The following is the Switchgear Assemblies Subcommittee report to ADSCOM for the 8-May-2007 meeting in St. Pete Beach, FL.

The Switchgear Assemblies Subcommittee has a current membership of 26, with normal attendance at meetings in the range of 25-30 persons. Please see “Switchgear Assemblies Subcommittee Roster and Mailing List” available on the Switchgear Committee web site.

The subcommittee has active working groups as follows:

- C.37.20.1b (LV ME Switchgear) amendment to C37.20.1 (to be disbanded).
- C37.20.2 (MV Metal-Clad Switchgear) revision, 3rd WG meeting in St. Pete Beach.
- C37.20.3 (MEI Switchgear), 1st WG meeting in St. Pete Beach.
- C37.20.4 (Switches for ME Switchgear), 1st WG meeting in St. Pete Beach. This revision will merge the content of C37.22 (transferred from NEMA) into C37.20.4.
- C37.20.6 (G&T Devices) revision, 3rd WG meeting in St. Pete Beach
- C37.20.7 (Internal Arcing Tests) revision, conditionally approved by RevCom in June, 2006, recirculated once for legal issues, and second recirculation delayed to resolve issues. RevCom approval withdrawn, Dec, 2006. Expect to resolve issues and recirculate following the St. Pete Beach meeting.

Reaffirmation ballots on C37.20.3, C37.20.4 and C37.121 (Unit Substations) were successful and all three were reaffirmed by the Standards Board in 2006.

Please see “Switchgear Assemblies Document Status” available on the Switchgear Committee web site for additional details.

The Subcommittee meeting will be held on Wednesday, 9-May-2007 at 3:45 PM.

Sincerely,

T. W. Olsen
Subcommittee Chair
Switchgear Assemblies
