

Booz | Allen | Hamilton

Booz Allen Hamilton, a leading global consulting firm, has more than 19,000 employees serving clients on six continents. Integrating the full range of consulting capabilities, Booz Allen is the one firm that helps government and commercial clients solve their toughest problems with services in strategy, operations, organization and change, and information technology.

We are currently hiring **Java/ J2EE Developers** from mid level to lead roles.

Key Role:

Work as a Web Services developer using object-oriented design and development tools to assist in the design and development of Web Service-based enterprise applications. Maintain responsibility for the design, development, and test of Booz Allen service-oriented architecture projects supporting the clients and the project team. Automate complex business processes with workflow engines. Provide design and development services to address the federal government's most challenging technology needs. Analyze design elements with the goal of assuring that requirements, concepts, and interfaces meet functionality and are verifiable. Perform detailed COTS tool comparisons based on project requirements.

Booz Allen Hamilton (www.boozallen.com) has been ranked time and again as the most congenial and satisfying place to work in our industry. We offer strong career paths with a wide array of tools to proactively manage their professional and personal growth. To meet the needs of our highly diverse staff, Booz Allen Hamilton offers a choice of benefit plans and levels of coverage, including flexible health benefits, family-friendly policies and programs, profit-sharing, and savings plan. Our vision is to be the absolute best management and technology consulting firm measured by the value we deliver to our clients and our strength and spirit as a firm.
