

A Dictionary and Thesaurus of Contemporary Figurative Language and Metaphor (2024) upgrades ED628218 (ERIC) with labels and analysis and brings the work up to date to reflect language change at the speed of the internet, ChatGPT, social discord, and bloody wars. The dictionary identifies language used figuratively in everyday contemporary English—to include the language of “inclusion & exclusion” and “contempo-speak”—along with its distinguishing collocates. The first main entry word is *ablaze*, and the last entry is *Zuckerberg (the Russian Mark Zuckerberg, etc.)*. At the bottom of many main entry words is red text that often contrasts figurative and literal usages, with a special emphasis on *recovering* the *literal* meaning of words, particularly if they have a military source. Finally, each main entry word is tagged by target and source: the target or targets come first and are separated from the source or sources by the colon mark. Tags for targets include ones like *time; resistance, opposition & defeat; enthusiasm; fictive motion; feeling, emotion & effect*, etc. Tags for sources include ones like *military; boat; direction; weight; trips & journeys; animal*, etc. Certain tags are considered as targets *and* sources: *epithet; movement; death & life; military; sign, signal & symbol; shape; mental health*, etc. The tags were used to compile the thesaurus. The compiler is a lifelong EFL teacher of adult military students in Saudi Arabia and the United Arab Emirates (Abu Dhabi), and his interest in figurative language arose during his work teaching the Defense Language Institute’s American Language Course (ALC / DLI). The most important insight of this dictionary and thesaurus is how important figurative language is in every type of communication. For example, a common childhood game like a “tug-of-war” can describe a struggle for control on a plane that results in hundreds of fatalities, a “conversation” nowadays often suggests much more than simply a talk between two people, and an “uncanny valley” can refer to robots. The work has implications for ESL / EFL teaching, which tends to focus on the literal meanings of words, usually the first sense in a dictionary. Clearly, more attention can and should be paid to other senses of words, and this work will help to identify and classify them. More language analysis and instruction should be based on conceptual metaphor. This is a reference for EFL / ESL teachers, curriculum developers, materials writers, and teacher trainers. But it may also be of interest to lexicographers, and it has attracted interest from experts interested in metaphor detection, natural language processing (NLP), and social-media analysis, some of whom are using the tool of artificial intelligence (AI). Hopefully, it will inspire better dictionaries and thesauri of this sort created by teams of people, just as early work by many individuals working in isolation on collocation culminated in the 2002 Oxford Collocations Dictionary. Preliminary short discussions based on the work include (1) 70 common metaphors (2) Collocation (3) Epithets (4) Persons (5) The “container” metaphor (6) Grammatical metaphor, fictive verbs, etc. (7) Past, present and future (8) Allusions (9) Euphemisms (10) Gestures and bodily reactions (11) Shapes and parts-whole (12) Animacy (13) Persistence, survival and endurance (14) Quotations (15) Synonyms and opposites (16) Lessons and exercises (17) To the EFL / ESL teacher, which focuses on how the dictionary and thesaurus impacts the knowledge and experience base of the teacher and (18) An alphabetized list of the thesaurus categories. These short discussions would make a good handout for an EFL / ESL teacher-trainer class.

To my father—a teacher and a theater man. I thought of you every time I added a word or expression to the category of *theater* in the thesaurus.

And to my students—Emiratis, Hondurans, Mexicans, Moldovans, Ukrainians, Kosovars—past, present and future.

But this work is especially dedicated to the adult military students I taught in Saudi Arabia, starting in 1983 and ending in 2017.

The lyric from Mutanabbi that you taught me will beat in my heart as long as my heart beats.

I know the desert well,
The night, the mounted men.
The battle and the sword,
The paper and the pen.

Introduction

I compiled this work with my adult Saudi Arabian military EFL students in mind. The second entry in this dictionary—*about-face*—is something I've seen my students do many times on the *maidan*, or parade ground, in Dhahran, in the Eastern Province of Saudi Arabia. A literal about-face, not a figurative one. The literal tends to come first in English language teaching and learning, and in our dictionaries, but the figurative usage can be right behind, if only taught. Of course, the figurative meaning of *about-face* relates to reversal: a government can do an about-face on something such as a policy.

In my classroom, when I would casually mention that a hurricane had an eye (resemblance), or a bed had a foot and a head (orientation), and not only the earth but also a school had an atmosphere (environment), my students would often react with astonishment and dismay.

"English is crazy," one of my students said, memorably. A Harbi. Or a Mutairi, maybe.

And yet, those same students had no problem exemplifying figurative uses of words. When I taught a group of students the figurative use of *magnet*, and gave them a little time to think about it, one student shot his hand into the air and pronounced, "Makkah is a magnet for Muslims."

I highly praised him—a Zahrani, I recall...

The key for such exemplifications lies with collocation. With *magnet*, the important collocating preposition is *for*: X (be) a magnet *for* Y. This little formula with its collocating preposition allows students to create their own, novel exemplifications.

I remember once teaching basic English in a dusty classroom overlooking a parade ground ringed by date palms, in the early days of personal computers. The vocabulary item I was teaching was *window*. I introduced the word in the usual, literal way, but I also mentioned that TV shows could be a window (*portal*) to other countries and cultures. This was in the old days before smartphones.

And a bearded naval officer—a Qahtani?—shot his hand into the air and said, slyly, "Windows."

It took me just a second to get it. Well, of course! Microsoft Windows!

Another time, I remember teaching a lesson on shopping that included the word *mall*. This provided me the opportunity to speak for a brief moment about mall rats, girls and boys who go to malls to flirt. Saudi Arabia has malls, girls, and boys, of course, but flirting is not supposed to

occur, and premarital sex can be a death sentence. Not only that, but in Saudi Arabia comparing a man to an animal of any type is potentially a deadly insult.

After the lesson, a cadet approached me and confided in a whisper, "My brother is a *big* mall rat!"

I loved how he modified the phrase with *big*!

In fact, it was my Saudi students that got me interested in the figurative and metaphorical use of language in the first place. They would talk to me of Islam as a *path*, refer to the character of a person or nationality as being *straight* and *crooked*, insult people as *snakes*, *devils*, *dogs*, and *pigs*, and compliment me on my "white" heart. In Riyadh, the center of the country, I taught in view of a prominent ridge called "The Camel's Nose" in Arabic. When I taught in Jeddah, in the western part of the country, I learned from my students that the city was known as "The Bride of the Red Sea," and it was from Arabic poetry that I learned expressions like, "Her face gleamed like the moon on the 14th of the month."

I have not thought of pigs, hearts, geographical place names, cities, and the moon in the same way since.

It's interesting to reflect that there are no actual pigs in Saudi Arabia, the cradle of Islam where the Qur'an forbids the eating of pork. And yet, you hear the word all the time there, not in its literal sense as the animal, but as an insult. And that is how it is entered and categorized in this work. Animals are commonly related to insults, just as they are commonly related to character and personality and many other things, including predation and epithets.

I'm sure you can think of many examples.

"If you are not a wolf, a wolf will eat you," is a proverb I learned in Saudi Arabia.

I like the figurative world because it is connected to the natural world, a world I admire, and not just through the window of an automobile. It includes creatures from childhood like monsters and witches, as well as words that come from "grown up" subjects like astronomy, history, physics, and medicine. In the figurative world, words still refer to older technologies and practices like sailing, mills, farming, and hunting, and somehow I understand them. The figurative world maintains allusions to literature, to the *Iliad* and the *Odyssey*, Dickens, Mary Shelley, and the Bible. In the figurative world, drumbeats still carry a message, a simple object such as a coin or a chain can express a fundamental relationship, a pancake can express a shape or configuration, and a "tug of war" between an aircraft and its crew can have real consequences, resulting in hundreds of fatalities. Troop buildups on a border can be described as a "geopolitical

game of chicken.” A bubble can symbolize a pandemic. Layers of Swiss cheese can symbolize protection from a pandemic. Waves sloshing in a bathtub can symbolize transmission during a pandemic.

Figurative language offers synonyms, antonyms, and makes connections. You can be *up to your neck* or *up to your eyeballs* in something. Take your pick! If you have a problem, you can *tackle* it or *punt*. Both those words come from American football. Or, you can kick the can down the road, something I often did as a boy. You can *stroll / coast / waltz / or sail* to success. You can say, “That ship has sailed,” or you can say, “That train has left the station,” depending on whether you are into ships or trains. When it comes to resolution and conclusion, you can *bury the ghosts*, or *put something to rest*. If you wish to avoid or separate yourself from something, nautically you can *steer clear of it*, or *give it a wide berth*.

And the figurative world just makes sense. Is it any surprise that words and expressions from the field of education often relate to assessment? Alcohol to restraint and lack of restraint? The family to relationship? A crutch to help and assistance? The theater to attention? Gambling to fate, fortune and chance? A boat or a horse to control? Religion to messages? Sleep to consciousness and awareness? The tongue to speech? Health and medicine to condition and status? Targets to weapons? Weight to substance? Clothing to concealment? Chess to strategy? A table to negotiation, or inclusion? A door to access? Affliction to wounds and scars? Love and marriage... to pursuit, capture and escape?

That last tends to surprise and delight those who haven't thought of it before.

The figurative world is a great way to organize words and phrases to produce language that really sounds natural, the type of language that we seldom if *ever* teach from our textbooks, and that our students often surprise us with by acquiring on their own, outside our classrooms. It is the difference between “I understand” which we teach and “I see” or “I get it” which we don't. As English language teachers, we tend to think of the future as a grammar lesson. But the future can also be thought of as movement, direction and even as a container. The future is forward. And if the future is forward, then the past is... behind! The same for progress. Achievement is up, decline is down. The same for proper conduct. Direction is very relevant to numbers. Sales are up! Down! Soaring! Plummeting! Sky-high! Rock-bottom! Through the roof!

Not to mention that the future may relate to the horizon.

Saudis will spend the night out in the desert on full-moon nights, and spend a night out around a bonfire in the winter. Like Russians, they enjoy searching for mushrooms in season, except in their case they are hunting for desert truffles. In Saudi Arabia a young man might walk miles to get from one place to another. While walking, he will notice the *ashes* of old campfires, and the

footprints of those who have walked the *path* before him. He will pay attention to the *weather*, and to the *light*. If he is out past sunset and has planned ahead and carried some wood, he might light a *fire* for warmth or companionship, and notice other such lights on the horizon, or across a valley, and he will notice the *stars* in the sky. Such a person will already know the physical bases of words like *trail*, *fire*, *footprint*, *beacon*, *weather*, and *star* and will feel the shock of recognition in their figurative and metaphorical usages.

The figurative and the literal can become controversial, as the following examples attest:

- A few days after 9/11, President George W. Bush's use of the word *crusade* was widely questioned when he said to the nation: "This crusade, this war on terrorism, is going to take a while..."
- In 2011 in the US, the elected politician Gabrielle Giffords and others were shot after Giffords' district had been targeted on a map with cross-hairs by an ideological opponent. In a coda, in 2019, Roger Stone apologized to Judge Amy Berman Jackson for posting an Instagram photo of her next to a rifle scope's crosshair. She said, "Roger Stone fully understands the power of words and the power of symbols... There's nothing ambiguous about a crosshairs." And in a coda to that coda, in 2022 a court heard a case involving that original cross-hairs symbol and *The New York Times*.
- In 2020, after the Trump campaign called on volunteers to monitor the vote, Sheryl Sandberg, the COO of Facebook, said, "I think what people are worried about in this ad is that he says 'army of supporters'... We believe the language 'army of supporters' is not really calling for an army but is calling on people who are normal campaign volunteers."
- In 2021, President Trump, after losing his bid for reelection, said, "And they're not taking the White House, we're going to fight like hell..." His supporters would later storm the U.S. Capitol, resulting in his second impeachment and trial, with much debate about political speech. "Are we going to put every politician in jail, are we going to impeach every politician who has used the words *fight* figuratively in a speech? Shame!" said Senator Rand Paul. Said Michael Van Der Veen, from the floor of the Senate at the impeachment trial, "The reality is, Mr. Trump was not in any way, shape or form instructing these people to fight, or to use physical violence. What he was instructing them to do was to challenge their opponents..."

Figurative usage is not just important in politics. Wall Street "mines" newspaper articles and tweets for the figurative usage of words like *abyss*—as in "Greece is at the edge of a financial abyss"—which can spark declines in the market. In language, the idea of substance can be associated with weight, and cognitive linguists have conducted experiments based on the idea that the actual thickness and weight of something, like a paper file, can influence people's attitudes about the importance of a person.

Metaphor is nothing new: the ancient Greeks discussed it. Wilfred Funk, Litt. D., in his book *Word Origins* (published by Grosset & Dunlap, New York, 1950), wrote, “*Up* and *down* are two other strange words that tie into the mysteries of space and even of religion and our human ideas of values,” in the chapter entitled “word oddities,” and he goes on to explain and give good examples. In 1836, Ralph Waldo Emerson wrote, “Light and darkness are our familiar expression for knowledge and ignorance... Visible distance behind and before us, is respectively our image of memory and hope.” (*Nature*, Chapter 4, “Language”). Cognitive linguists speak of metaphors like these as BAD IS DOWN, GOOD IS UP, KNOWLEDGE IS VISION, PAST IS BEHIND EGO, and FUTURE IS IN FRONT OF EGO.

For students learning English, this dictionary should help them learn the figurative uses of words. The entry word is, in most cases, a basic one. The collocations are rarely more than two or three words, slightly harder, and the exemplary fragments and sentences are a bit harder yet. This basic English (to include figurative language) is the foundation for all those other Englishes: academic English, aviation English, business English, medical English, military English, scientific English, technical English, English for Peace and Conflict Studies, etc.

It took decades for the fruits of research on collocation to get into our curriculums, materials, and dictionaries. The Oxford Collocations Dictionary finally appeared in 2002, and the revised and updated version of the military curriculum I taught for so many years in Saudi Arabia—the American Language Course (ALC) created by the Defense Language Institute (DLI)—currently contains many excellent exercises based on collocation. Both were a long time coming. It is my hope that the next big effort in language teaching will be to incorporate the figurative uses of words into teacher-training courses, curriculums, textbook exercises, tests, and learner’s dictionaries.

70 common metaphors

These metaphors are based on this work. The bolded words are categories in the thesaurus and the italicized words have entries in the dictionary. The first metaphor relates the hand to attainment and possession. A hand, of *course*, can relate to many other things: see the category **hand** in the thesaurus for the many things a hand can relate to. But the hand relating to attainment and possession is a common metaphor.

1. The **hand** can relate to **attainment** and also to **possession**: “It was *in my hands*, but it *slipped through my fingers* and now it is forever *out of my grasp / reach*.”
2. **Sleep** can relate to **consciousness & awareness**: “The government is *sleeping*, and our politicians need to *wake up*.” So can the **eye**: “A minority of *clear-eyed* scientists *saw it coming*. Still, non-scientists were *blindsided*, and, when the catastrophe occurred, it was a real *eye-opener*.”
3. **Royalty** often relates to the **superlative**: Burger *King*; Mattress *King*; Aretha, the *Queen* of Soul; “*aristocratic* wine at democratic prices” (an advertisement); “Banff, the Canadian National Park, is the *crown jewel* of the system.”
4. A name relates to **reputation**: “Life is for one generation; a good *name* is forever.” “You have *blackened* our *name*.” “That company has a *good name*.”
5. A **horse** can relate to **control & lack of control**: “We need to *rein in galloping / runaway* inflation.” “Hydroelectric dams *harness* the power of rivers.”
6. **Mining** can relate to **searching & discovery**: “I began to *dig into* the old case and *uncovered* some interesting facts. Not all the *leads panned out*. It was in the old police case file, however, that I struck *gold*.”
7. The **family** commonly relates to **relationship** and to **division & connection**: “Intelligence officers have always held an *orphan / stepchild* position in the military compared to the *favorite son* status of tacticians and logistics officers.”
8. Language from the **military** and **weapon** categories is often linked to **conflict** and **accusation & criticism**: “Facing *sniping* from his own party and a *fusillade* of criticism from the opposition, he has *fired a broadside* in his defense.”
9. The **theater** often relates to **development**, and also **attention, scrutiny & promotion**, and **performance**: “It is only the *first act* of the legal *drama*, but already the *spotlight* has focused on jury selection. The trial promises to be quite a *show*.”
10. **Chess** often relates to **strategy**: “It’s a geopolitical *chess game* and the *pawns* in the struggle have no idea what the *endgame* will be.”
11. A **table** can relate to **position, policy & negotiation**: *sit down at the table; on the table; off the table; come back to the table; turn the tables*. Also **inclusion & exclusion**: *a seat at the table*.
12. **Movement** and **direction** can relate to **action, inaction & delay** and **progress & lack of progress**: “We’ve got to *move*, and we’ve got to *move forward*, not *sideways* or *backwards*.”
13. The **center & periphery** often relate to **society**: *mainstream; center; fringe*, on the *margins*.
14. **Height** can relate to **importance & significance** and **primacy, currency, decline & obsolescence** and **superiority & inferiority**: “LeBron James is literally and figuratively a

towering figure at the *height* of his career, at the very *pinnacle* of success, *head and shoulders above* his rivals. And while his *star* may now be at its *zenith*, it must be that every *star* will *set*.”

15. **Journeys & trips** can represent life. After college, you *set out / embark* on a *course*. You encounter *crossroads* or *forks* in the road and choose your *direction*. You might *follow in someone else’s footsteps* or *blaze your own trail*. You will *cross that bridge* when you come to it, encounter *obstacles* in your *path* and take *shortcuts* and *detours*. *Milestones* along the way might include marriage, children, and promotions. Life can be a hard *slog*, and some *fall by the wayside*. But hopefully you will be happy and content when you *reach the end of the road*, especially if you are one of those who took “the [road] less travelled by.”
16. A **line** often relates to **behavior**: “You are *out of line*. You have *crossed the line*. You are *over the line*. You have crossed *a red line*.”
17. An **animal** can relate to **predation**, especially a **lion**, **wolf** or **shark**: “Famine still *stalks* the inhabitants of the Sahel.” “If you are not a *wolf*, a *wolf* will eat you.” “His critics are *circling*, they can smell *blood in the water*, and they *are out for blood*.”
18. **Smell** often relates to **evidence** and **corruption**: “I began *sniffing out* government corruption. And when I *got wind of* the business deal, I immediately detected something *fishy*. Something *stank*, and by the time I had finished my investigation, the *stench* filled my nostrils.”
19. **Affliction** can relate to a **creature** (like a ghost) and **health & medicine** and to a **mark** (like a scar): “He was never able to *exorcise* the *ghosts* of Afghanistan, *heal* his emotional *wounds*, and the mental *scars* of his service are still *livid*, *raw* and *itchy*.”
20. A **weight** or a **burden** can relate to **oppression**: “I was *weighed down* by a *heavy load* of debt that I knew I would never be able to *get out from under*, and the repossession of my car was *the last straw*.”
21. **Health & medicine** can relate to the **condition & status** of something: The economy is *on life support / moribund / weak / recovering / healthy / robust*, etc.
22. **Ruins** can relate to **destruction**. “Even though my company had *collapsed*, and my reputation was *in ruins*, I began to *rebuild*.”
23. **Water** can relate to the size and force of **movement**: “The number of asylum seekers began as a *trickle* or *stream* and is now a *flood*. A *groundswell* of immigration is threatening to *inundate* the border, and those opposed to migration are characterizing it as a *tsunami*.”
24. **Rain**, a **storm**, a **wind**, or natural disasters like an **avalanche**, a **landslide**, an **earthquake**, or **tsunami**, and great forces like a **volcano**, a **river**, the **sea**, a **fire**, a **wave** and **water** often relate to **amount and effect**: an *avalanche / blizzard / firestorm / flood / deluge / landslide / tidal wave / tsunami / storm / surge* of criticism, protest, etc.
25. **Direction** and **height** can relate to **behavior** and **character & personality**: “An *upright* man always *takes the high road* and does not *get down in the gutter* or *in the mud* with his enemies of *low repute*. To such a man, morality is *straightforward*, and his opposite is a *snake*, taking a *twisted path*.”
26. **Astronomy** can relate to the idea of **primacy**, **currency**, **decline & obsolescence**: “One boxer’s *star is rising*, the current champion’s star is *at its zenith*, while the former champ’s star is *setting*.”

27. **Books & reading** can relate to **development**: “When I graduated from university, it was time to *close the book* on that stage of my life, *turn the page*, and start *a new chapter* in my life.”
28. **Food & drink** often relates to **consumption**: “I developed a *taste* for exploration as a young boy. I *gorged on* the books of explorers, I *devoured* them, I *drank in / lapped up / gobbled up* adventure stories and *digested* their lessons learned, and my *appetite* for them was *insatiable*. Soon I began taking little voyages of my own about the neighborhood and developed a *taste* for freedom. In fact, I became a *glutton* for it.”
29. **Sports & games** commonly relate to **competition**: the *contest* of measure and countermeasure (warfare); the *space race*; we are *ahead of them*; we must not *fall behind*; they are *outpacing* us and we will have to do better to *keep up*; when it comes to global warming, there will be *winners* and *losers*; she is *jockeying for position*; he is the *front-runner*, etc.
30. A **season** can relate to **growth & development** and **decline**: “I am in the *autumn* of my life;” *nuclear winter*; the *Arab Spring*...
31. The **day** can relate to **past & present** and **future**: *in the old days*; *back in the day*; *those days*; *yesterday*; *these days*; *nowadays*; *a new day*; *in the coming days*, “hopes and dreams for a better *tomorrow*.”
32. **Hygiene** is related, too often in a sinister way, to **violence** and **concealment & lack of concealment**: a military “*cleanup*” operation; *ethnic cleansing*; “wash the filthy *scum* off the streets,” *whitewash*, *sanitize*, *scrub*, *launder*, etc.
33. **Water** (swimming and drowning) often relates to **survival & endurance**: “My first semester at college, I felt like I was *out of my depth* and *drowning*. I was just *treading water*, barely able to *keep my head above water* and stay *afloat*. Letters from home were a real *lifeline*. Things are much better now.”
34. **Equilibrium** is often related to **disruption**: “The company has *shaken up* the industry and *rattled* the major players by *overturning* accepted assumptions and norms.” It is also related to **fairness**: “The idea will *tilt* the *balance* and create an *unequal playing field*.”
35. **Temperature** can relate to **feeling, emotion & effect**: “Relations between the two countries, previously *frosty*, have begun to *thaw*, but they can in no way be described as *warm* yet.”
36. **Direction** up or down can relate to **feeling, emotion & effect**: “You look *downhearted*. Cheer *up!* I can see you need a *lift*. Let’s do something to *raise* your spirits.”
37. A **clock** and the time of **day** can relate to **timeliness & lack of timeliness**. So can a **window**: “We had better hurry. The *clock is ticking*. It’s no longer *early in the morning*, it’s *late in the day*. We’re *in a race with the clock* now, and the *clock is winding down*. Our *window of opportunity* is closing fast.”
38. Natural obstacles can relate figuratively to **obstacles & impedance**: *headwind*; *shoal*; *morass*; *mud*; *quagmire*; *quicksand*; *thicket*; *logjam*; *snag*, etc.
39. A **desert** or **oasis** or **jungle** or **swamp** or **island** or **sea** and other geographical features are often used figuratively to describe an **environment**. “Too many urban areas are food *deserts* with little access to fresh food.” “It’s a *jungle* out there, be careful.” “The area is an *island* of affluence in a *sea* of squalor.” “We must drain the *swamp* of Congress.” The **air**, the

atmosphere and the **climate** can be used to talk about environment in general. “There is tension in the *air / atmosphere*, and a *climate* of fear.”

40. A **plant** and **farming & agriculture** are often related to **growth & development**: “Christianity found *fertile ground* in the Philippines, where the *seeds* the missionaries *planted took root* and *flourished / flowered / bore fruit*.”
41. **Standing, sitting & lying** can relate to many things, including **dominance & submission**, and **resistance, opposition, & defeat**, and also **action, inaction & delay**. These meanings are often combined in a series: “We can’t take this *lying down*. Why are we just *sitting on our hands*? We can’t *stand by* any longer. It’s time to *stand up* and make a *stand*.”
42. **Health & medicine; addiction; love, courtship & marriage; and religion** can all relate to **enthusiasm**: “I’m *crazy about dragonflies*”; “Adrenaline *junkies* risk life and limb at the X games for their sports”; “To meet a walrus is to *fall in love with* a walrus” (a walrus researcher); “It’s a bit of a *disease*” (Jay Leno on his vehicle collection); “Mountains are truly *cathedrals*” (the great “Big” Jim Whittaker, climber). The opening line of Norman Maclean’s book *A River Runs Through It* reads, “In our family, there was no clear line between religion and fly fishing.”
43. The Galapagos Islands have become an **epithet** for the **biodiversity, nature & life** of endemic species. The fascinating Yemeni island of Socotra has been called the “*Galapagos of the Indian Ocean*.” Alaska’s Pribilof Islands are known as the *Galapagos of the North*. In Unesco’s World Heritage Site citation, Lake Baikal in eastern Russia is referred to as the *Galapagos of Russia*.
44. Allusions from the **Iliad & Odyssey** relate to the following: **attraction (siren); affliction (hector); subterfuge (Trojan horse); journeys & trips (odyssey); message (Cassandra); protection & lack of protection (Achilles’ heel), superlative (epic and Homeric), and alternative & choices and danger (between Scylla and Charybdis)**. This vocabulary will live in the language long after the details are forgotten.
45. **Alcohol** can relate to several things: **activity (ferment); behavior (binge, drunk, and inebriate); concealment & lack of concealment (bootleg and bootlegger); consciousness and awareness (black out); control and lack of control (drunk); feeling, emotion & effect (hangover, intoxicate, intoxicate, intoxicating, sober, and sobering); mixture (cocktail); and restraint & lack of restraint (binge, drunk, and inebriate)**. You don’t have to be a drinker to be “drunk on power / success.”
46. Falling can relate to **fate, fortune & chance**. If you are *on thin ice*, you might fall through the ice and drown. Likewise, when you *go out on a limb*, the limb might break and then you will fall to the ground and die. If you are *hanging on* to your job *by a thread*, that thread might break. If you are *walking a tightrope*, you might fall off and die. If you are *teetering on the edge of a precipice*, you might fall and die. The sky can fall. If your head is on the *chopping block*, the blade could fall on your neck and your *head will roll*. That blade might be the *Sword of Damocles*. Or perhaps you are waiting for *a shoe to drop* or *fall*.
47. **Cards** can relate to **fate, fortune & chance**: “The *cards were stacked* against Rubin Carter from birth. He was *dealt a hand* nobody could play. But by *the luck of the draw*, a sympathetic judge was selected to try his final case of habeas corpus.”

48. A **euphemism** is often used for death. Expressions include *pass away*; *the fallen*; *lose* (through death); *resting place*, etc. A set of sinister euphemisms relate to killing: liquidate; encounter; “He was disappeared”; remove; take down, etc.
49. **Money** can relate to **obligation**: “The grateful nation *owes* a *debt* of gratitude to the sacrifices of its military. We can never fully *repay* those who *paid* the ultimate *price* for our freedom.”
50. **Money** is often related to **cost & benefit**. “I made a *costly* mistake, I *paid* a *price* for my mistake, it took a *toll* on me, but in the end I *profited* from it, though it took years and years before I understood what exactly the *payoff* was.”
51. **Society** can relate to a **person** like a *leper*, *castaway*, *outcast*, *pariah*, and *hermit*. Such people might find themselves separated from the *mainland*, on an *island*, in the *wilderness*, left out *in the cold*, *outside of the tent*, on the *fringe*, on the *far shore*, etc.
52. **Noise** and **movement** are often related to **activity**: The factory floor was a *beehive* of activity, *swarming* with workers, with machines large and small *humming* and *buzzing*.
53. **Gesture** can relate to **feeling, emotion & effect**: “The latest college admissions scandal has some people *shaking their heads*, others *rolling their eyes*, and a few *wringing their hands*.”
54. **Cloth** can relate to **division & connection**: “We are used to traveling around on an *interwoven*, *tight-knit*, seemingly *seamless* system of highways. But some *strands* have become *frayed*.” So can a **rope**: “A nation is *bound* / *tied* together by its system of roads.”
55. **Containers** can relate to **situations**: “I got *into* trouble, I was *in* a tight spot, trapped, desperate to *get out*.” However, a situation is more and more considered to be a **place**: “I was in a tight spot *where* I couldn’t figure a way out.”
56. **Love, courtship & marriage** can be connected to **attraction & repulsion** and to **pursuit, capture & escape**: “She was the *darling* of Wall Street, she had no problem *wooing* and *seducing* eager investors—including ex-generals, one ex-president, Henry Kissinger, and two nationally important families—and she had the media *swooning*.”
57. **Sound** can represent **conflict**: “His comments caused an *uproar* and *howls* of protest, with many *clamoring* for an apology, and *outcries* for his resignation.” Actual warfare, past and present, is associated with sound.
58. An **explosion** or a **weapon** from the **military** can represent **danger**: On a bad day academia can be a *minefield* full of *booby traps*, *trip wires* and hidden *landmines*.”
59. Verbs of hitting, slamming and lashing are often related to the **force** of a **storm** like a hurricane or tornado: “The hurricane *battered* the island with a horrific storm surge, *pummeled* inland areas with winds and rain, and *knocked out* the power grid before moving on to *clobber* the mainland.”
60. **Direction** (up and down) can relate to **hierarchy**. “When I started out in my job, I started out at the *bottom*. I was *low* man on the *totem pole*, and literally everyone in the company was *over* me. With hard work and perseverance, I began to *rise up*. I began to *climb* the career *ladder*. When my *superiors* realized I wanted to take care of those *under* me, and not just please my *higher-ups*, I *rose* even *higher*. Today I am not at the *top* of the *pyramid*, but I am very happy where I am, and I am ready to assume additional responsibility.”
61. **Religion** often relates to **message**: He has used his bully *pulpit* to *preach* the *gospel* of American exceptionalism, and his *crusade* has been wildly popular.

62. **Sensation** can relate to **feeling, emotion & effect**: “That guy is *irritating*, he *rubs me the wrong way*.” “Yeah, he can be *abrasive*. But you’re too *sensitive*, you need to develop *thicker skin*.”
63. An **animal** often relates to **conflict**: You can *bristle*, *get your back up*, and *stand your ground*. You might then go *head to head* and *butt heads*, or *lock horns* with someone. You might be *out for blood*, *smell blood*, and *draw blood*. Or you might *give ground*, *turn tail* and run, or *lie down* and *roll over*.
64. An **explosion, light & dark**, and **sound** can relate to **attention, scrutiny & promotion**. Most Americans, and every child, delight in these three things simultaneously every Fourth of July. Not necessarily dogs, or recent combat veterans. And so our internet influencers *skyrocket* to success and things *blow up* on the internet.
65. For the younger generation, **situation, time**, and **development** have become a **place**. This recognizes the ubiquitous use of “*where*” but in no way explains it.
66. **Meat** relates to the **military**: The *Butcher of Baghdad*; the *butcher’s bill*; *butchery*; *carnage*; *Hamburger Hill*, a *meat grinder*; a *slaughterhouse*... It’s something that civilians rarely think about but *should* think about. One of my goals with this work is to recover the literal meaning of clichés relating to the military, in the hope that civilians will have at least a bit of an image in their heads when they use them.
67. **Possession** relates to the language of **inclusion & exclusion**. Contemporary groups wish to possess and control—to control the *narrative*, or who gets to tell the *story*—oftentimes with the goal of monetizing and profiting. This is what underlies figurative usages like *appropriate*, *appropriation*, *colonize*, *decolonialization*, *reclaim*, *reclaiming*, *take back*, etc. The verb collocates of *space* include: hold space; make space; occupy space; open up space; reclaim space; take space; take up space; struggle for, occupy, craft, and mark space... Those spaces are Black spaces, women’s spaces, gay spaces, lesbian spaces, queer spaces, etc.
68. **Affirmation** also relates to the language of **inclusion & exclusion**. People talk about Black, Latinx, queer and trans *joy*. Proponents of body positivity *celebrate* all shapes and sizes. We *honor* women who made history. We praise as *brave* and *courageous* and *fierce* those who “reveal their truth” or live their “authentic selves.” The goal is often *empowerment*.
69. The idea of **health & medicine** (in the old sense of disease and surgery) is often a metaphor for **mental health**. And so we use words like *trauma*, *wound*, *scar*, and *moral injury*, not in any sense that relates to the body, but to the mind.
70. The **adverb**, the **filler**, and the **introductory** characterize the language of **contempo-speak**. “That would be like obviously very extremely interesting.” (An attested example of a young male academic speaking before an audience.)

Collocation

Why compile a dictionary of collocations for words used figuratively, and not just a thesaurus? As Susan Hunston noted in a personal communication, “The crucial point that metaphoric uses are distinguished by collocation has...been made, most notably by Prof Alice Deignan of Leeds University.” Of course, *every* word is characterized by its collocations, and collocation is key for use. But the collocations of words used figuratively and literally can differ.

Pitfall, entered in this work in **hunting**, and **danger**, and also **walking, running & jumping**, is an interesting word and worth discussing in terms of collocation. Like many words, most of us will only encounter this word in its figurative sense. People around the world still hunt and trap for a living, but most of them use more modern methods. I can only imagine that it takes a lot of work and time to dig a pitfall, unlike the fictional pitfall from “The Most Dangerous Game” by Richard Connell, a short story I taught as the ESL co-teacher of a high-school language-arts class. What I know about these old methods of catching animals comes from films like *Chang: A Drama of the Wilderness* (1927) in which animals were most *definitely* harmed, or a book like *Dersu the Trapper* by V.K. Arseniev, when he writes about *ludevas*, or game fences. As he explains it, instinct impels an animal towards water or a salt lick. A game barrier prevents the animal from going in the direction it wants to go. So the animal walks along the fence, eventually coming to an opening in the fence it can get through. It is there that the trapper has dug the pitfall, and the animal falls in.

The main collocating verbs for a literal *pitfall* would be *dig*, *cover*, *fall into* and *fill in*: a hunter must first dig a pitfall and then cover it and hope that an animal falls into it, and when he leaves the area, he should fill in the pitfall so as not to deplete the stock of game in a wasteful manner. Like the word *hole*, adjectives might be *deep* or *shallow*. In a series with *and* or a comma linking it to similar words, an attested example is “pitfalls, deadfalls, and snares.” *Trap*, *pitfall*, and *snare* are often used figuratively, but *deadfall* seems to have fallen by the wayside.

For a figurative pitfall, important collocating verbs are: *identify*, *avoid*, *navigate* and *skirt*. This makes sense as a series. *Skate around*, an attested example, makes me question the writer’s mental image of an actual pitfall, even if *skate* is being used figuratively. A figurative pitfall can *await* the unwary. Common adjectives for a figurative pitfall are almost always classifying: a medical / clinical / diagnostic / constitutional / legal pitfall. (Our curriculums tend to do a horrible job of teaching classifying adjectives.) Or adjectives relate to significance: biggest / greatest / main / major / important pitfall. Or possibility and frequency: a common / possible / potential pitfall. A common preposition for “pitfall + preposition” is *in*: pitfalls *in* diagnosis / evaluation / interpretation / management, etc.

Similar words used figuratively to express **danger** include: bomb, booby trap, landmine, line of fire, minefield, powder keg, and tripwire, all from the military domain. A less used but perfectly apt word is “third rail” which refers to trains, electricity, and electrocution: “Social security reform / gun control is the third rail of US politics.”

Epithets

Most of us learned epithets like “Rosy Fingered Dawn” (the *Iliad*) and “The Whale Road” and the “The Swan Road” (*Beowulf*) in high-school literature courses. In the early 1900s, when whaling, walrusing and sealing were still big industries, writers would refer to important and powerful men as the “great whales of their profession.” Times have changed. Nowadays, we use epithets like “Mick (a blue terrier) is the *Michael Jordan* of the dog-show world” and “We know that Bolivia / Afghanistan can become the *Saudi Arabia* of lithium” and “Majid Abdullah, the *Pele* of the desert...” and “The fight against Tamil rebels was Sri Lanka’s *Vietnam*.” In this work epithets are recorded in the dictionary, and they are collected in the thesaurus in the category **epithet**.

Epithets commonly occur in the form, “the X of Y.” Mick (a blue terrier) is *the Michael Jordan of the dog-show world*. The Pribilofs are known as *the Galapagos of the North*.

Alternatives include “(the) Adj + X.” The adjective might be an adjective of nationality. The Haida Gwaii Islands have been referred to as *the Canadian Galapagos*. The Hawaiian Islands Marine National Park is *the American Galapagos*. “He studied counterinsurgency at Duntroon, *the Australian West Point*.” Or the adjective might be a color. In the early 19th century, in northwestern Illinois, lead was referred to as *gray gold*. In the 19th century the *white gold* was guano, in the 21st century it is lithium. Oil is frequently referred to as *black gold*, and so are the wonderful Khawlani coffee beans, picked red but dried until black, in Saudi Arabia’s Jazan province. And it is possible that the *blue gold* of the future will be bulk water shipments to arid countries. Cobalt has also been referred to as “blue gold.”

Yet another pattern is “(the) Possessive s + X.” The coral Triangle has been called *the Ocean’s Amazon*. “Why Eritrea is called *Africa’s North Korea*.” Hubei Province is *China’s new Ruhr Valley*. The Bali bombing was *Australia’s 9/11*.

Epithets are commonly introduced by *called*: Why Eritrea is called Africa’s North Korea (*The Economist* magazine); West Virginia *has been called* the Saudi Arabia of coal; the Great Bear Rain Forest *is often called* the Amazon of the North; Cerén *is sometimes called* the Pompeii of the New World (El Salvador); Borneo and its forests *are sometimes called* the lungs of Southeast Asia.

Or there is the variation with *so-called*: Kamuzu Academy in Malawi is the *so-called* “Eaton of Africa.”

Or *considered (to be)*: the *Andrea Doria* is *considered* the Mount Everest of wreck diving; Chulachomklao Royal Military Academy *is considered to be* Thailand’s West Point.

Described as can be used: the campaign *is often described as* the Stalingrad of the East (Battles of Kohima and Imphal in World War II).

Or *dubbed*: Northern California’s Salinas Valley *is often dubbed* America’s salad bowl; Xiyuangualu lychees *were dubbed* “the king of fruit”; Travis Patriquin *has been dubbed* the T.E. Lawrence of Iraq.

Known is quite common: he *is known as* Korea's Great Gatsby for his lavish lifestyle (Big Bang's Seungri); the Pribilofs *are known as* the Galapagos of the North; Ibrahim Rugova *was known as* the Gandhi of the Balkans; Bhutan, *once known as* the hermit kingdom of the Himalayas; the crash landing *became known as* the Miracle on the Hudson (Flight 1549).

Or *refer to* can be used: Unesco's citation *refers to Lake Baikal as* the "Galapagos of Russia"; El Paso *is often referred to as* the Ellis Island of the Southwest.

Finally, *said to be*: the Palestinians are *sometimes said to be* the Jews of the Arab world.

Note the tendency for the use of the passive, and the various adverbs of frequency.

Epithets often relate / compare (1) people to people (Ibrahim Rugova was known as the *Gandhi* of the Balkans) (2) geographical places and areas to geographical places and areas (Pipeline on the North Shore of Oahu is the *Mount Everest* of surfing waves) (3) institutions to institutions (Kamuzu Academy in Malawi is the so-called "*Eaton* of Africa") and (4) events to events (the Kuta Beach bombing was Australia's *9/11*).

Epithets can be quite thought provoking and the points of similarity (and dissimilarity) are always open for discussion and debate.

Consider *Vietnam* used as an epithet. That war has been compared to Egypt's intervention in Yemen, which occurred at the same time; Soviet intervention in Afghanistan in the 1980s; British involvement in that same country in 2006; and the Sri Lankan Civil War (1983-2009).

Both Colin Kaepernick and Meghan Rapinoe have been described as their generation's *Muhammed Ali*.

Such diverse peoples as Indo-Caribbean immigrants, Palestinians, Chinese, and Latinos have all been characterized as Jews, respectively of the Caribbean, the Arab world, the Far East, and of the 21st century. While the primary meaning relates to diaspora, nuances are certainly involved in every case.

Epithets for geographical places are quite common. Beautiful cities are often compared to a *pearl*: Manila, the *Pearl* of the Orient; Dubrovnik, the *Pearl* of the Adriatic, etc. One of my favorite epithets is the one for Lake Baikal, "the Blue Eye of Siberia." On the BBC news world map, you can just see it to the east of the larger Black and Caspian Seas and the smaller Lake Balkhash. My eye never fails to note it due to its beautiful epithet. In every respect it is an amazing lake. It even has archipelagoes. I would love to visit the Blue Eye of Siberia one day.

Finally, epithets often relate to **royalty**: Aretha Franklin, the *Queen* of Soul; Pat's *King* of Steaks; John George Bartholomew, the *Prince* of Cartography. Or to the **family**: Mohammad Ali Jinnah, the *father* of Pakistan; James Brown, the *Godfather* of Soul.

Persons

A name for a **person** can figuratively relate to many things, especially a **role**. These names come from a number of domains.

A person might relate to an occupation. A *butcher* is associated with oppression, warfare, and slaughter, even though the friendly butchers at the supermarket where I buy my meat seem to be perfectly normal, friendly and helpful folks. We should all be a good *steward* of the land, even if we don't work on ships, trains, or airplanes. You can be an *ambassador* without being a member of the State Department, as Mike Tyson was when he visited China to promote boxing.

“Adjuncts are the *field hands* of education” doesn't mean that adjuncts literally labor in the fields and pick crops. It means that they stoop to gain employment, get their hands dirty teaching actual classes, do all the heavy lifting, have little control over what they are paid, work seasonally, and usually have to travel a lot.

The names for members of a **family** used figuratively is a large category, no surprise, as the family is basic to every society. Some of the connotations seem as if they came from 19th century England as written about by Dickens, or from fairy tales. An *orphan* is bereft: “We need to develop orphan drugs for orphan diseases.” A *stepchild* is neglected: “Intelligence officers have always held a stepchild position.” The *favorite son* is favored: “Obama was welcomed to Ireland like a favorite son.” The *stepmother* is evil and hates the poor *stepdaughter*: “The EU is a heartless stepmother trying to drive Greece out of the family.” *Mother* and *father* commonly relate to creation: “Cokie Roberts, a founding mother of NPR” and “Ibrahim Rugova, the father of Kosovo...” Is it any surprise that *twin* represents connection? “The South's familiar twins, temperature and humidity...”

When we talk about **society**, we often use the words *outcast*, *leper* or *pariah* for those who are shunned and marginalized. Or *castaway*, like those poor unfortunates on Tromelin Island in the Indian Ocean. Or *hermit*, for those who voluntarily or involuntarily withdraw, like the Japanese *hikikomori*, or modern-day hermits.

Persons who are mentioned in regards to the **future** and making predictions include *fortuneteller*, *oracle*, *prophet*, *soothsayer*, and *seer*.

From the experience many of us had in our grade school and tweens and teens come *babysitter*, *bully*, *coach*, *chaperon*, *cheerleader*, *den mother*, *golden girl / boy* and *grownup*.

And many persons come from the domain of **religion**: *acolyte*, *choirboy*, *convert*, *crusader*, *devotee*, *disciple*, *evangelist*, *guru*, *heretic*, *iconoclast*, *martyr*, *missionary*, *oracle*, *prophet*, and *soothsayer*. A subset of these persons relate to **message**, no surprise, as every religion has its message.

All of the italicized words in this section have their entries in the dictionary, along with their collocations and exemplary sentences or fragments.

The “container” metaphor

An expression like, “He has love / hatred *in* his heart for...” serves to remind us that the heart can be thought of as a **container**, just like a pitcher or a glass, based on the preposition *in*.

We have cognitive linguists to thank for identifying the container metaphor, and any ESL / EFL teacher will recognize its explanatory worth for idioms related to the heart, such as “I poured my heart into the job,” “I poured my heart out to her,” “She fills my heart with joy and laughter,” “The government wants to instill / put fear into the people’s hearts,” “They have goodness / hate / joy in their hearts,” “We’re going to hold / keep Lori Piestewa in our hearts forever,” etc. Idioms like these do not seem so arbitrary, random or odd when we think of the heart as being a container.

A situation is often thought of as a container: I got *in* / *into* trouble and I don’t know how to get *out*. I’m *in* the doghouse at work. I got *in* hot water with the boss. We’re *in* a tight spot.

Feelings and emotions can be thought of as being inside a container: Don’t *hold it in*. Don’t *bottle it up*. *Pent-up* frustrations can lead to violence. *Open up*. Let it *out*. I felt *drained* / *empty*. I felt a sense of *emptiness* (depression).

The container metaphor, while extremely interesting and useful, is not perfect. For example, the mind is a container in an expression like, “What do you have *in* mind?” or “He is *close-minded*,” or “Try to keep an *open* mind.” But the mind can be more like a platform in an expression like “What’s *on* your mind?” This can be discussed with students.

Grammatical metaphor, fictive verbs, etc.

Angela Downing, in *English Grammar: A University Course* (Third Edition), devotes Chapter 27 to grammatical metaphor. She explains what that is, and gives good explanations for restatements that are not “typical.” She also gives excellent examples in that chapter, such as “Our evening walk along the river *took* us to Henley” and “August 12 *found* the travellers in Rome” (her examples) in which *take* and *find* are not used in their normal senses. Based on her work, I have included the following categories:

Fictive communication verbs include: *say*, *tell*, *read*, and *telegraph*. “The sign *said*, “Do not enter.” “The data *told us* there was a problem.” “His watch *read* 2 PM” “The film *telegraphs* to the audience that...” *Read* especially collocates with gauges and dials. There are many more verbs like these.

Fictive motion. These verbs include *go*, *run*, and *follow* and are used for things like paths, trails, rivers, roads, ropes, etc. that are essentially lines. Of course, there are many more such verbs. In her wonderful article, “Fictive motion in the context of mountaineering,” Ekaterina Egorova identifies over 70 fictive motion verbs from the world of mountaineering.

Fictive position. These are verbs that relate to position: *stand*, *sit* and *lie*. “The house *sat* on a hill,” “A lamp *stood* in the corner,” “The city *lies* in a valley.” They make a nice teaching set and can be taught as alternatives when we teach the “there” construction lesson.

Fictive meeting & seeing includes verbs like *meet*, *encounter*, *find*, *see*, and *witness*. This takes care of Downing’s examples, “August 12 *found* the travellers in Rome,” and “The last decade has *witnessed* an unprecedented rise in agricultural technology.” An attested example included in this work is, “23 May *saw* over 250 climbers trying to summit Mount Everest.” Clearly, the use of *find*, *see*, and *witness* collocates with a date or period of time at the subject position.

Fictive possession includes verbs like *capture*, *grab*, *grip*, *hold*, *possess*, and *seize*. “Now that we have *captured your imagination*, don’t make us come after the rest of you” is a clever TV advertisement from the Eastern Band of the Cherokee Indian Nation promoting tourism.

Fictive transportation verbs include ones like *take*, *carry*, *transport*, *bring*, etc. This is how I have categorized “Our evening walk along the river *took* us to Henley.”

The **Part of speech** category collects words not used in their traditional part of speech, including nominalizations of verbs, a very important feature of grammatical metaphor, according to Downing. Five contemporary and popular examples include “It *looks* bad” / “That’s not a good *look*”; “When will she *reveal* her secret?” / “When will she make the big *reveal*?”; “What you *request* will be difficult to fulfill” / “That’s a big *ask*,” ; “Chris Boswell doesn’t *panic*” / “Chris Boswell doesn’t do *panic*” ; and “The company *failed*” / “It was a stunning *fail* (aeronautical software).”

The idea of grammatical metaphor helps us notice, explain and teach these usages.

Past, present and future

We tend to think of the **past & present** and the **future** as lessons on grammar. But there are plenty of figurative and metaphorical ways to express the past, present and future, and they are all worth thinking about and mentioning to students.

A day can represent past, present and future. When we speak of the present, we can speak of *these days* and *nowadays*. And when we speak of the past, we can say *those days*, or *the old days*, or *back in the day*. When we speak of the future, we can say, “*Tomorrow...*”

The past, present and future is often thought of as movement based on a point of view. The statements, “Winter is approaching / coming / on the way” and “the big day has arrived” imply that things in the future come towards us. And that might be along a road: “When you don’t know what’s coming down the pike, you worry.” We commonly use this idea for scheduled events like deadlines, holidays, anniversaries, birthdays, seasons, etc. The idea is also expressed in statements like “We will have to stay here for a time to come” and “There might be problems in the coming months.”

But it can also seem like it is we who are moving toward the future: “We are approaching / coming up on the fifth anniversary of...,” etc. And “we” can be extended to inanimate things we would ordinarily never think of moving: “The region is heading towards war.”

Sometimes our forward movement makes it seem like we have all embarked on **journeys & trips**: “Nobody knows what is on the road ahead.” “Your job will get easier down the road.”

And time can relate to things, like the *horizon*: “War is on the horizon.” Or a *crystal ball* and *fortune teller*, especially in relation to predictions. The past can relate to a **clock**: “We don’t want to turn back the clock.” Or a *time capsule*. Or a *fossil* or *dinosaur* for something or someone old-fashioned.

Like the idea of heart mentioned above, we can think of the future as a container: “Nobody knows what is *in* the future.” “I wonder what the future *holds*.”

Way back in 1836 Emerson wrote, “Visible distance behind and before us, is respectively our image of memory and hope.” (*Nature*, Chapter 4, “Language.”) No doubt he was thinking of expressions like “Looking back on my life...” or “I’m looking forward to the wedding...” This sounds very much like the PAST IS BEHIND EGO and FUTURE IS IN FRONT OF EGO metaphors of today’s cognitive linguists.

I developed a special interest in Saudi Arabia in teaching language relating to the past, present and future. That is because, like many places in the world, Saudi Arabia is modernizing swiftly but unevenly. The past, present and future can all seem to exist in the same place at the same time. Generations, tribes, areas of the country, and even young men of the same age who grew up in the same place and tribe may be more modern, or less modern. As a teacher I donned the role of an elder, and would often make my students laugh by referring to myself as a fossil, or a dinosaur.

Allusions

In this work a list of allusions in contemporary use can be found at **allusion**, allusions to history can be found at **history**, and allusions can also be noticed in the **epithet** category.

Adjectives that we often use for size are allusions: *behemoth*, *Brobdingnagian*, *colossal*, *gargantuan*, *Goliath*, *leviathan*, *Lilliputian*, *Olympian*, *Pharaonic*, *jumbo*, etc. On National Public Radio, I recently heard a commentator refer to Joe Biden as a political *behemoth*, which created an image in my mind that made me laugh. The word *jumbo* comes from the name of an Ethiopian elephant exhibited in the US and Canada by P.T. Barnum.

Other allusions come from old stories and children's stories. The *Goldilocks* fairytale has given us the modifier *Goldilocks* with the meaning of "just right" or "the sweet spot": the Goldilocks economy / place / principle / zone, etc. *Cinderella* relates to success in a phrase like "The school has become a viral Cinderella story."

Several allusions to Homer and the *Iliad* and the *Odyssey* can be found in this work in the category **Iliad & Odyssey**. Five of them are very common: *odyssey* (the Mars Odyssey); *Trojan horse* (viruses, worms and Trojan Horses in computing); *Achilles' heel* (the knees are the skiers' Achilles' heel); *epic* (an epic day of surfing at Waimea Bay); and *siren* (seduced by the siren call of technology). These allusions will be remembered long after the details are forgotten of where each ship came from and who slew whom in what order.

In these strange times of fake news and the internet, it is interesting to consider contemporary allusions to **fantasy & reality**: curiouser and curiouser; El Dorado; heffalump (creature); Kafkaesque (adj), never-never land; quixotic (adj); rabbit hole; Twilight Zone; and Walter Mitty. Three of these allude to *Alice in Wonderland*.

And contemporary allusions to oppression include: draconian; Gestapo; inquisition; Lord of the Flies; McCarthy; McCarthyism, McCarthyite; Orwellian; pitchfork (oppression); procrustean; reign of terror / fear; and witch-hunt.

Allusions reflect our increasingly less and less shared knowledge, memory, history, culture, and education. In a North Carolina teacher-training class, an old biddy exhorted us to "go out and be the *Johnny Appleseed* of books!" I understood the allusion and took her exhortation to heart. But I am sure some of my younger colleagues had never heard of Johnny Appleseed. The use of brackets in a BBC article about a vote of confidence is telling: "I very much fear if Johnson does win tonight it will be a Pyrrhic victory [one that comes at great cost]." Or consider, "The Samizdat prize, named after the underground press in the former Soviet Union..." The greater the addiction of young people to TikTok, the less they seem to know.

To my surprise, my Saudi students seemed knowledgeable of stories and proverbs from classical Greek and Roman sources, with no formal study of them.

Truly, as Auda Abu Tayi said, "The world is greater as we go back."

Euphemisms

In this work a list of current euphemisms can be found in the category **euphemism**. We commonly use euphemisms for death and killing, sex, the body and bodily functions, and mental illness (“mental health”). Euphemism is part and parcel of the technology we now cannot live without: “cookies,” “The marketing industry calls them beacons or tags, critics describe them as being spy pixels,” etc. And in US politics: “The Affordable Care Act,” even if many can’t afford it, and the cheery sounding “Build Back Better Act”—would anyone build back worse? Of *course* in the military and policing. The old political correctness movement is responsible for a whole host of euphemisms: “crippled,” perfectly acceptable back in the day, has morphed to *handicapped, challenged, inconvenienced, and differently abled*, along with the attendant discussion and controversy along the way. People rail against the use of “retarded,” except, perhaps, lawyers before the Supreme Court, where the older term still has currency and a legal determination of retardation will save a murderer from execution.

The photographer Thomas Joshua Cooper has noted, “The cardinal points are always, historically, metaphors...” In the early part of the 20th century, “to go West” meant the destruction of a thing or the death of a person. A member of a tank crew in World War I wrote, “It’s a mile to your objective now, but it’s a mile of thrills... A one-pounder in a hedge scares you with several well-placed shots before it ‘goes west’ [is destroyed].” Paul De Kruif, in his book about public health titled *Men Against Death*, published in 1932, wrote about two doctors who had died: “In 1912 it [Rocky Mountain spotted fever] had sneaked into [Dr. Thomas B.] McClintic ... The Montana doctor, McCray...woke up with bloodshot eyes and an ache in his bones. In ten days McCray had gone West to join McClintic.”

Why west? What was the origin of this euphemism? I am speculating, but I think it might have to do with the idea of migration in its broadest sense, of moving on. In the 19th century, America was on the move, settling the continent to the Pacific. There were many dangers, including disease, weather, violence, and accidents, especially drownings at river crossings. In *Ordeal of the Union*, Allan Nevins tells of the son of John James Audubon comforting a dying cholera victim on a wagon train in the Rio Grande Valley. “What hurts you, Ham?” Audubon asked. “My wife and children hurt me, Mr. John,” the man replied. Even if the pioneers survived, they might never be seen or heard from again back East. It would have been like they went West and died.

Nowadays, nobody uses the euphemism “to go West” to mean that somebody has died or something as been destroyed. “South” and “north,” however, continue to be used figuratively: each one with **numbers**, and the former in respect to **failure, accident & impairment** and **decline**. In this work, interesting quotations relating to the cardinal directions as metaphors can be found at *direction (symbol)*.

Contemporary euphemisms for death include: “He has passed (on).” “We mourn his passing.” “He is no longer with us.” “He has gone away (too soon).” “He is gone.” “We salute the fallen.” “He gave his life.” “He lost his life.” “The suspect is deceased.” “He succumbed to the injuries

on the way to the hospital,” “He was pronounced,” etc. That last is astonishing, as it simply drops the predicate adjective *dead*, as though mentioning that word would be impolite.

Very sinister euphemisms relate to **hygiene**. I taught English in Kosovo, and the phrase, “Ethnic cleansing” always makes me shiver. If you make the trek to Ibrahim Rugova’s grave—a beautiful, peaceful spot high up on a hill overlooking Pristina on one side and the countryside on the other, where there is a park where mothers bring their babies and children to play and where the elderly sit—on the walk up you will notice a plaque commemorating the victims of a massacre. Such plaques are ubiquitous across Kosovo. And on a street alongside that park, there is a villa with a plaque identifying the villa as a place for the rehabilitation of torture victims... While looking up at a window, I thought I saw a curtain move, and my hair turned greyer. Once, on the walk down, I noticed a parked UN van and stopped to examine the sign on its side. The van belonged to a forensic team that located the graves of executed Kosovars and tried to identify the victims. The U.S. Fulbright Scholar at the university once said to me, “Why is there a statue of a KLA guy with a Kalashnikov downtown? Why can’t they just get over it and move on?” All I could think was, “Back home we’re *still* fighting the Civil War.”

The military is well known for euphemisms. When a military airplane crashed through the roof of a civilian warehouse here in the U.S, a military spokesman said, “We have secured the armaments package, which will be properly disposed of. Safety is our utmost priority.” An aggressive reporter got him to belligerently admit that the “armaments package” consisted of live rounds and missiles, which thankfully had not gone off in the fire. It is worth noting that Americans troops have not been bombed from the air by enemy airplanes since the Korean War. And that the U.S, as Orwell said in 1939 about England, is “in the exceptional position of being immune from invasion...” We have been very very lucky.

In the extraordinary documentary film *A Sniper’s War* the following exchange occurs: “What does it mean ‘to do your job’?” / “To get rid of their snipers and gunners, so that our infantry can move ahead.” / “What does it mean ‘get rid ‘ of them?” / “To eliminate. To kill.” In a report about an ISIS cell, a reporter said, “The other two suspected members of this ISIS cell, by the way, they are already *off the board*. Uh, the ringleader... was killed in a drone strike in 2015, and the other was captured in Turkey, where he was tried, convicted and sentenced to prison...”

In the U.S., the police are a paramilitary organization, with corresponding language, as exemplified by an extract from a press release: “The officer involved in this particular OIS was wearing his BWC, which captured the OIS as it occurred... In the coming days, the... Department will be releasing our second Critical Incident Community Briefing, explaining what occurred during the OIS on July 5, 2019.” From such language you would never guess that the press release concerned the case of a 17-year-old girl who was shot to death after being pulled over for speeding. (An OIS is an officer-involved shooting and a BWC is a body-worn camera.)

Or the latest shame, the school shooting in Uvalde, Texas. “The on-scene commander at the time believed that it had transitioned from an active shooter to a barricaded subject...”

Similarly, a police spokesman recently told reporters, “Our special assignments unit, also known as the SWAT Team, responded and attempted to work towards a tactical resolution of the

incident...” During this “incident,” nine cops were shot or hit by shrapnel in an ambush, two people died, and a baby was rescued from a doorstep.

Even public officials grow sick and tired of their euphemisms. Police Chief James Cervera of the Virginia Beach Police Department said the following at a press conference, after a mass shooting on May 31, 2019.

“Right now we have a lot of questions. The whys, they will come later. Right now, we have more questions really than we have answers. We are a little more than two hours into this event. And we use the word *event*, that’s a cop term, this devastating incident that happened, that none of us want to be here talking about, this devastating incident which is going to change the lives of a number of families from our city.”

Gestures and bodily reactions

In 1836 Emerson wrote, “*supercilious* [means] the *raising of the eyebrow* (*Nature*, Chapter 4, “Language”). Using his pattern, we could say that attention means the turning of the head, confusion the scratching of the head, surprise the popping of the eyes, etc.

Every culture has its gestures, and gestures are an important nonverbal way to communicate. Gestures can relate to such basic meanings as signaling yes and no, or signaling a moving car to stop for you. I once noticed a book at a yard sale with the interesting title *How To Speak Italian*. Curious because it was so thin and one of my brothers lives in Italy, I picked it up and opened it up. It simply consisted of photographs of Italians making gestures, with text explaining what those gestures meant. I laughed, because it does seem to me that the Italians have a lot of unique gestures.

But gestures, and the meaning of those gestures that are lexicalized in language, are not shared in every country. A person who reads, “He received the thumbs up on his proposal” must know that “thumbs up” refers to a positive judgment to understand the message. A person who reads, “His statement left a lot of people scratching their heads” must know that the gesture relates to incomprehension, even though no one actually does it. A person who hears, “I’ll keep my fingers crossed,” must know that that gesture relates to hope and fate. Or that “to roll up one’s sleeves” means to get to work (not every culture wears clothing similar to ours.) Language associated with gestures or a bodily reaction can confuse even those within the same country. For example, a Northerner in the US might take a second to process the meaning of a statement like, “When I heard what happened, I got chill bumps,” as said by a person from the southern Appalachians.

And gestures and particularly bodily reactions are often used to express emotional effect. If the performance of a person in a play was wonderful, I might say it was *brehtaking* or it *took my breath away*. If it was boring, I might say it was a big *yawn*. If it was horrible for some reason, I might say it made me *retch*.

The importance of gesture in communication is an important part of the online experience. In text language, *smh* stands for “shaking my head,” and in 2015 a face-with-rolling-eyes Emoji became available. LMAO is an example of hyperbole.

Everyone nowadays should be knowledgeable about gestures. The thumbs-up symbol does not mean the same thing in every culture. In recent years the okay sign—the sign formed by making a circle with the thumb and index finger, has become an Alt-right meme. Using it in certain contexts nowadays can have repercussions. In academia, eye-rolling can be considered a sign of patriarchy and a micro-aggression, which causes some to roll their eyes. In different cultures, winking can have a meaning you might not suspect. Pointing at a person or snapping your fingers may or may not be appropriate.

For a listing of gestures and bodily reactions that have been lexicalized in American English, see **gesture** and **bodily reaction** in the thesaurus. It is quite a large category and a rather important one, I think.

Shapes and parts-whole

How is a graph like the landscape? Well, both have *peaks* and *valleys* and *plateaus*. In addition, a graph can have a *spike*, and the line might be in the shape of a *bell curve*, or characterized as carrying a long *tail*. Peaks, valleys, plateaus, spikes, bells and tails are not just things, but shapes.

In the dictionary I use, the horn of an animal is the first sense. “Shaped like or suggesting” is the seventh sense. The tenth sense is geological: a horn is a geological feature. The Matterhorn, geologically speaking, is a horn. In case you are wondering, the musical instrument is the *eighth* sense. And that is the sense that we always teach.

Many simple words we teach have the meaning of “resembling or having the shape of” or “suggesting” or “regarded as like.” Examples are everywhere.

The alphabet: A-frame; T-bone; T-bar; V-neck; Z-drag.

Traffic and roads: bottleneck; dogleg; hairpin, T-intersection, U-turn, washboard (road).

Body shapes: heart (heart-shaped face); hourglass figure / waist; pear (pear-shaped body).

Parts of the body: A plane has a nose, tail, and belly. A bed has a foot and a head. A chair can have legs, a back and arms. Needles, potatoes, coconuts, and hurricanes all have eyes. A mountain range has foothills.

Words relating to shapes often appear in geographical place names: the banana *belt*; the Parrot’s *Beak* (Cambodia and Guinea); the *boot* of Italy; the Wakhan *Corridor*; the *Eye* of the Sun (in Monument Valley, Arizona); the *Horn* of Africa; the Florida *panhandle*; *Ribbon Reef*; *Table Mountain* (Cape Town); the Coral / Afar *Triangle*; *Wave Rock* (western Australia), etc.

Younger teachers might not know what the washboard in a *washboard road* refers to. But I can remember my mother using one, as well as an electric wringer, and a clothes line.

While I was teaching a high-school ESL lesson based on the map, a Honduran girl told me, “Chile is shaped like a chili.” It was something I had never heard before and have never forgotten. Truly, the students teach the teacher.

In the dictionary I use, the very first main entry is *A*, and the first sense defines it as a letter. The second main entry is also *A*, and the first sense defines it as a *shape*. It is like that for every letter thereafter. The letters are not just letters, they are shapes.

Here’s a wonderful riddle: What has bridges, canals, cavities, clefts, fissures, floors, isthmuses, lakes, mounds, orbits, pipes, pits, roofs, tubes, vestibules, and walls, but is not anything related to the earth or a building? A hint: the answer is closer than you think. Answer: the human body! This riddle makes us realize that the body has many parts resembling terrain features and infrastructure.

“Long lines of women, bent double like inverted capital Ls, work their way slowly across the fields...” That’s a line from “Marrakech” by Eric Blair. I can see them.

Animacy

Anthropomorphism has been a feature of literature for ages. Anthropomorphic animal stories are as ancient as Aesop and include favorites like *White Fang* by Jack London and “Rikki-Tikki-Tavi” by Rudyard Kipling. Only once in Saudi Arabia, many years ago, did a very literal-minded student rebuke me for telling an animal story. “An animal can talk?” he said frowning, raising an eyebrow. I am pretty sure his classmates told him to shut up, and I finished telling the story.

Traditionally in English things like a ship could be referred to as *she*. “Shelf *life*” is a relatively old term, and products have been referred to as a *family* and “first *generation* / second *generation*” for quite a long time. But the idea that technology is not only alive but sentient used to be relegated to science fiction. One thinks of HAL from the 1968 film *2001: A Space Odyssey*.

Well, 2001 has come and gone, and almost anything can be animate and sentient nowadays. The first obituary for a non-human being that I ever read was written by Henry Fountain way back in 2010 and appeared in *The New York Times* newspaper under the title, “ABE, Pioneering Robotic Undersea Explorer, Is Dead at 16.” I can still remember how surprised and delighted I was by the conceit. Extension? Now inanimate objects, like wheat, can have “biographies.” And nothing prevents a creative writer from writing an autobiography of... a flea (1887). *The Island of Missing Trees* by Elif Shafak, I read in a review, includes a sentient fig tree that partly narrates the story of two lovers. According to a review, the narrator of *The Pages* by Hugo Hamilton is a sentient book.

Now technology is *dumb*, *smart*, or *brilliant* and can even teach itself (AI). One goal of the Internet companies has been to habituate everyone, especially children, to address machines as though they were people. They have given their virtual assistants names like Siri, Alexa and Cortana and encouraged us to ask them questions, as if that were normal. They have succeeded completely.

“*Roaring Meg* (an English Civil Wars-era mortar) *resides* at Goodrich Castle...” “Recent investigation has found that the annual Great Whirl in the southwest Arabian sea has an average *life span* of 198 days.” “So where did you find this comet, where is it *living*?” “We climb where the avalanche *lives*.” “A cave *breathes*...”

Devotees, enthusiasts and experts, naturally enough, seem more prone to this kind of personification than the rest of us.

- Laird Hamilton has said, “Jaws doesn’t *like* a north swell,” and he ought to know.
- Colin Tudge wrote, “I *met* one in full bloom early one sunny July morning in the Cambridge University Botanic Garden.” Tudge was referring to a handkerchief tree.
- In the same way, Linda Mapes wrote, “The tree first *came into my life* along with John O’Keefe, a biologist...”
- Dr. Jeffrey B. Johnson, a Boise State volcanologist and National Geographic Explorer studying the Masaya Volcano in Nicaragua, explained, “Volcanoes like to *speak* in low-frequency sounds that humans can’t perceive called infrasound. So we developed sensors that we can deploy to listen to the volcanos *talk* to us.”

- An official at the Smithsonian’s National Air and Space Museum in Washington, DC, once said, “So the decision was made a number of years ago to take him off display and put him in storage... To have that step forward, just slightly, gives him more of a presence.” He was talking about Neil Armstrong’s *spacesuit*! The person interviewed about the great and beloved bell in the Elizabeth Tower in the Palace of Westminster in London perhaps was a bit more justified in saying, “And then we have Big Ben *himself*, about 13 and a half tons...”
- Dr. Catherine Walker from the Woods Hole Oceanographic Institution said the following about an iceberg: “I always watch A23 because we’re the same age. It calved in 1986 and it’s started to wiggle recently.” (“How a colossal block of ice became an obsession” by Jonathan Amos, BBC, 15 Jan 2022.)
- In 1989, after a deranged person tried to kill the Treaty Oak in Austin, Texas, with poison, thousands of kids addressed letters to the tree with messages like, “We’re sorry this happened, get well soon.”
- In 2021, an adult homeowner in Kensington, New Hampshire, had to have the largest sugar maple in the state cut down because it had begun to rot and threatened her roof. She said, “She’s just at the end of her life. She is finally being euthanized. It’s unsafe and it’s not fair to her to let her stand out there and not be as beautiful as she always has been. I’m sad to see her go. It’s very emotional.”
- “Typically a sled dog will tell you, when they’re ready to retire. People always say, well dogs can’t talk, and that never makes sense to me, because I feel like they actually talk very clearly about what they want and what they need if you’re listening.” (Blair Braverman, dogsledder, about her dogs.)
- Lake Superior has a twitter account, Lake Superior @ LakeSuperior. “I am the greatest lake of all time. G.L.O.A.T. (she / her).” 313 Following 205.5K Followers.
- The honor for this type of sentiment must surely go to NASA, which has a Facebook page for the Perseverance Mars Rover. The following is a recent post: “My team has spotted something unexpected: It’s a piece of a thermal blanket that they think may have come from my descent stage, the rocket-powered jet pack that set me down on landing day last year.” Of course, that was picked up by online news purveyors across the country as clickbait: “Human trash discovered on Mars—but NASA’s explanation leaves unanswered questions” by Mark Price, Miami Herald, June 16, 2022. Of 88 comments on Yahoo, most were jocular, or condemned trash-leaving; no one commented on the absurdity of a first-person account by a machine.

I suspect that I am not the only person in the world to have said, “Thank you” at the automatic bank teller machine after withdrawing a little cash, or to have secretly felt relieved and grateful when “approved” appears on the machine that reads my debit card, or to mutter, “Okay, okay,” when the bossy self-scanner at the store tells me to make sure I have picked up my change, as if I would ever forget! That same scanner, which ends up saying, “Thank you for shopping at X,” might just be responsible for the sad death of “You’re welcome.” Just the other day the supermarket employ scanning my groceries at the checkout counter muttered “Come on, come

on” when the scanner was momentarily unable to read a bar code of a particular item. Her tone was both irritated and imploring. I was waiting. There were people behind me.

It is common to give inanimate and non-human objects agency. A common pattern is as follows: “I hadn’t planned to write a book on this topic, but the topic chose me.”

- The extraordinary Bernard Tomic said, “Tennis chose me. It’s something I never fell in love with.”
- The last line of Jim Bouton’s “gripping” baseball book, *Ball Four*, is: “You see, you spend a good piece of your life gripping a baseball, and in the end it turns out that it was the other way around.”
- *Seize* has a similar idea, in an expression like, “This idea that math was beautiful seized Paul Dirac.”
- In the film *Xiu Xiu, the Sent Down Girl*, Xiu Xiu asks Lao Jin, “Are you really going to spend your entire life raising horses?” and Lao Jin replies, “They raise me, too.”
- “Some say that humans domesticated wheat; others that wheat domesticated humans.” (“Flour Fixated” by Bee Wilson, *London Review of Books*, 24 September 2020.)
- David Benioff and DB Weiss, the writers of *Game of Thrones*, said, “When George Lucas built [*Star Wars*], he built us too.”
- “I made [the 1994 horror novel] *Carrie*, and *Carrie* made me.” (Attributed to the beloved American writer Steven King.)
- In a similar vein, and nicely qualified: “If it’s possible for a place to save a life Sils-Maria saved Nietzsche’s.”
- The great actor Peter O’Toole said, “The part chooses me, I don’t choose it.”
- “I like a play to *choose me*. It just sort of stays with me and says, ‘Come on, do it. You know you want to do it, so *do it!*’” (The actor Al Pacino.)
- A Japanese saying has it, “With the first glass a man drinks wine, with the second glass the wine drinks the wine, with the third glass the wine drinks the man.” Many of us have been there before!
- Another proverb like that, common in Saudi Arabia, says, “A miser does not own money; money owns the miser.”
- I like what Winston Churchill said when he urged that the House of Commons, bombed in World War II, should be re-created as an exact replica: “We shape our buildings and afterwards our buildings shape us.”
- In New Zealand and Bangladesh, rivers have been recognized as living entities and granted the same legal rights as persons.

There must be a bit of the animist in all of us. Colin Tudge’s quote above about “meeting” a handkerchief tree makes me think of what Fran James, a Lummi Indian, said about gathering bark from a cedar tree for a basket. “We talk to the trees. We say, ‘OK, we need some of your bark to help us; we’ll make something beautiful.’ You have to talk to it and thank it for giving you the bark. You have to go with a good heart. You can’t be cranky and fussy.” V. K. Arseniev once recorded Dersu on an early phonograph and played it back to him. Dersu listened, unsurprised to hear his own voice, and said, “Him talk true, not leave one word.”

See the dictionary entries for *born* and *live* (*alive / non-human*), and *die* (*non-human*).

On NPR, a person was talking recently about his favorite song. He said, “I’ll say I probably listen to this song a few times each week, whether it’s in the car or just telling Alexa to play it. There’s a story...” Suddenly, the voice of Alexa broke in: “Sorry. I don’t know that one.” And the interviewee went on, “I’m sorry, that was Alexa that said that, um...” before continuing to talk about his favorite song. This was not a toddler or a pet humorously upstaging an interviewee. This was *Alexa*. Interestingly, Alexa’s intrusion seemed to have made the interviewee lose his chain of thought and forget about the story he was about to tell. (“An NPR Listener Shares His Signature Song,” NPR, Weekend Edition Saturday, July 20, 2019.)

The first obituary I read for a machine was in 2010. The first time I heard a personal assistant intrude into a nationally broadcast radio show was in 2019. What’s next?

[“When kids yell ‘Alexa, play poop,’ you’ll hear these songs,” NPR, All Things Considered, September 9, 2022.

[“Imagine if you had a voice assistant that could write code for you, and you said, ‘Hey, Alexa, build me a Web site to sell shoes,’ Sanjay Sarma, a professor of mechanical engineering at M.I.T., told me on the phone. (Immediately, he pulled the receiver away to rebuff a device in the room: ‘Shut up, Alexa! No! No!’)” (From “The End Of The English Major” by Nathan Heller, *The New Yorker*, March 6, 2023.)

[“I’m very careful to be very polite ‘cause, you know, come that robopocalypse, I want them to remember that, you know, I’m not one of the bad guys. It’s kind of the reason I made this film is that I’ll get spared when they finally take over, they’ll be like, ‘He’s OK. He understands us,’ you know?” (The British filmmaker Gareth Edwards about his 2023 film *The Creator*. Gareth claims he says “please” and “thank you” when using Siri, Alexa, ChatGPT, etc. From “He wrote this film before AI was a hot topic. Now it’s all the rage” by Mandalit del Barco, NPR, All Things Considered, September 29, 2023.)

Persistence, survival and endurance

Isn't it interesting that people who have never hunted or trapped and who have never seen an actual pitfall much less dug one or filled one in still use the word? That medical textbooks list "pitfalls" in treatment? The use of a word like *pitfall* is a perfect example of how older technologies and activities and periods of life have disappeared yet persist in the language.

In 1870, railroading was the second largest occupation in the US, behind farming, and grist mills used to dot our streams and rivers. Things have certainly changed! Even so, the category of figurative language from the category **train** and **farming & agriculture** is huge, the term "grist for the mill," is still popular, and "term-paper mills" proliferate on the internet. Few send letters or postcards nowadays, but NPR still has "audio postcards," and a book like *Deacon King Kong* by the great writer James McBride can be described as a "love letter to New York City." Honestly, who sends actual love letters nowadays?

At one time in our history the **horse** was king of the road and bicycles, electric trains, and cars shared the road with them, not vice versa. On May 3, 1908, a headline in *The New York Times* screamed: "J. B. SCHUCHMAN HURT IN A RUNAWAY / Horse He had Just Bought for Speedway Parade Dashes into a Trolley Car. / JUDGE THROUGH A WINDOW / Lands in the Lap of Little Girl Passenger and Both Are Cut by Glass—Horse Breaks His Leg." Nowadays in New York City about the only reminders from that era are fading ghost signs on brick walls with messages like: TO LET / CARRIAGES COUPES HANSOMS VICTORIAS LIGHT WAGONS / HORSES BOARD BY THE MONTH."

Things have changed. Yet everyone still uses and understands language associated with horses. I was lucky as a boy: my grandfather had a horse, and I have fond memories of riding him along country roads and swimming him through the leech-infested pond below my grandpa's shack. You have to cling on tightly to the mane of a horse when riding bareback, especially when the horse arises out of the water up a steep bank. Words like *runaway* and *reins* and *bridle* and *saddle* and *gallop* are used figuratively nowadays in a sentence like, "We have got to find a way to rein in galloping inflation," but for me those words will always have a psychological reality. It is not easy to be a small boy in control a very large wayward horse. I *know* that.

After 1958 more people crossed the Atlantic by **plane** than **boat**, yet figurative language related to boats will always persist: the *spaceship* and *spaceport* pay homage to sailing ships, and our old space shuttles were named for famous ships associated with great explorers: the *Challenger*, *Discovery*, *Atlantis*, and *Endeavour*.

Today, when we think of wireless communication we think of the internet, not Marconi and wireless telegraphy. But "Internet communication has its roots in the wireless rooms aboard the great ocean liners," as Kat Long has noted. I used to have a fading yellow and black Western Union telegram I sent my parents from the *Queen Elizabeth* in a folder I labeled "My favorite things." It may still be there. In January, in 1971, at Fort Knox, Kentucky, I took lessons in Morse Code with many others; the military phased out most training in it long ago, but a boxer can still *telegraph* a punch, or a movie a plot point. The telegraph lives on in the language, and

the SOS—three longs and three shorts, whether pounding a rock on a wall, or blinking your eyes—is still relevant to this very day, for those who still know.

Religiosity has had its ups and downs in the US and elsewhere, but figurative language relating to **religion** will never disappear, no matter how secular the world becomes. And this especially relates to topography: in every country there is a Devils Backbone (Espinazo del Diablo), Courthouse (Majlis al Jinn), Falls, Highway, Pulpit, Throne, etc. And every religion has contributed words to English: *fetish* (West Africa), *taboo* (South Seas); *Delphic*, *muse*, *oracle*, *Pandora's box*, *soothsayer* (pagan); *karma*, *juggernaut*, *sacred cow*, *guru*, *mantra*, *avatar* (Hindu); *mecca* and *hegira* (Islam); *kowtow* (Confucianism); *mantra* (Buddhism); *Valhalla* (Norse), etc.

We Americans pride ourselves on our anti-monarchical revolution but we still and forever will link the idea of **royalty** with the **superlative** in **epithets** like “Aretha Franklin, the Queen of Soul,” “Burger King,” “Mattress King,” and the prom / 4H king and queen. I once attended a country-themed restaurant in Atlanta with family members. My brother-in-law held his young son up to a portrait of Elvis Presley and told him, “Say hello to the King.” We all laughed. Many persons associated with royalty are used figuratively, less obvious ones including *whipping boy* and *handmaiden*. Just because we had a revolution doesn't mean we reject royalty.

At one time spitjack was a job category and there was a dog, *Canis vertigus*, that was actually bred to turn a spit. Nowadays inserting a spit, once a common task, is a lost art. But the verb *skewer* will always exist, in the sense, “We skewered him at the comedy roast.” Of course, there are many words used figuratively that come from the category of **food & drink**. Likewise, there were once hundreds of job categories related to the manufacture of cloth that are anachronistic now in my adopted state of North Carolina. And yet, figurative language associated with **cloth** persists.

Above, I mentioned my mother using a washboard. A washboard, a tub, and a then-modern electric wringer sat on the porch of a house I once lived in as a boy. Once I got my arm stuck in that wringer and had to be taken to the hospital. The pale scar on the inside of my arm just below my left elbow is a reminder that a part of me *went through the wringer*...literally! After my mother had scrubbed the laundry on the washboard, and wrung it in the electric wringer, she would hang it on a clothesline to dry. As a boy, I was literally *clotheslined* once while riding my bicycle, and when I got bigger and older the same thing happened on the football field, and “clothesline injuries” are an important part of emergency medicine. Finally I would watch her *iron out the wrinkles* with an electric iron. In the very old days before electricity, a clothes iron was filled with coals from a fire, and the woman would moisten a sheet by spitting water on it. Most of us don't go through this process anymore to clean our clothes. But these words associated with laundry and many others persist. And so we try to *iron out the wrinkles* in a plan and politicians come up with a “laundry list” of reforms to deal with the problems of the day.

In ancient times, when I was a boy, I can remember drinking from a public water cooler when that was a boon, to be able to slake my thirst with free, thirst-quenching, life-giving water. Who drinks from a public watercooler anymore? Nowadays, office people buy their own brands and

flavors of water, and everyone from joggers and hikers to athletes and soldiers drink from camelbacks. After the scandal of Flint, Michigan, who would *trust* water from a watercooler? Not to mention that, in this time of COVID, everyone is working from home, and this will no doubt continue post-pandemic. Who needs a watercooler to be a gathering place to communicate with anyone when we can simply text one another? And yet, cultural critics still talk about “watercooler shows” and “watercooler gossip.” As a cultural practice, meeting for a cold, free cup of water at a watercooler and exchanging gossip is as dead as the dodo. But, like the dodo, it lives on in our language. It lives on. It lives. For all of our acceptance of the new, trendy contempo-speak language, maybe we should acknowledge and pay a bit of homage to the old language that has persisted.

Quotations

There are many wonderful quotes relating to or utilizing metaphor and figurative language. Following are six that are meaningful to me.

1. “Words are signs of natural facts... *Right* means *straight*; *wrong* means *twisted*. *Spirit* primarily means *wind*; *transgression*, the crossing of a *line*; *supercilious*, the *raising of the eyebrow*. We say the *heart* to express emotion, the *head* to denote thought... / An enraged man is a lion, a cunning man is a fox, a firm man is a rock, a learned man is a torch. A lamb is innocence; a snake is subtle spite; flowers express to us the delicate affections. Light and darkness are our familiar expression for knowledge and ignorance; and heat for love. Visible distance behind and before us, is respectively our image of memory and hope. / Who looks upon a river in a meditative hour and is not reminded of the flux of all things? Throw a stone into the stream, and the circles that propagate themselves are the beautiful type of all influence...” (*Nature*, Chapter 4 (Language), by Ralph Waldo Emerson, 1836.)

I like the above because in a short space Emerson lists beautifully and concisely so many metaphors. The “circles that propagate themselves” is entered in this dictionary at *ripple*. A related word is *splash*. Both words are metaphors for **effect** that relate to **water**.

2. “It was doubtless an ingenious idea to call the camel the ship of the desert, but it would hardly lead one far in training that useful beast.” (George Eliot’s *The Mill on the Floss*.) The above quote reminds me that, while a metaphor identifies something that two things have in common, plenty of things are still different. A ship does not have long eyelashes, has not been branded, does not roar, gurgle, bellow, foam from the mouth to the point of producing airborne balloons of saliva, attract huge spiders, produce delicious and healthy milk and meat, etc. “The camel is a ship?” a Saudi military student remarked to me once, disappointingly.

And people will see things differently, as in the parable of the “Blind men and an elephant.” Data has been compared to a gas (the cloud); water (data stream); and a solid (data mining). Bitcoin servers have been described as both farms and mines. The spread of COVID-19 is often thought of as a wave, and Dr. Roger Shapiro nicely extended that to a wave in a pool that sloshes around, back and forth, leaving and returning. The myth of Sisyphus can mean different things—difficulty, futility, or something that never ends—and the adjectives *promethean* and *quixotic* can have quite different connotations: as I get older, my sympathy for Quixote increases, and I think of him as less crazy and more of an inspiration. The title of Dickens’ great book is commonly misappropriated: See “Please, Liberals: Stop Abusing ‘A Tale of Two Cities’” by Reid Cherlin, *The New Republic*, Jan 2, 2014. It is not always clear which meaning or connotation is meant. Many say we should view the problem of drug addiction as a public health issue, not as a war on drugs, and yet the phrase “public health campaign” has always had a warlike ring, and the metaphor of disease as an enemy has come to the fore in the era of COVID-19.

Should we really single out the donkey for ridicule and use it as an insult? I don't think so. "Without a donkey, my wife and I are forced to be donkeys" is something farmers say in Ethiopia. Does the octopus really deserve its iconic depiction in political cartoons as a global strangler? No. I once floated about one for half an hour on a shallow reef in the Red Sea, and its fascinating shape- and color-changing is something I will never forget. Is a frilled shark, or a sturgeon, really horrific looking? Some think they are beautiful.

But even if the similarities between two different things are not always obvious, or are tenuous, or even upset me, I almost *always* find them worth thinking about. In my opinion, allusions to Joe McCarthy, Machiavelli, and Hector do little justice to those men. The idiom "to hang somebody out to dry" has come to mean *abandon*, but nobody hangs up their laundry and abandons it. Gibbeting fits the idea *much* better. "Yemen was Egypt's Vietnam" makes me think of a host of dissimilarities, but I must admit, upon reflection, that there *are* plenty of similarities, such as the time period, and the proximity of safe havens across a border.

The title of Leon Talley's memoir, *The Chiffon Trenches*, shows just how "ingenious" a metaphor can be, how much ground, time and human condition it can cover, from the bloodiest battlefields of Passchendaele and Verdun to...well, to *Vogue Magazine*. In one popular video cute ten-year-old Nandi Bushell is a "beast" on the drums, while in another a Marine Corps rammer identified only as "Wolf" is a "beast" on a howitzer mission. Both are "beasts." Roland Huntford described the Ross Ice Shelf as "that rolling Sahara of snow," which sounds odd at first, but there are many comparisons that can be made between the Sahara and the Antarctic. For example, hydrating in both environments can be a huge problem: Antarctica *is* a polar desert. Huntford was writing specifically about the lack of terrain landmarks. The question is always, as Nathaniel Mackey stated, "How different can two things be and still have something in common?"

Divorce-court judges had had to consider "whether a dog is more like a lamp or a human being."

3. "I looked at *The Sixteenth Round* as puttin' a letter in a bottle and throwin' it out over those 36-foot-high walls into the ocean of life, like a bobbin' bottle, and hoping upon hope that somebody, somehow, someday, will see this bobbin' bottle in the water, take this bottle up, read my message, and come to help me. And that's what happened. That's what happened." (Rubin "Hurricane" Carter. From "The Hurricane Tapes," Ep6. Muhammad Ali and Bob Dylan, BBC Sounds.)

This strikes me as a particularly beautiful, eloquent and heartfelt use of figurative language, using one extended metaphor.

4. "Yeah, I generally think this is a fairly minor deal. At the same time, it could actually backfire on Bill Barr. Because, if he thinks it's necessary to pre-spin this, that means that there's something in there that needs to be pre-spun. And if he's too heavy handed about

that, it can actually just throw gasoline on the daily media feeding frenzies that we have [inaudible].” (The commentator Jonah Goldberg on “Before Mueller Report Is Released, Republicans And Democrats Take Sides,” NPR’s Morning Edition, April 18, 2019.)

I love this quote for its contrast to the one above it. To paraphrase a line from Kipling’s short story, “The Phantom ‘Rickshaw’”: “Men occasionally break down and become as mixed as their metaphors.”

5. Elisabeth Moss: I just did it, and just kind of went as big as I could and threw it all at the wall knowing the only mistake we could make was not going far enough. And so we just went for it... / Rachael Martin: Did he ever have to pull you back. I mean did it ever feel too far, or were you like, “Nope...” / Elisabeth Moss: I had turned it up to eleven and then realized I had to go even higher... (“In ‘Her Smell,’ Elisabeth Moss ‘Turned It Up To 11,’ Then Turned It Up Some More,” Morning Edition, NPR, April 19, 2019.)

In the above, Elisabeth Moss is speaking about her performance in the film *Her Smell*. I like it because it is a good litany of clichés relating to **commitment & determination**. One has to respect commitment in an actor. But when it comes to such declarations, I like what Alex Lowe said: “There are two kinds of climbers. Those who climb because their heart sings when they’re in the mountains, and all the rest.”

6. “It can’t surprise us that our language began with metaphors. Words are being made today under our own eyes in precisely the same fashion. Witness the terse and vivid terms that the gangsters coin: gun moll, for the racketeer’s girl-friend; hot seat, for the electric chair; stool pigeon, for the traitor who acts as a spy for the police.” (*Word Origins and Their Romantic Stories* by Wilfred Funk, Litt. D., 1950.)

This is a good reminder that language is constantly evolving, and what sounds novel and contemporary today will sound as dated as Funk’s examples in twenty years.

Synonyms and opposites

As teachers, we are accustomed to mentioning synonyms, opposites, and patterns like succeed / fail / give up / try again. We can do the same with figurative language, and this dictionary and thesaurus will help.

1. You can *launch, roll out, unveil, take the wraps off* a product, or *drop* it (**inauguration**).
2. You can leave somebody in your *wake*. Or in your *dust*. Or in your *slipstream*. These are entered at **competition: movement**. The first relates to boats and water. The second to land and horses. The last to planes and air.
3. The opposite of *tone deaf* is... *pitch perfect*. A person can also *strike all the right notes*, or have a *tin ear* (**music**).
4. If you achieve something, people might *sing your praises*, but more than likely your achievement will be *unsung* (**achievement, recognition & praise**).
5. Something can be *a stone in one's shoe* or *a burr in one's saddle* (**affliction**).
6. You can *hew to a line* or... *go against the grain*. Both phrases relate to wood (**sanctioning, authority & non-conformity / tree**).
7. You can be on the *cusp* of something, or *light years* away from it (**proximity: astronomy**).
8. You can *face* a problem or *turn a blind eye* to it or *look away*. You can *kick the can down the road* or *push something* (like a decision) *down the road*. You can *tackle* a problem or *punt* or try to *run out the clock*. Or, you can *throw your hands up in the air* or engage in *handwringing* (**confronting, dealing with & ignoring things**).
9. You can *give a hand, lend a hand*, or *pitch in* (**help & assistance**).
10. You can try to save your *neck* or your *skin* or your *scalp* (**survival, persistence & endurance**).
11. Socially, you might find *a place at the table* or *under the tent*. Or, you might find yourself *outside* in the cold, *frozen out, in the shadows*, on the *fringes* of society, out of the *mainstream*, in *exile, in the wilderness, on the far shore*. You might find yourself to be a *castaway, hermit, leper, outcast, outsider, pariah, untouchable, a ghost*. Good luck with that (**social interaction, society, and inclusion & exclusion**)!
12. A new job might be a *plum* position or a *poisoned chalice*.
13. In bad times your life might be *on hold*, and you might find yourself *in purgatory* or *in limbo*. In a *drought* or a *dry spell*. You might feel *adrift*, in the *doldrums*, unable to make *headway, going in circles, rudderless. Chasing your tail. Standing still*. In a *blind alley*. Or *mired, sidetracked, stuck, stalled, in a rut* and *spinning your wheels. Going nowhere, or backwards* and *lagging behind. Losing ground. Stumbling* or taking a *step backward* (**progress & lack of progress**).
14. Or, you can be *on a roll* with lots of *momentum* and *traction, advancing, getting ahead, going forward, making headway, gaining ground, leaping or vaulting ahead*.
15. Somebody can *add fuel* to a controversy, *pour gasoline on it, fan* it, or provide *oxygen* for it. Something can become an *accelerant*.
16. You can be *up to your elbows / neck / eyeballs, in over your head, drowning, buried alive, immersed, enmeshed, entangled, or ensnared* in something like debt or some other situation. I hope things get better for you (**involvement**)!

17. You can *hold* your employees' feet to the fire or *light a fire under* them. You can *nudge*, *push*, *prod*, *goad*, *cudgel*, *hector*, or *bully* them, *lean on* them, *twist their arms*, *strongarm* them, *hold a gun to their heads*, *crack the whip*, *ride herd* over them, etc. Just don't expect them to attend your birthday party (**coercion & motivation**)!
18. You can *stroll*, *coast*, *waltz* or *sail* to success (**attainment**). Something you do might be a *cakewalk*, a *stroll in the park*, a *picnic*. Or a *Gallipoli*, a long hard *slog*, a *trail of tears* (**difficulty, easiness & effort**).
19. If you are searching for something, you might hit *pay dirt* or *fool's gold* (**success & failure / mining**).
20. A division might be the *favorite son* or *stepchild / stepdaughter / orphan* of its parent organization (**family**).
21. You can say, "That ship has sailed" or "That train has left the station." Both relate to **timeliness & lack of timeliness**. The two cliches always make me think of that scene from *Austin Powers: International Man of Mystery*: "Your dad loved her very much. If there was one other cat in this world that could have loved her and treated her as well as your dad, then it was me. But, unfortunately, for yours truly, that train has sailed."
22. You can try and *throw somebody off the scent*, *throw somebody off the trail*, or *cover your tracks*. This language all relates to **pursuit, capture & escape**, and **hunting**.
23. The president might try to *bypass*, *go around*, *sidestep*, or make an *end run* around congress.
24. In terms of interest and responsibility, something can be *in your wheelhouse*, *in your lane*, or *up your alley*. Or not.
25. You can *bury* or *exorcise the ghosts* or *put something to rest / bed / sleep*. *Bury the hatchet* or *close the book* on something. *Put it behind you*, *let it go*. *Move on*. Emotional and psychological wounds can *heal* or *scab over*. These phrases relate to **reconciliation, resolution & conclusion**. Just don't forget, a buried hatchet can always be dug up.
26. In terms of **sports & games**, you can *drop the ball*, *fumble*, *miscue*, *drop the baton*, *strike out*, or *score an own goal*. Or the opposite: *hit a home run*, *hit a grand slam*, *hit it out of the park*, get your project *through the uprights* or *across the goal line*. In which case, you might just want to take a *victory lap*. Or *spike the football*.
27. If you *pull the plug* on something like a project, it can *go down the drain*, *pipes*, or *tubes*.
28. You can be the *father*, *godfather*, *midwife*, *architect* or *author* of something like a plan or policy or program.
29. Urban warfare (MOU) versus desert warfare can be described as *a different animal / a different beast / or a different kettle of fish*.
30. The Arctic might be a *factory* or a *kitchen* for weather. Both relate to **creation & transformation**. Many of the new terms people use nowadays to talk about race have been cooked up in the kitchen of sociology.
31. You can "cut corners" or "take a shortcut." Or, the opposite, you can "go the extra mile" or "go out of your way." All relate to **journeys & trips**. Enjoy your hike!
32. "If you wanna win it, ya gotta *bring it*." "I *left it* all out there on the floor along with my guys." (This connection is made at **commitment & determination: coming, arriving, staying, leaving & returning**.)

33. You can grow up in your father's shadow. Or in his reflected glory. Hopefully the latter, but both are based on **light & darkness**.
34. You might feel like you are on a slow boat to China, or you are going full speed ahead. Both relate to the **speed** of a **boat**.

People often pair conventional language with a cliché, almost like a translation, and will even triple up on clichés, like a boxer peppering his opponent with jabs: “We must *oppose* him, we must *stand up to* him.” “This looks like *an inflection point, a turning point*.” “What’s the next *shoe to drop, what happens next?*” “What would justice have *looked like* in your view, what did you *want to happen* here?” “They want to *fill in the blanks, connect the dots*, and *figure out what’s going on*.” “There is a possibility we could see another pandemic in our lifetime. No one can run the odds about what kinds of *numbers that looks like*, you know, *how likely* that is...” “The groups *close ranks*, they *circle the wagons*...” “*Out-of-step, against-the-grain, different-drummer* types...” “It’s a *race against time*, it’s a *race against the clock* to get these animals (stranded pilot whales) refloated.”

Lessons and exercises

1. A lesson and exercise might focus on words related to **health & medicine** used figuratively with the meaning of **condition and status**. Write the following on the board:

- the peace process is *dead and buried*
- the economic recovery has been *robust*
- businesses are *ailing*
- the soccer team is *on life support*
- small businesses are *hurting*
- earnings have been *anemic*
- the economy remains badly *wounded*
- the pace of economic growth is *moribund*
- reform is *dead*
- the economy is *healthy*

Ask students to identify (or underline) the words relating to **health & medicine** and also identify or underline the non-human subjects. Discuss. Ask students to organize the vocabulary on a cline from *robust* to *dead and buried*.

2. Create a simple matching exercise to illustrate a simple pattern of figurative usage that links problems (**flaws & lack of flaws**, etc.) to **amelioration & renewal**:

- | | |
|--|--|
| 1. There are some <i>wrinkles</i> in your plan. | a. You need a <i>fresh</i> one. |
| 2. That idea is <i>stale</i> . | b. We must <i>sharpen</i> them. |
| 3. There is a security <i>hole</i> in our defenses. | c. We must try to <i>defuse</i> it. |
| 4. Why are you so <i>tense</i> ? | d. How can we gain <i>traction</i> ? |
| 5. Our skills have grown <i>dull</i> . | e. We can <i>iron them out</i> . |
| 6. The situation is <i>explosive</i> . | f. We must <i>patch</i> it immediately |
| 7. We're <i>stuck</i> . Our <i>wheels are spinning</i> . | g. You need to <i>unwind</i> . |

3. Words and phrases for **increase & decrease / number** include:

- explode; shoot up; soar; grow; skyrocket; jump; go / shoot through the roof; peak; sky-high...
- plummet; dip; slide; drop; plunge; fall; tumble; cratered; sink...

We commonly use these words and phrases when we talk about numbers, prices, and rates. These words make a good simple category exercise. Write the words and phrases in alphabetical order on the board and ask students to categorize them as “increase” or “decrease.” If your classroom has a smartboard with “Vortex” software, create two vortices labeled “increase” and “decrease” and call on a student to slide each word into the correct vortex.

My students in Saudi Arabia liked Vortex exercises, because if the student standing in front of the classroom at the board slid a word into the wrong vortex, it would be spit out to his consternation and the delight of the other students.

Ask students about important rates and prices: the crime rate; the price of bread and medicine; the age of first marriage, etc. Are they low, high or sky high / through the roof? How have they changed over time? How do they compare with other countries or geographical areas?

4. We tend to think of the superlative as a series of grammar lessons and test questions based on form, but there is plenty of language (including proverbs) that embodies the *notion* of the superlative, and it can be gleaned in the thesaurus in the category **worth & lack of worth** and **superlative**.

- Every *monkey* is a _____ to its mother.
- Speech is *silver* but silence is _____.
- The jackal is a _____ in his own country.
- Who is the *Pele* of Saudi Arabia?
- Name a superlative fruit.
- Which bird sings the most beautifully?
- What does it mean when I say (pick any sports figure) was or is the GOAT?
- Which car is the *thoroughbred* of cars?
- Do you think that the lion is the *king* of beasts?
- What area or city is the baboon *capital* of Saudi Arabia?

Questions like these enliven routine grammar exercises. And don't forget, when a student answers, to ask why, which can engender debate between students!

5. To focus on all the ways to talk about the **future**, including the idea that the future is a **container**, ask students to select a piece of paper from a container. Each piece of paper would have a fortune written on it. Each student would get a little message about what lies *in* his future, what is *ahead* for him, what is *on his horizon*, what is *down the road*, the fate that is *approaching* him, etc. This exercise can lend itself to humor. Of *course*, such an exercise might not be appropriate in all contexts, cultures, and with certain students.
6. The following chart is based on collocations for *time* in the dictionary. Have your students point out or underline the collocations.

Time is money

- | | |
|-----------------------------|-------------------------|
| 1. Spend your money wisely. | Spend your time wisely. |
| 2. Use your money wisely. | Use your time wisely. |
| 3. Don't lose your money. | Don't lose time. |
| 4. Stop wasting your money. | Stop wasting your time. |

- | | |
|--|------------------------------------|
| 5. You can run out of money. | You can run out of time. |
| 6. A delay will cost us money. | A delay will cost us time. |
| 7. We must buy weapons | and we must buy time to train. |
| 8. We have lots of money but | we don't have much time! |
| 9. A thief steals your money. | A friend steals your time. |
| 10. It takes money to feed your child. | It takes time for a child to grow. |
| 11. Do you have \$100 to spare? | Do you have a minute to spare? |
| 12. A banker might lend you money. | A teacher will lend you his time. |
| 13. Give money to the poor. | Give time to your family. |
| 14. He who lives on borrowed money | lives on borrowed time. |
| 15. Make money to eat, | but make time for vacation, too. |

7. In Saudi Arabia, everyone has made a campfire or a bonfire. After discussing that process, you can give your students the following simple fill-in-the-blank exercise that focuses on the figurative language associated with **fire**:

extinguish (verb); conflagration (noun); die out (verb); spark (noun); die down (verb); ashes (noun)

“The region is a tinderbox, and it will only take a _____ to set the whole area on fire. The result will be a _____ that will burn out of control and that no force, not even United Nations Peacekeepers, will be able to _____. The fire will eventually _____, but I doubt it will ever completely _____. We can only hope something positive will eventually arise from the _____.”

8. The following simple matching exercise uses a few of the expressions found in the thesaurus at **gesture**:

- | | |
|---|--|
| 1. Was the movie <i>boring</i> ? | a. It's time to <i>roll up our sleeves</i> . |
| 2. Did the captain <i>approve</i> your request? | b. Don't <i>point your finger</i> at me! |
| 3. Well, let's <i>get back to work</i> . | c. Nope, he gave it the <i>thumbs down</i> . |
| 4. Did the announcement <i>surprise</i> people? | d. I <i>salute</i> you. |
| 5. <i>Don't tell</i> anyone. | e. Yeah, it was a big <i>yawn</i> . |
| 6. You did a <i>great job</i> , Saleh. | f. Yes, it <i>raised eyebrows</i> . |
| 7. Don't <i>blame</i> me. I didn't do it. | g. Be <i>tightlipped</i> . |

9. The following exercise combines the names for lines along with some of the figurative uses found in this dictionary at *line*. My military students in Saudi Arabia found this exercise interesting. The * indicates “sentence completion” and answers can vary.

Imaginary lines are everywhere!

1. What do we call the line between the earth or sea and the sky?
2. Ali shouldn't have done that. He was wrong. He *
3. What is the line called between the land and a sea or ocean?
4. A military man must obey orders at all time. He must *
5. What do we call a line of military vehicles all traveling together in the same direction?
6. If you step over that line, I will take action, because I consider that a *
7. What do we call the line that divides the earth into the northern hemisphere and the southern hemisphere?
8. If you break a rule or cause an accident, the captain will send you to the guardhouse. The captain takes *
9. What do we call the lines on the face or hands of an old person?
10. I must see others before I see you. Please be patient and *

10. The following matching exercises focus on the car and its parts used figuratively. Most of the usages come from the glossary entries for **engine** and **mechanism**.

Drive safely, and have a safe trip!

- | | |
|---|--|
| 1. You need to get busy | a. it's time to <u>tap the brakes</u> on employment. |
| 2. We have more than enough workers, | b. we're just <u>spinning our wheels</u> . |
| 3. Who is in charge at the school? | c. he's <u>asleep at the wheel</u> . |
| 4. Mr. South doesn't know what's going on, | d. and <u>step on the gas</u> . |
| 5. We're not making any progress, | e. Yeah, it's <u>firing on all cylinders</u> . |
| 6. Anthony Joshua looks tired. | f. Yeah, he's <u>running out of gas</u> . |
| 7. The factory is operating 24/7. | g. Mr. South is <u>in the driver's seat</u> . |
| 1. That was a difficult time in my life, | a. and get ready for <u>a wild World Cup ride</u> . |
| 2. We won't buy that company | b. Yeah, he's got <u>a great engine</u> . |
| 3. Look at Al-Dawsari run all over the field! | c. over the Hijaz for the next two days. |
| 4. The rainstorm will remain <u>parked</u> | d. before we <u>kick the tires and look under the hood</u> . |
| 5. We aren't making much progress, are we? | e. but I thank God it's <u>in the rear-view mirror</u> now. |
| 6. <u>Fasten your seatbelts</u> , TV viewers, | f. No, our momentum has <u>stalled</u> . |
| 7. I haven't see Mr. North for two weeks. | g. Didn't you hear? He had a nervous <u>breakdown!</u> |
| 1. We're not making any progress, are we? | a. No, we're <u>stuck in a ditch</u> . |
| 2. Anthony Joshua looks tired. | b. it's running at <u>full throttle</u> . |
| 3. The factory is operating 24/7, | c. is <u>a tune-up</u> for combat. |
| 4. So who is in charge of the school now? | d. Mr. North is <u>at the steering wheel</u> . |
| 5. All military training | e. Yeah, Usyk is a real <u>sparkplug</u> . |

6. Just look at Usyk box circles around Joshua. f. and stay in your lane.
 7. You should mind your own business g. Yes, his tank is empty.

11. The following is based on the language found in the glossary entry for **time: distance**.

Time is distance

- | | |
|--|---|
| 1. We drove (for) <u>a long distance</u> . | We drove (for) <u>a long time</u> . |
| 2. A mile is <u>a short distance</u> . | A minute is <u>a short time</u> . |
| 3. Rumah is <u>close</u> . | Ramadan is <u>close</u> . |
| 4. We are <u>close to</u> Rumah. | We are <u>close to</u> Ramadan. |
| 5. Bahrain is <u>300 miles away</u> . | Graduation is <u>3 months away</u> . |
| 6. We have <u>a mile to go</u> . | We have <u>an hour to go</u> . |
| 7. Jeddah is <u>a long way off</u> . | Vacation is <u>a long way off</u> . |
| 8. Jeddah is <u>a long way away</u> . | Vacation is <u>a long way away</u> . |
| 9. The bank is <u>just around the corner</u> . | Spring is <u>just around the corner</u> . |
| 10. Dammam is <u>in sight</u> . | The end of the war is <u>in sight</u> . |
| 11. Jeddah is <u>on the horizon</u> . | Victory is <u>on the horizon</u> . |
| 12. On a <u>distant / remote planet</u> ... | In the <u>distant / remote future</u> ... |

It makes a nice classroom chart.

To the ESL / EFL teacher

1. Because figurative language is such an integral part of common, everyday language, we EFL / ESL teachers should teach the terms *literal* and *figurative* at the beginning level and say them at least as often as we say *noun*, *verb*, *adjective*, *adverb*, and *collocation* in our classrooms. I don't use the terms *metaphor* or *idiom*, because the former is so closely attached to literary studies and cognitive linguistics, and the latter is associated with dictionaries of idioms that include relatively useless and rarely used expressions like "It's raining cats and dogs." The simple basic question that all teachers can ask about any vocabulary item they teach is, "Can this be used figuratively?" In many cases, it can and often is, and this dictionary and thesaurus will help those teachers with that question. Just look up the word.
2. To explain figurative usage to our students, we can use the same language that we teach them in our lessons and that is used to define second and third senses, etc., for words in a conventional dictionary: "like," "as," "similar to," "equal to," "equivalent to," "comparison," "resemble," "suggest," "has the shape of," "has the role of," "acts as," etc.
3. "Extra" senses can provide real communicative utility. For example, a simple word like *path* can allow us and our students to talk about conduct, easiness and difficulty, and the future, not simply a walk from point A to point B. Figurative language can be oblique and subtle, and in my own experience it has allowed me to mention or discuss things with students that might otherwise have caused controversy and problems.
4. Students (and all of us) will encounter the figurative sense of some words far more often than the literal sense. Consider the word *dinosaur*. Literal dinosaurs disappeared from the earth long before humans: paleontologists study them. And yet, people nowadays will often encounter the figurative usage of *dinosaur* that relates to **primacy, currency, decline & obsolescence** and to **past & present**. *Magnet* is another example, and *pitfall*. I'm sure you can come up with your own examples.
5. Just about every part of speech can be used figuratively: nouns, verbs, adverbs, adjectives, and prepositions, even interjections and lexicalized gestures. Seals are a *magnet* for sharks. He *killed* the proposal. She greeted me *warmly*. It was a *sharp / stinging* rebuke. I am *with* you. Her performance *wowed* me. The movie was a big *yawn*.
6. As English teachers, we all know the importance of collocation in vocabulary teaching, even if we are teaching old-fashioned materials that ignore it. Often there is a collocating preposition: Makkah is a magnet *for* Muslims. Or the phrase is pre-modified by a classifying adjective: a *political* firestorm; *financial* doping in soccer; an *astronomical* rate, a *stellar* record, etc. Most curriculums, including the ALC/DLI, do a poor job of teaching such classifying modifiers. Collocation can reveal sets of subjects and objects, and it is an especially good way to recycle previously learned vocabulary.

7. Prepositions. The first sense in most dictionaries is spatial, and that is how our textbooks present them and how we teach them. When we teach *in front of*, we always teach it spatially: “The car is in front of the bus.” But that same preposition can refer to the **future**: “She has her whole life *in front of her*.” And it can also relate to **proximity**: “The answer is *in front of you*.” At least three prepositions relate to **allegiance, support & betrayal**: “I am *for* the measure. We stand *behind* the new law. I am *with* you in your attempts to change things.” When it comes to **hierarchy**, a person can be *above* or *below* another person. To see a list of prepositions and their non-spatial meanings, look in the thesaurus under **prep, adv, adj, particle**.

8. We tend to think of the past, present and future as grammar. But time is embodied in words like *fossil, dinosaur, horizon, crystal ball, time capsule*, etc. Or in persons like a *fortuneteller, oracle* or *prophet*. Time is very interesting. For example, time can seem like a place: “We have been here before” (in the past) and “Where do we go from here?” (in the future). Time can entail distance: “Spring is just *around the corner*,” and “The Paris Olympics are still *a long way off*.” (See the above “Lessons and exercises” for a chart “Time is distance.”) In one conception of time, “the future is forward and the past is behind.” See **future and past & present** and **time** in the thesaurus for possibilities.

9. Don’t be afraid to think about and teach grammatical metaphor and fictive verbs. Grammatical metaphor simply provides alternatives to the structures we already teach. You can say, “*There is* a lamp in the corner.” But you can also say, “A lamp *stands* in the corner” or “*You have* a lamp in the corner.” You can say, “*We walked to town* along the road” but you can also say, “The road *took us* to town.” You can say, “I got home in early May,” but you can also say, “Early May *saw me* back home.” You can say, “I had a lot of problems,” but you can also say, “I *encountered / met with* a lot of problems.” “There has *been...*” can often be restated as, “We have *seen...*” Offer both choices. We tend to teach the former and ignore the latter.

10. When you teach a “bland” verb, try to think of a synonym that is figurative: Can you *help* me, can you *lend a hand*? What did you *find*, what did you *dig up*? He *betrayed* me, he *stabbed me in the back*. *Be patient, hold your horses*. I *support* you, I am *with* you, I *stand with* you, I *stand behind* you, I will *back you up*, I’ve *got your back*! I *understand*, I *see*, I *get it*. Don’t be afraid, you must *resist* him, *stand up to* him, *take him on*. Students will commonly acquire and productively use the figurative equivalent.

11. Never miss a chance to add value to a word. Is it also a shape? What are its parts? Is it a part of a proper noun? A geographical feature? The name of a company or product? Is there a euphemism for it? Does the word have an interesting origin and history? Can you use the word as a springboard for a bit of content?

12. As English teachers, we know all about teaching parts-wholes. Those parts are often figurative. A chair has legs and a back, a mouth has a roof, a book has a spine. A bed has a head and a foot. A mountain has foothills. Whole-parts like these are the basis of simple riddles we learn as children: What has legs but can't run, a back that can't bend? And you can use the first person pronoun to make such a riddle sound even more opaque and strange: "I have legs but can't run, I have a back but it can't bend... What am I?" Of course, your students will "turn the tables on you" and insist on stumping *you* with the riddles from their culture.
13. Try to think of and include a variety of subjects and objects for the grammar patterns you teach. *Ali / the bookcase is standing in the corner. Sugar / Sara is sweet. Open the door / your book / your mind. A car / Winter is approaching. I'm allergic to penicillin / people who think they know it all. A millimeter / life is short. You can arrive at a place. You can arrive at an answer or solution.*
14. Clines are always useful for organizing vocabulary in sets. In "Lessons and exercises" above, the first lesson involves organizing words relating to **health & medicine** on a cline. A similar lesson could be given based on words relating to temperature that relate to **emotion**. Our curriculums are good at teaching *hot, warm, and cold*. Less good at teaching *tepid, or lukewarm*, or combinations like *boiling-hot* and *freezing-cold*.
15. Sets and series are always useful for organizing vocabulary. Spring is a **season**, and we always teach "spring, summer, fall and winter" as a set, but we can also relate that same set to **death & life**, or to **growth & development**. In Saudi Arabia, when I introduced this word to my students, following the ALC/DLI curriculum, I used to give my adult military students the following riddle: "A happy dancing young girl in a green dress. A strong young man with yellow hair. A crying lady in a brown dress. A shouting angry old man with white hair... What are they?" Answer: the four seasons! Arab students appreciate such personification and especially appreciate symmetry. The fact that their climate has essentially two seasons does not make them any less interested in the seasons in *my* country; after all, the goal of many of them is to graduate from the program and then be sent to the U.S. for follow-on training (FOT). And don't forget all the seasons like the hunting season, etc. Language related to a **plant** and the life cycle of a **fire** relate to the same concepts. *Sweet, salty, bitter* and *sour* can relate not only to **taste** but also to **character & personality**. Again, my military students enjoyed and appreciated the metaphoric extension.
16. An easy lesson is to simply think of something you or your students might be interested in. For example, students studying academic English should be very interested in words and expressions related to **analysis, interpretation & explanation**. An engineer might be interested in the language associated with **infrastructure**. Some teachers are interested in the expression of **feeling, emotion & effect**, and they will find a comprehensive listing of such language in the thesaurus. My adult military students in Saudi Arabia—the home of the Arabian horse—always enjoyed idioms associated with the **horse**, and I was also pleased to

discover many of them shared my enthusiasm for **boxing**. Of course, they had their favorites! Nothing is so basic to all people as the **hand**, so try doing a lesson just devoted to that. Idioms range from **help & assistance** to **oppression**. And it is easy to pantomime expressions like *hand out* and *give / lend a hand* and *have the upper / whip hand*. Such a lesson would make a nice lesson in a place like Kosovo, where your classroom might be a café, your textbook is you, and where your students—poor as they are—will insist on paying for your coffee. You want to give a good lesson to students like that!

17. Expressions related to **gesture** and **bodily reaction** are easy to pantomime. I went to the director to get his *approval* and he gave me *the thumbs up*. / I didn't *realize* that, thank you for *opening my eyes*. / That film *bored* me, it was *a big yawn*. Pairs like these make easy matching exercises.
18. As mentioned above, a name for a **person** (*pioneer, acolyte, steward, leper, butcher, warrior clown*, etc.) is often used figuratively. You can find a list at **person** in the thesaurus of this work. All teachers are aware of the sequence of grammar, and in Saudi Arabia, in military environments, a semi-insult like *bully* is a good way to exemplify it. "You are a bully!" Or, "You are a *big* bully!" Or, "You are *such* a bully! Use the negative imperative + noun pattern and you get, "Don't be a bully!" Use stop + being + noun and you have "Stop being a bully!" Or substitute *donkey*. Donkey is not a vocabulary item in the ALC/DLI, but everyone I taught in Saudi Arabia know it in English, and its connotation.
19. Use analogies; like metaphors, they compare and make connections. I usually introduce them in the following form: Stand up is to resist as _____ is to surrender. The center is to a circle as _____ is to a hurricane. Spring is to a young man as _____ is to an old man. A period of time is to the life of a man as _____ is to a book. Articles can be especially problematical and this is a chance to use them. When students give answers to analogies like these, even when they gave me the anticipated answer, I always ask them to explain their answers using complete sentences. Analogies like these can be used at the most basic level and students find them novel and interesting. A ship is to the sea as _____ is to the desert is one I often gave in Saudi Arabia. Don't forget to ask why.
20. Teachers can incorporate figurative language into routine classroom language. If your students get too noisy, you can say, "Hey, turn down the volume!" or "Lower the temperature!" or "Cool down" or "Keep cool!" or "Let's dial it back!" or "Don't be such a hothead!" If a student becomes too impatient, you can say, "Hold your horses!" Instead of asking if a student understands or not, you might ask, "Are you in the dark?" You can use lexicalized gestures to praise: "I salute you," "I applaud you," "I take my cap off to you." When a student's feelings get hurt, you can say, "A military man needs thick skin!" Students tend to hear, note, and acquire such figurative language, especially if it is repeated day in and day out. More importantly, though, it gives the figurative nature of language its due.

21. Feel free to say a little bit about the *literal* meaning for those words we use figuratively. If you ever teach or explain the figurative use of *castaway*, for example, you might spend a few minutes telling your students about those actual poor wretches on Tromelin Island in the Indian Ocean. At the entry for *scuttle* I mention two instances where entire fleets of ships were scuttled. Below the entry for *amok* is a quote from *The Malay Archipelago* by Alfred Russel Wallace about that practice. Below the entry for *earthquake (effect)* is a rather long entry from the same author, which will make those of us who have never experienced an earthquake think about how incredibly destabilizing it can be. In the entry for *whirlwind* is an eyewitness account of a black buran experienced in Lop Nur, Xinjiang, by Sven Hedin. At *blizzard*, I have included a short quote from V.K. Arseniev and Dersu about an actual blizzard, or *purga*. Below the entry for *pioneer (person)* in the dictionary, I note Rudyard Kipling's stirring poem "The Explorer." There are always a few students who will find that poem on the internet and read it, based on your recommendation.
22. Take a page from the quote from Emerson above and use the frames he uses to get your students thinking about metaphor. "*Right* means...; *wrong* means...; the crossing of a line means...; we say *heart* to express...; a cunning man is...; attention is...; an effect is... Words and phrases for that last are entered in the category **effect**. They remind us that an effect is often thought of as a wave in a medium: ripples as in water, with the related word *splash*; waves in the air like a *shock wave*; and sound waves like *reverberation* and *repercussion*. That is the reason for expressions like: "His surprise resignation caused ripples / shock waves / reverberations around the world."
23. Get students to notice language use in longer passages of speech or text. Vocabulary choices are often predictable. For example, a crime story or crime podcast is bound to have words used figuratively based on **hunting** and **searching & discovery**. Articles about famous people will usually have figurative language relating to **importance & significance**. It's fun to read an article and identify sets like these.
24. Here's a good idea to make the figurative and the literal real to your students within the four walls of your classroom. First, consult the category of **books & reading** in the thesaurus of this work. Write "literal" on one side of the board, "figurative" on the other, hold up a book, and go to work. You might start with *spine*. You can say something like, "Look, do you see this part of the book here? Well, it's called the spine. And I have a spine! This is my spine! And I can break this book's spine, and I can break my own spine if I'm in a bad auto accident!" There will be many literal and figurative pairs for you to talk about with your students. The dictionary of collocations will give you attested examples of use and help you with the collocations. If you have a flair for the dramatic and a perfect sense of timing, as you no doubt do, because you are a teacher and you have read this far in the work, you will save "close the book" with its meaning of **reconciliation, resolution & conclusion** for the bell, the smiles, and the break.

An alphabetized list of the categories in the thesaurus

Every main word entry in the dictionary is tagged: *target(s): source(s)*.

Target(s). As an English language teacher / instructor / trainer, have you ever had to teach about ability / capability? Of course you have! “Ability” is often a vocabulary item, and we speak about ability during our grammar lessons on “can + v” and “be able to + to v.” But there are plenty of non-grammatical ways to express the idea of ability and inability, both literal and figurative, that we use all the time, and you will find them by looking at **ability & lack of ability** in this glossary. “Can he read?” “No, he is illiterate.” “Can he fix a computer?” “Yes, he is a wizard!” In the military, the bombs can be dumb, smart, or brilliant.

Source(s): As English language teachers, most of us have taught a lesson on colors. We usually teach them at a basic level as a set without collocation and introduce, review, quiz and test them quite simply: “What color is this?” “Green.” Go to **color** in the thesaurus of this work, and you will get a lot of ideas on how to make colors more interesting and relevant to your students, throughout your curriculum. *What* can colors relate to / refer to / represent? Colors can occur in proper names. On the world map in my classroom in Saudi Arabia, I always enjoyed pointing out the “color” seas to my military students: the Red Sea; the Black Sea; the White Sea; the Yellow Sea. Colors can relate to experience: he is green, he is a greenhorn. Colors can relate to feeling, emotion & effect: The question, “Are you blue?” never failed to make my students smile. Not because Arabs are literal minded—they talk about teachers having black and white hearts—but because the ALC/DLI is so relentlessly literal. Colors can relate to sanctioning, authority & authority: green light, red light, etc. And I can do all this in an introductory class, using the simplest grammar: The Red Sea; He is green; Are you blue?; You have the green light, go ahead. Negotiating the meaning has never been a problem.

While I was on vacation in the States once, during a time of terrorist events and a war overseas, my worried father suggested to me, “Joe, why don’t you stay home and get a Ph.D. in Linguistics?”

To which I replied, “Dad, have you ever *read* a linguistics book!”

Category names or tags, inside and outside of this work, are a hodgepodge. There is no thesaurus category in this work for what Barbara Dancygier and Eve Sweetser refer to as “X-is-the-new-Y Construction.” But plenty of examples are to be found in this dictionary at “new (orange is the new black, etc.)”. Lakoff and Johnson talk about cause and effect. In this work, figurative ways to express cause and effect, reason and result, can be found in the thesaurus at **relationship**. I did not create a thesaurus entry for metonymy (I wish now I had). But people interested in that, and in image metaphors, might glance at the thesaurus entry **sign, signal, symbol**. “Fictive X,” a term I acquired from reading Angela Downing, proved very useful to me: **fictive communication, fictive motion**, etc.

When it comes to the tags, I simply did the best I could. And there I leave it, until the experts come along and do better.

♦ "But when it is the other way about—when it is a case of a poor man aspiring to some woman who is 'above' him—Dickens instantly retreats into the middle-class attitude. He is rather fond of the Victorian notion of a woman (woman with a capital W) being 'above' a man. Pip feels that Estella is 'above' him, Esther Summerson is 'above' Guppy, Little Dorrit is 'above' John Chivery, Lucy Manette is 'above' Sydney Carton. In some of these the 'above'-ness is merely moral, but in others it is social. ♦ "We have learned absolutely nothing. It's absolutely the truth."

*** analysis

♦ "Banished in 1996, but deserves a repeat nope given its overuse. Usurped the simple 'yes,' laments a contributor. Another condemned it as 'the current default to express agreement, endemically present on TV in one-on-one-interviews.' Frequently 'said too loudly by annoying people who think they're better than you,' bemoaned an aggrieved observer. 'Sounds like it comes with a guarantee when that may not be the case,' cautioned a wary watchdog." ("Absolutely" is on the Lake Superior State University 2023—Words banned for 'misuse, overuse, and uselessness.")

Academy Awards (epithet)

Academy Awards of the publishing world

the National Book Awards, sometimes referred to as the ~

Academy Awards of the culinary world

it's the ~ (James Beard Foundation awards)

♦ "The National Book Awards foundation has long sought to raise the profile of its awards." (The awards have been referred to as "the *other* NBA," a wry reference to the National Basketball Association, in the same spirit that math contests are referred to as "Math Olympics" and those taking part are referred to as "mathletes." The figurative usage of "the Academy Awards of..." is a good example of linguistic piggybacking. It can refer to the most minor of contests: freelance writers and copywriter types who wish to hype their subjects have caught on to the expression, and generative AI will spread it. In twenty-five years or so, of course, the Academy Awards will be a relic of the past, as dead as the Pac 12 in sports, or our current political parties. And good riddance.)

♦ "I was welcomed by so many amazing Black students who look just like me, who have the same dreams and aspirations as me as well." (Daya Brown about Duke University. From "Teen accepted to more than 50 colleges, receives over \$1.3 million in scholarships." She wants to study mass communications or film, and she created her own production company while in high school. "I think a lot of people think that if you're smart, you can't be cool. So I found a way to showcase brilliance [and] still have fun while you're doing it.")

♦ "For Asians, we're seeking more than representation, we're seeking agency. We want to be able to tell our stories and show our characters in all of our splendor and complexity, because that's what it takes for people to actually see us as people... I think Asian Americans are kinda taking charge of our own destiny." (Jeff Yang, author of *Rise: A Pop History of Asia America From the Nineties To Now*. From ABC, GMA, "How movies and TV shows dehumanize and hypersexualize Asian Americans.")

♦ "Lizzo performed...that was amazing..." (Priyanka Chopra.)

♦ "The way they work is, it's very femme-forward, very female-positive. They have an amazing female photographer, Vanessa Beecroft, and you just feel like a million dollars on their set. It just feels very modern and very 'female gaze.'" (Nelly Furtado, about her participation in the Best Of Skims advertising campaign.)

♦ "Mrs. Ramsay's work is to make people magnificent—to make them believe in themselves, make them think they can do anything..." ("We're All Invited to the Lighthouse" by Patricia Lockwood, *The Atlantic*, April, 2023.)

♦ "Clearly in this case, his moral compass doesn't matter. And as much as I believe he's amazing and a good person, even if he weren't, that does not matter because..." (Mr Jefferson Bosela, who quit his job to assume the role of family spokesman, about the "Shooting of Chris Kaba.")

♦ "It's an election year, and Audubon, and its partner organization the Audubon Action Fund, will be working hard across our amazing network of chapters, state office, and nature centers to keep climate and clean-energy legislation at the forefront of people's agendas." (*Audubon* magazine, Winter 2019.)

♦ MORE CONVENTIONAL USAGE: "Well, Carl's amazing." (Wink wink, nudge nudge. Snarky, sarcastic male abuse about a weird underperformer who doesn't fit in. A synonym for the canceled "retarded" or "special." This is a good example of the euphemism treadmill.)

*** analysis

♦ "Amazing" is a cliché used not only for affirmation but also for self-congratulation. In that way it does double duty for many groups.

♦ "Not everything is amazing; and when you think about it, very little is." (Lake Superior State University 2023 Banished Words List—Words banned for "misuse, overuse, and uselessness.")

♦ “Many kills in modern combat are ambushes and surprise attacks in which the enemy represents no immediate threat to the killer, but is killed anyway, without opportunity to surrender... / Until the twentieth century such ambush kills were extremely rare in combat, and many civilizations partially protected themselves and their consciences and mental health by declaring such forms of warfare dishonorable.” (*On Killing* by Lt. Col. Dave Grossman.)

♦ “One day, Klimov and Shaposhnikov had to go right up to the German lines. They climbed over the railway embankment and crept up to a bomb-crater that sheltered a heavy-machine-gun crew and an artillery officer. Pressed flat against the ground, they watched the Germans go about their tasks. One young man unbuttoned his jacket, tucked a red checked handkerchief under his collar and began shaving; Seryozha could hear the scrape of the razor against his wiry, dust-covered stubble. Another German was eating something out of a small flat tin; for a brief moment Seryozha saw his face take on a look of concentrated, lasting pleasure. The officer was winding up his watch. Seryozha felt like asking very quietly, so as not to frighten him: ‘Hey! What time is it?’ / Klimov took the pin out of a grenade and dropped it into the crater... / ‘You’re not a Baptist, are you?’ Old Polyakov once asked this man who had killed a hundred and ten people... / Once Seryozha saw Klimov after he had drunk a captured bottle of schnapps; then he had been quite terrifying—even Grekov had seemed wary of him.” (*Life And Fate* by Vasily Grossman.)

♦ "She was in tears over the abrupt amputation of her social life and turmoil at home." (A high-school senior talking to her school counselor via Zoom. The student's school had been closed due to the Coronavirus pandemic.)

♦ "The arrival of the nurses was the talk of the army, from Scutari to Sebastopol. Florence's name alone supplied the officers with material for heavy-footed jokes. They referred to her simply as 'the bird.' The chief medical officer of the Crimean army, Dr. Hall, summed up the general opinion. 'It is very dull,' he said between his teeth, when told of Miss Nightingale's appointment. / 'I cannot conceive,' an eyewitness later wrote, 'as I now calmly look back on the first three weeks after the arrival of the wounded from Inkerman, how it could have been possible to have avoided a state of things too disastrous to contemplate, had not [Florence] been there.' / 'I am a kind of General Dealer,' [Florence] wrote to Sidney Herbert, 'in socks, shirts, knives and forks, wooden spoons tin baths, ... towels and soap, small tooth combs, precipitate for destroying lice, scissors, bedpans and stump pillows.'" (*Florence Nightingale* by Ruth Fox Hume.)

♦ "6. Conservative Surgery in Compound Fracture of Femur. / The military surgeon [must] determine upon the propriety of amputation in compound fractures of the femur, the result of gunshot wounds. / The authorities, both French and English, teach us not to trust these cases to nature, and broadly state that, in the operation alone, there is hope; but the statistics, both in the Crimean campaign and in our own service, prove that the mortality after amputation is enormous, and force us to consider the propriety of conservative practice in this numerous class of surgical accidents. / In various numbers of the Journal [Confederate States Medical And Surgical Journal] the reader will find many interesting observations bearing upon this question, and we submit at this time a consolidated statement of compound fractures of femur treated without operation, compiled from the records in the Surgeon General's office, from June, 1862, to February 1, 1864, inclusive. We have in this summary, excluded all cases not positively determined, and hence, while the number of observations is greatly reduced, the value of the conclusion is increased in like proportions. / Total number of case, 221—recovered, 116—52 per cent. / Average period of recovery, 104 days—greatest period, 255 days, and least 41 days. Average period where death occurred, 52 days—greatest period, 185 days—least, one day. Average amount of shortening, 1 9-10ths inches—greatest, 5 inches, and least, half an inch. / When we compare directly the results of amputations with the table of cases not operated on, we feel still more disposed to rebel against the authority of Guthrie, McLeod, Larrey, Percy and Dupuytren, and at least hesitate before condemning the shattered limb to instant ablation. Our own statistics are as follows: / 507 cases amputated—250 recovered—50 per cent. / 221 cases not amputated—116 recovered—52 per cent. / The chance for life being more than equal, the value of the leg saved should be considered, and the table throws important light on this point—the average shortening is less than two inches. / Legouest: 1,664 cases amputated—recovered, 123—7 per cent. / 337 cases not amputated—recovered, 117—31 per cent. / Chimborazo Hospital Statistics: 31 cases not amputated—recovered, 19—61 per cent. / These observations prove that whenever, in compound fracture of femur, the result of gunshot wound, there is a doubt as to the propriety of amputation, that we should give the leg the benefit of the doubt—the chances of life being at least equal, and the value of the limb, after recovery, being worth the effort to save it. — Confederate States Medical and Surgical Journal.

♦ 1861-1865. The American Civil War. Doctors knew of ether and chloroform but still lacked an understanding of antiseptic and spread infection with dirty instruments and dressings. "After the Battle of Perryville in 1862, water was so scarce that Union surgeons performing amputations almost around the clock did not wash their hands for two days." (*This Republic of Suffering* by Drew Gilpin Faust.)

♦ "From the stump of the arm, the amputated hand, / I undo the clotted lint, remove the slough, wash off the matter and blood; Back on his pillow the soldier bends, with curv'd neck, and side-falling head; / His eyes are closed, his face is pale, he dares not look on the bloody stump, / And he not yet looked on it." ("The Dresser" by Walt Whitman, 1865. "Slough" would be pronounced, "sluff.")

♦ "Corday also comes across a representative of a new phenomenon, the soldier beggar. Of late it has become usual to see them at restaurants or cafes. They are often wearing medals on their chests, fine medals like the Croix de Guerre, awarded for heroism in the field. They sell picture postcards or sing patriotic songs to collect a little money. / The begging soldier Corday meets on the pavement has an arm missing. He is also drunk. He is meandering through the stream of people, asking one, then another, for a few coppers or for a cigarette at least. And he repeats the same word all the time: 'Peace... peace...'" (*The Beauty and the Sorrow* by Peter Englund. He is writing about World War I.)

♦ In "Seldom Disappointed," the great Tony Hillerman writes about the seemingly callous banter and traditions of badly wounded soldiers on a hospital ward in Europe during WWII. For example, a soldier has his right arm amputated and when he returns to the ward he is greeted by his comrades as "Lefty!" Hillerman makes the point that, while such behavior seems "barbarous," it is, in fact, an antidote to self-pity.

♦ "I never, ever in a million years thought I would do a marathon so now I feel like I could do anything. I really believe you've got to have goals when you're injured like this. I've seen people at the hospital who don't have goals, and they just sit there and slip away." (Army Sgt. John Kieth, after finishing the NYC marathon in a handcycle. An RPG hit his Humvee in Iraq. He was in an induced coma for 2 weeks, and woke up at Walter Reed hospital. Doctors tried to salvage his limb, but after a month Kieth made the decision to have it amputated, after talking to amputees at Walter Reed, who inspired him because they were so active.)

There are said to be one or two a month on the average, and five, then, or twenty persons are sometimes killed or wounded at one of them... A man thinks himself wronged by society—he is in debt and cannot pay—he is taken for a slave or has gambled away his wife or child into slavery—he sees no way of recovering what he has lost... He grasps his kris-handle, and the next moment draws out the weapon and stabs a man to the heart. He runs on, with bloody kris in his hand, stabbing at everyone he meets. 'Amok! ♦ "We probably have crested a peak, this seems to be the analogy of the day, a mountaineering analogy, but the reality is, we've only just begun the descent, and we're still at a very very high altitude, and we know that that descent is going to take us months." (Chris Hobson from NHS Providers, speaking about the COVID-19 pandemic.)

♦ "Göttingen was the scene of Oppenheimer's first real triumph as a young man coming of age. Becoming a scientist, Oppenheimer later remarked, is 'like climbing a mountain in a tunnel: you wouldn't know whether you were coming out above the valley or whether you were ever coming out at all.' This was particularly so for a young scientist on the cusp of the quantum revolution." (An astonishing simile. From *American Prometheus: The Triumph and Tragedy of J. Robert Oppenheimer* by Kai Bird and Martin J. Sherwin.)

♦ "In the months before meeting Oppenheimer, [Lawrence] had conceived the notion of building a machine capable of penetrating the so far unassailable nucleus of the atom, which existed, he quipped, 'like a fly inside a cathedral.'" (Another astonishing simile from *American Prometheus: The Triumph and Tragedy of J. Robert Oppenheimer* by Kai Bird and Martin J. Sherwin.)

♦ "Roosevelt upped the total to \$10 million on the condition that Finland would not directly purchase arms with it. This 'was like offering a clean shirt to a man asking for a square meal...'" (The Russo-Finnish Winter War of 1939-40.)

♦ "Eliot's words are everywhere, in other words. The more closely you map 'The Waste Land,' the more it assumes the shape of an isthmus; so much of the past, both public and personal, streamed into its making, and so much has flowed from it ever since." ("On The Rocks: A hundred

years of 'The Waste Land,'" by Anthony Lane, *The New Yorker*, October 3, 2022. An isthmus connects two larger pieces of land. By this wonderful analogy, the larger pieces of land are the past and the present.)

♦ "Swooping curves agree with short brushstrokes about as well as an airplane wing agrees with drag."

♦ "[Masterclass] is to a medical degree what an apple is to an orange planet." ("What Is MasterClass Actually Selling?" by Carina Chocano, *The Atlantic*, September 2020. A wonderful example of an analogy focusing on how two things are NOT similar.)

♦ The destruction of the Armenian cemetery in Julfa has been likened to the Taliban's destruction of the Bamiyan Buddhas. (Cultural crimes against humanity. In the media, the extinguishment of Nagorno-Karabakh and the lives of its 120,000 inhabitants ("2023 Azerbaijani offensive in Nagorno-Karabakh") was barely mentioned, submerged by the ongoing "Russian invasion of Ukraine," just as the Russian invasion of Ukraine was submerged by the Israel-Hamas war.)

♦ "I went to math camp when I was fourteen and came home clutching a Rubik's Cube to my chest... I majored in math in college and went on to get my PhD..." (Cathy O'Neil, author of *Weapons Of Math Destruction: How Big Data Increases Inequality And Threatens Democracy*. Chapters are titled: Bomb Parts; Shell Shocked; Arms Race; Propaganda Machine; Civilian Casualties; Ineligible To Serve; Sweating Bullets; Collateral Damage; No Safe Zone; and The Targeted Citizen. The New York Times Book Review deservedly praised her for her "gift for analogy.")

♦ The book was destined to be for anatomy what Copernicus' work was for astronomy. (Structure of the Human body by Vesalius and De Revolutionibus by Copernicus.)

♦ "Ray and Linnaeus would accomplish for all plants and animals what Mercator and his fellows did for the planet's whole surface."

♦ "Just as the map-makers of the earth started from the self-evident boundaries of land and sea, mountains and deserts, the naturalists, too, found self-evident units among plants and animals."

♦ "What the herbals did for botany the bestiaries did for zoology."

♦ "This dream...is to pedagogy what the perpetual-motion is to physics: always wished for, endlessly proposed, and never demonstrated." (Education and its fads.)

♦ "Latitude and longitude were to the measurement of space what the mechanical clock was to the measurement of time."

♦ "The Atchafalaya Basin is a swampy wilderness that is to crawfish what the Serengeti is to lions." (Calvin Trillin.)

♦ "The incursion in Lebanon in 1982 was to Israel what Vietnam was to the United States." (According to Major M. Thomas Davis, 1985. "W was to X what Y was to Z.")

♦ "But what Sir William Harvey was to physiology, Tyson would be to comparative anatomy."

♦ "The effect which Newton's discoveries had in mathematics, Johnson's work had in this world of words."

♦ "What Portugal was for adventurers in geography, Italy was for history, and Florence was the Sagres." (A triple analogy. Sagres was the port from which Henry the Navigator sent out ships to sail south along the West coast of Africa.)

♦ "We're not going to get rid of porn any more than we're going to get rid of Disneyland even if we don't like the princess trope and that happily-ever-after motif." (Shira Tarrant.)

♦ NPR's Mary Louise Kelly: "Is it correct to say the World Baseball Classic is to Baseball what the World Cup is to soccer?" / Tom Goldman: "It is. Yeah."

♦ Mary Louise Kelly: "All right, with that analogy in mind, we'll leave it there. TV critic Eric Deggans, thank you." (The analogy Deggans had used was, "It's like trying to change the tire on a car while it's running.")

♦ "He has the charm and personality of a rusty nail." (A tennis fan about a famous tennis player.)

♦ "The gaudy, vertiginous fairground ride of a play..." (A favorable review.)

♦ "Frustrating. England trying to string a few passes was like trying to eat paella with your elbows." (An online commenter, following England's loss to Spain in the final of the Fifa 2023 Women's World Cup.)

♦ "The phenomena are always of the same kind. The miners are either immediately destroyed by the explosion, and thrown with the horses and machinery through the shaft into the air, the mine becoming as it were [an enormous piece of artillery, from which they are projected..." (On the Safety Lamp for Coal Miners, with Some Researches into Flame by Humphry Davy, 1818.)

♦ "If we are also able to build a brain scanner that can capture the state of every synapse at a given moment—the pattern of information that neuroscientists call the connectome, a term analogous with genome—then we can upload that pattern into a brain-emulating computer. The result will be, for all intents and purposes, a human mind. An uploaded mind won't dwell in the same environment as we do, but that's not necessarily a disadvantage..." ("The End of Us: Is the reign of human beings on Earth nearing its end?" by Adam Kirsch, *The Atlantic*, January / February 2023.)

♦ "Comparing the men's and women's game is crazy." (An online commenter about the Fifa 2023 Women's World Cup.)

♦ "Why doesn't Rosen compare Laudor's story to Elyn's? Two Jews who developed schizophrenia and went to Yale Law School; one murdered his partner and the other won a MacArthur genius grant. This reflects a larger failure in Rosen's article..." (*The Atlantic*, July / August 2023.)

♦ "Fed up with the BBC and other outlets reminding us of 1966. It might as well be 1066. Meaningless." (An online commenter about the hype surrounding England's "Lionesses," defeated by Spain in the final of the Fifa 2023 Women's World Cup. To which one reply was, "We lost in 1066 to the French," the reply to that being, "Normans." Perhaps a "reply too far.")

♦ "Like many concerned keepers of the game and its traditions, Sword will often explain the creeping dispassion for baseball in terms of that overcooked analogy about the boiling frog in the pot. 'Part of what made this so tricky was that the games were getting two or three minutes slower every year rather than half an hour slower, so there was never a point where it felt like a real emergency,' he told me. I offered an alternative analogy, comparing baseball's predicament to a slow-growing tumor that the new rules would surgically excise. 'I'd prefer to go back to the frog,' Sword said. / How did America's beloved old frog find itself in such mortal danger...?' ("How Baseball Saved Itself" by Mark Leibovich, *The Atlantic*, July / August 2023.)

♦ Camille Vasquez: You also wrote, quote, "Imagine a powerful man as a ship, like the *Titanic*. That ship is a huge enterprise. When it strikes an iceberg, there are a lot of people on board desperate to patch up holes—not because they believe in or care about the ship, but because their own fates depend on the enterprise." (Taps microphone to illustrate the point.) In this op-ed, you're saying Mr. Depp is a ship, right? / Amber Heard: I'm making an analogy to a powerful man as a ship. / CV: The powerful man you're referring to in this analogy is Mr. Depp, right? / AH: Uh, I was talking about a bigger issue actually than just Johnny... / CV: The iceberg is you in this analogy, right, Miss Heard? / AH: (Obviously surprised) Um, I would not say that, I hadn't, I had not... (exhales) That was not what I intended, no. (The Amber Heard-Johnny Depp trial.)

♦ Anastasia Tsioulcas: "The prosecution asked a defense witness...about an org (organization) chart he had made of Kelly's company. It was illustrated like a cartoon octopus, and, in retrospect, that was a pretty unfortunate metaphor for a man accused of running an enterprise intended to lure victims into sex crimes." / Noel King: "That's a really vivid image, isn't it." / Anastasia Tsioulcas: "It really is." ♦ “I asked her what had struck her most about the poem. ‘The landscapes,’ she said, without hesitation. ‘The rocks and the rivers. All that dryness.’ Not for her the unreal city, or the mob of languages, but a natural world under clear and present threat. “The Waste Land,” in short, can speak to the ecological dread of her generation as it spoke to the social and political anxieties of those who had weathered the First World War. The poem, which is prefaced with the words of a Sibyl, is fated to tell each of us, from one era to the next, whatever it is that we most fear to hear.” (“On The Rocks: A hundred years of ‘The Waste Land’” by Anthony Lane, *The New Yorker*, October 3, 2022.)

♦ “For me, personally, I wanted to support the students, and the younger generations, I have empathy for what they’re going through.” (“Community member Victoria Van Holder holding a sign offering “free hugs.” From “A year after Michigan State University shooting, museum has preserved memorial items” by Sophia Saliby, NPR, *All Things Considered*, February 13, 2024. See the Wikipedia entry “2023 Michigan State University shooting.”)

♦ “I watched the Mom do an interview once, and she stated her daughter has anxiety over climate change. That family is a bit of a mess.” (An online commenter about “Rep. Katherine Clark’s transgender daughter Riley Dowell sentenced for assault on Boston cop” by Victor Nava, *New York Post*, May 3, 2023.)

♦ "Hunger was now torturing us. The Cossacks sat gloomily round the fire and hardly spoke. Several times I asked Dersu how we had taken the wrong trail, and were we on the right road. He answered that he had never been in this district before, that he had nothing to go by and, like me, could only guess. Hoping to forget their hunger a little, the men tried to sleep. I lay down too, but could not sleep. Anxiety and doubt tormented me. If we did not manage to kill something tomorrow, or reach the Iman, things would be desperate indeed. In the summer a man can carry on without food for several days, but in the winter hunger kills quickly." (*Dersu* by V. K. Arseniev.)

♦ "On the morning of the 28th of June, 1914, when Archduke Franz Ferdinand and his wife Sophie Chotek arrived here, at Sarajevo railroad station, Europe was at peace. None of the European great powers had been at war with each other for over 40 years... / The July Crisis of 1914 was a 'Month of Madness', not because the men who made it were themselves mad, but because its outcome was completely catastrophic and completely unnecessary... The repercussions of the assassination—

comparable to the effect of 9/11—exemplify the transformative power of a terrorist event. But the murders were not a pretext for a war decided in advance—nor did they make conflict inevitable.” (Christopher Clark, BBC, “Month of Madness,” 23 June 2014.)

♦ “The nineteen-year-old student [Gavrilo Princip], a Bosnian recruited by Serbia’s Black Hand terrorist movement, could not believe his luck. He had been standing on Franzjosefstrasse, bareheaded in the early summer sunshine, depressed over the failure of a comrade, Nedeljko Čabrinović, to kill the royal couple with a grenade earlier in the day. Then he saw their open-top car take a wrong turn off Appel Quay and pass right by him. The lethal logistics that seem to operate at such moments had transformed error into opportunity. Two point-blank targets presented themselves, and Princip’s gun did what it was designed to do.” (*Colonel Roosevelt* by Edmund Morris.)

By the time of Isabella's death in 1504 there had been more than 2,000. / Less than three months after the capitulation of Granada, the Queen felt strong enough to push her policy further. Encouraged by her Inquisitor-General Torquemada—who was himself originally Jewish—on 30 March she decreed that all Jews remaining unconverted by the end of June would be expelled from Spain, all their property confiscated. More than 100,000 were driven out, resulting in a vast Sephardic diaspora in northern Europe and the Near East. ♦ The basketball player Angel Reese was nicknamed the "Bayou Barbie" when she went to play at Louisiana State University, because of her eyelash extensions and pink fingernails. She liked the nickname.

♦ "In the fall of 2008, Thompson completed her first run as an NFL sideline reporter. During the season, Thompson dyed her hair black to 'rid [herself] of the Barbie thing,' as she is notably blond." (The Wikipedia entry "Charissa Thomson," for the host and sportscaster. After much male commentary, she switched back to being a blond. Years later, she would admit that during this period she made up stories to tell on camera. Her contemporary female critics who now charge her with giving credence to the stereotype that sideline reporters are just "eye candy" should be a bit more sympathetic, considering the times.)

♦ "I was not allowed to play with Barbies as a kid. I was a pastor's kid, so Barbies were exiled. But now I get to be my free authentic self in the city." (Prima Love—he, she, they—a drag queen and New Jersey native, about her appearance at the Malibu Barbie Beach Party show at NYC's restaurant Peachy Keen, capitalizing on the opening of the 2023 film *Barbie*.)

♦ "So they make a movie 'Barbie' and then a good-looking blond woman walks by and some guy says, 'Hi Barbie.' Then he gets fired... [L]et's not get hung up on calling someone 'Hi Barbie' while the Hollywood industry makes its wealth on this movie." (An online commenter about "Sports

("Elon Musk To Analysts: Stop With The 'boring, Bonehead Questions' on Tesla" by Avie Schneider, NPR, The Two-Way, May 3, 2018.)

♦ "Wilson's project is basically a progressive one: to scrape away all the centuries of verbal and ideological buildup—the Christianizing (Homer predates Christianity), the nostalgia, the added sexism (the epics are sexist enough as they are), and the Victorian euphemisms—to reveal something fresh and clean. Why call them 'handmaidens' when they were slaves? Why insist, as so many translators do, on 19th-century diction when that time had no more in common with Homer's than ours?" ("Emily Wilson's 'Odyssey' Scrapes The Barnacles Off Homer's Hull" by Annalisa Quinn, NPR, Book Reviews, December 2, 2017.)

♦ "If it's true that the show of emotion is the greatest show on earth, then Thompson is a Barnum & Bailey of both pain and joy. Her portrayal of grief in 'Love Actually' (2003), for instance, has become iconic in British popular culture." ("Acting Up: Emma Thompson's third act" by John Lahr, *The New Yorker*, November 14, 2022.)

♦ "At his first spectacle, in 1835, showman Phineas Taylor Barnum touted Joice Heth as George Washington's 161-year-old nursemaid. Crowds came gawking to see 'the greatest natural & national curiosity in the world.' Barnum profited from the public's hunger for entertainment by planting embellishments and lies in newspapers..." ("Why We Lie," *National Geographic*, June 2017.)

♦ "The 1870s and 1880s were the height of the controversial but enormously popular 'side shows' in America. Hucksters like P.T. Barnum attracted huge throngs by booking fire-eaters, sword swallowers, and 'freaks' with assorted medical abnormalities, some bogus, others disturbingly real. There were the 'Wild Men of Borneo' (actually two mentally disabled dwarfs from Ohio), 'Jo-Jo the Dog-Faced Boy' (suffering from hypertrichosis, a profusion of body hair), 'General Tom Thumb' (the world's smallest human), eight-foot giants, bearded ladies, Siamese twins, and people with humongous body tumors attached to their back, face, and scrotum..." (*Bellevue: Three Centuries of Medicine and Mayhem at America's Most Storied Hospital* by David Oshinsky.)

♦ "[Harvey] Leach, who was often billed as the 'shortest man in the world,' had made a name for himself as a performing oddity. In addition to his small stature, one of his legs was eighteen inches long while the other measured twenty-four inches, and when he walked, his arms brushed against the ground like an ape's. According to one of his contemporaries, Leach appeared 'like a head and a trunk, moving about on castors.' / Leach's strange appearance attracted the attention of the American showman and hoaxer P. T. Barnum, founder of the Barnum & Bailey Circus. Barnum dressed the dwarf in the skin of a wild beast and covered the walls of London with placards that read, 'What Is It?' Unbeknownst to Barnum, Leach was so recognizable at that point in his career that people guessed the true identity of this mysterious 'beast' within days. Despite this initial bungle, Barnum retained Leach as a performer, until the forty-six-year-old man died as the result of an injured hip that had become infected." ♦ "His worship of the sun began when he was a school-boy in the eighteen-eighties on the shores of the Lake of Neuchatel. He was the pale son of a bookish professor and from his first year in school he didn't like the way the brown-faced farmer boys could lick the tar out of him. 'They were flagrantly superior to me,' Rollier said. From then on he

began bathing his bare body lying like a lizard in the sun, began turning himself into an Indian." (Men Against Death by Paul De Kruif. From Chapter 11, "Rollier: The Sun Doctor." Dr. Auguste Rollier was an exponent of heliotherapy for the treatment of tuberculosis. See the Wikipedia entry "light therapy" and the picture captioned, "Child patients with external forms of tuberculosis, especially of the bones and joints, laying [sic] on beds on a terrace outside Treloar Hospital in Alton, Hampshire, England, in sunlight as part of their light therapy, ca. first half of the 20th century.")

♦ Lake Bled in Slovenia is a place where people came to therapeutically "bask" in the sun. Such practices are associated with the Swiss healer Arnold Rikli.

♦ A basket case is a person who has had all limbs amputated. Its date of inclusion in dictionaries—1919—means it probably references soldiers severely wounded in World War I.

♦ "I do think it's important that we can instill confidence in our veterans because whether they're from a big city or a small town, they probably don't have anybody around them that's like them. For me personally, I don't see a lot of amputees whatsoever, especially no quadruple amputees. But I'm very confident in myself and my abilities, where we bring people in here and we give them a network to reach out to other families that have the same situation that they go through every day and let them know that here's some tricks or adaptive sports or things you can do as a family to make you feel like you're still a part of everything, you can still keep going." (Army Staff Sgt. Travis Mills. "Soldier who lost four limbs opening retreat to help others," AP. In the article, he is quoted as saying, "I don't look at myself and pity myself. I tell people to never give up, never quit, and to always keep pushing forward." See his Wikipedia entry, Travis Mills (soldier).)

♦ "We all got our daily battles, right?"

♦ "She's fighting a battle between the book and a bottle of Scotch. And the Scotch is winning." (Tom Rodney, Sr., about Nelle Harper Lee.)

♦ "We fight hard, we play for keeps, we take no prisoners. We'll get in the trenches and fight dirty." (Greg Pruett, president of the Idaho Second Amendment Alliance, a gun-rights group. Politics.)

♦ "Marines don't fight wars, they fight battles." (A Marine captain, Marjah, Afghanistan, 2010.)

♦ "With human corpses, human excrement, and rotting rations scattered across Peleliu's ridges, the blow flies or bluebottle flies underwent a population explosion. Those nasty insects were so large, so gluttoned, and so lazy that some could scarcely fly... It was revolting, to say the least, to watch big fat blowflies leave a corpse and swarm into our C rations... Each morning, just before sunrise, when things were fairly quiet, I could hear a steady humming sound like bees in a hive as the flies became active with the onset of daylight. They rose off the corpses, refuse, rocks, brush, and wherever else they had settled for the night like a swarm of bees. There numbers were incredible." (*With the Old Breed* by E.B. Sledge.)

♦ There was an all-pervasive stench of putrefaction and millions of fat blowflies filled the air. Even Junger, normally so cool, was shaken by what he saw. 'The ploughed-up battlefield was a scene of horror. The dead lay there among the living defenders. When we dug bunkers we saw how the dead lay in layers one above the other. One company after another had been mown down as they made a stand shoulder to shoulder under the drum fire; then their corpses had been buried under the tons of earth hurled up by the projectiles and new men had taken the place of the fallen.' (*The Beauty and the Sorrow* by Peter England.)

♦ Years ago they had marched thousands of miles to legendary battlefields... they had once gone to the ends of the earth and seen beyond the farthest horizon... We looked at these men in blue, existing in pensioned security, honored and respected by all... and we were in awe

of them. Those terrible names out of the history books—Gettysburg, Shiloh, Stone's River, Cold Harbor—came alive through these men. They had been there... and to watch them was to be deeply moved." (*Waiting for the Morning Train: An American Boyhood* by Bruce Catton.)

♦ "Byron visited; so did the Wordsworths—twice—and the architect and collector John Soane and thousands of others. They carried away skulls—Sir Walter Scott had one—and fingers and teeth and bullets and cannon balls... A century later such battlefield tourism would flourish even if its more gruesome collecting tastes were suppressed." (The site of the Battle of Waterloo, in Belgium. (*Waiting for the Morning Train: An American Boyhood* by Bruce Catton.)

♦ "People who visit Verdun, the battlefield of Borodino or Malakhov Kurgan at Sebastopol must find it equally strange to find children playing, women doing their washing, carts full of hay and old men carrying rakes. Columns of French soldiers and trucks covered in tarpaulins once passed over fields that are now full of vines; now there is only a hut, a few apple trees and some kolkhoz sheep where Murat's cavalry advanced, where Kutuzov sat in his armchair and ordered the Russian infantry to counter-attack with a wave of his tired hand. Nakhimov stood on a mound where now there are only chickens and a few goats searching for blades of grass between the stones; this is where the flash-bombs described by Tolstoy were launched, where English bullets whistled and wounded soldiers screamed." (Alexandra Vladimirovna Shaposhnikova visits the ruins of her house in the immediate aftermath of the Battle of Stalingrad to find queues of women, small huts, old men unloading planks, shirts hanging up to dry, etc. *Life And Fate* by Vasily Grossman, New York Review Books, translated by Robert Chandler.)

♦ The linguist John McWhorter has interesting things to say about this word (as always), including the way we pronounce it. "[I]n one of those snappy, naughty little pre-Production Code movies (*Skyscraper Souls*, 1932), someone disparages someone else for wanting to be a 'big SHOT,' not a 'BIG shot.' The expression was newer then—someone at the time was still referring, on some level, to an actual shot in the sense of a gunshot or cannon shot. Note that we today would rarely even think of big shot as referring to a shot..." "butcher's bill"
the Duke of Wellington used to call it the ~ (casualties)

butcher's bill to be paid
there's a ~, and it accrues to bin Laden (embassy bombings)

♦ "At the beginning of the Battle of the Somme, on July 1, 1916, the British Army suffered 60,000 dead and wounded—in one day. It was arguably the worst butcher's bill in military history." ("Why World War I Resonates," by William Boyd, *The New York Times*, Jan. 21, 2012. By contrast, the Battle of Shiloh, the bloodiest battle of the Civil War up to that time, resulted in 23,000 casualties in two days and shocked the nation.)

♦ "Everyone was stunned by the scale of carnage at Shiloh (in spring of 1862 in southwestern Tennessee), which posted a new benchmark for mass slaughter. Deeming it the war's bloodiest battle, Grant commented 'that the Fort Donelson fight was, as compared to this, as the morning dew to a heavy rain.' Men who survived it could never scrub its harrowing imagery from their memories. Americans found it hard to comprehend the dimensions of the losses, which were beyond any historical precedent. Of more than one hundred thousand soldiers who pitched into the fray, twenty-four thousand had been killed or wounded [or captured or were missing]—a casualty count dwarfing that of the battle of Waterloo. Shiloh's casualties eclipsed the total of the Revolutionary War, the War of 1812, and the Mexican War combined. William Hillyer conveyed the spreading tableau of death that greeted him and Grant: 'For miles and miles wherever we rode we found dead bodies scattered through the woods in all directions.' As Grant wrote memorably, 'I saw an open field...so covered with dead that it would have been possible to walk across the clearing, in any direction, stepping on dead bodies, without a foot touching the ground.' / Shiloh peeled away any lingering aura of romance from the war, showing the sheer destructive power of modern combat. An array of technical advances, such as the conical minie ball that ripped through flesh and bone or rifled muskets and cannon that displayed greater accuracy and range, ensured bloodier battles than ever before. No less hardy a soul than Sherman remarked that the corpse-littered battlefield 'would have cured anybody of war.' Combat had been pushed to extremes of cruelty that banished any remnant of civilized behavior. 'Men lost their semblance of humanity,' wrote a reporter, 'and the spirit of the demon shone in [the soldiers'] faces. There was but one desire, and that was to destroy.'" (*Grant* by the brilliant biographer Ron Chernow. The death toll would be eclipsed in later Civil War battles. As with most wars, the human carnage made it impossible for either side to negotiate a settlement.)

♦ William Tecumseh Sherman: Well, Grant, we've had the devil's own day, haven't we? / Ulysses S. Grant: Yes. Lick 'em tomorrow though.

(The night of the first day of the Battle of Shiloh. From *Grant* by Ron Chernow.)

♦ "An army's bravest men are its cowards. The death which they would not meet at the hands of the enemy they will meet at the hands of their officers, with never a flinching." ("What I saw of Shiloh" by Ambrose Bierce. Union soldiers executed for cowardice.)

♦ "The Gulf War was 30 years ago and we're still there messing around. I don't know what the answer is but the people who profit sure aren't paying the bills." (Kbbpll, March 3, 2021, about the rocket attack on al-Asad airbase, March 3, 2021.)

(Ice hockey broadcaster Seth Bennett, about the interest in neck guards following the death of hockey player Adam Johnson in Sheffield, England, after his neck was slashed by Matt Petgrave.)

♦ "However, it was not long before he learnt the reason of all this, for he perceived that other people had an advantage over him and that his brothers and sisters were able to do things that he could not do and to tackle things that he could not. He felt that his mother permitted his brothers and sisters to do things that were forbidden to him. This aroused, at first, a feeling of resentment, but ere long his feeling of resentment turned to a silent, but heartfelt, grief—when he heard his brothers and sisters describing things about which he had no knowledge at all. / Then he knew that they saw what he did not see." (*An Egyptian Childhood* by Taha Hussein, translated by E.H. Paxton, from *The Days*, the American University in Cairo Press.)

The “bootcamp” is also referred to as a retreat.)

◆ “What happens when you take some of the most powerful people in America—federal judges—and you teach them economics? / In the 1970s, an academic named Henry Manne had a radical idea. He wanted to show judges the power, the clarity, the logic of economics. So he invited the judges on trips to fancy resorts—all expenses paid—where they would mingle and take lessons from famous economists...” (“Econ’s Brush with the Law,” NPR, Planet Money, September 23, 2022. At one point, the presenter uses the term, “econ bootcamp.” The intensity and total immersion, the reshaping of an individual, and the relatively short duration is what such a “boot camp” has in common with a real one. Everything else... Not so much!)

◆ The Congressional Boot Camp on AI is run by the Stanford Institute for Human-Centered AI (HAI). It’s a 3-day course, at the end of which participants—many of them Congressional staffers—receive a Stanford University certificate of completion.

◆ “So we went after those kids from the very beginning, many basic math skills. The multiplication table, 1 through 15 became a way of life for them every single day, starting at 10 o’clock until 2, it was all algebra, algebra, algebra, basic math, basic math, basic math.” (Daryao Khatri, a physics professor at the University of the District of Columbia. From “Professor Launches Academic Boot Camp,” NPR, Tell Me More, May 7, 2014.)

◆ “A four-day “application boot camp,” run by a company called Top Tier Admissions, costs \$16,000 (plus room and board). During the sessions, the high school juniors develop their essays, learn how to ‘ace’ their interviews, and create an ‘activity sheet’ to sum up all the awards, sports, club activities, and community work that admissions officers are eager to see.” (*Weapons Of Math Destruction* by Cathy O’Neil.)

♦ "We don't know precisely what the predicate was but we sure have a whole lot of bread crumbs that led to this moment." (NPR's David Folkenflik about the firing of Don Lemon by CNN.)

♦ A breadcrumb trail is an allusion to the fairy tale of Hansel and Gretel. The children's horrid mother wished to get rid of them in a time of famine.

She led them deep into the forest but the kids were able to return home by following a trail of small white stones they had dropped along the way. The second time, they had no time to collect stones, so they dropped crumbs of bread. But the birds ate the crumbs, and the kids were lost. They eventually come to a gingerbread house where a cannibal witch imprisoned them...

in the morning I was nervous like a ~ (prior to combat)

♦ "In the morning I was nervous like a young bride. I hadn't been in combat for 20 years. The first battle is no joke. But now I have confidence in my regiment and I feel happy. Very happy." (Brigade Commander Serpilin. From *The Living and the Dead* (1964 film) directed by Aleksandr Stolper based on the 1959 novel *The Living and the Dead* by Konstantin Simonov. Simonov, the great Soviet war correspondent, poet, and novelist, is famous for his poem "Wait for Me." It became a talisman for millions during World War II: it was reprinted, hand-copied, memorized, recited, and carried in pockets by millions of soldiers and civilians alike. "Wait for me and I'll return, only wait very hard... / Only you and I will know how I survived; / It was because you waited as no one else did.")

♦ "When old soldiers see reserves being moved up to the front, they say, 'It looks like a wedding.'" (*Life And Fate* by Vasily Grossman. Part One, section 53. Like Konstantin Simonov, Grossman was a war journalist.)

♦ A FUNNY CARTOON. Willie and Joe are lying prone behind rocks with their rifles pointed towards the smoking ruins of a deserted Italian or French village. An exhausted Joe is saying to Willie, "Let B Comp'ny go in. They ain't been kissed yet." (*Up Front* by Bill Mauldin, World War II. Mauldin wrote, "Most people in Italy and Sicily gave us a rousing welcome in all their towns and cities, but nowhere was there such excitement as in Rome. We got awful cynical about it, because the enthusiasm seem to stop, and the complaints seemed to start, twenty-four hours after everybody was kissing everybody else. When were we going to bring shoes and food and clothes and phonograph records? Who was going to pay for Uncle Antonio's bombed vino shop, and why did we have to shell Aunt Amelia's ristorante?" Bill Mauldin survived World War II. Ernie Pyle did not.)

♦ "My goodness gracious, Squib, you should have seen yourself!" he told me some time later. "You popped out of that dust cloud as white as a rat in a flour barrel, and with the silliest expression on your face... like a girl who's just been kissed for the first time.' / If kiss it was, then it was very nearly the kiss of death. Seven men were wounded by the explosion and two killed. We survivors had been incredibly lucky." (*And No Birds Sang* by Marley Mowat. Italy. World War II.)

♦ cherry A 'cherry' is American military slang for a new arrival, a soldier who had not yet experienced combat in Vietnam. (Glossary of Vietnam War terms.)

♦ "The linkage between sex and killing becomes unpleasantly apparent when we enter the realm of warfare. Many societies have long recognized the existence of this twisted region in which battle, like sex, is a milestone in adolescent masculinity. Yet the sexual aspects of killing continue beyond the region in which both are thought to be rites of manhood and into the area in which killing becomes like sex and sex like killing." (*On Killing* by Lt. Col. Dave Grossman.)

♦ This echoes the title of the great 1977 Richard Attenborough film about Operation Market Garden during World War II. Its meaning is to overreach. The actual operation was a noble and heroic attempt to end the war early. It nearly succeeded. The unintended consequences were horrible, however, in the parts of Holland that weren't liberated: they included the Dutch famine of 1944-1945. Market Garden started September 17, 1944. Anne Frank was apprehended on 4 August 1944, and she died in Bergen-Belsen, perhaps in March, 1945.)

A just or unjustly ruined reputation, poverty, fatal circumstances, adversity—they are what make men prisoners. And the prison is also called prejudice, misunderstanding, fatal ignorance of one thing or another, distrust, false shame. One cannot always tell what it is that keeps us shut in, confines us, seems to bury us, but nevertheless, one feels certain barriers, certain walls. Such a man does not always know what he can do, but he feels by instinct: Yes, I am good for something; my life has an aim after all; I know that I might be quite a different man! There is something inside of me; what can it be? / Do you know what frees one from this captivity? It is..." (*Dear Theo: The Autobiography of Vincent Van Gogh*, Edited by Irving and Jean Stone.)

♦ Florence Nightingale was known as “the Lady with the Lamp.” She was not, in fact, a nurse. She was an administrator, logistician, statistician, advocate, reformer, founder, writer, etc. And beloved by all those to whom she administered “stump pillows.” There’s a collocation for you.

♦ “She became the center and the hope of the sick men’s lives. Their letters home were filled with her, and through these letters her name became a byword in thousands of English homes. ‘What a comfort it was to see her pass even,’ wrote one of her men, in the most famous of all letters about Florence Nightingale. ‘She would speak to one and nod and smile to as many more; but she could not do it to all, you know. We lay there by hundreds. But we could kiss her shadow as it fell, and lay our heads on the pillow again, content.’ / This was the passage that inspired the American poet Longfellow to write the poem on which the popular image of Florence Nightingale is based: Lo! in that hour of misery / A lady with a lamp I see / Pass through the glimmering gloom, / And flit from room to room. / And slow, as in a dream of bliss, / This speechless sufferer turns to kiss / Her shadow as it falls / Upon the darkening walls.” (From *Florence Nightingale* by Ruth Fox Hume.)

♦ "As a Black woman, I see things through color... race is a lens for me, and it's a lens that my children experience as well and I think for someone to say, "Well, I don't see skin color, I just see who you are," I think you're leaving out a really big part of who I am, you're leaving out my cultural capital." (Gina Parker Collins, founder of RIISE. From "The Trials of Critical Race Theory," CBSN Originals.)

♦ "Others, though, suggest that the humanities' loss of cultural capital has been hastened by the path of humanities scholarship itself... Now, you might write a paper about how the text enacts a tension by both constructing and subtly undermining the imperial patriarchy through the descriptions of landscape. What does this have to do with how most humans read?" ("The End Of The English Major" by Nathan Heller, *The New Yorker*, March 6, 2023.)

♦ "Wokeness is not just a social philosophy, but an elite status marker, a strategy for personal advancement. You have to possess copious amounts of cultural capital to feel comfortable using words like *intersectionality*, *heteronormativity*, *cisgender*, *problematize*, *triggering*, and *Latinx*..." ("How The Bobos Broke America" by David Brooks, *The Atlantic*, September 2021.)

♦ "Jackson believes that social media, a gathering threat for many years, tore open our collective reality in 2020; it created 'an alternate universe' in which identity-based suffering—or merely the claim to such, however implausible or vicarious—could be converted into social capital. In the theater world in particular..." ("The Radical Self-Awareness of Michael R. Jackson" by Thomas Chatterton Williams, *The Atlantic*, March 2024.)

◆ "The NAACP said that it was problematic... but, if you're looking at the Zulu Club within the tradition of masquerading and masking, painting one's face is a part of Carnival, or it's a part of a masquerade, and the Zulus will say that they could not afford masks. It was cheaper and it was accessible for them to actually paint their faces black... I mean, it's a caricature, it's Mardi Gras, it's like everything is exaggerated, if you look at even Mardi Gras Krewe's that are traditionally white, they also have these caricatures of white people and European features, and so, it's an exaggeration. And while it's connected to minstrelsy historically, I think that it was more rooted in this idea of a masquerade, a mask. People are really dismissive [of outsiders protesting the Zulus' black face], to be honest with you. I think that New Orleans understands New Orleans' traditions. The city has been very insular, right? A lot of our traditions have just existed without the participation and the scrutiny of people outside of New Orleans, and so I think that for the average black person in New Orleans, including those members of my family, they just simply do not connect the Black Face in Zulu with minstrelsy or making a mockery of black people and most certainly are not looking at it as an offensive tradition." ("In New Orleans, The Fight Over Blackface Renews Scrutiny Of A Mardi Gras Tradition," NPR, All Things Considered, 3 March 2019. The Zulu Club was founded in 1909.)

♦ "Mothers and children trapped in poverty in our inner cities, rusted out factories scattered like tombstones across the landscape of our nation, an education system flush with cash but which leaves our young and beautiful students deprived of all knowledge. And the crime, and the gangs, and the drugs that have stolen too many lives and robbed our country of so much unrealized potential. This American carnage stops right here and stops right now." (President Trump, from his inaugural address, Friday, January 20, 2017. NPR's Mara Liasson characterized Trump as "bitter," "bleak," "dark," "divisive," "hard-edged," and "negative." Listen to "How Trump's Inauguration Speech Compares To His First Year In Office" by Mara Liasson, NPR, All Things Considered, January 18, 2018.)

♦ "The word carnage moved up to us through Italian and French from the Latin term *carnaticum* signifying "flesh" or "meat." Once carnage meant the time for eating meat and was also the name for the flesh thrown to the dogs after a hunt. Later on, the word was applied to the heaps of carcasses on a battlefield, finally to any massacre or butchery." (*Word Origins And Their Romantic Stories* by Wilfred Funk, Litt.D.)

*** **military**

♦ "Nearly the whole of the Highland wounded were destroyed by the butt-end of the musket, or the bayonet. On the day after the battle, the houses of the peasantry were searched, and every wounded Highlander who could be found was dragged out and murdered in cold blood. To be found wearing tartan was sufficient to ensure death. In one place seventy-two were butchered together. In another, forty were enclosed in a hut, which was then fired, and all within were burned to death. The whole road to Inverness was strewn with the bodies of the slain..." (*British Battles On Land and Sea* by James Grant. Culloden, 1746. "Such is the story of Culloden, happily the last battle fought on the soil of Great Britain.")

♦ "John J. Hardin, an Indiana volunteer, found it 'dreadful...to see the poor soldier just thrown in a ditch and covered over without any box.' / Burials like these dehumanized the dead and appalled many of the living. A Union chaplain observed that in pit burials bodies were 'covered over much the same as farmers cover potatoes and roots to preserve them from the frost of winter; with this exception, however: the vegetables really get more tender care...' Frequently, corpses were quite literally naked... Soldiers desperate for clothing robbed the dead... and thieves and scavengers appeared on battlefields immediately after the end of hostilities... / Soldiers worried that the piles of dead might include those still living, unable to speak..." (*The Republic of Suffering, Death And the American Civil War* by the great American historian Drew Gilpin Faust.)

♦ "On Sept. 19, 1862, just two days after the Battle of Antietam, Alexander Gardner, an employee of the photographer Mathew Brady, began documenting the battle's grim aftermath. One of Gardner's photographs, titled 'Dead Horse of Confederate Colonel: both killed at Battle of Antietam,' depicted a milky-white steed lying on the field in an eerily peaceful repose...[The Horse] very likely belonged to Colonel Strong, and it became something of a landmark among the Union soldiers left on the field because of its strangely peaceful appearance. Gen. Alpheus Williams wrote, 'The number of dead horses was high. They lay, like the men, in all attitudes. One beautiful milk-white animal had died in so graceful a position that I wished for its photograph. Its legs were doubled under and its arched neck gracefully turned to one side, as if looking back to the ball-hole in its side. Until you got to it, it was hard to believe the horse was dead.' / Oliver Wendell Holmes Sr. saw the horse four days after the battle while searching for his wounded son. Later, Holmes examined Gardner's photograph and said it was the

same horse." ("The Dead of Antietam," by Terry L. Jones, *The New York Times*, September 24, 2012.)

♦ "Soon we strike the scene of conflict. As we emerge from a body of woods, our eyes are met by the sight of scores of dead and wounded Federal Zouaves, whose blood-red pants mark them out conspicuously wherever they lay on the sloping field and little meadow before us. Over these we rush at a double-quick and on the opposite hill we see a battery of artillery which our men have just captured. The pieces are still pointed towards us, but around them are strewn numbers of the enemy, dead and wounded. At one of the pieces, as our line passes between them, we see what can never be effaced from our memory—a pile of artillery horses, all harnessed together, shot down manifestly just as they were in the act of moving a gun, one or more apparently dead, the others living, but bleeding profusely and writhing in apparent agony, the sight presenting a horrible spectacle of war." (*War Talks of Confederate Veterans*, compiled and edited by Geo. S. Bernard, Petersburg, VA.)

the U.S. Army's 1st ~ Division (Vietnam)

mechanized cavalry
today's ~ means mobility and speed (military)

♦ "It was only fitting and proper that airmobile operations should have been first tried in combat by the First Cavalry Division, of World War II and Korea fame. Riding helicopters instead of horses or mechanized vehicles, it was renamed the First Cavalry Division Airmobile." (Vietnam. Commonly referred to as the First Cavalry Division. The patch is iconic.)

♦ "We were going to Vietnam as "straight leg" infantry, not as a mechanized infantry battalion." (No APCs. The First Infantry Division, known to all as the Big Red One.)

♦ "Tanks had replaced the cavalry of former wars with a vastly more powerful and far-ranging weapon, and in many aspects their manoeuvres resembled naval warfare, with seas of sand instead of salt water. The fighting quality of the armoured column, like that of a cruiser squadron, rather than the position where they met the enemy, or the part of the horizon on which he appeared, was the decisive feature. Tank divisions or brigades, and still more smaller units, could form fronts in any direction so swiftly that the perils of being outflanked or taken in rear or

cut off had a greatly lessened significance. On the other hand, all depended from moment to moment upon fuel and ammunition, and the supply of both was far more complicated for armoured forces than for the self-contained ships and squadrons at sea... / The personal interventions of the two Commanders-in-Chief were as dominant and decisive and the stakes on both sides were as high as in the olden times." (*The Grand Alliance* by Winston S. Churchill. "Operation 'Crusader': Ashore, Aloft, and Afloat.")

♦ Before "mechanized infantry" it was "motorized infantry."

♦ "There was now a dramatic episode which recalls 'Jeb' Stuart's ride round McClellan in 1862 on the Yorktown Peninsula in the American Civil War. It was however executed with an armoured force which was an army in itself..." (Rommel's Raid Nov. 24-28, Second Battle of Sidi Rezegh. From *The Grand Alliance* by Winston S. Churchill. "Operation 'Crusader': Ashore, Aloft, and Afloat.")

♦ "Once, after a gunnery exercise, Novikov and Getmanov had stopped in front of the winning tank. As he answered their questions, the soldier in command had gently caressed the side of the tank. Getmanov had asked if he had found the exercise difficult. / 'No, why should I? I love my tank very much. I came to the training school straight from my village. The moment I saw her, I fell in love. Impossibly in love.' / 'So it was love at first sight, was it?' said Getmanov. He burst out laughing. / There was something condescending in Getmanov's laughter—as though he were criticizing this young man's ridiculous love for his tank." (*Life And Fate* by Vasily Grossman, translated by Robert Chandler, New York Review Books.)

♦ A FUNNY CARTOON. It's World War II. An old cavalry sergeant's jeep has broken its axle. The old sergeant has turned his back to his busted down jeep, his left hand covers his eyes in grief, and his right hand is pointing a .45 behind his back at the engine, as if he were putting his beloved horse out of its misery. (*Up Front* by Bill Mauldin, World War II. The text about the cartoon reads, "Once I thought I did a very funny cartoon. It was a picture of an old-time cavalryman shooting his jeep, which had a broken axle. It is one of those cartoon ideas you think up rarely; it has simplicity, it tells a story, it doesn't need words. It is, I believe, the very best kind of cartoon... I shall keep reviving that cartoon until somebody appreciates it." (Compiler's note: MUCH appreciated, brother, from the 21st century!)

[Delighted laughter and clapping from the audience.] / "It's such a good question. My brief answer is no. [Nervous laughter from audience.] You know, the Peloponnesian war, it was the Spartan mothers who said, 'Come back bearing your shield or on it...' I'm not sure that women are by nature kinder or gentler." (Margaret MacMillan, "War and Humanity," the Reith Lectures, BBC.)

♦ "Wars are almost always begun with gaiety and lightness of spirit, with cheers and songs. The day after the surrender of Fort Sumter the entire land, both North and South, blazed with an ardent and confident patriotism, although the patriotism of the South was precisely opposite to that of the North. The streets of the cities were colorful with flags and smart uniforms. Ladies waved handkerchiefs and threw kisses. The barrooms did the largest day's business in the history of the nation, up to that time... The churches were kept open all day for the saying of bloodthirsty prayers. God, as usual, was on both side." (*A New American History* by W.E. Woodward.)

(Famous writers who contracted tuberculosis.)

♦ "And so, Vityenka, I got ready. I took a pillow, some bedclothes, the cup you once gave me, a spoon, a knife and two forks. Do we really need so very much? I took a few medical instruments. I took your letters; the photographs of my late mother and Uncle David, and the one of you with your father; a volume of Pushkin; *Lettres de mon moulin*; the volume

of Maupassant with *Une Vie*; a small dictionary...I took some Chekhov—the volume with 'A Boring Story' and 'The Bishop'—and that was that, I'd filled my basket. How many letters I must have written to you under that roof, how many hours I must have cried out at night—yes, now I can tell you just how lonely I've been." (Anna Semyonovna to her son Viktor Pavlovich Shrum, about her removal to the ghetto, knowing full well that the course of her life was leading to an anonymous interment in some pit in the "holocaust by bullets." Her son would keep the letter in his pocket. From *Life And Fate* by Vasily Grossman, Part 1, Section 18, translated by Robert Chandler, New York Review Books.)

♦ "I think there will be no home leave for a long time. I don't expect to see Hanna and the children this year. The Fuher has ordered us to hold Rome at all costs. This shouldn't be too hard if you have any idea of the kind of country here. It is made for defence and the Tommies will have to chew their way through us inch by inch, and we will surely make hard chewing..." (From the letter of a dead German to a friend on the Russian front. From *And No Birds Sang* by Marley Mowat. Italy. World War II. See the quote directly below.)

♦ "The prophecy contained in the dead paratrooper's letter became a harsh reality, as winter drew in. Our approach to Campobasso...slowed to a crawl in the face of increasingly tough enemy opposition, rugged terrain and steadily worsening weather. Veritably, we were reduced to 'chewing out way...inch by inch.'" (From *And No Birds Sang* by Marley Mowat. Italy. World War II.)

chimeric virus

a ~ is one that combines fragments of different viruses

♦ "Proponents of what became known as gain-of-function research claimed it would help prevent pandemics by highlighting potential threats. Critics argued that creating pathogens that didn't exist in nature ran the risk of unleashing them." ("Risky Business" by Katherine Eban, *Vanities Fair*, June 2022.)

♦ "In their mythology the Greeks had a fire-eating monster called a chimaira that was believed by some to have the body of a goat, the head of a lion, and the tail of a serpent. When this word finally came into English we began to use it in a poetic way. A chimera with us can be a foolish fancy. When we speak of a scheme as being chimerical, we mean that it is visionary and won't work, that it is as much of a fantastic figment of the imagination as the old chimera itself. It may be comforting to know that a hero by the name of Bellerophon eventually slew this

terrifying but imaginary beast." (Word Origins and Their Romantic Stories by Wilfred Funk, Litt. D., 1950. Publishers Grosset & Dunlap New York. Every high-school student in the country should be required to study it.)

♦ “T.M. Landry school has become a viral Cinderella story, a small school...whose predominantly black, working-class students have escaped the rural South for the nation’s most elite colleges. A video of a 16-year-old student opening his Harvard acceptance letter last year has been viewed more than eight million times.” (“Louisiana School Made Headlines for Sending Black Kids to Elite Colleges. Here’s the Reality” by Erica L. Green and Katie Benner, *The New York Times*, Nov. 30, 2018.)

♦ “It’s been six years of trying times—so strange when one day you’re Cinderella, so to speak, and then in 0.6 seconds, you’re Quasimodo.” (The actor Johnny Depp, about how people’s attitudes towards him have changed.)

♦ “They didn’t consider themselves to be a Cinderella, an underdog... (A College football team.)

♦ “FAU doesn’t want to be called a Cinderella because they believe they are good enough to be here and good enough to keep winning.” (The NCAA college basketball tournament. A cute headline in *The Washington Post* reads, “FAU doesn’t want the slipper, it wants March Madness crown.”)

♦ “The Diamondbacks’ Cinderella story isn’t ready to turn into a pumpkin quite yet.” (An underdog MLB sports team continues to win against the odds in the post-season tournament.)

♦ “The Bucks had the best regular season record, it was the Miami Heat that beat them, and then they took game one of the Knicks on the road in New York, I’m like, they’re the lowest seeded team left, so are the Heat the slipper-wearing Cinderella team of the playoffs?” (A Martinez, from “NBA playoffs enter round 2 with no clear favorite,” NPR, Morning Edition, May 2, 2023.)

(And yet, she made an important contribution to science. From *Men Against Death* (1932) by Paul De Kruif.)

♦ "On the playing field of medicine, with all its established positions and specialized players, I felt increasingly like the man from the moon, the man playing left-out. Nobody dwelled on what it was like to be in my shoes, they were merely thankful that they were not. / This was a new situation for me. I had always felt I was an important cog in the medical machine. An underpaid cog, perhaps, but still part of the team..." (*My Own Country: A Doctor's Story* by the remarkable Abraham Verghese, who selflessly took care of HIV-AIDS patients in the U.S. in the 1990s. cognitive dissonance

cognitive dissonance

~ was not pathology, it was policy (US in Afghanistan)
the ~ was exhausting (inability to reconcile before, after)

♦ "I distinctly remember the NFL game between the Vikings and the Green Bay Packers was on the TV the whole time. It's just so American, [our] capacity for cognitive dissonance. If it's something that we love, we can look past the evils because we love it." (Reid Forgrave, author of *Love Zac*, interviewing the family of Zac Easter. Zac, age 24, shot himself in the chest and donated his brain to science. A football player, he was diagnosed with CTE.)

♦ "I guess we all deal with cognitive dissonance in sports in our own way." ("The cognitive dissonance of Fox's NFL Theme Song, 'Injury Version'" at hillmansburger.com.)

♦ "In the memoir, the juxtaposition of their testimonies with Newman's self-analysis produces a sort of cognitive dissonance." (The actor Paul Newman said he was nothing special. Others said differently. From "Becoming Paul Newman" by Louis Menand, *The New Yorker*, October 24, 2022.)

♦ "But when a reader who knows Laxness only from 'Independent People' encounters his contemporaneous political writing, in which mere human beings seem to count for nothing compared with the success of the socialist project, the cognitive dissonance is enough to crash the operating system of the brain." ("A Rower on the Open Sea: The rediscovery of Halldor Laxness" by Salvatore Scibona, *The New Yorker*, July 11 & 18, 2022.)

♦ "this is a perfect example of the zeitgeist of cognitive dissonance permeating our devolving society." (An online commenter about "NJ transgender woman transferred from women's only prison after impregnating 2 inmates, report says" by Stephen Sorace, Fox News, July 17, 2022.)

♦ "A man who spent decades in prison before starting a new chapter as a high-profile advocate for criminal justice reform has been arrested and charged in the brutal murder and dismemberment of a Bronx man. / Sheldon Johnson, 48, was arrested..." ("Formerly incarcerated advocate for NYC criminal justice reform arrested for murder" by Zoe Sottile, Sabrina Souza and Mark Morales, CNN, March 8, 2024. Prior to his arrest, he had spoken of his "journey through the criminal justice system" on the Joe Rogan Show, where he had described himself as "a product of intergenerational incarceration." On his *LinkedIn* profile, he claims to be a co-founder of the group Formerly Incarcerated Citizens Against Recidivism (FICAR), which is "geared toward dismantling recidivism and stemming the pipeline of mass incarceration.")

♦ Foreign supporters of groups who commit atrocities are often unable or unwilling to believe that the side they support could commit atrocities and deny they ever took place. The cognitive dissonance is too great.

♦ Didn't expect it, doesn't compute...

♦ OLD: What! I can't believe it...! / NEW: cognitive dissonance...

♦ See the Wikipedia entry, which is tagged as "social psychology."

I feel that same ~ (feeling in the pit of my stomach)

- ♦ “The marriage between crypto and sports *formed* a few years ago and has only strengthened since...” sounds odd to me. Marriages don’t ordinarily “form” in the sense that ice forms, for instance. “Consummated” might be more natural. A marriage *can* certainly strengthen, though.
- ♦ “The lawsuit alleges that the women felt uneasy by Langford.”
- ♦ “Atlanta man arrested *on* after arriving to hospital with gunshot wounds.” (The *New York Post*.)
- ♦ “Kyler is his own individual. He’s his own person, he beats to his own drum.” (One NFL player about his quarterback. Presumably, “marches to the beat of his own drum.”)
- ♦ “I’m just adding fire to the fuel.” (NFL player Ja’Marr Chase, denigrating another team.)
- ♦ “We’re seeing them close the wagon so to speak...” (Michele Steele, ESPN, on NPR. Presumably, “circle the wagons.”)
- ♦ “It was an expression of speech.” (Instead of “a figure of speech.” “Crazy Plane Lady” Tiffany Gomas about her viral American Airlines meltdown: “That motherf-ker is not real.”)
- ♦ “He’s not a rocket surgeon.” (A comment about an athlete’s intelligence. Heard on the sports radio show the Sportsocracy, “your daily dose of dumbassery.” Conflates “rocket scientist” and “brain surgeon.” Funny!)
- ♦ “I feel that same pit in my stomach as so many of you today do.” (Governor Jared Polis of Colorado, expressing grief after a mass shooting at a gay bar in Colorado Springs, Colorado. This usage is becoming increasingly common. Is it an eggcorn?)
- ♦ “From Carlin he headed south in a zigzag on rough dirt roads, avoiding cops and people, feeling the pit in his gut grow.” (“The Machine Breaker: Inside the mind of an ‘ecoterrorist’” by Christopher Ketcham, *Harper’s Magazine*, November, 2023.)
- ♦ “When we arrived to Black Star Square in Ghana...” (Attributed to Rashad Robinson, the president of the racial-justice advocacy group Color of Change. Quoted in the article “In Search of Kamala Harris” by Astead W. Herndon, *The New York Times Magazine*, October 22, 2023.)
- ♦ “Eli Manning has veered from the chorus on the turf vs. grass debate... Manning... zagged to the other side.”
- ♦ “The incident happened in the popular bar-strewn area of Milan called Navigli.” “Strewn” sounds odd to me.
- ♦ “So you know how to *take* the reservation, you just don’t know how to *hold* the reservation, and that’s really the most important part of the *reservation*.” (“I Know Why We Have Reservations—Seinfeld. Comedy based on collocation. Funny!)
- ♦ In the audio, the speaker in Crossville, Tennessee says, “We see you *on [italics mine]* Walmart, we’re gonna stop and talk to you...” But the transcript reads, “We see you *at [italics mine]* Walmart...” (“MIT, Yale, and other elite colleges are finally reaching out to rural students,” NPR, Weekend Edition Sunday, January 7, 2023.)

*** analysis

- ♦ “If you’re hanging out in South Florida, you might hear someone say that they are making a party instead of throwing a party. Or that they are getting down from the car instead of getting out of one. You might find these expressions just a little odd but researchers say these adaptive phrases, translated word for word from Spanish, are part of a new dialect of English.” (“A new South Florida dialect is forming in real time,” Ayesha Rascoe, NPR, Weekend Edition Sunday, June 18, 2023. It’s possible that this is not simply first-language interference but is being picked up by second generation immigrants and even being acquired by larger speech communities e.g. the general public. Similar story: “New dialect known as ‘Miami English’ appearing in Florida, linguists say—here’s what it sounds like” by David Landsel, *The New York Post*, Feb. 2, 2024.)
- ♦ *On* today, *on* yesterday, *on* tomorrow... (The website “Pain in the English: Proofreading on Demand” at painintheenglish.com has a wonderful article about this entitled “On Tomorrow.” The online commenters say everything there is to say about the usage.)

- ♦ “Bearstail, like the rest of the staff, wore a black T-shirt that read ‘#86colonialism’ on the back. Eighty-six, in kitchen slang, indicates that a dish is sold out. A month earlier, Bearstail, who is a member of the Mandan, Hidatsa, and Arikara Nation, in North Dakota, had moved from Fargo to Minneapolis to work at Owamni. His previous job was at a Red Lobster. ‘Sometimes I have to pinch myself,’ he said.” (“Tribe To Table: A Minneapolis restaurant reconceives Indigenous cuisine” by Carlynn Kormann, *The New Yorker*, September 19, 2022.)
- ♦ “They think we’re supporting genocide, we’re supporting colonialism. They know the keywords but they don’t really know what they mean.” (A Jewish merchant.)

gender ideology, today, is one of the most dangerous ~

♦ “The thing about colonization is this: It is predicated upon gaslighting everyone, both those colonized and those colonizing, into a mental prison which maintains colonization is best and the colonizer is superior. After colonization, after the colonizer has left, the colonizer is still a part of us; our cultures have become a new thing.” (“Within A Legacy Of Colonization, ‘Postcolonial Love Poem’ Empowers Native Voice” by Hope Wabuke, NPR, Book Reviews, March 6, 2020. Wabuke reviews *Postcolonial Love Poem* by Natalie Diaz.)

♦ “Being uncomfortable with the human body is colonisation / brainwashing. It’s just a body. We all got em.” (Zoe Kravitz, about the revealing Saint Laurent crystal mesh dress she wore to the 2021 Met Gala. Presumably she is referencing the missionaries who clothed indigenous peoples in places like Tahiti, etc.)

♦ “Beware of the new ideological colonization that tries to destroy the family. It’s not born of the dream that we have from God and prayer—it comes from outside and that’s why I call it a colonization.” (“Pope Warns Of ‘Ideological Colonization’; Praises Catholics in Caucasus” by Rebecca Hersher, October 2, 2016. Pope Francis opposed rich countries foisting gender theory, contraception and gay marriage on poorer countries in return for development aid.)

♦ The government is allowing the Islamic colonization of Western Europe.” (The mass murderer Anders Behring Breivik.)

- ♦ “How do I become something I don’t see?” From this simple question, The Delta Project was born. The Delta Project exists to break the generational cycle of incarceration by reconnecting youth of color and their families to community relationships through mentorship, coaching and storytelling. Help young men see what they can become. Take action. thedeltaproject.co/action. (A full-page advertisement for The Delta Project in *The Atlantic*.)
- ♦ “People of color at ‘New York Times’ get lower ratings in job reviews, union say,” by David Folkenflik, NPR, August 23, 2022.
- ♦ “Absolutely, So we have our community going missing at an alarming rate. Typically, when families are going to law enforcement, their cases are often dismissed. Our children are classified as runaways and runaways does [sic] not meet the criteria to initiate an Amber Alert. And when it’s adults, oftentimes their disappearance is associated with some sort of criminal activity. And it really dehumanizes and desensitizes the fact that these are valuable members of our community.” (“Ebony Alert” legislation could help address racial disparity in missing persons cases, advocates say” by ABC News, May 3, 2023.)
- ♦ “Look, I mean voters of color don’t talk about voters of color. Who the hell lives in communities of color? The people I know live in neighborhoods. Right, so there’s this whole you know sort of rhetorical lexicon the left of the Democratic party has become obsessed with and insists on using. Which basically just alienates normie voters, including normie non-white voters. I mean, we have people in and around the Democratic Party talking about how all white people have white privilege, and how this is a white supremacist society, and so on, and I just don’t think this is the way people think about the world, including you know normie non-white voters.” (The political scientist Ruy Teixeira. From “Hispanic and minority voters are increasingly shifting to the Republican party,” NPR, Weekend Edition Saturday, July 23, 2022.)

♦ “We weren’t trying to indulge in provocation. We have a lot of respect for the haka. But by nailing our flags to the mast, we wanted to show how proud we were of wearing our country’s colours.” (French rugby captain Rafael Ibanez after his team stood toe to toe with the All Blacks as they did the Haka prior to their quarter-final of the 2007 Rugby World Cup. The game, played in Cardiff, Wales, ended 20-18. See SUPER Haka! New Zealand vs France, Rugby World Cup 2007.)

♦ “At 10:30 p.m., the decks of both ships are a scene of ‘carnage, wreck and ruin,’ in Jones’s words. Captain Pearson strikes his colors. It is an act of utter humiliation, for Pearson had been so intent on not surrendering that he had personally nailed the flag to the rail so that it would become a permanent part of his ship.../ ‘If you have struck, haul down your ensign,’ [Commodore John Paul Jones] barks at Pearson. / Pearson rips down the flag, its fabric tearing loudly as it separates from the nails holding it in place. / The *Serapis* is boarded.” (*Killing England* by Bill O’Reilly and Martin Dugard.)

♦ “Captain Pearson was now under the necessity, which must ever prove painful and humiliating to a British seaman, of ordering the colors to be struck, on which the firing ceased; and with his first lieutenant he was escorted on board *Le Bon Homme Richard*, where he was received with the courtesy his courage merited, by the famous Paul Jones. / The frigate which had also engaged the *Serapis* was the *Alliance*, 40 guns and 300 men; so every way the contest had been most unequal...” (*British Battles on Land and Sea* by James Grant, “Flamborough Head, 1779.” The account goes on to say, “Upon Captain Pearson’s return to England, His Majesty conferred upon him the honour of knighthood...” Whereas, John Paul Jones “was permitted to close an adventurous and extraordinary life in obscurity and penury, at Paris, in 1792.”)

♦ "Bearing on, the fleet came to anchor in the recent scene of Nelson's glory, the Bay of Aboukir...; the fleet consisted of 175 sail of all kinds. / Broken and squally weather rendered the attempt to land impracticable for a week; and in the meantime a French frigate, which, by capturing some British ships, had become acquainted with our private signals, and daringly accompanied the expedition as if she formed part of it, suddenly shot ahead of the fleet, and, hoisting the tricolour, ran safely into the harbour of Alexandria, with a reinforcement for General Menou." ("Alexandria, 1801" from *British Battles on Land and Sea* by James Grant.)

♦ "Duncan Gordon Boyes, Royal Navy, Midshipman of Her Majesty's Ship *Euryalus*... He carried a Colour with the leading company, kept it in advance of all, in the face of the thickest fire, his colour-sergeants having fallen, one mortally, the other dangerously wounded...The Colour he carried was six times pierced by musket balls." (From the citation, in the *London Gazette*, for Boyes' Victoria Cross, for his actions at Shimonoseki, Japan, in 1864. Born in Cheltenham, Glos., England, Boyes joined the Royal Navy at the age of 14. He received his VC at the age of 17. Later, he was kicked out of the navy for ill-discipline and went to New Zealand. Suffering from depression and alcoholism, he committed suicide at the age of 22.)

From “To raise funds for trans communities, an artist has pledged to do 1,000 pansy tattoos” by Halisia Hubbard, NPR, Culture, Nov. 25, 2022.)

♦ “For me, there were so many Trans people who were not in the history books. Many trans people that people who are not in community with us will never know about.” (Angelica Ross, actress & activist, she/her.)

♦ “You know, when we talk about our children—I know for this group, we all believe that when we talk about the children of the community, they are a children of the community.” (Vice President Kamala Harris / word salad.)

♦ “Blackline is a hotline geared towards the Black, Black LGBTQ+, brown Native, and Muslim communities.”

♦ “My belief is that we should be centering the voices and the experiences of the most marginalized people and communities at all times. So when I think about what fat liberation looks like to me, I think about centering the voices of those who live in and who maneuver through spaces and institutions in a fat body.” (Zyahna Bryant, activist, who has partnered with the soap and beauty company Dove to promote fat liberation, or size freedom.)

♦ “While regrettable instances do happen in the sex-positive community, we have very specific rules and procedures put in place to keep safety in the forefront.” (New York City’s Hacienda sex club, responding to a number of complaints.)

♦ “Look, I mean voters of color don’t talk about voters of color. Who the hell lives in communities of color? The people I know live in neighborhoods. Right, so there’s this whole you know sort of rhetorical lexicon the left of the Democratic party has become obsessed with and insists on using. Which basically just alienates normie voters, including normie non-white voters. I mean, we have people in and around the Democratic Party talking about how all white people have white privilege, and how this is a white supremacist society, and so on, and I just don’t think this is the way people think about the world, including you know normie non-white voters.” (The political scientist Ruy Teixeira. From “Hispanic and minority voters are increasingly shifting to the Republican party,” NPR, Weekend Edition Saturday, July 23, 2022.)

♦ “At a time when there are calls for greater scrutiny of the police, today’s developments will be viewed with concern by *some communities* [italics mine].” (BBC Six O’Clock News, 24/09/2023. The “Shooting of Chris Kaba.”)

♦ “There were a lot of people saying, it’s best just to leave this particular issue alone. I got told I was *bringing the community down* [italics mine] by talking about these issues, and they didn’t want me to talk about this or raise these issues.” (Mohammed Shafiq, Ramadhan Foundation. From *The Betrayed Girls: The Rochdale Scandal—2017 Documentary*. ♦ “The crowd rose to its feet—but it felt more like an act of politeness. Unlike in Orlando, where the audience was at rapt attention, the version of Harris in Boston more resembled the version I saw in Munich. It served as a reminder that Black communities are not a monolith and that their assumed kinship to Harris—or to the Democratic Party—cannot be taken for granted.” (“In Search of Kamala Harris” by Astead W. Herndon, *The New York Times Magazine*, October 22, 2023.)

♦ “‘Community’ is one of those words that have been hijacked and ruined, like ‘preferred,’ ‘appropriation’ and ‘equity,’ among others.” (“Sorry, progressives: There is no ‘trans community’” by Rich Lowry, Opinion, *The New York Post*, April 3, 2023. “Preferred” is not entered in this work, but presumably it refers to collocations such as “preferred pronouns” and “preferred gender identity,” and “preferred words” as determined by NPR, the AP Style Guide, universities, etc.)

♦ “[O]bscure ‘experts’ who purport to speak for vaguely defined ‘communities’...” (“The Moral Case Against Euphemism” by George Packer, *The Atlantic*, April 2023.)

***** analysis**

♦ The metaphor of a compass is a very trendy cliché in writing and speaking nowadays, and it is obvious that almost everyone utilizing the word has never needed, owned or used one. The compass doesn't waver, the compass *needle* does. The compass doesn't go off course, the *user* of the compass does. What in the world does it mean to "realign" a compass "once wires get crossed," or to be "tuned in to" your moral compass, as though the compass were a radio? Is there really a compass or something like it *inside* us? Are compasses ordinarily distinguishable as "strong" or "weak"? How can a compass "waver off true north" when its sole job is to *indicate* north! Read or listen to "Resetting Your Moral Compass After An 'Ethical Slip,'" NPR, Talk of the Nation, April 8, 2013.

- ♦ "The challenges Brockton High School is facing are nuanced and complex." (The once exemplary school outside Boston. It has become so violent and out of control that the school committee requested that the National Guard be sent in to guard the hallways and help maintain good order and discipline. Schools can now only expel students as a last resort, because they are usually students of color.)
- ♦ "We're headed in a direction where we want people to feel more comfortable bringing their lived experiences into the hosts' chairs." (Sarah Gilbert, NPR's vice president over its newsmagazines. From "NPR hosts' departures fuel questions over race. The full story is complex" by David Folkenflik, NPR, media, January 12, 2022.)
- ♦ "Too many times we think of things like 'this is racism' and 'this is mental health,' and they're separate. But in reality, it's really *complex* [italics mine] and they inform one another." (Kristi Oshiro, an assistant professor at Belmont University who has studied racism and its impact on athletes. From "Why mental health matters for athletes—even as they give their all to win" by Leah Asmelash, CNN, July 26, 2022. Consider also "Dumped NBA Star Goes After Team Therapist Who Exposed Him" by Josh Fiallo, *Daily Beast*, Nov. 04, 2022, about the NBA player Joshua Primo. At one time Primo's lawyer accused the therapist of trading in "racial stereotypes.")
- ♦ "The thing that is so extraordinary about this installment of the series is that it explores the feminine or the female and the masculine and the male that is in all of these character including the women in a way that is

so complex." (Jodie Foster, a lesbian, about the TV show *True Detective: Night Country*.)

- ♦ "Complicated" may also be used as a euphemism, for example, "It's a complicated legacy," speaking about Martin Luther King, Jr.'s politics or his sexual predilections. Another example, "My father is also complicated, and sometimes angry." Another example, "People are complicated," having to do with an issue of race. Or "For People Of Color, Relationships With Police Are Complicated" by Gene Demby, NPR, Morning Edition, August 15, 2014. Or "Is Being A 'Girl Boss' a Bad Thing? It's Complicated" by Paige Skinner, Los Angeles Magazine, May 13, 2021. Or, "Bonus: Remembering the iconic, complicated Andre Leon Talley," NPR, Code Switch, Jan. 23, 2022. Or, "Is Barbie a feminist icon? It's complicated," by Rachel Treisman, NPR, Morning Edition, July 27, 2023. Or, "O J Simpson remained a fascinating and a complicated figure." - ♦ "The word 'complicated' always hovers in the stories of Pretendians." ("A Professor Claimed To Be Native American. Did she know she wasn't?" by Jay Caspian Kang, *The New Yorker*, February 26, 2024.)
- ♦ "Sensitive" may also be used as a euphemism, as in the following: "Social media platforms are being weaponized by far-right groups and individuals who are exploiting *sensitive* [italics mine] public and social issues."
- ♦ "Problematic" also fits the bill. Consider the following: NPR's Debbie Elliott: What might this mean for UN aid operations in Gaza? / NPR's Greg Myre: Yeah, Debbi, it's very problematic..." ("Israeli military claims an underground tunnel links Hamas with the UNRWA," NPR, Weekend Edition Sunday, February 11, 2024.)
- ♦ Or "schizophrenic"? "League executives admit their marketing efforts have been schizophrenic." (The Women's National Basketball Association, about fans who are "fluid," "progressive," and "eclectic," in other words, lesbian, etc.)
- ♦ Or "difficult"? "And I'm like, 'Wait a minute.' The same people, all of us, that played in college, we're the same people in the WNBA. So if you liked us in college, like why didn't you follow us in the WNBA? And it is [long pause] probably one of the more interesting and maybe more difficult questions to answer [ending with high upspeak]. I have my theories..." (Sue Bird, talking with Terry Gross about why the popularity of women's NCAA basketball doesn't translate to the WNBA. A bit later in the interview Bird answers her own question.)
- ♦ Or what about the following: "The dynamic between them becomes *harder to parse* [italics mine]." (Bob Mondello's review of the 2024 film *Femme*. About the film, he speaks about "these vibrantly conflicted characters" who are "performing who they are." According to his Wikipedia entry "Bob Mondello," he came out when he was 25.)
- ♦ "Problematic" is also a good way to say nothing and cover your ass: "Also on view is a problematic portrait bust of a Black man..." (Goings On About Town, "Art," *The New Yorker*...)

♦ "Well, geez, if gender is just a 'social construct' shouldn't ethnicity be as well? By the progressive tenants of gender identity she should be able to identify as any ethnicity she pleases." (An online commenter about "Activist Raquel Evita Saraswati has faked her 'Arab and Latin' racial identity as far back as 2004: reports" by Ben Kesslen, *The New York Post*, February 21, 2023. The article states that the activist has been referred to online as "the new Rachel Dolezal.")

♦ "He clearly felt sorry for himself, but recognized that others might feel even sorer for themselves. He really didn't like to blame himself for anything; he didn't particularly like to blame anyone else, either. 'I'm a utilitarian,' he wrote. 'Fault is just a construct of human society. It serves different purposes for different people. It can be a tool to discourage bad actions; an attempt to recover pride in the face of hardship, an outlet for rage, and many more things. I guess maybe the most important definition—to me, at least—is how did everyone's actions reflect on the probability distribution of their future behavior.'" (Sam Bankman-Fried. And so it seems unlikely that any 'national conversation' will meet Emerson's standard of 'wise, cultivated, genial conversation' amounting to 'the last flower of civilization.' Let's hope it's not the last flower." ("Conversation As One of the Fine Arts" by Bryan A. Garner, *National Review*, August 1, 2022.)

♦ "Much of the conversation about antisemitism has nothing to do with antisemitism, it's actually about influencing and controlling the conversation inside the Jewish community. It's an arms race to define what is antisemitism in the Jewish community, which is, of course, stupid and it's a waste of resources." (Andres Spokoiny, president of the Jewish Funders Network. From "Dark money, questionable partners behind new group fighting antisemitism" by Arno Rosenfeld, *The Forward*, April 22, 2021.)

♦ "it is becoming an idiotic buzz word." (John Schreiber, in 2011! National Public Radio (NPR) never got the memo, apparently.)

♦ "Isn't it silly to think you can uncomfortable conversation yourself to empowerment and/or riches?" (Noah Berlatsky. A very creative use of "conversation" as a verb. 2024.)

♦ The tenor and implied message of many of these "conversations" is that you need to change the way you think and talk. End of conversation!

♦ CONVERSATION, n. A fair for the display of the minor mental commodities, each exhibitor being too intent upon the arrangement of his own wares to observe those of his neighbor." (*The Devil's Dictionary* by Ambrose Bierce.)

♦ "In any event, what all committeemen like to call 'conversations' could now go forward." (January 1, 1635. Martin Gerritsen gets down to trade business with the Oneida Indians on the Mohawk River. From *The Mohawk* by Codman Hislop. His book is about the river.)

coopt (and co-opt)

coopt and control
elite, white-led institutions ~ the historical narrative

♦ "It was ironic, it was arch, so it felt like, 'Oh My God! they're using this against us!'" (Ruth Perry, who founded the Women's Study Department at MIT in 1984, about the term "political correctness." From "How Cancel Culture Became Politicized—Just Like Political Correctness," NPR, All Things Considered, July 26, 2021.)

♦ "My body, my choice': How vaccine foes co-opted the abortion rallying cry" by Rachel Bluth, NPR, Public Health, July 4, 2022.

♦ "The property was stolen from us because it was bringing Black and white people together to preserve democracy. The land should be repatriated, back to the Highlander Folk School, which is now the Highlander Research and Education Center." (Ash-Lee Woodard Henderson. From "Fight over future of library that sparked civil rights ideas" by Travis Loller, AP, September 3, 2022. A very interesting article.)

♦ According to the Wikipedia entry, the term "moral distress" originated in the 1980s in reference to health-care workers. Through "concept inflation" or "co-option," the construct has since been applied to soldiers, police, firefighters, EMTs, legal defenders and lawyers, people in child and adult protective services, and even to veterinarians, leading inevitably to the construct's disparagement: "moral injury Olympics."

♦ The concept of "burnout," originally coined to describe the way many drug addicts felt in the late 1960s, has been expanded to *Achilles* in the *Bronze Age*. (See "It's Just Too Much" by Jill Lepore, *The New Yorker*, May 24, 2021. An excellent article by an excellent writer. The use of modern contempo-speak in a historical context is a form of presentism.)

♦ "The push to expand the trained workforce coincides with a growing understanding of trauma's effect. The National Council for Behavioral health, a nonprofit organization of mental health care providers, calls trauma a "near universal experience" for people with mental and behavioral health issues." ("Not Just For soldiers: Civilians With PTSD Struggle To Find Effective Therapy" by Caroline Covington, NPR, May 20, 2019.)

♦ “They co-opted our idea. Candy Cane Malört is our baby.” (Val Capone, Chicago. You’ve been warned.)

*** analysis

♦ The term is coopted (and perhaps modified) by others groups. “Black lives matter” becomes “Blue lives matter,” “All lives matter,” “Black Dykes Matter,” etc. “Homophobia” becomes “hot phobia.” “Ghosted” becomes “zombied.” Doing anything “while black” morphs to NPR’s Selena Simmons-Duffin’s “Talking while Female.” The term is picked up by corporate advertisers, looking to appeal to specific groups and make profits. The term is used by aging news hosts and anchors, dowager readers, and ancient pundits. The term is used by politicians. The term is repeated from the pulpit. Dialects, it turns out, are the *only* way corporations and pastors and military leaders and the like can reach target demographics. In the media, the term might be used first with quotes, but later the quotes will be dropped. The term begins to occur in the captions of cartoons: a real estate agent showing an apartment to a hip young couple says, “The refrigerator isn’t just smart, it’s woke!” (*The New Yorker*.) Finally, the term becomes a porn category: “Lesbian ASMR,” etc..... (Some of the stages of linguistic cooption that weaves a cliché into the fabric of society.)

♦ You can “weaponize” absolutely anything nowadays. Mental health might refer to a gymnast’s “twisties” or a mass shooting. What doesn’t “matter” nowadays? What animal can’t be an “emotional support animal” nowadays? What can’t cause “harm” or “PTSD” or “trauma” nowadays? Who isn’t a “survivor” or “someone who has experienced something” nowadays? Who or what can’t be a “hero” nowadays?

♦ When everything “matters,” nothing matters.

♦ Man up!

♦ "So, in the eyes of her classmates, Nelle's taking on the job of guardian angel to Truman Streckfus Persons... was further proof of her particularity: Truman, as surely as every kid at Monroeville Elementary knew that night followed day, was a sissy, a crybaby, a mamma's boy, and so on. Moreover, if he had worn a sandwich board to school with the words HATE ME painted on it two feet tall, the advertisement would have been redundant. His clothes extended that invitation from a block away. It was the 1930s, the Great Depression...A girl in a flower-print dress of cotton made from a fifty-pound flour sack had nothing to be ashamed of then... Consequently, when Truman's Aunt Jennie, the owner of a millinery in town, outfitted Truman in Hawaiian shirts, white duck shorts, blue socks, sandals, and Eton caps from the best department stores in Mobile and Montgomery, he looked, as one teacher expressed it, 'like a bird of paradise among a flock of crows.' The implied insult to the other children could not be ignored. Boys gave him his comeuppance by rubbing cockleburs into his fine blond hair and bruising his milky skin." (*Mockingbird: A Portrait of Harper Lee* by Charles J. Shields. It's a wonderful portrait of an amazing woman.)

♦ "When I was first aware that I had been laid low by the disease, I felt a need, among other things, to register a strong protest against the word 'depression.' Depression, most people know, used to be termed 'melancholia,' a word which appears in English as early as the year 1303 and crops up more than once in Chaucer, who in his usage seemed to be aware of its pathological nuances. 'Melancholia' would still appear to be a far more apt and evocative word for the blacker forms of the disorder, but it was usurped by a noun with a bland tonality and lacking any magisterial presence, used indifferently to describe an economic decline or a rut in the ground, a true wimp of a word for such a major illness. It may be that the scientist generally held responsible for its currency in modern times, a Johns Hopkins Medical School faculty member justly venerated—the Swiss-born psychiatrist Adolf Meyer—had a tin ear for the finer rhythms of English and therefore was unaware of the semantic damage he had inflicted by offering 'depression' as a descriptive noun for such a dreadful and raging disease. Nonetheless, for over seventy-five years the word has slithered innocuously through the language like a slug, leaving little trace of its intrinsic malevolence and preventing, by its very insipidity, a general awareness of the horrible intensity of the disease when out of control. / As one who has suffered from the malady in extremis yet returned to tell the tale, I would lobby for a truly arresting designation. 'Brainstorm,' for instance, has unfortunately been preempted to describe, somewhat jocularly, intellectual inspiration. But something along these lines is needed..." ♦ "The view from the highest range of these dunes, the Hills of the Singing Sands, is unforgettable. Dawn is the best time to climb: the sky (like the lake) is invariably crystal-clear, the robin's egg blue of early morning. The lower dunes rise and fall and glitter, immense sharp-sculptured waves of pale yellow crystal, as far as it is possible to see. The sun rises fast over a white-hot horizon. To the west, toward the trackless wastes of the Taklamakan and Lop deserts, all is still dark, but cloudless, and the summits of the distant dunes are tricked out with gold as the sun catches their edges." (*The Man Who Loved China* by Simon Winchester.)

♦ "The living glow of the desert dawn wrapped a blue turban around the mountain's lofty peak" (From *Gold Dust* by Ibrahim al-Koni.)

♦ "The green was heaven's gift in the desert." (A desert pasture with fodder for a camel. From *Gold Dust* by Ibrahim al-Koni.)

♦ "In the desert, the soul empties and clears and becomes free and brave in the process. And so it enables you to defy the endless open space, challenge the horizon, and explore the emptiness that leads beyond the horizon, beyond the desert void. It invites you to face the other world, the hereafter. It was here, only here, in the labyrinths of never-ending desert plains, that the extremes converge—open expanse, horizon, and desolation—to form a firmament that expands outward, toward eternity, toward the afterlife." (*Gold Dust* by Ibrahim al-Koni. The desert plays a central role in the three Abrahamic religions of Judaism, Christianity, and Islam.)

♦ "This processional way greater than imagination." (Wadi Rumm. *Seven Pillars of Wisdom*, Chapter LXII, by T.E. Lawrence.)

♦ "Then children began to die. / The processions over the mountain were long at first, and sometimes two and three a day. Then they grew shorter, and the hymns fewer, for the people had no strength. / July, August, September, October. / November. / The cold was on us and the snow was thick in the very first week. People were burning wood, and some of the men went down to the colliery to get coal and were stopped by the watchmen, but they took no notice and loaded up. Next morning, police came by brake and went to live in the lamp house. Two men who were caught were taken over the mountain and had six months in jail. So those who had no money for coal went up on the mountain for wood, and since all the people in other valleys were looking for wood, there was soon no wood to be had, except standing trees. But they were green and not to be lit by anything but a fire. / More and more children were dying, and now women were dying, and men. No more were coffins built by Clydach. A sheet had to do, and did. / Two, three, and four families went into one house to eat and have warmth together. Windows were boarded to keep out cold. Even Mr. Gruffydd had trouble to keep the men from a riot, and going down to the colliery and killing the police..." (*How Green Was My Valley* by Richard Llewellyn. ~ are historically metaphors

♦ "The cardinal points are always, historically, metaphors. West is the area of promise for Westerners—follow the sun. The allure of the north—it's the gate to Heaven, as native people say. The fear of the south starts with Captain Cook. The east is always behind you, you know where you came from." (The photographer Thomas Joshua Cooper, from "The Ends of the Earth" by Dana Goodyear, *The New Yorker*, October 7, 2019.)

♦ "As the sky breaks open its fans around him, and shimmers / And into its northern gates he rises / Snarling, complete, in the joy of a weasel..." ("For the Last Wolverine" by James Dickey. A beautiful description of the aurora borealis.)

♦ "Gog and Magog were generally located in the extreme north." (Early maps, based on the Bible.)

♦ "The destination, and the real north of life is that you're here only for a short time." (The Mexican filmmaker Guillermo del Toro.)

♦ "I'm goin' way down south... / Way down to Mexico way... / Ain't no hangman gonna / He ain't gonna put a rope around me..." ("The Jimi Hendrix Experience—Hey Joe (1967) SUPER! Given the choice, he enlisted in the Army. <https://www.youtube.com/watch?v=gUPifXX0foU>)

♦ "Why care for these dead bodies? They really have no friends but the worms or fishes. Their owners were coming to the New World, as Columbus and the Pilgrims... I saw their empty hulks that came to land; but they themselves, meanwhile, were cast upon some shore yet further west, toward which we are all tending, and which we shall reach at last..." ("The Shipwreck" by Henry David Thoreau, writing about the Irish immigrant ship *St. John*.)

♦ "It's a mile to your objective now, but it's a mile of thrills... A one-pounder in a hedge scares you with several well-placed shots before it 'goes west' [is destroyed]." (A member of a tank crew in World War I.)

♦ "The Montana doctor, McCray, had tried to find a serum to guard his fellow citizens and one morning woke up with bloodshot eyes and an ache in his bones. In ten days McCray had gone West to join McClintic..." (McCray died, as had McClintic before him. From *Men against Death* by Paul De Kruif.)

♦ "The East signified luck to the ancient soothsayers; the sunrise represented life and the beginning of things. These old time prophets judged the future by the flight of birds. If the sacred birds flew east when the priests released them from their cages, it meant good fortune. This superstition was taken over by the Christians [in the architecture of early churches]. In these ancient Roman augurs, however, if the sacred birds happened to fly west it presaged disaster, for the early fathers associated the setting sun with death and destruction." (*Word Origins and their Romantic Stories* by Wilfred Funk, Litt.D.)

♦ "With the morning came the minatory prayers, the hoarse clanging bells and the procession westward along the busiest streets of London, from Newgate to Tyburn, the present site of Marble Arch. Each condemned man sat in the cart facing the rising sun, with a noose bound to his chest." (*The Fatal Shore: The Epic of Australia's Founding* by Robert Hughes.)

♦ "In *Between Us: How Cultures Create Emotions* (Norton), the Dutch psychologist Batja Mesquita describes her puzzlement, before arriving in the United States, at the use of the English word *distress*. Was it 'closer to the Dutch *angst* (anxious/afraid),' she wondered, 'or closer to the Dutch *verdriet/wanhoop* (sadness/despair)?' It took her time to feel at home with the word..." ("Affective Disorder: Some psychologists contend that our emotions are culturally specific. How should we feel about that?" by Nikhil Krishnan, *The New Yorker*, August 8, 2022.)

♦ According to the Wikipedia entry, the term "moral distress" originated in the 1980s in reference to health-care workers. Through "concept inflation" or "co-option," the construct has since been applied to soldiers, police, firefighters, EMTs, legal defenders and lawyers, people in child and adult protective services, and even to veterinarians, leading inevitably to the construct's disparagement: "moral injury Olympics."

♦ "There were far-going Arab dhows on the pearly waters, and gaily dressed Parsees wading out to worship the sunset. Of their creed I knew nothing, nor did I know that near our little house on the Bombay Esplanade were the Towers of Silence, where their Dead are exposed to the waiting vultures on the rim of the towers, who scuffle and spread wings when they see the bearers of the Dead below. I did not understand my mother's distress when she found 'a child's hand' in our garden, and said I was not to ask questions about it. I wanted to see that child's hand." (*Something of Myself* by Rudyard Kipling, which he wrote "Looking back from this my seventieth year." At the time, he was a boy of perhaps four, in 1869.)

♦ "I am distressed and disappointed with the tenor of this conversation."

♦ "Distressed bear cub rescued after its head was trapped in a plastic container."

♦ OLD: debt... / NEW: financial distress...

♦ "Every horror that could make war hideous attended this retreat; distress, conflagration, death in all modes... And the spirit of cruelty smote even the brute creation, for the French general, to lessen incumbrances, ordered beasts of burden to be destroyed, and the inhuman fellow charged with the execution hamstrung 500 asses, and left them to starve. They were found so by the British; and the mute, sad, deep expression of grief and pain visible in the poor creatures' looks excited a strange fury in the soldiers—no quarter would have been given at that time..." (Napier on combat against the French in 1811 on the Iberian Peninsula. Quoted in *British Battles on Land and Sea*.)

♦ "After weeks of incessant but minor cannonading, the grand attack was made on the 13th of September, 1782... / By evening the ship cannonade began to slacken; rockets, as signals of distress, were seen soaring into the air, while boats were rowed about the disabled men-of-war, in which our artillery must have made the most dreadful havoc, for, during the short intervals of cessation, a strong, indistinct clamour, the mingled sound of groans, and cries, and shrieks, came floating upward to the ears of the garrison... (*British Battles on Land and Sea* by James Grant.)

♦ See the Wikipedia entry, "SOS."

♦ "Eternal Father, strong to save, / Whose arm hath bound the restless wave, / Who bid'st the mighty ocean deep / Its own appointed limits keep; / O hear us when we cry to Thee, / For those in peril on the sea." (The Navy Hymn. See the Wikipedia entry, "Eternal Father, Strong to Save.")

♦ "We need [a woman in Formula 1], we need diversity. (Caitlyn Jenner.)

♦ "There is a lack of representation of Black people in mountaineering and in high-altitude mountaineering." (Philip Henderson, leader of the Team Full Circle Everest, an American / Kenyan group, in 2022.)

♦ "Bringing diversity to Maine's nearly all-white lobster fleet," NPR, All Things Considered, Sept. 15, 2022.

♦ "Very few architects are Black. This woman is pushing to change that." (By Venessa Romo.)

♦ "I see my company (NPR) trying to better represent America with the voices we put on the air, and I'm looking at my own sourcing, and I get too much credit. Every voice I bring to the airways from India is a person of color. Check the box, you know. That's diversity from my bosses' point of view. But I'm looking at different types of diversity in India and thinking...caste." (NPR's Lauren Frayer, whose reporting on India has been controversial: "At first glance I thought this was India." She was also a co-host of "Love Commandos.")

♦ "Ideological diversity is often a dog whistle for anti-feminist, anti-POC stories about meritocracy." (NPR's CEO Katherine Maher.)

♦ "The screen flashes to five faces. Those invited. All white faces. But the criticism around who got a seat at the table goes a lot deeper than just a lack of diversity." ("Biden's meeting with historians over threats to democracy draws criticism" by Sandhya Dirks, NPR, All Things Considered, Sept. 1, 2022.)

♦ Economic injustice; the fragility of the social contract; white entitlement; indigenous and environmental dispossession; environmental crisis; sexual harassment; rape; cross-cultural irony; racial diversity and identity; her tween self; punk; sorta-bleak; sorta-gross; less loveable; "antics seem designed to alienate the reader"; raw; less compromising; 8-panel orgy of micturition (urinating); depressive; acid; ever-caustic captions; ambiguous characters; grotesque violence; horror; yucky... ♦ "Barbie knows that representation matters and is committed to continuing to increase diversity across collections, so that more people can see themselves reflected." (The trans Barbie doll, a Barbie doll with a prosthetic limb, the Ken doll with vitiligo, a Barbie doll with Down Syndrome, etc.)

*** criticism, problems, snark, disparagement, pushback

♦ "The way diversity at Riverdale was being practiced was to diminish people." (A parent who removed his children from the school.)

♦ Appallingly, blatantly, completely, excruciatingly, obviously, overwhelmingly, predictably, ridiculously, shamefully, typically, unbelievably BIASED... (Adverbs for "biased" on a BBC HYS about the women's tennis final at Wimbledon, 2023. One commenter posted, "Czechmate BBC." Another posted, "Well done Marketa / Beat Jabeur, the crowd and the commentators." These commenters detected a bias for Jabeur because she is Muslim. See the following quote.)

♦ "The media (and we all know the leanings) thought this was Christmas / Ons (and none of her fault) ticks almost every diversity box going and the BBC would have been wetting itself in anticipation..." (An online commenter about the defeat of Ons Jabeur by Marketa Vondrousova at Wimbledon 2023.)

♦ "Yanagihara's cast is as carefully diversified as the crew in one of those 1940s wartime bomber movies, however twenty-first-century their anxieties may be... Malcolm is all too obviously present to fill the biracial slot." ("A Whole Lotta Pain" by Daniel Mendelsohn.)

♦ "What is all this talk of diversity when no diversity of opinion is allowed?" ("Woke" universities.)

♦ "I don't want to hear one more peep out of them about diversity, equity, and inclusion. I don't wanna see any more of our C-suite execs

♦ "Donkeys are often shown in a silly light, as though they're somehow ridiculous."

♦ "They have a hard life and work their entire lives." (Ethiopian donkeys.)

♦ "Without a donkey, my wife and I become the donkeys." (A saying of Ethiopian farmers.)

♦ "Modestine [was] a stubborn, manipulative donkey he could never quite master." (The Wikipedia entry for "Travel with a Donkey in the Cevennes," written by Robert Louis Stevenson.)

♦ "Neither do I know if it would be right for me to refute such an accusation by following such advice as of becoming a baker, for instance... [I]t would be at the same time a foolish answer resembling more or less the action of a man who, when reproached with cruelty for riding a donkey, immediately dismounted and continued his way with the donkey on his shoulders." (*Dear Theo: the autobiography of Vincent Van Gogh* edited by Irving and Jean Stone. Of course, this refers to the old story about Nasreddin and the donkey, which is, of course, a funny fable about the stupidity of taking advice from people.)

♦ Better the ass that carries you than the horse that throws you!

♦ It is better be the head of a donkey than the tail of a horse.

♦ Barbara Dancygier and Eve Sweetser have a wonderful discussion of up-down metaphors for time in *Figurative Language*, and give "high / low Middle Ages" as a French example. They mention that the metaphor might relate to "reverence for the past" in French and Chinese. But the basis for the metaphor might also relate to topography. Sound travels farther in all directions from a high point like a mountain peak, as people of mountain cultures know, from Tibet through Afghanistan and Switzerland to the Southern Appalachians.

♦ This is an instance of up-down metaphors for time and contrasts with *up (up to now, up to date, etc.)*. Time seems to come down from the past and then up to the present. Perhaps this reflects a cyclical view of time, or simply a hilly topography.

♦ How can *downhill* mean something easily accomplished and also mean decline and failure? J.P. Postgate, Litt.D., Prof. of Comparative Philology, addressed this question in an Inaugural Address delivered at the opening of the Session 1896-7, at University College, London. He said its relationship to the meaning of easiness was an obvious metaphor. As for decline, he explained that at the time of Plautus, who used the word in both senses, "Roman waggons and carriages had no efficient brakes." In addition, Postgate mentioned that when Plautus used the word for decline or failure, it was always in contrast with a flatter level.

♦ "Winter horseshoes are equipped with little spikes that give a horse traction on snow and ice, and prevent it from slipping. Without them, a horse can neither tow a wagon uphill, nor use them as brakes on the way down. In the Russian winter of 1812, this spelt disaster for Napoleon's reduced force. Horses in summer shoes would have 'fallen down underneath whatever it was they were towing,' in the words of Bernie Tidmarsh, one of Britain's leading farriers. 'They wouldn't have got any grip going downhill any more than they would have going up,' he says. 'The end result would have been broken legs and mutilated limbs.' In some cases the horses were butchered for food while still alive by starving soldiers." ("Napoleon's failure: For the want of a winter horseshoe," by Saul David, BBC, 8 February 2012.)

♦ In the 1800s up to 175,000 hogs passed through Asheville, western North Carolina, each fall on their way south to South Carolina from Tennessee. Drovers also drove great herds of turkeys, ducks, mules,

horses, cows, flocks of sheep, etc. along the road. Inns and stands grew up along the route to accommodate both men and animals at night. Local people grew corn to feed the animals and established ferries and bridges. And towns grew up as people prospered. The film *The Journey of August King*, based on the book by John Ehle, gives a flavor of life in those times.

Dunkirk (digital Dunkirk, etc.)

Dunkirk spirit

Londoners displayed a ~ (1996 Docklands bombing)

digital Dunkirk

this massive ~ trying to get everyone out (Afghanistan)

♦ The "digital Dunkirk" refers to the chaotic two weeks in August of 2021 when the US left Afghanistan. Many individuals, organizations, and particularly serving and former military men used social media to help Afghans get to evacuation points and then get through security perimeters and onto planes flying out. It's a fascinating analogy, and a sign of the times.

♦ "When the North Vietnamese closed the Hai Van Pass, people had to come out by ocean, and so it was almost another Dunkirk." (Homer Smith, US Defense Attache, about early 1975, as Vietnamese refugees and soldiers fled from the North to the South.)

♦ Elderly Americans vividly remember watching on TV the chaotic scenes as the U.S. evacuated its embassy in Saigon in 1975.

♦ "They were surrounded by troops led by Rommel... And being from these ancient Scottish regiments with a very noble tradition, they wouldn't surrender... And in the end it was every man for himself and they all tried to scatter and break through the lines..." (The actor Hugh Grant wonderfully explaining the Battle of St. Valery, "the Other Dunkirk," to Terry Gross. From "No More Mr. Nice Guy: Hugh Grant Embraces the 'Blessed Relief' Of Darker Roles," NPR, Fresh Air, July 23, 2021.)

♦ About St. Valery, Winston Churchill wrote in *Their Finest Hour*, "The fate of the Highland Division was hard, but in after years not unavenged by those Scots who filled their places, re-created the division by merging it with the 9th Scottish, and marched across all the battlefields from Alamein to final victory beyond the Rhine... Some lines of Dr. Charles Murray's, written in the First World War, came into my mind, and it is

fitting to print them here..." He quotes twelve lines, the last four being, "For gallant loons, in brochs an' toons, / Are leavin' shop an' yaird an' mill, / A' keen to show baith friend an' foe / Auld Scotland counts for something still."

♦ Many forget that British troops were sent to France *after* Dunkirk, and they too had to be evacuated. As Churchill writes, "We repeated now on a considerable scale, though with larger vessels, the Dunkirk evacuation." About the disaster of the liner *Lancastria*, Churchill writes, "When this news came to me in the quiet Cabinet Room during the afternoon I forbade its publication, saying: 'The newspapers have got quite enough disaster for to-day at least.' I had intended to release the news a few days later, but events crowded upon us so black and so quickly that I forgot to lift the ban, and it was some time before the knowledge of this horror became public." See the Wikipedia entry "*RMS Lancastria*."

♦ The runway at Pitomnik saw chaotic scenes as the last flights out left Von Paulus' encircled and doomed Eighth Army to its fate.

♦ The World War II Russian evacuation of the Crimea across the Kerch Strait, and, two years later, the German evacuation of Sevastopol to western parts of Ukraine, Romania, and Bulgaria, have both been referred to as "Dunkirk-like."

♦ Read "On the Quai at Smyrna" by Ernest Hemingway.

(*The Social Transformation of American Medicine* by Paul Starr.)

♦ "A sense of insecurity, as during an earthquake, pervaded the minds of men." (*Lord Jim* by Joseph Conrad.)

♦ “The sensation produced by an earthquake is never to be forgotten. We feel ourselves in the grasp of a power to which the wildest fury of the winds and waves are as nothing; yet the effect is more a thrill of awe than the terror which the mere boisterous war of the elements produces. There is a mystery and an uncertainty as to the amount of danger we incur, which gives greater play to the imagination, and to the influences of hope and fear. These remarks apply only to a moderate earth-quake. A severe one is the most destructive and the most horrible catastrophe to which human beings can be exposed.” (*The Malay Archipelago* by Alfred Russel Wallace.)

♦ “It’s always hard to attribute a cause to an earthquake with absolute certainty.” (Dr. Cliff Frohlich, Associate Director of the Texas Institute for Geophysics, The University of Texas at Austin.)

♦ “The only reason why I can’t [tell you which tattoos honor Patrick Swayze] is because they’re supposed to be, like, Easter eggs. They’re like, ‘Oh, don’t say! Go look for them.’ Press pause and look, you’ll find them. They’re just a little ode to him.” (Jake Gyllenhaal about his role in the 2024 Amazon film *Road House*, which is a remake of the 1989 original featuring Swayze. The UFC great Conor McGregor is also in the remake. Patrick Swayze and Jennifer Gray starred in *Dirty Dancing*, of course. To this day, enthusiasts of all ages visit the “Dirty Dancing” cove on Lake Lure in western North Carolina to celebrate the film. Swayze also starred in the very good 1991 film *Point Break*, directed by Kathryn Bigelow.)

♦ “Good morning, I’m A Martinez. If you’re a college student, reading your syllabus could be a good way to start off a semester. A University of Tennessee professor recently taught his students that blowing it off could cost you. His name is Kenyon Wilson, and just to see who was reading

closely, he added an easter egg to the course outline. It said, ‘Free to the first who claims’ with a locker number and combination. In it, a fifty dollar bill, no strings attached, but of course... nobody claimed it. It’s Morning Edition.” (“Tennessee professor hid a cash prize on campus. The clue was in the syllabus,” NPR, Morning Edition, December 20, 2021.)

♦ “In Detroit you have WONDR and MOTWN, above St. Louis there are waypoints for ANNII and LENXX.” (Steve Trimble of *Aviation Week*, talking about the names of aviation waypoints. From “Unusual Names Of Waypoints Used For Airplanes’ Navigation,” NPR, All Things Considered, May 26, 2020.)

♦ “Navigation waypoints on this highway in the sky will honor Helge, Mylius, Uroa, Per, Frithjof and Lasse (six of Amundsen’s Greenland dogs) and Jimmy Pigg, Snippets, Bones, Jehu, and Nobby (five of Scott’s Manchurian and Siberian ponies.)” (“Polar Sidekicks Earn a Place on the Map” by John Noble Wilford, *The New York Times*, September 30, 2010.)

♦ “James enjoyed hiding references to heroin use in his lyrics, he once told one of his dope dealers...” (James Taylor. From *Girls Like Us* by Sheila Weller.)

♦ “Occasionally one could test a plagiarist. I had to invent a tree, with name to match, for a man who at that time was rather riding in my pocket. In about eighteen months—the time it takes for a ‘test’ diamond thrown over wires into a field of ‘blue’ rock to turn up on the Kimberley sorting-tables—my tree appeared in his ‘nature-studies’—name as spelt by me and virtues attributed. Since in our trade we be all felons, more or less, I repented when I had caught him, but not too much.” (*Something of Myself* by Rudyard Kipling.)

♦ “I wanted to be at my parents’ house when the electricity came. It was in 1940. We’d all go around flipping the switch, to make sure it hadn’t come on yet. When they finally came on the lights just barely glowed. I remember my mother smiling. When they came on full, tears started to run down her cheeks.” (A farm family that got electricity from the Rural Electrification Administration.)

♦ “I’ll never forget how scared I was when Pa took me to the first [electrified and blinking] Christmas tree there in our little church. That tree just jumped at me as I went in, it was so bright and wonderful; the most beautiful thing I had ever seen in my life. When my name was called to come up for my gift it about scared me to death. Instead of going on up like the others had, I just clung to Pa’s legs and wouldn’t budge. Pa had to go up with me, holding on to my hand.” (Alma Covel, a textile worker, interviewed in the 1930s about her childhood. From “How the Christmas Tree Got Its Lights,” by Alexis Madrigal, *The Atlantic*, Dec. 24, 2010.)

his two brothers marched off "to ~" (Civil War)

♦ "During the American Civil War the soldier's first experience in combat was called 'seeing the elephant.'" (*On Killing* by Lt. Col. Dave Grossman. He talks about the beast of war and also the beast in man. A search of the works of Ambrose Bierce, however, finds no mention of this usage. Nor does it appear in the *Red Badge of Courage*.)

♦ "The phrase 'seeing the elephant' is a distinct piece of American verbiage that dates to the 1830's and describes gaining knowledge from a particular experience. It was like going to town to see an elephant which had long been heard of but never seen to that point in a person's life. The phrase really came into vogue as people went West in search of a better life, adventure, and riches. The escape from plain boredom from the familiar surely did give them new insight into a greater world, hence the mythical elephant..." ("Seeing the elephant" by Kevin Kilpatrick, *Center Post-Dispatch*. He does not include any examples of use, however.)

♦ See the Wikipedia entry, "Seeing The Elephant." It is very useful but lacks examples of usage.

♦ This word 'jumbo' comes from the name of an Ethiopian elephant who was brought to the US in 1882 by P. T. Barnum and displayed in Barnum's circus. The poet and etymologist John Ciardi tells Jumbo's story on NPR, "Jumbo's Big Adventure Popularizes a New Word," April 20, 2006.

♦ The "British Expedition to Abyssinia" [title of the Wikipedia entry] was a rescue and punitive mission to what is now Ethiopia. Led by Sir Robert Napier and fought by the Bombay Army, it culminated with the British seizure of the fortress of Magdala in 1868 and the suicide of the then leader of Abyssinia, Emperor Tewodros, also known as Emperor Theodore. Harold G. Marcus characterized the whole mission as 'one of the most expensive affairs of honour in history.' It was a triumph of British engineering, and the logistics included over 40,000 animals, among them forty-four trained elephants from India, which carried the heavy artillery on the march into the Ethiopian highlands. In Rudyard Kipling's "Toomai of the Elephants," Kala Nag, the elephant mentioned at the beginning of the short story, was a veteran of the mission: "He had been hoisted into a ship at the end of a steam-crane and taken for days across the water, and made to carry a mortar on his back in a strange and rocky country very far from India, and had seen the Emperor Theodore lying dead in Magdala, and had come back again in the steamer, entitled, so the soldiers said, to the Abyssinian War medal."

♦ "On the 27th, our flotilla was seen standing up the river, at nine in the morning, with all sails set. On beholding these, the Burmese made a sortie again on Campbell's right; and the most remarkable feature in this movement was the appearance of seventeen war elephants in the van, each bearing a howdah full of matchlock men. / Covered by his horse artillery, Campbell charged the bulky animals with his cavalry; the men in the howdahs were speedily shot, and no sooner did the elephants feel themselves unrestrained by the hand of their drivers, 'than they turned their stunted tails to our dragoons, and walked back to the fort with the greatest composure.' / Passing the latter with trifling loss, the flotilla, with its steam-vessel—a source of amazement and terror to the superstitious Burmese—anchored close to the left of Campbell's column." ("Kemmendine and Donabue, 1824-5," *British Battles on Land and Sea* by James Grant.)

♦ According to historian John Julius Norwich, Hannibal led 37 elephants over the Alps, and Norwich notes that the Carthaginians must have had some secret way with elephants, as African elephants are generally considered to be untamable, unlike their Indian counterparts.

♦ “She’s also started telling her own story in public. She’s given just a handful of speeches, but each time she’s been met with a line of women coming up to her afterward, confessing their own secret desire to escape. Her story resonates, she says, because so many women wonder if they wouldn’t do the same thing. They feel pressure to smile and pretend their life is fine, even when trapped in a bad relationship or a bad job or any number of circumstances that seem beyond their control. Toby thinks these women are inspired by her not only because she had the guts to leave, but also because she tells her story without shame.” (“Toby Dorr’s Great Escape” by Michael J. Mooney, *The Atlantic*, October 2020.)

♦ “I left Saint Louis. I descended the steps of this fire-escape for a last time and followed, from then on, in my father’s footsteps, attempting to find in motion what was lost in space—I travelled around a great deal. ♦ “When most adults, even older children, see an infant, they shamelessly slip into baby talk: Whoose a prettee baabee? Such a cuutiee. Their speech gets smoother, slower, higher pitched and singsongy. Researchers call this altered form of speech ‘parentese,’ but almost everybody does it—an uncle, a neighbor or the nice lady at the grocery store...” (“Scholars confirm what it’sy bitsy babies around the world already know” by Susan Brink, NPR, Goats And Soda, August 4, 2022.)

♦ About the word “parentese.” Wikipedia redirects “parentese” to “Baby talk.” Merriam-Webster does not recognize the word. Neither does Wiktionary. Search for -ese at Wiktionary, however, and you get a wonderful list of words that incorporate that suffix, including “motherese,” which is the same thing.

♦ “Those instructions [from the judge], I’m a lawyer and I couldn’t understand them... They’ve gotten to be too much. They’re legalese.” (Mark Richards, Kyle Rittenhouse’s attorney, speaking to Ailsa Chang. From “Kyle Rittenhouse’s defense attorney discusses the trial and acquittal,” NPR, All Things Considered, Nov. 19, 2021.)

♦ “The assertions are strident, and the vocabulary is esoteric (‘harm,’ ‘insurrection’) as if it were translated from a foreign language. In a sense, it is. The language is legalese, and it is designed to build a foundation upon which a company can be held liable under civil-rights law in an American court. This activist tactic has been widely misunderstood.” (“The Inequality of ‘Equity,’” by Christopher Caldwell, *National Review*, May 17, 2021.)

♦ "The [camel] opened his jaws as far as they would go, and froth, mucous and black bile spilled out. Ah, black bile—sign of the evil eye. The soothsayers all agreed on that. So, he had been envied for his [camel]. The evil eye had been behind everything that had happened. According to the teaching of the soothsayers, envy is stronger than poison. And the eye of the envier is deadlier than a poisoned arrow, the blow of a sword, or the thrust of a dagger. It's deadlier than any weapon. So when did the envious thugs cast their eye on him?" (Ukhayyad realizes the source of his camel's sickness. From *Gold Dust* by Ibrahim al-Koni.)

♦ "King Alfonso of Spain was reported to have the evil eye. In 1923 he paid an official visit to Italy. Several sailors of the fleet sent to greet him were washed overboard; there was an explosion in one of the submarines; an ancient cannon fired in the King's honor blew up, killing its crew; and a naval officer with whom the King shook hands collapsed and died shortly afterward. / During the King's tour of Lake Gleno a dam burst, drowning 50 people and making 500 homeless. / The Italian dictator Benito Mussolini, who was terrified of the evil eye, refused to meet Alfonso personally..." Germanization of Metz ~ of the French

♦ "When the war ended, the family returned to Poland, only to find their home occupied by strangers. Throughout Poland, a toxic mix of economic depression and still-ripe bigotry had reignited a fresh wave of anti-Semitic discrimination. In the summer of 1946, a false rumor spread that Jews in the southeastern Polish town of Kielce had kidnapped and held a young Polish boy hostage. An angry mob, whose perpetrators included police officers and soldiers, brutally murdered 42 Jews and left some 40 more injured. Many Jews became convinced they could never again call Poland home. So desperate were they to flee that their hasty departure—an estimated 100,000 in all—was called the Polish Exodus." (Escape From Austria" by Rebecca Frankel, *Smithsonian*, January / February 2023. ♦ “On Earth Day, 1971, nonprofit organization Keep America Beautiful launched what the Ad Council would later call one of the ‘50 greatest commercials of all time.’ Dubbed ‘The Crying Indian,’ the one-minute PSA features a Native American man paddling down a junk-infested river, surrounded by smog, pollution, and trash; as he hauls his canoe onto the plastic-infested shore, a bag of rubbish is tossed from a car window, exploding at his feet. The camera then pans to the Indian’s cheerless face just as a single tear rolls down his cheek. / The ad, which sought to combat pollution, was widely successful...and helped reduce litter by 88% across 38 states... / But while Hollywood trumpeted Iron Eyes Cody as a ‘true Native American’ and profited from his ubiquitous image, the man himself harbored an unspoken secret: he was 100% Italian.” (“The True Story of ‘The Crying Indian’” by Zachary Crockett, *Priceonomics*, September 9, 2014. See the Wikipedia entry “Iron Eyes Cody.” Astonishingly, the Ad Council still features “The Crying Indian” PSA in its “Our History / The Classics” section, along with its War Bonds, Red Cross, Polio, the Peace Corps, and Crime Prevention campaigns.)

♦ “Where Caucasians seem to get bothered and confused by colorblind casting is they believe it means that they, Caucasians, now get to play any other race because the next Cinderella on Broadway is going to be African-American. / They feel it is a quid pro quo: you get to be in a show, then we get to play you in a show. But that is not how it was ever supposed to work [italics mine]. And it is a bastardization what is supposed to be happening.” (Erin Quill, who blogs about diversity in casting, about colorblind casting.)

♦ “White Chicks is hella FUNNY! Need part 2!!!” (An online commenter.)

♦ “The NAACP said that it was problematic... but, if you’re looking at the Zulu Club within the tradition of masquerading and masking, painting one’s face is a part of Carnival, or it’s a part of a masquerade, and the Zulus will say that they could not afford masks. It was cheaper and it was accessible for them to actually paint their faces black... I mean, it’s a caricature, it’s Mardi Gras, it’s like everything is exaggerated, if you look at even Mardi Gras Krewes that are traditionally white, they also have these caricatures of white people and European features, and so, it’s an exaggeration. And while it’s connected to minstrelsy historically, I think that it was more rooted in this idea of a masquerade, a mask. People are really dismissive [of outsiders protesting the Zulus’ black face], to be honest with you. I think that New Orleans understands New Orleans’ traditions. The city has been very insular, right? A lot of our traditions have just existed without the participation and the scrutiny of people outside of New Orleans, and so I think that for the average black person in New Orleans, including those members of my family, they just simply do not connect the Black Face in Zulu with minstrelsy or making a mockery of black people and most certainly are not looking at it as an offensive tradition.” (“In New Orleans, The Fight Over Blackface Renews Scrutiny Of A Mardi Gras Tradition,” NPR, All Things Considered, 3 March 2019. The Zulu Club was founded in 1909.)

*** analysis

♦ "[A] failure and a fail are not the same thing. *Failure* is not, in terms of how it is used in actual speech, simply the act of failing. It once was, but over time it has taken on a whiff of personal condemnation. *Failure* suggests, more readily, a rather large-scale, tragic kind of failing; one thinks of an assessment of a person's entire career, marriage, or life, of a head hung low, and the plays of Arthur Miller. 'Epic failure!' then, is a little mean. In modern English, the actual word for simply 'a failing,' with no ominous hint of therapy sessions or a gun going off offstage, is 'a fail.' It's certainly handier for people playing video games or rating one another's sales volume." (*Words on the Move* by the linguist John McWhorter, Chapter 2, "It's the Implication That Matters: Words on the Move." As McWhorter notes, "A linguist's first observation must be that English speakers have been transforming verbs into nouns this way for a good thousand years.")

* "They resemble humans, but their mouths are wider and their legs are much longer than ours, with the feet facing backward. They have wings to fly through the air, and are clad in green robes." (Mashraf Khan, the royally appointed wizard of Hunza, speaking of the snow fairies that, in Hunza tradition, inhabit the surrounding mountains in northwest Pakistan. Mashraf says that they have a king and a queen, and the queen makes prophecies, such as 'A girl will die a month from now, falling into the river to the north.' Mashraf says he dances with the fairies. People watch him dancing, but the fairies are invisible.)

♦ The *curupira* is a mischievous red-haired elf who has feet that face backwards and takes delight in making tracks that lead travelers astray. (The Amazon.)

♦ "Over there, so Myra used to say, the Little People dwell in caves on the mountainsides and under the waterfalls. They are a tiny folk, hardly reaching to a man's knee, but well formed and featured, with long hair reaching nearly to the ground. / They are fond of music and of dancing. Sometimes, on a summer day, when all else was silent about the cab, we would hear a far-off mysterious throbbing somewhere in that glen, and Myra would say to me 'Listen: it is the Little People beating their drums!' / She said they were kind to mortals who think kindly of them; but they play tricks on busybodies and other folk that they do not like. If a man gets too curious and spies on the Little People when they are at

their games, or tries to enter their caves without being invited, or pokes behind the small waterfalls with a stick, they will cast a spell upon him so that he loses his way in the woods and goes wandering about in a daze. / When one finds anything pretty in the woods or among the rocks he must say 'Little People, I want to take this,' for it may belong to them, and if he does not ask permission they will stone him away from the place. / Myra used to hint to me that old Grandpa Dale brought most of his bright crystals and colored stones from over there; and so, she said, he must be a great friend of the Little People, or they would not let him find such things, or would make them dissolve and fade away before he could take them out of the glen." (*Smoky Mountain Magic* by Horace Kephart.)

- ♦ "I understand the spirit of a fighter, I've also been a fighter my whole life, my whole career." (Halle Berry, promoting her film *Bruised*.)
- ♦ CEO Margaret Low of WBUR, in a staff memo announcing "a significant reorganization" to include layoffs, wrote that that it was necessary to be "in fighting shape to deliver on big ambitions."
- ♦ "I tried to keep his spirits up, saying that this was just Round One in a long-term fight. 'More like the end of round #3...and they are winning 6-10 every round,' he wrote." ("Coin Toss: A Welshman has lost the key for half a billion dollars' worth of bitcoin" by D.T. Max, *The New Yorker*, December 13, 2021.)
- ♦ "We still have our guard up, we're still in the ring fighting for safety, we just now have some space between us and the opponent." (Captain Dennis Tajer of the Allied Pilots Association, about 5G and its effect on aviation. From "An airplane pilot details the issue 5G could have on flights," NPR, Weekend Edition Saturday, Jan 22 2022.)
- ♦ "Boxing is like life, really, but like accentuated, isn't it... It's bittersweet, it's horrible, it teaches you lessons, really brutal lessons, there's no protection inside or outside the ring, and I fell in love with it... (The young boxing promoter Ben Shalom speaking with Steve Bunce.)
- ♦ "Now, look you here, Huw, my son. You are growing to be a man. It is a man's place to take punishment and give back more than he takes if there is a head on him... A boy shall learn to fight, or let him put skirts about his knees." (*How Green Was My Valley* by Richard Llewellyn.)
- ♦ "Joe Frazier is my friend... If I had \$4 left in my wallet, two of those would go to Joe." (Larry Holmes, after a reporter asked him if he had paid for an operation that Joe Frazier needed but couldn't afford. Larry wouldn't admit to it, but he had.)
- ♦ "The best fight I've ever seen, praying that Mick Conlan is ok."
- ♦ "Some day, they're gonna write a blues for fighters. It'll just be for slow guitar, soft trumpet and a bell." (Sonny Liston. His biography, published in 1963, was titled *The Champ Nobody Wanted*.)
- ♦ "Man... knows how to fight and win." (A stirring speech in Olympia, Greece, prior to the 2022 Winter Olympics in Beijing. See YouTube #Beijing2022 Olympic Flame Lighting Ceremony! Beautiful and inspiring during the COVID period. Full credit to China.)

♦ The horrors of the so-called ‘filth’ diseases of the 19th century—such as typhoid, dysentery, typhus and cholera—eventually led to huge campaigns to clean up cities, particularly to separate sewage from drinking water.

♦ “Everything that [Florence Nightingale] had urged and entreated in her reports was now done. Orders began to fly. Someone had finally appeared in Scutari ready to take responsibility for something! The sewer under the hospital was cleaned out; the drains were opened; the floorboards were disinfected; the rats were driven out; the water supply was purified. It had taken six months of misery before these things were done, but the commission, Florence later said, ‘saved the British army.’ The effect was felt immediately. The death rate in the hospital quickly dropped from 420 to 22 per thousand.” (*Florence Nightingale* by Ruth Fox Hume. Florence Nightingale was known as “the Lady with the Lamp.” She was not, in fact, a nurse. She was an administrator, logistician, statistician, advocate, reformer, founder, writer, etc. And beloved by all those to whom she administered “stump pillows.” There’s a collocation for you.)

♦ “Late Sunday, riot police sprayed putrid-smelling water to break up Palestinian protests.” (AP, “Israeli troops kill Palestinian in West Bank clashes,” Feb 13, 2022.)

♦ “Typhoid declined significantly in the early 20th century in the industrial nations. However, the disease remained a serious threat in times of war. Troops in the Second Boer War (1899-1901) in South Africa were seriously affected by typhoid. In the Spanish-American War of 1898 there were over 20,000 cases of typhoid and 1,5000 deaths among a total of 100,000 troops. Walter Reed (1851-1902)—the head of the army’s typhoid commission—inspected army camps in the US where typhoid was rampant, and found the state of sanitation to be appalling. He also demonstrated how flies could spread typhoid from the filthy latrines to the mess tents.”

♦ “First and last there were, I think, eight thousand cases of Typhoid in Bloemfontein. Often to my knowledge both ‘ceremonial’ Union Jacks in a battalion would be ‘in use’ at the same time. Extra corpses went to the grave under the service blanket. / Our own utter carelessness, officialdom and ignorance were responsible for much of the death-rate. I have seen a Horse Battery...be assigned, by some idiot saving himself trouble, the site of an evacuated typhoid-hospital. Result—thirty cases after a month. I have seen men drinking raw Modder-River a few yards below where the mules were staling; and the organisation and siting of latrines seemed to be considered ‘nigger-work.’ The most important medical office in any Battalion ought to be Provost-Marshal of Latrines. / To typhoid was added dysentery, the smell of which is even more depressing than the stench of human carrion... / It is possible, though I doubt it, that first and last we may have killed four thousand Boers. Our own casualties, mainly from preventable disease, must have been six times as many.” (*Something of Myself* by Rudyard Kipling.)

♦ “Haiti is now in the throes of the worst ongoing cholera outbreak in the world. In 15 months, it has sickened more than half a million people and killed roughly 7,000. / In the Port-au-Prince slum of Cite Soleil, 56-year-old Antonina Tanis says there are no toilets in her neighborhood. / Tanis: (Through Translator) We don’t have no toilet at all. We do it in the sea. / Beaubien: By the sea, Tanis is referring to Brackish tidal canals that flush in and out of the Cite Soleil. Residents perch on a cement ledge over one of the canals when they have to relieve themselves. The slum is also known for flying toilets, a practice of going to the bathroom in a plastic bag and then letting it fly out the window. / Ever since cholera appeared in Haiti in October of 2010, it’s been rampant in Cite Soleil.” (“Can Vaccines Break Cholera’s Deadly Hold on Haiti,” by Robert Siegel, NPR, All Things Considered, February 7, 2012. Cholera may have been brought to Haiti by U.N. peacekeepers from Nepal.)

♦ Twice as many Civil War soldiers died of disease as of battle wounds. The war, Union surgeon general William A. Hammond later observed, was fought at the "end of the medical middle ages." Neither the germ theory nor the nature and necessity of antiseptics was yet understood. A wave of epidemic disease—measles, mumps, and smallpox—swept through the armies of volunteers in the early months of war, then yielded precedence to the intractable camp illness: diarrhea and dysentery, typhoid and malaria. Ether and chloroform had made military surgery a more plausible and widespread response to wounds, but lacking an understanding of antiseptics, physicians routinely spread infection with unclean instruments and dressings. After the Battle of Perryville in 1862, water was so scarce that Union surgeons performing amputations almost around the clock did not wash their hands for two days. (*This Republic of Suffering* by the great historian Drew Gilpin Faust.)

♦ "With human corpses, human excrement, and rotting rations scattered across Peleliu's ridges, the blow flies or bluebottle flies underwent a population explosion. Those nasty insects were so large, so glutted, and so lazy that some could scarcely fly... It was revolting, to say the least, to watch big fat blowflies leave a corpse and swarm into our C rations... Each morning, just before sunrise, when things were fairly quiet, I could hear a steady humming sound like bees in a hive as the flies became active with the onset of daylight. They rose off the corpses, refuse, rocks, brush, and wherever else they had settled for the night like a swarm of bees. There numbers were incredible." (*With the Old Breed* by E. B. Sledge.)

♦ "Fear and filth went hand in hand." (*With the Old Breed: At Peleliu and Okinawa* by E. B. Sledge.)

♦ There was an all-pervasive stench of putrefaction and millions of fat blowflies filled the air. Even Junger, normally so cool, was shaken by what he saw. 'The ploughed-up battlefield was a scene of horror. The dead lay there among the living defenders. When we dug bunkers we saw how the dead lay in layers one above the other. One company after another had been mown down as they made a stand shoulder to shoulder under the drum fire; then their corpses had been buried under the tons of earth hurled up by the projectiles and new men had taken the place of the fallen.'"
