The following is the Low-Voltage Switchgear Devices Subcommittee (LVSD S/C) report to ADSCOM for the 07-May-2007 meeting in St. Pete Beach, Florida.

LVSD S/C has a current membership of 17 members, with normal attendance in the range of 20 to 25 persons. Please see the "Low-Voltage Switchgear Devices Roster and Mailing List" available on the Switchgear Committee website.

LVSD has active working groups as follows:

- C37.13 (LV AC PCBs Used in Enclosures) – Currently ballot comments are being resolved.
- C37.13.1 (Standard for Definite Purpose Switching Devices for Use in Metal Enclosed LV PCB Swgr) – Published 10/2006.
- C37.14 (Standard for LV DC Power Circuit Breakers Used in Enclosures) – Task Force formed to recommend actions concerning standard.
- C37.16 (LV CBs and AC Power Circuit Protectors – Preferred Ratings, Related Requirements, and Application Recommendations) – Currently PAR is being submitted and revision of document is in process.
- C37.17 (Standard for Trip Devices for AC and General Purpose DC LV PCBs) – Currently revision of document is in process.
- C37.27 (Application Guide for LV AC Nonintegrally Fused PCBs (Using Separately Mounted Current-Limiting Fuses) – Currently ballot comments are being resolved.

C37.13 Clarification Request – Response to request for clarification concerning testing 60 Hz rated breakers at 50 Hz being reviewed for response. This will include coordination with NEMA and C37.50.

Please see "Low Voltage Switchgear Devices Subcommittee / IEEE Switchgear Committee Document Status" available on the Switchgear Committee website for additional details.

The Subcommittee meeting will be held on Wednesday, 09-May-2007 at 1:30 PM.

Sincerely,  
D. J. Edwards  
Subcommittee Chair  
Low Voltage Switchgear Devices  
cc: Keith Flowers
