably in Charlottenburg, Strassburg, and the industrial regions of Rhineland.

The example of Berlin has been followed in other German cities, notably in Düsseldorf on the Rhine, where the arbor gardens are called "Schreiber gardens," in honor of the man who promoted their establishment. There is a large colony of such gardens along the Hans-Sachs street, where Lima beans, peas, lettuce, cucumbers, potatoes, and many other garden vegetables are raised; even strawberries, raspberries, and fruit trees are found here. But the city being more lavishly provided with parks and open spaces than others of its size, the necessity for open-air life has not made itself felt as forcibly as in Berlin.

CHAPTER XXVIII.

COMPULSORY SCHOOL ATTENDANCE AND ITS RELATION TO THE GENERAL WELFARE OF THE CHILD.

CONTENTS.—Introduction. Compulsory school attendance laws: Present extent and past progress; duration of the compulsory period. Truant service: Necessity of; requirements of. Child labor laws: Tabular view by States; age limits in the United States; resolutions of Berlin conference regarding. School attendance *v.* child labor: Relative proportions of children at work and in school; number and proportion of children in agricultural pursuits; in the "more harmful occupations;" child wage-earners classified by age, by geographical divisions, by race, and by nativity; inferences as to need and efficiency of compulsory school-attendance laws; the cotton mill in its relation to the children of school age. The unsolved problem of school attendance: Early withdrawal as related to industrial skill and moral stamina; the drawing power of the school. Remedial agencies: The juvenile court; typical relief measures. Bibliography.

INTRODUCTION.

The leading nations of the world seem moved by a common impulse to examine into the conditions affecting children. This is not a sudden impulse, but it has suddenly taken a new direction. Sociological and political interests have replaced the psychological, which for awhile gave purpose to the study of childhood. The problem of the hour is that of the child as a breadwinner and his relation to the public welfare.

The widespread agitation of this problem throughout the United States during the past two years culminated in the act authorizing an investigation into the condition of the child workers of this country, passed by Congress at its present session.^a This investigation is now in progress; at the same time local committees are working on the problem in every State. Hence, the present year will undoubtedly be marked by great activity with respect to practical measures for the protection and care of the young, and the time is therefore opportune for a survey of the legal measures already adopted in this country for the accomplishment of these purposes. These measures are comprised in compulsory school-attendance laws and child-labor laws. The former are intended to save the nation from the evils of illiteracy, the latter to prevent children from being exploited for gain; but the two classes of laws have been intimately related in their origin and are practically inseparable in their operation and purposes. In the States in which compulsory school-attendance laws were first enacted child-labor laws soon followed, and where, by the rapid development of manufacturing enterprises, as in the case of several of the Southern States at the present time, the need of child-labor laws is suddenly recognized and met, compulsory school-attendance laws inevitably follow.

^a An act to authorize the Secretary of Commerce and Labor to investigate and report upon the industrial, social, moral, educational, and physical condition of woman and child workers in the United States. Approved January 29, 1907. (59th Cong., 2d sess.)

Having regard, then, to the special interest manifested at this time in measures for promoting the welfare of children and youth, it is proposed here to present (1) a brief survey of the statutes of the States and Territories with respect to compulsory school attendance laws; (2) the relation of this showing to certain particulars respecting juvenile labor disclosed by the recent census bulletin on the subject;^a (3) problems that await solution.

COMPULSORY SCHOOL ATTENDANCE LAWS.

Table 1 shows the number of States and Territories that have the benefit of compulsory school attendance laws, the ages and annual periods to which such laws apply, and the penalties incurred by their violation. The table comprises, it will be seen, thirty-seven of the forty-six States of the Union (including Oklahoma), two Territories, and the District of Columbia.

TABLE 1.—*Statutory provision relating to compulsory school attendance in the several States.*^b

State.	Age.	Annual period.	Penalty on parents for neglect.
Arizona.....	c 8-14	24 weeks; 20 consecutive.....	\$5 to \$25.
California.....	8-14	Full term.....	First, not over \$10 or 5 days' imprisonment; subsequent, \$10 to \$50, or 5 to 25 days, or both.
Colorado.....	d 8-16do.....	\$5 to \$25.
Connecticut.....	e 7-16do.....	Not exceeding \$5 each week of absence.
Delaware.....	7-14	20 weeks; but each school district has power to reduce this to not less than 12 weeks.	First, not exceeding \$2; subsequent, not exceeding \$5; on default, imprisonment; first, not over 2 days; subsequent, not over 5.
District of Columbia	8-14	Full term.....	Not exceeding \$20.
Idaho.....	f 8-16do.....	Not exceeding \$300, or imprisonment not exceeding 6 months, or both.
Illinois.....	7-16	Full term, to be not less than 110 days of actual teaching.	\$5 to \$20 and costs; stand committed until paid. Penalty for false statements as to age or attendance, \$3 to \$20.
Indiana.....	g 7-14	Full term.....	\$5 to \$25, and, in discretion of court, imprisonment 2 to 90 days.
Iowa.....	g 7-14	16 consecutive weeks.....	\$3 to \$20.
Kansas.....	g 8-15	Full term ^h	\$5 to \$25.
Kentucky.....	7-14	8 consecutive weeks; full term in cities of first, second, third, and fourth classes.	First, \$5 to \$20; subsequent, \$10 to \$50.
Maine.....	7-15	Full term.....	Not exceeding \$25, or imprisonment not exceeding 30 days.
Maryland ⁱ	f 8-12do.....	Not exceeding \$5.
Massachusetts.....	k 7-14do.....	Not exceeding \$20.
Michigan.....	g 7-15do.....	Fine of \$5 to \$50, or imprisonment 2 to 90 days, or both.
Minnesota.....	8-16do.....	Not exceeding \$50, or imprisonment not exceeding 30 days.
Missouri.....	l 8-14	Not less than half of term ^l	\$10 to \$25, or imprisonment 2 to 10 days, or both.

^a Department of Commerce and Labor, Bureau of the Census, Bulletin 69. Child Labor in the United States.

^b Revised to include in part the legislation of 1907.

^c To 16 if unable to read and write English.

^d Children 14 to 16 whose labor is necessary to their own or parents' support are excused.

^e Not applicable to children over 14 lawfully employed to labor at home or elsewhere.

^f Does not apply to children over 14 who have completed eighth grade or whose help is necessary for support of self or parents.

^g Inclusive.

^h Eight weeks for children over 14 who can read and write English and are at work to support themselves or others.

ⁱ The provisions tabulated for Maryland are those of the act of 1902, whose operation is limited to Baltimore city and Allegany County.

^j To 16 unless regularly employed to labor at home or elsewhere.

^k To 16 if wandering about public places without lawful occupation, or if unable to read and write.

^l Full term in cities of over 300,000 population, and to 16 years in such cities if not lawfully and usefully employed at least six hours each day.

TABLE 1.—Statutory provision relating to compulsory school attendance in the several States ^a—Continued.

State.	Age.	Annual period.	Penalty on parents for neglect.
Montana.....	b 8-14	Full term; in no case less than 16 weeks.	\$5 to \$20.
Nebraska.....	c 7-15	Two-thirds of school term; in no case less than 12 weeks. ^c	\$5 to \$25 (on truant officer).
Nevada.....	8-14	16 weeks; 8 consecutive.....	First, \$50 to \$100; subsequent, \$100 to \$200; with costs.
New Hampshire.....	d 8-14	Full term.....	First, \$10; subsequent, \$20.
New Jersey.....	7-14do.....	"Punishable as a disorderly person."
New Mexico.....	7-14	3 months.....	\$5 to \$25, or imprisonment not exceeding 10 days.
New York.....	8-16	Full term (October 1 to June 1) between ages of 8 and 14; when unemployed, between 14 and 16.	First, not exceeding \$5; subsequent, not exceeding \$50, or imprisonment not exceeding 30 days, or both fine and imprisonment.
North Carolina ^e	8-14	16 weeks.....	\$5 to \$25.
North Dakota.....	8-14	Full term.....	\$5 to \$20 (on school official).
Ohio.....	d 8-14	Full term; in no case less than 24 weeks.	\$5 to \$20; on default, imprisonment from 10 to 30 days.
Oklahoma.....	f 8-16	3 months ^f	
Oregon.....	b 9-14	Full term.....	\$5 to \$25, or imprisonment 2 to 10 days, or both fine and imprisonment.
Pennsylvania.....	g 8-16	Full term; but the school board of each district has power to reduce this to not less than 70 per cent of the term.	First, not exceeding \$2; subsequent, not exceeding \$5; on default, imprisonment; first, not over 2 days; subsequent, not over 5.
Rhode Island.....	h 7-15	Full term.....	Not exceeding \$20.
South Dakota.....	8-14	Full term; but the district board may reduce this to not less than 16 weeks, 12 consecutive.	\$10 to \$20 and costs; stand committed till paid.
Tennessee.....	(i)		
Utah.....	8-16	20 weeks, 10 consecutive; in cities of the 1st and 2d class 30 weeks, 10 consecutive.	First, not exceeding \$10; subsequent, not exceeding \$20, with costs.
Vermont.....	j 8-15	Full term.....	\$5 to \$25.
Washington.....	8-15	Full term.....	Not over \$25.
West Virginia.....	8-14	20 weeks.....	First, \$2; subsequent, \$5.
Wisconsin.....	k 7-14	Full term; in cities, not less than 8, elsewhere not less than 5, calendar months.	\$5 to \$50, or imprisonment not over 3 months.
Wyoming.....	7-14	First 6 months schools are in session.	Not less than \$25; imprisonment not more than 90 days may be added.

^a Revised to include in part the legislation of 1907.

^b To 16 if unemployed.

^c To 16 years and full term in cities.

^d To 16 if unable to read and write English.

^e Law does not go into effect in any county until voted by the county; does not apply to 11 counties, nor to children over 12 lawfully employed at home or elsewhere.

^f Constitutional provision.

^g Not applicable to children over 14 who can read and write English and are regularly employed in useful service.

^h Not applicable to children over 13 who are lawfully employed.

ⁱ A compulsory attendance act applying only to Claiborne and Union counties was passed in 1905; one for Campbell and Scott counties in 1907.

^j Children over 15 or under 8, when once enrolled, must attend the full term for which enrolled.

^k To 16, if not regularly and usefully employed at home or elsewhere.

The relative extent of the States and Territories to which compulsory laws now apply, as compared with those wanting in such legislation, is shown by the accompanying map. In this respect it appears that the country divides into two sections; one of these includes the northern and western divisions, in which all the States have compulsory school laws; the other includes the two southern divisions, in which only three States have been brought wholly under the compulsory principle, namely, Kentucky, by a law of 1895; West Virginia, by a law passed the following year, and Oklahoma by constitutional provision. Three other of the Southern States, viz, Maryland, North Carolina, and Tennessee, have compulsory laws applicable to certain counties or cities. The number of Southern States which have the benefit of laws restricting the labor of children will be seen by reference to Table 4.

Map showing extent of territory in the United States subject to compulsory school attendance laws. [White indicates the existence of such laws; shaded, their absence.]

The progress of the compulsory principle by five-year periods from 1870 to 1905 may be seen by reference to the following table and diagram. At the earlier date only about 5 per cent of the population had the benefit of laws requiring school attendance, as against nearly 73 per cent in 1905.

TABLE 2.—*Progress of the adoption of compulsory school attendance laws.*

Year.	Number of States and Territories having compulsory school attendance laws.	Population under compulsory school attendance laws.	Population of United States.	Per cent under compulsory school attendance laws.
1870.....	3	1,919,602	38,558,371	4.98
1875.....	16	13,412,462	43,700,554	30.69
1880.....	17	18,414,631	50,155,783	36.72
1885.....	23	25,898,527	56,221,865	46.06
1890.....	28	30,920,711	62,622,250	49.38
1895.....	29	39,970,360	68,748,950	58.14
1900.....	32	49,394,291	75,994,575	65.00
1905.....	35	^a 60,156,526	82,584,061	72.81

^a This includes an estimated population of 692,600 subject to compulsory school attendance laws in certain counties and cities in Maryland, North Carolina, and Tennessee.

DURATION OF THE COMPULSORY PERIOD.

The duration of compulsory school attendance is the matter of chief importance after the principle itself has been secured. This involves two considerations—the length of the annual period and the age limits of compulsion. By reference to Table 1, it will be seen that in twenty-five States the law specifies the full school term as the annual period, although in several instances provision is made for reduction of the time at the discretion of the school authorities. From the educational standpoint, extension to the full annual term appears to be the only consistent course in this matter. The legal recognition of a partial school year gives sanction, as it were, to the habit of irregular and fitful attendance, an effect which is indeed lessened, though by no means overcome, by the requirement of consecutive attendance for the briefer term. At the same time, compulsory laws would work serious harm in many cases, were there no discretionary powers as to their application. In brief, it may be said that an ideal law will provide for the largest benefit to the individual child with due regard to the circumstances of his life.

With respect to the age limits of the compulsory period, Table 1, column 2, shows very clearly the tendency in our country to defer the restraints of school, and thus prolong the period for the free development of the child. Of the thirty-seven States reporting compulsory laws, twenty-one make 8 years of age the lower limit; in this group belong also the Territory of Arizona and the District of Columbia. Fifteen States and the Territory of New Mexico place this lower limit at 7 years of age.

It is generally admitted by teachers and by judicious parents that children under 7 should not be compelled to go to school; there are, however, strong arguments against deferring the obligation to a later age. On this point Doctor Maxwell, in a discussion of the compulsory law of New York, says:

The compulsory school age is now from 8 to 14 for all children, and from 14 to 16 in the case of children not engaged in legal employment. I believe it would be greatly to the advantage of this community, and, indeed, of all communities, if the legal age were reduced to 7. Even the most zealous advocate of delayed school instruction will admit that a child's brain and body are sufficiently developed at 7 to endure the strain. The recent school census

Diagram indicating the per cent of population affected by compulsory school laws in the United States, at intervals of five years from 1870 to 1905, inclusive.

shows that of children between 7 and 8 about 19,000 are not attending school; of children between 6 and 7, 33,000; between 5 and 6, 50,000. Under our local regulations children under 6, if admitted at all, must be placed in a kindergarten. It would probably not be wise to attempt to force all children between 6 and 7 to attend school. There can be no question, however, of the wisdom of requiring children between 7 and 8 to attend. A year of school instruction at this critical period may mean the difference between success and failure in after life.^a

In this particular our own country presents a somewhat striking contrast with foreign countries, as will be seen by a comparison of Table 1 with the following table (Table 3). Of twenty-six countries named therein, twelve fix the lower limit at 7 years of age; ten at 6 years, and two, viz, England and Scotland, at 5 years.

With reference to England it should be said that the ages required for school attendance (5 to 13, inclusive) are simply limits within which local by-laws may make attendance compulsory.

TABLE 3.—*Compulsory education requirements in certain foreign countries.*

Countries.	Date of present law.	Age limits.	Attendance required.	Penalty.
<i>Europe.</i>				
Austria-Hungary:				
Austria.....	1869	6-14	Until scholar has acquired prescribed subjects, religion, and reading, writing, and arithmetic.	Fine \$3.50 (maximum), or imprisonment up to 2 days.
Hungary.....	1868	6-12; 12-15, continuation.	8 months country, 10 months town.	Fine from 35 cents to \$1.50.
France.....	1882	6-13.....	For 4 absences of half a day in a month the parent is summoned before local school committee.	First and second offenses, warning; subsequent, fine \$3 (maximum), and imprisonment 5 days.
Germany:				
Bavaria.....		6-13 (13-16 in Sunday secular schools)	Same as in Austria....	Fine \$11 (maximum), or 8 days' imprisonment.
Prussia.....		6-14.....	8 years.....	Each offense, 70 cents (maximum), or imprisonment up to 3 days.
Saxony.....	^b 1835	7-15 (special dispensation after 7 years' attendance and 1 year's prolongation for ignorance).	7-9 years, according to progress made.	Fine \$1.50 to \$7, or imprisonment from 1 day to 6 weeks.
Wurttemberg.....	{ 1836 } { 1877 }	7-14	Every school day.....	Fine or imprisonment.
Great Britain and Ireland:				
England.....	1880	5-13	Full school term, unless by special arrangement.	Determined by local by-laws.
Scotland.....	1872	5-13do.....	Fine \$5, or imprisonment 14 days.
Ireland.....	1892		Option of local authorities.	
Italy.....	1877	6-9; 6-12 in communities having higher primary schools.	No fixed rule.....	Each offense 10 cents to \$2.
Netherlands, The.....	1900	6-13		
Norway.....	{ 1848 } { 1860 } { 1889 }	6½-14, cities; 7-14, rural districts.	12 weeks per annum....	Fines.

^a The Nation, April 25, 1907, p. 380.

^b Education compulsory since 1769.

TABLE 3.—*Compulsory education requirements in certain foreign countries—Con.*

Countries.	Date of present law.	Age limits.	Attendance required.	Penalty.
<i>Europe—Continued.</i>				
Sweden.....	{ 1882 1897 }	7-14	34½ weeks.....	
Switzerland:				
Berne.....	1870	6-15	Five-sixths of possible attendances.	Fines and imprisonment.
Geneva.....	1886	6-15	4 days a week; 6 hours a day.	Do.
Grisons.....	{ 1853 1859 }	7-15	30 hours a week.....	Fines or imprisonment. ^a
Neuchâtel.....	1872	7-16	After 13 years of age, 10 hours a week.	Fine 40 cents (minimum) or imprisonment 30 days (maximum).
Tessin.....	1882	6-14	28 hours a week for 6 to 9 months.	Each offense, 2 to 3 cents and 4 hours' imprisonment.
Vaud.....	1865	7-16	33 hours a week.....	
Zurich.....	1859	6-16	Every day; penalties for 10 absences.	Warnings; subsequently, fines 60 cents to \$3.
<i>North America.</i>				
Canada:				
British Columbia...	1885	7-12	Fine or imprisonment.
Nova Scotia.....	1864	7-12	80 days a year.....	Fine \$2.
Ontario.....	{ 1885 1887 }	7-13	100 days a year.....	{ \$1 a month for each of the children not attending school.
Prince Edward Island.	1877	8-13	13 weeks a year.....	Fine.
<i>Asia.</i>				
Japan.....		6-10	
<i>Australasia.</i>				
Australia:				
New South Wales..	1880	6-14	70 days each half year..	Fine 5 shillings to 20 shillings, or imprisonment 7 days.
Queensland.....	1875	6-12	60 days in each half year.	Fine \$5 to \$25, or imprisonment 7 to 30 days.
South Australia...	{ 1875 1878 }	7-13	{ 35 school days per quarter.	Fine \$1.25 to \$55.
Tasmania.....	{ 1885 1886 }	7-13	3 days a week.....	
Victoria.....	1872	6-13	40 days each quarter....	Fine 5 shillings to 20 shillings.
West Australia....	1899	6-14	Every school day.....	Fine 5 shillings to 20 shillings.
New Zealand.....	{ 1877 1901 }	7-14	{ From two-thirds to four-fifths total number of sessions.	Fine 5 shillings to 40 shillings.

^a Amount of fine left to discretion of judge.

The full period for compulsory attendance in the United States ranges from 4 years in Maryland to 9 years in Connecticut and Illinois. In ten States the period comprised is 6 years, in twelve States 7 years, in eleven States 8 years. It will be seen, however, that in the case of the more extended periods the laws provide, as a rule, for modifications that reduce the period of unconditional enforcement. Experience shows that as civilization advances and the comforts of life increase, and greater attention is paid to the conditions most favorable to the healthful development of the young, children are not sent to school at so early an age as under less favorable circumstances. On the other hand, where the conditions favor regularity of school attendance, the ordinary school course is completed at an early age, and a larger proportion of children pass

on to higher institutions of learning than in communities less advanced in these respects.

The varying regulations as to the age limits and the period of compulsory school attendance reflect, therefore, differences in the political and industrial conditions of different portions of the country, as well as that pervading regard for individual or parental freedom which marks the entire history of compulsory school legislation in our own as in other English-speaking countries. If for a time this spirit prevents explicit laws and forceful or rigorous administration, in the end it generally works out firm support for measures looking to the common welfare.

It is worthy of note in this connection that the actual ages for free attendance at public schools in the different States of the Union cover, as a rule, a much longer period than the ages for compulsory school attendance. The former range from a period of 16 years (ages 4 to 20 or 5 to 21) in eleven States, to a period of 10 years (ages 7 to 17) in one State only. In twenty States the period is 15 years (ages 6 to 21).^a

So far as regards time alone these liberal provisions make it possible for every child to pass beyond the mere elementary school stage. At the same time also they afford the opportunity for children whose schooling is interrupted by sickness, necessity of work, or other misfortune, to resume study when circumstances permit.

Unfortunately, the actual average period of school attendance in our country falls far below its legal measure. From estimates continued for several years in the Bureau of Education, it appears that the average number of years of schooling in elementary and secondary schools supported by public taxes is equivalent to 4.69 years of 200 days each for each individual of the population. In the South Atlantic division it falls to 3.25 years of 200 days each, and in the South Central division to 2.91 years.

If this average degree of schooling were the actual experience of every child, it might, indeed, suffice to keep down the illiteracy which still threatens us—from the colored population of the South, from the native white population in regions poorly supplied with schools, and from foreign-born white laborers coming into the States most highly favored with schools and colleges. But this average, as we know, conceals a much lower degree of school attendance for a large proportion of the poorer children.

Moreover, we have come to realize that the lower grades of the public schools are fit only for mere children. They have no adaptation to the belated youth of 13 years and upward. If such have still to master the elements, it must be by methods and in an environment suited to the capacities and needs of adolescent minds, which, however undeveloped, can not be reached in the same way as eager, infantile minds. In this respect we have much to learn from foreign countries—from the continuation schools of Germany,^b from the people's high schools of Denmark, and from the network of industrial schools in France. Several States of the Union are successfully working out the same problem—for example, Massachusetts, by the requirement of an evening school in every city and town of 10,000 or more inhabitants; Kansas, by its system of county high schools; Wisconsin, by its continuation or agricultural high schools. But in the country at large, there is an alarming misconception of the educational needs of the elder children, who can profit neither by the elementary school nor by the regular high school.

^a See Vol. 1 of this report, p. 297.

^b For an account of these schools see Bulletin, No. 1, 1907, Bureau of Education; Continuation Schools in the United States, pp. 33-51.

TRUANT SERVICE.

It need hardly be said that compulsory school laws exert a positive influence upon only a small proportion of children. In our own country, at least, the great majority of children are sent to school without any thought of law. Indeed, if public sentiment, the regard of parents for the welfare of their children, or the desire to preserve the respect of their neighbors did not lead to this result, compulsory laws could not be enforced in any case. These laws indicate the existence either of a widespread appreciation of the advantages of education or the masterful purpose of determined leaders.

In respect to the small percentage of children who would become habitual truants or be kept from school by their parents if the law did not compel attendance, it is certain that such laws are practically useless unless supplemented by an effective truant service. The history of compulsory education in Massachusetts, which was the first State in the Union to adopt the principle, is conclusive on this subject, and the example of this State in organizing a truant service has been followed to some extent by a majority of the States having compulsory laws. In this number are comprised all the States of the North Atlantic division, eight of the twelve States of the North Central division, and five States of the Western division. In many of the States special schools have been established for the reception of children who are in danger of becoming habitual truants. The principal cities of the country have also a well-organized truant service, including the feature of special or truant schools. The humane ideal to which it is intended that this class of schools should conform is indicated by the name "parental" very generally applied to them.

The gradual development of the truant service, from feeble beginnings as a feature of criminal procedure to its proper place among the preservative forces of a community, is illustrated by the history of the service in Massachusetts. It dates in that State from an act concerning truant children and absentees from school, passed May 3, 1850, two years prior to the passage of the first compulsory school attendance law. This first truant law merely authorized cities and towns in the Commonwealth "to make all needful provision and arrangement concerning habitual truants and children not attending school." Twelve years later (April 30, 1862) an act was passed making the enforcement of the truant law compulsory upon cities and towns, and by a law of 1873 the duty of appointing truant officers was delegated to the local school committees, so that the service was incorporated in the educational system. In 1894 the laws relating to compulsory school attendance, truancy, and the care of neglected children, which had been developing on independent lines, were consolidated, and four years after (1898) was passed the law entitled "An act relative to school attendance and truancy," which, with subsequent amendments, remains in force to the present time. It was a comprehensive measure, imposing upon cities and towns the obligation to make ample provision of schools, elementary, high, and industrial; placing upon parents and guardians the obligation to send children to school, and upon the latter the obligation to attend school. It requires an annual census to be taken in every city and town of all children between the ages of 5 and 15, and of all minors over 14 years of age who can not read and write (sec. 16), and the establishment of county truant schools to which habitual truant boys may be committed. The State industrial school and probation under the watchful care of a truant officer are the corresponding provisions for the restraint of truant girls (secs. 22-28).

The prompt operation of the truant service is facilitated by the extensive powers conferred upon the truant officers. They may have the oversight of children placed on probation, and, in accordance with the amending law of

1906,^a they may "apprehend and take to school, without a warrant, any minor under the age of 16 years who is employed in any factory, workshop, or mercantile establishment in violation" of the law, and shall report any cases of such illegal employment to the officers of the courts appointed to deal with the same (sec. 3). For neglect of this duty a truant officer is subject to a fine not to exceed \$100 for each offense. This law provides further that "inspectors of factories and public buildings and truant officers may require that the age and schooling certificates and lists of minors who are employed in factories, workshops, or mercantile establishments shall be produced for their inspection" (sec. 4).

The Massachusetts law is not cited as a model, but simply to emphasize the main features which are, one and all, essential to an efficient truant system. The chief defect of the system in that State arises from the diversity of practice on the part of the individual cities and towns, which are alone responsible for the enforcement of the law. As a means of unifying the system, one of the general agents of the board of education suggests^b the appointment of one or more State school attendance officers, whose duty would be to vigorously enforce the laws of school attendance as applied to parents and guardians as well as to children.

In other States, where authority in this matter is centralized, complaint is made of difficulty in fixing the responsibility for violations of the law: of the failure of the officers to understand local conditions; of the assignment of too large an area to a single officer, etc.

The compulsory school law secured for the District of Columbia at the last session of Congress provides for the appointment of truant officers and for special schools for the restraint of habitual truants; but it makes no provision for an annual census of the children of school age,^c which is an indispensable aid in the effort to keep track of them, and one particularly needed in a city having so large a proportion of colored people.

These defects and omissions in laws providing for compulsory school attendance and the auxiliary truant service indicate the need of the widest interchange of opinion and experience, in order that each State may profit in the matter by the experience of every other. Without such interchange, States and cities that have yet to organize a compulsory system will be constantly repeating mistakes that have been discovered and corrected in those that have led in the work.

CHILD-LABOR LAWS.

The chief difficulty in the way of securing the attendance of all children at school, at least in the great industrial States, is that of overcoming the influences that force or tempt children to remunerative labor at an early age. Hence, in all countries in which education has become a matter of great concern, and in which the physical and moral health of children are rightly valued, labor laws have been passed restricting the age at which children may be employed as wage-earners. These labor laws reinforce the compulsory school attendance laws by educational requirements, which are sufficient, at least, to prevent the actual increase of illiteracy among minors engaged in manufactures, mining, etc. By comparing Table 1 with the following table (Table 4) it will be seen that laws restricting child labor have been passed in all the States of the Union which have compulsory school laws, and in seven States, namely, Alabama, Florida, Georgia, Louisiana, South Carolina, Texas, and Virginia,

^a Acts and resolves of Massachusetts, 1906, p. 676.

^b Sixty-ninth Annual Report of the Board of Education, 1904-5. Appendix A. Report of John T. Prince, agent of the board, p. 254.

^c For the text of this law see p. 1247 of this report.

in which compulsory school laws are wanting. An effort was made during the last session of Congress to secure the passage of a child-labor law for the District of Columbia, as a corollary to the compulsory education law; but although urged by all the considerations that gave weight to the arguments for compulsion, the endeavor to safeguard children from the evils of premature and excessive labor failed. It is confidently believed that such a law will be passed at the next session, thereby giving to the cause the very great advantage of national sanction.

The tabulated particulars under the head of child labor, Table 4, are comprised in two columns, the first relating to the age under which specified employments are forbidden, the second to the educational restrictions embodied in the laws. As regards the age at which children may be employed, it appears that only three States, viz, Alabama, Arkansas, and Nebraska, place the inferior age limit as low as 10 years, for any class of labor, and even in these three cases children less than 12 years of age can only be employed under specified conditions. It may be said, then, that throughout the United States where laws restricting the labor of children have been passed, 12 years is regarded as the lowest age at which children should be employed as wage-earners in mercantile or manufacturing establishments, and the tendency is to raise the lower age limit to 14 years or even higher.

TABLE 4.—*Statutory provisions of the several States relating to child labor.*^a

State.	Age under which specified employments are forbidden.	Educational restrictions on child labor.
Alabama.....	10 years, in factories in all cases; 12, unless orphans, or children of the widowed or disabled; 12, in mines.	
Arizona.....		Children under 14 may not be employed during school hours.
Arkansas.....	10 years, in all cases in manufacturing establishments; 12, unless to support a parent or self, as specified by law; 14, in mines; females not at all in mines.	No child under 14 may be employed in a manufacturing establishment unless he attends school 12 weeks each year and can read and write English.
California.....	14 years, in any mercantile or manufacturing establishment, workshop, hotel, or as messenger, etc. Children 12 to 14, upon permit, may work if parents incapacitated or during vacation.	No minor under 16 may work for gain in school hours unless he can read and write English or attends night school.
Colorado.....	14 years, in any underground works, mine, smelter, mill, or factory. No female may be employed in a coal mine.	Unlawful to employ children under 14 during school hours unless they have complied with the school-attendance law; under 16, unable to read and write, unless attending day or night school.
Connecticut.....	14 years, in any mechanical, mercantile, or manufacturing establishment.	Children under 14 may not be employed while school is in session. Children 14 to 16 can not leave school to be employed unless their education is satisfactory to the local or State school board.
Delaware.....	14 years, in any factory, workshop, or manufacturing establishment, except in canning industry, etc., or to support widowed mother.	No child 14 to 16 may be so employed unless he has attended day or night school 12 weeks the preceding year.
Florida.....	Children under 15 may not be employed more than 60 days without consent of legal guardian.	
Georgia.....	10 years, in or about any manufacturing establishment; 12 years, after Jan. 1, 1907, except for support of self or parents in specified cases.	After Jan. 1, 1908, no child under 14 may be employed as in preceding column (with the exception there noted) unless able to write and has attended school 12 weeks the preceding year; under 18, unless so attended school.
Idaho.....	14 years, in mines (constitution of State).	

^a Revised to 1907.

TABLE 4.—Statutory provisions of the several States relating to child labor ^a—Continued.

State.	Age under which specified employments are forbidden.	Educational restrictions on child labor.
Illinois.....	14 years, in any mercantile institution, factory, office, theater, elevator, etc., or as messenger or driver; 16, in or about any mine. No female may work in or about a mine.	No child 14 to 16 unable to read and write may be employed unless attending an evening school, if there is one. No child under 14 may be employed at any work for wages during the school term.
Indiana.....	14 years, in any manufacturing or mercantile establishment, mine, quarry, laundry, renovating works, bakery, or printing office. No female may work in a mine.	Children under 16, unable to read and write English, may not be employed in foregoing employments except in vacation of public schools.
Iowa.....	14 years in any mine, factory, mill, shop, laundry, packing house, elevator, or store where more than 8 persons are employed.	
Kansas.....	14 years, in any factory or packing house or in or about any mine; 16, in any dangerous, etc., employment.	No minor under 16, may work in a coal mine unless he can read and write and has attended school 3 months in the year.
Kentucky.....	14 years, in any workshop, factory, mill or mine, unless the child has no other means of support.	No child under 14 to be employed in any mercantile, laundry, or printing establishment, or as messenger, except during vacation.
Louisiana.....	12 years (boys), 14 (girls), in any factory, mill, warehouse, or workshop in cities of 10,000 or more.	Children under 14 may not be employed in foregoing employments, nor in clothing, dressmaking, or millinery establishments, unless they have attended school 4 months in preceding year.
Maine.....	12 years, in any manufacturing or mechanical establishment.	Children under 15 shall not be employed in any manufacturing or mechanical establishment, except during vacation, unless they have attended school 16 weeks during preceding year.
Maryland.....	14 years, in mills and factories (except canning establishments), unless self, widowed mother, or invalid father solely dependent upon such employment. 19 counties exempt from law.	No minor, 12 to 16, unable to read and write English may be employed where there is an evening school unless attending that or another school.
Massachusetts.....	14 years, in factories, workshops, or mercantile establishments.	Children under 14 may not be employed at any work for wages during school hours; from 14 to 16 may not be so employed in any factory, workshop, or mercantile establishment if unable to read and write.
Michigan.....	14 years, in any manufacturing or mercantile establishment, workshop, laundry, store, office, hotel, messenger service, etc.	Children 14 to 16, unable to read and write English, may not be employed.
Minnesota.....	14 years, in factories, mills, workshops, or mines.	Children under 14 years may not be employed in any service during school term; under school age (16 years), in any occupation during school term unless they have attended school the prescribed period; under 16, unable to read and write English, in any indoor occupation (except in vacation) unless attending day or evening school.
Missouri.....	14 years, in mines, manufacturing or mechanical establishments; more stringent as to forbidden employments in cities of 10,000 population or more; no females in mines.	No child 8 to 14 may be employed in any way in school hours unless he has complied with the attendance law. No boy under 16 may work in a mine unless he can read and write.
Montana.....	16 years, in mines or underground works.	Children under 14 not to be employed during school sessions unless they have completed the studies required by law; from 14 to 16, if unable to read and write English.
Nebraska.....	10 years, in manufacturing, mechanical, industrial, or mercantile establishments.	Foregoing employments unlawful for children under 14 (except during vacations) unless they have attended school 20 weeks the preceding year.
New Hampshire.....	12 years, in any manufacturing establishment.	No child under 14 may be employed during school sessions, nor under 16 if unable to read and write English. No minor unable to read and write English may be employed unless attending day or evening school, if any is held.

^a Revised to 1907.

TABLE 4.—Statutory provisions of the several States relating to child labor^a—Continued.

State.	Age under which specified employments are forbidden.	Educational restrictions on child labor.
New Jersey.....	14 years, in factories, workshops, mills, or manufacturing establishments; also mines.	Children under 15 must have attended school 12 weeks the preceding year as a condition of employment.
New York.....	14 years, in factories; if 14 to 16, the child must have attended school 130 days the preceding year, and be able to read and write English, and cipher. Similar provisions apply, in places of over 3,000 population, to work in mercantile establishments, business offices, restaurants, hotels, express or messenger service, except for children over 12 in small places during vacation. For work in or about mines 16 years is the minimum. No female may work in a mine.	Unlawful to employ in any business or service child under 14 during school term; 14 to 16, unless has attended 130 days preceding year, and can read and write English, and cipher, or (in first and second class cities) has completed elementary course or attends evening school 16 weeks a year. See preceding column.
North Carolina....	12 years, in any factory or manufacturing establishment (does not apply to oyster canning and packing); 12 years, in mines employing over 10 men (boys); 13 years in a factory, except as an apprentice.	Apprentices of 12 to 13 years must have attended school 4 months in preceding 12.
North Dakota.....	12 years, in mines, factories and workshops (constitution of State).	Children under 14 may not be employed in any manner during school hours unless they have attended school 12 weeks during the year.
Ohio.....	14 years, in mines, factories, workshops, mercantile or other establishments.	No child under 14 may be employed in any other manner during school sessions; or between 14 and 16 if unable to read and write English; or in mines during school term if under 15.
Oklahoma.....	15 years, in any occupation injurious to health or morals or especially hazardous; 16 in mines; women and girls may not work in mines. (Constitution.)	
Oregon.....	14 years, in any factory, store, workshop, in or about any mine, or in the telegraph, telephone, or public messenger service.	Foregoing employments forbidden to any child 14 to 16 unless attended school 160 days preceding year and can read English and familiar with arithmetic to and including fractions. No child under 14 may be employed in any work for compensation during school hours.
Pennsylvania.....	14 years, in any employment, except domestic, coal mining, or farm labor; 16 years in coal mines; 14 years in or about the outside workings of coal mines; girls may not work in or about coal mines.	No child 14 to 16 may be employed unless he can read and write English and has complied with the school laws.
Rhode Island.....	13 years before, 14 after Dec. 31, 1906, in any factory, manufacturing or business establishment.	Children under 13 may not be employed except during school vacations.
South Carolina.....	10 years after May 1, 1903; 11 after May 1, 1904; 12 after May 1, 1905, in any factory, mine, or textile establishment, except that certain self-dependent children may work in the latter.	Children may work in textile establishments in June, July, and August if they have attended school 4 months during the year and can read and write.
South Dakota.....	14 years, in mines.....	No child under 15 years shall be employed in any manner of work for wages or other compensation when the public schools are in session.
Tennessee.....	14 years, in workshops, factories, or mines.	
Texas.....	12 years, in mills, factories, manufacturing or other establishments using machinery; 16 years in mines, distilleries, or breweries.	Unlawful to employ children 12 to 14 who can not read and write English, in mills, factories, etc., certain self-dependent children excepted.
Utah.....	14 years, in mines (constitution of State).	
Vermont.....	12 years, for any railroad company or in any mill, factory, quarry, or workshop, or carrying messages.	No child under 16 who has not completed the 9-year school course may be employed in any railroad, factory, mine, or quarry work, or in delivering messages, except out of school hours.
Virginia.....	12 years, in any manufacturing, mechanical, or mining operation.	

^a Revised to 1907.

TABLE 4.—*Statutory provisions of the several States relating to child labor*^a—Continued.

State.	Age under which specified employments are forbidden.	Educational restrictions on child labor.
Washington.....	14 years, in mines (boys); 12 (boys), in the outside workings of a colliery; 14, in any factory, mill, workshop, or store, except (12 to 14) in specified cases of need.	Children under 15 may not be employed in manufacturing, mechanical, or mercantile establishments, or by any corporation, while the schools are in session, unless excused by the school superintendent.
West Virginia.....	12 years, in mines, factories, workshops, mercantile or manufacturing establishments.	No child under 14 shall be so employed during school term if it hinders regular attendance.
Wisconsin.. .. .	12 years, in any occupation; 14, in factories, workshops, bowling alleys, barrooms, beer gardens, mines; 14 to 16, in any occupation without specified written permit; 18, as messengers (females).	Children 12 to 14 may not be employed in any occupation, except during school vacations, by specified written permit, in stores, offices, hotels, mercantile establishments, laundries, telegraph, telephone, or public messenger service, where they reside.
Wyoming.....	14 years, in mines; females may not work in mines. (Constitution.)	
United States laws (for Territories).	12 years, in the underground workings of any mine.	

^a Revised to 1937.

It is interesting to compare the age restrictions upon child labor adopted in the United States, as set forth in the above table, with the following conclusions of the International Labor Conference held at Berlin in 1900

Final protocol of the International Conference on Labor in Factories and Mines, Berlin, 1899.

The undersigned delegates of the Governments of His Majesty the German Emperor, King of Prussia, of His Majesty the Emperor of Austria, King of Hungary, of His Majesty the King of the Belgians, of His Majesty the King of Denmark, of Her Majesty the Queen Regent of Spain, of the French Republic, of Her Majesty the Queen of Great Britain, of His Majesty the King of Italy, of His Majesty the King of the Netherlands, as such, and as Grand Duke of Luxemburg, of His Majesty the King of Portugal, of His Majesty the King of Sweden and Norway, and of the Federal Council of Switzerland, having met in conference at Berlin to discuss questions relating to the protection of the working classes contained in the programme inclosed in the invitation from the Imperial German Government, have, as the result of their deliberations, agreed to express the following desires, the greater number of which were adopted unanimously and the others by a majority:

I.—REGULATIONS CONCERNING WORK IN MINES.

It is desirable—

1. (a) That the inferior limits of age at which children may be admitted to underground work in mines should be gradually raised, as experience may prove the possibility of such a course, to 14 years complete.

In southern countries, however, this limit may be 12 years.

* * * * *

III.—REGULATIONS OF CHILD LABOR.

It is desirable—

1. That children of either sex not having reached a certain age be excluded from work in factories;

2. That this limit of age be fixed at 12 years, except for southern countries, where the limit may be 10 years;

3. That these limits of age be the same for every factory, and that no difference on this point be admitted;

4. That the children must first have satisfied the provisions concerning primary education;

5. That children below 14 years complete should work neither at night nor on Sundays;
6. That their actual work do not exceed six hours a day, and be broken by a rest of at least half an hour;
7. That children be excluded from unhealthy or dangerous occupations, or be admitted to them only under certain protective conditions.

IV.—REGULATIONS CONCERNING THE LABOR OF THE YOUNG.

It is desirable—

1. That young workers of either sex from 14 to 16 should work neither at night nor on Sundays;
2. That their actual work should not exceed ten hours a day, and be broken by rests of a total duration of at least an hour and a half.
3. That exceptions be admitted for certain industries;
4. That restrictions be provided for peculiarly unhealthy or dangerous occupations;
5. That protection be given to young men from 16 to 18 years, as far as concerns—
 - (a) A maximum day's labor.
 - (b) Night work.
 - (c) Sunday work.
 - (d) Their employment in peculiarly dangerous or unhealthy occupations.^a

* * * * * * *

SCHOOL ATTENDANCE *v.* CHILD LABOR.

The sentiment of this country, so far as it is voiced in public utterances and embodied in law, demands that all children shall have a fair chance for development and for the mastery of the elements of knowledge. There are, however, many influences insidiously working against this purpose. Poverty, ignorance, and greed all tend to force children into the brutalizing strife for a living pittance, and to this tendency organized industry gives an almost resistless impetus.

The Census Bureau has already collected a mass of information bearing upon the subject which has recently been published in a separate bulletin.^b Although the investigation was merely tentative, it has yielded results which will be found suggestive in connection with certain educational statistics collected by the Bureau of Education. The data employed in the comparisons in the following tables pertain to 1900, the year covered by the census inquiry.

From the census bulletin it appears that in continental United States—that is, in the States and Territories, omitting Alaska, the insular possessions, and the military and naval service abroad—there were 1,750,178 children between the ages of 10 and 15 reported at the Twelfth Census, 1900, as engaged in gainful occupations. The following table shows the ratio which these working children bear to the children of corresponding ages enrolled in the public schools:

^a Quoted from a British Government publication (Commercial, No. 16, 1890) entitled "Further correspondence respecting the International Labor Conference at Berlin." pp. 180-181.

^b Department of Commerce and Labor, Bureau of the Census, Bulletin 69, Child Labor in the United States.

TABLE 5.—*Children 10 to 15 years of age in school and at work.*

Ages.	Estimated number enrolled in public schools.	Number engaged in gainful occupation.	Number at work for each 1,000 enrolled in public schools.
Total 10 to 15, inclusive.....	7,538,676	1,750,178	232
10 years.....	1,547,929	142,105	91
11 years.....	1,466,620	158,778	108
12 years.....	1,445,143	221,313	153
13 years.....	1,251,834	268,427	214
14 years.....	1,050,874	406,701	387
15 years.....	776,266	552,854	712

Of the total number of children reported in gainful occupations, nearly one-third were 15 years of age and more than one-half were either 14 or 15. Furthermore, it appears that 1,061,971, or 60.6 per cent of the total reported, were engaged in occupations connected with agriculture. In respect to this particular the report says:

There is one broad class of occupations in which child labor is not open to most of the objections ordinarily urged against it. These are the occupations connected with agriculture. The work of the child on the farm is usually not injurious to health or morals, and does not necessarily interfere with the opportunities for schooling.

How little this interference is can not be determined unless the amount of time annually spent in the work is known. This item is the more to be desired because of the large proportion of children 10 to 12 years of age reported in this class; they comprise 24 per cent, or nearly one-fourth of the whole number so engaged, as against the small proportion of 3 per cent in the case of other occupations. It is probable, however, that the children employed in agriculture work a portion of the year only, and are free to attend school the rest of the year.

The statistics as they stand suggest the need of further information respecting this class of youthful breadwinners, and they show also the need of an adaptation of rural schools to meet the alternations of work and study, such as is provided for by the education law of England. The extended period for free attendance upon public schools, already referred to, gives great opportunity for these special adjustments to the conditions of farming communities in our own country.

A more serious problem than that of the children employed in agriculture is presented by the group of 688,207 children, between the ages of 10 and 15, engaged in other occupations; that is, to quote the bulletin—

in trade and transportation, in manufacturing and mechanical pursuits, and in domestic and personal service, which in the Census classification includes not only servants and waiters, but also the large number of children returned by the enumerators as laborers without specification as to the kind of labor. Practically all those occupations in which the employment of young children is open to the objections urged against child labor are represented in this group.

Table 6 brings the total number of children (688,207) 10 to 15 years of age engaged in other than agricultural pursuits, and the number for each year of age, into comparison with the total number of children of those ages (columns 2, 5, 6), and also into comparison with the estimated number for the corresponding ages in the public schools.

The number of children in the labor group considered is equivalent to 7.15 per cent of the total number of children 10 to 15 years of age, as against 78.41 per cent enrolled in public schools. The proportion of wage-earners in this group 10 to 12 years of age is small. Even at 12 years of age their number is only 3 for each 100 children enrolled in public schools. After the eleventh year of age is passed the proportion of children in the "more harmful occupations" rises rapidly and the proportion at school declines; for the fifteenth year of age 20 per cent of the total number of children are found in the labor group and only 51 per cent in the school group.^a

TABLE 6.—*Number of children 10 to 15 years of age compared with the number in public schools and with the number in other than agricultural pursuits.*

Age.	Total number of children.	Estimated number in the public schools.	Per cent of total in public schools.	Number of breadwinners exclusive of those engaged in agricultural pursuits.	Per cent of total engaged in other than agricultural pursuits.
Total, 10 to 15 inclusive.....	9,613,252	7,538,676	78.41	688,207	7.15
10 years.....	1,740,628	1,547,929	88.9	20,683	1.18
11 years.....	1,583,131	1,406,620	92.6	26,971	1.70
12 years.....	1,637,509	1,445,143	88.3	49,670	3.03
14 years.....	1,550,402	1,251,844	80.7	89,034	5.74
13 years.....	1,568,564	1,050,874	67.0	191,023	12.11
15 years.....	1,533,018	776,266	50.6	310,826	20.27

Table 7 brings into comparison the two groups of bread earners 10 to 15 years of age—i. e., those employed in agricultural pursuits and those engaged in all other occupations—and shows their relative distribution by sex and year of age. It will be observed that for each year of age the proportion of boys in both groups is greater than the proportion of girls. In respect to the second group it is further noticeable that for the successive years, 12 to 15, inclusive, the degree of the excess in favor of boys is practically invariable. (See columns 6 and 7.) This is an unexpected showing in view of the general complaint that the number of boys withdrawn from school at those ages constantly increases above the number of girls.

The question suggested as to the subsequent career of boys withdrawn from school at the ages named is answered in part by statistics relative to the agricultural laborers 10 to 15 years of age. By reference to columns 3 and 4 of Table 7 it will be seen that there is a somewhat marked increase in the excess of boys over girls in this class of labor for the successive years of age 13 to 15, inclusive. This fact, however, does not suffice to account for city boys who leave school at the ages named and who would naturally gravitate toward manufactures and other urban industries. Evidently the full interpretation of the data before us must await further investigation.

^a The children in the group of agricultural laborers are not considered in Table 6.

TABLE 7.—Number of children 10 to 15 years of age in each labor group classified by age and the relative proportion of each sex.

Age.	In agricultural pursuits.			In all occupations other than agricultural.		
	Number of children.	Per cent of total.		Number of children.	Per cent of total.	
		Male.	Female.		Male.	Female.
Total, 10 to 15 inclusive.....	1,061,971	80.50	19.50	688,207	59.5	40.5
10 years.....	121,422	77.31	22.69	20,683	56.6	43.4
11 years.....	131,807	78.80	21.20	26,971	58.4	41.6
12 years.....	171,643	78.06	21.94	49,670	59.9	40.1
13 years.....	179,393	80.15	19.85	89,034	59.6	40.4
14 years.....	215,678	81.24	18.76	191,023	59.4	40.6
15 years.....	242,028	83.88	16.12	310,826	59.9	40.1

Table 8, which shows the proportion of breadwinners 10 to 15 years of age in each geographical division, should be considered in connection with Table 9, which shows the proportion of breadwinners contributed by each class of the population according to race and nativity. The significant facts brought out in the two tables are (1) the large proportion of children employed in the more "harmful" occupations in the North Atlantic States (Table 8, column 4); it should be observed here, however, that much the larger proportion of these are above 13 years of age; (2) the large proportion of foreign-born children in the more harmful occupations (Table 9, column 5); (3) the large proportion of colored children, 40 per cent, in all gainful occupations, and more especially the proportion in agricultural pursuits, 31.5 per cent.

The particulars above noted give interest to Table 10, which shows the number and relative proportion of illiterate children 10 to 14 years of age according to geographical division, race, and, in part, nativity.

TABLE 8.—Number of children 10 to 15 years of age in each geographical division, and proportion in each group of breadwinners for each division.

Geographical division.	Children 10 to 15 years of age.		
	Total.	Per cent of total employed in agricultural pursuits.	Per cent of total employed in other occupations.
Continental United States.....	9,613,252	11.05	7.16
North Atlantic division.....	2,280,049	1.51	11.84
South Atlantic division.....	1,480,438	21.64	8.53

^a Includes Indians and Mongolians.

THE COTTON MILL IN ITS RELATION TO CHILDREN.

The most suggestive study reported by the Census in this connection is that relating to cotton mills. This industry was selected for special consideration because, as the report states, it furnishes employment to children to a greater extent than any other manufacturing or mechanical industry. The tabulated returns show that it ranks fourth among all occupations in the actual number of children employed and third in the proportion of children among the total number of operatives.

In 1900 the number of cotton-mill operatives 10 to 15 years of age was 44,427, and they formed 18 per cent of the total number of persons over 10 years of age who were reported as engaged in that occupation. The data relative to these operatives of chief importance in the present consideration are comprised in the following table:

TABLE 11.—*Distribution of the 44,227 cotton-mill operatives 10 to 15 years of age, by States and by age periods.*^a

State.	Cotton-mill operatives 10 to 15 years of age.								
	Total.	10 to 12 years.		13 years.		14 years.		15 years.

^a Compiled from Census Bulletin 69, Child Labor in the United States, Table 24, p. 43.

From the above table it will be seen that the entire number of children in the Northern and Western States 10 to 15 years of age employed as cotton-mill operatives was 16,404, of whom the greater portion, namely, 82.8 per cent, were 14 or 15 years of age; 10.9 per cent were 13 years of age, leaving only 1,041 children, or 6.3 per cent of the whole number in those States, in the industry below 13 years of age.

In the Southern States the total number was much larger, namely, 28,023, of whom 10,902, or 38.9 per cent, were below 13 years of age.

With respect to the bearing of these figures upon the effects of compulsory school laws, the point to be emphasized is the very high proportion of the cotton-mill operatives below 13 years of age in the southern divisions of the country, where such laws are generally wanting, as compared with the corresponding proportion in the Northern and Western States.

It should be recalled that the statistics above considered relate to 1900. Since that time there has undoubtedly been a decrease in the proportion of children of school age employed in the cotton mills of the South, and especially in those States which have recently passed child-labor laws.

It should be said that the census investigation above considered was not limited to the mere numbers of children employed. It included certain particulars of their home conditions, and for limited areas the endeavor was also made to ascertain the proportion of illiterates among the children employed in cotton mills. But the results from these additional inquiries are either too fragmentary or too remote in their nature for use in our present consideration. Furthermore, comparison between the statistics pertaining to children at work

and those at school can only be made on totals, as it has not yet been possible to secure for any large extent of the country a classified analysis of school enrollment corresponding to that applied to the comparatively small numbers of children at work. The statistics as they stand reveal tendencies only; but they are tendencies of great significance. They indicate plainly the conditions of industry, of nationality, and of race that in particular sections of the country interfere with the normal progress of children. It is undoubtedly true that organized industry increases these disturbances, hence it furnishes occasion for increase of watchfulness and protective legislation. It should be remembered, however, that in many instances these very industries have given rise to efforts for the social and intellectual development of young operatives which are full of suggestion for those charged with the conduct of public schools.

The effect of the vigorous campaign against the evils of child labor conducted throughout the country during the last two years is seen in the marked increase in the number of restrictive laws recently passed and in the amendment of many such laws previously enacted. Committees have been formed in nearly every State, largely through the efforts of the Federation of Women's Clubs, to cooperate with the National Child Labor Committee in efforts to excite public interest in the matter, stimulate legislators, and prevent evasions of the laws.^a The chief need of the moment in respect to this matter is that of adequate machinery for the enforcement of the laws. Not only should the number of inspectors be greatly increased, but they should be most carefully selected, with a view to avoiding both the danger of undue pressure from local interests and ignorance of local conditions. That the child-labor laws are too generally evaded admits of no question, and unfortunately the public conscience is too apt to become indifferent as soon as the laws are on the statute book.

THE UNSOLVED PROBLEM OF SCHOOL ATTENDANCE.

In view of the extent of our country and the dissimilar conditions of different sections—in one, dense population and concentrated industries; in another, vast stretches of agricultural lands; in others, isolated communities in mountain valleys, or the rude condition of pioneer life—the universal provision of public schools enrolling above 16,000,000 pupils, employing nearly 500,000 teachers, and maintained at an annual expense of nearly \$300,000,000, seems an amazing achievement. Moreover, as has been shown, nearly three-fourths of the population are subject to laws that compel, at least, a minimum of use of the opportunities thus supplied.

The mere ability to read and write indicates, however, a very slight remove from crass ignorance, and a large proportion of our people are in danger of stopping at this point. The early withdrawal of pupils from school is a fact universally recognized, although up to this time there have been few systematic investigations as to the extent and the causes of the evil. Such investigations as have been attempted relate to particular cities, differing widely in respect to growth and movement of population. It is, however, significant that they all indicate a marked decline in school attendance between the fourth and fifth school years or grades, and continued decrease thereafter. Dr. Calvin M. Woodward, from an exhaustive study of the conditions in the St. Louis schools, covering the successive years 1897 to 1900, inclusive, concluded that at that time nearly 6,000 boys and girls in St. Louis dropped out of school every year with the district school course of study only about half finished. "These

^a For a review of the work accomplished in 1906, see reports from State and local child-labor committees and consumers' leagues made to the national committee at the third annual convention, Cincinnati, December 13-15, 1906. *Child Labor and the Republic*, 1907, pp. 142-181.

facts," he says, "have much the nature of a public calamity, and it is the solemn duty of those in responsible charge of the schools to point out as clearly as possible the probable causes and most practicable remedies."^a

A large proportion of the children who leave school before the sixth grade is reached are fit only for the lowest forms of industry and are poorly fortified against the debasing influence of low associates. This opinion is confirmed by recent investigations, psychological and sociological, which have brought us to a clear understanding of the nature of childhood, its innate impulses, its hypnotic susceptibilities. According to a German authority, the criminal code of Germany assumes that responsibility for crime is dependent upon the degree of mental development; it holds that children, as a rule, do not attain this degree of mental development before the completion of their twelfth year, which is the normal age for our sixth school grade. But competent authorities regard even this limit as too low. The law makes adults responsible for their acts, not only because it presupposes their knowledge of the culpability of their actions, but also because it presupposes with them a maturity of moral character which enables them to resist the impulse to perform an act contrary to law. "Experience," says this authority, "has proved that this degree of moral maturity is not attained by children in Germany, as a rule, before the close of the fourteenth year."^b

M. Fouillée, discussing the causes of juvenile crime in France, observes:

Youth is the critical age, and everything depends upon a right direction at the start. It rarely happens, after the age of maturity is reached, that offenders pass the bound that separates occasional crime from professional crime. On the contrary, it is during childhood and youth that this step is taken—that one adopts the criminal profession. Now, it is the professional criminal that recruits the ranks of old offenders. What, then, is the principal means of putting an end to this class—that is, of accomplishing the proper object of penal law, regarded as a system essentially preventive, rather than expiatory? It is the prevention of juvenile crime.^c

As regards the function of the school in this preventive work, we may well recall here the words of the former director of primary education in France, M. Buisson, in replying to the charge that the French primary schools fail to restrain the criminal impulses of youth:

The part of the school [he says] is rigidly limited. Its duration is too brief; it covers only the earliest years. The impressions which it makes are, it is true, vivid and often ineffaceable, but they are only the impressions of childhood, and other impressions—the stronger impressions of youth and of adolescence—soon come to obscure them. A moral influence which ceases to operate the day after the child's confirmation may perhaps affect the child, but it can not form the man.

The influence ceases on the very day when there should begin, and when, in fact, for the children of the more favored classes, there does begin, that decisive culture whose impress will remain throughout life.^d

^a Report of the Commissioner of Education, 1899-1900, Vol. II, p. 1368. A thorough and painstaking statistical study of the general subject of the withdrawal of children from school has recently been made by Dr. E. L. Thorndike, of Columbia University, and published by the Bureau as Bulletin No. 4, 1907, under the title "The Elimination of Pupils from School." In summing up his conclusions Dr. Thorndike states, among other things, that "at least 25 out of 100 children of the white population of our country who enter school stay only long enough to learn to read simple English, write such words as they commonly use, and perform the four operations for integers without serious errors. A fifth of the children (white) entering city schools stay only to the 5th grade."

^d F. Buisson: *L'école primaire en France et sa part de responsabilité dans l'éducation morale du pays*. (Jost's *Annuaire de l'enseignement primaire*, 1898.)

In the interest of good morals, in the interest of industrial efficiency, the school life of the masses should be prolonged and immensely enriched. How to accomplish this is the crucial school problem of the hour. The moral bearing of the problem most concerns society at large, but this can not be separated from its vocational bearings.

It would be idle to assume that compulsory school attendance laws, with the adjunct of a truant service, can of themselves insure the preparation of children for useful life and citizenship. They are forceful in so far only as they indicate a lively sense in the community of the significance of childhood, of the truth so impressively taught us by John Fiske, "that man's progressiveness and the length of his infancy are but two sides of one and the same fact." These laws are not remedies; they are merely the means of discovering the evils that ought to be remedied. Compulsion may put a child into school, but of what use is this if he is physically incapable of profiting by instruction when he is there, or if the school is a mere makeshift, offering nothing to fortify its victim against the temptations and collisions of life? The right of the State in this matter carries duties which are constantly increasing in scope, and number, and variety. With every stage of social progress there is needed advance in the methods and content of education. Compulsory school attendance laws are valuable just in proportion to the drawing power of the school, its adaptation to the needs and capacities of the pupil, and its appeal to self-interest or to the worthier ambitions which stir the hearts of even the humblest parents.

REMEDIAL AGENCIES.

The youth arrested for habitual truancy is a subject for criminal procedure, although this offense is far removed from the grosser forms of evil doing. The juvenile court, with its merciful provisions, completes then for him the chain of public agencies intended to save him from final absorption into the criminal class. As a rule, however, the absentee from school is a victim of conditions—hopeless poverty, the ignorance or unnatural greed of parents, the rapacity of employers—over which he has no control. The disclosure of these conditions is the chief public service rendered by compulsory school laws. As we have already seen, they are inseparable in their operations from the child-labor laws directed against the adult offender.

The latest phase of this slow process, through which we have come to a full realization of what is involved in the endeavor to educate every child in the land, relates to measures for relieving excessive poverty and the physical infirmities that it entails. Among such measures are the provision of what have been aptly termed "child-labor scholarships," the purpose of which is set forth in the following extract from the report of the secretary of the Child Labor Committee of New York:

These scholarships were created for the purpose of preventing hardship to a child laborer's family when the child's illegal earnings were really needed. An equally important object of these scholarships is to remove from the minds of officials who were charged with enforcing the law any fear of causing suffering to a family by requiring a full compliance with the law. This plan of substituting children's earnings where it was proved such earnings were genuinely needed has now been in effect in New York City for nearly fifteen months. As the scheme has become better understood by school officials and others who refer applications for scholarships to our committee, there is a distinct tendency to bring to our attention more cases which are directly within the scope of the fund, and probably more instances of genuine poverty. * * * For the year ending October 1, 1905—the first year of the plan—345 applications were received and investigated, either by the committee or at our request by representatives of the relief societies. Of this number 203, or 59 per cent, were deemed not to be in need of assistance. Of the remaining 142 cases, or 41 per

cent, help in the form of scholarships was given in 62 instances, while in the other 80 cases, in many of which the need was only temporary, assistance was provided through the various relief societies. These scholarships vary in amount from \$1 to \$3 a week, and extend over a period of from three to thirteen months. The holders are required to present weekly at the office of the committee a card signed by the school principal certifying to their regular attendance at school. For the first year \$2,500 was placed at the disposal of the committee for this work, and this amount was sufficient to meet all demands upon the funds. The large number of applications for assistance from this fund which have been coming to the committee during the first quarter of the second year of this work indicates that from \$1,000 to \$2,000 additional will probably be necessary to meet the needs of this work for the second year. We are happy to announce that this additional money has been already promised, so that the continuance of the plan is assured. The committee is convinced of the practical value of this plan, not so much as a means of assisting worthy families, but for the purpose of disarming public criticism in regard to the poverty plea for child labor. Another very valuable result of this phase of our work is the moral and educational effect upon both children and officials that the law can not be evaded. Much important data, otherwise unobtainable, regarding the way in which the laws are actually being enforced, have also been secured through the correspondence and visiting of our paid visitor for scholarship work.^a

The problem of compulsory school attendance narrows down thus, at last, to the welfare of the individual child. In the ultimate analysis of social forces, the child appears as an asset of the nation, a factor in its military power, or in its commercial supremacy, or in its vital soundness, as the case may be. Hence, the many recent investigations in our own country, in Germany, and in Great Britain pertaining to the health and home life of the poorest children. These investigations come within the present consideration for a single reason; they, one and all, emphasize the relation between the physical stamina of children and their capacity for the ordinary school work. The importance of the school as a medium for such investigations is emphasized in the report of the interdepartmental committee on physical deterioration in England: "In a country without compulsory military service," says the committee, "the period of school life offers the State its only opportunities for taking stock of the physique of the whole population and securing to its profit the conditions most favorable to healthy development."^b

The remark is peculiarly applicable to our own country.

As regards school administration, the most important conclusion from these examinations is that expressed by Dr. W. Leslie Mackenzie, medical inspector for the Local Government Board of Scotland, in a report on the physical examination of 600 Edinburgh school children, and strongly indorsed by the commission above referred to.

Says Doctor Mackenzie: "The large number of serious and minor diseases directly and indirectly affecting physical efficiency and mental efficiency constitutes an overwhelming case for a medical inspection of school children."^c

But the medical inspector, like the truant officer, can do little more than discover conditions that ought to be remedied. There still remains, in many cases, the need of assistance in securing the means of relieving the child from the physical infirmities disclosed. This final effort in behalf of the individual excites opposition in the English mind. In our passion for personal independence we lose sight of the necessity of extending Government supervision to details of the individual life which greatly concern the public good.

^a Child Labor and The Republic, 1907, pp. 144-145.

^b Report of the Inter-Departmental Committee on Physical Deterioration, Vol. I. Report and Appendix, p. 59.

^c Report of the Royal Commission on Physical Training (Scotland), Vol. I, Appendix B, p. 100.

This necessity is, however, recognized in the report of an investigation into the physical welfare of school children in New York, received as this chapter goes to press.

"It was, therefore," says the report, "from a clear sky of unconsciousness as to obvious facts of undernourishment and physical defects that the country received from the city superintendent of schools for New York City the suggestion: To insure a race physically able to receive our vaunted free education, we must provide free meals at schools."^a

In the recognition of this particular demand, England has preceded us by the act authorizing local education authorities to assist in the provision of free meals for school children.^b

This law is significant of the growth of public opinion with respect to the widening field of public activity, under the complex conditions of modern life, in a country marked above all others by reluctance to favor Government action in respect to matters which belong by right or custom to individual parents.
