

Date: October 15, 2008
To: Main Switchgear Committee
From: Frank DeCesaro
Subject: HVTT Liaison Report

- The HVTT committee is still working on the revision of IEEE-4. Revision includes:
 - Harmonizing to IEC 60060-1 and IEC 60060-2 where possible
 - Layout and numbering style similar to IEC documents.
- IEEE -4 is presently progressing in final formatting and editing by HVTT members. It will be submitted for balloting after that.
- Although the HVTT is not involved with the IEC documents the chair person is a member of TAG for TC-42. He has commented that in the last 6 months the CDV's for IEC 60060-1 and IEC 60060-2 were voted on. A meeting will occur in Brazil in late November is to discuss country comments on both. The US will be sending meeting notes in writing.
