## Greg Truty

Distinguished Engineer, Chief Architect IBM Mobile Foundation

[gtruty@us.ibm.com](mailto:gtruty@us.ibm.com)

# Mobile - and its effect on the enterprise

IBM Mobile Labs Come to You

# Mobile is changing conventions for industries

## Healthcare

From:

Traditional health institution

To:

Seamless interactions among physicians and providers, improving quality of care, patient safety and efficiency improving patient experience

## Construction

From:

Construction general contractor with remote employees

To:

Empowered construction project managers armed with mobile solutions to pitch new projects in higher-growth industries

## Government

From:

Sitting in traffic jams

To:

Real-time re-direction to optimal routes using mobile info

## But mobile also brings business and IT challenges

### Enterprise Business Model Changes

- New business opportunities based upon geolocation
- Anytime, anywhere business transactions
- Importance of social business interactions

### App Development Lifecycle Complexity

- Complexity of multiple device platforms with fragmented Web, native, and hybrid model landscape
- Connecting the enterprise back-end services in a secure and scalable manner
- Unique mobile requirements (user interface, connected/disconnected use, version upgrades, etc.)
- Faster time-to-market demands and iterative delivery

### Mobile Security and Management

- Protection of privacy and confidential information
- Use of client-owned smartphones and tablets
- Visibility, Security & Management of mobile platform requirements

### Top Mobile Adoption Concerns:

1. Security/privacy (53%)
2. Cost of developing for multiple mobile platforms (52%)
3. Integrating cloud services to mobile devices (51%)

## The quick reaction is to focus on devices and cool apps

Business leaders respond to mobile with,  
'Let's build a really slick mobile app, put it  
up on iTunes and we're done!'

..... the fact [is] that underlying legacy  
applications and business processes need  
optimizing for the mobile experience. “

Clay Richardson, Forrester Analyst

# IBM mobile enterprise capabilities address the spectrum of needs for successful transformation

**Build** mobile apps  
**Connect** & run mobile systems

**Manage** mobile devices and apps  
**Secure** my mobile business

**Extend** capabilities to mobile  
**Transform** my business

- Building & Deploying Apps
- Mobile Lifecycle Management and Testing
- Data Access & Integration

- Device Management
- Network & Data Security and Management
- App Management

- Business Applications
- User Engagement
- Mobile Analytics and Insight

**Application Development**

**IT Ops/CISO**

**Line of Business**

# IBM has invested substantially in mobile to create a broad and deep solutions portfolio

**Build** mobile apps  
**Connect** & run mobile systems

**Manage** mobile devices and apps  
**Secure** my mobile business

**Extend** capabilities to mobile  
**Transform** my business

## IBM Mobile Foundation

# Building & delivering applications

## A deeper look at Build & Connect capabilities

### Build & Connect

**Build** mobile apps  
**Connect** & run mobile systems

### Manage & Secure

**Manage** mobile devices and apps  
**Secure** my mobile business

### Extend & Transform

**Extend** capabilities to mobile  
**Transform** my business

### Customers can now build enterprise mobile applications that:

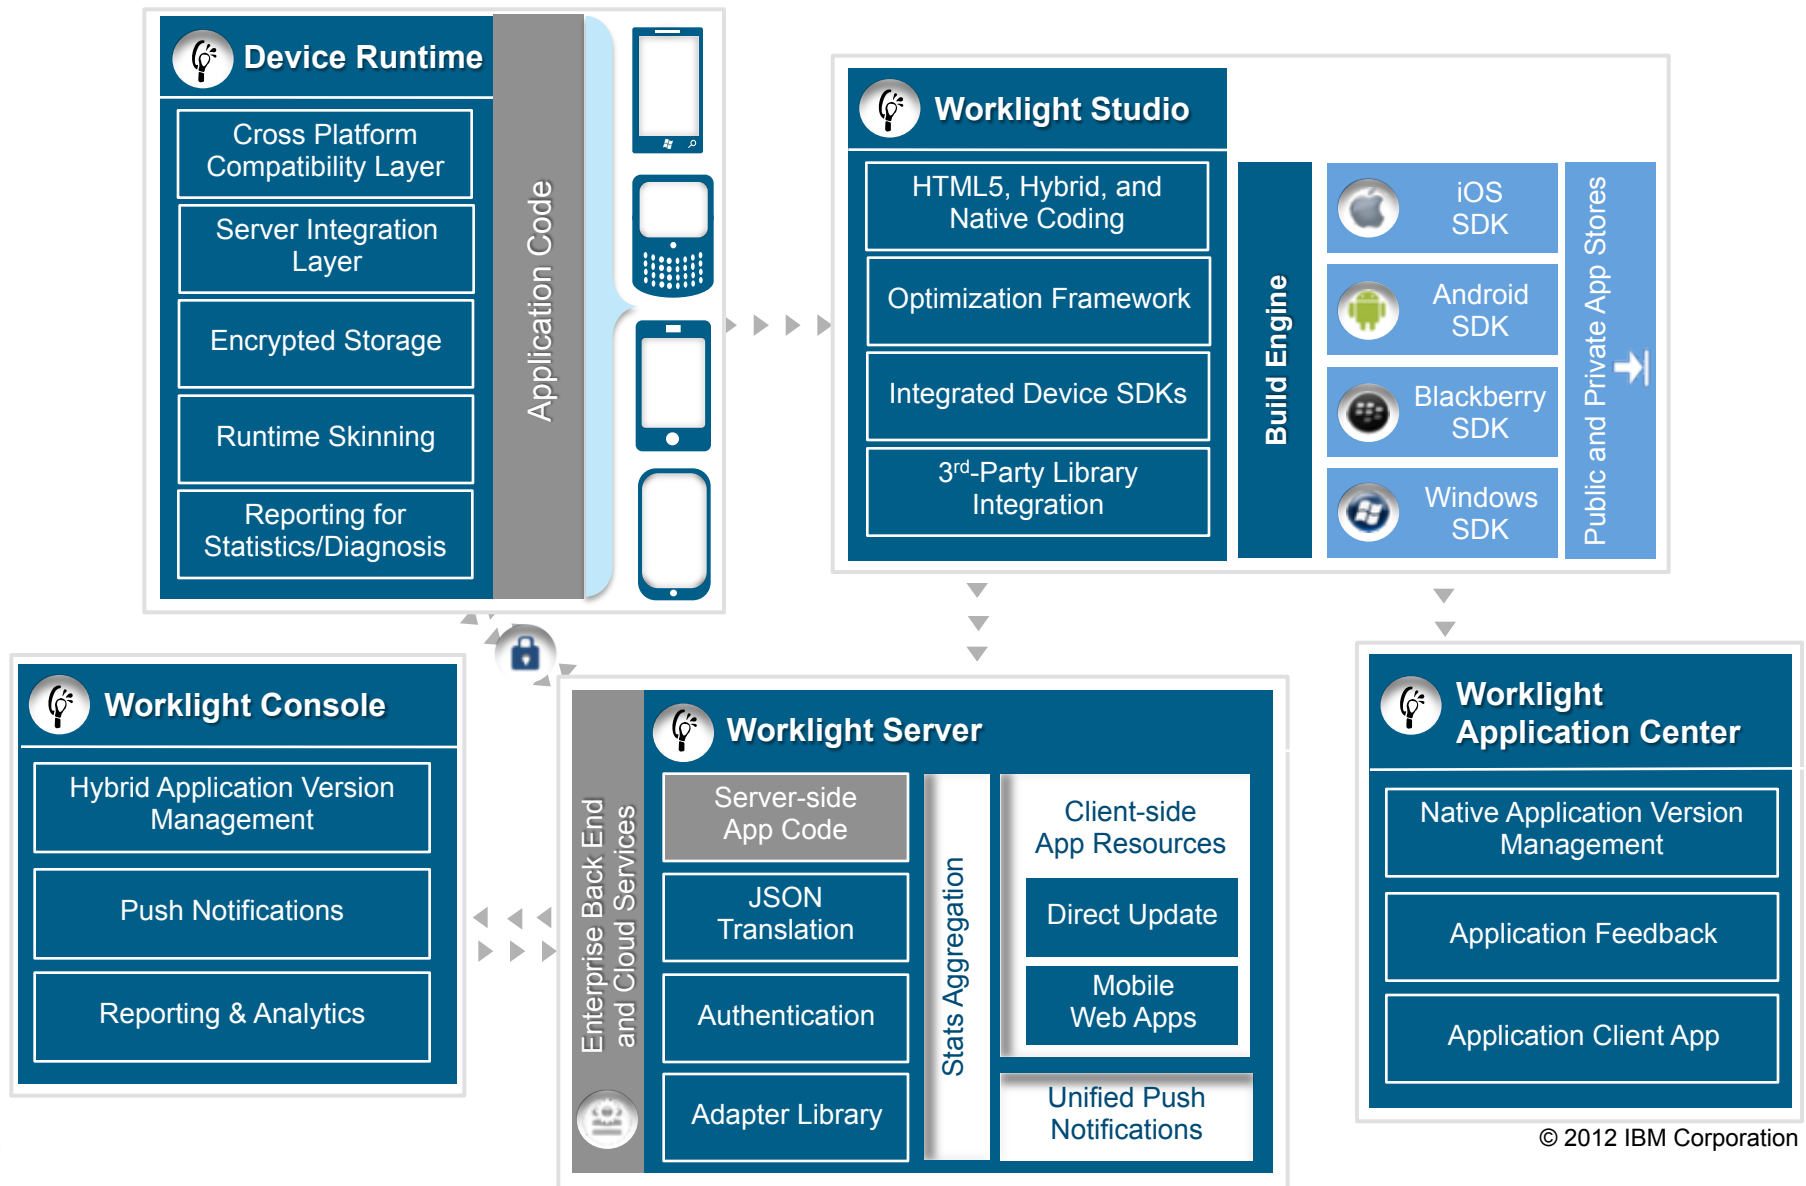

- Run on multiple mobile devices
- Connect to enterprise back-end applications and information systems
- Fulfills fast time-to-market requirements and can be rapidly updated with new releases
- Deliver high quality user experience

### Worklight

*an open, complete, and advanced mobile application platform for HTML, hybrid, and native applications*

# Worklight Architecture

# Worklight addresses numerous enterprise mobile pain points

## Apps Development

- Build once. Run anywhere using HTML5/JS/CSS and Cordova
- Android, iOS, Blackberry, Microsoft, iGoogle, Facebook app, Adobe AIR
- Runtime Skins for different resolutions
- Application Lifecycle Management
- Centralized Build Process

## Security

- Secured offline access
- On device encryption of user data
- Single sign-on mechanism
- SSL encryption
- Protection against reverse engineering vulnerabilities
- Multi-factor authentication

## Enterprise Integration

- Direct access to back-end systems
- Leverage existing SOA services
- Server-side caching

## Application Management

- App distribution
- App Version management
- Remote disabling apps
- Direct Update
- Push Notification service management
- Analytics and Usage report

## Middleware

- WebSphere Application Server ND
- Reliable, Highly Available and Scalable

# Scaling mobile enterprise development

# Enact a collaborative, multi-platform mobile development lifecycle

*IBM Mobile Development Lifecycle Solution*

**New!**

- Best-of-class **collaborative mobile application development lifecycle capabilities**
  - Accelerate productivity with **mobile development best practices** and tested integrated configurations
  - Develop **native and multi-platform hybrid mobile applications**
  - **Distributed team build and test** integrated with the mobile application platform
  - “mobile device-cloud” service integration for **on-device testing**
  - Support fast-paced development for mobile with **agile methodologies**

**IBM Mobile Development Lifecycle Solution  
(Planned for 4Q 2012\*)**

(\*) IBM's statements regarding its plans, directions, and intent are subject to change or withdrawal without notice at IBM's sole discretion. Information regarding potential future products is intended to outline our general product direction and it should not be relied on in making a purchasing decision. The information mentioned regarding potential future products is not a commitment, promise, or legal obligation to deliver any material, code or functionality. The development, release, and timing of any future features or functionality described for our products remains at our sole discretion.

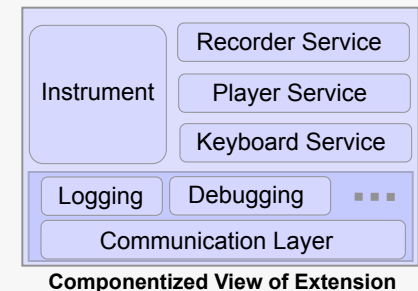

# Deep Application Instrumentation for Mobile Function Test

## Mobile Testing Tech Preview

App instrumentation libraries provide a transparent overlay for user interaction with the mobile app. Architecture adheres to adapter model followed by other Rational quality management products.

**Architecturally**, our approach is to have an adapter that deals with all mobile devices. An extension specific to the mobile platform resides on the device. Event capture and playback services together with UI elements constitute each extension.

## Key Goals for Mobile Test Automation

- **Dynamic Instrumentation of Android Mobile Applications** (without requiring source/static enablement)
  - **Adapter model with specific extensions for multiple mobile platforms**
    - **Capture with high-fidelity replay of multi-touch events**

# Integrating with the Enterprise

## A deeper look at Build & Connect capabilities

### Build & Connect

**Build** mobile apps  
**Connect** & run mobile systems

### Manage & Secure

**Manage** mobile devices and apps  
**Secure** my mobile business

### Extend & Transform

**Extend** capabilities to mobile  
**Transform** my business

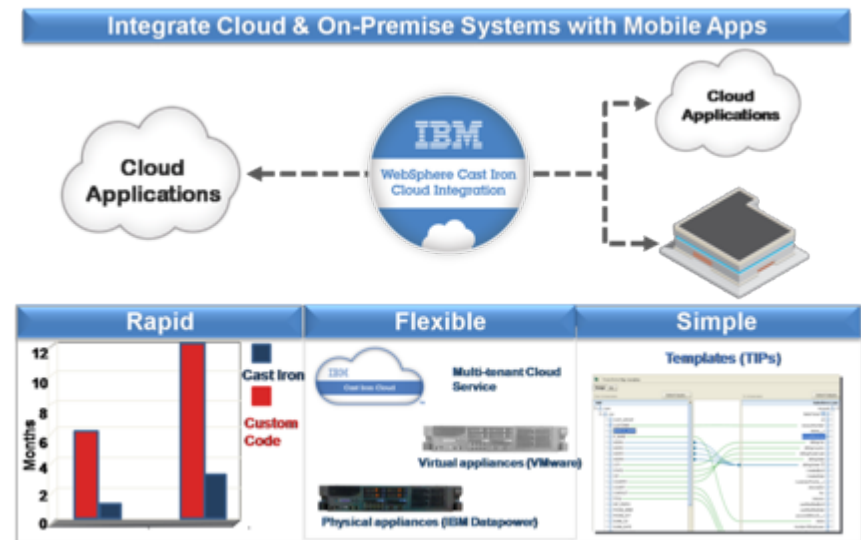

### Rapidly connect mobile apps

- Centrally manage all integrations and connect information from a variety of Cloud and on premise applications
- Simplified “configuration, not coding” approach to connecting cloud, on premise and mobile applications across devices
- Rapid cloud integration for real-time access to back end data across application platforms

**WebSphere Cast Iron -**  
*Rapidly connect mobile apps with the Cloud and Back-end systems*

## Rapid, simple & flexible connectivity for mobile apps *WebSphere Cast Iron Hypervisor Edition*

- **Native connectors** and template integration processes (**TIP's**) to connect mobile apps to backend & cloud systems, **reducing project costs up to 80%**
- **Bidirectional connectivity and business logic** to increase data quality and streamline business processes
- **Centralized monitoring** for all connectivity projects
- **Simple** and **flexible**, user-friendly, wizard-based, “configuration, not coding” architecture provides **best-practices** and enable repeatable mobile integration project success

*Simple and flexible integration for all connectivity projects, allowing you to rapidly integrate SaaS and back-end systems with mobile apps*

# Securing the mobile delivery channel

## A deeper look at Manage & Secure capabilities

### Build & Connect

**Build** mobile apps  
**Connect** & run mobile systems

### Manage & Secure

**Manage** mobile devices and apps  
**Secure** my mobile business

### Extend & Transform

**Extend** capabilities to mobile  
**Transform** my business

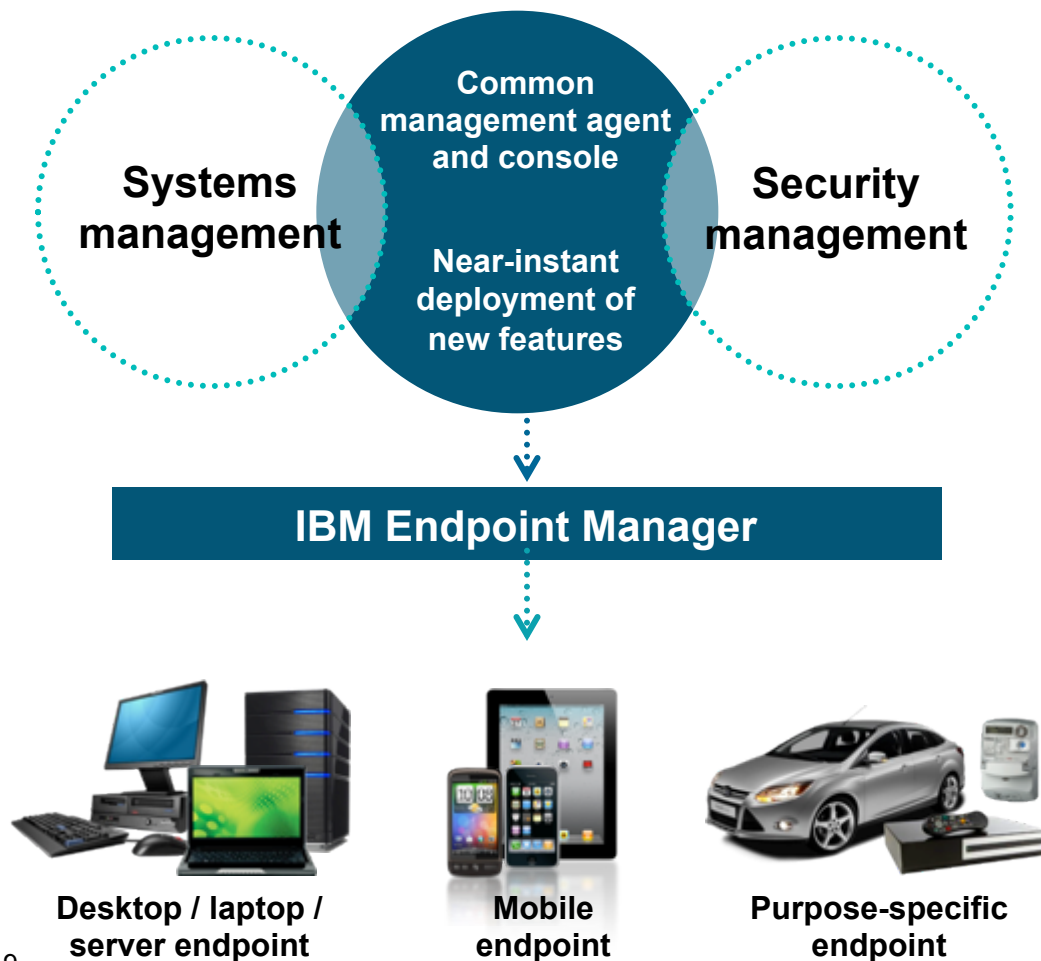

### Customers can now:

- Use IBM Endpoint Manager for mobile visibility, security and management
- Use IBM Security Access Manager to authenticate and authorize mobile users and devices
- Utilize managed services for complete mobile landscape management

**IBM Endpoint Manager for Mobile Devices** –  
*extending visibility, control and automation for mobile*

# Extending visibility, control and automation to mobile devices

## IBM Endpoint Manager for Mobile Devices *Building on the July 2010 BigFix acquisition*

### Introduced in March 2012:

- Advanced management for iOS, Android, Symbian, and Windows Phone
- Unified management automatically enables VPN access based on security compliance
- Integration with back-end IT management systems such as service desk, CMDB, and SIEM
- Security threat detection and automated remediation
- Extends IBM's existing 500,000 endpoint deployment

# How does Endpoint Manager manage devices?

## Agent-based Management

- Android via native BigFix agent
- iOS via Apple's MDM APIs

## Email-based management through Exchange and Lotus Traveler

- Supported platforms: iOS, Android, Windows Phone, Windows Mobile, Symbian

Category	Endpoint Manager Capabilities
Platform Support	Apple iOS, Google Android, Nokia Symbian, Windows Phone, Windows Mobile
Management Actions	Selective wipe, full wipe, deny email access, remote lock, user notification, clear passcode
Application Management	Application inventory, enterprise app store, whitelisting, blacklisting, Apple Volume Purchase Program (VPP)
Policy & Security Management	Password policies, device encryption, jailbreak & root detection
Location Services	Track devices and locate on map
Enterprise Access Management	Configuration of Email, VPN, Wi-fi
Expense Management	Enable/disable voice and data roaming

# A Holistic Approach to Managing & Securing the Mobile Environment

## 1 Develop and Communicate Formal Mobile Strategy, Policies

**2** Efficiently acquire, deploy, secure, manage, and de-provision devices

**3** Protect devices from malware, data theft

**4** Actively manage corporate device purchases, service contracts, usage

PUBLIC WIFI

TELECOM PROVIDER

INTERNET

**5** Test, deliver and manage security-rich apps

**6** Manage users and access to enterprise apps and data

**7** Manage and optimize enterprise wireless networks

MOBILE APPS

SECURITY GATEWAY

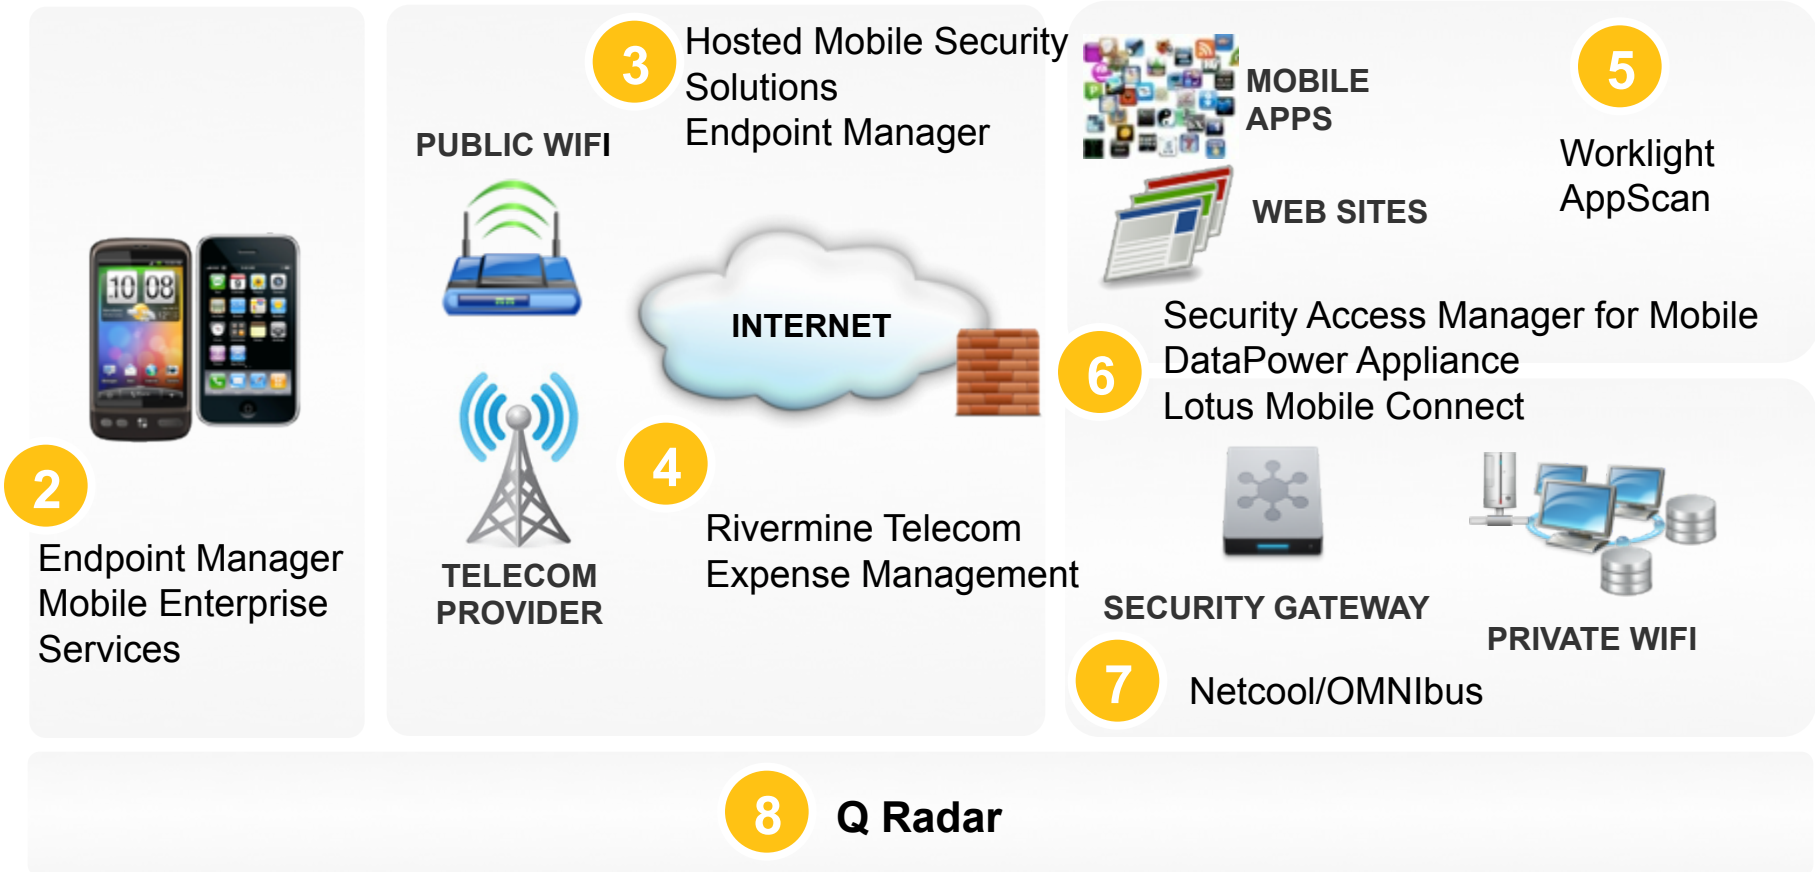

PRIVATE WIFI

## 8 Deliver an Adaptive Security Posture

# A Holistic Approach to Managing & Securing the Mobile Environment

## 1 IBM Global Business, Technology, & Security Services

# Multi-channel capabilities

## A deeper look at Extend & Transform capabilities

### Build & Connect

**Build** mobile apps  
**Connect** & run mobile systems

### Manage & Secure

**Manage** mobile devices and apps  
**Secure** my mobile business

### Extend & Transform

**Extend** capabilities to mobile  
**Transform** my business

### Customers can now

- Use our strategy and planning services to build a mobile strategy and transform their business
- Use our industry frameworks and solutions delivered via software, strategy, managed services and business process consulting
- Use mobile to engage their own customers in new ways with WebSphere Commerce and IBM Social Collaboration software

### Social collaboration software

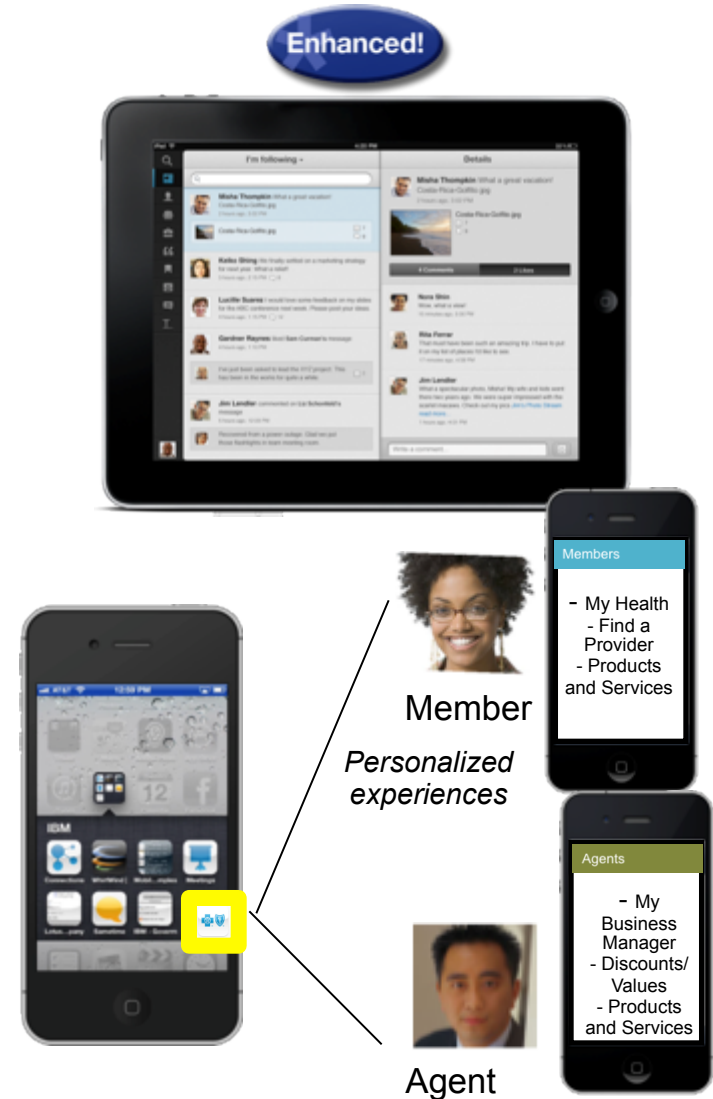

*mobile access to enterprise social collaboration*

# Create new ways to engage anywhere

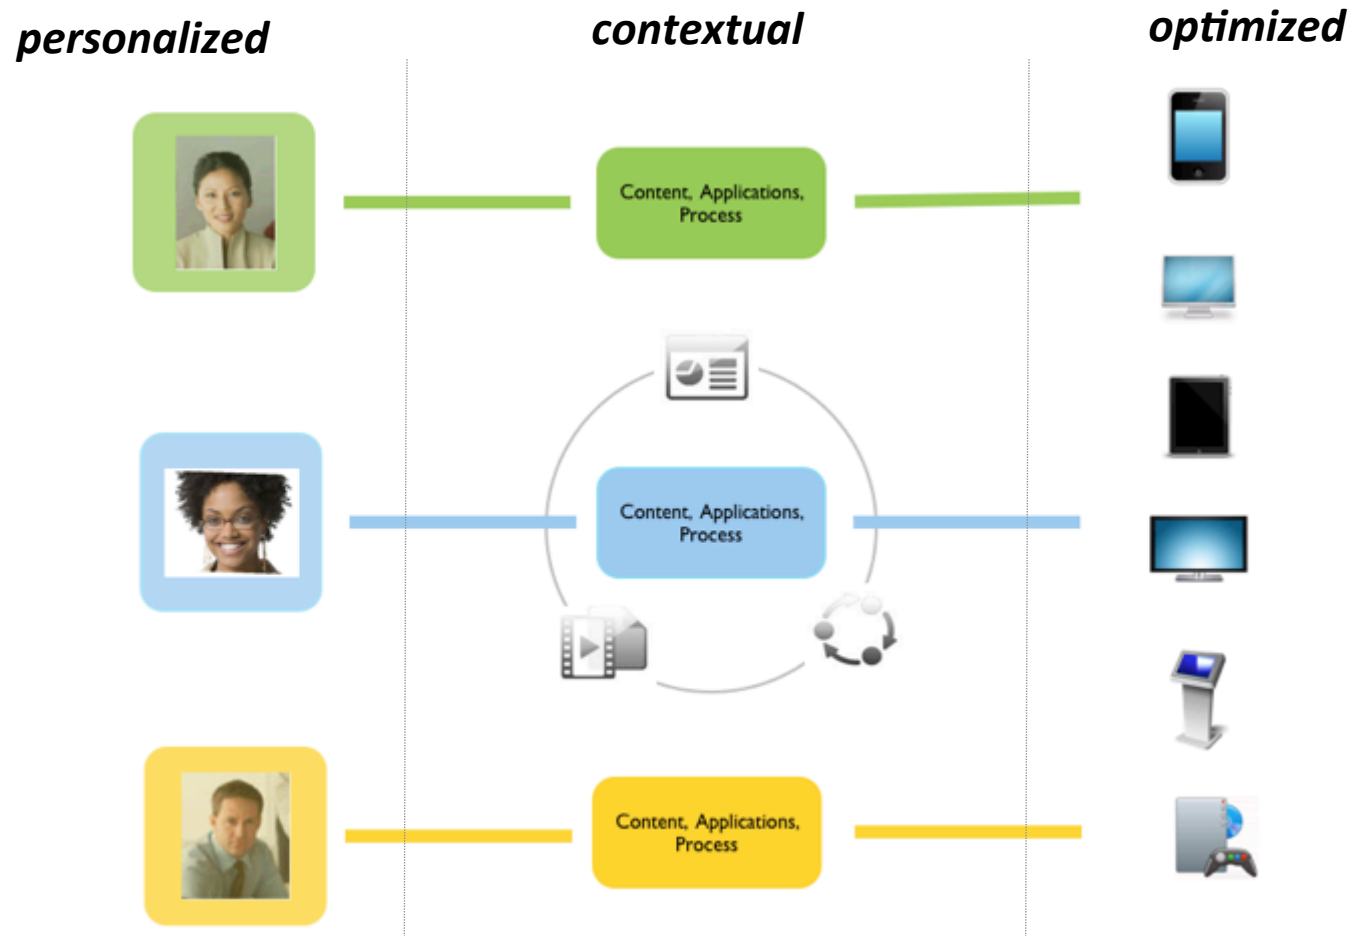

*IBM mobile solutions for social business*

- **Make your workforce smarter** with new security-rich social capabilities delivered to mobile devices
  - Stay on top of key work activities and actions to maintain productivity
  - Locate nearby colleagues through geo-location (user choice)
  - Protect company data with local/remote data wipe capability
  
- **Delight your customers** with new multi-channel capabilities that deliver integrated, personalized web experiences
  - Tap into mobile device specific features
  - Deliver consistent messaging and content across web experience platforms -- web, mobile web, mobile hybrid
  - Distribute hybrid apps in app stores

# Challenge

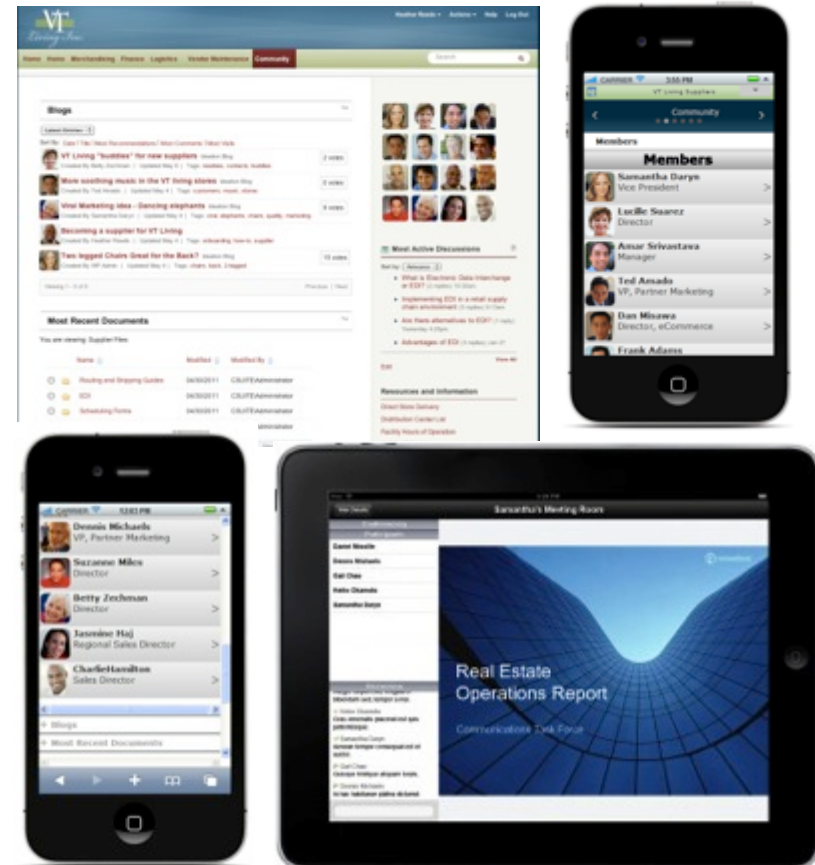

- Mobile devices have significantly expanded the number of channels (tech & business) that must be supported by applications
- Industry trends are rapidly driving the convergence of mobile, web, and desktop experiences

# Tackling multi-channel management

## *Examples of delivery challenges:*

- Adaptive content to channel context
- How to ensure consistent entitlements
- Multi-brand management and “virtual” sites
- Consistent experience (requires shared code & services)

# Customer experience management

## A deeper look at Extend & Transform capabilities

### Build & Connect

**Build** mobile apps

**Connect** & run mobile systems

### Manage & Secure

**Manage** mobile devices and apps

**Secure** my mobile business

### Extend & Transform

**Extend** capabilities to mobile

**Transform** my business

#### Customers can now:

- Automatic detection of customer struggle
- Obtain clear visibility across its user base, site and applications
- Understand customer feedback for making improvements

#### **IBM Tealeaf CX Mobile**

*Visibility into usage across the user base, site, and apps*

# Discover what's working and what isn't – and WHY

*Tealeaf CX Mobile*

## Visibility into user success & failure

- Automatic detection of customer struggle, obstacles or issues
- Understand customer feedback for making improvements
- Visibility into your mobile usage across the user base, site and apps

## Accelerate time-to-market

- Eliminate poor quality to deliver winning mobile services
- Identify cause without having to update or re-launch your services
- Rapidly evaluate mobile features – adoption, success & failure points

## Make the right mobile investments

- Quantify business impact to prioritize decisions: fix, invest, remove
- See the actual usage of mobile services rather than the expected

Mobile Site

Native Apps

Hybrid Apps

HTML5

## IBM is leading the charge

95% of IBM employees are issued laptops  
Over 100,000 smartphones and tablets with access to the IBM network and growing rapidly!  
Personally owned devices can be used for business purposes  
Strong dependency on collaboration and social media tools to conduct IBM business and stay connected

*IBM's BYOD program "really is about supporting employees in the way they want to work. They will find the most appropriate tool to get their job done. I want to make sure I can enable them to do that, but in a way that safeguards the integrity of our business."*  
– **IBM CIO Jeanette Horan**

## How did IBM become a mobile business?

- Established policies for mobile employees
- Established policies for personally-owned devices
- Sold expensive office space and created world-wide mobility centers
- Launched small, focused “opt-in” BYOD pilots. Resisted the urge to “boil the ocean”
- Embraced collaboration and social media tools to allow mobile devices to stay connected

### **A highly diverse workforce:**

- 425,000 employees worldwide
- 50% workforce has less than 5 years of service
- 50% of employees work remotely – not from a traditional IBM office
- 71% of employees are outside the US

## Next Steps

- Learn more at:  
[www.ibm.com/mobile-enterprise](http://www.ibm.com/mobile-enterprise)
- Access white papers and webcasts
- Get product and services information
- Download and begin using IBM Worklight and IBM Cast Iron
- Talk with your IBM representative or IBM Business Partner to find the right next step for you
