C37.13.1 Working Group Report
St. Pete Beach, Florida
May 6, 2003

C37.13.1 Definite Purpose Switching Devices for Use in Metal-Enclosed Low-Voltage Power Circuit Breaker Switchgear

The Working Group met on May 6 with 4 members and 12 guests.

The chair wishes to express thanks to Mr. Puckett and Mr. Olsen for their efforts in pushing the draft towards ballot.

The comments made by Messrs. Puckett and Olsen were discussed. Assignments were made and a plan created to get the document ready for ballot this summer.

We hope to have the ballot completed in time to review ballot results and comments at the Fall meeting in Portland.
