

An evening event hosted by the IEEE Canaveral Section was held on May 23rd, 2024. It began at 6pm with a "meet, greet and eat" period where everyone had a chance to mingle and have a light meal of pizza and salad.

While many were continuing to enjoy themselves, the Executive Board had a short meeting. Section chair, Paul Nyffenegger, called the meeting to order at 6:30 pm. Also in attendance were Macauley Osaisai, Ron Jakubowski, Greg O'Neill, Bill Nutter (treasurer) and LMAG member, Dave Cole. One guest was in attendance also.

The next meeting is set for June 27th at Kelsey's in Rockledge. Treasurer, Bill Nutter, reported that no rebates have been received at this time, but should be available in time for the robotics event in October. Student Activities rep, Dr. Mevlut Guvendik is away for the summer but still will be looking for some assistance in moving forward upon his return. Awards rep, Greg O'Neill, has had further contact with the Florida Council Awards and asked for a special meeting with the Section Chair in the near future. They will coordinate that later. Educational Outreach rep, Macauley Osaisai, announced that the Space Visions Symposium, sponsored by CCTS, on May 2nd and 3rd, drew an IEEE member from West Palm Beach and had attendees from such states as Wisconsin, West Virginia, Maryland, Texas and Pennsylvania. The Excom meeting was then adjourned.

Following the Excom meeting, a Technical Talk on Sensors was presented by Dr. Paul Nyffenegger. It covered a brief history of sensors and their development over time, ending with a thought-provoking look at sensor development for the future.
