Item no.	Notes	Action by
CALL TO ORDER	Called to order by Eugenio Carvalheira.	/ tetion by
INTRODUCTIONS	42 attendees to the meeting, 15 of which became members after	
AND QUORUM	establishment of membership.	
AGENDA APPROVAL	Motion to approve agenda by Mike Dood, Craig Preuss seconds. Agenda	
AGENDA AFFROVAL	approved.	
ESTABLISHMENT OF	Membership of the TF was established by raising of hands and volunteering in	
MEMBERSHIP	the chat window.	
CALL FOR PATENTS	Pre-PAR slides were shown	
COPYRIGHT SLIDES	Copyright slides were shown	
CHAIR'S REMARKS	No remarks	
APPROVAL OF PREVIOUS MINUTES	First meeting, no previous minutes to approve	
BRIEF HISTORY	Eugenio presents the background of the group. P13 started a while ago and did not meet for a long period. In the January 2021 meeting, the need for this group was discussed and it was unanimously decided there was a need for a technical report. A rough outline was created and leadership established.	

Item no.	Notes	Action by
TITLE/SCOPE DISCUSSION	C. Preuss - Bring up this report to the Fiber and Cybersecurity subcommittees for possible contributions on this report or to create their own reports to complement. IEC 61850 does not prescribe anything related to the physical layer. Concerns were shared about keeping this within PSCC scope. It was noted that items outside of the scope of this report should also be identified within the report itself. This guide will not cover applications, but instead focus on the fundamentals of IEC 61850 and related standards and be a roadmap to get from point A to point B. No objections noted to scope after some discussion.	
OUTLINE ADJUSTMENTS AND WRITING ASSIGNMENTS	Addition of other topics to the introduction including Related Standards that are needed to understand IEC 61850. It was decided to point to other standards, guides and papers where needed to fully flesh out a subject. Rearranged introduction slightly to put scope at the beginning. Discussed possibility of adding a "where do I go from here" roadmap at the end of the guide based on the reader's background – such as telecom engineer, utility engineer, consulting engineer, etc. Writing Assignments: 1.a – Eugenio Carvalheira and Nicholas Kraemer 1.b – Brittany Chapman and Mike Dood 1.e.i. – Benton Vandiver	
TIME OF FINAL ADJOURNMENT	Jay Anderson motions, Nicholas Kraemer seconds, meeting is adjourned at 9:01AM CST.	
NEXT FACE TO FACE MEETINGS	September, TBD	
FUTURE MEETING ROOM REQUIREMENTS	Room for 30, with projector and teleconference capabilities
