

Minutes WG PC37.11  
Electrical Controls for High Voltage Circuit Breakers  
Wednesday, September 30, 2009  
10:15 - 12:00  
Denver, CO

- I. Welcome
- II. Introductions
- III. Review Patent Slides
- IV. Approval of Minutes

Minutes from the Asheville meeting were approved as previously published.

- V. Old Business

Changes to the document were reviewed as Draft 0.2. Comments to the draft made by the working group will be incorporated and circulated to the working group as Draft 1.

The working group discussed and agreed to adding additional requirements for dielectric failure and alarm circuits as well as mechanism energy storage alarm circuits.

The working group discussed and agreed to add an additional figure to generally specify the control circuits which use solid state components for tripping and closing functions.

The working group discussed adding a general statement that circuit breakers designs that incorporate electronics should take into account electromagnetic interference in their design.

- VI. New Business

There was no new business

- VII. Adjournment

The meeting was adjourned at 12:00 on September 30, 2009.
