## Co-Treasurer's Moment

*As a member of the Orlando IEEE PES/IAS/PEL chapter Executive Committee since 1998, I'm very excited for 2021! We have the largest and most active chapter leadership team ever. If I can brag for a moment, as a brand new team they brought together multiple events in 2019, including a fun outing to Top Golf. For 2020 they managed three in-person events before the pandemic forced us to use online meetings, and even then this team put together the annual tech conference and an additional tech conference on Space Weather that had over 50 attendees!*

*This team has new ideas on meetings, new tools for organizing and new methods to deliver those meetings. We think that 2021 is going to be an interesting year! As always we are looking for ideas on events and speakers. So if you have a facility or a project you want to show off, or a class you are willing to teach, let us know! We can work with anything from a 20 minute show & tell of cool project, to a virtual tour, to a full day class. Remember a show & tell or a tour doesn't have to be within our PES/IAS/PEL charter, it just has to be of interest to engineers!*

**\* As always, if you would like to be removed from this email list, please reply back and we will remove you.**
