

# Are You A Professional in the Power Industry Who Would Like to Learn More About the Electric Power System?

- **Do You** work in the power industry but not as an engineer?
- **Would You** like to understand more about the technical aspects of the industry in a format that is geared to non-technical professionals?
- **Are You** an engineer new to the industry, or working in another industry who would like to transition to the power industry?

**If you answered YES to the questions above...  
Register for our upcoming course:**

## Plain Talk About the Electric Power Industry

**May 13-15, 2014 in Tampa, Florida  
Hyatt Place Tampa Airport/Westshore**

- **Power System Basics**-Understanding the Electric Utility Operation Inside and Out
- **Distribution System**-Delivering Power to the Customer
- **Transmission System**-The Interconnected Bulk Electric System

*These courses will provide you with the practical knowledge you need to help you understand the electric power system and how you can apply that knowledge to work better and smarter!*

PES Plain Talk courses for the Power Industry Professional will help you to understand technical aspects of the Electric Power System, even if you do not have an engineering background. You will gain insights into the concerns of engineers, the demands of regulators and consumer groups, and the factors and trends that impact the operation of today's electric power systems. These courses are also appropriate for non-power engineers who are transitioning to the electric power industry.
