

WIE Tech Talk– IMS Insights Into Intelligent System Deployment

Make a difference Together Virtual Series

Date: 25th October, 2021

Time: 2pm-3:30pm Auckland Time, 12pm-1:30pm, Sydney time

Talk Abstract: The seminar will start with looking at the global challenges faced by the food industry, then go into stages of food production and examples of technology deployment. The seminar will elaborate on instrumentation and measurement insights into the deployment of intelligent systems for plant inspection. Finally, it will end with a remark on next generation measurement systems for plant inspection.
