

AUTHORIZED CertifAIEd™ ASSESSOR

Being an IEEE CertifAIEd™ Authorized Assessor enables you to acquire additional expertise, gain credibility, and expand your professional and technical portfolio. An IEEE CertifAIEd Authorized Assessor is qualified to perform assessments, or can be leveraged by Certifiers in support of the certification process. As an IEEE CertifAIEd collaborator, you become part of an IEEE global ecosystem, opening doors to new AI ethics certification opportunities, and the potential to invest in expertise and thrive in AI Ethics implementations.

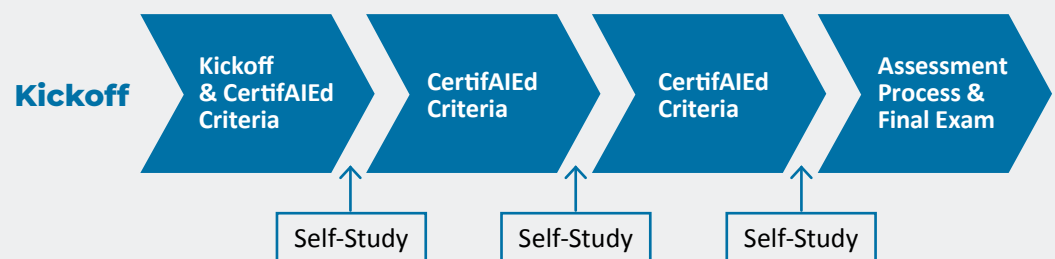

Individuals who are interested in becoming IEEE CertifAIEd Authorized Assessors undergo in-depth training in AI ethics and the IEEE CertifAIEd certification process. Trainees learn about the importance of meeting ethical criteria for AIS products, services, and systems, how to assess the ethicality of an AIS, and how to get it recognized with a mark of ethics. Upon successful completion of an exam, individuals apply to be qualified as an IEEE Authorized Assessor.

IEEE CertifAIEd Authorized Assessors are qualified to guide organizations towards responsible innovation by:

- Providing services to help meet ethical compliance goals based on IEEE CertifAIEd criteria (independent of an IEEE CertifAIEd assessment).
- Helping to assess and identify an AIS's ethical impact.
- Conducting a formal assessment against IEEE CertifAIEd criteria.
- Reviewing the formal assessment documentation for certification purposes.

IEEE CertifAIEd Training Schedule

The IEEE CertifAIEd Assessor Training is comprised of online training; interactive learning; and self-study assessments on real-life cases:

Duration: Total of two weeks including self-study times.
