

SCC21 Liaison Report  
Presented to LVSD  
By P. J. Notarian

Distributed Resources Interconnected with Electric Power Systems

The work of SCC21 is continuing. The purpose of the standard is to provide a standard for uniform connection of distributed resources with electric power systems. The draft was balloted in Feb. 2001 and the comments are still being reviewed. The P1547 writing group met on Jan. 31 - Feb. 1, Mar. 5-7, April 9-12 and April 30 - May 1. Another meeting is scheduled for June 4-7.

Other associated projects are P1589 for Conformance Test Procedures for Equipment Interconnected With electric Power Systems and P1608, which is the Application Guide for IEEE 1547.

Status and a copy of the working document may be found on the IEEE Standards website under Working Groups/ Power and Energy/ P1547.

The chair of both P1547 and SCC21 is Richard DeBlasio. He can be contacted at:
