♦ "We can control our heartbeat, which in cold, drawn-out bivouacs is preferably as slow as possible. It is necessary to disconnect the arms and the legs and draw most of one's blood into the core of the body and the head. We switch to other dimensions. We become insensitive to pain, cold, wind, homesickness, thirst, hunger. Instead of having dinner we separate from the physical world. But the further you go into the world where there are no reasons or consequences, points of the compass, time points like yesterday or today, where you only are—the harder it is to return. The reentry into the body is usually accompanied by pain." (*No Impossible Ways* by the great Slovenian climber Tomaz Humar.)

\*\*\* war, conflict, the military...

♦ "John J. Hardin, an Indiana volunteer, found it 'dreadful...to see the poor soldier just thrown in a ditch and covered over without any box.' / Burials like these dehumanized the dead and appalled many of the living. A Union chaplain observed that in pit burials bodies were 'covered over much the same as farmers cover potatoes and roots to preserve them from the frost of winter; with this exception, however: the vegetables really get more tender care...' Frequently, corpses were quite literally naked... Soldiers desperate for clothing robbed the dead... and thieves and scavengers appeared on battlefields immediately after the end of hostilities... / Soldiers worried that the piles of dead might include those still living, unable to speak..." (*The Republic of Suffering, Death And the American Civil War* by the great American historian Drew Gilpin Faust.)

\*\*\* analysis

♦ "Every culture possesses what Edward Shorter, a medical historian at the University of Toronto, calls a 'symptom repertoire'—a range of physical symptoms available to the unconscious mind for the physical expression of psychological conflict.' In parts of India, patients are said to suffer from *dhat* syndrome: they complain of impotence and have the delusion that they are losing their semen. In Nigeria, students who can't retain information and report feeling a burning sensation in their heads are sometimes given a diagnosis of 'brain fog.' The illnesses are reinforced by a local belief that the symptoms are a sign of authentic suffering, worthy of expert attention and care." ("The Apathetic: Why are refugee children falling unconscious?" by Rachel Aviv, *The New Yorker*, April 3, 2017.)

♦ Refers to nothing real.

(The final text message that Dave Duerson, former NFL Chicago Bears Football player with two Super Bowl wins, sent to his ex-wife and son before committing suicide by shooting himself in the chest, not the head, at age 50. He had graduated from Notre Dame. From an article by the great Alan Schwarz in *The New York Times*.)

- ♦ "It's indisputable. Dave Duerson had classic pathology of CTE and no evidence of any other disease and he has severe involvement of all the (brain) structures that affect things like judgment, inhibition, impulse control, mood and memory." (Dr. Ann McKee, a co-director of the Center for the Study of Traumatic Encephalopathy at Boston University's School of Medicine. The CSTE Brain Bank has the brains of more than 70 athletes and military veterans, with football players comprising more than half of the athletes. From "Study: Duerson had brain damage at time of suicide," by Howard Ulman, AP Sports Writer, Monday, May 2, 2011.)

- ♦ "When Len Boogaard arrived in New York from Ottawa in January, he barely recognized his son. Several times over several days, the toughest man in hockey bawled in his arms. / 'I had to hold him,' Len Boogaard said of Derek. 'It was like when he was younger, when he was a little kid growing up. He just sobbed away uncontrollably.'" ("Derek Boogaard: A Brain 'Going Bad,'" by John Branch (the third in a series), NYT, December 5, 2011.)

- ♦ "Terribly tragic news in the hockey world tonight as New York Rangers forward Derek Boogaard has passed away at the age of 28. / Mike Russo of the Star Tribune reports that the Boogaard family will donate his brain to the Boston University researchers who study brain disease in athletes. / Boogaard last played on Dec. 9 and missed the rest of his first season in New York with a concussion he suffered after a fight with Ottawa's Matt Carkner." ("Derek Boogaard of the New York Rangers passes away at 28," by Sean Leahy, Yahoo! Sports.)

♦ "I just got off the phone with Ryan Boogaard, Derek's middle brother. / Twenty minutes ago, Derek Boogaard's mother and father, Joanne and Len, signed papers to donate their oldest son's brain to the Boston University researchers who are studying for drain disease in athletes. / In March, it was announced that even through Bob Probert died of heart failure, Probert also had the degenerative brain disease chronic traumatic encephalopathy. Probert was the second hockey player from the program at the Center for the Study of Traumatic Encephalopathy to be diagnosed with the disease. The other was the 1960s enforcer Reggie Fleming. / I want to emphasize, this does not mean Boogaard died of complications of a concussion. It's just a selfless act by the Boogaards, who believe in these researchers who are trying to raise awareness when it comes to brain trauma." ("Family donates Boogaard's brain to Boston University researchers," by Michael Russo, *StarTribune*, May 14, 2011.)

♦ "The Boogaard family waited for results. One month. Two. Three. Two other N.H.L. enforcers died, reportedly suicides, stoking a debate about the toll of their role in hockey. / Four months. Five. The news came in a conference call to the family in October. / Boogaard had chronic traumatic encephalopathy, commonly known as C.T.E., a close relative of Alzheimer's disease. It is believed to be caused by repeated blows to the head... The degenerative disease was more advanced in Boogaard than it was in Bob Probert, a dominant enforcer of his generation..." ("Derek Boogaard: A Brain 'Going Bad,' by John Branch (the third in a series), *NYT*, December 5, 2011.)

♦ "Three N.H.L. players, all enforcers entrusted with protecting teammates through intimidation and the occasional flurry of fists, have been found dead since May, stirring debate over the role of fighting in hockey, the stress placed on enforcers and the possible impact of brain trauma on the men who absorb the sports' biggest beatings. / The three players—Derek Boogaard (28), Rick Rypien (27), and Wade Belak (35), who died Wednesday—combined to play 945 N.H.L. regular-season games, scoring only 20 goals while accumulating more than 2,000 penalty minutes. They dropped their gloves hundreds of times to fight, sometimes against one another, while meting out hockey's unique brand of jaw-cracking justice. / [Boogaard was] widely considered the most feared player in the N.H.L. Boogaard, a 6-foot-8, 270-pound 28-year-old, was found to have died of an accidental overdose of alcohol and prescription painkillers. / More than 20 former N.F.L. players have been posthumously found to have had chronic traumatic encephalopathy. ### \*\*\* suicide and pop psychology...

♦ "The pain doesn't go away. It's just transferred to someone else." (A random commenter on an article about a successful, beautiful young woman, a former athlete, who "inexplicably" committed suicide. Another commenter wrote, "You'll never understand what it's like until you've walked a mile in our brain.")

♦ A common "pop psychology" response to suicide nowadays is that it is "a permanent solution to a temporary problem." Consider the case of mental health blogger and sailor Beth Matthews of England.

♦ "Sadness is a language too many of us are fluent in; and suicide is a dialect that's east [sic, "easy"] to pick up." ("A Letter To My Father," Eva Evan's Story, don't mind me.org. Linked from "TikTok star Eva Evans found dead from apparent suicide: 'A New York icon,'" by

(Suicide magnets.)

♦ In Dante's *The Inferno*, the souls of suicides are encased within trees and vegetation in the Forest of the Suicides. "[The violent spirit] falls into the wood, and landing there, / wherever fortune flings it, it strikes root, / and there it sprouts..." (From the great translation by John Ciardi.)

### \*\*\* war, conflict, the military...

♦ "Duncan Gordon Boyes, Royal Navy, Midshipman of Her Majesty's Ship *Euryalus*... He carried a Colour with the leading company, kept it in advance of all, in the face of the thickest fire, his colour-sergeants having fallen, one mortally, the other dangerously wounded...The Colour he carried was six times pierced by musket balls." (From the citation, in the *London Gazette*, for Boyes' Victoria Cross, for his actions at Shimonoseki, Japan, in 1864. Born in Cheltenham, Glos., England, Boyes joined the Royal Navy at the age of 14. He received his VC at the age of 17. Later, he was kicked out of the navy for ill-discipline and went to New Zealand. Suffering from depression and alcoholism, he committed suicide at the age of 22.)

♦ "At last my watch ended with the first signs of dawn. I passed the word along the line for the company to stand-to arms. The N.C.O.'s whispered hoarsely into the dug-outs: 'Stand-to, stand-to,' and out the men tumbled with their rifles in their hands. Going towards Company Headquarters to wake the officers I saw a man lying on his face in a machine-gun shelter. I stopped and said: 'Stand-to, there! I flashed my torch on him and saw that one of his feet was bare. / The machine-gunner beside him said: 'No good talking to him, Sir.' / I asked: 'What's wrong? Why has he taken his boot and sock off?' / 'Look for yourself, Sir!' / I shook the sleeper by the arm and noticed suddenly the hole in the back of his head. He had taken off the boot and sock to pull the trigger of his rifle with one toe; the muzzle was in his mouth. 'Why did he do it?' I asked. / 'He went through the last push, Sir, and that sent him a bit queer; on top of that he got bad news from Limerick about his girl and another chap.' / ...Two Irish officers came up. 'We've had several of these lately,' one of them told me. Then he said to the other: 'While I remember, Callaghan, don't forget to write to his next-of-kin. Usual sort of letter; tell them he died a soldier's death, anything you like. I'm not going to report it as suicide.'" (*Good-Bye To All That* by Robert Graves.)

I mean, we have people in and around the Democratic Party talking about how all white people have white privilege, and how this is a white supremacist society, and so on, and I just don't think this is the way people think about the world, including you know normie non-white voters." ### \*\*\* analysis

♦ "Survivor" has almost completely replaced "victim" in the context of medical illnesses like cancer. A cancer "survivor" might also be referred to as a cancer "conqueror" or even a "defier." Such is the euphemism treadmill.

♦ The Brandeis University Prevention Advocacy Resource recommends that people not use the term "survivor" for cancer victims, earthquake victims, etc. That's because the term implies the trauma is over, when in fact the trauma might linger for years. And so, they recommend you say somebody has experienced something. However, Google "rape experienter" and you only get four results.

♦ "A word is a thing on the move. This means wrapping our heads around something that cannot feel right at first, but that simple logic requires us to accept. To wit, any claim that people in general are using a word 'erroneously' is illogical... (*Words on the Move* by the linguist John McWhorter, Chapter 2, "It's the Implication That Matters: Words on the Move," Subsection "But That Isn't What It's Supposed to Mean!")

Only once on our trip did we hear—and then only in scandalized whispers—of a village that was actually 'eating its cows.' For a Hindu farmer to do away with a starving cow, even to put that beloved beast out of its misery, is as unthinkable as for him to slaughter it to feed his starving and equally beloved children. / Such prohibitions as these—too fantastic to seem credible to a Westerner—appear to separate the Indian from the American farmer by a distance greater than the curve of the world that divides them. And yet the problem of getting food out of the land has similarities which reach around the globe..." (*Halfway to Freedom* by Margaret Bourke-White.)

(Information overload. Quoted in *Krakatoa* by Simon Winchester. From *The Victorian Internet* by Tom Standage, 1998.)

♦ "The great events which are now transpiring in Europe are, in themselves and in their relation to the rest of the world, without a parallel in the history of the human race. We seem, as it were, to be present at the enactment of a sublime and terrible drama, with the Crimea for its stage, and all Europe and America gazing, as in a theatre, with agonized interest at what is passing, as incident after incident brings us gradually, through one tragic scene after another, to the approach of the last awful catastrophe. For, although in other periods of the world's history, events of equal magnitude and interest may have occurred, still they never before happened under circumstances of the same publicity, so to speak, as now, when the celerity with which information is propagated the Press, the Telegraph and by steam, and the general dissemination of intelligence, have the effect of placing every incident almost before the eyes simultaneously of all mankind..." The extension of a telegraph line from Vladivostok via Nagasaki to Shanghai in 1871 made possible rapid communication between the Navy Department and the most remote of the distant stations. The dispatch reporting that the Koreans had fired on the squadron's surveying boats, which the *Palos* delivered to a Shanghai-bound steamer off Chefoo on 5 June 1871, seems to have been the first to be telegraphed from the station by the U.S. commander in chief." \*\*\* a black buran, a pampero wind...

♦ "Just on the stroke of seven o'clock we heard a shrill whistling in the north-east, and, two or three minutes later, down came a black buran. Shagdur set out to return to his own sleeping-place. Half an hour later...he [re-] appeared at the opening of the yurt. He had lost his way, although his sleeping-place was only 15 paces from mine...It was pitch dark [and] impossible for any man to stand. Shagdur had been on his hands and knees the whole time. Only those who have been out in such a storm can form any conception of what it is like. You get bewildered, and want to keep going, without knowing where...and it affects the brain. Next morning, the effects of this grim desert tempest were very easy to see; the sand was heaped up all round my yurt, and there were little mounds on the sheltered side of

the camels." (A windstorm on the salt desert of Lop Nur in Xinjiang. From *Central Asia and Tibet* by Sven Hedin.)

♦ "Four times on the River Parana we were forced to take refuge from the howling pampero wind, which drove upstream holding back the wide river, piling up greeny-gray waves, blowing the tops of the steep seas until the whole surface turned into a mass of seething white water. Even the five-knot current was stopped, and on one memorable occasion it was actually reversed. Swooshing out of a low, cigar-shaped cloud, the dusty pampero flattened the greeny-gray grass and forced cattle to kneel with their heads bowed, as if in homage. / A cold wind, it blew all the way from Patagonia, almost 2,000 miles to the south. A sudden hush, fraught with tension, heralded its arrival; birds grew silent, wild horses galloped for refuge in the hollows of the riverbank. Then, on the southern edge of the curved world of grass and water, a long black line rose into the sky. Under the cigar-shaped cloud, between it and the pampa, loomed a band of dirty brown weather, the underside of which shone silver white over the wide river. Quickly, we secured *Sea Dart* to the sandy river bed with two anchors and to the pampa foreshore with six mooring lines firmly bent onto as many heavy wooden stakes of *palo blanco*, the toughest wood in the world. Huanapaco and I had driven the stakes, about ten feet long, into the ground until there was only a foot of wood showing before securing the mooring lines. Even so, when the roaring pampero arrived, it turned everything around us into dust and white water. It was strong enough to send derelict trees floating back upstream! Over the banks the gray water rushed backwards, shifting the bank's position and turning the river to a sandy yellow under a sky as black as night in the bitter cold wind. The temperature dropped *seventy* degrees in four minutes! Hoar frost formed on the pampas grass minutes after we had been sweltering in a humid heat of over a hundred degrees!" (In Argentina. From *The Incredible Voyage* by Tristan Jones. As to whether or not Tristan Jones was telling the truth or lying, see *Wayward Sailor: In Search of the Real Tristan Jones* by Anthony Dalton.)

Instead of sending men charging into the street, he’d start by using the heavier weapons. / ‘To essentially hammer the target building, fill it full of holes and then pump tear gas into it,’ Bowden explains. ‘This would clear out most of the enemy before he actually sent men running across the street. And instead of going through doors, you blew holes in the walls and sent men in through those holes because the enemy would likely have set up their guns to cover the entrances.’” (“How An NFL Lineman Changed The Course Of The Battle Of Hue” by Martin Kessler, Only A Game, NPR / wbur, September 16, 2017.)

### \*\*\* The status of "Thanks" and "You're welcome" at NPR...

♦ It is rare to hear an NPR reporter, analyst, pundit, etc. respond to an NPR's host's "Thank you" or "Thanks" with "You're welcome." The script is almost always, "Thank you," "Thank you!" Either speaker will often use a first name: "Thank you so much, Jane," "Thank you, Andrea," "Thanks, Leila," "Thanks, Mary Lou," "Thank you so much, Rodney," etc. Or, the person thanked might say something breezy, like "No problem," "You bet," or "Happy to do it" as a signifier for their relative "youth" and "hipness." The effect on the listener is to enforce the notion that NPR is a clubby, self-congratulatory, breezy place where the employees all share the same ideas and spend a lot of time congratulating one another.

♦ "Thanks Elissa." / "You bet, Ari."

♦ NPR's Ari Shapiro: That's NPR's Frank Morris covering the severe damage from those tornadoes in Iowa yesterday. Thanks Frank. / NPR's Frank Morris: You bet, Ari. Catch you later. (Breezy!)

♦ NPR's Scott Simon: Asma, thanks so much for being with us. / NPR's Asma Khalid: Sure. Happy to do it. (Are you not *paid* "to do it"?)

♦ "The way that the place operates is really congenial, but in that congeniality what you lose is the friction of differing opinions and people saying 'no, I don't agree with that, you know, I don't agree with that policy, where's the evidence' or the things that people do when they have really intellectually honest disagreements, I think we lose a lot of that." (Uri Berliner talking about NPR with Bari Weiss. From "NPR Editor Speaks Out: How National Public Radio Lost Americans' Trust," Honestly with Bari Weiss.)

♦ "Throughout these exchanges, no one has ever trashed me. That's not the NPR way. People are polite. But nothing changes. So I've become a visible wrong-thinker at a place I love. It's uncomfortable, sometimes heartbreaking." ("I've Been at NPR for 25 Years. Here's How We Lost America's Trust" by Uri Berliner, *The Free Press*, April 9, 2024. [T]he flocks of wild swans; the solitary sea-mew, skimming with snowy pinions the liberated waves—formed a scene altogether strange and beautiful." From *Frozen Hell: The Russo-Finnish Winter War of 1939-40* by William R. Trotter. The frozen ice was to the advantage of the Russians.)

fighting in the gardens of the deputy commissioner's bungalow,

### **\*\*\* Karl Wallenda walked across the Tallulah Gorge...**

♦ In 1970 the German born Karl Wallenda walked across the Tallulah Gorge in northern Georgia (the US state, not the country) on a high wire. He performed 2 handstands—one in honor of the US troops in Vietnam—as 30,000 men, women and children looked on. When he reached the end of the walk, his wife handed the 65-year-old Wallenda a martini.

♦ "I am interested to inspire people to uplift their soul and to look at the sky and say 'Wow, I can move mountains now, nothing is impossible' so that's why I love what I do... I never leave anything to chance and I have weaved this safety net in my head for the past 55 years. So I value life too much to risk my life and I do something I think much more inspiring and noble, I don't risk my life, I carry my life across." (The remarkable high-wire artist Philippe Petit.)

♦ "We will remember that there were three goddesses of *fate* in Roman mythology: *Clotio*, who held the distaff or spindle; *Lachesis*, who drew out the thread; and *Atropos*, who snipped it off, as she would snip off your life. These magic three were supposed to control our destiny." (*Word Origins And Their Romantic Stories* by Wilfred Funk, Litt.D. Chapter 16, "Terms of Religion and Their Beginnings.")

(The beloved 1965 film *The Sound of Music*. This bit of dialogue leads into the song, "My Favorite Things.")

♦ "Thunder, that is Agdy. When the devil stays too long in one place, then the God Enduli sends thunder, and Agdy drives the devil away. That is to say, at the spot where the storm burst out the devil was sitting. When the devil had been chased away, that is after the storm, there was peace around. Animals, birds, fishes, insects, and the grass, all knew that the devil had gone, and were happy and cheerful again. / As to the thunder and snow together, [Dersu] said that previously they used to have thunder and lightning only in summer, and that it was the Russians who brought winter thunder with them. This was the third winter thunderstorm that he could remember in his lifetime." (Dersu speaking to V.K. Arseniev on the lower Kusun after a rare thundersnow. Just previous to the storm, a native Solon with the group had determined the presence of a devil on a large rock, which had caused them to move their camp. During the storm, a small landslide occurred from the rock. From *Dersu Uzala* by V.K. Arseniev, translated by Malcolm Burr.)

Hunters who prided themselves on their ability to read the sky say they no longer can predict the sudden blizzards. 'The Earth,' one hunter concluded, 'is turning faster.'" (Yanrakynnot, Russia.)

♦ "When we speak of artists as being 'ahead of their time,' we often mean that they were operating in a time, place or space that was not prepared for them, and wouldn't be prepared for years or decades to come. A very specific ache in the Connie Converse story is that she was ahead of her time, but by only minutes." ("Fugitive Desires" by Hanif Abdurraqib, *The New York Times Magazine*, August 14, 2022. Finely conceptualized and written.)

♦ "Johnson certainly sounds wise, ahead of the curve." (A comment about Samuel Johnson, the British lexicographer, about Johnson's acknowledgement of language change.)

\*\*\* analysis

♦ "Ahead of his time" and "before his time" have the same meaning, different conceptions of time. The former seems to represent the time queue, the latter the idea that "the future is forward" and moving towards us.

I'll just say human life to me, the way I look at it if I don't know you if I don't know you is meaningless it's meaningless I'm just keeping it straight up but... Yeah, he's dead what can we do now?" (Alex Bodger aka GoraPakora on TikTok. He stood by and filmed the murder of Paul Stanley Schmidt on his cellphone.)

♦ "As annoying human beings, we all want attention to some degree." (The TikToker Edvasian, 880K.)

\*\*\* the past...

♦ Glyn Williams, naval historian: "There is the Cook, which is you say, is one of the great, supreme navigators, and that part of his reputation remains. But there are worries, there is an uneasiness among many I think today, particularly among the Pacific peoples, about the legacy of Cook. I think most white Australians, most white New Zealanders, would still see Cook as a kind of founding father, a hero, almost an iconic figure, but the Maori, Aborigines, Hawaiians, many of those see a very different Cook, a despoiler, a destructive force." / Greg Dyke: "You have to place him in context, you have to

place him in time, and what he did at the time was amazing." (Captain James Cook, BBC, Sounds, Great Lives, December 2002.)

♦ "That's the way I think history should be written. As if you were living in that time. It's totally unfair to look at it from 150-odd years later and pass judgment on what those people did without knowing what their values were and what the laws were, even. It's what causes an awful lot of misunderstanding, trying to apply a different set of standards to a different nation, really." (The great Civil War writer Shelby Foote.)

♦ "It is unfair, of course, to judge someone by the standards of later times. 'Civil War surgeons had to work without knowledge of the nature of infection and without drugs to treat it,' wrote one student of the field. 'To criticize them for this lack of knowledge is equivalent to criticizing Ulysses S. Grant and Robert E. Lee for not calling in air strikes.'" (*Bellevue: Three Centuries of Medicine and Mayhem at America's Most Storied Hospital* by David Oshinsky.)

♦ "You will remember I was not a Sweet Girl Graduate of a Library School. I was a Scholar and Frontiersman and a Two-fisted He-  
Person and that I went to the roots of that Sissy Library and made it, within two years, an Institution of Character, a He-Library, of which we were all proud." (Charles Lummis, the head librarian of the Los Angeles Public Library, quoted in the wonderful *The Library Book* by Susan Orlean, author of *The Orchid Thief*, who correctly and rightly gives full credit to Lummis in the evolution of the library, in spite of attitudes that seem a bit old-fashioned nowadays.)

♦ "As appears from his name, Oppenheimer is a Jew, but entirely without the usual qualifications of his race. He is a tall, well set-up young man, with a rather engaging diffidence of manner, and I think you need have no hesitation whatever for any reason of this sort in considering his application." (Percy Bridgman's letter of recommendation to Rutherford's lab at Cambridge for J. Robert Oppenheimer. As the authors correctly and rightly note, Bridgman's words were "not unusual for that time and place." From *American Prometheus: The Triumph and Tragedy of J. Robert Oppenheimer* by Kai Bird and Martin J. Sherwin. The popular 2023 film *Oppenheimer* was based on this book.)

♦ "Despite the peril in judging action (or inaction) from twenty-five years ago through the lens of society's current views regarding the crime of sexual assault and our service's significant efforts to eliminate it, a few things are clear..." ("Fouled Anchor" Investigation—Final Report. The United States Coast Guard.)

### \*\*\* analysis

♦ "I don't get it. (Dumfounded.) Yes, I do get it. (Exasperated.) Part of social justice under this idea of being offended is that you prove you're a good person by sticking your middle finger up at very dead people in order to show that you disagree with their views." (The linguist John McWhorter about the renaming of campus buildings. "John McWhorter: Pitfalls in the Policing of Language—YouTube." Watch and listen: [youtube.com/watch?v=FeR2yb5qgWE](https://www.youtube.com/watch?v=FeR2yb5qgWE) )

♦ "We are told that Columbus was no worse than the men of his race and generation—that his vices were 'those of his time.' No vices are peculiar to any time; this world has been vicious from the dawn of history, and every race has reeked with sin. To say of a man that he is like his contemporaries is to say that he is a scoundrel without excuse. The virtues are accessible to all. Athens was vicious, yet Socrates was virtuous. Rome was corrupt, but Marcus Aurelius was not corrupt. To offset Nero the gods gave Seneca. When literary France groveled at the feet of the third Napoleon Hugo stood erect." ("COLUMBUS" by Ambrose Bierce.)

♦ Camille Vasquez: You also wrote, quote, "Imagine a powerful man as a ship, like the *Titanic*. That ship is a huge enterprise. When it strikes an iceberg, there are a lot of people on board desperate to patch up holes—not because they believe in or care about the ship, but because their own fates depend on the enterprise." (Taps microphone to illustrate the point.) In this op-ed, you're saying Mr. Depp is a ship, right? / Amber Heard: I'm making an analogy to a powerful man as a ship. / CV: The powerful man you're referring to in this analogy is Mr. Depp, right? / AH: Uh, I was talking about a bigger issue actually than just Johnny... / CV: The iceberg is you in this analogy, right, Miss Heard? / AH: (Obviously surprised) Um, I would not say that, I hadn't, I had not... (exhales) That was not what I intended, no. (The Amber Heard-Johnny Depp trial.)

♦ "She is rearranging the deckchairs on the *Titanic* and trying to run up new flags on it as it's hurtling right into an iceberg, and that iceberg is the energy crisis..." (Ben Judah about Liz Truss. From "The United Kingdom's next prime minister could be a foreign policy hardliner," NPR, All Things Considered, September 2, 2022.)

♦ "And to the Chinese, if you jump on the Putin train now, you're dumber than dirt. It would be like buying a ticket on the *Titanic* after you saw the movie. Don't do this." (A vile and stupid threat from a U.S. Republican Senator.)

♦ "I was so excited for the maiden voyage and launch of Cynisca. One press release, a brief pause, and they've become the *Titanic*." (Inga Thompson, Olympian, removed as Director for Cynisca Cycling. Inga opposes transgender athletes in women's sports. The company claimed she "affected Cynisca's brand and reputation." Cynisca was a Spartan princess.)

♦ "We're not going to keep doing incremental changes on a contract that no longer honors what is happening right now with this business model that was foisted upon us. What are we doing? Moving around furniture on the *Titanic*? It's crazy." (Fran Drescher, President of SAG-AFTRA, announcing a strike. Drescher's speech is SUPER: "Watch: Fran Drescher delivers fiery speech on SAG-AFTRA strike" Live CBS News. <https://www.youtube.com/watch?v=J4SAPOX7R5M>)

♦ "At that point I realized that his film is like the *Titanic*, but it's not about Jack and Rose, it's about the people who decided to stay back on the *Titanic* and go out playing their violins." (Vinay Shukla, about his documentary *While We Watched*, out on PBS.)

♦ "The situation is now that much closer to the iceberg." (Some random pundit heard on NPR speaking about Chinese-US relations. A reference to the *Titanic*.)

\*\*\* "Shut up, shut up! I am busy; I am working Cape Race!"

♦ "Shut up, shut up! I am busy; I am working Cape Race!" (First Operator John George Phillips to wireless operator Cyril F. Evans of the *Californian*, just 10 miles away from the *Titanic*, and just 40 minutes before the *Titanic* glanced the iceberg with a grinding jar. Evans had contacted Phillips to warn him of icebergs but never got a chance to give the message. Evans went off duty a bit later and the *Californian*, the closest ship to the *Titanic*, never went to its aid.)

♦ "All the boats together could carry 1178 people. On this Sunday night there were 2207 people on board the *Titanic*." (*A Night to Remember* by Walter Lord. There were 675 survivors. Not all the lifeboats were full. In cases where the women requested that lifeboats return to pick up survivors, the sailors at the oars advised against doing so. In cases where the sailors spoke up about returning, the women advised against it.)

♦ "Into the halls they poured, gently prodded along by the crew [of the *Titanic*]... / Up the stairs they trooped—a hushed crowd in jumbled array... / Automobiling, as practiced in 1912, affected the attire of many ladies—Mrs. C. E. Henry Stengel wore a veil tightly pinned down over her floral hat, Madame de Villiers a long woolen motoring coat over her nightgown and evening slippers." (*A Night to Remember* by Walter Lord.)

♦ "Lord had access to many survivors... Jack Thayer, a teen-age passenger from Philadelphia's Main Line, who was one of only a handful of people picked out of the water by lifeboats, later recalled that the sound made by the many hundreds of people flailing in the twenty-eight-degree water, drowning or freezing to death, was like the noise of locusts buzzing in the Pennsylvania countryside on a summer night." ("Unsinkable, Why we can't let go of the *Titanic*," by Daniel Mendelsohn, *The New Yorker*, April 16, 2012.)

♦ "It was not the only sound that drifted over the water. All the time while Collapsibles A and B were filling up and painfully struggling away from the scene, hundreds of swimmers were crying for help. Individual voices were lost in a steady, overwhelming clamor. To Fireman George Kemish, tugging at his oar in Boat 9, it sounded like a hundred thousand fans at a British football cup final. To Jack Thayer, lying on the keel of Boat B, it seemed like the high-pitched hum of locusts on a midsummer night in the woods back home in Pennsylvania." (*A Night to Remember* by Walter Lord.)

♦ "Another survivor, a boy of nine at the time, realized long after settling with his family in the Midwest that he couldn't bring himself to go to the Detroit Tigers games because the noise that greeted home runs reminded him of the cries of the dying." ("Unsinkable, Why We Can't Let Go of the *Titanic*" by Daniel Mendelsohn, *The New Yorker*, April 16, 2012.)

♦ "What troubled people especially was not just the tragedy—or even its needlessness—but the element of fate in it all. If the *Titanic* had heeded any of the six ice messages on Sunday...if ice conditions had been normal...if the night had been rough or moonlit...if she had seen the berg 15 seconds sooner—or 15 seconds later...if she had hit the ice any other way...if her watertight bulkheads had been one deck higher...if she had carried enough boats...if the *Californian* had only come. Had any one of these 'ifs' turned out right, every life might have been saved. But they all went against her—a classic Greek tragedy." (*A Night to Remember* by Walter Lord.)

♦ According to the Wikipedia article "SS Waratah," "The story of *Waratah*, with the loss of 211 people, has often been compared with that of RMS *Titanic* which sank three years later, with the loss of over 1,500 people. Consequently, *Waratah* has been referred to variously as the 'Titanic of the southern seas', the 'Titanic of the south' or, alternatively, 'Australia's *Titanic*.' Like the *Titanic*, the *Waratah* had watertight compartments and was considered to be unsinkable. Joseph Conrad wrote about the fate of the *Waratah* in an article in *The Daily Mail* (London, UK, Sept 18, 1909) titled "The Silence of the Sea." In it Conrad writes that the sea "is not tamed enough to surrender what terrors have been left to it by the progress of science and...the perfect riveting of water-tight bulkheads." What happened to the *Waratah* remains a mystery. In this, the *Waratah* was much like Malaysia Airlines Flight 370, which disappeared in 2014. All three disasters are very much worth comparing and contrasting.

\*\*\* analysis

♦ Not too long from now, a spacecrafts with its astronauts and passengers will be listed as "overdue, missing."

♦ "Byron visited; so did the Wordsworths—twice—and the architect and collector John Soane and thousands of others. They carried away skulls—Sir Walter Scott had one—and fingers and teeth and bullets and cannon balls... A century later such battlefield tourism would flourish even if its more gruesome collecting tastes were suppressed." (The site of the Battle of Waterloo, in Belgium. ♦ "Some 'farmers' say they need agritourism to make extra money. These 'farmers,' however, are often Millennial and Zoomer 'blow-ins' from urban areas, and, as a result, they have poor or no relations with their neighbors. Agritourism includes such things as providing event spaces for weddings and corporate retreats, cooking classes, pie classes (on a small blueberry farm), farm dinners, or using the

farmhouse as an Airbnb. Naturally, nobody attending a wedding in the country wants dust or bad smells, no matter when in the agricultural season. Farmers say fertile land should be used for farming. In the Skagit Valley in Washington State, the locals are considering new zoning codes to reduce agritourism, and they are snitching on their new neighbors, resulting in stricter enforcement. It's very much an old story. Locals versus outsiders, newcomers, immigrants. It mirrors gentrification in the cities. It mirrors the surf line-up in Hawaii, which favors locals, of course. There's the culture clash of "urban refugees" versus fifth-generation farmers. Money is involved. Law enforcement and lawyers are getting involved.

### \*\*\* war, conflict, the military...

♦ “Case 16.—N.M.M.—, major 14th Tennessee regiment, aged 30, wounded at the second battle of Manassas August 30th, 1862. A common musket ball struck the left side of the head, a little in front of, and on a level with the parietal protuberance... He was not examined by a surgeon on the field, as no one who saw him thought he would live beyond a few hours at the most. The day following a large piece of bone was removed by his brother with his finger... At present, July 1st, 1863, he is walking about with the assistance of a crutch. His paralysis is getting very slowly better; but he speaks with a good deal of difficulty... There is a large cicatrized surface covering a depression two and a half inches long and three-fourths of an inch wide, beneath which, when the head is bent forward, the pulsations of the brain can be seen and felt distinctly...” (“Eighteen Cases of Gun-Shot Wounds of the Head, observed at the General Hospital, Charlottesville, Virginia. From Prof. J. L. Cabell, University of Virginia.” Reprinted in *The Richmond Medical Journal*, E.S. Gaillard, M.D., and W.S. McChesney, M. D., Editors and Publishers, Volume 1, Richmond, VA., 1866.)

♦ “The wounds caused by shell high-explosive fragments and by bombs and grenades are so infinitely various that it is not possible to describe a characteristic shell wound as a type... The large fragments tear away from the limbs or trunk huge masses of skin and muscle... [A]s a result of these injuries, the exposed muscle often loses all its natural characteristic appearance and looks exactly like a mass of mud... In other cases fragments of big shells may tear away the abdominal wall and expose the viscera, or may carry away portions of the face or neck, while the bones of the limbs may be fractured or the limb itself may be completely shot away...” (From the 1915 Bradshaw Lecture on Wounds in War by Surgeon-General Sir Anthony Bowlby, K.C.M.G., A.M.S., Surgeon in Ordinary to H.M. the King; Consulting Surgeon to the British Expeditionary Force in France; Surgeon to St. Bartholomew’s Hospital.)

♦ “Then Blough kept asking if his balls were all right and the corpsman muttered, ‘Yeah, yeah,’ but Blough was getting freaky about it, so the doc finally took Blough’s unwounded right hand and cupped it against his groin. ‘Your balls are there.’ / Meanwhile, the vet corpsman had his cherry corpsman working on Blough’s left foot. As instructed, he cut away the frayed jungle boot, and the horror of the sight suddenly dribbled from his mouth, ‘Oh my God, look at his foot!’ / I must be pretty fucked up, Blough thought. He couldn’t tell. He was in pain, but mostly he was numb, especially after the senior corpsman

thumped a morphine Syrette into his leg... Blough was lifted into a poncho. A Sea Horse landed in their smoke-marked clearing-turned-land zone. The one-legged black Marine, who was in bad shape (but who would survive), was hefted into the cabin; and the other wounded man was being helped in when Blough, waiting his turn, thought he heard the soft exit of a mortar round from its tube over the slap-slap-slap of the vibrating chopper’s propellers... / Then Gunny Santomasso also heard the pops of a 60mm mortar... The Sea Horse, nose down, roared out of the LZ with its three bloody, bandaged Marines as the first shells began exploding around Alpha Company.” (The affecting *Operation Buffalo: USMC Fight for the DMZ* by Keith William Nolan.)

♦ “I wrote Bill every day for two and a half years, from 1943 to 1945... He was on Saipan... I think he got every letter I wrote... Writing every day was something I wanted to do... [When he got back] we got back in the groove pretty quickly.” (*Once Upon a Town: The Miracle of the North Platte Canteen* by the great *Chicago Tribune* writer Bob Greene.)

### \*\*\* analysis

♦ “It is not healthy if you circle too much around your own navel. And it is not good to recall all the traumata of your childhood. It’s good to forget them, it’s good to bury them. Not in all cases, but in most cases... Psychoanalysis is not my thing.” (Werner Herzog talking to Terry Gross in 2023.)

He was blind, of course, and his nose was burnt off, and his mouth was like a buttonhole with his teeth all black inside, and his head was naked and a purplish colour. He would have been about thirty, then, and my father said he had been a well-favoured man and the finest tenor in the Valley. ♦ Bierce developed an innovative prose style—limpid, severe, restrained, at once offhand and punctilious—that allowed him to take in the most dreadful scenes (a soldier's face with 'a great red gap' where his lower jaw ought to have been, wild boars eating the stomachs of still-living battlefield casualties) with a flat precision." The nurse (Lara) imagined that, under the influence of his moaning, the lightly wounded men walking beside him were about to pull this horrible iron splinter out of his cheek with their bare hands. / 'No, you can't do that! \*\*\* the USS *Indianapolis*, etc.

♦ Torpedoed by a Jap sub, the USS *Indianapolis* sank in 12 minutes. Of the 1,195 crew, eight hundred and ninety sailors lived to make it into the water. Of those, only 316 survived before rescue. Many of those were killed by sharks. The men in the water clung together, forming little islands, and the marauding sharks savaged those on the outer edges. This was at a time when sailors on boats would poke a lifejacketed man in the water with a stick. If the lifejacket flipped over, it meant the man's body was gone from the waist down. (The sinking of the USS *Indianapolis* was central to the character of Quint in the 1975 film *Jaws*.)

♦ "Warning: This article contains an image that some people may find offensive." ("Uefa investigating Turkey's Demiral over goal celebration," BBC, 3 July 2024. The picture is the very first thing you see, then the warning, and then the article. In other words, it is a warning after the fact. Obvious boilerplate. (Robert Colls, Start the Week, "Heart of Darkness: Conrad and Orwell," BBC Sounds, 6 Nov 2017. British academics and students are, of course, utterly different from American ones, and that was especially true in 2017. If Colls, Professor of World History at De Montfort University, Leicester, had been teaching in the US, he would have issued a "trigger warning" before reading George Orwell's "Shooting An Elephant," and, in spite of that, he would have been cancelled for claiming it had a "wonderful, wonderful passage." God only knows what students would have said about him on the "Rate My Professor" website, especially if he was a strict grader.)

### \*\*\* various groups...

♦ "He is a man who is basically rebooting his life and stepping into his truth and embracing the fact that he's a gay black man in the South. And so, I've always been that type of person who uses the truth, umm, and it's inspired by just what I've gone through, my folks go through, and people who are close to me go through, and then I weave it into fiction..." (Katori Hall.)

♦ "We've been silenced and misrepresented. And so, any time you get an opportunity to tell your truth, you are pushing back against so many lies and falsehoods...And being an artist and in demanding that the world just looks at you, you oddly are being an activist." (Katori Hall.)

♦ "I'm coming out as non-binary, I'm speaking my truth, and you know what, this is who I am, and I'm gonna own it, and I am taking the power back from what you have to say about me." (Demi Lovato.)

### \*\*\* jumping on the "truth" bandwagon...

As a news organization, we act by bearing witness and elevating voices..." (A message to staff from John Lansing, President and CEO of National Public Radio. Uri Berliner's comments about Lansing are interesting. Read, "I've Been at NPR for 25 Years. Here's How We Lost America's Trust" by Uri Berliner, *The Free Press*, April 9, 2024.)

♦ "Now, unfortunately, we know what comes next. We know folks are going to do everything they can to distort her truth." (Michele Obama at the 2024 DNC, speaking about Kamala Harris.)

♦ "He was telling his truth and I think unfortunately some of that has been distorted due to some other factors, but I do think he did not intend to tell a truth that wasn't his truth." (Juror Samantha Imrie explaining her vote in the Gwyneth Paltrow-Terry Sanderson trial.)

### \*\*\* monetizing, commerce, biz, ads, merch, pods, books...

♦ "The same formula again and again. I want to post pictures of myself in bathing suits. When I get criticized I'll say I want to do it for others and for body positivity. When I get criticized for that, I will show sadness that the world doesn't support mental health and I'm a victim, and finally I'll get praised for being so brave for living my own truth." (Bob Loblaw. A BBC HYS about "SI Swim model Natalie Mariduena wants to 'be an example' of 'body normalcy'" by Stephanie Nolasco, August 20, 2022.)

♦ A FUNNY CARTOON. A well-appointed young woman with good hair (but oddly unfocused eyes) is in the witness box of a court and saying, "Whole Truth, And Nothing But My Truth..." ♦ Traditionally, when small children asked where their new brother or sister came from, their parents would say they got it from the turnip patch. Or the mail carrier. See the following quote.

♦ "‘She liked to say she delivered babies, too’ Wells remembers with a chuckle. ‘There was a little fella who always waited for her at the box. He wasn’t there one day. As she was pulling off, he called to her. When she stopped, he said, ‘Why’d you leave that baby at my house?’ His parents had told him the mail lady brought it. After that, she would laughingly tell people she delivered babies, too.’ / Children would often wait for Clawson at their mailbox..." (The remarkable Addie Clawson, who went to work as a mail carrier in Watauga County, western North Carolina, in 1936, after ranking in the top three on a civil-service examination. Few thought she would succeed, or wanted her to succeed. She succeeded. Julia Ebel, a Boone, North Carolina resident, has written a book about Clawson, *Addie Clawson: Appalachian Mail Carrier*. From "Appalachian Mail Carrier" by Marla Hardee Milling, *Our State*, March 2007.)

It would be hard to imagine a wilder and more repellent scene than that grim gorge. / Sometimes it happens that mountain and forest have such a cheerful and attractive appearance that one would be glad to linger there for ever. In others mountains seem surly and wild. It is a strange thing that such impressions are not purely personal and subjective, but were felt by all the men in the detachment. I tested this several times and was always convinced that it was so. That was the case here. In that spot there was an oppressive feeling in the air, something unhappy and painful, and the sensation of gloom and ill-omen was felt by all." (*Dersu Uzala* by V.K. It seems most important to establish now before the trap closes an organisation for enabling French officers and soldiers, as well as important technicians, who wish to fight, to make their way to various ports. A sort of 'underground railway' as in the olden days of slavery should be established and a Scarlet Pimpernel organisation set up. I have no doubt there will be a steady flow of determined men, and we need all we can get for the defence of French colonies. The Admiralty and Air Force must co-operate. ♦ "At sunrise, Sunday morning, May 3, 1863, the battle opened with terrific cannonading. Simultaneously commenced the bursting shells and the harsh, crashing sound of musketry, reminding one of a dreadful storm, the coming of mighty, angry winds, driving the dark and threatening clouds, sweeping everything material in their path, the rolling reverberations of great thunder-bolts that seem to give fitting expression to the thoughts of an offended God." ### \*\*\* the upside-down flag

♦ The upside-down flag is supposed to be a signal of extreme distress, according to the U.S. Flag Code. It is now used by both rightists and leftists to support their respective, opposite agendas. "Illiberalism" is a word that means opposite things to its users. To leftists, "illiberal" means faux democracy. To rightists, "illiberal" means

out-of-control leftist orthodoxy. It is as if Americans have developed two different vocabularies, using the same words and signs but with diametrically opposite meanings. It can get confusing and bodes poorly for any kind of actual communication.

♦ See the Wikipedia article "Flag desecration." Then see the sub-sub-section "Flying a U.S. flag upside down."

## upspeak (contempo-speak)

you know all our stories (upspeak on "stories")

### \*\*\* various groups...

♦ "Tom Cruise has gone to great lengths to avoid the press for more than a decade. But maybe I would track him down anyway?" ("Mission: Impossible" by Caity Weaver, *The New York Times Magazine*, July 23, 2023.)

♦ "Apologizing only works when it clears up the reason why?" (A *New York Post* article by Ariel Zilber, quoting Jay Jaye, founder of Ace of Spades branding agency.)

♦ "'Come here for a sec?' she says. 'Where did you go last night? I came out and you weren't on the couch.' / 'I was probably in the bathroom?'" ("Getting Up" by Oliver Munday, *The Atlantic*, November 2022.)

♦ "While Ed was manly, the strong, silent type, Bobby was extraordinarily effeminate. His voice was singsong with a trilling inflection that would have turned your head in the street if you overheard him. He tended to raise the pitch when he ended a sentence as if he was asking a question. It was a baroque touch that, together with the way he tossed his head, and the way his hands were held near his face, created the illusion that he was Salome wearing a diaphanous veil, not Bobby Keller, the salesperson." (*My Own Country: A Doctor's Story* by Abraham Verghese.)

♦ "I mean I think back to like just being pretty confused about what I was experiencing (upspeak). When I first tried to explain my identity, I was talking to my sister, and we just like tried, we were like, well, that means you're a lesbian, like I'm pretty sure, that kinda lines up, and it's like, we were looking for the only words that we had. / It's really hard to articulate what's going on if you don't have words for it (upspeak). It took a long time for me to even know that there were people who were non-binary, to know that I wasn't the only person in the world that had my gender identity (upspeak). (One Climber's Story. They / Them film and panel. Lor Sabourin.)

### \*\*\* problems, criticism, pushback, snark...

♦ A CURIOUS CASE. "Exploring how content creators speak on TikTok—it's known as influencer speak," NPR, January 31, 2024, now redirects to "Do you have 'TikTok voice'? It's OK if you don't want to get rid of it" by Claire Murashima, Leila Fadel, and Steve Inskeep, NPR, Updated on Morning Edition, February 1, 2024. The transcript does not match the audio. Mmmm... The audio is funny and good. I suspect that the original story was controversial at NPR.

♦ Michelle: "It's like, you know all our stories?" (Pronounced upspeak on "stories.") / Jim: (Confused and startled.) "Uh, was that a question?" / Michelle: "Well, I don't know. Maybe... Do you want to answer it anyway?" (The 2001 [italics mine] film *American Pie 2*. Since then, upspeak has only become more prevalent, to include males. Funny! View on YouTube I Get Nasty When I'm H\*rny! *American Pie 2*

♦ A FUNNY CARTOON. Two young men are sitting at a table. The man on the left is in despair: His elbows are on the table, his head is bowed, and his hands are on the top of this head, so that you can't see his face. It is a very good rendering of despair. Across the table, his nerdy Zoomer friend is saying, "Maybe try turning the mug around so its inspirational message faces you?" On the table is a mug. Looking closely, you can see that the "inspirational message" on the mug is the yellow smiley face. The upspeak indicated by the question mark in the caption is priceless. *The New Yorker*, November 7, 2022.)

♦ "The little engine that could do another round, if everyone else is?" (A not very funny cartoon, but notable for the question mark indicating upspeak. *The New Yorker*, March 6, 2023.)

### \*\*\* analysis

♦ Upspeak used to come at the end of the sentence, but now it is quite common to hear upspeak on *any* word.

♦ Online commenters have begun putting question marks at the end of statements, indicating how they would say them with upspeak. At the end of 2022, the following headline appeared at ABC online: "Harry and Meghan always planned to be on TV?" by Andy Tillet, *New York Post*, Dec. 8, 2022.)

♦ Upspeak is associated with females, particularly young ones. However, older females, especially in broadcast media, have affected upspeak, most likely to sound "younger" for that demographic. Upspeak is also associated with gay men. Males or females may acquire upspeak from their own group, or affect it in solidarity with a group.

♦ People (mainly women) who use upspeak, baby talk and vocal fry are widely considered hesitant and weak, and their language is considered affected and irritating. The matter has been widely discussed and needs no comment. NPR's Selena Simmons-Duffin's "Talking While Female" animation (2014), and the *comments* relating to it, say everything that needs to be said. The issue has been settled: listen to the two *Fresh Air* Terry Gross episodes about the matter. The first was critical of upspeak, the second was essentially a retraction. The consensus is, it is wrong to criticize or judge the speech of young women.

♦ Linguist John McWhorter's analysis of upspeak (or uptalk or uptick) is interesting, as always. "Do you understand? Do you share the same basis of knowledge and evaluation?" "It ongoingly establishes that you and the other person are on the same page." In his FACE typology of MPMS (modal pragmatic markers), he considers it to represent "Acknowledgment: I Hear You." (*Words on the Move* by the linguist John McWhorter, Chapter 1, "The Faces of English: Words Get Personal." Listen also to "The shifting Meanings Of Our Evolving Modern Language," wbur, on point, December 26, 2016.)

Try as he might with all his skill and might, he was never able to beat the last six feet of current, the wild green heart—the muscular organ—of that spirited little river. And perhaps it was just as well. For he never felt any regret at his failure, only the good clean memories of the attempt and the effort against that adversary of real worth. Men have always looked upstream when they came to the Mohawk, for upstream was west. Let us head west, then, with that low-lying barge, the *Seneca*, heavy with gasoline, as it climbs the first water-stairs on its way to ports on the Great Lakes." (*The Mohawk* by Codman Hislop.)

♦ The trailhead for the Noland Creek Trail in the Great Smoky Mountains National Park is almost at the end of The Road to Nowhere out of Bryson City, western North Carolina. In a little over a mile you will cross four wooden bridges. On the first, look to your left, and the current is going away. On the second, coming towards you. On the third, going away. On the fourth, coming towards you. Now that's twisty! It's a wonderful walk, in every season.

♦ “An incident occurred on his night march [toward Manassas] that I have often recalled: My shoes had begun to give out, and I had to fasten the soles to the upper leathers by making holes through each and tying them together with leather shoe-strings passed through these holes, a device that did not serve to prevent gravel and sand from freely entering the shoes to my great discomfort, impeding my marching and compelling me at times to fall behind the line... / The next morning [after the battle] it was my purpose to provide myself with a pair of shoes from some dead Federal soldier, but upon inquiring I soon discovered that I ought to have set about this at a much earlier hour, as there had been during the night and early morning a very general removing of shoes, not only from the Federal dead, but also from many of the dead Confederates. So I abandoned all hope of getting a pair until, on my way, with a party of my regiment, from the wagons to the place of rendezvous, we came to a dead Confederate lying near the roadway, on whose feet were a pair of good shoes. Noticing this, one of our party, pointing to the dead man, said to me, ‘There is a pair of that will fit you.’ I went to this poor fellow’s feet, untied one of his shoes and began to pull it off. This was, of course, not easy work, and whilst engaged at it I suddenly fully realized what I was doing—taking a dead man’s shoes, and these the shoes of a dead Confederate! I at once stopped, and swore I would go bare-footed before I would do an act which was so repugnant to my feelings. My comrades rather ridiculed my squeamishness, but I felt better at having let the dead Confederate retain his shoes. My feet might suffer, but my conscience would not. ♦ "The desire for certain marginalised identities to be 'made visible' is an imperative that can wrongly equate visibility with progress, which in turn raises questions about the burden of an individual to represent the collective and, as a result, who can—and should—hold the power to speak for a particular identity or social group." (Dr. Christopher Holliday, lecturer in Liberal Arts and Visual Cultures Education at King's College, London. Quoted in "Have film and TV got Gen Z all wrong?" by Emily Maskell, BBC, Culture.)

♦ “When I was young, I didn’t really have the vocabulary to articulate how I felt about it... But music has always been a tool for me to express feelings I fear would be unacceptable... (NoSo / Abby Hwang about being trans / queer / nonbinary.)

♦ “Before (roller) derby, I knew I was on the spectrum of queer and pansexual, but I didn’t have the language or support until I met my derby mates who genuinely wanted to see me become my best self. My derby league was the first place I asked people to use they/them pronouns for me.” (Lauren Macadaeg.)

♦ “I couldn’t verbalise what I was feeling before and I didn’t have the right language to articulate how I was feeling before that... / “I’m really open for my team-mates wanting to talk to me. I wasn’t taught throughout the course of my life what it meant to be trans, all the language around it. I think that’s something that’s new for a lot of people.” (“Quinn: Canada’s transgender footballer on being ‘visible’ and playing at the Olympics” by Katie Gornall & Katie Falkingham, BBC Sport, 23 September 2020.)

♦ “I mean I think back to like just being pretty confused about what I was experiencing (upspeak). When I first tried to explain my identity, I was talking to my sister, and we just like tried, we were like, well, that means you’re a lesbian, like I’m pretty sure, that kinda lines up, and it’s like, we were looking for the only words that we had. / It’s really hard to articulate what’s going on if you don’t have words for it (upspeak). It took a long time for me to even know that there were people who were non-binary, to know that I wasn’t the only person in the world that had my gender identity (upspeak). (One Climber’s Story. They / Them film and panel. Lor Sabourin.)

♦ “When the words finally came, and Willow could express herself in saying she wanted to present as a girl...” (The mother of a young transgender girl.)

♦ “I was incapable of articulating the depth of pain I was in.” (The actor Elliot Page.)

♦ “I was fifteen, I was fifteen years old when I read my first diverse book, Maya Angelou’s *I Know Why The Caged Bird Sings*. And the whole world fell away from me. It was the first book [wagging her finger] at fifteen I ever read with a Black protagonist. That book gave a voice to my silences, my secrets, it gave words to my pain, and my confusion of being raped at nine years old. Until *Caged Bird*, I didn’t know that there was a language, there were words, for what had happened to me or that any other human being on earth had experienced it...” (Oprah Winfrey on stage at the 74th annual National Book Awards.)

♦ Terry Gross: So, talk a little bit about how you wish your mother had been...had had a language and the ideas to have more control of her life and to broaden her life... (Terry Gross speaking to the historian Drew Gilpin Faust about the latter’s mother. It is an oddly specific

question and Faust’s reply is an utter disconnect. I suspect the question was written by a much younger producer.)

### \*\*\* monetizing, commerce, biz, ads, merch, pods, books...

♦ “He does things for which he has no vocabulary of apology or shame.” (An author talking about his novel.)

♦ “[Pin] is sensitively drawn as a young butch lesbian who does not yet have the vocabulary to describe herself or her desires.” (A review of *Curious Toys* by Elizabeth Hand.)

♦ “Gwyneth Paltrow and Body Vibes didn’t know how to develop the vocabulary of their marketing.” (Richard Eaton, president of AlphaBio Centrix, a stress-patch company. Eaton is a believer in the Rife machine.)

### \*\*\* terror, misery...

♦ “When one walks through the streets...[o]ne sees so many people who for different reasons have deviated from all that is natural and so have lost their real and inward life... for in the evening one sees all kinds of black figures wandering around, of men as well as of women, in whom the terror of the night is personified, and whose misery one must range among the things that have no name in any language.” (*Dear Theo: The Autobiography of Vincent Van Gogh*, Edited by Irving and Jean Stone.)

♦ “Just as our hunger is not that feeling of missing a meal, so our way of being cold has need of a new word. We say ‘hunger,’ we say ‘tiredness,’ ‘fear,’ ‘pain,’ we say ‘winter’ and they are different things. They are free words, created and used by free men who lived in comfort and suffering in their homes. If the Lagers had lasted longer a new, harsh language would have been born; and only this language could express what it means to toil the whole day in the wind, with the temperature below freezing, wearing only a shirt, underpants, cloth jacket and trousers, and in one’s body nothing but weakness, hunger and knowledge of the end drawing nearer.” (*If This Is A Man* by Primo Levi, Chapter 13, “October 1944.”)

♦ “The mental adjustment took longer. It was a continual surprise to encounter no queues at food shops—like a man who braces himself to pick up a heavy suitcase,” wrote Ginzburg, ‘and finds it empty.’ The words ‘I’m hungry,’ recently so charged with desperation and despair, only slowly reverted to their old function of expressing an ordinary desire for lunch.” (*Leningrad* by the great writer Anna Reid.)

♦ “We lack the vocabulary of such pain.” (U.S. Attorney Raj Parekh speaking about the grotesque crimes of El Shafee Elsheikh, an ISIS “Beatle.” Presumably, Parekh is referring to *Dante’s Inferno*, Canto XXVIII 3-5.)

### \*\*\* analysis

♦ The notion of “lacking language or vocabulary” to understand feelings is a popular LGBTQ trope. Type in “have the vocabulary” at NPR and you get 23 results and counting.

♦ “I just didn’t have language to describe what it was that I was experiencing...” (Ariana Remmel. Non-binary. Grew up in American South. Very Catholic family. Grew up “very gendered” to “present” as a “Godly Catholic child.” Mom was Mexican-American. Dad was white. Brought up among white relatives. No relatives to “help me navigate what I was feeling.” Personal pronoun: they. They say things like, “I actually found it to be surprisingly really useful” and “ultimately, we’re actually...” From “Organic Chemistry Helped Me Embrace My Identities” by Madeline K. Sophia, Brit Hansen, NPR, Short Wave, June 29, 2021. A 13-minute listen. During that time, Ari (Ariana) says the first person singular subject pronoun “I” sixty-eight times.)

♦ "Do you know the stigmatism of Alabama education?" (Kayvon Thibodaux, an NFL football player.)

♦ "He showed off his wrist full of friendship bracelets." (*The New York Post*. "Full of?")

♦ "Kyler is his own individual. He's his own person, he beats to his own drum." (One NFL player about his quarterback. "Marches to the beat of...?")

♦ "The protesters' roarious chants filled the streets." ("Roarious"?! It sounds like a word that might have been included in Lewis Carroll's "Jabberwocky"!)

♦ "I'm like, what are you talking about? People garnish things from a game and have their own opinions... Some stuff is worth conversation, other stuff is like, alright, alright, alright." (An NFL

football player, responding to criticism of a gesture he made after a play was completed. Garner? Glean? Collect? Notice? )

♦ "She watched the shwerm (rhymes with "worm") of police." (A person who witnessed the police arrive at a school where a school-shooting had been reported. Presumably the reporter on NPR meant "swarm.")

♦ "Cow-towing to the woke cancel culture mob is pathetic." (An article from *The New York Post*. Presumably "kowtowing." See "analysis" below.)

♦ "Sadly we did see some of those family members come out of the reunification site audibly shaken and audibly upset..." (A local female reporter about a shooting at a Virginia Walmart, heard audibly on NPR.)

♦ "Kohberger was arrested on Dec. 30 in his home state of Pennsylvania in connection to the quadruple murders that *captivated* [italics mine] the nation." (Emily Shapiro, ABC News, Jan 12, 2023. Horrified? Shocked? Gripped?)

♦ "Language models can just wholecloth make things up." (ChatGPT, etc.)

♦ "They are not wholecloth falsehoods [with upspeak] but they reassemble things that are true or close to being true into stories that are just wildly and completely different from what actually happened."

♦ "The fact that she had pro-police social media posts, and her late father had worked as a police officer only seemed to irate people more." (Morgan Bettinger at the University of Virginia in Charlottesville. "Irate people more"? What world do we live in?)

♦ Original photo caption: "Snow piles on vehicles before their owners clear them off on Thursday in central Lincoln." ABC photo caption via AP: "Vehicles are stacked with snow are seen [sic] before their owners clear them on Thursday, Feb. 16, 2023, in Lincoln, Neb."

♦ "Other videos showed an officer shoving a man who had his hands up to the ground and kicking him in the groin [sic]." (ABC news. An eggcorn? Funny!)

♦ "Rikers Island inmate found dead for 7th time this year."

♦ "Standing at just 5ft 2in, Ball gave away six inches of height to his opponent and was at a significant reach advantage." (The BBC. An online commenter posted: I see the proof readers are on strike again! If you picture it, it's funny! "*Disadvantage!*")

♦ "CAM said the man's 'unhinged' rant came completely provoked..." (*Unprovoked!* What is *wrong* with *The New York Post*?)

♦ "Marine *injured* [italics mine] in Kabul airport blast says..." (He lost his right arm and a leg to a suicide bomber. He was wounded.)

♦ "*Wounds* [italics mine] indicated she had jumped or fallen." (A female student who committed suicide at New York University. This should be "injuries.")

**\*\*\* problems, criticism, pushback, snark...**

♦ "First, NPR needs to get the little things right. If it can't, what does that say about the accuracy of the bigger issues?... / Second, errors of grammar and usage tend to break the listener's concentration. If a listener stops to wonder if he or she really heard an error or a syntactical lapse, then whatever else the reporter or announcer was saying is lost because the listener's train of thought has been derailed." ("Listeners' Language Concerns" by Jeffrey A. Dvorkin, NPR Public Editor, March 29, 2005.)

♦ What is *wrong* with *The New York Post*? "Howard scores a touchdown after recuperating a fumble..." Obviously, it should be "recovering" a fumble. Mistakes like these detract from the newspaper's journalism and commentary, which can be excellent. It gives the reader a sense that the paper doesn't care about what it publishes and is "just" a tabloid.

**\*\*\* analysis**

♦ "But the question is not: Can we understand this typist (who types *professor* as *proffessor*)? It is: How did this typist come to be, and what does this mean for us all?" (Richard Mitchell, 1929-2002. "The Underground Grammarian advocates ridicule.")

♦ This sort of language has many possible explanations.

## vocal fry (contempo-speak)

♦ “Yang has a laid-back, vocal fry cool...” (The comedian Bowen Yang.)

♦ Rachel Syme, in “Feeling Better Now?” (*The New Yorker*), describes a podcast host “affecting a high-pitched tone dusted with vocal fry.” The important word is “affecting.”

♦ People (mainly women) who use upspeak, baby talk and vocal fry are widely considered hesitant and weak, and their language is considered affected and irritating. The matter has been widely discussed and needs no comment from me. NPR’s Selena Simmons-Duffin’s “Talking While Female” animation (2014), and the *comments* relating to it, say everything that needs to be said. The issue has been settled: listen to the two *Fresh Air* Terry Gross episodes about the matter. The first was critical, the second was essentially a retraction. The consensus is, it is wrong to criticize or judge these things.

♦ A CURIOUS CASE. “Exploring how content creators speak on TikTok—it’s known as influencer speak,” NPR, January 31, 2024, now redirects to “Do you have ‘TikTok voice’? It’s OK if you don’t want to get rid of it” by Claire Murashima, Leila Fadel, and Steve Inskeep, NPR, Updated on Morning Edition, February 1, 2024. The transcript does not match the audio. Mmmm... The audio is funny and good. I suspect that the original story was controversial at NPR.

### \*\*\* analysis

♦ “The best example of this is from the journalist Sarah Koenig, and you can hear her going from being in her thirties to being in her forties, over the 21st century, actually developing this vocal fry manner of speaking.” (John H. McWhorter of Columbia University, on his Slate podcast *Lexicon Valley*.)

♦ “But the question is not: Can we understand this typist (who types *professor* as *proffessor*)? It is: How did this typist come to be, and what does this mean for us all?” (Richard Mitchel, 1929-2002. “The Underground Grammarian advocates ridicule.”)

♦ "Watts (2001) has made the argument that to have a voice an agent must find a space where the voice can be concretized... ♦ "The deceased was an eleven-year-old girl who had died from a ruptured liver after being thrown from a horse. A priest in an apron laid the corpse on a stone and began cutting away. Now standing, now squatting, he wielded hatchet and knives with practiced hands... [The] birds swarmed to their dinner table. The feast began... This was the sky burial... To Tibetans this is natural and right." (An eyewitness account by the great photojournalist Kazuyoshi Momochi of a sky burial, from his wonderful book *Pilgrimage*.)

♦ "We have an unusual method of disposal of the dead. The Parsi corpse is exposed to the rays of the sun and the corpse is consumed or devoured by birds of prey: vultures, kites and crows." (Khojeste Mistree, a Parsi in Mumbai.)

♦ "There were far-going Arab dhows on the pearly waters, and gaily dressed Parsees wading out to worship the sunset. Of their creed I knew nothing, nor did I know that near our little house on the Bombay Esplanade were the Towers of Silence, where their Dead are exposed to the waiting vultures on the rim of the towers, who scuffle and spread wings when they see the bearers of the Dead below. I did not understand my mother's distress when she found 'a child's hand' in our garden, and said I was not to ask questions about it. I wanted to see that child's hand." (*Something of Myself* by Rudyard Kipling, which he wrote "Looking back from this my seventieth year." At the time, he was a boy of perhaps four, in 1869.)

♦ "After being properly necklaced, according to custom, with great garlands made of yellow flowers, and provided with betel-nut to chew, this pleasant visit closed, and we passed then to a scene of a different sort: from this glow of color and this sunny life to those grim receptacles of the Parsee dead, the Towers of Silence. There is something stately about that name, and an impressiveness which sinks deep; the hush of death is in it. We have the Grave, the Tomb, the Mausoleum, God's Acre, the Cemetery; and association has made them eloquent with solemn meaning; but we have no name that is so majestic as that one, or lingers up on the ear with such deep and haunting pathos. / On lofty ground, in the midst of a paradise of tropical foliage and flowers, remote from the world and its turmoil and noise, they stood—the Towers of Silence; and away below was spread the wide groves of cocoa palms, then the city, mile on mile, then the ocean with its fleets of creeping ships all steeped in a stillness as deep as the hush that hallowed this high place of the dead. The vultures were there..." (*Following the Equator: A Journey Around the World* by Mark Twain. When he visited Bombay in 1895, he was an old man of 60.)

♦ "President Walter Mitty" (A disparaging remark by an online commenter about a Joe Biden story involving the military. Other commenters described the story more harshly, as an example of "stolen valor.")

♦ "Not everyone admires the [A&E's Cold Case Files message board on EAR-ONS] board sleuths or their efforts [to identify the Golden State Killer]. One agitator came on recently to rant about what he characterized as wannabe cops with a twisted, pathetic obsession. He accused them of being untrained meddlers with an unhealthy interest in rape and murder. / 'WALTER MITTY DETECTIVE,' he wrote, / By then I was convinced one of the Mittys was probably going to solve this thing." (*I'll Be Gone In The Dark* by Michelle McNamara.)

♦ "I want Keith back. I want him back now...I want people to have a better life...The war needs to stop..." (Aviva Siegel, held hostage by Hamas for 51 days before being released. Her husband Keith is still being held hostage.)

\*\*\* analysis

♦ This usage is like a performative: I want it done; I want him cancelled; I want him dead; we want her home (abducted), etc.

♦ As ESL or EFL teachers, we have all taught "want" in the same way. Not ordinarily used in the progressive, followed by a to-infinitive. The way we customarily teach it simply does not reflect the reality of how it is now used. "Following the shooting, police were wanting to talk to the baby's father..." (ABC, Meredith Deliso.) "You might want this turned off if you need greater PC performance." (Anti-virus.)

### \*\*\* children and war

♦ "Take an old broomstick, and to one end nail a slim triangle of wood, suitably whittled; you than have a Kentucky rifle, as good as anything Daniel Boone had... All you have to do is crook your finger and say, 'Bang!' loudly, and you have killed a moose, or a grizzly bear, or a redskin. / If you preferred to be an Indian the same shooting iron would serve. There were enough dead sticks lying around in the woodlot to build a wigwam... As an Indian, of course, you were never shot by Daniel Boone; instead, you shot him, and with a wooden knife whittled out of any stray piece of a packing box you could dash in and lift his scalp. / A pal sometimes joined me in this game, and we found that it was best if we were both on the same side—that is, each of us was an Indian, or each was a frontiersman, and our foes were wholly imaginary. Splitting up, and hunting each other, usually led to arguments about who had really shot whom, and the game was likely to break up in a row. Also, it was easier to scalp a victim who did not really exist than it was to scalp a living, active small boy. He was apt to complain that you pulled his hair too hard, and there was always the danger of sticking a wooden scalping knife in his eye. On the whole, it was better to be Indians than to be frontiersmen; we had an excuse to yell, giving the blood-curdling war whoop, and off in the woods there were no adults to lean out of windows and tell us we were making too much noise. We had the world to ourselves." (*Waiting for the Morning Train: An American Boyhood* by Bruce Catton.)

♦ "The object of the Germans in making Zeppelin raids on London was to produce panic and a cry for peace. It did neither... / But while there was no panic there were great hardships, as a visit to any of the Tube stations in the East of London on the night of an air-raid would have shown—the stairs crowded with half-awakened and hungry children, the platforms so packed with humanity that there was not a vacant square foot. I used to wonder how many of these children would feel the permanent effects. On the whole, however, young children between five and thirteen really seemed to enjoy air-raid nights. They were full of excitement, and you would take them out of bed wrapped in blankets and give them unexpected meals. It was a little grim when one knew the reality to hear from infant lips, 'Oh, Daddy, I do hope there'll be an air-raid to-night.'" (*Queer People* by Basil Thomson, head of the Criminal Investigation Department at Scotland Yard. World War I.)

♦ "Living was resumed in San Pietro. Children are able to forget quickly. Yesterday, they wept. Today, there are smiles, even laughter. Tomorrow it will be as though the bad things had never happened." ("The Battle of San Pietro" 1945 U.S. Army Documentary John Huston WWII Italian campaign 80824. Up next for the surviving soldiers on both sides and the Italian civilians was the Battle of Rapido River, and the Battle of Monte Cassino.)

♦ "When I was born in Munich only two weeks later a bomb hit the house next to us and our place was half destroyed and my mother discovered me—the baby—under a foot of shards of glass and debris. But I was unhurt but my mother fled to the remotest mountain valley in Bavaria and we got stuck there... [I]t was occupied by sixty Americans at the very end of the war... And sixty Americans moved in in jeeps, and they were totally relaxed, chewing gum, and I had the feeling this was all the Americans of the world and for the first time I saw a black man. And I was totally mesmerized by seeing him because I had only heard about black people in fairy tales. And I immediately became friends with him and talked to him for hours... [O]nly when I was eleven and the war was well over I saw destroyed cities and bombed out places and I developed a concept of what must have happened... [I]t's strange because everybody thinks that German children who grew up in the post-war time had a terrible childhood. On the contrary, nobody was frightened. All my school friends who grew up in the cities, they were...are delirious about speaking of this time when they grew up in ruins and it was pure anarchy in the best sense of the word. There were no fathers around to tell them what to do and how to do things, they would be the masters and the kings of let's say a whole block that was bombed out and it was a most wonderful playground for children... [T]he childhood of practically all the children who grew up in the post-war time was wonderful, as strange and as paradoxical as it may sound... ("Werner Herzog on the Story Behind 'Rescue Dawn,'" NPR, Fresh Air, July 6, 2007. Herzog was born in 1942.)

♦ "The Second World War was one of the most horrific events of the 20th century. But for me, it was one of the greatest things. It meant evacuation, escape from the Blitz with my brother and mother, the second time around. We were transported from smoke-choked London to the bliss of the Norfolk countryside, where I could run around in the fresh air and nick apples and have a massive cart-horse as a pet. There was very little sugar, no sweets, but free orange juice, cod-liver oil and vitamins. For most people, rationing was terrible, but for people like me, the wartime diet was a great improvement. My rickets were cured, and I shot up, like a weed. Because of the war, I got the opportunity to take the eleven plus exam, to get a place at grammar school. Very unusual for a boy from my background. My father survived Dunkirk, El Alamein, and the liberation of Rome, and came back tired, sadder, but a daily reminder of how lucky we were. The telegram we had dreaded every day of the war had never arrived, and when I came back to London after the war, twelve years old, still lanky, but now six feet tall, we were re-housed in a pre-fab... It had electric lights, hot water, a proper bath, a refrigerator, an inside toilet. These were all firsts for us, and it felt like luxury." (*Blowing the Bloody Doors Off* by Michael Caine, BBC, Book of the Week.)

♦ "He explained that night on his balcony that growing up, on some level, he had liked the war. When it started in 1975, he was only three years old. Yet even though war had become his generation's normalcy, he knew that it was not an ordinary life. It was better! One morning he might have school, and then the next day school would be closed. He felt free and played endlessly, even when in the dark in the underground bunkers where he had spent days and nights as the war raged on—a constant—above them. / It was what he saw in American movies come to life. He knew that without conflict, there would be none of the stories of heroism and drama that entertained him endlessly. And like in the movies, he didn't see anyone directly get hurt. Death was meaningless, just like it was on the big and small screens. Like many Beirutis, his family would migrate to relatively safer regions each time things heated up where they were. Intense clashes in Beirut? They would head to the mountains to wait it out." (*The Home That Was Our Country: A Memoir of Syria* by Alia Malek.)

♦ "Meade wrote orders for Sheridan and his ten thousand horsemen to ride past the rear of Lee's army, drive toward Richmond, and

harass the enemy... Now Sheridan issued a full-scale challenge to Stuart's cavalry. For the next sixteen days, detached from the Army of the Potomac, Sheridan, with matchless gusto, played havoc with Lee's army, even penetrating Richmond's outer defenses... On May 11 [1864], at Yellow Tavern near Richmond, Sheridan's men routed Confederate cavalry under Stuart, who was mortally wounded, robbing Lee of a premier lieutenant. A flamboyant figure partial to ostrich-plumed hats and scarlet-lined capes in battle, James E. B. Stuart was an inspired warrior whom the South couldn't afford to lose. Upon hearing of his death, Lee fought off tears... Earlier in the war, the Confederate cavalry had been preeminent but now, thanks to [Sheridan], the Union cavalry matched and overtook it." (*Grant* by Ron Chernow.)

♦ "On Sept. 19, 1862, just two days after the Battle of Antietam, Alexander Gardner, an employee of the photographer Mathew Brady, began documenting the battle's grim aftermath. One of Gardner's photographs, titled 'Dead Horse of Confederate Colonel: both killed at Battle of Antietam,' depicted a milky-white steed lying on the field in an eerily peaceful repose...[The Horse] very likely belonged to Colonel Strong, and it became something of a landmark among the Union soldiers left on the field because of its strangely peaceful appearance. Gen. Alpheus Williams wrote, 'The number of dead horses was high. They lay, like the men, in all attitudes. One beautiful milk-white animal had died in so graceful a position that I wished for its photograph. Its legs were doubled under and its arched neck gracefully turned to one side, as if looking back to the ball-hole in its side. Until you got to it, it was hard to believe the horse was dead. / Oliver Wendell Holmes Sr. saw the horse four days after the battle while searching for his wounded son. Later, Holmes examined Gardner's photograph and said it was the same horse.' ("The Dead of Antietam," by Terry L. Jones, *The New York Times*, September 24, 2012.)

♦ "The wounded were, many of them, placed in the Chancellorsville mansion... The Confederates got exact range of the building, and in a short time the location became 'very hot.' As Gen. Hooker stood on the porch, a cannon-ball struck the pillar against which he was leaning at the time, and the violent concussion so stunned him that he fell to the floor... Still another came and struck a poor soldier who was quenching his thirst at the well near the building. We were unwilling to leave the wounded, and while we were in a dilemma as to what was best to do, another ball came and struck the fore-leg of a beautiful bay horse belonging to an officer on Gen. Hooker's staff. It smashed the entire leg from the breast to the hoof. The poor horse jerked back, broke the halter-strap, fell on his back, then recovered himself, arose and hobbled away on three legs, dangling the hoof of the fourth leg, which was held suspended by a strip of skin. This strip of skin, about two inches wide, and the hoof were all that remained of the fore-leg. Blood flowed profusely and streaked the ground wherever he passed. He was soon shot and put out of pain. I hardly remember a sight that touched my heart so keenly during the entire battle. The innocent animal had no part in the fight, but he was a silent victim." (Chancellorsville. From *Memoirs of Chaplain Life* by W. Corby.)

♦ "Comanche was known as the sole survivor of the General George Custer's command at the Battle of the Little Bighorn on June 25, 1876. A mustang captured as a wild horse and gelded, he became the favorite mount of Captain Myles Keogh of the 7th Cavalry. He saw frequent action and sustained some 12 wounds. A burial party found him severely wounded on the battleground and transported him by steamer to Fort Lincoln, 950 miles away, where he spent the next year recuperating. He was never again to be ridden, and orders excused him from all duties. Most of the time he freely roamed the Post and flower gardens. At formal regimental functions he was led, draped in black, stirrups and boots reversed, at the head of the Regiment. When the Cavalry was ordered to Fort Riley, Kansas, in 1888, Comanche, aging but still in good health, accompanied them and continued to receive full honors as a symbol of the tragedy at Little Bighorn. Finally, on November 7, 1891, about 29 years old, Comanche died of colic." (The Smithsonian Institute.)

♦ "It is estimated that 16 million animals served during the First World War, and by 1916 alone the warring nations had raised 103 cavalry divisions with over a million horses."

♦ Of the 14 ships [chartered by the Army to carry AEF troops to France at the start of the war], 10 were designated to carry human passengers, while 4 were designated as animal ships. Animal ships carried horses and mules, up to 500 at a time. The ships were generally cargo ships that had to be modified with ramps and stalls. There was initially a great mortality rate of up to four percent for the

horses and mules. But then the military began transporting veterinarians and veterinary detachments with the animals, and the mortality rates dropped, sometime to zero percent. The crossing could take up to 22 days. One such ship was the SS *El Oriente*. At the end of the war, it was refitted to carry troops home. Other animal ships were the *El Occidente* and *El Sol*.

♦ "Every British officer understood animals, as a point of honor." (*Seven Pillars of Wisdom*, Book VIII, Chapter XCV by T.E. Lawrence.)

♦ "Almost two hundred horses lay on the ground in their death throes, or fled in all possible directions, maddened by pain and with blood spurting from their dangling guts. Any riders whose feet had been caught in the stirrups were dragged with them and any soldiers foolish enough to try to stop them were trampled under their hooves." (Rafael de Nogales at the Second Battle of Gaza in April 1917. His tightly packed cavalry division has been bombed by six or seven British biplanes. From *The Beauty and the Sorrow* by Peter Englund.)

♦ "They have been slaughtering the draught animals and the mules for some time but they have consciously been sparing the riding animals. That is no longer possible. Another attempt to relieve them has run into the sand and orders have now been given that the last horses will have to be slaughtered in order to feed the besieged garrison, which will soon be starving. / [Edward] Mousley tears up some fresh grass and goes to where the horses are lined up. His own horse, Don Juan, obviously recognises his owner and welcomes him eagerly in the way he has taught the horse to do. Mousley feeds him the grass. / Then the slaughter begins. / A non-commissioned officer shoots the horses. There is the crack of a gunshot and one by one the big, heavy animals crumple to the ground. The blood flows. At first Mousley watches, noting that the horses follow the proceedings, trembling as they wait their turn. Like the other horses Don Juan stamps uneasily but otherwise remains quite still. When it is almost Don Juan's turn Mousley can watch no longer; he asks the man with the gun to take careful aim and to tell him when it is all over. Then he kisses the horse's cheek and walks away. He can see how the horse turns and watches him go. / Then there is another crack from the gun. / His dinner that evening is Don Juan's heart and kidneys. (These parts of the horse are always reserved for the owner—Mousley has also kept Don Juan's black tail.) Admittedly it feels strange, but he does not think there is anything wrong about it. He writes in his diary: 'I am sure he would have preferred that I, rather than another, should do so.'" (*The Beauty and the Sorrow* by Peter Englund. The place is Kut al-Amara, Mesopotamia, 10 April 1916.)

♦ Germany's invasion of Russia on June 22, 1941, was the largest invasion in military history, involving perhaps 4 million troops. According to the Wikipedia article "Operation Barbarossa," the invasion included about 600,000 motor vehicles... and over 625,000-700,000 horses for non-combat operations.

♦ "The first Russian patrol came in sight of the camp about midday on 27 January 1945. Charles and I were the first to see them: we were carrying Somogyi's body to the common grave, the first of our room mates to die. We tipped the stretcher on to the defiled snow, as the pit was now full, and no other grave was at hand: Charles took off his beret as a salute to both the living and the dead. / They were four young soldiers on horseback, who advanced along the road that marked the limits of the camp, cautiously holding their sten-guns. When they reached the barbed wire, they stopped to look, exchanging a few timid words, and throwing strangely embarrassed glances at the sprawling bodies, at the battered huts and at us few still alive..." (*The Truce* by Primo Levi.)

♦ "The various SF teams that were in Afghanistan or would soon arrive split into smaller three-man and six-man cells to cover more ground. Some of them quickly found themselves on borrowed horses, in saddles meant for Afghans much lighter and shorter than American Green Berets. Most had never ridden before, and they learned by immediately riding for hours, forced to keep up with skilled Afghan horsemen..." ("First to go: Green Berets remember earliest mission in Afghanistan" by Elizabeth M. Collins, U.S. Army, army.mil, February 8, 2017. Those soldiers arrived in Afghanistan immediately after 9/11 and embedded with the Northern Alliance and the great Ahmad Shah Massoud, the Lion of the Panjshir.)

♦ "We must take September 15 as the culminating date... / It was one of the decisive battles of the war, and, like the Battle of Waterloo, it was on a Sunday... / The Group Operations Room was like a small theatre, about sixty feet across, and with two storeys. We took our seats in the Dress Circle. Below us was the large-scale map-table, around which perhaps twenty highly-trained young men and women, with their telephone assistants, were assembled. Opposite to us, covering the entire wall, where the theatre curtain would be, was a gigantic blackboard divided into six columns with electric bulbs, for the six fighter stations... One after another signals came in, '40 plus', '60 plus'; there was even an '80 plus'. On the floor-table below us the movement of all the waves of attack was marked by pushing discs forward from minute to minute along different lines of approach, while on the blackboard facing us the rising lights showed our fighter squadrons getting into the air, till there were only four or five left at 'Readiness'... / Presently the red bulbs showed that the majority of our squadrons were engaged. A subdued hum arose from the floor, where the busy plotters pushed their discs to and fro in accordance with the swiftly-changing situation. Air Vice-Marshal Park gave general directions for the disposition of his fighter force... There was not one squadron left in reserve..." (*Their Finest Hour* by Winston S. It's an interesting conceit to consider, and Anna gets some of it right. Actual ducks, when frightened, do appear calm but can be seen to paddle harder, seemingly to gain the momentum necessary to take flight. But do ducks paddle to keep from drowning? I just highlighted "do ducks paddle to keep from drowning?" right-clicked, clicked search, and was astonished to discover the article, "The New Duck Metaphor | The Stanford Daily." It's a wonderful opinion by Adam Johnson who had the same question I had and answered it. Interestingly, it was datelined September 26, 2012, ten years *before* Roodnitsky's article. ♦ "Geronimus coined a term for this chronic stress—she calls it 'weathering.'" (Arlene Geronimus, University of Michigan.)

♦ "Clearly racism and experiencing racism, that also contributes to this kind of weather effect. You're in fight-or-flight mode. And so that has a real significant biological effect that contributes to premature aging." (Joseph Betancourt of the Massachusetts General Hospital. Heard on "Death Rate Among Black Americans Declines, Especially For Elderly People," NPR, All Things Considered (with Rob Stein), May 2, 2017.)

♦ "Author Linda Villarosa has been writing about the racial disparities in health outcomes for decades and recently covered the topic for the New York Times' 1619 Project. She says that while she used to think poverty was to blame for Black Americans' health problems, she's now convinced that bias in the health care system and the 'wearing' affect (sic) of living in a racist society are taking a serious toll on African Americans." ("1619 Project" journalist lays bare why Black Americans 'live sicker and die quicker,'" NPR, Fresh Air (with Dave Davies), June 14, 2022.)

♦ "The other thing is the idea of weathering. So weathering is the idea that fighting against discrimination day in, day out ages you prematurely. Each time an incident happens, it fires up the systems of your body, including your blood pressure, your cortisol, your stress hormones and even your pulse rate. So if that happens over and over and over, as it does in the case of people who are Black in this country, it weathers the body the way a storm might weather a home—knocks the shutters off, chips the paint. If we are weathered, which is a kind of premature aging, then it's not a shock why we would have worse COVID outcomes at younger ages." Since the 1830s, when de Tocqueville visited America, the United States has been swept by a series of popular movements concerned with improving health variously through diet, exercise, moral purity, positive thinking, and religious faith. Today, were a revived de Tocqueville to observe Americans jogging in parks, shopping in health food stores, talking psychobabble, and reading endless guides to keeping fit, eating right, and staying healthy, he would probably conclude that, if anything, the obsession is now more pronounced.” (*The Social Transformation of American Medicine* by Paul Starr, winner of the 1984 Pulitzer Prize for general non-fiction.)

♦ “Why care for these dead bodies? They really have no friends but the worms or fishes. Their owners were coming to the New World, as Columbus and the Pilgrims... I saw their empty hulks that came to land; but they themselves, meanwhile, were cast upon some shore yet further west, toward which we are all tending, and which we shall

reach at last..." ("The Shipwreck" by Henry David Thoreau, writing about the Irish immigrant ship *St. John*.)

♦ "It's a mile to your objective now, but it's a mile of thrills... A one-pounder in a hedge scares you with several well-placed shots before it 'goes west' [is destroyed]." (A member of a tank crew in World War I.)

♦ "The Montana doctor, McCray, had tried to find a serum to guard his fellow citizens and one morning woke up with bloodshot eyes and an ache in his bones. In ten days McCray had gone West to join McClintic..." (McCray died, as had McClintic before him. From *Men against Death* by Paul De Kruif.)

♦ "At Annezin, we found everything in confusion. 'We're standing-to—at half an hour's notice for the trenches,' they told us. We packed up hastily, and in a few minutes the whole Battalion was out in the road in fighting order. Our destination was the Hohenzollern Redoubt, new trench maps of which were now issued to us. The men seemed in high spirits, even the survivors of the show: singing to the accompaniment of an accordion and a penny-whistle. But once, when a 'mad-minute' of artillery noise began, they stopped and looked at each. / 'That's the charge,' Sergeant Townsend said sententiously. 'Many good fellows going west at this moment; maybe chums of ours.'" (*Good-bye to All That* by Robert Graves. World War I. The Western Front.)

♦ "Things have changed so much since Sicily. Too many pals gone West... Pray God we get a decent break. We need it worse than you could ever know..." (*And No Birds Sang* by Farley Mowat. World War II. Italy. The Moro River.)

### \*\*\* moles, gophers, groundhogs, muskrats, hedgehogs...

♦ Moles are very reclusive; they tend to stay underground. Many Americans associate whack-a-mole with the film *Caddyshack* and the character played by the great actor Bill Murray. Of course, Murray fought a gopher, not a mole. And the 1993 film *Groundhog Day* was concerned with a groundhog / woodchuck. A muskrat is different, a hedgehog is a cute little miniature porcupine, everyone knows what the mighty beaver is, and chipmunks are not involved in any of this. Americans tend to hate subterranean rodents that dig up their lawns, gardens, fields, and dams, and kill them. Watch *Caddyshack* 1980-Think Like a Gopher Scene

♦ "In Republican circles, 'misinformation' is a dog whistle for the denigration and censorship of conservatives by the leftist press." (Search NPR for misinformation and you get 3,071 hits...and counting.)

### \*\*\* analysis

♦ "It occurred to me that, because the world media establishment had ignored the Balkans for so long..., these people never had to learn, as the Israelis and Arabs did, how to talk in code, so as not to offend Western sensibilities with their racial hatred. In the Balkans, people spoke more honestly than in the Middle East, and therefore more brutally." (*Balkan Ghosts: A Journey Through History* by the superb traveler, writer, and correspondent Robert D. Kaplan.)

### \*\*\* analysis

The commentators are discussing the idea that Stanley Tucci's character in the 2006 film *The Devil Wears Prada* represents Andre Leon Talley.)

♦ "Here's an interesting thing about the Hollywood Cross stuff. When I wrote the first Alex Cross book, I didn't have a lot of money and Hollywood came calling—knock, knock, knock, knock, knock. They offered seven figures, and I did not have a lot of money. They said, 'We just want one change; we want Alex to be a white guy.' And I said, 'Fuck you.'" (James Patterson, in his interview with Brande Victorian for *The Hollywood Reporter*.)

The America of your dreams is calling for you to get back up...” (President Biden addresses the nation following Kamala Harris’ loss to Donald Trump in the 2024 U.S. presidential election.)

♦ A FUNNY CARTOON. A contemporary young woman, driving a car, is speaking to another contemporary young woman who for some reason is sitting in the backseat. The cartoon is signed W. McPahil. Funny!)

♦ Journalism has never been worse, and things will only get worse, as proofreading is automated and more and more of what we see and hear is generated by artificial intelligence.
