

“A Dictionary of Contemporary Figurative Language” is meant to be an appendix to an earlier, more comprehensive work: ED648945, “A Dictionary and Thesaurus of Contemporary Figurative Language and Metaphor 2024.” This appendix simply updates the dictionary of that previous work to better reflect the language used during the 2024 United States presidential election, during which terms like *joy*, *authenticity*, *fascist*, *genocide*, and *they/them* figured prominently. As stated for the previous work, “This is first and foremost a resource for EFL / ESL students. It should also be of interest to teachers, curriculum developers, materials writers, teacher trainers, and lexicographers. And it has attracted interest from experts interested in metaphor detection, natural language processing (NLP), and social-media analysis, some of whom are using the tool of artificial intelligence (AI).” This appendix lacks the thesaurus of the previous work.

Another condemned it as ‘the current default to express agreement, endemically present on TV in one-on-one-interviews.’ Frequently ‘said too loudly by annoying people who think they’re better than you,’ bemoaned an aggrieved observer. ‘Sounds like it comes with a guarantee when that may not be the case,’ cautioned a wary watchdog.” (“Absolutely” is on the Lake Superior State University 2023—Words banned for “misuse, overuse, and uselessness.”)

♦ Agency in this sense is almost always a synonym for empowerment and in opposition to a perceived sense of victimhood. It is often affirmation, no matter what the reality is.

♦ A quality almost non-existent in society but often touted as an ideal. Defined by its absence.

♦ Refers to nothing real.

♦ "These abstract words are freely used in the political world... When we hear them, we had best be cautious. Ask questions of ourselves. What has the candidate promised? 'Freedom'? 'Freedom' from what? And 'liberty' to do what? This 'freedom' he is going to give you is already restricted by your obligations to your family, your business, your duties to your community, state, and nation; by your inherited characteristics, by your environment; by your wealth and education, or by the lack of them; and by a thousand laws. What is our candidate going to do about all that? What new kind of 'freedom' can he give us?" ### \*\*\* Ernest Shackleton...

♦ "During the morning we started a fire in the cave with wood from the top-sides of the boat, and though the dense smoke from the damp

sticks inflamed our tired eyes, the warmth and the prospect of hot food were ample compensation. Crean was cook that day, and I suggested to him that he should wear his goggles, which he happened to have brought with him. The goggles helped him a great deal as he bent over the fire and tended the stew. And what a stew it was! The young albatrosses weighed about fourteen pounds each fresh killed, and we estimated that they weighed at least six pounds each when cleaned and dressed for the pot. Four birds went into the pot for six men, with a Bovril ration for thickening. The flesh was white and succulent, and the bones, not fully formed, almost melted in our mouths. That was a memorable meal. When we had eaten our fill, we dried our tobacco in the embers of the fire and smoked contentedly." (*The Malay Archipelago* by Alfred Russel Wallace.)

♦ "That night the fire-flies were in countless thousands, in millions, it seemed... A man thinks himself wronged by society—he is in debt and cannot pay—he is taken for a slave or has gambled away his wife or child into slavery—he sees no way of recovering what he has lost... He grasps his kris-handle, and the next moment draws out the weapon and stabs a man to the heart. He runs on, with bloody kris in his hand, stabbing at everyone he meets. ‘Amok! ### \*\*\* war, conflict, the military...

♦ “The arrival of the nurses was the talk of the army, from Scutari to Sebastopol. Florence’s name alone supplied the officers with material for heavy-footed jokes. They referred to her simply as ‘the bird.’ The chief medical officer of the Crimean army, Dr. Hall, summed up the general opinion. ‘It is very droll,’ he said between his teeth, when told of Miss Nightingale’s appointment. / ‘I cannot conceive,’ an eyewitness later wrote, ‘as I now calmly look back on the first three weeks after the arrival of the wounded from Inkerman, how it could have been possible to have avoided a state of things too disastrous to contemplate, had not [Florence] been there.’ / ‘I am a kind of General Dealer,’ [Florence] wrote to Sidney Herbert, ‘in socks, shirts, knives and forks, wooden spoons, tin baths, ... towels and soap, small tooth combs, precipitate for destroying lice, scissors, bedpans and stump pillows.’” (*Florence Nightingale* by Ruth Fox Hume.)

♦ “6. Conservative Surgery in Compound Fracture of Femur. / The military surgeon [must] determine upon the propriety of amputation in compound fractures of the femur, the result of gunshot wounds. / The authorities, both French and English, teach us not to trust these cases to nature, and broadly state that, in the operation alone, there is hope; but the statistics, both in the Crimean campaign and in our own service, prove that the mortality after amputation is enormous, and force us to consider the propriety of conservative practice in this numerous class of surgical accidents. / In various numbers of the Journal [Confederate States Medical And Surgical Journal] the reader will find many interesting observations bearing upon this question, and we submit at this time a consolidated statement of compound fractures of femur treated without operation, compiled from the records in the Surgeon General’s office, from June, 1862, to February 1, 1864, inclusive. We have in this summary, excluded all cases not positively determined, and hence, while the number of observations is greatly reduced, the value of the conclusion is increased in like proportions. / Total number of case, 221—recovered, 116—52 per cent. / Average period of recovery, 104 days—greatest period, 255 days, and least 41 days. Average period where death occurred, 52 days—greatest period, 185 days—least, one day. Average amount of shortening, 1 9-10ths inches—greatest, 5 inches, and least, half an inch. / When we compare directly the results of amputations with the table of cases not operated on, we feel still more disposed to rebel against the authority of Guthrie, McLeod, Larrey, Percy and Dupuytren, and at least hesitate before condemning the shattered limb to instant ablation. Our own statistics are as follows: / 507 cases amputated—250 recovered—50 per cent. / 221 cases not amputated—116 recovered—52 per cent. / The chance for life being more than equal, the value of the leg saved should be considered, and the table throws important light on this point—the average shortening is less than two inches. / Legouest: 1,664 cases amputated—recovered, 123—7 per cent. / 337 cases not amputated—recovered, 117—31 per cent. / Chimborazo Hospital Statistics: 31 cases not amputated—recovered, 19—61 per cent. / These observations prove that whenever, in compound fracture of femur, the result of gunshot wound, there is a doubt as to the propriety of amputation, that we should give the leg the benefit of the doubt—the chances of life being at least equal, and the value of the limb, after recovery, being worth the effort to save it. —Confederate States Medical and Surgical Journal.

♦ 1861-1865. The American Civil War. Doctors knew of ether and chloroform but still lacked an understanding of antiseptics and spread infection with dirty instruments and dressings. “After the Battle of Perryville in 1862, water was so scarce that Union surgeons performing amputations almost around the clock did not wash their hands for two days.” (*This Republic of Suffering* by Drew Gilpin Faust.)

♦ “From the stump of the arm, the amputated hand, / I undo the clotted lint, remove the slough, wash off the matter and blood; Back on his pillow the soldier bends, with curv’d neck, and side-falling head; / His eyes are closed, his face is pale, he dares not look on the

bloody stump, / And has not yet looked on it.” (“The Dresser” by Walt Whitman, 1865. “Slough” would be pronounced, “sluff.”)

♦ “Corday also comes across a representative of a new phenomenon, the soldier beggar. Of late it has become usual to see them at restaurants or cafes. They are often wearing medals on their chests, fine medals like the Croix de Guerre, awarded for heroism in the field. They sell picture postcards or sing patriotic songs to collect a little money. / The begging soldier Corday meets on the pavement has an arm missing. He is also drunk. He is meandering through the stream of people, asking one, then another, for a few coppers or for a cigarette at least. And he repeats the same word all the time: ‘Peace... peace...’” (*The Beauty and the Sorrow* by Peter England. He is writing about World War I.)

♦ In *Seldom Disappointed*, the great Tony Hillerman writes about the seemingly callous banter and traditions of badly wounded soldiers on a hospital ward in Europe during WWII. For example, a soldier has his right arm amputated and when he returns to the ward he is greeted by his comrades as “Lefty!” Hillerman makes the point that, while such behavior seems “barbarous,” it is, in fact, an antidote to self-pity.

♦ “I never, ever in a million years thought I would do a marathon so now I feel like I could do anything. I really believe you’ve got to have goals when you’re injured like this. I’ve seen people at the hospital who don’t have goals, and they just sit there and slip away.” (Army Sgt. John Kieth, after finishing the NYC marathon in a handcycle. An RPG hit his Humvee in Iraq. He was in an induced coma for 2 weeks, and woke up at Walter Reed hospital. Doctors tried to salvage his limb, but after a month Kieth made the decision to have it amputated, after talking to amputees at Walter Reed, who inspired him because they were so active.)

♦ "We probably have crested a peak, this seems to be the analogy of the day, a mountaineering analogy, but the reality is, we've only just begun the descent, and we're still at a very very high altitude, and we know that that descent is going to take us months." (Chris Hobson from NHS Providers, speaking about the COVID-19 pandemic.)

♦ "Gottingen was the scene of Oppenheimer's first real triumph as a young man coming of age. Becoming a scientist, Oppenheimer later remarked, is 'like climbing a mountain in a tunnel: you wouldn't know whether you were coming out above the valley or whether you were ever coming out at all.' This was particularly so for a young scientist on the cusp of the quantum revolution." (An astonishing simile. From *American Prometheus: The Triumph and Tragedy of J. Robert Oppenheimer* by Kai Bird and Martin J. Sherwin. The popular 2023 film *Oppenheimer* was based on this book.)

♦ "In the months before meeting Oppenheimer, [Lawrence] had conceived the notion of building a machine capable of penetrating the so far unassailable nucleus of the atom, which existed, he quipped, 'like a fly inside a cathedral.'" (Another astonishing simile from *American Prometheus: The Triumph and Tragedy of J. Robert Oppenheimer* by Kai Bird and Martin J. Sherwin. The popular 2023 film *Oppenheimer* was based on this book.)

♦ "Roosevelt upped the total to \$10 million on the condition that Finland would not directly purchase arms with it. This 'was like offering a clean shirt to a man asking for a square meal...' (The Russo-Finnish Winter War of 1939-40.)

♦ "Eliot's words are everywhere, in other words. The more closely you map 'The Waste Land,' the more it assumes the shape of an isthmus; so much of the past, both public and personal, streamed into its making, and so much has flowed from it ever since." ("On The Rocks: A hundred years of 'The Waste Land,'" by Anthony Lane, *The New Yorker*, October 3, 2022. An isthmus connects two larger pieces of land. By this wonderful analogy, the larger pieces of land are the past and the present.)

♦ "[Masterclass] is to a medical degree what an apple is to an orange planet." ("What Is MasterClass Actually Selling?" by Carina Chocano, *The Atlantic*, September 2020. A wonderful example of an analogy focusing on how two things are NOT similar.)

♦ The destruction of the Armenian cemetery in Julfa has been likened to the Taliban's destruction of the Bamiyan Buddhas. (Cultural crimes against humanity. In the media, the extinguishment of Nagorno-Karabakh and the lives of its 120,000 inhabitants ("2023 Azerbaijani offensive in Nagorno-Karabakh") was barely mentioned, submerged by the ongoing "Russian invasion of Ukraine," just as the Russian invasion of Ukraine was submerged by the Israel-Hamas war.)

♦ "I went to math camp when I was fourteen and came home clutching a Rubik's Cube to my chest... I majored in math in college and went on to get my PhD..." (Cathy O'Neil, author of *Weapons Of Math Destruction: How Big Data Increases Inequality And Threatens Democracy*. Chapters are titled: Bomb Parts; Shell Shocked; Arms Race; Propaganda Machine; Civilian Casualties; Ineligible To Serve; Sweating Bullets; Collateral Damage; No Safe Zone; and The Targeted Citizen. The *New York Times* Book Review deservedly praised her for her "gift for analogy.")

♦ "The Atchafalaya Basin is a swampy wilderness that is to crawfish what the Serengeti is to lions." (Calvin Trillin. A wonderful analogy.)

♦ "If we are also able to build a brain scanner that can capture the state of every synapse at a given moment—the pattern of information that neuroscientists call the connectome, a term analogous with genome—then we can upload that pattern into a brain-emulating computer. ♦ "Fed up with the BBC and other outlets reminding us of 1966. It might as well be 1066. Meaningless." (An online commenter about the hype surrounding England's "Lionesses," defeated by Spain in the final of the FIFA 2023 Women's World Cup. To which one reply was, "We lost in 1066 to the French," the reply to that being, "Normans." Perhaps a "reply too far.")

♦ "Like many concerned keepers of the game and its traditions, Sword will often explain the creeping dispassion for baseball in terms of that overcooked analogy about the boiling frog in the pot. 'Part of

what made this so tricky was that the games were getting two or three minutes slower every year rather than half an hour slower, so there was never a point where it felt like a real emergency,' he told me. I offered an alternative analogy, comparing baseball's predicament to a slow-growing tumor that the new rules would surgically excise. 'I'd prefer to go back to the frog,' Sword said. / How did America's beloved old frog find itself in such mortal danger...?' ♦ Camille Vasquez: You also wrote, quote, "Imagine a powerful man as a ship, like the *Titanic*. That ship is a huge enterprise. When it strikes an iceberg, there are a lot of people on board desperate to patch up holes—not because they believe in or care about the ship, but because their own fates depend on the enterprise." (Taps microphone to illustrate the point.) ♦ Anastasia Tsioulcas: "The prosecution asked a defense witness...about an org (organization) chart he had made of Kelly's company. In parts of India, patients are said to suffer from dhat syndrome: they complain of impotence and have the delusion that they are losing their semen. In Nigeria, students who can't retain information and report feeling a burning sensation in their heads are sometimes given a diagnosis of 'brain fog.' ♦ "Hunger was now torturing us. The Cossacks sat gloomily round the fire and hardly spoke. Several times I asked Dersu how we had taken the wrong trail, and were we on the right road. He answered that he had never been in this district before, that he had nothing to go by and, like me, could only guess. Hoping to forget their hunger a little, the men tried to sleep. If I lay down too, but could not sleep. Anxiety and doubt tormented me. If we did not manage to kill something tomorrow, or reach the Iman, things would be desperate indeed. In the summer a man can carry on without food for several days, but in the winter hunger kills quickly." (*Dersu Uzala* by V. K. Arseniev, translated by Malcolm Burr.)

The repercussions of the assassination—comparable to the effect of 9/11—exemplify the transformative power of a terrorist event. But the murders were not a pretext for a war decided in advance—nor did they make conflict inevitable." (Christopher Clark, BBC, "Month of Madness," 23 June 2014.)

♦ "The nineteen-year-old student [Gavril Princip], a Bosnian recruited by Serbia's Black Hand terrorist movement, could not believe his luck. Then he saw their open-top car take a

wrong turn off Appel Quay and pass right by him. The lethal logistics that seem to operate at such moments had transformed error into opportunity. Two point-blank targets presented themselves, and Princip's gun did what it was designed to do." (*Colonel Roosevelt* by Edmund Morris.)

♦ This comes from the Latin for *bird* and *see* and means, "The omens are good." At certain times and in certain places, the direction of flight of a bird might determine whether or not a camel caravan set out that day. Romans would cut open a bird and study the entrails. The early Puritans in the US avidly studied nature for signs.

His biography is emblematic of millions of diaspora people in terms of residency, language, and values. Guamanian “Chamorro Warriors” have a storied history of service in the US military; Perez seems to hate the military. Ned Blackhawk, who won the award for nonfiction at the same ceremony for his book *The Rediscovery of America: Native Peoples and the Unmaking of U.S. History*, is similarly emblematic. Both men prominently joined the demonstration at the end of the ceremony calling for a humanitarian ceasefire in Gaza.)

♦ According to Wikipedia, “The Language Movement catalyzed the assertion of Bengali national identity in East Bengal and later East Pakistan, and became a forerunner to Bengali nationalist movements, including the 6-Point Movement and subsequently the Bangladesh Liberation War and the Bengali Language Implementation Act, 1987. In Bangladesh, 21 February is observed as Language Movement Day, a national holiday.” Most Bengalis in East Pakistan spoke Bengali, with its own Bengali alphabet. But the official language of West Pakistan was Urdu, with a Perso-Arabic script. West Pakistan tried to force Urdu on East Pakistan. This was a huge problem. Especially because Eastern Pakistan had 44 million people, versus 25 million in West Pakistan. At the same time, many Urdu-speaking Muslim Biharis from eastern India, who had fled to East Pakistan, found themselves with the wrong language in Bangladesh and became “stranded Pakistanis.” Many were able to immigrate to Pakistan, but, over the course of decades, they became shunned both in Bangladesh and Pakistan. Tens of thousands of them live in camps in Bangladesh as stateless people to this day.)

♦ “In each production I saw, the performances laid some claim to post-dramatic authenticity. There was an overwhelming sense that pretending—in the theatre!—has become not just unfashionable but passe. (The German scholar and dramaturge Florian Malzacher has written elegantly about avoiding theatre’s ‘representational trap.’) Everywhere in Avignon we were in communication with ‘the real’: no fourth wall went unbroken; actors almost invariably called attention to themselves as actors. Sometimes they were actually non-actors playing themselves...” (“State Of Play: Politics and ‘the real’ at the Festival d’Avignon” by Helen Shaw, *The New Yorker*, August 5, 2024.)

The camera then pans to the Indian’s cheerless face just as a single tear rolls down his cheek. / The ad, which sought to combat pollution, was widely successful...and helped reduce litter by 88% across 38 states... / But while Hollywood trumpeted Iron Eyes Cody as a ‘true Native American’ and profited from his ubiquitous image, the man himself harbored an unspoken secret: he was 100% Italian.” (“The True Story of ‘The Crying Indian’” by Zachary Crockett, *Priceonomics*, September 9, 2014. He was reflecting on some of his favorite writers and artists of an older generation, and the way that their talk was often as effortfully stylized as their work. He’d been thinking about Andre Leon Talley, the fashion writer and editor whose high diction and baroque syntax became hallmarks of his style—and seemed, moreover, like a way of asserting his belonging in a largely white milieu... / Talk of that voice—I knew what Harris meant without having to ask—got me thinking, perhaps slightly defensively, of my own. / ‘You have it a little bit,’ he said, confirming a fear I’d spoken aloud.” (“Outside Man: Jeremy O. ### \*\*\* Isabella, Torquemada...

♦ “On 2 January 1492...Abu Abdullah Mohammed XI surrendered his kingdom and retired to Fez... His surrender marked the beginning of the most crucial four months of Spanish history, seeing as they did both the intensification of that relentless course of religious persecution which was to have so disastrous an effect on the strength and vitality of Spain, and the launching of the most celebrated voyage of exploration ever known. / Few rulers in European history have shown themselves narrower or more bigoted than Isabella... The first auto-da-fe was held in 1481, with six victims. By the time of Isabella’s death in 1504 there had been more than 2,000. / Less than three months after the capitulation of Granada, the Queen felt strong enough to push her policy further. Encouraged by her Inquisitor-General Torquemada—who was himself originally Jewish—on 30 March she decreed that all Jews remaining unconverted by the end of June would be expelled from Spain, all their property confiscated. More than 100,000 were driven out, resulting in a vast Sephardic diaspora in northern Europe and the Near East. Several countries—notably the Netherlands—gave them a warm welcome; the Ottoman Sultan Bayezit II went further, sending a whole fleet of ships to their rescue. / Now it was the turn of the Muslims... (*The Middle Sea: A History Of The Mediterranean* by John Julius Norwich. In an astonishing footnote he writes, “Columbus, who was just setting out on his historic voyage from Genoa, was obliged to alter course because the sea ahead of him was so crowded with Turkish ships bringing Jewish refugees to safety.” Norwich also notes that the Muslims, unlike the Jews, tended to convert to Christianity; even so, the *Moriscos* faced suspicion, hatred, and the inquisition.)

(From the Wikipedia article "Charissa Thomson," about the host and sportscaster. After much male commentary, she switched back to being a blonde. Years later, she would admit that during this period she made up stories to tell on camera. Her contemporary female critics who now charge her with giving credence to the stereotype that sideline reporters are just "eye candy" should be a bit more sympathetic, considering the times.)

♦ The basketball player Angel Reese was nicknamed the "Bayou Barbie" when she went to play at Louisiana State University, because of her eyelash extensions and pink fingernails. She liked the nickname.

Crowds came gawking to see 'the greatest natural & national curiosity in the world.' Barnum profited from the public's hunger for entertainment by planting embellishments and lies in newspapers..." ("Why We Lie," *National Geographic*, June 2017.)

♦ "The 1870s and 1880s were the height of the controversial but enormously popular 'side shows' in America. Hucksters like P.T. Barnum attracted huge throngs by booking fire-eaters, sword swallows, and 'freaks' with assorted medical abnormalities, some bogus, others disturbingly real. There were the 'Wild Men of Borneo' (actually two mentally disabled dwarfs from Ohio), 'Jo-Jo the Dog-Faced Boy' (suffering from hypertrichosis, a profusion of body hair), 'General Tom Thumb' (the world's smallest human), eight-foot giants, bearded ladies, Siamese twins, and people with humongous body tumors attached to their back, face, and scrotum..." (*Bellevue: Three*

*Centuries of Medicine and Mayhem at America's Most Storied Hospital* by David Oshinsky.)

♦ "[Harvey] Leach, who was often billed as the 'shortest man in the world,' had made a name for himself as a performing oddity. In addition to his small stature, one of his legs was eighteen inches long while the other measured twenty-four inches, and when he walked, his arms brushed against the ground like an ape's. According to one of his contemporaries, Leach appeared 'like a head and a trunk, moving about on castors.' / Leach's strange appearance attracted the attention of the American showman and hoaxer P. T. Barnum, founder of the Barnum & Bailey Circus. Barnum dressed the dwarf in the skin of a wild beast and covered the walls of London with placards that read, 'What Is It?' Unbeknownst to Barnum, Leach was so recognizable at that point in his career that people guessed the true identity of this mysterious 'beast' within days. Despite this initial bungle, Barnum retained Leach as a performer, until the forty-six-year-old man died as the result of an injured hip that had become infected." ♦ "With human corpses, human excrement, and rotting rations scattered across Peleliu's ridges, the blow flies or bluebottle flies underwent a population explosion. Those nasty insects were so large, so gluttoned, and so lazy that some could scarcely fly... It was revolting, to say the least, to watch big fat blowflies leave a corpse and swarm into our C rations... Each morning, just before sunrise, when things were fairly quiet, I could hear a steady humming sound like bees in a hive as the flies became active with the onset of daylight. They rose off the corpses, refuse, rocks, brush, and wherever else they had settled for the night like a swarm of bees. There numbers were incredible." (*With the Old Breed* by E.B. Sledge.)

♦ There was an all-pervasive stench of putrefaction and millions of fat blowflies filled the air. Even Junger, normally so cool, was shaken by what he saw. 'The ploughed-up battlefield was a scene of horror. The dead lay there among the living defenders. When we dug bunkers we saw how the dead lay in layers one above the other. One company after another had been mown down as they made a stand shoulder to shoulder under the drum fire; then their corpses had been buried under the tons of earth hurled up by the projectiles and new men had taken the place of the fallen.'" (*The Beauty and the Sorrow* by Peter England.)

A century later such battlefield tourism would flourish even if its more gruesome collecting tastes were suppressed.” (The site of the Battle of Waterloo, in Belgium. ♦ Years ago they had marched thousands of miles to legendary battlefields... they had once gone to the ends of the earth and seen beyond the farthest horizon... We looked at these men in blue, existing in pensioned security, honored and respected by all... and we were in awe of them. Those terrible names out of the history books—Gettysburg, Shiloh, Stone’s River, Cold Harbor—came alive through these men. They had been there... and to watch them was to be deeply moved.” (*Waiting for the Morning Train: An American Boyhood* by Bruce Catton.)

♦ “People who visit Verdun, the battlefield of Borodino or Malakhov Kurgan at Sebastopol must find it equally strange to find children playing, women doing their washing, carts full of hay and old men carrying rakes. Columns of French soldiers and trucks covered in tarpaulins once passed over fields that are now full of vines; now there is only a hut, a few apple trees and some kolkhoz sheep where

Murat’s cavalry advanced, where Kutuzov sat in his armchair and ordered the Russian infantry to counter-attack with a wave of his tired hand. Nakhimov stood on a mound where now there are only chickens and a few goats searching for blades of grass between the stones; this is where the flash-bombs described by Tolstoy were launched, where English bullets whistled and wounded soldiers screamed.” (Alexandra Vladimirovna Shaposhnikova visits the ruins of her house in the immediate aftermath of the Battle of Stalingrad to find queues of women, small huts, old men unloading planks, shirts hanging up to dry, etc. From *Life And Fate* by Vasily Grossman, translated by Robert Chandler, New York Review Books.)

♦ “It was in 1888, when in command of a ship loading in Sydney a mixed cargo for Mauritius, that one day, all of a sudden, all the deep-lying historic sense of the exploring adventures in the Pacific surged up to the surface of my being. / I sat down and wrote a letter to my owners, suggesting that, instead of the usual southern route, I should take the ship to Mauritius by way of Torres Strait... / I passed out of Torres Strait before the dusk settled on its waters. Just as a clear sun sank ahead of my ship I took a bearing of a little island..., an insignificant crumb of dark earth, lonely... But to me it was a hallowed spot, for I knew that the *Endeavour* had been hove to off it in the year 1762 for her captain, whose name was James Cook, to go ashore for half an hour. What he could possibly want to do I cannot imagine. Perhaps only to be alone with his thoughts for a moment... It may be that on this dry crumb of the earth’s crust... he had tasted a moment of perfect peace.” (“Geography and Some Explorers” by Joseph Conrad.)

### \*\*\* analysis

♦ The linguist John McWhorter has interesting things to say about this word (as always), including the way we pronounce it. "[I]n one of those snappy, naughty little pre-Production Code movies (*Skyscraper Souls*, 1932), someone disparages someone else for wanting be a 'big SHOT,' not a 'BIG shot.' The expression was newer then—someone at the time was still referring, on some level, to an actual shot in the sense of a gunshot or cannon shot. Note that we today would rarely even think of big shot as referring to a shot..." (*Words on the Move* by the linguist John McWhorter, Chapter 5, "Lexical Springtime: Words Mate and Reproduce," subsection "The Backshift in Real Life.")

♦ McWhorter's point "that we today would rarely even think of big shot as referring to a shot" is well taken. Of course, one goal of *this* work is to *recover* the meanings of clichés, particularly military ones. Why would we *not* want to know the etymology of words and expressions and use them in an intelligent and considered way?

♦ "At the beginning of the Battle of the Somme, on July 1, 1916, the British Army suffered 60,000 dead and wounded—in one day. It was arguably the worst butcher's bill in military history." ("Why World War I Resonates," by William Boyd, *The New York Times*, Jan. 21, 2012. By contrast, the Battle of Shiloh, the bloodiest battle of the Civil War up to that time, resulted in 23,000 casualties in two days and shocked the nation.)

♦ "Everyone was stunned by the scale of carnage at Shiloh (in spring of 1862 in southwestern Tennessee), which posted a new benchmark for mass slaughter. Deeming it the war's bloodiest battle, Grant commented 'that the Fort Donelson fight was, as compared to this, as the morning dew to a heavy rain.' Men who survived it could never scrub its harrowing imagery from their memories. Americans found it hard to comprehend the dimensions of the losses, which were beyond any historical precedent. Of more than one hundred thousand soldiers who pitched into the fray, twenty-four thousand had been killed or wounded [or captured or were missing]—a casualty count dwarfing that of the battle of Waterloo. Shiloh's casualties eclipsed the total of the Revolutionary War, the War of 1812, and the Mexican War combined. William Hillyer conveyed the spreading tableau of death that greeted him and Grant: 'For miles and miles wherever we rode we found dead bodies scattered through the woods in all directions.' As Grant wrote memorably, 'I saw an open field...so covered with dead that it would have been possible to walk across the clearing, in any direction, stepping on dead bodies, without a foot touching the ground.' / Shiloh peeled away any lingering aura of romance from the war, showing the sheer destructive power of modern combat. An array of technical advances, such as the conical minie ball that ripped through flesh and bone or rifled muskets and cannon that displayed greater accuracy and range, ensured bloodier battles than ever before. No less hardy a soul than Sherman remarked that the corpse-littered battlefield 'would have cured anybody of war.' Combat had been pushed to extremes of cruelty that banished any remnant of civilized behavior. 'Men lost their semblance of humanity,' wrote a reporter, 'and the spirit of the demon shone in [the soldiers'] faces. There was but one desire, and that was to destroy.'" (*Grant* by the brilliant biographer Ron Chernow. The death toll would be eclipsed in later Civil War battles. As with most wars, the human carnage made it impossible for either side to negotiate a settlement.)

♦ William Tecumseh Sherman: Well, Grant, we've had the devil's own day, haven't we? / Ulysses S. Grant: Yes. Lick 'em tomorrow though.

(The night of the first day of the Battle of Shiloh. From *Grant* by Ron Chernow.)

♦ "An army's bravest men are its cowards. The death which they would not meet at the hands of the enemy they will meet at the hands of their officers, with never a flinching." ("What I saw of Shiloh" by Ambrose Bierce. Union soldiers executed for cowardice.)

London was like some huge prehistoric animal, capable of enduring terrible injuries, mangled and bleeding from many wounds, and yet preserving its life and movement... The Anderson shelters were widespread... Later the Morrison shelter was developed... Many owed their lives to it. For the rest, 'London could take it'. They took all they got, and could have taken more. Indeed, at this time we saw no end but the demolition of the whole Metropolis... At this time anyone would have been proud to be a Londoner. The admiration of the whole country was given to London, and all the other great cities in the land braced themselves to take their bit as and when it came and not to be outdone. Indeed, many persons seemed envious of London's distinction, and quite a number came up from the country in order to spend a night or two in town, share the risk, and 'see the fun'. We had to check this tendency for administrative reasons." (*Their Finest Hour* by Winson S. Churchill. The Blitz, 1940-1941.)

Some guards on the island sent for the Jersey City Fire Department, but others fled as quickly as they could, and for good reason: Black Tom was a major munitions depot, with several large ‘powder piers.’ That night, Johnson Barge No. 17 was packed with 50 tons of TNT, and 69 railroad freight cars were storing more than a thousand tons of ammunition... / Just after 2:00 a.m., an explosion lit the skies—the equivalent of an earthquake measuring up to 5.5 on the Richter scale, according to a recent study. A series of blasts were heard and felt some 90 miles in every direction, even as far as Philadelphia. Nearly everyone in Manhattan and Jersey City was jolted awake, and many were thrown from their beds. Even the heaviest plate-glass windows in Lower Manhattan and Brooklyn shattered, and falling shards of glass preceded a mist of ash from the fire that followed the explosion. Immigrants on nearby Ellis Island had to be evacuated... / The Statue of Liberty took more than \$100,000 worth of damage... Onlookers in Manhattan watched as munition shells rocketed across the water and exploded a mile from the fires on Black Tom Island... / Investigations eventually determined that the Black Tom explosions resulted from an enemy attack—what some historians regard as the first major terrorist attack on the United States by a foreign power.” (“Sabotage in New York Harbor” by Gilbert King, *Smithsonian Magazine*, November 1, 2011.)

\*\*\* analysis

♦ "A word is a thing on the move. This means wrapping our heads around something that cannot feel right at first, but that simple logic requires us to accept. To wit, any claim that people in general are using a word 'erroneously' is illogical... If a significant proportion of the people speaking a language are using a word in a way that dictionaries tend not to mention, it means that the word is moving—as we would expect, since words always do." All these groups, of course, have their agendas, psychologies, etc.

♦ When a term can mean anything to anyone, or includes everyone, it means nothing.

♦ "[B]y the eighteen-thirties fur seals in the southern ocean were virtually extinct, and sea-lions and sea-elephants were dying out as well. / The main attack was now diverted to the whales... The first comers in the South Pacific hardly needed to go to sea at all; the whaler simply set up a shore factory in some estuary where the animals were known to breed and then attacked them from small boats. There were dozens of such places: the Bay of Islands in New Zealand, the Derwent Estuary in Tasmania, all the coves and inlets along the deserted coasts of southern, western and eastern Australia... / In the Derwent River estuary where it had once been dangerous to sail in a small boat because of the numbers of right whales there—mostly pregnant mothers either calving or about to calve—a massacre went on year after year until the animals were wiped out. And so the hunt went on from May to October in all the breeding and mating grounds along the New Zealand and Australian coasts... / In these conditions it was not long before bay whaling—the taking of whales in their off-shore breeding grounds—was practically finished and the hunt was then continued in the open sea..." ♦ “In the morning I was nervous like a young bride. I hadn’t been in combat for 20 years. The first battle is no joke. But now I have confidence in my regiment and I feel happy. Very happy.” (Brigade Commander Serpilin. From *The Living and the Dead* (1964 film) directed by Aleksandr Stolper based on the 1959 novel *The Living and the Dead* by Konstantin Simonov. Simonov, the great Soviet war correspondent, poet, and novelist, is famous for his poem “Wait for Me.” It became a talisman for millions during World War II: it was reprinted, hand-copied, memorized, recited, and carried in pockets by millions of soldiers and civilians alike. “Wait for me and I’ll return, only wait very hard... / Only you and I will know how I survived; / It was because you waited as no one else did.” Simonov survived the war.)

♦ “When old soldiers see reserves being moved up to the front, they say, ‘It looks like a wedding.’” (*Life And Fate* by Vasily Grossman, translated by Robert Chandler, New York Review Books. Part One, Chapter 53. Like Konstantin Simonov, Grossman was a war journalist.)

Mauldin wrote, “Most people in Italy and Sicily gave us a rousing welcome in all their towns and cities, but nowhere was there such excitement as in Rome. We got awful cynical about it, because the enthusiasm seem to stop, and the complaints seemed to start, twenty-four hours after everybody was kissing everybody else. When were we going to bring shoes and food and clothes and phonograph records? Who was going to pay for Uncle Antonio’s bombed vino shop, and why did we have to shell Aunt Amelia’s ristorante?” Bill Mauldin survived World War II. Ernie Pyle did not.)

♦ “My goodness gracious, Squib, you should have seen yourself!” he told me some time later. “You popped out of that dust cloud as white as a rat in a flour barrel, and with the silliest expression on your face... like a girl who’s just been kissed for the first time.” / If kiss it was, then it was very nearly the kiss of death. Seven men were wounded by the explosion and two killed. We survivors had been incredibly lucky.” (*And No Birds Sang* by Marley Mowat. Italy. World War II.)

♦ “The linkage between sex and killing becomes unpleasantly apparent when we enter the realm of warfare. Many societies have long recognized the existence of this twisted region in which battle, like sex, is a milestone in adolescent masculinity. Yet the sexual

aspects of killing continue beyond the region in which both are thought to be rites of manhood and into the area in which killing becomes like sex and sex like killing." (*On Killing* by Lt. Col. Dave Grossman.)

\*\*\* war, conflict, the military...

♦ These usages echo the title of the great 1977 Richard Attenborough film *A Bridge Too Far* about Operation Market Garden

during World War II. Its meaning has come to mean "overreach." The actual operation was a noble and heroic attempt to end the war early. It nearly succeeded. The unintended consequences were horrible, however, in the parts of Holland that weren't liberated: they included the Dutch famine of 1944-1945. Market Garden started September 17, 1944. Anne Frank was apprehended on 4 August 1944, and she died in Bergen-Belsen, perhaps in March, 1945.

♦ "The NAACP said that it was problematic... but, if you're looking at the Zulu Club within the tradition of masquerading and masking, painting one's face is a part of Carnival, or it's a part of a masquerade, and the Zulus will say that they could not afford masks. It was cheaper and it was accessible for them to actually paint their faces black... I mean, it's a caricature, it's Mardi Gras, it's like everything is exaggerated, if you look at even Mardi Gras Krewe's that are traditionally white, they also have these caricatures of white people and European features, and so, it's an exaggeration. And while it's connected to minstrelsy historically, I think that it was more rooted in this idea of a masquerade, a mask. People are really dismissive [of outsiders protesting the Zulus' black face], to be honest with you. I think that New Orleans understands New Orleans' traditions. The city has been very insular, right? A lot of our traditions have just existed without the participation and the scrutiny of people outside of New Orleans, and so I think that for the average black person in New Orleans, including those members of my family, they just simply do not connect the Black Face in Zulu with minstrelsy or making a mockery of black people and most certainly are not looking at it as an offensive tradition." On the day after the battle, the houses of the peasantry were searched, and every wounded Highlander who could be found was dragged out and murdered in cold blood. To be found wearing tartan was sufficient to ensure death. In one place seventy-two were butchered together. In another, forty were enclosed in a hut, which was then fired, and all within were burned to death. The whole road to Inverness was strewn with the bodies of the slain..." (*British Battles On Land and Sea* by James Grant. Culloden, 1746.)

♦ "John J. Hardin, an Indiana volunteer, found it 'dreadful...to see the poor soldier just thrown in a ditch and covered over without any box.' / Burials like these dehumanized the dead and appalled many of the living. A Union chaplain observed that in pit burials bodies were 'covered over much the same as farmers cover potatoes and roots to preserve them from the frost of winter; with this exception, however: the vegetables really get more tender care...' Frequently, corpses were quite literally naked... Soldiers desperate for clothing robbed the dead... and thieves and scavengers appeared on battlefields immediately after the end of hostilities... / Soldiers worried that the piles of dead might include those still living, unable to speak..." (*The Republic of Suffering, Death And the American Civil War* by the great American historian Drew Gilpin Faust.)

♦ "On Sept. 19, 1862, just two days after the Battle of Antietam, Alexander Gardner, an employee of the photographer Mathew Brady, began documenting the battle's grim aftermath. One of Gardner's photographs, titled 'Dead Horse of Confederate Colonel: both killed at Battle of Antietam,' depicted a milky-white steed lying on the field in an eerily peaceful repose...[The Horse] very likely belonged to Colonel Strong, and it became something of a landmark among the Union soldiers left on the field because of its strangely peaceful appearance. Gen. Alpheus Williams wrote, 'The number of dead horses was high. They lay, like the men, in all attitudes. One beautiful milk-white animal had died in so graceful a position that I wished for its photograph. Its legs were doubled under and its arched neck gracefully turned to one side, as if looking back to the ball-hole in its side. Until you got to it, it was hard to believe the horse was dead.' / Oliver Wendell Holmes Sr. saw the horse four days after the battle while searching for his wounded son. Later, Holmes examined Gardner's photograph and said it was the same horse." ("The Dead of Antietam," by Terry L. Jones, *The New York Times*, September 24, 2012.)

♦ "Soon we strike the scene of conflict. As we emerge from a body of woods, our eyes are met by the sight of scores of dead and wounded Federal Zouaves, whose blood-red pants mark them out conspicuously wherever they lay on the sloping field and little meadow before us. Over these we rush at a double-quick and on the opposite hill we see a battery of artillery which our men have just captured. The pieces are still pointed towards us, but around them

are strewn numbers of the enemy, dead and wounded. At one of the pieces, as our line passes between them, we see what can never be effaced from our memory—a pile of artillery horses, all harnessed together, shot down manifestly just as they were in the act of moving a gun, one or more apparently dead, the others living, but bleeding profusely and writhing in apparent agony, the sight presenting a horrible spectacle of war." (*War Talks of Confederate Veterans*, compiled and edited by Geo. S. Bernard, Petersburg, VA.)

\*\*\* **Alexander Selkirk...**

♦ A castaway usually becomes one by shipwreck. In cases of mutiny, a person or persons might be cast adrift or left marooned on a deserted shore. Alexander Selkirk is a famous example of a voluntary castaway. Believing the ship he was sailing on to be unsafe, he requested that he be put ashore on one of the Juan Fernandez Islands in the Pacific Ocean off the coast of Chile. He spent 4 years 4 months on the island before being rescued. He probably inspired Daniel Defoe's *Robinson Crusoe*.

♦ Classic castaway stories include *Robinson Crusoe* and *The Swiss Family Robinson*. The TV show *Gilligan's Island* ran for 3 seasons. The film *Cast Away* with Tom Hanks was very popular. People

remember his companion, Wilson, a soccer ball, and the scene where he removes a rotten tooth with an ice skate.

♦ Tromelin Island in the Indian Ocean got its name from the captain who rescued a group of castaways from that place. The whole story is quite amazing!

♦ "It's a caste system, and we are the untouchables of academia." (An adjunct professor.)

♦ "But what's happening now, it has to do with the huge gap between our educated [a slight pause] caste, you might say, and less educated caste. There's great distrust now between the two groups. We know all about that..." (Columbia University Mark Lilla, author of *Ignorance and Bliss: On Wanting Not to Know*.)

\*\*\* "India seems to have originated everything..."

♦ "Major Sleeman reveals the fact that the trade union and the boycott are antiquities in India. India seems to have originated everything. The 'sweeper' belongs to the bottom caste; he is the lowest of the low—all other castes despise him and scorn his office. But that does not trouble him. His caste is a caste, and that is sufficient for him, and so he is proud of it, not ashamed... A footnote by Major Sleeman's editor, Mr. Vincent Arthur Smith, says...'The sweepers cannot be readily coerced, because no Hindoo or Mussulman would do their work to save his life, nor will he pollute himself by beating the refractory scavenger.' They certainly do seem to have the whip-hand... Just like a milk-route; or like a London crossing-sweepership." (*Following the Equator: A Journey Around the World* by Mark Twain.)

## casualty (literal analogy)

casualty

two bass boats collided at night and there was a ~

\*\*\* war, conflict, the military...

♦ There were great husky men crying with the pain of gaping wounds and dreadfully swollen, discolored trench feet, who sank down

exhausted the moment they stopped. There were strings of from eight to twenty blind boys filing up the road, clinging tightly and pitifully to each other's hands, and led by some bedraggled limping youngster who could still see... I wonder if I'll ever be able to look at marching men anywhere again without seeing those blinded boys, with five and six wound stripes on their sleeves, struggling painfully along the road." (*Sister: The War Diary of a Nurse* by Helen Dore Boylston.)

### \*\*\* analysis

♦ "Two bass boats collided at night and there was a casualty." (This would be better written as "and one person was injured." "Casualty" generally refers to warfare, violence, or disasters. And so "casualty" would not apply to the collision of two bass boats at night.)

♦ Deaths from COVID have been described as a *body count*. (This strikes a very wrong note. Body count is ordinarily associated with warfare, especially the Vietnam War when counting the number of enemy dead became a metric of "success.")

♦ "Mass casualty events," on the other hand, has become a part of American's lexicon. (Violent school shootings, large-scale disasters, etc.)

♦ In the US, a badly injured car-crash victim is transported by ambulance to an emergency department (ED), commonly referred to as an ER or emergency room. In the UK, they go to Accident and Emergency (A&E), often referred to as the casualty department.

♦ "The thousands of automobile *casualties* that happen each year are things that are decided by chance, and *casualis*, Latin parent of this word, meant 'dependent on chance.'" (*Word Origins And Their Romantic Stories* by Wilfred Funk, Litt.D.)

♦ Casualty insurance is a defined term. See the Wikipedia article "Casualty insurance." Wikipedians are wonderful.

(Modern military vocabulary and names related to cavalry and horses.)

♦ "It was only fitting and proper that airmobile operations should have been first tried in combat by the First Cavalry Division, of World War II and Korea fame. Riding helicopters instead of horses or mechanized vehicles, it was renamed the First Cavalry Division Airmobile." (Vietnam. Commonly referred to as the First Cavalry Division. The patch is iconic.)

♦ "We were going to Vietnam as "straight leg" infantry, not as a mechanized infantry battalion." (No APCs. The First Infantry Division, known to all as the Big Red One.)

♦ "Tanks had replaced the cavalry of former wars with a vastly more powerful and far-ranging weapon, and in many aspects their manoeuvres resembled naval warfare, with seas of sand instead of salt water. The fighting quality of the armoured column, like that of a cruiser squadron, rather than the position where they met the enemy, or the part of the horizon on which he appeared, was the decisive feature. Tank divisions or brigades, and still more smaller units, could form fronts in any direction so swiftly that the perils of being outflanked or taken in rear or cut off had a greatly lessened significance. On the other hand, all depended from moment to moment upon fuel and ammunition, and the supply of both was far more complicated for armoured forces than for the self-contained ships and squadrons at sea... / The personal interventions of the two Commanders-in-Chief were as dominant and decisive and the stakes

on both sides were as high as in the olden times." (*The Grand Alliance* by Winston S. Churchill. "Operation 'Crusader': Ashore, Aloft, and Afloat.")

♦ Before "mechanized infantry" it was "motorized infantry."

♦ "There was now a dramatic episode which recalls 'Jeb' Stuart's ride round McClellan in 1862 on the Yorktown Peninsula in the American Civil War. It was however executed with an armoured force which was an army in itself..." (Rommel's Raid Nov. 24-28, Second Battle of Sidi Rezegh. From *The Grand Alliance* by Winston S. Churchill. "Operation 'Crusader': Ashore, Aloft, and Afloat.")

♦ "Once, after a gunnery exercise, Novikov and Getmanov had stopped in front of the winning tank. As he answered their questions, the soldier in command had gently caressed the side of the tank. Getmanov had asked if he had found the exercise difficult. / 'No, why should I? I love my tank very much. I came to the training school straight from my village. The moment I saw her, I fell in love. Impossibly in love.' / 'So it was love at first sight, was it?' said Getmanov. He burst out laughing. / There was something condescending in Getmanov's laughter—as though he were criticizing this young man's ridiculous love for his tank." (*Life And Fate* by Vasily Grossman, translated by Robert Chandler, New York Review Books.)

♦ A FUNNY CARTOON. It's World War II. An old cavalry sergeant's jeep has broken its axle. The old sergeant has turned his back to his busted- down jeep, his left hand covers his eyes in grief, and his right hand is pointing a .45 behind his back at the engine, as if he were putting his beloved horse out of its misery. (*Up Front* by Bill Mauldin, World War II. The text about the cartoon reads, "Once I thought I did a very funny cartoon. It was a picture of an old-time cavalryman shooting his jeep, which had a broken axle. It is one of those cartoon ideas you think up rarely; it has simplicity, it tells a story, it doesn't need words. It is, I believe, the very best kind of cartoon... I shall keep reviving that cartoon until somebody appreciates it.")

♦ The following is how Callum Robinson, in his book *Ingrained: The Making of a Craftsman*, describes having his hopes for a lucrative contract dashed over a phone: "I've heard it said that miners working deep underground prefer wooden pit props to modern materials like iron or steel. Timber lacks metal's strength, but it creaks and moans if the load becomes too great. Wood warns you when it's about to break, giving you a fighting chance to escape. The others simply

crumple and your world caves in. I hear no warning, only a click, a dial tone, and the hammer-thudding of my own heartbeat."

♦ "Kim O'Grady, an experienced management consultant in Perth, Australia, couldn't figure out why his resume was generating no job leads for more than four months, said Susanna Kim in ABCNews.com. He finally realized that companies were turning him down because his gender-neutral first name led them to assume he was a woman. 'I pictured all the managers I had over the years and, forming an amalgam of them in my mind, I read through the document as I imagined they would have,' he wrote on his blog. The truth became immediately apparent. 'It was like being hit on the head with a big sheet of unbreakable glass ceiling,' he said. After putting 'Mr.' before his name on his resume, he quickly landed a job. 'The sad reality is this shows we all know how real and invasive sexism is,' O'Grady wrote this week." \*\*\* analysis

When this word finally came into English we began to use it in a poetic way. A *chimera* with us can be a foolish fancy. One also gets a bad crick in the neck, because though stooping one has to look up for fear of knocking into the beams...Presently I had to stop for a minute to rest my knees, which were giving way... / I had not realised before that the men operating the coal-cutter are working in a place rather less than a yard high. When we crawled in under the roof to the coal face we could at best kneel, and then not kneel upright, and I fancy the men must do most of their work on their bellies. The heat also was frightful—round about 100 degrees F so far as I could judge. The crew keep burrowing into the coal face, cutting a semi-circular track, periodically hauling the machine forward and propping as they go... Even to drag the thing forward as the seam advances must be a frightful labour, seeing that the men have to do it practically lying down. Up near the coal we saw a number of mice, which are said to abound there... / On the way back my exhaustion grew so great that I could hardly keep going at all, and towards the end I had to stop and rest every fifty yards... The few miners whom we met down the pit could move with extraordinary agility, running about on all fours among the props almost like dogs. / (*The Road to Wigan Pier Diary*, 31 January-25 March 1936, by George Orwell.)

## cognitive dissonance

cognitive dissonance  
~ was not pathology, it was policy (US in Afghanistan)  
the ~ was exhausting (inability to reconcile before, after)

♦ "I distinctly remember the NFL game between the Vikings and the Green Bay Packers was on the TV the whole time. It's just so American, [our] capacity for cognitive dissonance. If it's something that we love, we can look past the evils because we love it." (Reid Forgrave, author of *Love Zac*, interviewing the family of Zac Easter. Zac, age 24, shot himself in the chest and donated his brain to science. A football player, he was diagnosed with CTE.)

♦ "I guess we all deal with cognitive dissonance in sports in our own way." ("The cognitive dissonance of Fox's NFL Theme Song, 'Injury Version'" at hillmansburger.com.)

♦ "But when a reader who knows Laxness only from 'Independent People' encounters his contemporaneous political writing, in which mere human beings seem to count for nothing compared with the success of the socialist project, the cognitive dissonance is enough to crash the operating system of the brain." ("A Rower on the Open Sea: The rediscovery of Halldor Laxness" by Salvatore Scibona, *The New Yorker*, July 11 & 18, 2022.)

♦ "this is a perfect example of the zeitgeist of cognitive dissonance permeating our devolving society." (An online commenter about "NJ transgender woman transferred from women's only prison after impregnating 2 inmates, report says" by Stephen Sorace, Fox News, July 17, 2022.)

On his *LinkedIn* profile, he claims to be a co-founder of the group Formerly Incarcerated Citizens Against Recidivism (FICAR), which is "geared toward dismantling recidivism and stemming the pipeline of mass incarceration.")

♦ Foreign supporters of groups who commit atrocities are often unable or unwilling to believe that the side they support could commit atrocities and deny they ever took place. The cognitive dissonance is too great.

Black Americans “live sicker and die quicker.” Arline Geronimus of the University of Michigan coined the term for chronic stress.

♦ “You’ve probably heard the ‘male gaze’ or the ‘white gaze,’ but what about the ‘coded gaze’? The Australian philosopher Glenn Albrecht, who coined the term, identifies it as a suffering at the loss of solace, ‘a deep emotional response to the desolation of a loved home environment.’ The condition of solastalgia, then, is primarily one of grief, environmental grief, mourning for the death of home, which is the place of solace. (‘Stephen McRae seems to be a man who refused to ignore such emotion,’ Albrecht told me.)” (“The Machine Breaker: Inside the mind of an ‘ecoterrorist’” by Christopher Ketcham, *Harper’s Magazine*, November, 2023. There is a Wikipedia article “Solastalgia.”)

♦ In 1981, philosopher Jean Baudrillard coined the term “hyperreality.”

## \*\*\* analysis

♦ Type “coined the” into Search at NPR, and you get 484 results and counting. Some of the words, terms, and phrases are familiar. Others, though, are similar to what the linguist John McWhorter said about the term LatinX: “It’s not going to catch on beyond a certain crowd.”

♦ An academic can make her entire career by coining a term that catches on, either in her discipline or with the public.

The victims included two sets of brothers. A tenth boy, Hemad, 11, survived. / Hemad said his mother had told him to go out with other boys to collect firewood because 'the weather is very cold now. We were almost done collecting the wood when suddenly we saw the helicopters come. There were two of them. The helicopters hovered over us, scanned

us and we saw a green flash from the helicopters. Then they flew back high up, and in a second round they hovered over us and started shooting. They fired a rocket which landed on a tree. The tree branches fell over me and shrapnel hit my right hand and my side.' Hemad explained that the tree saved his life by covering him so that he could not be seen by the helicopters, which, he said, 'shot the boys one after another.' / A villager named Ashabudin spoke of one of the victims, Khalid, 14, the only male in his family. 'He was studying in sixth grade of the orphanage school and working because his father died four years ago due to a long-term sickness. His father was a day laborer. Right, so there's this whole you know sort of rhetorical lexicon the left of the Democratic party has become obsessed with and insists on using. Which basically just alienates normie voters, including normie non-white voters. I mean, we have people in and around the Democratic Party talking about how all white people have white privilege, and how this is a white supremacist society, and so on, and I just don't think this is the way people think about the world, including you know normie non-white voters." Then she came across a glass of *toplennoe moloko*, milk that has sat in a hot *pech* [a traditional peasant oven] for several hours until it is the color of crème brûlée and has the faintest suggestion of caramel. She drank it down in a few long gulps. 'Oh, that is so good,' she said, closing her eyes and wiping off the milk mustache with the back of her wrist. 'That's the taste of childhood.'" He would save them for occasions like weddings and christenings, or when he wanted to feel smarter. / 'If I were going to take the Graduate Record Examination or the Law School Admissions Test, definitely I would eat bushmeat beforehand...' Right, so there's this whole you know sort of rhetorical lexicon the left of the Democratic party has become obsessed with and insists on using. Which basically just alienates normie voters, including normie non-white voters. I mean, we have people in and around the Democratic Party talking about how all white people have white privilege, and how this is a white supremacist society, and so on, and I just don't think this is the way people think about the world, including you know normie non-white voters." (The political scientist Ruy Teixeira. From "Hispanic and minority voters are increasingly shifting to the Republican party," NPR, Weekend Edition Saturday, July 23, 2022.)

Unlike in Orlando, where the audience was at rapt attention, the version of Harris in Boston more resembled the version I saw in Munich. ### \*\*\* analysis

♦ The metaphor of a moral compass is a very trendy cliché in writing and speaking nowadays, and it is obvious that almost everyone utilizing the word has never needed, owned or used an actual handheld compass. The compass doesn’t waver, the compass *needle* does. The compass doesn’t go off course, the *user* of the compass does. What in the world does it mean to “realign” a compass “once wires get crossed,” or to be “tuned in to” your moral compass, as though the compass were a radio? What does it mean to “set the moral compass high?” Is there *really* a compass or something like it *inside* us? Are compasses ordinarily distinguishable as “strong” or “weak”? How can a compass “waver off true north” when its sole job is to *indicate* north! Read or listen to “Resetting Your Moral Compass After An ‘Ethical Slip,’” NPR, Talk of the Nation, April 8, 2013.

\*\*\* **complicated, sensitive, problematic, schizophrenic, etc.**

♦ “Complicated” may also be used as a euphemism, for example, “It’s a complicated legacy,” speaking about Martin Luther King, Jr.’s politics and his sexual predilections. ♦ Or “schizophrenic”? “League executives admit their marketing efforts have been schizophrenic.” (The Women’s National Basketball Association, about fans who are “fluid,” “progressive,” and “eclectic.”)

♦ Or “difficult”? “And I’m like, ‘Wait a minute.’ The same people, all of us, that played in college, we’re the same people in the WNBA. So if you liked us in college, like why didn’t you follow us in the WNBA? And it is [long pause] probably one of the more interesting and maybe more difficult questions to answer [ending with high upspeak]. I have my theories...” (Sue Bird, talking with Terry Gross about why the popularity of women’s NCAA basketball doesn’t translate to the WNBA.)

It serves different purposes for different people. It can be a tool to discourage bad actions; an attempt to recover pride in the face of hardship, an outlet for rage, and many more things. ♦ "It does open up a conversation because it's her using her voice and her platform to really call out systemic change, which she has done before. I think she can show other girls and women who look like her how to empower them to stand up for themselves in ways that I think we haven't always been able to see." (C. Vaile Wright, PhD, a clinical psychologist and the American Psychological Association's Senior Director of Health Care Innovation, about Naomi Osaka and mental health.)

♦ "I want to change the conversation for the better. Everyone should reconsider the ways they think and talk about athletes."

♦ "In any event, what all committeemen like to call 'conversations' could now go forward." (January 1, 1635. Martin Gerritsen gets down to trade business with the Oneida Indians on the Mohawk River. From *The Mohawk* by Codman Hislop. His wonderful book, which is just one book in a wonderful series, is about the river.)

♦ "We should have that conversation; We need to have that conversation; What an interesting idea, I think we should have that conversation..." (Excellent ways not to say yes or no, to make no commitment, while at the same time sounding sympathetic.)

♦ "It is becoming an idiotic buzz word." (John Schreiber, in 2011! National Public Radio (NPR) never got the memo, apparently.)

♦ "The 'good' conversation versus the 'sexual assault' conversation." (About Bill Cosby.)

♦ "Why It's Time To Retire The 'Serious Conversation About Race,'" with Damon Young, 1A, WAMU, NPR, July 16, 2020.

♦ "Much of the conversation about antisemitism has nothing to do with antisemitism, it's actually about influencing and controlling the conversation inside the Jewish community. It's an arms race to define what is antisemitism in the Jewish community, which is, of course, stupid and it's a waste of resources." (Andres Spokoiny, president of the Jewish Funders Network. From "Dark money, questionable partners behind new group fighting antisemitism" by Arno Rosenfeld, *The Forward*, April 22, 2021.)

\*\*\* analysis

♦ "Of course, one man's negotiation is another man's conversation is another man's ransom." ("A Metaphor Meltdown At The White House," NPR, It's All Politics, Ari Shapiro, October 10, 2013.)

♦ "It's commonplace today to speak of our 'national conversation.' This metaphorical phrase seems almost insincere, especially when you consider that it necessarily entails the three subjects normally considered conversationally taboo: politics, religion, and money. These subjects sow division. And so it seems unlikely that any 'national conversation' will meet Emerson's standard of 'wise, cultivated, genial conversation' amounting to 'the last flower of civilization.' Let's hope it's not the last flower." ("Conversation As One of the Fine Arts" by Bryan A. Garner, *National Review*, August 1, 2022.)

♦ The tenor and implied message of many of these "conversations" is that you need to change the way you think and talk. End of conversation!

♦ CONVERSATION, n. A fair for the display of the minor mental commodities, each exhibitor being too intent upon the arrangement of his own wares to observe those of his neighbor." (*The Devil's Dictionary* by Ambrose Bierce.)

\*\*\* "I've got six Black Cordelias already, isn't it lovely?"

♦ "[Conversion] was one of the things that made Christianity quite distinct in the ancient world. It had to do with the nature of the Christian religion. Christians from the very beginning believed that it was Jesus' death and resurrection that could make a person right with God. And that if a person was not right with God, they would pay an eternal penalty, there would literally be hell to pay if somebody didn't convert. And so Christians believed that their religion was the only right religion and that people had to practice their religion or else they would go to hell. Moreover, Christians maintained that they were to follow Jesus' teaching of love—love your neighbor as yourself. Well, if your neighbor is going to go to hell by not believing what you believe, and you love this person, then you need to make them see the error of their ways and you convert them to your faith. And so that's what the Christians were doing from the very beginning, trying to convert others so they could join the church and avoid the terrors of hell." (Bart Ehrman, from "Author Traces Christianity's Path From 'Forbidden Religion' To A 'Triumph,'" NPR, Fresh Air, March 20, 2018.)

♦ "Civilisation, too, is steadily advancing, and nowhere are the missionary prospects more encouraging than in this island, where for a time the balance seemed to waver between the horrors of heathenism and the corrupt and idolatrous practices of the Church of

Rome... It is little creditable to a powerful Protestant nation, such as that of Great Britain, that no efficient protection should be afforded to British missionaries, laboring to convert the heathen, against the brutality of French soldiers and the arrogance of Popish priests..." (The Loyalty Islands. *Missionary Life in the Southern Seas*, from the chapter titled, "Romish Outrages," by James Hutton. Priests are described as illiterate fanatics who display their cloven feet by erecting chapels in Protestant villages, and luring converts with grog and tobacco.)

♦ "The purpose and end of all missionary work is to lead men and women to Jesus Christ. Is the medical work in China doing this? The mission boards... were slow to comprehend that medical work rightly conducted as truly missionary work as any other and one of the surest evangelizing agencies. It is said of Peter Parker that he 'opened China at the point of the lancet.' The military governor of a certain province was so impressed by the spirit of the hospital where he was a patient, that when he left it he began attending the mission services in his city and soon became an earnest Christian... At the Yale-in-China hospital in Changsha plans are now being made to do follow-up work in the homes of the patients." (*New Life Currents in China* by Mary Ninde Gamewell.)

♦ "No Christianos!" whispered Remigio, our bigot steersman, in whose mind the doctrines he had been taught in the former Mission of Trinidad had fallen on but too fertile ground. He meant it as a protest against any intercourse with his unbaptized naked cousins. He, whose ancestors less than two centuries ago must have presented about the same appearance, could not discover any worse fault in them than they were 'no Christians,' while his own Christianity, of which he thought so highly, barely went beyond hearing mass, mumbling his rosary, and singing endless litanies." (Caripuna Indians in the Madeira Valley. From *The Amazon and Madeira Rivers* by Franz Keller.)

♦ In Ecuador in 1956, five American Christian missionaries were killed by members of an Amazonian tribe (the Aucas). Valerie Shepard's father, Jim Elliot, was one of the five men on the mission into the jungle." ("Killed for Christ in the Amazon," BBC, 22 Feb. 2017.)

♦ "I should ask you for five shillings to buy a black god-daughter. It's a new thing a missionary priest started last term. You send five bob to the nuns in Africa and they christen the baby and name it after you. I've got six black Cordelias already, isn't it lovely?" (The ten- or eleven-year-old Cordelia. From "John Gielgud reads *Brideshead Revisited* by Evelyn Waugh.)

#### \*\*\* analysis

♦ A landscape configuration that suggests an amphitheater looking onto a "platform" or up to a "dais" might suggest a "courthouse" to the imagination. According to Wilfred Funk, Litt.D., the word *court* comes from the Latin *cors*, "an enclosed place." In my travels, I have discovered two of these magical spots. One is in the mountain about Joyce Kilmer Memorial Forest in North Carolina. The other is under the water of the Red Sea on a reef south of Jeddah.

♦ Stories and legends naturally adhere to Devil Courthouses, but a consistent thread is that such a place is where the Devil "holds court." This may suggest either a royal habitation such as a castle, a place of judgment, or both.

♦ See the Wikipedia article "Courthouse and Jail Rocks" about the two rock formations in Nebraska. Wikipedians are wonderful.

\*\*\* presentism, history in contempo-speak...

♦ “Although it might not be entirely fair to describe Charles as feudalism-curious, his world view does appear to incorporate an implicit defense of his monarchical position.” (“King Me: Charles tried to be a philosopher-prince. But a British monarch must keep quiet” by Rebecca Mead, *The New Yorker*, May 8, 2023. Such use of contempo-speak is a form of presentism. Other examples from her article include, “In time, they grew closer, partly because of a mutual love of art. It can happen”—about the marriage of Charles I and Henrietta Maria in 1625—and “primogeniture is a bummer”—about Prince Andrew. She also mentions that “There are no glamorous teenage or twentysomething royals for the TikTok generation to scroll through...” Mead is certainly *au courant* for a 56 year old!)

♦ “When I was first aware that I had been laid low by the disease, I felt a need, among other things, to register a strong protest against the word ‘depression.’ Depression, most people know, used to be termed ‘melancholia,’ a word which appears in English as early as the year 1303 and crops up more than once in Chaucer, who in his usage seemed to be aware of its pathological nuances. ‘Melancholia’ would still appear to be a far more apt and evocative word for the blacker forms of the disorder, but it was usurped by a noun with a bland tonality and lacking any magisterial presence, used indifferently to describe an economic decline or a rut in the ground, a true wimp of a word for such a major illness. It may be that the scientist generally held responsible for its currency in modern times, a Johns Hopkins Medical School faculty member justly venerated—the Swiss-born

psychiatrist Adolf Meyer—had a tin ear for the finer rhythms of English and therefore was unaware of the semantic damage he had inflicted by offering ‘depression’ as a descriptive noun for such a dreadful and raging disease. Nonetheless, for over seventy-five years the word has slithered innocuously through the language like a slug, leaving little trace of its intrinsic malevolence and preventing, by its very insipidity, a general awareness of the horrible intensity of the disease when out of control. / As one who has suffered from the malady in extremis yet returned to tell the tale, I would lobby for a truly arresting designation. ‘Brainstorm,’ for instance, has unfortunately been preempted to describe, somewhat jocularly, intellectual inspiration. ### \*\*\* analysis

♦ "The cardinal points are always, historically, metaphors. West is the area of promise for Westerners—follow the sun. The allure of the north—it's the gate to Heaven, as native people say. The fear of the south starts with Captain Cook. The east is always behind you, you know where you came from." (The photographer Thomas Joshua Cooper, from "The Ends of the Earth" by Dana Goodyear, *The New Yorker*, October 7, 2019.)

### \*\*\* north

♦ "As the sky breaks open its fans around him, and shimmers / And into its northern gates he rises / Snarling, complete, in the joy of a weasel..." ("For the Last Wolverine" by James Dickey. A beautiful description of the aurora borealis.)

♦ "The destination, and the real north of life is that you're here only for a short time." (The Mexican filmmaker Guillermo del Toro.)

### \*\*\* east

♦ "The East signified luck to the ancient soothsayers; the sunrise represented life and the beginning of things. These old time prophets judged the future by the flight of birds. If the sacred birds flew east when the priests released them from their cages, it meant good fortune. This superstition was taken over by the Christians [in the architecture of early churches]. In these ancient Roman augurs, however, if the sacred birds happened to fly west it presaged disaster, for the early fathers associated the setting sun with death and destruction." (*Word Origins and their Romantic Stories* by Wilfred Funk, Litt.D.)

♦ "With the morning came the minatory prayers, the hoarse clanging bells and the procession westward along the busiest streets of London, from Newgate to Tyburn, the present site of Marble Arch. Each condemned man sat in the cart facing the rising sun, with a noose bound to his chest." (*The Fatal Shore: The Epic of Australia's Founding* by Robert Hughes.)

### \*\*\* west

♦ "Why care for these dead bodies? They really have no friends but the worms or fishes. Their owners were coming to the New World, as Columbus and the Pilgrims... I saw their empty hulks that came to land; but they themselves, meanwhile, were cast upon some shore yet further west, toward which we are all tending, and which we shall reach at last..." ("The Shipwreck" by Henry David Thoreau, writing about the Irish immigrant ship *St. John*.)

♦ "It's a mile to your objective now, but it's a mile of thrills... A one-pounder in a hedge scares you with several well-placed shots before it 'goes west' [is destroyed]." (A member of a tank crew in World War I.)

♦ "The Montana doctor, McCray, had tried to find a serum to guard his fellow citizens and one morning woke up with bloodshot eyes and an ache in his bones. In ten days McCray had gone West to join McClintic..." (McCray died, as had McClintic before him. From *Men against Death* by Paul De Kruif.)

♦ "At Annezin, we found everything in confusion. 'We're standing-to—at half an hour's notice for the trenches,' they told us. We packed up hastily, and in a few minutes the whole Battalion was out in the road in fighting order. Our destination was the Hohenzollern Redoubt, new trench maps of which were now issued to us. The men seemed in high spirits, even the survivors of the show: singing to the accompaniment of an accordion and a penny-whistle. But once, when a 'mad-minute' of artillery noise began, they stopped and looked at each. / 'That's the charge,' Sergeant Townsend said sententiously. 'Many good fellows going west at this moment; maybe chums of ours.'" (*Good-bye to All That* by Robert Graves. World War I. The Western Front.)

♦ "Things have changed so much since Sicily. Too many pals gone West... Pray God we get a decent break. We need it worse than you could ever know..." (*And No Birds Sang* by Farley Mowat. World War II. Italy. The Moro River.)

♦ "New York's two greatest rivers, the Hudson and the Mohawk, join about a mile below the falls of the latter, at Cohoes... / Rather than river's end, let this be, for us, river's beginning. Men have always looked upstream when they came to the Mohawk, for upstream was west. Let us head west, then, with that low-lying barge, the *Seneca*, heavy with gasoline, as it climbs the first water-stairs on its way to ports on the Great Lakes." (*The Mohawk* by Codman Hislop.)

♦ "Go West, young man." (For opportunity, and to satisfy America's Manifest destiny. Attributed to Horace Greeley. See the Wikipedia article "Go West, young man." Wikipedians are wonderful.)

♦ "In *Between Us: How Cultures Create Emotions* (Norton), the Dutch psychologist Batja Mesquita describes her puzzlement, before arriving in the United States, at the use of the English word *distress*. Was it 'closer to the Dutch *angst* (anxious/afraid),' she wondered, 'or closer to the Dutch *verdriet/wanhoop* (sadness/despair)?' It took her time to feel at home with the word..." ("Affective Disorder: Some psychologists contend that our emotions are culturally specific. How should we feel about that?" by Nikhil Krishnan, *The New Yorker*, August 8, 2022.)

### \*\*\* war, conflict, the military...

♦ "Every horror that could make war hideous attended this retreat; distress, conflagration, death in all modes... And the spirit of cruelty smote even the brute creation, for the French general, to lessen incumbrances, ordered beasts of burden to be destroyed, and the inhuman fellow charged with the execution hamstrung 500 asses, and left them to starve. They were found so by the British; and the mute, sad, deep expression of grief and pain visible in the poor creatures' looks excited a strange fury in the soldiers—no quarter would have been given at that time..." (Napier on combat against the French in 1811 on the Iberian Peninsula. Quoted in *British Battles on Land and Sea*.)

♦ "After weeks of incessant but minor cannonading, the grand attack was made on the 13th of September, 1782... / By evening the ship cannonade began to slacken; rockets, as signals of distress, were seen soaring into the air, while boats were rowed about the disabled men-of-war, in which our artillery must have made the most dreadful havoc, for, during the short intervals of cessation, a strong, indistinct clamour, the mingled sound of groans, and cries, and shrieks, came floating upward to the ears of the garrison... (*British Battles on Land and Sea* by James Grant.)

♦ "Eternal Father, strong to save, / Whose arm hath bound the restless wave, / Who bid'st the mighty ocean deep / Its own appointed limits keep; / O hear us when we cry to Thee, / For those in peril on the sea." (The Navy Hymn. See the Wikipedia article "Eternal Father, Strong to Save.")

### \*\*\* analysis

♦ According to the Wikipedia article, the term "moral distress" originated in the 1980s in reference to health-care workers. Through "concept inflation" or "co-option," the construct has since been applied to soldiers, police, firefighters, EMTs, legal defenders and lawyers, people in child and adult protective services, and even to veterinarians, leading inevitably to the construct's disparagement: "moral injury Olympics."

♦ In the old days, ships foundering at sea or being blown onto a rocky coast were in distress. Nowadays, *anyone* can feel distress, for *any* reason. A pair of *jeans* can be distressed.

♦ When a term can mean anything to anyone, or includes everyone, it means nothing.

♦ “Mauritius is an island... deep in the Indian Ocean, a few hundred miles to the east of Madagascar... Among the strangest creatures on Mauritius was the dodo. Biologically speaking, the dodo was a flightless pigeon—but huge: as big as a modern farmyard turkey, with a great hooked beak, a bewildered expression, and tiny wings and downy chick-like feathers: a singularly daft-looking animal. / So long as Mauritius remained undiscovered and uninhabited, the dodo thrived. But in the fifteenth century, at the start of the great age of discovery, the first European sailors arrived. Passing ships then stopped regularly at Mauritius for fresh water and fresh meat—not least from the giant Mauritius tortoises. The sailors also ate dodos... By 1681—barely two hundred years since the first European ships made landing—the dodos had been exterminated. Indeed, they have become the world’s favorite symbol of extinction: ‘dead as a dodo.’ To be sure, it probably wasn’t the sailors that finished them off. European rats, which ate their eggs, and other creatures that the ships brought with them, including monkeys, probably did the trick.” (*The Tree: A Natural History Of What Trees Are, How They Live, And Why They Matter* by Colin Tudge.)

That healthy young man is riding while his poor old father walks!" Embarrassed, Nasreddin quickly changed places with his son. But a ways farther, a group of women rebuked Nasreddin. "Why do you ride and make that poor boy walk," one said. Confused, Nasreddin dismounted, and he and his son both walked. A ways farther, a group of people pointed at him, shouted, and laughed. "Look at that!" one person said. "Neither that country man nor the boy has the wit to ride on the back of their donkey!" Nasreddin and his boy immediately mounted the donkey. But a ways farther, an old man rebuked them. "You abuse your poor donkey by both of you riding him and will earn a poor award in Paradise!" he shouted. "One must ride and the other walk!" At the faraway town, the people were astonished when Nasreddin and his son arrived. Both were on foot, hoisting a stout branch between them... from which hung the donkey!

### \*\*\* analysis

♦ Barbara Dancygier and Eve Sweetser have a wonderful discussion of up-down metaphors for time in *Figurative Language*, and give "high / low Middle Ages" as a French example. They mention that the metaphor might relate to "reverence for the past" in French and Chinese. But the basis for the metaphor might also relate to topography. Sound travels farther in all directions from a high point like a mountain peak, as people of mountain cultures know, from Tibet through Afghanistan and Switzerland to the Southern Appalachians.

♦ This is an instance of up-down metaphors for time and contrasts with *up* (*up to now*, *up to date*, etc.). Time seems to come down from the past and then up to the present. Perhaps this reflects a cyclical view of time, or simply a hilly topography.

\*\*\* **analysis**

♦ How can *downhill* mean something easily accomplished and also mean decline and failure? J.P. Postgate, Litt.D., Prof. of Comparative Philology, addressed this question in an Inaugural Address delivered at the opening of the Session 1896-7, at University College, London. He said its relationship to the meaning of easiness was an obvious metaphor. As for decline, he explained that at the time of Plautus, who used the word in both senses, "Roman waggons and carriages had no efficient brakes." In addition, Postgate mentioned that when Plautus used the word for decline or failure, it was always in contrast with a flatter level.

♦ "Winter horseshoes are equipped with little spikes that give a horse traction on snow and ice, and prevent it from slipping. Without them, a horse can neither tow a wagon uphill, nor use them as brakes on the way down. In the Russian winter of 1812, this spelt disaster for Napoleon's reduced force. Horses in summer shoes would have 'fallen down underneath whatever it was they were towing,' in the words of Bernie Tidmarsh, one of Britain's leading farriers. 'They wouldn't have got any grip going downhill any more than they would have going up,' he says. 'The end result would have been broken legs and mutilated limbs.' In some cases the horses were butchered for food while still alive by starving soldiers." ("Napoleon's failure: For the want of a winter horseshoe," by Saul David, BBC, 8 February 2012.)

Oppressor versus oppressed. That's meant highlighting the suffering of Palestinians at almost every turn while downplaying the atrocities of October 7, overlooking how Hamas intentionally puts Palestinian civilians in peril, and giving little weight to the explosion of antisemitic hate around the world." digital Dunkirk

this massive ~ trying to get everyone out (Afghanistan)

### \*\*\* war, conflict, the military...

♦ The "digital Dunkirk" refers to the chaotic two weeks in August of 2021 when the US left Afghanistan. Many individuals, organizations, and particularly serving and former military men used social media to help Afghans get to evacuation points and then get through security perimeters and onto planes flying out. It's a fascinating analogy, and a sign of the times.

♦ "When the North Vietnamese closed the Hai Van Pass, people had to come out by ocean, and so it was almost another Dunkirk." (Homer Smith, US Defense Attache, about early 1975, as Vietnamese refugees and soldiers fled from the North to the South.)

♦ Elderly Americans vividly remember watching on TV the chaotic scenes as the U.S. evacuated its embassy in Saigon in 1975.

♦ "They were surrounded by troops led by Rommel... And being from these ancient Scottish regiments with a very noble tradition, they wouldn't surrender... And in the end it was every man for himself and they all tried to scatter and break through the lines..." (The actor Hugh Grant wonderfully explaining the Battle of St. Valery, "the Other Dunkirk," to Terry Gross. From "No More Mr. Nice Guy: Hugh Grant Embraces the 'Blessed Relief' Of Darker Roles," NPR, Fresh Air, July 23, 2021.)

♦ About St. Valery, Winston Churchill wrote in *Their Finest Hour*, "The fate of the Highland Division was hard, but in after years not unavenged by those Scots who filled their places, re-created the division by merging it with the 9th Scottish, and marched across all the battlefields from Alamein to final victory beyond the Rhine... Some lines of Dr. Charles Murray's, written in the First World War, came into my mind, and it is fitting to print them here..." He quotes twelve lines, the last four being, "For gallant loons, in brochs an' toons, / Are leavin' shop an' yaird an' mill, / A' keen to show baith friend an' foe / Auld Scotland counts for something still."

♦ Many forget that British troops were sent to France *after* Dunkirk, and they too had to be evacuated. As Churchill writes, "We repeated now on a considerable scale, though with larger vessels, the Dunkirk evacuation." About the disaster of the liner *Lancastria*, Churchill writes, "When this news came to me in the quiet Cabinet Room during the afternoon I forbade its publication, saying: 'The newspapers have got quite enough disaster for to-day at least.' I had intended to release the news a few days later, but events crowded upon us so black and so quickly that I forgot to lift the ban, and it was some time before the knowledge of this horror became public." See the Wikipedia article "RMS *Lancastria*."

♦ The runway at Pitomnike saw chaotic scenes as the last flights out left Von Paulus' encircled and doomed Eighth Army to its fate.

♦ The World War II Russian evacuation of the Crimea across the Kerch Strait, and, two years later, the German evacuation of Sevastopol to western parts of Ukraine, Romania, and Bulgaria, have both been referred to as "Dunkirk-like."

There is a mystery and an uncertainty as to the amount of danger we incur, which gives greater play to the imagination, and to the influences of hope and fear. ### \*\*\* analysis

♦ Many elderly people in the US read the beloved John Godfrey Saxe poem "The Blind Men and the Elephant" when they were children. The line I remember to this day is "...each was partly in the right, and all were in the wrong!"

♦ "I had lots of things to carry me across the river. Sometimes I could use a camel, sometimes I could get a boat. But if I knew there was critical timing involved...I would try to arrange in advance for the elephant. The elephant rides pretty smoothly and it's pretty tall. Usually I got on with a ladder, but you could step on its trunk and it would put you on its back. I was always a little nervous about that." (May Guinan, sent to Uttar Pradesh from the CDC in the campaign to eradicate smallpox, on how she would cross a river to get to her headquarters in Lucknow. Another method involved mounting a bicycle, which was then carried on the shoulders of two men. From *The Invisible Fire* by Joel N. Shurkin.)

### \*\*\* Maharajah, Jumbo...

♦ "An elephant which refused to board a Victorian train, forcing a 10-day trek from Edinburgh to Manchester, has finally arrived at the city's station. / *The skeleton* [italics mine] of Maharajah, an Asian elephant bought from a circus by Belle Vue Zoo in 1872, has gone on display on the concourse of Manchester Piccadilly. / The pachyderm and its trainer had to make the 220-mile walk [from Edinburgh to Manchester] after Maharajah refused to get into a carriage. / Maharajah, and trainer Lorenzo Lawrence, became local legends after making the journey from Scotland. / On arrival, Lawrence decided to stay in Manchester with the elephant and became head elephant-keeper at the zoo for over 40 years. / Maharajah died, aged 18, in 1882. / His skeleton was sold to Manchester Museum." ("Maharajah the elephant arrives at Manchester station 147 years late," BBC, 4 June 2019. It seems rather macabre to me to display the skeleton of an animal in a train station...)

♦ The word 'jumbo' comes from the name of an Ethiopian elephant who was brought to the US in 1882 by P. T. Barnum and displayed in Barnum's circus. The poet and etymologist John Ciardi tells Jumbo's story on NPR, "Jumbo's Big Adventure Popularizes a New Word," April 20, 2006.

♦ "The Big Top is coming down—for good," said Tamara Lush in the Associated Press. Feld Entertainment, owners of the Ringling Brothers and Barnum & Bailey Circus, has announced that 'The Greatest Show on Earth' will close in May after a 146-year run. So ends a colorful chapter in the American story... So what killed the circus? Rising transportation costs hurt; so did a 14-year legal battle with activists who claimed circus employees abused elephants. Though Feld ultimately prevailed in court, last year the company released all its elephants to a Florida preserve and 'ticket sales plummeted.' Technology is another culprit: Today, when we have a virtual fantasy world literally in the palm of our hand, 'The Greatest Show on Earth' doesn't seem so great. / 'There is plenty of room for sadness,' said *The Republican* of Springfield, Mass., in an editorial. 'One of America's most enduring and endearing traditions,' the traveling circus brought wonders of the world to small towns across America. Perhaps time has passed the Big Top by. But for more than a century, these shows brought joy to countless millions..." (Ringling Brothers: The circus leaves town." *The Week*, 27 January 2017.)

### \*\*\* war, conflict, the military...

♦ According to the Wikipedia article "British Expedition to Abyssinia," the campaign was a rescue and punitive mission to what is now Ethiopia. Led by Sir Robert Napier and fought by the Bombay Army, it culminated with the British seizure of the fortress of Magdala in 1868 and the suicide of the then leader of Abyssinia, Emperor Tewodros, also known as Emperor Theodore. Harold G. Marcus characterized the whole mission as 'one of the most expensive affairs of honour in history.' It was a triumph of British engineering, and the logistics included over 40,000 animals, among them forty-four trained elephants from India, which carried the heavy artillery on the march into the Ethiopian highlands. In Rudyard Kipling's "Toomai of the Elephants," Kala Nag, the elephant mentioned at the beginning of the short story, was a veteran of the mission: "He had been hoisted into a ship at the end of a steam-crane and taken for days across the water, and made to carry a mortar on his back in a strange and rocky country very far from India, and had seen the Emperor Theodore lying dead in Magdala, and had come back again in the steamer, entitled, so the soldiers said, to the Abyssinian War medal."

♦ "On the 27th, our flotilla was seen standing up the river, at nine in the morning, with all sails set. On beholding these, the Burmese made a sortie again on Campbell's right; and the most remarkable feature in this movement was the appearance of seventeen war elephants in the van, each bearing a howdah full of matchlock men. / Covered by his horse artillery, Campbell charged the bulky animals with his cavalry; the men in the howdahs were speedily shot, and no sooner did the elephants feel themselves unrestrained by the hand of their drivers, 'than they turned their stunted tails to our dragoons, and walked back to the fort with the greatest composure.' / Passing the latter with trifling loss, the flotilla, with its steam-vessel—a source of amazement and terror to the superstitious Burmese—anchored close to the left of Campbell's column." ("Kemendine and Donabue, 1824-5," *British Battles on Land and Sea* by James Grant.)

♦ According to historian John Julius Norwich, Hannibal led 37 elephants over the Alps, and Norwich notes that the Carthaginians must have had some secret way with elephants, as African elephants are generally considered to be untamable, unlike their Indian counterparts.

### \*\*\* analysis

♦ "During the American Civil War the soldier's first experience in combat was called 'seeing the elephant.'" (*On Killing* by Lt. Col. Dave Grossman. A search of the works of Ambrose Bierce, however, finds no mention of this usage. Nor does it appear in the *Red Badge of Courage*.)

♦ "The phrase 'seeing the elephant' is a distinct piece of American verbiage that dates to the 1830's and describes gaining knowledge from a particular experience. It was like going to town to see an elephant which had long been heard of but never seen to that point in a person's life. The phrase really came into vogue as people went West in search of a better life, adventure, and riches. The escape from plain boredom from the familiar surely did give them new insight into a greater world, hence the mythical elephant..." ("Seeing the elephant" by Kevin Kilpatrick, *Center Post-Dispatch*. This sounds plausible, but he includes no examples of usage in speech or written texts.)

♦ "Our candidate promises that his 'world peace' will be based on 'equality' among nations. What on earth does that mean? 'Equality' in what respect, we must ask? In wealth? In power? In prestige? In raw materials? Will Bolivia be the equal of Russia? Will we be the equal of Korea? Will they raise the unequals up to our level? Or will they drag us down to their level? And how will we like it when we get there? If such a thing as 'equality' really existed, which it doesn't, how would a specific candidate get it for us, or for the nations of the world? And when? ♦ "On Earth Day, 1971, nonprofit organization Keep America Beautiful launched what the Ad Council would later call one of the '50 greatest commercials of all time.' Dubbed 'The Crying Indian,' the one-minute PSA features a Native American man paddling down a junk-infested river, surrounded by smog, pollution, and trash; as he hauls his canoe onto the plastic-infested shore, a bag of rubbish is tossed from a car window, exploding at his feet. The camera then pans to the Indian's cheerless face just as a single tear rolls down his cheek. / The ad, which sought to combat pollution, was widely successful...and helped reduce litter by 88% across 38 states... / But while Hollywood trumpeted Iron Eyes Cody as a 'true Native American' and profited from his ubiquitous image, the man himself harbored an unspoken secret: he was 100% Italian." Astonishingly, the Ad Council still features "The Crying Indian" PSA in its "Our History / The Classics" section, along with its War Bonds, Red Cross, Polio, the Peace Corps, and Crime Prevention campaigns.)

### \*\*\* problems, criticism, pushback, snark...

♦ "The NAACP said that it was problematic... but, if you're looking at the Zulu Club within the tradition of masquerading and masking, painting one's face is a part of Carnival, or it's a part of a masquerade, and the Zulus will say that they could not afford masks. It was cheaper and it was accessible for them to actually paint their faces black... I mean, it's a caricature, it's Mardi Gras, it's like everything is exaggerated, if you look at even Mardi Gras Krewe that are traditionally white, they also have these caricatures of white people and European features, and so, it's an exaggeration. And while it's connected to minstrelsy historically, I think that it was more rooted in this idea of a masquerade, a mask. People are really dismissive [of outsiders protesting the Zulus' black face], to be honest with you. I think that New Orleans understands New Orleans' traditions. The city has been very insular, right? A lot of our traditions have just existed without the participation and the scrutiny of people outside of New Orleans, and so I think that for the average black person in New Orleans, including those members of my family, they just simply do not connect the Black Face in Zulu with minstrelsy or making a mockery of black people and most certainly are not looking at it as an offensive tradition." ### \*\*\* analysis

♦ In the old dictionary I use, the only use of *fail* as a noun is in the expression, "without fail."

♦ "[A] failure and a fail are not the same thing. *Failure* is not, in terms of how it is used in actual speech, simply the act of failing. It once was, but over time it has taken on a whiff of personal condemnation. *Failure* suggests, more readily, a rather large-scale, tragic kind of failing; one thinks of an assessment of a person's entire career, marriage, or life, of a head hung low, and the plays of Arthur Miller. 'Epic failure!' then, is a little mean. In modern English, the actual word for simply 'a failing,' with no ominous hint of therapy sessions or a gun going off offstage, is 'a fail.' It's certainly handier for people playing video games or rating one another's sales volume." (*Words on the Move* by the linguist John McWhorter, Chapter 2, "It's the Implication That Matters: Words on the Move." As McWhorter notes, "A linguist's first observation must be that English speakers have been transforming verbs into nouns this way for a good thousand years.")

## fail up (groups / verb)

♦ "And whereas men were handed the keys to a blockbuster after a single indie breakthrough, this rarely happened for women." (The film industry.)

♦ During the 2024 U.S. presidential election, many Democrats disparaged Donald Trump as an example of white privilege who had been allowed to "fail up."

Mashraf says that they have a king and a queen, and the queen makes prophecies, such as 'A girl will die a month from now, falling into the river to the north.' Mashraf says he dances with the fairies. People watch him dancing, but the fairies are invisible.)

♦ The *curupira* is a mischievous red-haired elf who has feet that face backwards and takes delight in making tracks that lead travelers astray. (The Amazon.)

♦ "Over there, so Myra used to say, the Little People dwell in caves on the mountainsides and under the waterfalls. They are a tiny folk,

hardly reaching to a man's knee, but well formed and featured, with long hair reaching nearly to the ground. / They are fond of music and of dancing. Sometimes, on a summer day, when all else was silent about the cab, we would hear a far-off mysterious throbbing somewhere in that glen, and Myra would say to me 'Listen: it is the Little People beating their drums!' / She said they were kind to mortals who think kindly of them; but they play tricks on busybodies and other folk that they do not like. If a man gets too curious and spies on the Little People when they are at their games, or tries to enter their caves without being invited, or pokes behind the small waterfalls with a stick, they will cast a spell upon him so that he loses his way in the woods and goes wandering about in a daze. / When one finds anything pretty in the woods or among the rocks he must say 'Little People, I want to take this,' for it may belong to them, and if he does not ask permission they will stone him away from the place. / Myra used to hint to me that old Grandpa Dale brought most of his bright crystals and colored stones from over there; and so, she said, he must be a great friend of the Little People, or they would not let him find such things, or would make them dissolve and fade away before he could take them out of the glen." And I'm not talking about things like acorns, linden leaves, goosefoot and nettles. They all went in no time. I know fifty-six plants a man can eat. That's how I stayed alive. It was barely spring, there wasn't a leaf on the trees—and there I was digging up roots. I know everything, brother—every root, every grass, every flower, every kind of bark. Cows, sheep and horses can die of hunger—but not me. I'm more herbivorous than any of them.'" (*Life And Fate* by Vasily Grossman, translated by Robert Chandler, New York Review Books. At first the cubs whimpered and cried, but for the most part they slept...reduced to a coma of hunger...while the life that was in them flickered and died down. When the grey cub came back to life...he found...only one sister remained to him. The rest were gone. [And] the food had come too late for her. Fascism is just a kind of meaningless wickedness, an aberration, ‘mass sadism’, the sort of thing that would happen if you suddenly let loose an asylumful of homicidal maniacs. Present Fascism in this form, and you can mobilise public opinion against it, at any rate for a while, without provoking any revolutionary moment. You can oppose Fascism by bourgeois ‘democracy’, meaning capitalism...[F]or the moment we have got to fight against Fascism without enquiring too closely what we are fighting for.” (“Spilling the Spanish Beans” by George Orwell, *New English Weekly*, 29 July and 2 September 1937.)

In a paper published last year, a group of scientists from Europe and the U.S. identified twenty-seven positive, or intensifying, feedback loops in the climate system and only seven negative, or dampening, ones. (A key negative feedback—the so-called Planck feedback—involves the fact that a warmer planet radiates more energy out to space.) They warned that feedback loops could feed on one another and that this could result in a 'sequence of climate tipping points being exceeded, producing 'climate cascades.'" ("When The Ice Melts" by Elizabeth Kolbert, *The New Yorker*, October 14, 2024. She fairly notes, "There is, in principle, nothing wrong with a warmer world, or even one whose climate bounces around.
