

Minutes of the meeting held in Denver (CO), on September 28, 2009

The WG Revision of C37.015 met in the afternoon of September 28, 2009 in Denver, CO, with 12 members and 29 guests attending.

The following agenda was used:

- Introduction of members and guests
- Patent slides
- Results of the first recirculation ballot
- Comment resolution
- Any other business

The comments on the first recirculation ballot were discussed. The two negatives were resolved. The second recirculation ballot was released on September 29, 2009, with a closing date of October 9.

One negative ballot remains unresolvable. It is related to the use of the term “var” for reactive power. It should have been “VAR”, in honour of Volt and Ampère. Correspondence with SCC 14 has confirmed that the proper symbol for reactive power is “var”.

It is assumed that the document is ready for publication after the closing second recirculation ballot.

No further meetings are anticipated.

Anne Bosma

Chair WG Revision of IEEE C37.015
