

**IEEE Power Engineering Society
Switchgear Committee
C37.24 WG Report, October 10, 2000, Tucson, AZ
Guide for Evaluating the Effect of Solar Radiation on Outdoor
Metal-Enclosed Switchgear**

1. The working group met on October 10 with 5 members and 4 guests.
2. Draft 3 (revision 8-25-2000) was reviewed during this meeting. Most of the comments were editorial. Significant items which require rewording and re-arranging the sentences include:
 - Clause 3, “Operating limitations”
 - Subclause 4.1, “Ambient Temperatures”
3. WG C37.23 have approved proposed wording (by WG C37.24) for metal-enclosed bus. Ram Iyer will send a confirming e-mail to WG C37.24 chair for documentation.
4. Comments received from IEEE’s Publishing Administrator (Greg Kohn) were discussed during the meeting.
5. Draft 3 was sent by e-mail on 9-22-2000 to Switchgear Assemblies Subcommittee for their comments. Comments received from members of SA were discussed by WG. It is requested that any additional comments by Switchgear Assemblies Subcommittee be sent to Dave Gohil by 11-1-2000.
6. Final revision of draft 3 will be completed by 11-8-2000 and re-circulated to WG. It is expected that a formal request for forming the balloting group will be made by 12-15-2000.
7. Motion 1A was made to form the ballot group.
