

Austin Independent School District Central Office Work Environment Survey

Spring 2016: Human Capital Office

Introduction

The following report presents the AISD Central Office Work Environment Survey results for Spring 2016 for the Human Capital Office. Unless otherwise noted, results in this report represent the percentage of respondents who *strongly agreed* or *agreed* with each item.

The method of data collection in 2016 was unique relative to past AISD Central Office Climate surveys. Survey respondents selected their own work groups, rather than being assigned based on human resources job title and work location codes. Self-selection of work groups allowed participants to choose the immediate work group leadership about whom they wanted to provide feedback, and allowed them to provide feedback about their selected chief area's leadership. Results in this report are presented according to self-selected Human Capital work group.

Response Frequency by Human Capital Work Group

Work group response summaries are provided when the number of responses per work group was 10 or more. Work groups with fewer than 10 respondents were grouped together in an "Other" category. Individual items with fewer than 10 responses were not reported (indicated with "-"). The counts of survey respondents per Human Capital work group are shown in Table 1. Four work groups had enough respondents for response summaries: Educator Quality, Human Resources, Research & Evaluation, and Human Capital Other.

Table 1

The majority of Human Capital work groups did not have enough respondents to individually report results.
